**EURONET WORLDWIDE, INC. AND SUBSIDIARIES
NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS**

(1) GENERAL

Organization

Euronet Worldwide, Inc. and its subsidiaries (the Company or Euronet) is an industry leader in processing secure electronic financial transactions in three principal business segments. Euronet's Prepaid Processing Segment is one of the world's largest providers of top-up services for prepaid products, primarily prepaid mobile airtime, distributing these products in Europe, the Middle East, Asia Pacific and the Americas. The EFT Processing Segment provides end-to-end solutions relating to operations of automated teller machine (ATM) and point-of-sale (POS) networks, and debit and credit card processing in Europe, the Middle East and Asia Pacific. The Money Transfer Segment, comprised primarily of the Company's RIA Envia, Inc. (RIA) subsidiary and its operating subsidiaries, is the third-largest global money transfer company based upon revenues and volumes, and provides services through a sending network of agents and Company-owned stores primarily in North America and Europe, disbursing money transfers through a worldwide payer network.

Basis of presentation

The accompanying unaudited consolidated financial statements have been prepared from the records of the Company, in conformity with accounting principles generally accepted in the U.S. (U.S. GAAP) and pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). In the opinion of management, such unaudited consolidated financial statements contain all adjustments (consisting of normal interim closing procedures) necessary to present fairly the financial position of the Company as of September 30, 2009, and the results of its operations for the three- and nine-month periods ended September 30, 2009 and 2008 and its cash flows for the nine-month periods ended September 30, 2009 and 2008.

The unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements of Euronet for the year ended December 31, 2008, including the notes thereto, set forth in the Company's 2008 Annual Report on Form 10-K.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates. The results of operations for the three- and nine-month periods ended September 30, 2009 are not necessarily indicative of the results to be expected for the full year ending December 31, 2009. Certain amounts in prior years have been reclassified to conform to current period presentation.

(2) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND PRACTICES

Accounting standards codification

In June 2009, the Financial Accounting Standards Board (FASB) issued FASB Statement of Financial Accounting Standards (SFAS) No. 168, The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles. SFAS No. 168 authorized the *FASB Accounting Standards Codification* (ASC) to become the source of authoritative U.S. GAAP recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the SEC under authority of federal securities laws remain sources of authoritative U.S. GAAP for SEC registrants. On the effective date of SFAS No. 168, the ASC superseded all then-existing non-SEC accounting and reporting standards. All other nongrandfathered non-SEC accounting literature not included in the ASC became nonauthoritative. All guidance contained in the ASC carries an equal level of authority. Certain accounting treatments that entities have followed, and continue to follow, which are not part of the ASC are grandfathered because they were adopted before a certain date or certain accounting standards have allowed for the continued application of superseded accounting standards. SFAS No. 168 is effective for financial statements issued for interim and annual periods ending after September 15, 2009. The Company's adoption of SFAS No. 168 did not have a material impact on the Consolidated Financial Statements. However, all references to U.S. GAAP recognized by the FASB now use ASC citations except for those to grandfathered accounting literature.

Convertible debentures

Effective January 1, 2009, the Company adopted ASC provisions dealing with accounting for convertible debt instruments that may be settled in cash upon conversion. ASC 470-20-30-22 (formerly FASB Staff Position (FSP))

APB 14-1) requires the proceeds from the issuance of such convertible debt instruments to be allocated between debt and equity components so that debt is discounted to reflect the Company's nonconvertible debt borrowing rate. ASC 470-20-35-13 requires the debt discount to be amortized over the period the convertible debt is expected to be outstanding as additional non-cash interest expense. This treatment impacts the accounting associated with the Company's convertible debentures. The Company's Unaudited Consolidated Balance Sheets, Statements of Operations,

Table of Contents

Statements of Comprehensive Income (Loss) and Statements of Cash Flows have been adjusted to reflect the retrospective application of the provisions to prior periods.

Noncontrolling interests

Effective January 1, 2009, the Company adopted ASC provisions regarding noncontrolling interests in consolidated financial statements. ASC 810-10-45-16 (formerly SFAS No. 160) requires noncontrolling interests (previously referred to as minority interests) to be reported as a component of equity, which changes the accounting for transactions with noncontrolling interest holders. The presentation of the Company's Unaudited Consolidated Balance Sheets, Statements of Operations, Statements of Comprehensive Income (Loss) and Statements of Cash Flows has been adjusted to reflect the retrospective application of the provisions to prior periods.

Business combinations

Effective January 1, 2009, the Company adopted ASC provisions regarding business combinations. ASC 805 (formerly SFAS No. 141(R)) applies to all business combinations and requires most identifiable assets, liabilities, noncontrolling interests and goodwill acquired in a business combination to be recorded at full fair value at the acquisition date. Additionally, ASC 805 requires transaction-related costs to be expensed in the period incurred, rather than capitalizing these costs as a component of the respective purchase price.

Accounting for derivative instruments and hedging activities

The Company accounts for derivative instruments and hedging activities in accordance with ASC 815 (formerly SFAS No. 133), which requires that all derivative instruments be recognized as either assets or liabilities on the balance sheet at fair value. During the second quarter 2007, the Company entered into derivative instruments to manage exposure to interest rate risk that are considered cash flow hedges under the provisions of ASC 815. To qualify for hedge accounting, the details for the hedging relationship must be formally documented at the inception of the arrangement, including the Company's hedging strategy, risk management objective, the specific risk being hedged, the derivative instrument being used, the item being hedged, an assessment of hedge effectiveness and how effectiveness will continue to be assessed and measured. For the effective portion of a cash flow hedge, changes in the value of the hedge instrument are recorded temporarily in equity and the Unaudited Consolidated Statements of Comprehensive Income (Loss) as a component of other comprehensive income and then recognized as an adjustment to interest expense over the term of the hedging instrument.

In the Money Transfer Segment, the Company enters into foreign currency forward contracts to offset foreign currency exposure related to the notional value of money transfer transactions collected in currencies other than the U.S. dollar. These forward contracts are considered derivative instruments under ASC 815; however, the Company does not designate such instruments as hedges. Accordingly, changes in the value of these contracts are recognized immediately as a component of foreign currency exchange gain (loss), net in the Unaudited Consolidated Statements of Operations. The impact of changes in value of these forward contracts, together with the impact of the change in value of the related foreign currency denominated receivable, on the Company's Unaudited Consolidated Statements of Operations is not significant.

Cash flows resulting from derivative instruments are classified as cash flows from operating activities in the Company's Unaudited Consolidated Statements of Cash Flows. The Company enters into derivative instruments with financial institutions it believes to be highly credit-worthy and does not use derivative instruments for trading or speculative purposes.

Additionally, effective January 1, 2009, the Company adopted certain provisions of ASC 815 (formerly SFAS No. 161), which requires an entity to provide enhanced disclosures about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under Topic 815, and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. See Note 7, Derivative Instruments and Hedging Activities, for these disclosures and a further discussion of derivative instruments.

Fair value measurements

Effective January 1, 2008, the Company adopted ASC provisions regarding fair value measurements for financial assets and liabilities. ASC 820 (formerly SFAS No. 157) defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. The provisions apply whenever other accounting

pronouncements require or permit fair value measurements. Accordingly, the provisions do not require any new fair value measurements. Beginning January 1, 2009, the Company adopted the provisions for certain nonfinancial assets and liabilities, which include those measured at fair value in goodwill impairment testing, indefinite-lived intangible assets measured at fair value for impairment assessment, nonfinancial long-lived assets measured at fair value for impairment assessment and investments in unconsolidated subsidiaries.

Effective for the quarterly reporting period ended June 30, 2009, the Company adopted certain provisions of ASC 825 (formerly FSP FAS 107-1 and APB 28-1), which requires the annual fair value disclosures about financial instruments within the scope of ASC 825 to also be made in interim financial statements.

Table of Contents

See Note 9, Fair Value Measurements, for the required fair value disclosures.

Money transfer settlement obligations

Money transfer settlement obligations are recorded in accrued expenses and other current liabilities on the Company's Unaudited Consolidated Balance Sheets and consist of amounts owed by Euronet to money transfer recipients. As of September 30, 2009, the Company's money transfer settlement obligations were \$28.9 million.

Investment in MoneyGram International, Inc.

During the third quarter 2009, the Company sold its investment in MoneyGram International, Inc. (MoneyGram) and recognized a gain of \$1.8 million. During 2008, the value of the Company's investment in MoneyGram declined and the Company determined the decline to be other than temporary. Accordingly, in 2008, the Company recognized impairment losses associated with the investment of \$18.8 million and reversed the \$0.6 million gain recorded as of December 31, 2007 in accumulated other comprehensive income. The investment was classified as available-for-sale and included in other current assets on the Company's Unaudited Consolidated Balance Sheet as of December 31, 2008.

Adjustment of deferred income tax assets and liabilities

As of September 30, 2009, the Company netted certain deferred income tax assets with deferred income tax liabilities for balances within the same tax jurisdiction. As of December 31, 2008, an adjustment to the Unaudited Consolidated Balance Sheet reduced current deferred income tax assets and liabilities by \$3.2 million and reduced noncurrent income tax assets and liabilities by \$39.1 million. This immaterial adjustment had no impact on equity or the Company's Unaudited Consolidated Statements of Operations, Statements of Comprehensive Income (Loss) or Statements of Cash Flows.

Subsequent events

In May 2009, the FASB issued financial accounting standards related to subsequent events. The standards incorporate into authoritative accounting literature certain guidance that already existed within generally accepted auditing standards, but the rules concerning recognition and disclosure of subsequent events remain essentially unchanged. ASC 855-10-25 and 50 (formerly SFAS No. 165) provide general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. The Company adopted these provisions for the quarter ended June 30, 2009. The adoption of these provisions did not have a material effect on the Consolidated Financial Statements. The Company has evaluated subsequent events through November 5, 2009, the date the financial statements were issued.

Recent accounting pronouncements

In September 2009, the FASB issued Accounting Standards Update (ASU) 2009-13 (formerly Emerging Issues Task Force Consensus 08-01). ASU 2009-13 adds estimated selling price as acceptable evidence of fair value of undelivered products and services in revenue arrangements with multiple deliverables. Estimated selling price can be used if there is no vendor specific objective evidence or third-party evidence of fair value. Additionally, ASU 2009-13 eliminates the use of the residual method of allocating revenue and establishes the relative selling price method as the appropriate means to allocate revenue to each deliverable of an arrangement. ASU 2009-13 is effective on a prospective basis for revenue arrangements entered into or modified for fiscal years beginning on or after June 15, 2010 with earlier application permitted. The Company is evaluating the impact that the adoption of ASU 2009-13 will have on its financial statements and whether it will elect early application; however, the impact is not expected to be material.

Table of Contents**(3) EARNINGS PER SHARE**

Basic earnings per share has been computed by dividing net income (loss) attributable to Euronet Worldwide, Inc. by the weighted average number of common shares outstanding during the respective period. Diluted earnings per share has been computed by dividing net income (loss) attributable to Euronet Worldwide, Inc. by the weighted average shares outstanding during the respective period, after adjusting for any potential dilution of the assumed conversion of the Company's convertible debentures, shares issuable in connection with acquisition obligations, restricted stock and options to purchase the Company's common stock. The following table provides the computation of diluted weighted average number of common shares outstanding:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
Computation of diluted weighted average shares outstanding:				
Basic weighted average shares outstanding	50,560,371	49,002,842	50,426,113	48,909,078
Incremental shares from assumed conversion of stock options and restricted stock	1,346,531	689,925	780,250	
Weighted average shares issuable in connection with acquisition obligations		1,115,243		
Diluted weighted average shares outstanding	51,906,902	50,808,010	51,206,363	48,909,078

The table includes all stock options and restricted stock that are dilutive to Euronet's weighted average common shares outstanding during the period. For the nine months ended September 30, 2008, the Company incurred a net loss; therefore, diluted loss per share is the same as basic loss per share for the period. The calculation of diluted earnings per share excludes stock options or shares of restricted stock that are anti-dilutive to the Company's weighted average common shares outstanding for the three- and nine-month periods ended September 30, 2009 of approximately 954,000 and 1,878,000, respectively. The calculation of diluted earnings (loss) per share excludes stock options or shares of restricted stock that are anti-dilutive to the Company's weighted average common shares outstanding for the three- and nine-month periods ended September 30, 2008 of approximately 1,667,000 and 3,085,000, respectively. Additionally, for the nine months ended September 30, 2008, the calculation of diluted loss per share excludes approximately 1,115,000 shares issuable in connection with acquisition obligations that are anti-dilutive to the Company's weighted average common shares outstanding.

