(State or other jurisdiction of
incorporation or organization)

91-1273737
(I.R.S. Employer
Identification No.)

**401 Congress Ave. Suite 1650
Austin, Texas 78701**
(Address of principal executive offices) (Zip code)

(512) 485-9530
(Registrant's telephone number, including area code)

Securities Registered pursuant to Section 12(b) of the Act:

<i>Title of each class</i> Common Stock (no par value)	<i>Name of each exchange on which registered</i> NASDAQ Capital Market
---	--

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
YES NO

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. YES NO

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§229.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). YES NO

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a small reporting company. See definition of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
YES NO

The aggregate market value of the registrants voting and non-voting common equity held by non-affiliates of the registrant, based upon the closing price of such stock on the NASDAQ Capital Market on such date of \$1.92 was approximately \$31,807,035 as of December 31, 2009.

As of August 25, 2010, 19,238,988 shares of the registrant's Common Stock, no par value, were outstanding, including 1,540,203 shares of restricted stock with voting rights.

FORWARD-LOOKING STATEMENTS

This Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements other than statements of historical fact are forward-looking statements for purposes of federal and state securities laws. Forward-looking statements may include the words may, will, plans, believes, estimates, expects, intends and other similar expressions. Such statements are subject to risks and uncertainties that could cause our actual results to differ materially from those projected in the statements. Such risks and uncertainties include, but are not limited to:

The effect of economic conditions in the United States or other space faring nations that could impact our ability to access space and support or gain customers;

Our ability to raise sufficient capital to meet our long and short-term liquidity requirements;

Our ability to successfully pursue our business plan;

Whether we will fully realize the economic benefits under our NASA and other customer contracts;

Continued availability and use of the U.S. Space Shuttle and the International Space Station;

Technological difficulties and potential legal claims arising from any technological difficulties;

Product demand and market acceptance risks, including our ability to develop and sell products and services to be used by the manned and unmanned space programs that replace the Space Shuttle Program;

Uncertainty in government funding and support for key space programs;

The impact of competition on our ability to win new contracts;

Uncertainty in securing reliable and consistent access to space;

Delays in the timing of performance of other contracts; and

Risks described in the Risk Factors section of this Form 10-K.

Although we believe that the assumptions underlying our forward-looking statements are reasonable, any of the assumptions could be inaccurate, therefore we cannot assure you that the forward-looking statements included in this Form 10-K will prove to be accurate. In light of the significant uncertainties inherent in our forward-looking statements, the inclusion of such information should not be regarded as a representation by us or any other person that our objectives and plans will be achieved. Some of these and other risks and uncertainties that could cause actual results to differ materially from such forward-looking statements are more fully described in Item 1A Risk Factors of this Form 10-K and elsewhere in this Form 10-K, or in the documents incorporated by reference herein. Except as may be required by applicable law, we undertake no obligation to publicly update or advise of any change in any forward-looking statement, whether as a result of new information, future events or otherwise. In making these statements, we disclaim any obligation to address or update each factor in future filings with the Securities and Exchange Commission (SEC) or communications regarding our business or results, and we do not undertake to address how any of these factors may have caused changes to discussions or information contained in previous filings or communications. In addition, any of the matters discussed above may have affected our past results and may affect future results, so that our actual results may differ materially from those expressed in this Form 10-K and in prior or subsequent communications.

Table of Contents

PART I

Item 1. Business.

Our Company

Astrotech Corporation (Nasdaq: ASTC) (Astrotech, the Company, we, us or our) is a commercial aerospace company that provides spacecraft payload processing and related services, designs and manufactures space hardware, and commercializes space technologies for use on Earth. The Company serves the U.S. Government and commercial satellite and spacecraft customers with our pre-launch services from our Astrotech Space Operations (ASO) subsidiary and incubates space technology businesses now focusing on two companies: 1st Detect Corporation (1st Detect), which is developing a Miniature Chemical Detector first developed for the International Space Station; and Astrogenetix, Inc. (Astrogenetix), which is utilizing the unique microgravity environment of space to develop novel therapeutic products.

Astrotech was formed in 1984 to leverage the environment of space for commercial purposes. For the last 26 years, the Company has remained a crucial player in space commerce activities. We have supported the launch of 23 shuttle missions and more than 280 spacecraft, built space hardware and processing facilities, and prepared and processed scientific research for microgravity.

We offer products and services in the following areas:

Facilities and support services necessary for the preparation of satellites and payloads for launch.

Commercialization of space-based technologies into real-world applications.

Expertise in qualifying hardware for spaceflight and the habitability and occupational challenges of space.

The Company has experience supporting both manned and unmanned missions to space with product and service support including space hardware design and manufacturing, research and logistics expertise, engineering and support services, and payload processing and integration. Through new Spacetech business initiatives such as 1st Detect and Astrogenetix, Astrotech is paving the way in the commercialization of space by translating space-based technology into terrestrial applications.

Our Business Units

Astrotech Space Operations (ASO)

ASO is the leading commercial supplier of satellite launch processing services in the United States. ASO provides processing support for government and commercial customers for their complex communication, earth observation and deep space satellites. ASO's spacecraft processing facilities are among the elite in the industry, with over 150,000 square feet of clean rooms that can support the largest five-meter class satellites, encompassing the majority of U.S. based satellite preparation services. ASO has provided launch processing support for government and commercial customers for more than a quarter century, successfully processing more than 280 spacecraft.

Table of Contents

ASO accounted for 100% of our consolidated revenues for the year ended June 30, 2010 (See Item 7: Management's Discussion and Analysis of Financial Condition and Results of Operations.) Revenue for our ASO business unit is primarily generated from various fixed-priced contracts with launch service providers in both the commercial and government markets. The services and facilities we provide to our customers support the final assembly, checkout, and countdown functions associated with preparing a spacecraft for launch. The revenue and cash flows generated from our ASO operations are related to the number of spacecraft launches, which reflects the growth in the satellite-based communications industries and the requirement to replace aging satellites. Other factors that have impacted, and are expected to continue to impact earnings and cash flows for this business include:

Our ability to control our capital expenditures, which are primarily limited to modifications to accommodate payload processing for new launch vehicles, upgrading communications infrastructure and other building improvements.

The continuing limited availability of competing facilities at the major domestic launch sites that can offer comparable services, leading to an increase in government use of our services.

Our ability to complete customer specified facility modifications within budgeted costs and time commitments.

Our ability to control and reduce costs in order to maximize profitability of our fixed-priced contracts.

Spacetech

Our Spacetech business unit is an incubator intended to develop space-industry technologies into commercial applications to be sold to consumers and industry. Spacetech has developed three business initiatives to date: 1st Detect Corporation, Astrogenetix and AirWard Corporation (AirWard). 1st Detect's business began under a Space Act Agreement with the National Aeronautics and Space Administration (NASA) for a chemical detection unit to be used on the International Space Station. 1st Detect engineers have developed a Miniature Chemical Detector, based on mass spectrometry, that we believe will fill a niche by being highly accurate, lightweight, battery-powered, durable and inexpensive. Astrogenetix is a biotechnology company created to use the unique environment of space to discover and develop novel therapeutic products. A natural extension of the many years of experience preparing, launching, and operating over 1,500 scientific payloads in space, Astrogenetix is in the process of developing products from microgravity discoveries. AirWard designed and manufactured shipping containers to transport oxygen bottles and oxygen generators for commercial aircraft. Further investment in AirWard was suspended in February 2010, as the initiative has not yielded the anticipated return for shareholders.

Noncontrolling Interest

In January 2010, restricted shares of Astrotech subsidiaries 1st Detect and Astrogenetix were granted to certain employees, directors and officers, resulting in Astrotech owning less than 100% of these subsidiaries. The Company applied non-controlling interest accounting for the period ended June 30, 2010, which requires us to clearly identify the non-controlling interest in the consolidated balance sheets and consolidated income statements. We disclose three measures of net income: net income, net income attributable to noncontrolling interest, and net income attributable to Astrotech Corporation. Our operating cash flows in our consolidated statements of cash flows reflect net income, while our basic and diluted earnings per share calculations reflect net income attributable to Astrotech Corporation.

Beginning balance at July 1, 2009	\$	
Net loss attributable to noncontrolling interest		(588)
Issuance of restricted stock and warrants		1,826
State of Texas Funding		900
Stock based compensation		116
Ending balance at June 30, 2010	\$	2,254

As of June 30, 2010, the Company's share of income and losses is 86% for 1st Detect and 79% for Astrogenetix.

Business Strategy

Astrotech Space Operations

As the leading commercial satellite processing provider, ASO is continuously working to secure additional government and commercial customers that require our services.

Spacetech

1st Detect has developed a revolutionary chemical detector based on ion trap mass spectrometry, which allows for the device's portability, versatility, sensitivity, durability, high speed and low cost. Potential markets that 1st Detect may serve include Security and Defense, Industrial, Medical and Healthcare, Critical Infrastructure, and First Responders.

Table of Contents

Astrogenetix is currently focused on submitting an Initial New Drug application with the Food and Drug Administration (FDA) for a Salmonella vaccine as part of the ongoing commercialization strategy. Concurrently, we are using the final two scheduled Space Shuttle flights to complete the on-orbit processing of our next vaccine biomarker discovery, methicilin-resistant Staphylococcus aureus (MRSA).

Products and Services

Astrotech Space Operations

From our state of the art facilities in Titusville, Florida and Vandenberg Air Force Base (VAFB) in California we have provided support for pre-launch ground based operations for 26 years for both commercial and government satellites, and we are the leader in this service sector.

Spacetechn

1st Detect 's Miniature Chemical Detector is a universal chemical analyzer that provides rapid analysis time and is capable of detecting residues and vapors from a wide range of chemicals including explosives, chemical warfare agents, toxic chemicals, and volatile organic compounds. 1st Detect 's proprietary technology, leveraging advances in low power electronics and miniaturization technologies developed for the space program, allows for the device 's portability, versatility, sensitivity, durability, efficiency and low cost.

Astrogenetix has discovered a Salmonella vaccine candidate, which validates the use of microgravity in identifying commercially viable biomarkers. Astrogenetix 's capabilities include preparing microgravity payloads that can be flown on a variety of launch systems, including the Space Shuttle, the Russian Soyuz, Progress and Photon, the European Automated Transfer Vehicle, the Japanese H-II Transfer Vehicle, and the SpaceX Dragon (still under development). The Astrogenetix Microgravity Processing Platform has been developed to grow microbes in space that can result in significant advantages over traditional earthbound vaccine discovery processes, thus reducing the development time and cost significantly.

Customers, Sales and Marketing

Astrotech Space Operations

ASO services a variety of domestic and international government and commercial customers sending satellites to low-earth-orbit or geosynchronous orbit. ASO has long-term contracts in place with NASA, other U.S. Governmental agencies, United Launch Alliance, and Sea Launch, LLC. During fiscal year 2010, ASO accounted for 100% of our consolidated revenues.

Spacetechn

The broadband nature of the 1st Detect technology, as well as the high performance provided by the ion trap architecture, opens up 1st Detect to a variety of applications. Potential markets that 1st Detect may serve include Security and Defense, Industrial, Medical and Healthcare, Critical Infrastructure, and First Responders.

While there have been no sales to date, likely customers for Astrogenetix will be large international pharmaceutical companies and smaller biotechnology companies. Astrogenetix is currently focused on starting the FDA process with the Salmonella vaccine candidate and is continuing drug development work for other vaccine targets, including MRSA.

Most recently, Astrogenetix testing samples were included in the latest shuttle Discovery launch, STS-132. The 1st Detect Miniature Chemical Detector debuted at the American Society of Mass Spectrometry Conference in June 2008, during which several companies demonstrated significant interest in the product. Currently, several operational units have been manufactured including a boxed unit and a bench-top development unit. In tandem, we are working on the development of an additional technical capability, which will increase accuracy, increase auto-tuning capability, and reduce size and cost.

