The Schedule(s) of Investments is attached herewith.

The Gabelli Utility Trust

First Quarter Report
March 31, 2010

Mario J. Gabelli, CFA

To Our Shareholders,

The Gabelli Utility Trust's (the "Fund") net asset value ("NAV") total return was 1.9% during the first quarter of 2010, compared with an increase of 5.4% for the Standard & Poor's ("S&P") 500 Index and declines of 3.5% and 1.9% for the S&P 500 Utilities Index and the Lipper Utility Fund Average, respectively. The total return for the Fund's publicly traded shares was (12.3)% during the first quarter.

Enclosed is the investment portfolio as of March 31, 2010.

(a) **Returns**

represent past performance and do not guarantee future results.

Investment returns and the principal value of an investment will fluctuate. When shares are sold, they may be worth more or less than their original cost.

Current performance may

be lower or higher than the performance data presented. Visit www.gabelli.com for performance information as of the most recent month end.

Performance returns for periods of less than one year are not annualized.

Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund before investing.

The S&P 500 Index is an unmanaged indicator of stock market

performance. The S&P 500 Utilities Index is an unmanaged indicator of electric and gas utility stock

performance. The Lipper Utility Fund Average reflects the average

*performance of open-end mutual funds classified in this **particular** category.*

Dividends are considered reinvested. You cannot invest directly in an index.

(b) *Total returns and average annual returns reflect changes in the NAV per share, reinvestment of distributions at NAV on the ex-dividend date, and adjustments for rights offerings and are net of expenses. Since inception return is based on an initial NAV of \$7.50.*

(c) *Total returns and average annual returns reflect changes in closing market values on the New York Stock Exchange, reinvestment of distributions, and adjustments for rights offerings. Since inception return is based on an initial offering price of \$7.50.*

We have separated the portfolio manager's commentary from the financial statements and investment portfolio due to corporate governance regulations stipulated by the Sarbanes-Oxley Act of 2002. We have done this to ensure that the content of the portfolio manager's commentary is unrestricted. The financial statements and investment portfolio are mailed separately from the commentary. Both the commentary and the financial statements, including the portfolio of investments, will be available on our website at www.gabelli.com.

THE GABELLI UTILITY TRUST
NOTES TO SCHEDULE OF INVESTMENTS (Unaudited)

1. Security Valuation. Portfolio securities listed or traded on a nationally recognized securities exchange or traded in the United States of America over-the-counter market for which market quotations are readily available are valued at the last quoted sale price or a market's official closing price as of the close of business on the day the securities are being valued. If there were no sales that day, the security is valued at the average of the closing bid and asked prices or, if there were no asked prices quoted on that day, then the security is valued at the closing bid price on that day. If no bid or asked prices are quoted on such day, the security is valued at the most recently available price or, if the Board of Trustees (the Board) so determines, by such other method as the Board shall determine in good faith to reflect its fair market value. Portfolio securities traded on more than one national securities exchange or market are valued according to the broadest and most representative market, as determined by Gabelli Funds, LLC (the Adviser).

Portfolio securities primarily traded on a foreign market are generally valued at the preceding closing values of such securities on the relevant market, but may be fair valued pursuant to procedures established by the Board if market conditions change significantly after the close of the foreign market but prior to the close of business on the day the securities are being valued. Debt instruments with remaining maturities of sixty days or less that are not credit impaired are valued at amortized cost, unless the Board determines such amount does not reflect the securities' fair value, in which case these securities will be fair valued as determined by the Board. Debt instruments having a maturity greater than sixty days for which market quotations are readily available are valued at the average of the latest bid and asked prices. If there were no asked prices quoted on such day, the security is valued using the closing bid price. Futures contracts are valued at the closing settlement price of the exchange or board of trade on which the applicable contract is traded.

Securities and assets for which market quotations are not readily available are fair valued as determined by the Board.

The inputs and valuation techniques used to measure fair value of the Fund's investments are summarized into three levels as described in the hierarchy below:

- Level 1 quoted prices in active markets for identical securities;
- Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.); and

2. Derivative Financial Instruments. The Fund may engage in various portfolio investment strategies by investing in a number of derivative financial instruments for the purpose of increasing the income of the Fund, hedging or

protecting its exposure to interest rate movements and movements in the securities markets, hedging against changes in the value of its portfolio securities and in the value of securities it intends to purchase, or hedging against a specific transaction with respect to either the currency in which the transaction is denominated or another currency. Investing in certain derivative financial instruments, including participation in the options, futures, or swap markets, entails certain execution, liquidity, hedging, tax, and securities, interest, credit, or currency market risks. Losses may arise if the Adviser's prediction of movements in the direction of the securities, foreign currency, and interest rate markets is inaccurate. Losses may also arise if the counterparty does not perform its duties under a contract, or that, in the event of default, the Fund may be delayed in or prevented from obtaining payments or other contractual remedies owed to it under derivative contracts. The creditworthiness of the counterparties is closely monitored in order to minimize these risks. Participation in derivative transactions involves investment risks, transaction costs, and potential losses to which the Fund would not be subject absent the use of these strategies. The consequences of these risks, transaction costs, and losses may have a negative impact on the Fund's ability to pay distributions.