The Company has \$44.2 million principal amount of 1.625% convertible debentures due 2024 and \$175.0 million principal amount of 3.50% convertible debentures due 2025 outstanding that, if converted, would have a potentially dilutive effect on the Company's stock. These debentures are convertible into 1.3 million shares of Common Stock for the \$44.2 million 1.625% issue, and 4.3 million shares of Common Stock for the \$175.0 million 3.50% issue, only upon the occurrence of certain conditions. As required by ASC 260, if dilutive, the impact of the contingently issuable shares must be included in the calculation of diluted earnings per share under the if-converted method, regardless of whether the conditions upon which the debentures would be convertible into shares of the Company's Common Stock have been met. Under the if-converted method, the assumed conversions of the 1.625% and 3.50% convertible debentures were anti-dilutive for the three- and nine-month periods ended September 30, 2009 and 2008.

Table of Contents**(4) DISCONTINUED OPERATIONS**

During the second quarter 2008, the Company committed to a plan to sell Euronet Essentis Limited (Essentis), a U.K. software entity, in order to focus its investments and resources on its transaction processing businesses. The Company has signed an agreement to sell the assets of the business and expects the sale to close in the fourth quarter of 2009. Accordingly, Essentis' s results of operations are shown as discontinued operations in the Unaudited Consolidated Statements of Operations for all periods presented. Previously, Essentis' s results were reported in the EFT Processing Segment. The segment results in Note 8, Segment Information, also reflect the reclassification of Essentis' s results to discontinued operations. The following amounts related to Essentis have been segregated from continuing operations and reported as discontinued operations:

(in thousands)	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2009	2008	2009	2008
Revenues	\$ 2,288	\$ 2,254	\$ 5,547	\$ 7,388
Income (loss) before income taxes	\$ 646	\$ (496)	\$ 765	\$ (2,282)
Net income (loss)	\$ 452	\$ (302)	\$ 537	\$ (1,611)

The Unaudited Consolidated Balance Sheets include Essentis' s net assets expected to be sold and the major classes of its assets and liabilities are presented below:

(in thousands)	September 30,	December
	2009	31,
		2008
ASSETS		
Current assets		
Cash and cash equivalents	\$ 1,389	\$ 552
Trade accounts receivable, net of allowance for doubtful accounts	1,613	2,187
Prepaid expenses and other current assets	634	990
Total current assets	3,636	3,729
Property and equipment, net of accumulated depreciation	475	427
Acquired intangible assets, net of accumulated amortization	1,085	991

------------	----	-------	----	-------

Table of Contents**(5) GOODWILL AND ACQUIRED INTANGIBLE ASSETS, NET**

A summary of acquired intangible assets and goodwill activity for the nine-month period ended September 30, 2009 is presented below:

(in thousands)	Acquired Intangible Assets	Goodwill	Total Intangible Assets
Balance as of December 31, 2008	\$ 125,313	\$ 488,305	\$ 613,618
Increases (decreases):			
Impairment	(1,111)	(8,773)	(9,884)
Acquisitions	7,048		7,048
Amortization	(17,247)		(17,247)
Other (primarily changes in foreign currency exchange rates)	4,168	23,049	27,217
 Balance as of September 30, 2009	 \$ 118,171	 \$ 502,581	 \$ 620,752

Estimated annual amortization expense on intangible assets with finite lives, before income taxes, as of September 30, 2009, is expected to total \$23.3 million for 2009, \$23.9 million for 2010, \$19.8 million for 2011, \$17.4 million for 2012, \$12.7 million for 2013 and \$9.8 million for 2014.

The Company's annual goodwill impairment test is performed during the fourth quarter. The Company's annual impairment test for the year ended December 31, 2008 resulted in the Company recording an estimated non-cash goodwill impairment charge of \$219.8 million in the fourth quarter of 2008 related to its RIA money transfer business and its Spanish prepaid business. Additionally, the Company recorded a non-cash impairment charge of \$0.3 million in the fourth quarter of 2008 related to certain trade names and customer relationships of the RIA money transfer business. The Company completed the impairment testing in the first quarter of 2009 and recorded an additional non-cash goodwill impairment charge of \$8.8 million and a \$1.1 million non-cash impairment charge related to a money transfer intangible asset in the first quarter of 2009.

Determining the fair value of reporting units requires significant management judgment in estimating future cash flows and assessing potential market and economic conditions. It is reasonably possible that the Company's operations will not perform as expected, or that estimates or assumptions could change, which may result in the Company recording additional material non-cash impairment charges during the year in which these changes take place.

(6) DEBT OBLIGATIONS

A summary of debt obligation activity for the nine-month period ended September 30, 2009 is presented below:

(in thousands)	Revolving Credit Facilities	Other Debt Obligations	Capital Leases	1.625% Convertible Debentures Due 2024	3.50% Convertible Debentures Due 2025	Term Loan	Total
Balance at December 31, 2008	\$ 16,719	\$ 288	\$ 10,970	\$ 66,548	\$ 147,446	\$ 132,000	\$ 373,971
Increases (decreases):

loss

Balance at September 30, 2009	2,059	545	7,819	43,764	152,253	129,525	335,965
Less current maturities		(451)	(4,020)	(43,764)		(1,900)	(50,135)
Long-term obligations at September 30, 2009	\$ 2,059	\$ 94	\$ 3,799	\$	\$ 152,253	\$ 127,625	\$ 285,830

During the first nine months of 2009, the Company repurchased in privately negotiated transactions \$25.8 million in principal amount of the 1.625% convertible debentures due 2024. During the nine months ended September 30, 2009, the Company repaid \$2.5 million of the term loan, of which \$1.4 million were scheduled repayments. The remaining \$1.1 million represents prepayment of amounts not yet due and, along with the convertible debentures repurchases, resulted in the Company recognizing a \$0.3 million pre-tax loss on early retirement of debt.

Table of Contents

As discussed in Note 2, Summary of Significant Accounting Policies and Practices, the Company adopted the provisions of ASC 470-20 (formerly FSP APB 14-1), which resulted in the adjustment of amounts previously reported for the Company's convertible debentures. The 1.625% convertible debentures had principal amounts outstanding of \$44.2 million and \$70.0 million and unamortized discounts outstanding of \$0.4 million and \$3.5 million as of September 30, 2009 and December 31, 2008, respectively. The discount will be amortized through December 15, 2009. Contractual interest expense was \$0.2 million and \$0.7 million and discount accretion was \$0.6 million and \$2.2 million for the three and nine months ended September 30, 2009, respectively. Contractual interest expense was \$0.6 million and \$1.7 million and discount accretion was \$1.8 million and \$5.2 million for the three and nine months ended September 30, 2008, respectively. The effective interest rate was 7.1% for the three and nine months ended September 30, 2009 and 2008. The carrying amount of the equity portion was \$32.3 million as of September 30, 2009 and December 31, 2008.

The 3.50% convertible debentures had principal amounts outstanding of \$175.0 million and unamortized discounts outstanding of \$22.7 million and \$27.6 million as of September 30, 2009 and December 31, 2008, respectively. The discount will be amortized through October 15, 2012. Contractual interest expense was \$1.5 million and \$4.6 million for the respective three- and nine-month periods ended September 30, 2009 and 2008. Discount accretion was \$1.6 million and \$4.8 million for the three and nine months ended September 30, 2009, respectively, and \$1.5 million and \$4.4 million for the three and nine months ended September 30, 2008, respectively. The effective interest rate was 8.4% for the three and nine months ended September 30, 2009 and 2008. The carrying amount of the equity portion was \$45.1 million as of September 30, 2009 and December 31, 2008.

(7) DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

As of September 30, 2009, the Company had foreign currency forward contracts outstanding with a notional value of \$44.1 million, primarily in euros, which were not designated as hedges and had a weighted average maturity of 4.4 days. Although the Company enters into foreign currency forward contracts to offset foreign currency exposure related to the notional value of money transfer transactions collected in currencies other than the U.S. dollar, they are not designated as hedges. This is mainly due to the relatively short duration of the contracts, typically 1 to 14 days, and the frequency with which the Company enters into them.

The Company has an office lease in a foreign country that requires payment in a currency that is not the functional currency of either party to the lease or the Company's reporting currency. Therefore, the lease contains an embedded derivative and its fair value is recorded in the Unaudited Consolidated Balance Sheet.

During 2007, the Company entered into interest rate swap agreements for a total notional amount of \$50 million to manage interest rate exposure related to a portion of the term loan. The interest rate swap agreements were determined to be cash flow hedges and effectively converted \$50 million of the term loan to a fixed interest rate of 7.3% through the May 2009 maturity date of the swap agreements. The swap agreements required no payment by either party at their maturities.

Table of Contents**(8) SEGMENT INFORMATION**

Euronet's reportable operating segments have been determined in accordance with ASC 280 (formerly SFAS No. 131). The Company currently operates in the following three reportable operating segments:

- 1) Through the EFT Processing Segment, the Company processes transactions for a network of ATMs and POS terminals across Europe, the Middle East and Asia Pacific. The Company provides comprehensive electronic payment solutions consisting of ATM network participation, outsourced ATM and POS management solutions, credit and debit card outsourcing and electronic recharge services for prepaid mobile airtime. Through this segment, the Company also offers a suite of integrated electronic financial transaction (EFT) software solutions for electronic payment, merchant acquiring, card issuing and transaction delivery systems.
- 2) Through the Prepaid Processing Segment, the Company provides distribution of prepaid mobile airtime and other prepaid products and collection services in Europe, the Middle East, Asia Pacific and the Americas.
- 3) Through the Money Transfer Segment, the Company provides global money transfer and bill payment services through a sending network of agents and Company-owned stores primarily in North America and Europe, disbursing money transfers through a worldwide payer network. Bill payment services are offered primarily in the U.S.

In addition, in its administrative division, Corporate Services, Eliminations and Other, the Company accounts for non-operating activity, share-based compensation expense, certain intersegment eliminations and the costs of providing corporate and other administrative services to the three segments. These services are not directly identifiable with the Company's reportable operating segments. The following tables present the segment results of the Company's operations for the three- and nine-month periods ended September 30, 2009 and 2008:

For the Three Months Ended September 30, 2009

(in thousands)	EFT Processing	Prepaid Processing	Money Transfer	Corporate Services, Eliminations and Other	Consolidated

Table of Contents**(9) FAIR VALUE MEASUREMENTS**

The carrying amount of cash and cash equivalents, trade accounts receivable, trade accounts payable and short-term debt obligations approximates fair value, due to their short maturities. The carrying value of the Company's term loan due 2014 and revolving credit agreements approximate fair value because interest is based on LIBOR that resets at various intervals of less than one year. The following table provides the estimated fair values of the Company's other financial instruments, based on quoted market prices or significant other observable inputs.

(in thousands)	September 30, 2009		As of December 31, 2008	
	Carrying Value	Fair Value	Carrying Value	Fair Value
1.625% convertible senior debentures, unsecured, due 2024	\$ 43,764	\$ 43,841	\$ 66,548	\$ 63,522
3.50% convertible debentures, unsecured, due 2025	152,253	160,125	147,446	112,131
Foreign currency derivative contracts	(43)	(43)	278	278
Embedded derivative in foreign lease	(243)	(243)		
Available-for-sale investment securities			1,351	1,351
Interest rate swaps related to floating rate debt			(830)	(830)

The Company's assets and liabilities recorded at fair value on a recurring basis are set forth in the following table:

(in thousands)	September 30, 2009	
	Carrying Value	Fair Value Measurements Using Significant Other Observable Inputs
Foreign currency derivative contracts	\$ (43)	\$ (43)
Embedded derivative in foreign lease	(243)	(243)

The Company values available-for-sale investment securities using quoted prices from the securities' primary exchange. Foreign currency derivative contracts are valued using foreign currency exchange quotations for similar assets and liabilities. The embedded derivative in foreign lease is valued using present value techniques and foreign currency exchange quotations.