Table of Contents

Competition

Astrotech Space Operations

The majority of the Company's revenue is derived from ASO, which processes satellites for U.S. launch locations. The only significant competition to ASO's facilities is from commercial competitor Spaceport Systems International (SSI) and certain U.S. Government facilities. However, we believe that the majority of domestic satellites, including many government satellites, are processed at ASO due to the state-of-the-art, professionally operated, full-service environment.

Commercial

SSI operates and manages a commercial spaceport at VAFB and is a provider of payload processing and launch services for both commercial and government users. The SSI facility throughput capability is significantly less than that of ASO in VAFB and it is heavily influenced by government customers. The ASO VAFB contract award for the five-meter high bay construction significantly improves ASO's competitive advantage at VAFB. SSI does not provide payload processing services in support of the Cape Canaveral Air Force Station (CCAFS) / Kennedy Space Center (KSC) launch site, and therefore, does not compete with ASO in Florida.

Governmental

NASA and the United States Air Force own and operate payload processing facilities at both the CCAFS /KSC and VAFB launch sites. These facilities, however, are used to process select government spacecraft only. They are not used to process commercial spacecraft. Therefore, ASO's competition from the U.S. Government is limited in scope.

Spacetech

There are many incumbent vendors that will compete with 1st Detect's Miniature Chemical Detector. However, we believe the 1st Detect product offers a combination of attributes that are currently unavailable in the marketplace in a single product.

There are many earthbound developers of vaccines, including most large pharmaceutical companies and many smaller biotechnology firms. However, there are no known competitors to Astrogenetix developing vaccines in microgravity. With the construction of the ISS nearing completion, and with the recent delivery of both the European Space Agency and the Japanese Space Agency nodes on the ISS, competition from foreign governments, academia and commercial companies is anticipated.

Research and Development

We incurred \$2.8 million and \$2.3 million in research and development expense during fiscal years 2010 and 2009, respectively. Research and development in fiscal year 2010 has been primarily directed towards development of 1st Detect's Miniature Chemical Detector and Astrogenetix's Microgravity Processing Platform. Astrogenetix continues to work on processing its FDA application for its Salmonella vaccine candidate while also researching other potential vaccines, including MRSA.

Table of Contents**Backlog**

The Company's 18-month rolling backlog at June 30, 2010, which includes contractual backlog and scheduled but uncommitted missions, is \$24.9 million. The majority of the backlog is for ASO pre-launch satellite processing services, which include hardware launch preparation, advance planning, use of unique satellite preparation facilities and spacecraft checkout, encapsulation, fueling, and transport.

(In thousands)	18-Month Rolling Backlog
Contract	
ASO Missions	\$ 20,659
Facility Programs	4,203
Total Backlog	\$ 24,862

The 18-month rolling backlog consists of fixed-price satellite missions from various government and commercial entities requiring pre-launch processing services at our Titusville, Florida and VAFB locations.

Certain Regulatory Matters

We are subject to federal, state, and local laws and regulations designed to protect the environment and to regulate the discharge of materials into the environment in order to protect our domestic technology from unintended foreign exploitation and to regulate certain business practices. We believe that our policies, practices and procedures are properly designed to prevent unreasonable risk of environmental damage and consequential financial liability to us. Compliance with environmental laws and regulations and technology export requirements has not had in the past, and, we believe, will not have in the future, material effects on our capital expenditures, earnings, or competitive position. Our operations are also subject to various regulations under federal laws relative to the international transfer of technology, as well as to various federal and state laws relative to business operations. In addition, we are subject to federal contracting procedures, audit, and oversight.

Significant federal regulations impacting our operations include the following:

Federal Regulation of International Business. We are subject to various federal regulations as it relates to the export of certain goods, services, and technology. These regulations, which include the Export Administration Act of 1979 administered by the Commerce Department and the Arms Export Control Act administered by the State Department, impose substantial restrictions on the sharing or transfer of technology to foreign entities. Our activities in the development of space technology and in the processing of commercial satellites deal with the type of technology subject to these regulations. Our operations are conducted pursuant to a comprehensive export compliance policy that provides close review and documentation of activities subject to these laws and regulations.

Foreign Corrupt Practices Act. The Foreign Corrupt Practices Act establishes rules for U.S. companies doing business internationally. Compliance with these rules is achieved through established and enforced corporate policies, documented internal procedures, and financial controls.

Iran Nonproliferation Act of 2000. This act includes specific prohibitions on commercial activities with certain specified Russian entities engaged in providing goods or services to the International Space Station. Our activities with Rocket Space Corporation, Energia of Russia, are not subject to this act.

Federal Acquisition Regulations. Goods and services provided by us to NASA and other U.S. Government agencies are subject to Federal Acquisition Regulations. These regulations provide rules and procedures for invoicing, documenting, and conducting business under contract with such entities. The Federal Acquisition Regulations also subject us to audit by federal auditors to confirm such compliance.

Truth in Negotiations Act. The Truth in Negotiations Act was enacted for the purpose of providing full and fair disclosure by contractors in the conduct of negotiations with the U.S. Government. The most significant provision included in the Truth in Negotiations Act is the requirement that contractors submit certified cost and pricing data for negotiated procurements above a defined threshold.

Defense Security Service. Occasionally, we are requested to process government spacecraft payloads that must be handled under federal security clearances. To accommodate these requirements, we maintain facility security clearances within certain subsidiaries of the Company and have persons engaged by the Company with necessary active security clearances to support these requirements. Maintenance of an active facility clearance requires dedicated trained personnel, specified facility standards and recordkeeping.

Table of Contents

Regulatory Compliance and Risk Management

We maintain compliance with regulatory requirements and manage our risks through a program of compliance, awareness, and insurance, which includes the following:

Safety. We place a continual emphasis on safety throughout our organization. At the corporate level, safety programs and training are monitored by a corporate safety manager.

Export Control Compliance. We have a designated senior officer responsible for export control issues and the procedures detailed in our export control policy. This officer and the designated export compliance administrator monitor training and compliance with regulations relative to foreign business activities. Employees are provided comprehensive training in compliance with regulations relative to export and foreign activities through our interactive training program and are certified as proficient in such regulations as are relative to their job responsibilities.

Insurance. Our operations are subject to the hazards associated with operating assets in the severe environment of space. These hazards include the risk of loss or damage to the assets during storage, preparation for launch, in transit to the launch site, and during the space mission itself. We maintain insurance coverage against these hazards with reputable insurance underwriters.

Employees Update

As of June 30, 2010, we employed 71 regular full-time employees, none of which were covered by any collective bargaining agreements.

In June 2010, General (Ret.) Lance W. Lord resigned from the Board of Directors of Astrotech and as the Chief Executive Officer of Astrotech Space Operations. The vacancy on the Board of Directors created by General Lord's resignation is not expected to be filled until the next annual meeting. The position of Chief Executive Officer, Astrotech Space Operations, will remain open pending a review of internal and external candidates.

In July 2010, the Company simultaneously announced the termination of James Royston, President of Astrotech Corporation, and a realignment of its corporate structure in order to optimize operational efficiencies. The Company's action follows an evaluation of each business and a review of strategic alternatives. The corporate realignment will allow Astrotech to put a greater focus on the pre-launch satellite service offering of its ASO business unit. The Company has no immediate plans to fill the vacancy created by Mr. Royston's termination.

In July 2009, the Board of Directors appointed John Porter as Astrotech's Chief Financial Officer. Mr. Porter, a Senior Vice President of the Company, had been serving as interim CFO since the resignation of Brian K. Harrington on June 4, 2009.

Item 1A. Risk Factors.

Given the inherent uncertainty and complexity of the businesses that we engage in, our results from operations and financial condition could be materially adversely impacted as set forth below. Additional risks and uncertainties not presently known to us, or that we currently deem immaterial, may also impact our business operations.

Our success depends significantly on the establishment and maintenance of successful relationships with our customers.

We have relied on governmental customers for a substantial portion of our revenue. Approximately 49% of our revenue in fiscal year 2010 was generated by various NASA and U.S. Government contracts or subcontracts. The loss of these customers could have a material adverse effect on our business, financial condition and results of operations. We cannot make any assurances that any customer will require our services in the future. Therefore, we continue to work on diversifying our customer base to include other government agencies and commercial industries, while going to great lengths to satisfy the needs of our current customer base.

Table of Contents

Termination of our future orders could negatively impact our revenues.

The Company's rolling backlog at June 30, 2010, which includes contractual backlog and scheduled but uncommitted missions, is \$24.9 million. The majority is for ASO pre-launch satellite processing services, which include hardware launch preparation; advance planning; use of unique satellite preparation facilities; and spacecraft checkout, encapsulation, fueling and transport. Since some of our government contracts are contingent upon congressional appropriations and can be terminated for convenience, we cannot assure that our backlog will ultimately result in revenues.

A branch of the U.S. Government or a commercial competitor could construct spacecraft ground processing facilities, which could significantly reduce the number of missions using Astrotech facilities.

Astrotech provides services for domestic launch sites. In the event that the U.S. Government constructs spacecraft ground processing facilities for the launch sites currently serviced by Astrotech, there could be a reduced need for the use of Astrotech facilities. This would result in direct competition for our existing customers in connection with servicing domestic launch sites, which could significantly reduce our revenues. There can be no assurance that we will be able to compete successfully against any new competitor in this area or that these competitive pressures we may face will not result in reduced revenues and market share.

Compliance with environmental and other government regulations could be costly and could negatively affect our financial condition.

Our business, particularly our ASO business unit, is subject to numerous laws and regulations governing the operation and maintenance of our facilities and the release or discharge of hazardous or toxic substances, including spacecraft fuels and oxidizers, into the environment. Under these laws and regulations, we could be liable for personal injury and cleaning costs and other environmental and property damages, as well as administrative, civil, and criminal penalties. In the event of a violation of these laws, or a release of hazardous substances at or from our facilities, our business, financial condition, and results of operations could be materially adversely affected.

As a U.S. Government contractor, we are subject to a number of rules and regulations, the violation of which could result in us being barred from future U.S. Government contracts.

We must comply with, and are affected by, laws and regulations relating to the award, administration, and performance of U.S. Government contracts. These laws and regulations, among other things:

Require certification and disclosure of all cost or pricing data in connection with certain contract negotiations.

Impose acquisition regulations that define allowable and unallowable costs and otherwise govern our right to reimbursement under certain cost-based U.S. Government contracts.

Restrict the use and dissemination of information classified for national security purposes and the exportation of certain products and technical data.

A violation of specific laws and regulations could result in the imposition of fines and penalties, the termination of our contracts, or disbarment from bidding on U.S. Government contracts. Additionally, U.S. Government contracts generally contain provisions that allow the U.S. Government to unilaterally suspend us from receiving new contracts pending resolution of alleged violations of certain federal laws or regulations, reduce the value of existing contracts, issue modifications to a contract, and control and potentially prohibit the export of our services and associated materials. Prohibition against bidding on future U.S. Government contracts would have a material adverse effect on our financial condition and results of operations.

Table of Contents

Our failure to comply with U.S. export control laws and regulations could adversely affect our business.

We are obligated by law and under contract to comply, and to ensure that our subcontractors comply, with all U.S. export control laws and regulations, including the International Traffic in Arms Regulations and the Export Administration Regulations. We are responsible for obtaining all necessary licenses or other approvals, if required, for exports of hardware, technical data, and software, or for the provision of technical assistance. We are also required to obtain export licenses, if required, before utilizing foreign persons in the performance of our contracts if the foreign person will have access to export-controlled technical data or software. The violation of any of the applicable export control laws and regulations, whether by us or any of our subcontractors, could subject us to administrative, civil, and criminal penalties.