Swap Agreements. The Fund may enter into equity, contract for difference, and interest rate swap or cap transactions for the purpose of increasing the income of the Fund or hedging or protecting its exposure to interest rate movements and movements in the securities market. The use of swaps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio security transactions. In an interest rate swap, the Fund would agree to pay periodically to the other party (which is known as the counterparty) a fixed rate payment in exchange for the counterparty agreeing to pay to the Fund periodically a variable rate payment that is intended to approximate the Fund's variable rate payment obligation on the Series B Auction Market Cumulative Preferred Shares (Series B Shares). In an interest rate cap, the Fund would pay a premium to the counterparty and, to the extent that a specified variable rate

THE GABELLI UTILITY TRUST**NOTES TO SCHEDULE OF INVESTMENTS (Continued) (Unaudited)**

index exceeds a predetermined fixed rate, would receive from the counterparty payments of the difference based on the notional amount of such cap. Swap and cap transactions introduce additional risk because the Fund would remain obligated to pay preferred stock dividends when due in accordance with the Statement of Preferences even if the counterparty defaulted. In a swap, a set of future cash flows is exchanged between two counterparties. One of these cash flow streams will typically be based on a reference interest rate combined with the performance of a notional value of shares of a stock. The other will be based on the performance of the shares of a stock. Depending on the general state of short-term interest rates and the returns on the Fund's portfolio securities at the time a swap transaction reaches its scheduled termination date, there is a risk that the Fund will not be able to obtain a replacement transaction or that the terms of the replacement will not be as favorable as on the expiring transaction.

The Fund has entered into an interest rate swap agreement with Citibank N.A. Under the agreement, the Fund receives a floating rate of interest and pays a respective fixed rate of interest on the nominal value of the swap. Details of the swap at March 31, 2010 are as follows:

Notional Amount	Fixed Rate	Floating Rate* (rate reset monthly)	Termination Date	Net Unrealized Depreciation
\$25,000,000	4.00000%	0.22875%	6/02/10	\$(236,664)

* Based on LIBOR (London Interbank Offered Rate).

Current notional amounts are an indicator of the average volume of the Fund's derivative activities during the period.

The Fund has entered into an equity contract for difference swap agreement with The Goldman Sachs Group, Inc. Details of the swap at March 31, 2010 are as follows:

Notional Amount	Equity Security Received	Interest Rate/ Equity Security Paid	Termination Date	Net Unrealized Appreciation
\$213,625 (25,000 Shares)	Market Value Appreciation on: Rolls-Royce Group plc	One month LIBOR plus 90 bps plus Market Value Depreciation on: Rolls-Royce Group plc	6/25/10	\$12,197

The Fund's volume of activity in equity contract for difference swap agreements during the quarter ended March 31, 2010 had an average monthly notional amount of approximately \$204,343.

Futures Contracts. The Fund may engage in futures contracts for the purpose of hedging against changes in the value of its portfolio securities and in the value of securities it intends to purchase. Upon entering into a futures contract, the Fund is required to deposit with the broker an amount of cash or cash equivalents equal to a certain percentage of the contract amount. This is known as the initial margin. Subsequent payments (variation margin) are made or received by the Fund each day, depending on the daily fluctuations in the value of the contract, and are included in unrealized appreciation/depreciation on investments and futures contracts. The Fund recognizes a realized gain or loss when the contract is closed.

There are several risks in connection with the use of futures contracts as a hedging instrument. The change in value of futures contracts primarily corresponds with the value of their underlying instruments, which may not correlate with the change in value of the hedged investments. In addition, there is the risk that the Fund may not be able to enter into a closing transaction because of an illiquid secondary market. During the quarter ended March 31, 2010, the Fund

had no investments in futures contracts.

NOTES TO SCHEDULE OF INVESTMENTS (Continued) (Unaudited)

Forward Foreign Exchange Contracts. The Fund may engage in forward foreign exchange contracts for the purpose of hedging a specific transaction with respect to either the currency in which the transaction is denominated or another currency as deemed appropriate by the Adviser. Forward foreign exchange contracts are valued at the forward rate and are marked-to-market daily. The change in market value is included in unrealized appreciation/depreciation on investments and foreign currency translations. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

The use of forward foreign exchange contracts does not eliminate fluctuations in the underlying prices of the Fund's portfolio securities, but it does establish a rate of exchange that can be achieved in the future. Although forward foreign exchange contracts limit the risk of loss due to a decline in the value of the hedged currency, they also limit any potential gain that might result should the value of the currency increase. In addition, the Fund could be exposed to risks if the counterparties to the contracts are unable to meet the terms of their contracts. During the quarter ended March 31, 2010, the Fund had no investments in forward foreign exchange contracts.

The following table summarizes the net unrealized appreciation/depreciation of derivatives held at March 31, 2010 by primary risk exposure:

	Net Unrealized Appreciation/ (Depreciation)
Asset Derivatives:	
Equity Contract	\$ 12,197
Liability Derivatives:	
Interest Rate Contract	\$(236,664)

3. Tax Information. At December 31, 2009, the Fund had net capital loss carryforwards for federal income tax purposes of \$890,826 which are available to reduce future required distributions of net capital gains to shareholders through 2017.