Certain assets are measured at fair value on a non-recurring basis. During the first quarter of 2009, the Company finalized the assessment of the fair value of the goodwill related to its RIA money transfer business and its Spanish prepaid business and recorded an impairment charge of \$8.8 million as discussed in Note 5, Goodwill and Acquired Intangible Assets, Net. The fair values were determined using significant unobservable inputs. The \$258.8 million fair value of goodwill was determined by calculating its implied fair value as the excess of the fair value of the respective entity over the fair value of its net assets. Additionally, during the first quarter of 2009, management determined that an acquired intangible asset associated with a previous acquisition in the Money Transfer Segment had no value and, accordingly, the Company wrote off the remaining net book value of the intangible asset of \$1.1 million. No assets were measured at fair value on a non-recurring basis in the second or third quarter of 2009.

(10) GUARANTEES

As of September 30, 2009, the Company had \$61.8 million of stand-by letters of credit/bank guarantees issued on its behalf, of which \$10.6 million are collateralized by cash deposits held by the respective issuing banks.

Under certain circumstances, Euronet grants guarantees in support of obligations of subsidiaries. As of September 30, 2009, the Company granted off balance sheet guarantees for cash in various ATM networks amounting to

\$19.2 million over the terms of the cash supply agreements and performance guarantees amounting to approximately \$27.9 million over the terms of the agreements with the customers.

Table of Contents

From time to time, Euronet enters into agreements with unaffiliated parties that contain indemnification provisions, the terms of which may vary depending on the negotiated terms of each respective agreement. The amount of such potential obligations is generally not stated in the agreements. Our liability under such indemnification provisions may be mitigated by relevant insurance coverage and may be subject to time and materiality limitations, monetary caps and other conditions and defenses. Such indemnification obligations include the following:

In connection with contracts with financial institutions in the EFT Processing Segment, the Company is responsible for damages to ATMs and theft of ATM network cash that, generally, is not recorded on the Company's Consolidated Balance Sheet. As of September 30, 2009, the balance of ATM network cash for which the Company was responsible was approximately \$310 million. The Company maintains insurance policies to mitigate this exposure;

In connection with the license of proprietary systems to customers, Euronet provides certain warranties and infringement indemnities to the licensee, which generally warrant that such systems do not infringe on intellectual property owned by third parties and that the systems will perform in accordance with their specifications;

Euronet has entered into purchase and service agreements with vendors and consulting agreements with providers of consulting services, pursuant to which the Company has agreed to indemnify certain of such vendors and consultants, respectively, against third-party claims arising from the Company's use of the vendor's product or the services of the vendor or consultant;

In connection with acquisitions and dispositions of subsidiaries, operating units and business assets, the Company has entered into agreements containing indemnification provisions, which can be generally described as follows: (i) in connection with acquisitions made by Euronet, the Company has agreed to indemnify the seller against third-party claims made against the seller relating to the subject subsidiary, operating unit or asset and arising after the closing of the transaction, and (ii) in connection with dispositions made by Euronet, Euronet has agreed to indemnify the buyer against damages incurred by the buyer due to the buyer's reliance on representations and warranties relating to the subject subsidiary, operating unit or business assets in the disposition agreement if such representations or warranties were untrue when made;

Euronet has entered into agreements with certain third parties, including banks that provide fiduciary and other services to Euronet or to the Company's benefit plans. Under such agreements, the Company has agreed to indemnify such service providers for third-party claims relating to the carrying out of their respective duties under such agreements; and

The Company has obtained surety bonds in compliance with money transfer licensing requirements of the applicable governmental authorities and has agreed to reimburse the surety for any amounts that they are required to pay in connection with such bonds.

The Company is also required to meet minimum capitalization and cash requirements of various regulatory authorities in the jurisdictions in which the Company has money transfer operations. To date, the Company is not aware of any significant claims made by the indemnified parties or third parties to guarantee agreements with the Company and, accordingly, no liabilities were recorded as of September 30, 2009 or December 31, 2008.

(11) INCOME TAXES

The Company's effective tax rates for continuing operations were 30.4% and 148.7% for the three-month periods ended September 30, 2009 and 2008, respectively, and were 46.8% and 53.5% for the nine-month periods ended September 30, 2009 and 2008, respectively. The effective tax rates were significantly influenced by certain non-taxable items, including the goodwill and acquired intangible assets impairment charge in the first quarter 2009, the impairment losses on investment securities during the first half of 2008 and the gain on sale of investment securities in the third quarter of 2009. Additionally, foreign currency exchange rates fluctuated significantly during the reported periods creating foreign currency exchange gains and losses that impacted the effective tax rates. Excluding foreign currency exchange results, the impairments to goodwill and acquired intangible assets and the gains and losses related to investment securities from pre-tax income, as well as the related tax effects for these items, the Company's effective tax rates were 46.3% and 44.1% for the three months ended September 30, 2009 and 2008, respectively, and 45.0% and 32.4% for the nine months ended September 30, 2009 and 2008, respectively.

The increase in the effective tax rates, as adjusted, for the first nine months of 2009 compared to the same period in 2008 is primarily related to the Company's U.S. tax position. For the nine months ended September 30, 2009, the Company has recorded a valuation allowance against its U.S. federal tax net operating losses as it has determined that it is more likely than not that a tax benefit will not be realized. Accordingly, the federal income tax benefit associated with pre-tax book losses generated by the Company's U.S. entities has not been recognized in this period. For the nine months ended September 30, 2008, no valuation allowance was recorded against its U.S. federal tax net operating losses, resulting in a tax benefit associated with the pre-tax loss generated by the Company's U.S. operations. Additional reasons for the increase in the Company's effective tax rates include the accrual of incremental state income tax expense in the first nine months of 2009 compared to the same period in 2008, mainly due to exhausting certain state net operating losses, and the

Table of Contents

recognition of a one-time tax benefit in the first nine months of 2008 resulting from the successful conclusion of a tax audit in one of the Company's foreign jurisdictions. Finally, the loss of certain income tax deductions in Spain as a result of the goodwill and acquired intangible assets impairment charges increased income tax expense in the first nine months of 2009.

(12) CONTINGENCIES

In the second quarter 2009, the Antitrust Division of the United States Department of Justice (the DOJ) served Continental Exchange Solutions, Inc. d/b/a RIA Financial Services (CES), an indirect, wholly-owned subsidiary of the Company, with a grand jury subpoena requesting documents from CES and its affiliates in connection with an investigation into money transmission services to the Dominican Republic during the period from January 1, 2004 to the date of the subpoena. The Company and CES are fully cooperating with the DOJ in its investigation.

At this time, the Company is unable to predict whether this investigation will result in the DOJ bringing charges against CES. Accordingly, the Company is unable to predict the outcome of this investigation, the possible loss or possible range of loss, if any, associated with the resolution of any charges that may be brought against CES, or any potential effect on the Company's business, results of operations or financial condition.

The Company acquired all of the stock of RIA Envia, Inc., the parent of CES, in April 2007.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS OVERVIEW

COMPANY OVERVIEW, GEOGRAPHIC LOCATIONS AND PRINCIPAL PRODUCTS AND SERVICES

Euronet Worldwide, Inc. (together with our subsidiaries, we, us, Euronet or the Company) is a leading electronic payments provider, offering automated teller machine (ATM) and point-of-sale (POS) and card outsourcing services, card issuing and merchant acquiring services, integrated electronic financial transaction (EFT) software, network gateways, electronic distribution of top-up services for prepaid mobile airtime and other prepaid products, electronic consumer money transfer and bill payment services to financial institutions, mobile operators, retailers and individual customers. As of September 30, 2009, we operate in the following three principal business segments:

An EFT Processing Segment, which processes transactions for a network of 9,473 ATMs and approximately 51,000 POS terminals across Europe, the Middle East and Asia Pacific. We provide comprehensive electronic payment solutions consisting of ATM network participation, outsourced ATM and POS management solutions, credit and debit card outsourcing and electronic recharge services for prepaid mobile airtime. Through this segment, we also offer a suite of integrated EFT software solutions for electronic payment and transaction delivery systems.

A Prepaid Processing Segment, which provides distribution of prepaid mobile airtime and other prepaid products and collection services for various prepaid products, cards and services. We are one of the largest international providers of prepaid mobile airtime processing. Including terminals operated by unconsolidated subsidiaries, we operate a network of approximately 475,000 POS terminals providing electronic processing of prepaid mobile airtime top-up services in Europe, the Middle East, Asia Pacific and the Americas.

A Money Transfer Segment, which provides global consumer to consumer money transfer services. We offer this service through a sending network of agents and Company-owned stores primarily in Europe and North America, disbursing money transfers through a worldwide payer network. Bill payment services are offered primarily in the U.S. Based on revenues and volumes, we are the third-largest global money transfer company. The Money Transfer Segment originates and terminates transactions through a network of approximately 81,000 locations, which include sending agents and Company-owned stores, and an extensive payer network in more than 100 countries.

We have six processing centers in Europe, two in Asia Pacific and two in North America. We have 23 principal offices in Europe, seven in North America, five in Asia Pacific and one in the Middle East. Our executive offices are located in Leawood, Kansas, USA. With approximately 75% of our revenues denominated in currencies other than the U.S. dollar, any significant changes in currency exchange rates will likely have a significant impact on our growth in revenues, operating income and diluted earnings per share.

SOURCES OF REVENUES AND CASH FLOW

Euronet earns revenues and income based on ATM management fees, transaction fees and commissions, professional services, software licensing fees and software maintenance agreements. Each business segment's sources of revenue are described below.

EFT Processing Segment Revenues in the EFT Processing Segment, which represented approximately 19% of total consolidated revenues for the first nine months of 2009, are derived from fees charged for transactions effected by cardholders on our proprietary network of ATMs, as well as fixed management fees and transaction fees we charge to customers for operating ATMs and processing credit cards under outsourcing agreements. Through our proprietary network, we generally charge fees for four types of ATM transactions: i) cash withdrawals, ii) balance inquiries, iii) transactions not completed because the relevant card issuer did not give authorization, and iv) prepaid telecommunication recharges. Revenues in this segment are also derived from license fees, professional services and maintenance fees for software and sales of related hardware. Software license fees are the fees we charge to license our proprietary application software to customers. Professional service fees consist of charges for customization, installation and consulting services to customers. Software maintenance revenues represent the ongoing fees charged for maintenance and support for customers' software products. Hardware sales are derived from the sale of computer

equipment necessary for the respective software solution.

Prepaid Processing Segment Revenues in the Prepaid Processing Segment, which represented approximately 58% of total consolidated revenues for the first nine months of 2009, are primarily derived from commissions or processing fees received from telecommunications service providers for the sale and distribution of prepaid mobile airtime. We also generate revenues from commissions earned from the distribution of other prepaid products. Due to certain provisions in our mobile phone operator agreements, the operators have the ability to reduce the overall commission paid on each top-up transaction. However, by virtue of our agreements with retailers (distributors where POS terminals are located) in certain markets, not all of these reductions are absorbed by us because we are able to pass a significant portion of the reductions to retailers. Accordingly, under certain retailer agreements, the effect is to reduce revenues and reduce our direct operating costs resulting in only a small impact on gross profit and operating income. In some markets, reductions in commissions can significantly impact our results as it may not be possible, either contractually or commercially in the concerned market, to pass a

Table of Contents

reduction in commissions to the retailers. In Australia, certain retailers negotiate directly with the mobile phone operators for their own commission rates, which also limits our ability to pass through reductions in commissions. Agreements with mobile operators are important to the success of our business. These agreements permit us to distribute prepaid mobile airtime to the mobile operators' customers. Other products offered by this segment include prepaid long distance calling card plans, prepaid internet plans, prepaid debit cards, prepaid gift cards, prepaid transportation products, bill payment, money transfer and prepaid mobile content such as music, ringtones and games.