Our business could be adversely affected by a negative audit by the U.S. Government.

U.S. Government agencies, including NASA, routinely audit and investigate government contractors. These agencies review a contractor's performance under its contracts, cost structure, and compliance with applicable laws, regulations, and standards. The U.S. Government may also review the adequacy of, and a contractor's compliance with, its internal control systems and policies, including the contractor's purchasing, property, estimating, compensation, and management information systems. Any costs found to be improperly allocated to a specific contract will not be reimbursed, while such costs already reimbursed must be refunded. If an audit uncovers improper or illegal activities, we may be subject to civil and criminal penalties and administrative sanctions, including termination of contracts, forfeiture of profits, suspension of payments, fines, and suspension or prohibition from doing business with the U.S. Government. In addition, we could suffer serious reputational harm that may affect our non-governmental business if allegations of impropriety were made against us.

Our Spacotech business unit is in an early development stage. It has earned no revenues and it is uncertain whether it will earn any revenues in the future or whether it will ultimately be profitable.

Our Spacotech business unit is in an early development stage with no commercial sales and a limited operating history. Its future operations are subject to all of the risks inherent in the establishment of a new business enterprise including, but not limited to, risks related to capital requirements, failure to establish business relationships and competitive disadvantages as against larger and more established companies. The Spacotech business unit will require substantial amounts of funding to develop, test, and commercialize its products. If such funding comes in the form of equity financing, such equity financing may involve substantial dilution to existing shareholders. Even with funding, our product development program may not lead to commercial products, either because our product candidates fail to be effective or are not attractive to the market or because we lack the necessary financial or other resources or relationships to pursue our programs through commercialization.

The Spacotech business unit can be expected to experience significant operating losses until it can generate sufficient revenues to cover its operating costs. The Spacotech business unit currently has no commercial products and there can be no assurance that the business will be able to develop, manufacture or market any products in the future, that future revenues will be significant, that any sales will be profitable or that the business will have sufficient funds available to complete its marketing and development programs or to market any products which it may develop.

Any products and technologies developed and manufactured by our Spacotech business unit may require regulatory approval prior to being made, marketed, sold, and used. There can be no assurance that regulatory approval of any products will be obtained.

The commercial success of the Spacotech business unit is expected to depend, in part, on obtaining patent and other intellectual property protection for the technologies contained in any products it develops. In addition, the Spacotech business unit may need to license intellectual property to commercialize future products or avoid infringement of the intellectual property rights of others. There can be no assurance that licenses will be available on acceptable terms and conditions, if at all. The Spacotech business unit may suffer if any licenses terminate, if the licensors fail to abide by the terms of the license or fail to prevent infringement by third parties, if the licensed patents or other rights are found to be invalid, or if the Spacotech business unit is unable to enter into necessary licenses on acceptable terms. If the Spacotech business unit, or any third party, from whom it licenses intellectual property, fails to obtain adequate patent or other intellectual property protection for intellectual property covering its products, or if any protection is reduced or eliminated, others could use the intellectual property covering the products, resulting in harm to the competitive

business position of the Spacotech business unit. In addition, patent and other intellectual property protection may not provide the Spacotech business unit with a competitive advantage against competitors that devise ways of making competitive products without infringing any patents that the Spacotech business unit owns or has rights to. Such competition could adversely affect the prices for any products or the market share of the Spacotech business unit and could have a material adverse effect upon its results of operations and financial condition.

Table of Contents

Our facilities located in Florida and California are susceptible to damage caused by hurricanes, earthquakes, or other natural disasters.

Our ASO spacecraft processing facilities on the east coast of Florida are susceptible to damage caused by hurricanes or other natural disasters. In addition, our launch processing facilities at VAFB and the facilities we operate at the Port of Long Beach are subject to damage caused by earthquakes. Although we insure our properties and maintain business interruption insurance, there can be no guarantee that the coverage would be sufficient. A natural disaster could result in a temporary or permanent closure of our business operations, thus impacting our future financial performance.

Due to our dependence on the timing of spacecraft launches, our results may fluctuate significantly from quarter to quarter.

The use of our ASO spacecraft processing facilities is highly dependent upon the number of satellite launches planned and executed each year. Additionally, factors beyond our direct control, such as a delay or accident at a launch vehicle support facility, could cause a material change in our financial results. As a result, significant fluctuations should be expected from quarter to quarter in our operating results.

The loss of key management and other employees could have a material adverse effect on our business.

We are dependent on the personal efforts and abilities of our senior management, and our success will also depend on our ability to attract and retain additional qualified employees. Failure to attract personnel sufficiently qualified to execute our strategy, or to retain existing key personnel, could have a material adverse effect on our business.

If we are unable to anticipate technological advances and customer requirements in the commercial and governmental markets, our business and financial condition may be adversely affected.

Our business strategy outlines the use of decades of experience to expand the services and products we offer to both government agencies and commercial industries. We believe that our growth and future financial performance depend upon our ability to anticipate technological advances and customer requirements. There can be no assurance that we will be able to achieve the necessary technological advances for us to remain competitive. In fiscal year 2010, we continued new business initiatives for advancing commerce in space. These new business initiatives will require substantial investments of capital and technical expertise. Our failure to anticipate or respond adequately to changes in technological and market requirements, or delays in additional product development or introduction, could have a material adverse effect on our business and financial performance. Additionally, the cost of capital to fund these businesses will likely require dilution of shareholders.

Our inability to generate sufficient cash flow to pay off or refinance our indebtedness with near-term maturities could have a material adverse effect on our financial condition.

We cannot assure that our business will generate cash flows from operations or that future borrowings will be available to us in an amount sufficient to pay our maturing indebtedness as it comes due. As a result, we may need to refinance all or a portion of the debt or we may need to secure new financing before maturity. We cannot be sure that we will be able to obtain financing on reasonable terms or at all, particularly given the general economic situation and lending environment we currently face.

Our earnings and margins may vary due to the nature of our fixed-priced contracts.

Our business mix includes cost-reimbursable and fixed-price contracts. Cost-reimbursable contracts generally have lower profit margins than fixed-price contracts. Our ASO business unit contracts are mainly fixed-price contracts. If we are unable to control costs we incur in performing under the contract, our financial condition and operating results could be materially adversely affected. Additionally, the costs incurred to operate our core ASO business are near-term fixed. As a result, if we are not able to schedule payload processing in order to optimize our facilities our financial results could be adversely affected.

We plan to develop new products and services. No assurances can be given that we will be able to successfully develop these products and services.

Our business strategy outlines the use of the decades of experience we have accumulated to expand the services and products we offer to both U.S. Government and commercial industries. These services and products generally involve the commercial exploitation of space, and involve new and untested technologies and business models. These technologies and business models may not be successful, which could result in the loss of any investment we make in developing them.

Table of Contents

Our financial results could be adversely affected if the estimates that we use in accounting for contracts are incorrect and need to be changed.

Contract accounting requires judgment relative to assessing risks, estimating contract revenues and costs, and making assumptions for scheduling and technical issues. We rely on the application of consistent business processes in order to minimize material error and maximize reporting transparency. The estimation of total revenues and cost at completion for many of our contracts is complicated and subject to many unknown variables.

If our performance under a cost reimbursable contract results in an award fee that is lower than we have estimated, we would be required to refund previously billed fee amounts and would have to adjust our revenue recognition accordingly. If our performance was determined to be significantly deficient, we may be required to reimburse our customers for the entire amount of previously billed awards. Changes in underlying assumptions, circumstances, or estimates may adversely affect future period financial performance.

Our spacecraft payload processing facilities are specifically designed to process satellites and other payloads and we would lose a substantial portion of their value if we no longer provide these services.

Our ASO spacecraft processing facilities were built specifically to process satellites and space related payloads. If we were required to terminate the processing businesses, the value of these facilities could be impaired and, as a result, our financial condition and results of operations would likely be negatively impacted.

Our inability to maintain required government security clearances and the impact of foreign ownership or control could result in a loss of potential future spacecraft ground processing and other opportunities.

In order to be a service and product provider for spacecraft ground processing and other related activities, we are required to maintain certain government security clearances and we must comply with laws that limit foreign ownership and control. We may be subject to regulatory action and other sanctions if we fail to comply with applicable laws and regulations relating to required security clearances and foreign ownership and control. This could harm our reputation, our prospects for future work, and our operating results.

We incur substantial upfront, non-reimbursable costs in preparing proposals to bid on contracts that we may not be awarded.

Preparing a proposal to bid on a contract is generally a three to six month process. This process is labor-intensive and results in the incurrence of substantial costs that are generally not retrievable. Additionally, although we may be awarded a contract, work performance does not commence for several months following completion of the bidding process. If funding problems by the party awarding the contract or other matters further delay our commencement of work, these delays may lower the value of the contract, or possibly render it unprofitable.

Item 1B. Unresolved Staff Comments.

Not applicable.

Item 2. Properties.

Astrotech relocated its corporate headquarters to Austin, Texas in June 2009. The leased office houses executive management, finance and accounting, and marketing and communications. We continue to maintain leased offices in Houston, Texas which are primarily focused on supporting the engineering efforts of Spacotech.

ASO's headquarters, and Florida operations team, are located in a nine-building complex located on a 62-acre space technology campus in Titusville, Florida. This campus encompasses 140,000 square feet of facility space supporting non-hazardous and hazardous flight hardware processing, payload storage, and customer offices.

In September 2009, we completed construction of a 23,000 square foot payload processing facility at VAFB in California which enhanced our capability to process five-meter class satellite payloads. Additionally, in December 2009, we completed construction of a 5,600 square foot office building used by customers for administrative and operational support of teams processing satellites in the new five-meter payload facility. ASO presently leases the 60-acre site located on VAFB in California, where we own four buildings totaling over 50,000 square feet of space. The present land lease expires in July 2013, with provisions to extend the lease at the request of the lessee and the concurrence of the lessor. Upon final expiration of the land lease, all improvements on the property revert, at the lessor's option, to the lessor at no cost.

We maintain a separate 58,000 square foot payload processing facility located in Cape Canaveral, Florida. We negotiated an agreement with the Canaveral Port Authority for the lease of the land for a forty-three year period,

expiring 2040. Upon expiration of the land lease, all improvements on the property revert at no cost to the lessor. In May 2005, we sold the facility in Cape Canaveral, Florida for \$4.8 million. We now lease back 100% of the facility through December 31, 2010, with an option period of an additional five years.

Table of Contents

We believe that our current facilities and equipment are generally well maintained and in good condition, and are adequate for our present and foreseeable needs.

Item 3. Legal Proceedings.

The Company is not a party to any significant pending or threatened proceedings, which in management's opinion, would have a material adverse effect on our business, financial condition, or results of operation.

Item 4. Submission of Matters to a Vote of Security Holders.

No matters were submitted to a vote of stockholders during the fourth quarter of the year ended June 30, 2010.

PART II**Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.***Market Information*

The following table sets forth the quarterly high and low intra-day bid prices for the periods indicated:

Fiscal 2010	High	Low
First Quarter	\$ 3.84	\$ 0.98
Second Quarter	\$ 3.66	\$ 1.36
Third Quarter	\$ 4.06	\$ 1.88
Fourth Quarter	\$ 3.58	\$ 1.24
Fiscal 2009	High	Low
First Quarter	\$ 0.60	\$ 0.26
Second Quarter	\$ 0.46	\$ 0.20
Third Quarter	\$ 0.50	\$ 0.20
Fourth Quarter	\$ 1.73	\$ 0.40

We have never paid cash dividends. It is our present policy to retain earnings to finance the growth and development of our business; therefore, we do not anticipate paying cash dividends on our Common Stock in the foreseeable future.