Money Transfer Segment Revenues in the Money Transfer Segment, which represented approximately 23% of total consolidated revenues for the first nine months of 2009, are primarily derived from charging a transaction fee, as well as the difference between purchasing foreign currencies at wholesale exchange rates and selling foreign currencies to consumers at retail exchange rates. We have an origination network in place comprised of agents and Company-owned stores primarily in Europe and North America and a worldwide network of correspondent agents, consisting primarily of financial institutions in the transfer destination countries. Origination and correspondent agents each earn fees for cash collection and distribution services. These fees are recognized as direct operating costs at the time of sale.

OPPORTUNITIES AND CHALLENGES

EFT Processing Segment The continued expansion and development of our EFT Processing Segment business will depend on various factors including, but not necessarily limited to, the following:

- the impact of competition by banks and other ATM operators and service providers in our current target markets;
- the demand for our ATM outsourcing services in our current target markets;
- the ability to develop products or services to drive increases in transactions;
- the expansion of our various business lines in markets where we operate and in new markets;
- the entrance into additional card acceptance and ATM management agreements with banks;
- the ability to obtain required licenses in markets we intend to enter or expand services;
- the availability of financing for expansion;
- the ability to efficiently install ATMs contracted under newly awarded outsourcing agreements;
- the ability to renew existing contracts at profitable rates;
- the ability to expand and sign additional customers for the cross-border merchant processing and acquiring business; and
- the continued development and implementation of our software products and their ability to interact with other leading products.

Prepaid Processing Segment The continued expansion and development of the Prepaid Processing Segment business will depend on various factors, including, but not necessarily limited to, the following:

- the ability to negotiate new agreements in additional markets with mobile phone operators, agent financial institutions and retailers;
- the ability to use existing expertise and relationships with mobile operators and retailers to our advantage;

the continuation of the trend towards conversion from scratch card solutions to electronic processing solutions for prepaid mobile airtime among mobile phone users and the continued use of third-party providers such as ourselves to supply this service;

the development of mobile phone networks in these markets and the increase in the number of mobile phone users;

the overall pace of growth in the prepaid mobile phone market;

our market share of the retail distribution capacity;

the level of commission that is paid to the various intermediaries in the prepaid mobile airtime distribution chain;

our ability to add new and differentiated prepaid products in addition to those offered by mobile operators;

the ability to take advantage of cross-selling opportunities with our Money Transfer Segment, including providing money transfer services through our prepaid locations; and

the availability of financing for further expansion.

Money Transfer Segment The expansion and development of our money transfer business will depend on various factors, including, but not necessarily limited to, the following:

the continued growth in worker migration and employment opportunities;

the mitigation of economic and political factors that have had an adverse impact on money transfer volumes, such as changes in the economic sectors in which immigrants work and the developments in immigration policies in the U.S.;

the continuation of the trend of increased use of electronic money transfer and bill payment services among immigrant workers and the unbanked population in our markets;

the ability to maintain our agent and correspondent networks;

the ability to offer our products and services or develop new products and services at competitive prices to drive increases in transactions;

Table of Contents

the expansion of our services in markets where we operate and in new markets;

the ability to strengthen our brands;

our ability to fund working capital requirements;

our ability to maintain compliance with the regulatory requirements of the jurisdictions in which we operate or plan to operate;

the ability to take advantage of cross-selling opportunities with our Prepaid Processing Segment, including providing prepaid services through RIA's stores and agents worldwide;

the ability to leverage our banking and merchant/retailer relationships to expand money transfer corridors to Europe, Asia and Africa, including high growth corridors to Central and Eastern European countries;

the availability of financing for further expansion; and

our ability to continue to successfully integrate RIA with our existing operations.

Corporate Services, Eliminations and Other In addition to operating in our principal business segments described above, our Corporate Services, Elimination and Other category includes non-operating activity, certain inter-segment eliminations and the cost of providing corporate and other administrative services to the business segments, including share-based compensation expense related to stock option and restricted stock grants. These services are not directly identifiable with our business segments.

SEGMENT SUMMARY RESULTS OF OPERATIONS

Revenues and operating income (loss) by segment for the three- and nine-month periods ended September 30, 2009 and 2008 are summarized in the tables below:

	Revenues for the		Year-over-Year	Revenues for the Nine		Year-over-Year

n/m Not meaningful.

Impact of changes in foreign currency exchange rates

During the first nine months of 2009, the U.S. dollar was significantly stronger compared to most of the currencies of the countries in which we operate than it was in the comparable period of 2008. Because our revenues and local expenses are recorded in the functional currencies of our operating entities, amounts we earned for the first nine months of 2009 are negatively impacted by the stronger U.S. dollar. We estimate that, depending on the mix of countries and currencies, our consolidated operating income for the nine months ended September 30, 2009 was diminished by approximately 20% when compared to the same period of 2008 as a result of changes in foreign currency exchange rates. If applicable, we will refer to the impact of fluctuation in foreign currency exchange rates in our comparison of operating segment results for the three- and nine-month periods ended September 30, 2009 and 2008. To provide further perspective on

Table of Contents

the impact of foreign currency exchange rates, the following table shows the changes in values relative to the U.S. dollar from the first nine months of 2008 to the first nine months of 2009 of the currencies of the countries in which we have our most significant operations:

Currency	Average Translation Rate		Decrease Percent
	Nine Months Ended September 30, 2009	Nine Months Ended September 30, 2008	
Australian dollar	\$0.7534	\$ 0.9122	(17%)
British pound	1.5437	1.9473	(21%)
euro	1.3663	1.5216	(10%)
Hungarian forint	0.0048	0.0061	(21%)
Indian rupee	0.0205	0.0241	(15%)

Average ATMs	9,433	10,321	(888)	(9%)	9,370	10,685	(1,315)	(12%)

Revenues

Our revenues for the first nine months of 2009 decreased when compared to the first nine months of 2008 due to the stronger U.S. dollar during the first nine months of 2009 compared to the first nine months of 2008 relative to most of the currencies of the countries in which we operate. Because our revenues are recorded in the functional currencies of our operating entities, amounts we earn in foreign currencies are negatively impacted by the strengthening of the U.S. dollar. Additionally, the decrease in the number of ATMs operated, which is primarily due to the expiration or termination of ATM services contracts discussed in more detail in the following paragraphs, limited our revenue growth. Offsetting these decreases were contract termination fees totaling \$4.4 million and increases in revenues primarily associated with our operations in Germany, India and our software and cross-border merchant processing and acquiring businesses.

Average monthly revenue per ATM was \$1,800 for the third quarter and \$1,693 for the first nine months of 2009, compared to \$1,757 for the third quarter and \$1,612 for the first nine months of 2008. The increase in the third quarter of 2009 from the third quarter of 2008 is mainly driven by increased transaction fees in Germany. We have recently been able to increase transaction fees in Germany, but we are uncertain if we will be able to increase them further or maintain the current rates. The improvement in average monthly revenue per ATM in the first nine months of 2009 from the same period in 2008 is generally the result of the increased transaction fees in Germany, the non-

Table of Contents

recurring contract termination fees discussed above and the expiration of an ATM services contract in the U.K. at the end of the first quarter 2008, partly offset by the impact of the stronger U.S. dollar. The U.K. contract involved processing services only with very little associated costs and, therefore, had lower-than-average revenue per ATM. Revenues per transaction were \$0.27 for the third quarter and \$0.28 for the first nine months of 2009, compared to \$0.31 each for the third quarter and first nine months of 2008. These decreases are primarily the result of the impact of the stronger U.S. dollar and the growth of transactions in India and China, where revenues per transaction have been historically lower than Central and Eastern Europe (due to lower labor costs). During the first nine months of 2009, transactions on Euronet's shared network in India, Cashnet, increased 125% when compared to the same period in 2008.

Our contracts in the EFT Processing Segment tend to cover large numbers of ATMs, so significant increases and decreases in our pool of managed ATMs may result from entry into or termination of these management contracts. Banks have historically been very deliberate in negotiating these agreements and have evaluated a wide range of matters when deciding to choose an outsource vendor. Generally, the process of negotiating a new agreement is subject to extensive management analysis and approvals and the process typically takes six to twelve months or longer. Increasing consolidation and financial stress in the banking industry could make this process less predictable. Our existing contracts generally have terms of five to seven years and a number of them will expire or be up for renewal each year for the next few years. As a result, we expect to be regularly engaged in discussions with one or more of our customer banks to either renew or restructure our ATM outsourcing agreements. During the fourth quarter 2008 and first quarter 2009, certain customer contracts were terminated or expired, resulting in a decrease of approximately 1,700 ATMs. Most of the ATM reductions resulted from bank customers shifting their processing to related processing subsidiaries in contemplation of selling the subsidiaries to raise capital, rather than the loss of contracts to competitors. The reduction in the number of ATMs from contract terminations or expirations was partially offset during the first nine months of 2009 by increases in ATMs driven under new contracts, expansion of ATMs under existing contracts and the deployment of ATMs in markets where we operate Euronet-branded ATMs. For contracts that we are able to renew, as was the case for contract renewals in Romania and Greece in prior years, we expect customers to seek rate concessions or up-front payments because of the greater availability of alternative processing solutions in many of our markets now, as compared to when we originally entered into the contracts. Excluding the expired or terminated contracts discussed above, we have been able to renew or extend most of the remaining contracts that were due to expire in 2009. While we have been successful in many cases in obtaining new terms that preserve the same level of earnings arising from the agreements, we have not been successful in all cases and, therefore, we expect to experience reductions in revenues in future quarters arising from the expiration or restructuring of agreements.

For the contracts that expired during the fourth quarter 2008 and first quarter 2009, excluding the substantial termination fees described above, we estimate that the impact to 2009 will be a reduction in revenues of approximately \$15 million to \$16 million, resulting in reduced operating income of approximately \$3 million to \$4 million.

Direct operating costs

Direct operating costs consist primarily of site rental fees, cash delivery costs, cash supply costs, maintenance, insurance, telecommunications and the cost of data center operations-related personnel, as well as the processing centers' facility related costs and other processing center related expenses. The decrease in direct operating cost for the first nine months of 2009, compared to the same period in 2008, is attributed to the impact of the stronger U.S. dollar and the decrease in the number of ATMs under operation.

Gross profit

Gross profit, which is calculated as revenues less direct operating costs, increased to \$29.0 million for the third quarter of 2009 from \$28.4 million in the third quarter of 2008 and decreased to \$82.2 million for the first nine months of 2009 from \$82.6 million for the same period in 2008. The increase in the third quarter of 2009 is mainly due to increased transaction fees in Germany and improved profitability in India, Poland and our cross-border merchant processing and acquiring business, partly offset by the stronger U.S. dollar and the loss of ATM services contracts discussed above. The decrease in the first nine months of 2009 is largely due to the same factors with a greater

negative impact of the stronger U.S. dollar for the period as compared to the third quarter of 2009, partly offset by the contract termination fee revenues discussed above. Gross profit as a percentage of revenues (gross margin) was 57% for the third quarter and 58% for the first nine months of 2009 compared to 52% for the third quarter and 53% for the first nine months of 2008. The increases in gross margin are primarily due to the previously mentioned contract termination fees and gross margin improvements in Germany, India and our cross-border merchant processing and acquiring business.

Salaries and benefits

The decrease in salaries and benefits for the first nine months of 2009 compared to the same period in 2008 is primarily due to the impact of the stronger U.S. dollar discussed above. As a percentage of revenues, these costs were flat at 16% of revenues for the first nine months of 2009 and 2008.

Table of Contents*Selling, general and administrative*

The decrease in selling, general and administrative expenses for the first nine months of 2009 compared to the same period in 2008 was primarily due to the impact of the stronger U.S. dollar, partly offset by increased expenses incurred in connection with growth in India and China. The decrease in these expenses was also impacted by the third quarter 2008 spike in expenses following the launch of our cross-border merchant processing and acquiring business. As a percentage of revenues, selling, general and administrative expenses decreased to 9% for the first nine months of 2009 compared to 10% for the same period in 2008.

Depreciation and amortization

The decrease in depreciation and amortization expense for the first nine months of 2009 compared to the same period in 2008 is due primarily to the impact of the stronger U.S. dollar described above. As a percentage of revenues, these expenses were flat at 9.5% for the first nine months of 2009 and 2008.

Operating income

Operating income as a percentage of revenues for the first nine months of 2009 was 24% compared to 18% for the same period in 2008. The increase in operating income and operating margin is primarily due to the substantial contract termination revenues described above and the improvements in Germany, India and our cross-border merchant processing and acquiring business, partly offset by the impact of the stronger U.S. dollar. Operating income per transaction was \$0.07 for the first nine months of 2009 compared to \$0.06 for the same period in 2008.

PREPAID PROCESSING SEGMENT

The following table presents the results of operations for the three- and nine-month periods ended September 30, 2009 and 2008 for our Prepaid Processing Segment:

	Three Months Ended		Nine Months Ended					
	September 30,		Year-over-Year Change		September 30,		Year-over-Year Change	
	2009	2008	Increase (Decrease) Amount	Increase (Decrease) Percent	2009	2008	Increase (Decrease) Amount	Increase (Decrease) Percent
(dollar amounts in thousands)								
Total revenues	\$ 153,610	\$ 166,784	\$ (13,174)	(8%)	\$ 433,386	\$ 463,642	\$ (30,256)	(7%)
Operating expenses:								
Direct operating costs	123,423	136,474	(13,051)	(10%)	349,800	378,934	(29,134)	(8%)
Salaries and benefits	7,486	7,733	(247)	(3%)	20,703	21,217	(514)	(2%)
Selling, general and administrative	5,219	5,689	(470)	(8%)	15,170	16,423	(1,253)	(8%)
Depreciation and amortization	3,934	4,273	(339)	(8%)	11,178	12,699	(1,521)	(12%)
Total operating expenses	140,062	154,169	(14,107)	(9%)	396,851	429,273	(32,422)	(8%)
Operating income	\$ 13,548	\$ 12,615	\$ 933	7%	\$ 36,535	\$ 34,369	\$ 2,166	6%
Transactions processed (in millions)	194.4	180.4	14.0	8%	572.9	517.2	55.7	11%

Revenues

The decrease in revenues for the first nine months of 2009 compared to the first nine months of 2008 was primarily due to the stronger U.S. dollar during the first nine months of 2009 compared to the same period in 2008 relative to most of the currencies of the countries in which we operate, particularly the Australian dollar and British pound.

Because our revenues are recorded in the functional currencies of our operating entities, amounts we earn in foreign currencies are negatively impacted by the strengthening of the U.S. dollar. Additionally, mobile operator commission rates decreased in the U.K during the third quarter of 2009. These decreases were partly offset by an increase in total transactions processed, led by improvements in Australia, Germany and the U.S. Our Australian subsidiary enhanced its market position in the first quarter of 2009 by signing an exclusive, long-term distribution agreement with Vodafone Australia. The agreement strengthens our existing relationship with Vodafone and preserves our gross margins during the term of the agreement.

In certain more mature markets, such as the U.K., New Zealand and Spain, our revenue growth has slowed substantially and, in some cases, revenues have decreased because conversion from scratch cards to electronic top-up is substantially complete and certain mobile operators and retailers are driving competitive reductions in pricing and margins. We expect most of our future revenue growth to be

Table of Contents

derived from: (i) additional products sold over the base of prepaid processing terminals, (ii) developing markets or markets in which there is organic growth in the prepaid sector overall, (iii) continued conversion from scratch cards to electronic top-up in less mature markets, and (iv) acquisitions, if available.

Revenues per transaction were \$0.79 for the third quarter and \$0.76 for the first nine months of 2009 compared to \$0.92 for the third quarter and \$0.90 for the first nine months of 2008. The decrease in revenues per transaction is due mainly to the impact of the stronger U.S. dollar and the mobile operator commission rate decreases in the U.K.

Direct operating costs

Direct operating costs in the Prepaid Processing Segment include the commissions we pay to retail merchants for the distribution and sale of prepaid mobile airtime and other prepaid products, as well as expenses required to operate POS terminals. Because of their nature, these expenditures generally fluctuate directly with revenues and processed transactions. The decreases in direct operating costs are generally attributable to the impact of the stronger U.S. dollar, partly offset by the increase in total transactions processed. Additionally, substantially all of the third quarter 2009 decrease in mobile operator commission revenues in the U.K. discussed above was passed on to retail merchants resulting in lower commission costs.

Gross profit

Gross profit, which represents revenues less direct costs, was \$30.2 million for the third quarter and \$83.6 million for the first nine months of 2009 compared to \$30.3 million for the third quarter and \$84.7 million for the first nine months of 2008. Gross margin increased to 20% for the third quarter and 19% for the first nine months of 2009 compared to 18% for the same periods in 2008. Gross profit per transaction was \$0.16 for the third quarter and \$0.15 for the first nine months of 2009 compared to \$0.17 for the third quarter and \$0.16 for the first nine months of 2008. The primary cause of the reduction in gross profit per transaction is the impact of the stronger U.S. dollar.

Salaries and benefits

The decrease in salaries and benefits for the first nine months of 2009 compared to the first nine months of 2008 is primarily due to the impact of the stronger U.S. dollar, partly offset by additional overhead to support development in new and growing markets. As a percentage of revenues, salaries and benefits increased slightly to 4.8% for the first nine months of 2009 from 4.6% for the same period in 2008.

Selling, general and administrative

The decrease in selling, general and administrative expenses for the first nine months of 2009 compared to the first nine months of 2008 is due to the impact of the stronger U.S. dollar, partly offset by additional overhead to support development in new and growing markets. As a percentage of revenues, these expenses remained flat at 3.5% for the first nine months of 2009 compared to the same period in 2008.

Depreciation and amortization

Depreciation and amortization expense primarily represents amortization of acquired intangible assets and the depreciation of POS terminals we install in retail stores. Depreciation and amortization expense decreased for the first nine months of 2009 compared to the first nine months of 2008 primarily due to the impact of the stronger U.S. dollar. As a percentage of revenues, these expenses decreased slightly to 2.6% for the first nine months of 2009 from 2.7% for the first nine months of 2008.

Operating income

The improvement in operating income for 2009 compared to 2008 is due to the growth in transactions processed, partly offset by the impact of foreign currency translations to the U.S. dollar.

Operating income as a percentage of revenues was 8.8% for the third quarter and 8.4% for the first nine months of 2009 compared to 7.6% for the third quarter and 7.4% for the first nine months of 2008. The increase is primarily due to the increase in transactions processed and the associated gross margin expansion. Operating income per transaction was relatively flat at \$0.07 for the third quarter and \$0.6 for the first nine months of 2009 compared to \$0.07 for the third quarter and first nine months of 2008. The flatness in 2009 reflects the gross margin expansion largely offsetting the negative impact of the stronger U.S. dollar.

Table of Contents**MONEY TRANSFER SEGMENT**

The following tables present the results of operations for the three- and nine-month periods ended September 30, 2009 and 2008 for the Money Transfer Segment:

	Three Months Ended		Year-over-Year Change		Nine Months Ended		Year-over-Year Change	
	September 30,		Increase		September 30,		Increase	
	2009	2008	(Decrease)	(Decrease)	2009	2008	(Decrease)	(Decrease)
(dollar amounts in thousands)	2009	2008	Amount	Percent	2009	2008	Amount	Percent
Total revenues	\$ 60,271	\$ 59,511	\$ 760	1%	\$ 171,008	\$ 171,299	\$ (291)	
Operating expenses:								
Direct operating costs	28,097	29,525	(1,428)	(5%)	81,710	86,066	(4,356)	(5%)
Salaries and benefits	14,626	13,172	1,454	11%	39,549	37,964	1,585	4%
Selling, general and administrative	9,680	8,874	806	9%	27,342	24,903	2,439	10%
Goodwill and acquired intangible assets impairment				n/m	9,884		9,884	n/m

Total operating expenses	57,696	56,359	1,337	2%	173,623	163,638	9,985	6%
Operating income (loss)	\$ 2,575	\$ 3,152	\$ (577)	(18%)	\$ (2,615)	\$ 7,661	\$ (10,276)	n/m
Transactions processed (in millions)	4.5	4.3	0.2	5%	13.0	12.4	0.6	5%

n/m Not meaningful.

Revenues

Revenues from the Money Transfer Segment include a transaction fee for each transaction as well as the difference between purchasing currency at wholesale exchange rates and selling the currency to customers at retail exchange rates. Revenues per transaction decreased to \$13.39 for the third quarter and \$13.15 for the first nine months of 2009 from \$13.84 for the third quarter and \$13.81 for the first nine months of 2008. The growth rate of revenues lagged the transaction growth rate largely as a result of the impact of the stronger U.S. dollar. Because our revenues are recorded in the functional currencies of our operating entities, amounts we earn in foreign currencies are negatively impacted by the strengthening of the U.S. dollar. This decrease was partly offset by a strong increase in transfers from non-U.S. locations which generally have higher revenues per transaction than transfers initiated in the U.S. For the nine months ended September 30, 2009, 65% of our money transfers were initiated in the U.S., 32% in Europe and 3% in other countries, such as Canada and Australia. This compares to 69% initiated in the U.S., 28% initiated in Europe and 3% in other countries for the nine months ended September 30, 2008. We expect that the U.S. will continue to represent our highest volume market; however, future growth is expected to be derived from non-U.S. initiated sources. The flatness in revenues for the first nine months of 2009 compared to revenues for the first nine months of 2008 is primarily due to the impact of the stronger U.S. dollar, largely offset by an increase in the number of transactions processed. For the first nine months of 2009, money transfers to Mexico, which represented 26% of total money transfers, decreased by 18% while transfers to all other countries increased 16% when compared to the first nine

months of 2008. The increase in transfers to countries other than Mexico is primarily due to the expansion of our operations. The decline in transfers to Mexico was largely the result of downturns in certain labor markets and other economic factors impacting the U.S. market as well as immigration developments in the U.S. These issues have also resulted in certain competitors lowering transaction fees and foreign currency exchange spreads in an attempt to limit the impact on money transfer volumes. We have generally maintained our pricing structure in response to these developments.

Direct operating costs

Direct operating costs in the Money Transfer Segment primarily represent commissions paid to agents that originate money transfers on our behalf and distribution agents that disburse funds to the customers' destination beneficiary, together with less significant costs, such as telecommunication and bank fees to collect money from originating agents. The decrease in direct operating costs in the first nine months of 2009 compared to the same period in 2008 is due to the impact of the stronger U.S. dollar, partly offset by the growth in transactions processed.

Table of Contents*Gross profit*

Gross profit, which represents revenues less direct costs, was \$32.2 million for the third quarter and \$89.3 million for the first nine months of 2009 compared to gross profit of \$30.0 million for the third quarter and \$85.2 million for the first nine months of 2008. The improvements are primarily due to the growth in money transfer transactions, partly offset by the impact of the stronger U.S. dollar related to money transfers originated outside the U.S. As discussed above, certain competitors have been lowering transaction fees and foreign currency exchange spreads in the U.S. market as a result of the economic factors and immigration developments impacting the U.S. market. We have generally maintained our pricing structure in response to these developments. We cannot predict how long these issues will continue to impact the U.S. market or whether other markets will experience similar issues and we cannot predict whether we will change our pricing strategy over the short or long term in order to protect or increase market share. Gross margin was 53% for the third quarter and 52% for the first nine months of 2009 compared to 50% for the third quarter and first nine months of 2008. This improvement primarily reflects the strong growth in transaction volume in our higher margin non-U.S. locations.

Salaries and benefits

Salaries and benefits include salaries and commissions paid to employees, the cost of providing employee benefits, amounts paid to contract workers and accruals for incentive compensation. The increase in salaries and benefits in the first nine months of 2009 compared to salaries and benefits expense for the same period in 2008 is mainly due to the increased expenditures we incurred to support expansion of our operations, primarily internationally, partly offset by the impact of the stronger U.S. dollar. As a percentage of revenues, salaries and benefits increased slightly to 23% for the first nine months of 2009 from 22% for the same period in 2008.

Selling, general and administrative

Selling, general and administrative expenses include operations support costs, such as rent, utilities, professional fees, indirect telecommunications, advertising and other miscellaneous overhead costs. The increase in selling, general and administrative expenses for the first nine months of 2009 compared to selling, general and administrative expenses for the first nine months of 2008 is primarily the result of increased expenditures to support expansion of our operations, primarily internationally, and increased professional fees for legal expenses, partly offset by the impact of the stronger U.S. dollar. As a percentage of revenues, selling, general and administrative expenses increased to 16% for the first nine months of 2009 from 15% for the same period in 2008.