Table of Contents

We have 75,000,000 shares of Common Stock authorized for issuance. As of August 25, 2010 we had 19,238,988 shares of Common Stock outstanding, including 1,540,203 shares of restricted stock with voting rights. Effective May 4, 2009, the Company changed its stock trading symbol to ASTC from SPAB on the NASDAQ Capital Markets stock exchange.

Table of Contents

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion should be read in conjunction with, and is qualified in its entirety by reference to, our audited consolidated financial statements and notes included elsewhere in this report.

Overview

Astrotech was formed in 1984 to leverage the environment of space for commercial purposes. For the last 26 years, the Company has remained a crucial player in space commerce activities. We have supported the launch of 23 shuttle missions and more than 280 spacecraft, building space hardware and processing facilities, and preparing and processing scientific research for microgravity.

We offer products and services in the following areas:

Facilities and support services necessary for the preparation of satellites and payloads for launch.

Commercialization of space-based technologies into real-world applications.

Expertise in qualifying hardware for spaceflight and the habitability and occupational challenges of space.

Our Business Units

Astrotech Space Operations

ASO provides support for its government and commercial customers to successfully process complex communication, earth observation and deep space satellites in preparation for their launch on a variety of launch vehicles. Processing activities include satellite ground transportation; pre-launch hardware integration and testing; satellite encapsulation, fueling, launch pad delivery; and communication linked launch control. Our ASO facilities can accommodate five meter class satellites encompassing the majority of U.S. based satellite preparation services. In addition to satellite processing, ASO offers engineering services capabilities that encompass the entire life cycle of a satellite. ASO accounted for 100% of our consolidated revenues for the year ended June 30, 2010. Revenue for our ASO business unit is generated primarily from various fixed-priced contracts with launch service providers in both the commercial and government markets. The services and facilities we provide to our customers support the final assembly, checkout, and countdown functions associated with preparing a spacecraft for launch. The revenue and cash flows generated from our ASO operations are related to the number of spacecraft launches, which reflects the growth in the satellite-based communications industries and the requirement to replace aging satellites. Other factors that have impacted, and are expected to continue to impact earnings and cash flows for this business include:

Our ability to control our capital expenditures, which primarily are limited to modifications to accommodate payload processing for new launch vehicles, upgrading communications infrastructure and other building improvements.

The continuing limited availability of competing facilities at the major domestic launch sites that can offer comparable services, leading to an increase in government use of our services.

Our ability to complete customer specified facility modifications within budgeted costs and time commitments.

Our ability to control and reduce costs in order to maximize profitability of our fixed-priced contracts.

Spacetech

Our other business unit is an incubator intended to commercialize space-industry technologies into commercial applications to be sold to consumers and industry. The 1st Detect Miniature Chemical Detector and the Astrogenetix microgravity processing platform are initiatives developed under our Spacetech business unit. The 1st Detect Miniature Chemical Detector, which is in development, is a low power, portable chemical detection device intended to be utilized for a variety of applications. 1st Detect has been awarded a Developmental Testing and Evaluation designation from the U.S. Department of Homeland Security as a promising anti-terrorism technology, and is the recipient of a Phase I award from the U.S. Army's Chemical and Biological Defense (CBD) Small Business Innovation Research (SBIR) Program. Additionally, 1st Detect received a \$1.8 million award from the Texas Emerging

Technology Fund. Astrogenetix is performing drug discovery in microgravity and NASA has designated this work as the National Lab Pathfinder Missions. Astrogenetix has identified a vaccine candidate for Salmonella and is currently conducting microgravity research on MRSA.

Table of Contents**Critical Accounting Policies**

Revenue Recognition. Revenue is derived primarily from contracts to deliver payload processing support and facilities to the U.S. Government and to commercial customers. Revenues under these contracts are recognized using the methods described below. Given the changing launch schedules of our customers, and the changing requirements of the customers in construction contracts, estimating future costs and revenues is a process requiring a high degree of judgment by our management. (See Risk Factors Risks Related to Our Business Our financial results could be adversely affected if the estimates that we use in accounting for contracts are incorrect and need to be changed.) For our satellite payload processing, we base our estimate on historical experience and on assumptions that are believed to be reasonable under the circumstances, including the negotiation of equitable adjustments to our fixed-price contracts due to launch delays. For construction contracts, costs to complete include, when appropriate, material, labor, subcontracting costs, lease costs, commissions, insurance, and depreciation. In the event of a change in total estimated contract cost or profit, the cumulative effect of such change is recorded in the period that the change in estimate occurs.

A Summary of Revenue Recognition Methods Follows:

Services/Products Provided	Contract Type	Method of Revenue Recognition
Satellite Payload Processing Support & Facilities	Firm Fixed Price Mission Specific	Ratably, over the occupancy period of a satellite within the facility from arrival through launch
	Firm Fixed Price Guaranteed Number of Missions	For multi-year contract payments recognized ratably over the contract period
Facility Construction contracts	Firm Fixed Price	Percentage-of-completion based on costs incurred
Engineering Services	Cost Reimbursable Award/Fixed Fee	Reimbursable costs incurred plus award/fixed fee
Commercial Products	Specific Purchase Order Based	At shipment

Under certain contracts, we make expenditures for specific enhancements and/or additions to our facilities where the customer agrees to pay a fixed fee to deliver the enhancement or addition. We account for such agreements as a reduction in the cost of such investments and recognize any excess of amounts collected above the expenditure as revenue. Revenue for ASO recognized under a building modification contract with a government agency was accounted for under the percentage-of-completion method based on costs incurred over the period of the agreement.

Long-Lived Asset. In assessing the recoverability of long-lived assets, fixed assets, assets under construction and intangible assets, we evaluate the recoverability of those assets. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the asset exceeds the fair value of the asset. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell.

Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that directly affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expenses during the reporting periods. Actual results could differ

from these estimates.

Deferred Revenue

Deferred revenue represents amounts collected from customers for projects, products, or services expected to be provided at a future date. Deferred revenue is shown on the balance sheet as either a short-term or long-term liability, depending on when the service or product is expected to be provided.

Share Based Compensation

The Company accounts for share-based awards to employees based on the fair value of the award on the grant date. The fair value of the stock options is estimated using expected dividend yields of the Company's stock, the expected volatility of the stock, the expected length of time the options remain outstanding and risk-free interest rates. Changes in one or more of these factors may significantly affect the estimated fair value of the stock options. Additionally, the Company estimates the number of instruments for which the required service is expected to be rendered. The Company estimates forfeitures using historical forfeiture rates for previous grants of equity instruments. The fair value of awards that are expected to vest is recorded as an expense over the vesting period.

Noncontrolling Interest

Noncontrolling interest accounting is applied for any entities where the Company maintains less than 100% ownership. The Company clearly identifies the noncontrolling interest in the balance sheets and income statements. We also disclose three measures of net income: net income, net income attributable to noncontrolling interest, and net income attributable to Astrotech Corporation. Our operating cash flows in our consolidated statements of cash flows reflect net income, while our basic and diluted earnings per share calculations reflect net income attributable to Astrotech Corporation.

Table of Contents***State of Texas Funding***

The Company accounts for the State of Texas funding in its majority owned subsidiary 1st Detect as a contribution of capital and has reflected the disbursement in the equity section of the consolidated balance sheet. While the award agreement includes both a common stock purchase right and a note payable to the State of Texas, the economic substance of the transaction is that the State of Texas has purchased shares of 1st Detect in exchange for granted award.

CONSOLIDATED RESULTS OF OPERATIONS**Results of Operations for the Years Ended June 30, 2010 and 2009**

The following table sets forth the significant components in the Consolidated Statements of Operations for the year ended June 30, 2010, compared with 2009. The financial information and the discussion below should be read in conjunction with the Consolidated Financial Statements and Notes.

(In thousands)	Year Ended June 30,		
	2010	2009	Variance
Revenue	\$ 27,979	\$ 31,985	\$ (4,006)
Gross profit	15,121	16,262	(1,141)
Gross margin	54%	51%	3%
Selling, general and administrative	12,170	9,760	2,410
Research and development	2,798	2,330	468
Total operating expenses	14,968	12,090	2,878
Income from operations	153	4,172	(4,019)
Gain on bond exchange		665	(665)
Interest and other expense, net	(459)	(622)	163
Income (loss) before income taxes	(306)	4,215	(4,521)
Income tax (expense) benefit	(22)	510	(532)
Net income (loss)	(328)	4,725	(5,053)
Less: net loss attributable to noncontrolling interest	(588)		(588)
Net income attributable to Astrotech Corporation	\$ 260	\$ 4,725	\$ (4,465)

The following table sets forth the percentage of total revenue of certain items in the Consolidated Statements of Operations for the year ended June 30, 2010, compared with 2009:

	Year Ended June 30,	
	2010	2009
Revenue	100%	100%
Cost of revenue	46%	49%
Gross profit	54%	51%
Operating expenses		
Selling, general and administrative	44%	31%
Research and development	10%	7%
Total operating expenses	54%	38%

Income (loss) from operations	1%	13%
Gain on bond exchange	%	2%
Interest and other expense, net	(2)%	(2)%
Income (loss) before income taxes	(1)%	13%
Income tax (expense) benefit	*	2%
Net income (loss)	(1)%	15%
Less: net loss attributable to noncontrolling interest	(2)%	%
Net income attributable to Astrotech Corporation	1%	15%

* Represents less than 1% of period revenue

Table of Contents

Revenue. Total revenue decreased to \$28.0 million for the year ended June 30, 2010, as compared to \$32.0 million at June 30, 2009, due to the completion of construction on the new 5-meter satellite facility and associated building improvement projects at VAFB during the first quarter of 2010, offset partially by processing RSC-Energia's MRM1 in our Cape Canaveral facility.

A breakdown of revenue for the years ended June 30, 2010 and 2009 is as follows:

(In thousands)	Year Ended June 30,	
	2010	2009
ASO	\$ 27,979	\$ 31,856
Spacetech		129
	\$ 27,979	\$ 31,985

Gross Profit. Gross profit decreased to \$15.1 million for the year ended June 30, 2010, as compared to \$16.3 million for the year ended June 30, 2009. The decrease in gross profit was attributable to the decline in revenue, partially offset by a customer contract which was processed at a higher margin.

Selling, General and Administrative Expense. Selling, general and administrative expense increased to \$12.2 million for the year ended June 30, 2010, as compared to \$9.8 million for the year ended June 30, 2009. The increase was primarily attributable to additional employee incentive compensation expense, an increase in business development personnel and an increase in outside consulting fees. As a percentage of revenue, selling, general and administrative expenses increased to 44% for the year ended June 30, 2010, on lower revenue, as compared to 31% for the year ended June 30, 2009.

Research and Development Expense. Research and development expense increased to \$2.8 million for the year ended June 30, 2010, as compared to \$2.3 million for the year ended June 30, 2009. As a percentage of revenue, research and development increased to 10% for the year ended June 30, 2010, as compared with 7% for the year ended June 30, 2009. The increase in expense was the result of our investments in the development of the 1st Detect Miniature Chemical Detector and the Astrogenetix Microgravity Processing Platform.

Gain on bond exchange. In October 2008, the Company repurchased and retired \$1.8 million principal amount of its outstanding 5.5% Senior Convertible notes, acquired at an established market price on the day of trade. The Company recognized a gain of \$0.7 million on the transaction in the year ended June 30, 2009.

Interest and Other expense, net. Interest and other expense, net, decreased to \$0.5 million for the year ended June 30, 2010, as compared to \$0.6 million for the year ended June 30, 2009. Interest expense relates to interest on the Senior Convertible Notes and the term loan, offset by interest income primarily from our money market accounts due to the larger cash balance available for investment. Also included in other expense for the years ended June 30, 2010 and 2009 is the write-off of \$0.2 million and \$0.1 million, respectively, of aerospace metals.

Table of Contents**SEGMENT RESULTS OF OPERATIONS**

Selected financial data for the years ended June 30, 2010, and 2009 of our ASO business unit is as follows:

(In thousands)	Year Ended June 30,		
	2010	2009	Variance
Revenue	\$ 27,979	\$ 31,856	\$ (3,877)
Gross profit	15,125	16,338	(1,213)
Gross margin percentage	54%	51%	3%
Selling, general and administrative	8,563	8,739	(176)
Operating expenses	8,563	8,739	(176)
Interest and other expense, net	(230)	(254)	24
Income tax expense			
Net income	6,332	7,345	(1,013)
Less: net loss attributable to noncontrolling interest			
Net income attributable to ASO	\$ 6,332	\$ 7,345	\$ (1,013)

Revenue. Total revenue decreased to \$28.0 million for the year ended June 30, 2010, as compared to \$31.9 million at June 30, 2009, due to the completion of construction on the new 5-meter satellite facility and associated building improvement projects at VAFB during the first quarter of 2010, offset partially by processing RSC-Energia's MRM1 in our Cape Canaveral facility.

Gross Profit. Gross profit decreased to \$15.1 million for the year ended June 30, 2010, as compared to \$16.3 million for the year ended June 30, 2009. The decrease in gross profit was attributable to the decline in revenue, partially offset by a customer contract which was processed at a higher margin.

Selling, General and Administrative Expense. Selling, general and administrative expense decreased to \$8.6 million for the year ended June 30, 2010, as compared to \$8.7 million for the year ended June 30, 2009. This decrease is primarily a result of lower administrative fees.

Interest and other expense, net. Interest and other expense, net, decreased to \$0.2 million in the year ended June 30, 2010, as compared to \$0.3 million in the year ended June 30, 2009. This relatively consistent expense relates to interest on the term loan, offset by interest earned primarily from our money market accounts. Also included in other expense for the year ended June 30, 2010 and 2009 is the write-off of \$0.2 million and \$0.1 million, respectively, of aerospace metals.

Selected financial data for the years ended June 30, 2010, and 2009 of our Spacetech business unit is as follows:

(In thousands)	Year Ended June 30,		
	2010	2009	Variance
Revenue	\$	\$ 129	\$ (129)
Gross loss	(4)	(76)	\$ 72
Gross margin percentage	%	(59)%	59%
Selling, general and administrative	3,607	1,021	2,586
Research and development	2,798	2,330	468
Operating expenses	6,405	3,351	3,054

Gain on notes repurchased		665	(665)
Interest and other expense, net	(229)	(368)	139
Income tax expense	(22)	510	(532)
Net loss	(6,660)	(2,620)	(4,040)
Less: net loss attributable to noncontrolling interest	(588)		(588)
Net loss attributable to Spacetech	\$ (6,072)	\$ (2,620)	\$ (3,452)

Table of Contents

Revenue. Total revenue decreased \$0.1 million for the year ended June 30, 2010, from the year ended June 30, 2009. The revenue in fiscal year 2009 was derived from AirWard, which designed and manufactured shipping containers to transport oxygen bottles and oxygen generators for commercial aircraft. In February 2010, further investment in AirWard was suspended as the initiative has not yielded the anticipated return for shareholders.

Gross loss. The gross loss decreased for AirWard in the year ended June 30, 2010, as the initiative has not yielded the anticipated return for shareholders.

Selling, General and Administrative Expense. Selling, general and administrative expense increased to \$3.6 million for the year ended June 30, 2010, as compared to \$1.0 million for the year ended June 30, 2009. The increase was primarily attributable to increased employee incentive compensation expense and an increase in outside consulting fees.

Research and Development Expense. Research and development expense increased to \$2.8 million for the year ended June 30, 2010, as compared to \$2.3 million for the year ended June 30, 2009. The increase in expense was the result of our investments in the development of the 1st Detect Miniature Chemical Detector and the Astrogenetix Microgravity Processing Platform.

Interest and other expense, net. Interest and other expense, net, decreased to \$0.2 million in the year ended June 30, 2010, as compared to \$0.4 million for the year ended June 30, 2009. Interest expense relates to interest on the Senior Convertible Notes, offset by interest earned from our money market accounts.

FINANCIAL CONDITION, CAPITAL RESOURCES, AND LIQUIDITY**Balance Sheet**

Total assets for the year ended June 30, 2010, were \$54.9 million compared to total assets of \$58.9 million as of the end of fiscal year 2009. The following table sets forth the significant components of the balance sheet as of June 30, 2010, compared with 2009 (in thousands):

	Year Ended June 30,		
	2010	2009	Variance
Assets:			
Current assets	\$ 14,964	\$ 17,600	\$ (2,636)
Property and equipment, net	39,920	40,226	(306)
Other assets, net	19	1,093	(1,074)
Total	\$ 54,903	\$ 58,919	\$ (4,016)
Liabilities and stockholders equity:			
Current debt	\$ 8,467	\$ 267	\$ 8,200
Other current liabilities	3,874	8,915	(5,041)
Long-term debt		8,435	(8,435)
Other long-term liabilities	350	754	(404)
Stockholders equity	42,212	40,548	1,664
Total	\$ 54,903	\$ 58,919	\$ (4,016)

Current assets. Current assets decreased \$2.6 million for the year ended June 30, 2010, as compared to June 30, 2009. The overall decrease relates to collection of accounts receivable, including the collection of final invoicing on the facility construction at VAFB which were outstanding at June 30, 2009, and the timing of a note receivable which is now classified as due within one year.

Table of Contents

Property and equipment, net. Depreciation and amortization expense of \$2.1 million exceeded capital expenditures of \$1.8 million.

Other assets, net. Other assets, net, decreased \$1.1 million for the year ended June 30, 2010, as compared to June 30, 2009. A note receivable of \$0.7 million is due now within the next fiscal year and classified as a current asset. The Company also had a partial write off of \$0.2 million and a recorded sale of \$0.1 million on remaining aerospace metals.

Current and long-term debt. The \$5.1 million of Senior Convertible Notes and the \$3.4 million term loan are due within the next fiscal year, and therefore, the classification has changed from long-term debt to current debt. The Company made principal payments on the term loan of \$0.3 million for the year ended June 30, 2010. Interest is paid bi-annually on the Senior Convertible Notes.

Other current liabilities. Other current liabilities decreased by \$5.0 million for the year ended June 30, 2010, as compared to June 30, 2009. The decrease in accounts payable of \$2.1 million is due to payments made to vendors related to the facility construction at VAFB, which were outstanding at June 30, 2009, as well as timing of other payments. The decrease in short term deferred revenue of \$2.7 million is a result of a timing difference between cash collections on payload processing customer contracts and amounts earned as revenue.

Other long-term liabilities. Other long-term liabilities decreased \$0.4 million for the year ended June 30, 2010, as compared to June 30, 2009. This was primarily due to a decrease in non-current deferred revenue of \$0.3 million.

Liquidity and Capital Resources

As of June 30, 2010, we had cash and cash equivalents of \$8.1 million and our working capital was approximately \$2.6 million, including \$0.5 million of cash in 1st Detect available only to fund development of the Miniature Chemical Detector (see Note 13). As of June 30, 2009 we had cash and cash equivalents of \$4.7 million and our working capital was approximately \$8.4 million. The following is a summary of the change in our cash and cash equivalents:

	June 30,	
	2010	2009
Net cash provided by operating activities	\$ 4,437	\$ 4,972
Net cash used in investing activities	(1,829)	(1,427)
Net cash used in financing activities	747	(1,455)
Net increase in cash and cash equivalents	\$ 3,355	\$ 2,090

Operating Activities

Cash provided by operations for the year ended June 30, 2010, was \$4.4 million as compared with \$5.0 million for the year ended June 30, 2009. Significant items affecting operating cash flows at June 30, 2010 were our net loss of \$0.3 million and depreciation and amortization of \$2.1 million. At June 30, 2009, operating cash flow included net income of \$4.7 million and depreciation and amortization of \$2.2 million.

Changes in assets and liabilities affecting our operating cash flows for fiscal year 2010 are as follows:

Assets. The decrease in accounts receivable of \$6.6 million is primarily attributable to the timing of payments received by the Company, including the collection of amounts due from the U.S. Government on the facility construction at VAFB which were outstanding as of June 30, 2009. The increase in cash and cash equivalents of \$3.4 million is primarily due to the collection of amounts in our accounts receivable.

Liabilities. The decrease in accounts payable of \$2.1 million is due to payments made to vendors related to the facility construction at VAFB, which were outstanding at June 30, 2009, as well as timing of other payments. The decrease in short term deferred revenue of \$2.7 million is a result of a timing difference between cash collections on payload processing customer contracts and amounts earned as revenue.

Table of Contents**Investing Activities**

Cash used in investing activities for the year ended June 30, 2010, was \$1.8 million as compared with \$1.4 million for the year ended June 30, 2009. In fiscal year 2010, capital expenditures for payload processing facilities related to ASO were \$1.8 million, which included construction of an administrative customer support building at VAFB.

Financing Activities

Cash provided by financing activities for the year ended June 30, 2010, was \$0.7 million as compared with cash used in financing activities of \$1.5 million for the year ended June 30, 2009. In fiscal year 2010, the Company received \$0.1 million in proceeds from issuance of common stock and 1st Detect received \$0.9 million from the Texas Emerging Technology Fund (See Note 13). This was offset by the \$0.3 million in principal payments the Company made on the term loan. In fiscal year 2009, the Company purchased \$1.8 million of the principal amount of its outstanding Senior Convertible Notes offset by a gain of \$0.7 million.

Debt Facilities. In February 2008, we entered into a financing facility providing a \$4.0 million term loan terminating February 2011 and a \$2.0 million revolving credit facility terminating in February 2009. The term loan requires monthly payments of principal, plus interest at the rate of prime plus 1.75% and the revolving credit facility incurs interest at the rate of prime plus 1.75%. Effective February 2010, we renewed the \$2.0 million revolving credit facility for an additional one-year period expiring February 2011. The renewal changed the interest rate to the bank's prime rate plus 0.75%. The bank financing facilities are secured by the assets of our ASO Florida facilities and other bank covenants. The balance of the \$4.0 million term loan as of June 30, 2010 was \$3.4 million. As of June 30, 2010, there was no balance outstanding on the \$2.0 million revolving credit facility.

As of June 30, 2010, Astrotech had \$5.1 million of Senior Convertible Notes outstanding which mature on October 15, 2010, and pay interest on April 15 and October 15 annually. The \$5.1 million of Senior Convertible Notes and the \$3.4 million term loan are due within the next fiscal year, and therefore, the classification has changed from long-term debt to current debt.

Contractual Obligations**Leases**

The Company is obligated under non-cancelable operating leases for equipment, office space, the land for a payload processing facility and certain flight assets. Future minimum payments under these non-cancelable operating leases are as follows (in thousands):

	Payments due by period				More than 5 years
	Total	Less than 1 year	1-3 years	3-5 years	
Contractual Obligations					
Long-Term Debt Obligations					
Capital Lease Obligations					
Operating Lease Obligations	\$ 885	\$ 616	\$ 269		
Purchase Obligations					
Other Long-Term Liabilities Reflected on the Registrant's Balance Sheet under GAAP					
Total	\$ 885	\$ 616	\$ 269		

Rent expense for the years ended June 30, 2010, and 2009 was approximately \$0.9 million and \$0.9 million, respectively. For fiscal year 2010, the Company received sublease payments of \$0.3 million.