Goodwill and acquired intangible assets impairment

In the fourth quarter of 2008, we recorded a non-cash impairment charge of \$169.4 million related to certain goodwill and intangible assets of the RIA money transfer business. This charge was an estimate based on the assessment performed up to the filing date of our 2008 Annual Report on Form 10-K. We completed the assessment in the first quarter of 2009 and recorded an additional \$9.9 million non-cash impairment charge in the first quarter of 2009. Should economic or other factors cause us to significantly lower our cash flow projections for our money transfer business, we will need to reassess the business for further possible impairment. See Note 5, Goodwill and Acquired Intangible Assets, Net, to the Unaudited Consolidated Financial Statements for a further discussion of this charge.

Depreciation and amortization

Depreciation and amortization primarily represents amortization of acquired intangible assets and also includes depreciation of money transfer terminals, computers and software, leasehold improvements and office equipment. The increase in depreciation and amortization in the first nine months of 2009 compared to the same period in 2008 reflects increased charges related to additional computer equipment in our customer service centers and increased leasehold improvements, office equipment and computer equipment for expansion of our company stores, partly offset by the impact of the stronger U.S. dollar. Greater acquisition-related amortization in the third quarter of 2009 also contributed to the increase. As a percentage of revenues, depreciation and amortization remained flat at 9% for each of the nine-month periods ended September 30, 2009 and 2008.

Operating income

Excluding the goodwill and acquired intangible assets impairment charge, operating income for the first nine months of 2009 decreased \$0.4 million compared to the same period in 2008. This decrease reflects the increased costs to expand internationally, increased professional fees and the negative impact of the stronger U.S. dollar, partly offset by

the growth in transactions processed, mainly those originated in non-U.S. locations.

Table of Contents**CORPORATE SERVICES**

The following table presents the operating expenses for the three- and nine-month periods ended September 30, 2009 and 2008 for Corporate Services:

	Three Months Ended		Year-over-Year Change		Nine Months Ended		Year-over-Year Change	
	September 30,		Increase		September 30,		Increase	
	2009	2008	(Decrease) Amount	(Decrease) Percent	2009	2008	(Decrease) Amount	(Decrease) Percent
(dollar amounts in thousands)								
Salaries and benefits	\$ 4,731	\$ 3,556	\$ 1,175	33%	\$ 11,817	\$ 12,017	\$ (200)	(2%)
Selling, general and administrative	1,178	1,389	(211)	(15%)	5,240	7,237	(1,997)	(28%)
Depreciation and amortization	378	310	68	22%	1,014	919	95	10%
Total operating expenses	\$ 6,287	\$ 5,255	\$ 1,032	20%	\$ 18,071	\$ 20,173	\$ (2,102)	(10%)

Corporate operating expenses

Operating expenses for Corporate Services decreased for the first nine months of 2009 compared to the same period in 2008. The decrease in salaries and benefits is primarily the result of the first quarter 2009 reversal of share-based compensation related to certain performance-based stock awards, as well as severance costs incurred in the first quarter 2008 related to certain senior level positions. These decreases were partly offset by increased incentive compensation expense in the third quarter of 2009. The decrease in selling, general and administrative expenses was due primarily to the first quarter 2008 write-off of \$3.0 million in professional fees and settlement costs associated with our potential acquisition of MoneyGram, partly offset by increased costs in the second quarter 2009 for professional fees for legal and acquisition-related expenses.

OTHER INCOME (EXPENSE)

	Three Months Ended		Year-over-Year Change		Nine Months Ended		Year-over-Year Change	
	September 30,		Change		September 30,		Change	
	2009	2008	Amount	Percent	2009	2008	Amount	Percent

Other income (expense), net	\$ 4,593	\$ (24,604)	\$ 29,197	n/m	\$ (7,433)	\$ (43,556)	\$ 36,123	n/m

n/m Not meaningful.

Interest income

The decreases in interest income for the third quarter and first nine months of 2009 from the comparable periods in 2008 were primarily due to a decline in short-term interest rates and a decrease in average cash balances on hand during the respective periods. Additionally, \$1.2 million was recognized in the first quarter 2008 for interest related to a federal excise tax refund recorded in the fourth quarter 2007.

29

Table of Contents

Interest expense

The decreases in interest expense for the third quarter and first nine months of 2009 from the comparable periods in 2008 were primarily related to the reductions in debt from scheduled and early repayments on our term loan, repurchases of convertible debentures and reductions in amounts outstanding under the revolving credit facility. The decreases in interest expense were also due to lower interest rates on our floating-rate debt obligations in the third quarter and first nine months of 2009 compared to the same periods in 2008.

Income from unconsolidated affiliates

Income from unconsolidated affiliates represents the equity in income of our 40% equity investment in e-pay Malaysia and our 49% investment in Euronet Middle East. The increases in income were mainly the result of improved profitability of both affiliates.

Gain on sale of (impairment loss on) investment securities

During the third quarter of 2009, we sold our shares of MoneyGram stock, recognizing a \$1.8 million gain. The gain resulted from the increase in the share price after the \$18.8 million impairment loss we recorded in the first half of 2008 due to the decline in value of our investment in MoneyGram, which was determined to be other than temporary.

Gain (loss) on early retirement of debt

In the first half of 2009, we repurchased in privately negotiated transactions \$25.8 million in principal amount of the 1.625% convertible debentures due 2024. Loss on early retirement of debt of \$0.3 million for the first nine months of 2009 represents the difference in the amounts paid for the convertible debentures over their carrying amounts, as well as the pro-rata write-off of deferred financing costs associated with the portion of the term loan that was prepaid during the first nine months of 2009. The \$0.8 million gain for the first nine months of 2008 is the result of the third quarter 2008 repurchase of \$55.0 million in principal of the 1.625% convertible debentures, along with the term loan amount that was prepaid during the first nine months of 2008.

Foreign currency exchange gain (loss), net

Assets and liabilities denominated in currencies other than the local currency of each of our subsidiaries give rise to foreign currency exchange gains and losses. Exchange gains and losses that result from re-measurement of these assets and liabilities are recorded in determining net income. The majority of our foreign currency gains or losses are due to the re-measurement of intercompany loans that are in a currency other than the functional currency of one of the parties to the loan. For example, we make intercompany loans based in euros from our corporate division, which is comprised of U.S. dollar functional currency entities, to certain European entities that use the euro as the functional currency. As the U.S. dollar strengthens against the euro, foreign currency losses are generated on our corporate entities because the number of euros to be received in settlement of the loans decreases in U.S. dollar terms. Conversely, in this example, in periods where the U.S. dollar weakens, our corporate entities will record foreign currency gains.

We recorded net foreign currency exchange gains of \$7.8 million in the third quarter and \$6.8 million in the first nine months of 2009 compared to losses of \$19.3 million in the third quarter and \$6.6 million in the first nine months of 2008. These realized and unrealized foreign currency exchange gains and losses reflect the respective weakening and strengthening of the U.S. dollar against most of the currencies of the countries in which we operate during the respective periods.

Table of Contents**INCOME TAX EXPENSE**

Our effective tax rates as reported and as adjusted are calculated below:

(dollar amounts in thousands)	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2009	2008	2009	2008
Income (loss) from continuing operations before income taxes	\$ 26,678	\$ (5,836)	\$ 42,374	\$ 5,741
Income tax expense (benefit)	8,110	(8,679)	19,824	3,070
Income from continuing operations	\$ 18,568	\$ 2,843	\$ 22,550	\$ 2,671
Effective income tax rate	30.4%	148.7%	46.8%	53.5%
Income (loss) from continuing operations before income taxes	\$ 26,678	\$ (5,836)	\$ 42,374	\$ 5,741
Adjust: Foreign currency exchange gain (loss), net	7,766	(19,346)	6,825	(6,647)
Adjust: Goodwill and acquired intangible assets impairment			(9,884)	
Adjust: Gain (loss) related to investment securities	1,751		1,751	(18,760)
Income from continuing operations before income taxes, as adjusted	\$ 17,161	\$ 13,510	\$ 43,682	\$ 31,148
Income tax expense (benefit)	\$ 8,110	\$ (8,679)	\$ 19,824	\$ 3,070
Adjust: Income tax expense (benefit) attributable to foreign currency exchange gain (loss), net	161	(14,640)	165	(7,026)
Income tax expense (benefit), as adjusted	\$ 7,949	\$ 5,961	\$ 19,659	\$ 10,096
Effective income tax rate, as adjusted	46.3%	44.1%	45.0%	32.4%

The Company's effective tax rates for continuing operations were 30.4% and 148.7% for the three-month periods ended September 30, 2009 and 2008, respectively, and were 46.8% and 53.5% for the nine-month periods ended September 30, 2009 and 2008, respectively. The effective tax rates were significantly influenced by certain non-taxable items, including the goodwill and acquired intangible assets impairment charge in the first quarter 2009, the impairment losses on investment securities during the first half of 2008 and the gain on sale of investments securities in the third quarter of 2009. Additionally, foreign currency exchange rates fluctuated significantly during the reported periods creating foreign currency exchange gains and losses that impacted the effective tax rates. Excluding foreign currency exchange results, the impairments to goodwill and acquired intangible assets and the gains and losses related to investment securities from pre-tax income, as well as the related tax effects for these items, the Company's effective tax rates were 46.3% and 44.1% for the three months ended September 30, 2009 and 2008, respectively, and 45.0% and 32.4% for the nine months ended September 30, 2009 and 2008, respectively.

The increase in the effective tax rates, as adjusted, for the first nine months of 2009 compared to the same period in 2008 is primarily related to our U.S. tax position. For the nine months ended September 30, 2009, we have recorded a valuation allowance against our U.S. federal tax net operating losses as we have determined that it is more likely than not that a tax benefit will not be realized. Accordingly, the federal income tax benefit associated with pre-tax book losses generated by our U.S. entities has not been recognized in this period. For the nine months ended September 30, 2008, no valuation allowance was recorded against our U.S. federal tax net operating losses, resulting in a tax benefit associated with the pre-tax loss generated by our U.S. operations. Additional reasons for the increase in the effective tax rates include the accrual of incremental state income tax expense in the first nine months of 2009 compared to the same period in 2008, mainly due to exhausting certain state net operating losses, and the recognition of a one-time tax benefit in the first nine months of 2008 resulting from the successful conclusion of a tax audit in one of our foreign jurisdictions. Finally, the loss of certain income tax deductions in Spain as a result of the goodwill and acquired intangible assets impairment charges increased income tax expense in the first nine months of 2009.

OTHER

Discontinued operations, net

During 2008, we decided to sell Essentis in order to focus our investments and resources on our transaction processing businesses. We have signed an agreement to sell the assets of the business and expect the sale to close in the fourth quarter of 2009. Accordingly, Essentis' results of operations are shown as discontinued operations in the Unaudited Consolidated Statements of Operations for all periods presented.

Table of Contents*Net income attributable to noncontrolling interests*

Net income attributable to noncontrolling interests was \$0.2 million for the third quarter and \$1.0 million for the first nine months of 2009 compared to \$0.7 million for the third quarter and \$1.9 million for the first nine months of 2008. Noncontrolling interests represent the elimination of net income or loss attributable to the minority shareholders portion of the following consolidated subsidiaries that are not wholly-owned:

Subsidiary	Percent Owned	Segment
Movilcarga	80%	Prepaid - Spain
e-pay SRL	51%	Prepaid - Italy
ATX	51%	Prepaid - various
Euronet China	75%	EFT - China

NET INCOME (LOSS) ATTRIBUTABLE TO EURONET WORLDWIDE, INC.