Table of Contents

Construction Contract Contingency

In August 2007, we entered into a \$14.0 million modification to our existing VAFB construction contract. The modification required us to complete the construction on the redesigned facility by September 30, 2009. The modification contained penalties of up to \$3.0 million if we did not meet the contracted completion date. The construction was complete in September 2009 and no penalties were incurred (See Note 12).

State of Texas Funding

In March 2010, the Texas Emerging Technology Fund awarded 1st Detect \$1.8 million for the development and marketing of the Miniature Chemical Detector, a portable mass spectrometer designed to serve the security, healthcare and industrial markets (See Note 13). As of June 30, 2010, 1st Detect has received the first of two \$0.9 million disbursements. The disbursed amount of \$0.9 million represents a contingency through March 2020, the date of cancellation. If an event of default should occur, the principal and accrued interest would be reclassified from equity to notes payable in the consolidated financial statements as amounts due to the State of Texas. Management considers the likelihood of an event of default to be remote.

Off-Balance Sheet Arrangements

We did not have any off-balance sheet arrangements as of June 30, 2010.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

Our primary exposure to market risk relates to interest rates. We do not currently use any interest rate swaps or derivative financial instruments to manage our exposure to fluctuations in interest rates. A one percent change in variable interest rates will not have a material impact on our financial condition.

Item 8. Financial Statements and Supplementary Data.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Astrotech Corporation and Subsidiaries:

We have audited the accompanying consolidated balance sheets of Astrotech Corporation and its subsidiaries (the Company) as of June 30, 2010 and 2009, and the related consolidated statements of operations, stockholders' equity and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used, and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company as of June 30, 2010 and 2009, and the results of their operations and their cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(1) Description of the Company and Operating Environment

Astrotech Corporation (Nasdaq: ASTC) (Astrotech, the Company, we, us or our) is a commercial aerospace company that provides spacecraft payload processing and government services, designs and manufactures space hardware, and develops space technologies for use on Earth.

Astrotech has experience supporting both manned and unmanned missions to space with product and service support including space hardware design and manufacturing, research and logistics expertise, engineering and support services, and payload processing and integration. Through new business initiatives such as 1st Detect and Astrogenetix, Astrotech is paving the way in the commercialization of space by translating space-based technology into terrestrial applications.

Our Business Units

Astrotech Space Operations (ASO) ASO is the leading commercial supplier of satellite launch processing services in the United States. ASO provides processing support for government and commercial customers for their complex communication, earth observation and deep space satellites. ASO's spacecraft processing facilities are among the elite in the industry, with more than 150,000 square feet of clean room space that can support the largest, five-meter class satellites. ASO has provided launch processing support for government and commercial customers for nearly a quarter century, successfully processing more than 280 spacecraft.

Spacetech Our other business unit is an incubator intended to develop space-industry technologies into commercial applications to be sold to consumers and industry. Spacetech has developed three business initiatives to date: 1st Detect Corporation (1st Detect), Astrogenetix, Inc. (Astrogenetix) and AirWard Corporation (AirWard). 1st Detect's business began under a Space Act Agreement with the National Aeronautics and Space Administration (NASA) for a chemical detection unit to be used on the International Space Station. 1st Detect engineers have developed a Miniature Chemical Detector, a device based on mass spectrometry, that we believe will fill a niche by being highly accurate, lightweight, battery-powered, durable and inexpensive. Astrogenetix is a biotechnology company created to use the unique environment of space to develop novel therapeutic products. A natural extension of the many years of experience preparing, launching, and operating over 1,500 science payloads in space, Astrogenetix is in the process of developing products from microgravity discoveries. AirWard designed and manufactured shipping containers to transport oxygen bottles and oxygen generators for commercial aircraft. Further investment in Airward was suspended in February, 2010, as the initiative has not yielded the anticipated return for shareholders.

The Company's significant legal entities include Astrotech Space Operations, Inc., 1st Detect Corporation and Astrogenetix, Inc. Additional discussion on Astrotech's business can be found in Items 1-7 and Exhibit 21 of this Form 10-K.

Table of Contents**Liquidity**

As of June 30, 2010, we had cash and cash equivalents of \$8.1 million and our working capital was approximately \$2.6 million, including \$0.5 million of cash in 1st Detect available only to fund development of the Miniature Chemical Detector (see Note 13). As of June 30, 2009, we had cash and cash equivalents of \$4.7 million and our working capital was approximately \$8.4 million.

In February 2008 (see Note 5), we consummated a financing facility with a commercial bank. This facility provides for a three year \$4.0 million term loan, payable in monthly installments of principal and interest and a \$2.0 million revolving credit facility. The term loan is secured by the assets of ASO and the revolving credit facility is secured by ASO's accounts receivable. As of June 30, 2010, we have no outstanding balance under the revolving credit facility.

At June 30, 2010, Astrotech had \$5.1 million of Senior Convertible Notes outstanding which mature on October 15, 2010, and pay interest on April 15 and October 15 annually (see Note 5). The \$5.1 million of Senior Convertible Notes and the \$3.4 million term loan are due within the next fiscal year and therefore the classification has changed from long-term debt to current debt. The Company made principal payments on the term loan of \$0.3 million for the year ended June 30, 2010. Interest is paid bi-annually on the Senior Convertible Notes.

The Company's debt repayments are due as follows (in thousands):

	Balance 6/30/2010	Fiscal Year 2011	Fiscal Year 2012	Fiscal Year 2013	Fiscal Year 2014	Fiscal Year 2015
Term Note	\$ 3,356	\$ 3,356	\$	\$	\$	\$
Senior Convertible Notes Payable 5.5%	5,111	5,111				
	\$ 8,467	\$ 8,467	\$	\$	\$	\$

We believe we have sufficient liquidity and backlog to fund ongoing operations for at least the next fiscal year. We expect to utilize existing cash and proceeds from operations to grow our core business offering in ASO and to support strategies for new business initiatives.

(2) Summary of Significant Accounting Policies**Principles of Consolidation and Basis of Presentation**

The consolidated financial statements include the accounts of Astrotech Corporation and its majority-owned subsidiaries that are required to be consolidated. All significant intercompany transactions have been eliminated in consolidation.

Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that directly affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expenses during the reporting periods. Actual results could differ from these estimates.

Reclassifications

Certain amounts reported in previous periods have been reclassified to conform to the current year presentation.

Credit Risk

The Company maintains funds in bank accounts that, at times, may exceed the limit insured by the Federal Deposit Insurance Corporation, or FDIC. In October 2008, the FDIC increased its insurance to \$250,000 per depositor, and to an unlimited amount for non-interest bearing accounts. The risk of loss attributable to these uninsured balances is mitigated by depositing funds in what we believe to be high credit quality financial institutions. The Company has not experienced any losses in such accounts.

Table of Contents***Revenue Recognition***

Revenue is derived primarily from contracts to deliver payload processing support and facilities to the U.S. Government and to commercial customers. Revenues under these contracts are recognized using the methods described below. Given the changing launch schedules of our customers, and the changing requirements of the customers in construction contracts, estimating future costs and revenues is a process requiring a high degree of judgment by our management. (See Risk Factors Risks Related to Our Business Our financial results could be adversely affected if the estimates that we use in accounting for contracts are incorrect and need to be changed.) For our satellite payload processing, we base our estimate on historical experience and on assumptions that are believed to be reasonable under the circumstances, including the negotiation of equitable adjustments to our fixed-price contracts due to launch delays. For construction contracts, costs to complete include, when appropriate, material, labor, subcontracting costs, lease costs, commissions, insurance, and depreciation. In the event of a change in total estimated contract cost or profit, the cumulative effect of such change is recorded in the period that the change in estimate occurs.

A Summary of Revenue Recognition Methods Follows:

Services/Products Provided	Contract Type	Method of Revenue Recognition
Satellite Payload Processing Support & Facilities	Firm Fixed Price Mission Specific	Ratably, over the occupancy period of a satellite within the facility from arrival through launch
	Firm Fixed Price Number of Missions	For multi-year contract payments recognized ratably over the contract period
Facility Construction contracts	Firm Fixed Price	Percentage-of-completion based on costs incurred
Engineering Services	Cost Reimbursable Award/Fixed Fee	Reimbursable costs incurred plus award/fixed fee
Commercial Products	Specific Purchase Order Based	At shipment

Under certain contracts, we make expenditures for specific enhancements and/or additions to our facilities where the customer agrees to pay a fixed fee to deliver the enhancement or addition. We account for such agreements as a reduction in the cost of such investments and recognize any excess of amounts collected above the expenditure as revenue. Revenue for ASO recognized under a building modification contract with a government agency was accounted for under the percentage-of-completion method based on costs incurred over the period of the agreement.

Deferred Revenue

Deferred revenue represents amounts collected from customers for projects, products, or services expected to be provided at a future date. Deferred revenue is shown on the balance sheet as either a short-term or long-term liability, depending on when the service or product is expected to be provided.

Research and Development

Research and development costs are expensed as incurred.

Income Taxes

We recognize income taxes under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities, and their respective tax bases and operating loss and tax credit carry forward. Deferred tax assets and liabilities are measured using tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax

rates is recognized in income in the period that includes the enactment date. A valuation allowance is established when it is more likely than not that some portion or all of the deferred tax assets will not be realized.

Table of Contents

Net Income Per Share

Basic net income per share is calculated by dividing net income by the weighted average number of common shares outstanding during the period. Diluted net income per share includes all common stock options and other common stock equivalents that potentially may be issued as a result of conversion privileges, including the convertible subordinated notes payable and convertible preferred stock (see Note 10).

Cash and Cash Equivalents

The Company considers short-term investments with original maturities of three months or less to be cash equivalents. Cash equivalents are comprised primarily of operating cash accounts, money market investments and certificates of deposits.

Accounts Receivable

The carrying value of the Company's accounts receivable, net of the allowance for doubtful accounts, represents their estimated net realizable value. We estimate the allowance for doubtful accounts based on type of customer, age of outstanding receivable, historical collection trends, and existing economic conditions. If events or changes in circumstances indicate that a specific receivable balance may be unrealizable, further consideration is given to the collectability of those balances, and the allowance is adjusted accordingly. Receivable balances deemed uncollectible are written off against the allowance.

Property and Equipment

Property and equipment are stated at cost. All furniture, fixtures, and equipment are depreciated using the straight-line method over the estimated useful lives of the respective assets, which is generally five years. Our payload processing facilities are depreciated using the straight-line method over their estimated useful lives ranging from 16 to 40 years. Leasehold improvements are amortized over the shorter of the useful life of the building or the term of the lease. Repairs and maintenance are expensed when incurred.

As required by our customers, we purchase equipment or enhance our facilities to meet specific customer requirements. These enhancements or equipment purchases are compensated through our contract with the customer. The difference between the amount reimbursed and the cost of the enhancements is recognized as revenue.

Deferred Financing Costs

Deferred financing costs represent loan origination fees paid to the lender and related professional fees. These costs are amortized on a straight-line basis over the term of the respective loan agreements.

Investments in Affiliates

We use the equity method of accounting for our investments in, and earnings of, investees in which we exert significant influence. In accordance with the equity method of accounting, the carrying amount of such an investment is initially recorded at cost and is increased to reflect our share of the investor's income and is reduced to reflect the Company's share of the investor's losses.

Impairment of Long-Lived Assets

We review long-lived assets and certain identifiable intangibles for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell.

Table of Contents

Fair Value of Financial Instruments

Our financial instruments consist of cash and cash equivalents, accounts receivable, notes receivable, accounts payable, notes payable and accrued liabilities. The carrying amounts of these assets and liabilities, in the opinion of Company's management, approximate their fair value, except for the Senior Convertible Notes Payable (See Note 6).

Share Based Compensation

The Company accounts for share-based awards to employees based on the fair value of the award on the grant date. The fair value of the stock options is estimated using expected dividend yields of the Company's stock, the expected volatility of the stock, the expected length of time the options remain outstanding and risk-free interest rates. Changes in one or more of these factors may significantly affect the estimated fair value of the stock options. The Company estimates forfeitures using historical forfeiture rates for previous grants of equity instruments. The fair value of awards that are expected to vest is recorded as an expense over the vesting period.

Noncontrolling Interest

Noncontrolling interest accounting is applied for any entities where the Company maintains less than 100% ownership. The Company clearly identifies the noncontrolling interest in the balance sheets and income statements. We also disclose three measures of net income: net income, net income attributable to noncontrolling interest, and net income attributable to Astrotech Corporation. Our operating cash flows in our consolidated statements of cash flows reflect net income, while our basic and diluted earnings per share calculations reflect net income attributable to Astrotech Corporation.

State of Texas Funding

The Company accounts for the State of Texas funding in its majority owned subsidiary 1st Detect as a contribution of capital and has reflected the disbursement in the equity section of the consolidated balance sheet. While the award agreement includes both a common stock purchase right and a note payable to the State of Texas, the economic substance of the transaction is that the State of Texas has purchased shares of 1st Detect in exchange for the granted award.

The common stock purchase right gives the State of Texas the ability to purchase common stock in 1st Detect, at par value per share, at the earlier of: (1) the first Qualifying Financing Event or (2) eighteen months (See Note 13).

There are no cash payments due under the note unless there is an event of default, and the terms that allow for the note to be cancelled after the passage of a set amount of time. The purpose of the note is to provide recourse for the State of Texas if 1st Detect fails to fulfill the purpose of the grant, which is primarily to provide for economic development within the State of Texas. If an event of default should occur, the principal and accrued interest would be reclassified from equity to notes payable in the consolidated financial statements as amounts due to the State of Texas. Management considers the likelihood of an event of default to be remote.

Table of Contents**(3) Accounts Receivable**

As of June 30, 2010, and 2009, accounts receivable consisted of the following (in thousands):

	2010	2009
U.S. Government contracts:		
Billed	\$ 2,123	\$ 6,274
Unbilled	836	4,926
Total U.S. Government contracts	\$ 2,959	\$ 11,200
Commercial contracts:		
Billed	\$ 1,926	\$ 254
Unbilled	791	825
Total commercial contracts	\$ 2,717	\$ 1,079
Total accounts receivable	\$ 5,676	\$ 12,279

The Company anticipates collecting all unreserved receivables within one year. Unbilled accounts receivable represents revenue earned in excess of contracted billing milestones.

The accuracy and appropriateness of our direct and indirect costs and expenses under government contracts, and therefore, our accounts receivable recorded pursuant to such contracts, are subject to extensive regulation and audit by the U.S. Defense Contract Audit Agency (DCAA) or by other appropriate agencies of the U.S. Government. Such agencies have the right to challenge our cost estimates or allocations with respect to any government contract. Additionally, a substantial portion of the payments to the Company under government contracts are provisional payments that are subject to potential adjustment upon audit by such agencies. In the opinion of management, any adjustments likely to result from inquiries or audits of its contracts would not have a material adverse impact on our financial condition or results of operations.

(4) Property & Equipment

As of June 30, 2010, and 2009, property and equipment consisted of the following (in thousands):

	June 30,	
	2010	2009
Flight Assets	\$ 49,210	\$ 49,210
Payload Processing Facilities	44,457	42,652
Furniture, Fixtures, Equipment & Leasehold Improvements	19,611	18,810
Capital Improvements in Progress	108	885
Gross Property and Equipment	113,386	111,557
Accumulated Depreciation	(73,466)	(71,331)
Property and Equipment, net	\$ 39,920	\$ 40,226

Depreciation and amortization expense of property and equipment for the years ended June 30, 2010 and 2009 was \$2.1 million and \$2.2 million, respectively.

(5) Debt

Revolving Loan Payable

In February 2008, we entered into a financing facility with a bank providing a \$4.0 million term loan terminating February 2011 and a \$2.0 million revolving credit facility terminating in February 2009. The term loan requires monthly payments of principal, plus interest at the rate of prime plus 1.75%, and the revolving credit facility incurs interest at the rate of prime plus 1.75%. Effective February 2010, we renewed the \$2.0 million revolving credit facility for an additional one-year period which included reducing the interest rate to prime plus 0.75%. The bank financing facilities are secured by the assets of ASO and require us to comply with designated covenants. As of June 30, 2010, the balance of the \$4.0 million term loan was \$3.4 million and there was no balance outstanding on the \$2.0 million revolving credit facility. The Company made principal payments on the term loan of \$0.3 million for the year ended June 30, 2010. Interest is paid bi-annually on the Senior Convertible Notes.

Convertible Subordinated Notes Payable

As of June 30, 2010 Astrotech had \$5.1 million of 5.5% Senior Convertible Notes outstanding which mature on October 15, 2010, and pay interest on April 15 and October 15 annually. Senior Convertible Notes are convertible into 66.67 shares of Astrotech common stock per \$1,000 of par.

Table of Contents

The \$5.1 million of Senior Convertible Notes and the \$3.4 million term loan are due within the next fiscal year, and therefore, the classification has changed from long-term debt to current debt.

(6) Fair Value of Financial Instruments

In general, fair values utilizes quoted prices in active (when available) markets for identical assets or liabilities. The following table presents the carrying amounts and estimated fair values of certain of the Company's financial instruments as of June 30, 2010, and 2009 (in thousands):

	June 30, 2010		June 30, 2009	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Term loan payable	\$ 3,356	\$ 3,356	\$ 3,591	\$ 3,591
Senior Convertible Notes Payable 5.5%	\$ 5,111	\$ 4,808	\$ 5,111	\$ 2,650

The fair value of our long-term debt is estimated based on the current rates offered for similar financial instruments. The carrying amounts of cash and cash equivalents, accounts receivable, notes receivable, and accounts payable approximate their fair market value due to the relatively short duration of these instruments.

(7) Business Concentration

A substantial portion of our revenue has been generated under contracts with the U.S. Government. During the years ended June 30, 2010, and 2009, approximately 49% and 65% of our revenues were generated under U.S. Government contracts, respectively. Of the accounts receivable balance as of June 30, 2010, totaling \$5.7 million, 52% of the balance is attributed to the U.S. Government.

(8) Common Stock Incentive, Stock Purchase Plans and Other Compensation Plans

As of June 30, 2010, 379,389 shares of Common Stock were reserved for future grants of stock incentive grants under the Company's three stock incentive plans.

The 1994 Plan (1994 Plan)

Under the terms of the 1994 Plan, the number and price of the stock incentive awards granted to employees is determined by the Board of Directors and such grants vest, in most cases, incrementally over a period of four years and expire no more than ten years after the date of grant. The total number of shares that are available under this plan is 395,000. As of June 30, 2010 there are no shares available for grant. Based on the Articles of the 1994 stock incentive plan, no awards shall be granted more than ten years after the effective date of the plan unless amended.

The Directors' Stock Option Plan (Director's Plan)

Options under the Director's Plan vest after one year and expire seven years from the date of grant. The total number of options that are available under this plan is 50,000. Through June 30, 2010, there are 30,000 options available for grant.

Space Media, Inc. Stock Option Plan

During the year ended June 30, 2000, Space Media, Inc. (SMI), a majority-owned subsidiary of the Company, adopted an option plan under which 1,500,000 shares of our Common Stock have been reserved for future grants. The operations of SMI have been discontinued. No options were issued or are outstanding under this plan.

2008 Stock Incentive Plan (2008 Plan)

The 2008 Plan was created to promote growth of the Company by aligning the long-term financial success of the Company with the employees, consultants and directors. In the first and second quarters of fiscal 2010, the compensation committee of the Board of Directors granted 1,995,559 and 410,000 restricted shares, respectively, to directors, named executive officers and employees in recognition of the positive fiscal 2009 financial and operating performance. The shares were issued from the 2008 Stock Incentive Plan, vest 33.33% a year over a three year period and expire upon the employee's termination. As of June 30, 2010, 5,622,267 stock options and restricted shares were granted, 471,656 shares have been cancelled and 349,389 shares are available for future grant.

Table of Contents***1st Detect***

On January 19, 2010, an independent committee of the Board of Directors of 1st Detect, a subsidiary of the Company, approved a grant of 1,180 restricted stock shares and 1,820 stock purchase warrants to certain officers, directors and employees of 1st Detect. The awards vest 50% a year over a 2 year period. We recognized compensation expense of \$0.1 million for restricted stock outstanding in 2010. The Company utilized the Black-Scholes methodology in determining the fair market value of the warrants of \$0.3 million, of which \$1,600 was recognized in 2010.

Astrogenetix

On January 19, 2010, an independent committee of the Board of Directors of Astrogenetix, a subsidiary of the Company, approved a grant of 1,550 restricted stock shares and 2,050 stock purchase warrants to certain officers, directors and employees of Astrogenetix. The awards vest 50% a year over a 2 year period. We recognized compensation expense of \$0.1 million for restricted stock outstanding in 2010. The Company utilized the Black-Scholes methodology in determining the fair market value of the warrants of \$0.2 million, of which \$1,400 was recognized in 2010.

Stock Option Activity Summary

The Company's stock options activity for the twelve months ended June 30, 2010 was as follows:

	Shares (in thousands)	Weighted Average Exercise Price
Outstanding at June 30, 2009	1,125	\$ 2.27
Granted		
Exercised	(271)	0.43
Cancelled or expired	(109)	12.54
Outstanding at June 30, 2010	745	\$ 1.45

The aggregate intrinsic value of options exercisable at June 30, 2010 was \$0.4 million as the fair value of the Company's common stock is more than the exercise prices of these options.

Range of exercise prices	Number Outstanding	Options outstanding Weighted- Average Remaining Contractual Life (years)	Weighted- Average Exercise Price	Number Exercisable	Options exercisable Weighted- Average Exercise Price
\$0.30 0.45	705,741	4.4	0.40	520,741	0.41
\$4.40 11.50	17,600	3.4	9.07	16,400	8.89
\$14.30 26.00	14,100	2.6	21.27	14,100	21.27
\$34.38 48.75	8,200	0.3	41.57	8,200	41.57
\$0.30 48.75	745,641	4.3	\$ 1.45	559,441	\$ 1.79

Compensation costs recognized related to vested stock option awards during the year ended June 30, 2010, and 2009 was \$0.1 million and \$0.2 million, respectively. At June 30, 2010, there was \$0.1 million of total unrecognized compensation cost related to non-vested stock option awards, which is expected to be recognized over a weighted-average period of 2.24 years.

Table of Contents**Restricted Stock**

At June 30, 2010, and 2009, there was \$2.3 million and \$0.2 million of unrecognized compensation costs related to restricted stock, respectively, which is expected to be recognized over a weighted average period of 2.1 years.

The Company's restricted stock activity for the twelve months ended June 30, 2010, was as follows:

	Shares (in thousands)	Weighted Average Grant-Date Fair Value
Non-vested at June 30, 2009	243	\$ 0.52
Granted	2,406	1.27
Vested	(44)	0.50
Cancelled or expired	(269)	1.63
Non-vested at June 30, 2010	2,336	\$ 1.17

Restricted Stock 1st Detect

At June 30, 2010, there was \$0.5 million of unrecognized compensation costs related to restricted stock and warrants, which is expected to be recognized over a weighted average period of 1.6 years.

1st Detect restricted stock activity for the twelve months ended June 30, 2010, was as follows:

	Shares	Weighted Average Grant-Date Fair Value
Non-vested at June 30, 2009		\$
Granted	1,180	212.00
Vested		
Cancelled or expired		
Non-vested at June 30, 2010	1,180	\$ 212.00

Restricted Stock Astrogenetix

At June 30, 2010, there was \$0.4 million of unrecognized compensation costs related to restricted stock and warrants, which is expected to be recognized over a weighted average period of 1.6 years.