Net income attributable to Euronet Worldwide, Inc. was \$18.9 million for the third quarter and \$22.1 million for the first nine months of 2009 compared to \$1.9 million for the third quarter of 2008 and a net loss of \$0.9 million for the first nine months of 2008. As more fully discussed above, the increase of \$23.0 million for the first nine months of 2009 as compared to the same period in 2008 was primarily the result of the \$18.8 million first half 2008 unrealized loss on investment securities and the \$1.8 million third quarter 2009 gain on sale of the same securities along with the \$13.5 million increase in foreign currency exchange gains, partly offset by the \$16.8 million increase in income tax expense. Additionally, operating income increased \$0.5 million, net interest expense decreased \$2.5 million, net income from discontinued operations increased \$2.1 million and other items increased net income by \$0.6 million.

LIQUIDITY AND CAPITAL RESOURCES*Working capital*

As of September 30, 2009, we had working capital, which is calculated as the difference between total current assets and total current liabilities, of \$112.1 million, compared to working capital of \$99.1 million as of December 31, 2008. Our ratio of current assets to current liabilities was 1.21 as of September 30, 2009 and 1.17 as of December 31, 2008. The increase in working capital was due primarily to the earnings achieved during the first nine months of 2009, partly offset by the use of cash to reduce long-term debt.

We require substantial working capital to finance operations. The Money Transfer Segment funds the correspondent distribution network before receiving the benefit of amounts collected from customers by agents. Working capital needs increase due to weekends and international banking holidays. As a result, we may report more or less working capital for the Money Transfer Segment based solely upon the fiscal period ending on a particular day. As of September 30, 2009, working capital in the Money Transfer Segment was \$73.1 million. We expect that working capital needs will increase as we expand this business. The Prepaid Processing Segment produces positive working capital, but much of it is restricted in connection with the administration of its customer collection and vendor remittance activities. The EFT Processing Segment does not require substantial working capital.

Operating cash flow

Cash flows provided by operating activities were \$117.3 million for the first nine months of 2009 compared to \$48.8 million for the same period in 2008. The increase is primarily due to fluctuations in working capital primarily associated with the timing of the settlement process with mobile operators in the Prepaid Processing Segment, partly offset by amounts paid to secure an exclusive, long-term distribution agreement with a vendor in Australia.

Investing activity cash flow

Cash flows used in investing activities were \$35.4 million for the first nine months of 2009, compared to \$10.3 million for the same period in 2008. Our investing activities included \$26.2 million and \$29.1 million for purchases of property and equipment in the first nine months of 2009 and 2008, respectively. Additionally, the first nine months of 2009 included \$10.3 million in cash used for acquisitions compared to \$5.4 million for the first nine months of 2008. Our investing activities for the first nine months of 2009 included \$3.0 million in proceeds from the sale of investment securities. Our investing activities for the first nine months of 2008 included the return of \$26 million we placed in escrow in 2007 in connection with the agreement to acquire Envios de Valores La Nacional

Corp. (La Nacional). On January 10, 2008, we entered into a settlement agreement with La Nacional and its stockholder evidencing the parties' mutual agreement not to consummate the acquisition, in exchange for payment by Euronet of a portion of the legal fees incurred by La Nacional. Finally, cash used for software development and other investing activities totaled \$1.9 million for the first nine months of 2009 and \$1.8 million for the same period in 2008.

Table of Contents*Financing activity cash flow*

Cash flows used in financing activities were \$48.0 million during the first nine months of 2009 compared to \$126.5 million during the same period in 2008. Our financing activities for the first nine months of 2009 consisted primarily of net repayments of debt obligations of \$46.8 million compared to \$127.7 million for the first nine months of 2008. To support the short-term cash needs of our Money Transfer Segment, we generally borrow amounts under the revolving credit facility several times each month to fund the correspondent network in advance of collecting remittance amounts from the agency network. These borrowings are repaid over a very short period of time, generally within a few days. Primarily as a result of this, during the first nine months of 2009 we had a total of \$296.4 million in borrowings and \$311.2 million in repayments under our revolving credit facility. During the first nine months of 2009, we paid \$27.6 million for repayments and early retirements of debt obligations and \$4.4 million for capital lease obligations. Additionally, we paid \$2.4 million of dividends to noncontrolling interests stockholders in the first nine months of 2009.

Expected future financing and investing cash requirements primarily depend on our acquisition activity and the related financing needs.

Other sources of capital

Credit Facility To finance the acquisition of RIA in the second quarter 2007, we entered into a \$290 million secured credit facility consisting of a \$190 million seven-year term loan, which was fully drawn at closing, and a \$100 million five-year revolving credit facility (together, the Credit Facility). The \$190 million seven-year term loan bears interest at LIBOR plus 200 basis points or prime plus 100 basis points and requires that we repay 1% of the original balance each year, with the remaining balance payable after seven years. We estimate that we will be able to repay the term loan prior to its maturity date through cash flows available from operations, provided our operating cash flows are not required for future business developments. Financing costs of \$4.8 million have been deferred and are being amortized over the terms of the respective loans.

During February 2009, we entered into Amendment No. 2 to the Credit Facility to, among other things, (i) provide us the right under the Credit Facility to (a) repurchase the remaining \$70 million of 1.625% Convertible Senior Debentures Due 2024 then outstanding and (b) repurchase our 3.5% Convertible Debentures Due 2025 prior to any repurchase date using proceeds of a qualifying refinancing, the proceeds of a qualifying equity issuance or shares of common stock; (ii) revise the definition of Consolidated EBITDA and the covenant regarding maintenance of Consolidated Net Worth to exclude the effect of non-cash charges for impairment of goodwill or other intangible assets for the periods ending December 31, 2008 and thereafter; and (iii) broaden or otherwise modify various definitions or provisions related to indebtedness, liens, permitted disposition, debt transactions, investments and other matters. Additionally, the lenders acknowledged that we have sufficient liquidity with respect to the December 15, 2009 repurchase date for the 1.625% Convertible Senior Debentures. Furthermore, in February 2009, our Board of Directors authorized the repurchase of up to \$70 million of the 1.625% Convertible Senior Debentures, from time to time, in open market or privately negotiated purchases. We incurred costs of approximately \$1.5 million in connection with the amendment, which will be recognized as additional interest expense over the remaining term of the Credit Facility.

The \$100 million five-year revolving credit facility bears interest at LIBOR or prime plus a margin that adjusts each quarter based upon our consolidated total debt to earnings before interest, taxes, depreciation and amortization (EBITDA) ratio. We intend to use the revolving credit facility primarily to fund working capital requirements, which are expected to increase as we expand the Money Transfer business. Based on our current projected working capital requirements, we anticipate that our revolving credit facility will be sufficient to fund our working capital needs. We may be required to repay our obligations under the Credit Facility six months before any potential repurchase dates, the first being October 15, 2012, under our \$175 million 3.5% Convertible Debentures Due 2025, unless we are able to demonstrate that either: (i) we could borrow unsubordinated funded debt equal to the principal amount of the applicable convertible debentures while remaining in compliance with the financial covenants in the Credit Facility or (ii) we will have sufficient liquidity to meet repayment requirements (as determined by the administrative agent and the lenders). The Credit Facility contains four financial covenants that we must meet as defined in the agreement: (1) total debt to EBITDA ratio, (2) senior secured debt to EBITDA ratio, (3) EBITDA to fixed charge coverage ratio

and (4) minimum Consolidated Net Worth. These and other material terms and conditions applicable to the Credit Facility are described in the agreement governing the Credit Facility.

The term loan may be expanded by up to an additional \$150 million and the revolving credit facility can be expanded by up to an additional \$25 million, subject to satisfaction of certain conditions including pro forma debt covenant compliance.

As of September 30, 2009, we had borrowings of \$129.5 million outstanding against the term loan. We had borrowings of \$2.1 million and stand-by letters of credit of \$44.9 million outstanding against the revolving credit facility. The remaining \$53.0 million under the revolving credit facility (\$78.0 million if the facility were increased to \$125 million) was available for borrowing. Borrowings under the revolving credit facility are being used to fund short-term working capital requirements in the U.S. and India. As of September 30, 2009,

Table of Contents

our weighted average interest rate under the revolving credit facility was 5.3% and under the term loan was 2.5%, excluding amortization of deferred financing costs.

Short-term debt obligations Short-term debt obligations at September 30, 2009 were primarily the \$43.8 million 1.625% Convertible Senior Debentures Due 2024 as the holders have the option to require us to repurchase their debentures at par on December 15, 2009, and the \$1.9 million annual repayment requirement under the term loan. Certain of our subsidiaries also have available credit lines and overdraft facilities to supplement short-term working capital requirements, when necessary, and there were \$0.4 million of borrowings outstanding against these facilities as of September 30, 2009.

We believe that the short-term debt obligations can be refinanced on terms acceptable to us. However, if acceptable refinancing options are not available, we believe that amounts due under these obligations can be funded through cash generated from operations, together with cash on hand or borrowings under our revolving credit facility.

Convertible debt We have \$175.0 million in principal amount of 3.50% Convertible Debentures Due 2025 that are convertible into 4.3 million shares of Euronet Common Stock at a conversion price of \$40.48 per share upon the occurrence of certain events (relating to the closing prices of Euronet Common Stock exceeding certain thresholds for specified periods). The debentures may not be redeemed by us until October 20, 2012 but are redeemable at par at any time thereafter. Holders of the debentures have the option to require us to purchase their debentures at par on October 15, 2012, 2015 and 2020, or upon a change in control of the Company. On the maturity date, these debentures can be settled in cash or Euronet Common Stock, at our option, at predetermined conversion rates.

We also have \$44.2 million in principal amount of 1.625% Convertible Senior Debentures Due 2024 that are convertible into 1.3 million shares of Euronet Common Stock at a conversion price of \$33.63 per share upon the occurrence of certain events (relating to the closing prices of Euronet Common Stock exceeding certain thresholds for specified periods). The debentures may not be redeemed by us until December 20, 2009 but are redeemable at any time thereafter at par. Holders of the debentures have the option to require us to purchase their debentures at par on December 15, 2009, 2014 and 2019, and upon a change in control of the Company. Unless the price of our Common Stock appreciates substantially before December 15, 2009, the holders of the debentures may exercise the option at that date. We fully expect we will have sufficient cash available to fund the potential \$44.2 million purchase price using our cash currently on hand.

Should holders of the convertible debentures require us to repurchase their debentures on the dates outlined above, we cannot guarantee that we will have sufficient cash on hand or have acceptable financing options available to us to fund these required repurchases. An inability to be able to finance these potential repayments could have an adverse impact on our operations. These terms and other material terms and conditions applicable to the convertible debentures are set forth in the indenture agreements governing these debentures.

Other uses of capital

Payment obligations related to acquisitions We have potential contingent obligations to the former owner of the net assets of Movilcarga. Based upon presently available information, we do not believe any additional payments will be required. The seller disputed this conclusion and initiated arbitration as provided for in the purchase agreement. A global public accounting firm was engaged as an independent expert to review the results of the computation, but procedures for such review have never been commenced, principally because the seller is in a bankruptcy proceeding. Any additional payments, if ultimately determined to be owed the seller, will be recorded as additional goodwill and could be made in either cash or a combination of cash and Euronet Common Stock at our option.

In connection with the acquisition of Brodos Romania, we agreed to contingent consideration arrangements based on the achievement of certain performance criteria. If the criteria are achieved, during 2009 and 2010, we would have to pay a total of \$2.5 million in cash or 75,489 shares of Euronet Common Stock, at the option of the seller. However, based on its current performance, Brodos Romania is unlikely to achieve the performance criteria.

Capital expenditures and needs Total capital expenditures for the first nine months of 2009 were \$27.3 million. These capital expenditures were primarily for the purchase of ATMs to meet contractual requirements in Poland, India and China, the purchase and installation of ATMs in key under-penetrated markets, the purchase of POS terminals for the Prepaid Processing and Money Transfer Segments, and office, data center and company store computer equipment and software, including capital expenditures for the purchase and development of the necessary processing systems

and capabilities to expand the cross-border merchant processing and acquiring business. Total capital expenditures for 2009 are estimated to be approximately \$35 million to \$40 million.

In the Prepaid Processing Segment, approximately 115,000 of the approximately 475,000 POS devices that we operate are Company-owned, with the remaining terminals being operated as integrated cash register devices of our major retail customers or owned by the retailers. As our Prepaid Processing Segment expands, we will continue to add terminals in certain independent retail locations at a price of approximately \$300 per terminal. We expect the proportion of owned terminals to total terminals operated to remain relatively constant.

At current and projected cash flow levels, we anticipate that cash generated from operations, together with cash on hand and amounts available under our revolving credit facility and other existing and potential future financing will be sufficient to meet our debt, leasing,

Table of Contents

contingent acquisition and capital expenditure obligations. If our capital resources are insufficient to meet these obligations, we will seek to refinance our debt under terms acceptable to us. However, we can offer no assurances that we will be able to obtain favorable terms for the refinancing of any of our debt or other obligations.

Other trends and uncertainties

Cross border merchant processing and acquiring In our EFT Processing Segment, we have entered the cross-border merchant processing and acquiring business, through the execution of an agreement with a large petrol retailer in Central Europe. Since the beginning of 2007, we have devoted significant resources, including capital expenditures of approximately \$8.9 million, to the ongoing investment in development of the necessary processing systems and capabilities to enter this business, which involves the purchase and design of hardware and software. Merchant acquiring involves processing credit and debit card transactions that are made on POS terminals, including authorization, settlement, and processing of settlement files. It will involve the assumption of credit risk, as the principal amount of transactions will be settled to merchants before settlements are received from card associations. We incurred \$2.1 million in operating losses related to this business in the first nine months of 2009 and currently expect to incur approximately \$2.3 million to \$2.8 million in operating losses for the full year 2009.

Inflation and functional currencies

Generally, the countries in which we operate have experienced low and stable inflation in recent years. Therefore, the local currency in each of these markets is the functional currency. Currently, we do not believe that inflation will have a significant effect on our results of operations or financial position. We continually review inflation and the functional currency in each of the countries where we operate.

OFF BALANCE SHEET ARRANGEMENTS

Under certain circumstances, we grant guarantees of the obligations of our wholly-owned subsidiaries and we sometimes enter into agreements with unaffiliated third parties that contain indemnification provisions, the terms of which may vary depending on the negotiated terms of each respective agreement. Our liability under such indemnification provisions may be subject to time and materiality limitations, monetary caps and other conditions and defenses. As of September 30, 2009, there were no material changes from the disclosure in our Annual Report on Form 10-K for the year ended December 31, 2008. To date, we are not aware of any significant claims made by the indemnified parties or parties to whom we have provided guarantees on behalf of our subsidiaries and, accordingly, no liabilities have been recorded as of September 30, 2009. See also Note 10, Guarantees, to the Unaudited Consolidated Financial Statements.

CONTRACTUAL OBLIGATIONS

As of September 30, 2009, the only material change from the disclosure relating to contractual obligations contained in our Annual Report on Form 10-K for the year ended December 31, 2008, is the net reduction of \$42.2 million of principal on long-term debt.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In September 2009, the FASB issued Accounting Standards Update (ASU) 2009-13 (formerly Emerging Issues Task Force Consensus 08-01). ASU 2009-13 adds estimated selling price as acceptable evidence of fair value of undelivered products and services in revenue arrangements with multiple deliverables. Estimated selling price can be used if there is no vendor specific objective evidence or third-party evidence of fair value. Additionally, ASU 2009-13 eliminates the use of the residual method of allocating revenue and establishes the relative selling price method as the appropriate means to allocate revenue to each deliverable of an arrangement. ASU 2009-13 is effective on a prospective basis for revenue arrangements entered into or modified for fiscal years beginning on or after June 15, 2010 with earlier application permitted. We are evaluating the impact that the adoption of ASU 2009-13 will have on our financial statements and whether we will elect early application; however, the impact is not expected to be material.

FORWARD-LOOKING STATEMENTS

This document contains statements that constitute forward-looking statements within the meaning of section 27A of the Securities Act of 1933 and section 21E of the Securities Exchange Act of 1934. All statements other than statements of historical facts included in this document are forward-looking statements, including statements regarding the following:

- trends affecting our business plans, financing plans and requirements;
- trends affecting our business;
- the adequacy of capital to meet our capital requirements and expansion plans;
- the assumptions underlying our business plans;
- our ability to repay indebtedness;
- business strategy;
- government regulatory action;
- technological advances; and
- projected costs and revenues.

Although we believe that the expectations reflected in these forward-looking statements are reasonable, we can give no assurance that these expectations will prove to be correct. Forward-looking statements are typically identified by the words believe, expect, anticipate, intend, estimate and similar expressions.

Investors are cautioned that any forward-looking statements are not guarantees of future performance and involve risks and uncertainties. Actual results may materially differ from those in the forward-looking statements as a result of various factors, including, but not limited to, those referred to above and as set forth and more fully described in Part I, Item 1A Risk Factors of our Annual Report on Form 10-K for the year ended December 31, 2008.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest rate risk

As of September 30, 2009, our total debt outstanding was \$336.0 million. Of this amount, \$196.0 million, or 58% of our total debt obligations, relates to contingent convertible debentures having fixed coupon rates. Our \$175.0 million principal amount of contingent convertible debentures, issued in October 2005, accrue cash interest at a rate of 3.50% of the principal amount per annum. The \$44.2 million principal amount of contingent convertible debentures, issued in December 2004, accrue cash interest at a rate of 1.625% of the principal amount per annum. Based on quoted market prices, as of September 30, 2009, the fair value of our fixed rate convertible debentures was \$204.0 million, compared to a carrying value of \$196.0 million.

Interest expense, including amortization of deferred debt issuance costs, for our total \$196.0 million in fixed rate debt totals approximately \$16.9 million per year, or a weighted average interest rate of 8.6% annually. Additionally, approximately \$7.8 million, or 2% of our total debt obligations, relate to capitalized leases with fixed payment and interest terms that expire between 2009 and 2014.

The remaining \$132.2 million, or 40% of our total debt obligations, relates to debt that accrues interest at variable rates. If we were to maintain these borrowings for one year, and maximize the potential borrowings available under the revolving credit facility for one year, including the \$25.0 million in potential additional expanded borrowings, a 1% increase in the applicable interest rate would result in additional annual interest expense to the Company of approximately \$2.1 million. This computation excludes the \$150.0 million in potential expanded term loan because of the limited circumstances under which the additional amounts would be available to us for borrowing.

Our excess cash is invested in instruments with original maturities of three months or less; therefore, as investments mature and are reinvested, the amount we earn will increase or decrease with changes in the underlying short term interest rates.

Foreign currency exchange rate risk

For the first nine months of 2009, 75% of our revenues were generated in non-U.S. dollar countries compared to 76% for the first nine months of 2008. We expect to continue generating a significant portion of our revenues in countries with currencies other than the U.S. dollar.

We are particularly vulnerable to fluctuations in exchange rates of the U.S. dollar to the currencies of countries in which we have significant operations, primarily the euro, British pound, Australian dollar, Polish zloty and Indian rupee. As of September 30, 2009, we

Table of Contents

estimate that a 10% fluctuation in foreign currency exchange rates would have the combined annualized effect on reported net income and working capital of approximately \$25 million to \$35 million. This effect is estimated by applying a 10% adjustment factor to our non-U.S. dollar results from operations, intercompany loans that generate foreign currency gains or losses and working capital balances that require translation from the respective functional currency to the U.S. dollar reporting currency. Additionally, we have other non-current, non-U.S. dollar assets and liabilities on our balance sheet that are translated to the U.S. dollar during consolidation. These items primarily represent goodwill and intangible assets recorded in connection with acquisitions in countries other than the U.S. We estimate that a 10% fluctuation in foreign currency exchange rates would have a non-cash impact on total comprehensive income of approximately \$50 million to \$60 million as a result of the change in value of these items during translation to the U.S. dollar. For the fluctuations described above, a strengthening U.S. dollar produces a financial loss, while a weakening U.S. dollar produces a financial gain. We believe this quantitative measure has inherent limitations and does not take into account any governmental actions or changes in either customer purchasing patterns or our financing or operating strategies. Because a majority of our revenues and expenses are incurred in the functional currencies of our international operating entities, the profits we earn in foreign currencies are positively impacted by the weakening of the U.S. dollar and negatively impacted by the strengthening of the U.S. dollar. Additionally, our debt obligations are primarily in U.S. dollars, therefore, as foreign currency exchange rates fluctuate, the amount available for repayment of debt will also increase or decrease.

We are also exposed to foreign currency exchange rate risk in our Money Transfer Segment. A majority of the money transfer business involves receiving and disbursing different currencies, in which we earn a foreign currency spread based on the difference between buying currency at wholesale exchange rates and selling the currency to consumers at retail exchange rates. This spread provides some protection against currency fluctuations that occur while we are holding the foreign currency. Our exposure to changes in foreign currency exchange rates is limited by the fact that disbursement occurs for the majority of transactions shortly after they are initiated. Additionally, we enter into foreign currency forward contracts to help offset foreign currency exposure related to the notional value of money transfer transactions collected in currencies other than the U.S. dollar. As of September 30, 2009, we had foreign currency forward contracts outstanding with a notional value of \$44.1 million, primarily in euros, that were not designated as hedges and mature in a weighted average of 4.4 days. The fair value of these forward contracts as of September 30, 2009 was an unrealized loss of less than \$0.1 million, which was partially offset by the unrealized gain on the related foreign currency receivables.

ITEM 4. CONTROLS AND PROCEDURES

Our executive management, including our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15(b) under the Exchange Act as of September 30, 2009. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that the design and operation of these disclosure controls and procedures were effective as of such date to provide reasonable assurance that information required to be disclosed in our reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures.

CHANGE IN INTERNAL CONTROLS

There has been no change in our internal control over financial reporting during the third quarter of 2009 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II OTHER INFORMATION****ITEM 1. LEGAL PROCEEDINGS**

The Company is from time to time a party to litigation arising in the ordinary course of its business. Currently, there are no legal proceedings that management believes, either individually or in the aggregate, would have a material adverse effect upon the consolidated results of operations or financial condition of the Company.

ITEM 1A. RISK FACTORS

You should carefully consider the risks described in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the fiscal year ended December 31, 2008, as updated in our subsequent filings with the SEC before making an investment decision. The risks and uncertainties described in our Annual Report on Form 10-K, as updated by any subsequent Quarterly Reports on Form 10-Q, are not the only ones facing our company. Additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our business operations. If any of the risks identified in our Annual Report on Form 10-K, as updated by any subsequent Quarterly Reports on Form 10-Q, actually occurs, our business, financial condition or results of operations could be materially adversely affected. In that case, the trading price of our Common Stock could decline substantially. This Quarterly Report also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in the forward-looking statements as a result of a number of factors, including the risks described below and elsewhere in this Quarterly Report.

There have been no material changes from the risk factors previously disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2008 and Quarterly Report on Form 10-Q for the three months ended March 31, 2009, as filed with the SEC.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS*Stock repurchases*

For the three months ended September 30, 2009, the Company purchased, in accordance with the 2006 Stock Incentive Plan (Amended and Restated), 150 shares of its Common Stock for participant income tax withholding in conjunction with the lapse of restrictions on stock awards, as requested by the participants. The following table sets forth information with respect to those shares (all purchases occurred during September 2009):

Period	Total Number of Shares Purchased	Average Price Paid Per Share (1)	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
September 1 - September 30	150	\$ 24.79		
Total	150	\$ 24.79		

(1) The price paid per share is the closing price of the shares on the

vesting date.

Table of Contents

ITEM 5. OTHER INFORMATION

In the second quarter 2009, the Antitrust Division of the United States Department of Justice (the DOJ) served Continental Exchange Solutions, Inc. d/b/a RIA Financial Services (CES), an indirect, wholly-owned subsidiary of the Company, with a grand jury subpoena requesting documents from CES and its affiliates in connection with an investigation into money transmission services to the Dominican Republic during the period from January 1, 2004 to the date of the subpoena. The Company and CES are fully cooperating with the DOJ in its investigation.

At this time, we are unable to predict whether this investigation will result in the DOJ bringing charges against CES. Accordingly, we are unable to predict the outcome of this investigation, the possible loss or possible range of loss, if any, associated with the resolution of any charges that may be brought against CES, or any potential effect on the Company's business, results of operations or financial condition.

We acquired all of the stock of RIA Enviva, Inc., the parent of CES, in April 2007.