Astrogenetix restricted stock activity for the twelve months ended June 30, 2010, was as follows:

Other Stock Based Incentive Awards

	Shares	Weighted Average Grant-Date Fair Value
Non-vested at June 30, 2009		\$
Granted	1,950	167.00
Vested		
Cancelled or expired	(400)	167.00

Non-vested at June 30, 2010	1,550	\$	167.00
-----------------------------	-------	----	--------

Table of Contents

2007 performance shares We issued 239,900 performance shares in December 2007 out of the 1994 Plan, which vest in February 2011, subject to certain events or upon designation by the Compensation Committee. Termination of employment for any cause is an event of forfeiture. We valued the 2007 performance shares granted at the close of business on the date of grant, and recognize expense and accrue an incentive compensation liability, pro rata over the vesting period. Subsequent to issuance 179,000 shares were forfeited. An expense was incurred in the amount of \$0.02 million for the year ended June 30, 2010.

Fair Value of Stock Based Compensation

The Company calculated the fair value of each option grant on the date of grant using the Black-Scholes option pricing model with the following weighted-average assumptions:

	Astrotech		Spacotech	
	Year ended June 30,		Year ended June 30,	
	2010	2009	2010	2009
Expected Dividend Yield	%	0%	0%	%
Expected Volatility		1.15	1.43	
Risk-Free Interest Rates	%	2.7%	0.9%	%
Expected Option Life (in years)		3.55	2.00	

Due to differences in option terms and historical exercise patterns among the plans, we have segregated option awards into two homogenous groups for the purpose of determining fair values for its options. Valuation assumptions are determined separately for the two groups, which represent, respectively, the 1994 Stock Incentive Plan and the Director's Stock Option Plan. No options have been issued during the year ended June 30, 2010, under the 2008 Stock Incentive Plan. The assumptions are as follows:

We estimated volatility using our historical share price performance over the last ten years. Management believes the historical estimated volatility is materially indicative of expectations about expected future volatility.

We use the simplified method to estimate expected lives for options granted.

The risk-free interest rate is based on the U.S. Treasury yield in effect at the time of grant for the expected term of the option.

The expected dividend yield is based on our current dividend yield and the best estimate of projected dividend yield for future periods within the expected life of the option.

Cash Based Long Term Incentive Awards

The Compensation Committee of the Board of Directors adopted and implemented a Long-Term Cash Incentive Plan during the second quarter of fiscal year 2008. The Long-Term Cash Incentive Plan pays cash awards to employees upon the successful completion of certain events and passage of time as established by the Compensation Committee. In the year ended June 30, 2008, the Compensation Committee awarded Long-Term Cash Incentive Units valued at \$0.3 million to employees. These units vest 50% in August 2010 and 50% in February 2011 and are subject to material risk of forfeiture. For fiscal year 2010, expense recognized for this plan totaled \$0.01 million, cash paid to terminated employees was \$0.02 million, and the deferred liability was \$0.1 million.

Table of Contents**Securities Repurchase Program**

In March 2009, the Company repurchased 300,000 shares of Common Stock at a price of \$0.40 per share, pursuant to the securities repurchase program. As of June 30, 2009, we had repurchased 311,660 share of Common Stock at a cost of \$0.2 million, which represents an average cost of \$0.76 per share, and \$1.1 million of Senior Convertible Notes Payable (See Note 5). As a result, the Company is authorized to repurchase an additional \$5.7 million of securities under this program.

Common Stock or Senior Convertible Notes Payable repurchases under the Company's securities repurchase program may be made from time-to-time, in the open market, through block trades or otherwise in accordance with applicable regulations of the Securities and Exchange Commission. Depending on market conditions and other factors, these purchases may be commenced or suspended at any time or from time-to-time without prior notice. Additionally, the timing of such transactions will depend on other corporate strategies and will be at the discretion of the management of the Company.

(9) Income Taxes

The components of income tax expense (benefit) from continuing operations are as follows (in thousands):

	Year Ended June 30,	
	2010	2009
Current		
Federal	\$	\$ (202)
State and local	22	(308)
Foreign		
	\$ 22	\$ (510)
Deferred		
Federal		
State and local		
Foreign		
	\$ 22	\$ (510)

Table of Contents

A reconciliation of the reported income tax expense to the amount that would result by applying the U.S. Federal statutory rate to the income (loss) before income taxes to the actual amount of income tax expense (benefit) recognized follows (in thousands):

	Year Ended June 30,	
	2010	2009
Expected expense (benefit)	\$ (104)	\$ 1,433
Alternative minimum tax and state tax expense	22	123
Debt exchange		(210)
Adjustment from prior year tax filings		(633)
Change in valuation allowance	(186)	(1,482)
Stock compensation	207	126
Other permanent items	83	133
Total	\$ 22	\$ (510)

The Company's deferred tax assets as of June 30, 2010 and 2009 consist of the following (in thousands):

Deferred tax assets:		
Net operating loss carryforwards	\$ 12,410	\$ 12,500
Alternative minimum tax credit carryforwards	689	687
Accrued expenses and other timing	85	113
Total gross deferred tax assets	\$ 13,184	\$ 13,300
Less valuation allowance	(12,789)	(12,975)
Net deferred tax assets	\$ 395	\$ 325
Deferred tax liabilities:		
Property and equipment, principally due to differences in depreciation	(395)	(325)
Total gross deferred tax liabilities	\$ (395)	\$ (325)
Net deferred tax assets (liabilities)	\$	\$

The valuation allowance decreased by approximately \$0.2 million for the year ended June 30, 2010. The valuation allowance decreased by approximately \$1.5 million for the year ended June 30, 2009.

At June 30, 2010, the Company had accumulated net operating loss carryforwards of approximately \$36.5 million for Federal income tax purposes (\$12.4 million, tax effected) that are available to offset future regular taxable income. These net operating loss carryforwards expire between the years 2021 and 2026. Utilization of these net operating losses is limited due to the changes in stock ownership of the Company associated with the October 2007 Exchange Offer; as such, the benefit from these losses may not be realized.

The Company has \$0.7 million of alternative minimum tax credit carryforwards available to offset future regular tax liabilities.

In assessing the need for a valuation allowance, management considers whether it is more likely than not that some portion or all of the net deferred tax assets will be utilized to offset future tax liabilities. Management considers the

scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. As of June 30, 2010, the Company provided a full valuation allowance of approximately \$12.8 million against its net deferred tax assets.

Table of Contents**(10) Net Income Per Share**

Basic net income per share is computed on the basis of the weighted average number of shares of common stock outstanding during the period. Diluted net income per share is computed on the basis of the weighted average number of shares of common stock plus the effect of dilutive potential common shares outstanding during the period using the treasury stock method and the if-converted method. Dilutive potential common shares include outstanding stock options, convertible debt, and shared-based awards. Reconciliation and the components of basic and diluted net income per share are as follows (in thousands):

	Year Ended June 30,	
	2010	2009
Numerator:		
Net income basic	\$ 260	\$ 4,725
Dilutive share based payments		21
Net income diluted	\$ 260	\$ 4,746
Denominator:		
Denominator for basic net income per share weighted average common stock outstanding	16,567	16,365
Dilutive common stock equivalents common stock options and share-based awards	1,716	539
Denominator for diluted net income per share weighted average common stock outstanding and dilutive common stock equivalents	18,283	16,904
Basic net income per share	\$ 0.02	\$ 0.29
Diluted net income per share	\$ 0.01	\$ 0.28

The Senior Convertible Subordinated Notes Payable outstanding as of June 30, 2010, and June 30, 2009, which are convertible into 341,000 and 458,000 shares of common stock, respectively, at \$15.00 per share, have not been included in the computation of diluted net income per share for the twelve months ended June 30, 2010, and June 30, 2009, as the impact to net income per share is anti-dilutive.

Options to purchase 39,900 shares of common stock at exercise prices ranging from \$4.40 to \$48.75 per share outstanding for the twelve months ended June 30, 2010, were not included in diluted net income per share, as the impact to net income per share is anti-dilutive. Options to purchase 467,000 shares of common stock at exercise prices ranging from \$0.30 to \$51.25 per share outstanding for the twelve months ended June 30, 2009, respectively, were not included in diluted net income per share, as the impact to net income per share is anti-dilutive.

(11) Employee Benefit Plans

We have a defined contribution retirement plan, which covers substantially all employees and officers. For the years ended June 30, 2010 and 2009, we have contributed the required match of \$0.3 million and \$0.3 million, respectively, to the plan. We have the right, but not an obligation, to make additional contributions to the plan in future years at the discretion of the Company's Board of Directors. We have not made any additional contributions for the years ended June 30, 2010 and 2009.

Table of Contents**(12) Commitments and Contingencies*****Leases***

The Company is obligated under noncancelable operating leases for equipment, office space, storage space, and the land for a payload processing facility, and certain flight assets. Future minimum payments under these noncancelable operating leases are as follows (in thousands).

Year ending June 30,	Operating Leases
2011	616
2012	256
2013	13
2014	
2015	
2016 and thereafter	
 Subtotal	 \$ 885

Rent expense for the years ended June 30, 2010 and 2009 was approximately \$0.9 million and \$0.9 million, respectively. For fiscal year 2010, the Company received sublease payments of \$0.3 million.

Construction Contract Contingency

In August 2007 we entered into a \$14.0 million modification to our existing VAFB construction contract. The modification required us to complete the construction on the facility by September 30, 2009. The modification contained penalties of up to \$3.0 million if we did not meet the contracted completion date. The construction was complete in September 2009 and the Company did not incur a penalty.

State of Texas Funding

In March 2010, the Texas Emerging Technology Fund awarded 1st Detect \$1.8 million for the development and marketing of the Miniature Chemical Detector, a portable mass spectrometer designed to serve the security, healthcare and industrial markets. (See Note 13). As of June 30, 2010, 1st Detect has received the first of two \$0.9 million disbursements. The disbursed amount of \$0.9 million represents a contingency through March 2020, the date of cancellation. If an event of default should occur, the principal and accrued interest would be reclassified from equity to notes payable in the consolidated financial statements as amounts due to the State of Texas. Management considers the likelihood of an event of default to be remote.

Employment Contracts

The Company has entered into employment contracts with certain of its key executives. Generally, certain amounts may become payable in the event the Company terminates the executives' employment (See Part III, Item 11).

(13) State of Texas Funding

In March 2010, the Texas Emerging Technology Fund awarded 1st Detect \$1.8 million for the development and marketing of the Miniature Chemical Detector, a portable mass spectrometer designed to serve the security, healthcare and industrial markets. In exchange for the award, 1st Detect granted a common stock purchase right and a note payable to the State of Texas. As of June 30, 2010, 1st Detect has received the first of two \$0.9 million disbursements. The proceeds from the award can only be used to fund development of the Miniature Chemical Detector at 1st Detect, not for repaying existing debt or for use in other Company subsidiaries.

The common stock purchase right is exercisable at the first Qualifying Financing Event, which is essentially a change in control or third party equity investment in 1st Detect. The number of shares available to the State of Texas, at the price of par value, is calculated as the total disbursements (numerator) divided by the stock price established in the Qualifying Financing Event (denominator). If the first Qualifying Financing Event does not occur within eighteen months of the agreement effective date, the number of shares available for purchase will equal the total disbursements (numerator) divided by \$100 (denominator).

Table of Contents

The note equals the disbursements to 1st Detect to date, accrues interest at 8% per year and cancels automatically at the earlier of (1) selling substantially all of the assets of 1st Detect, (2) selling more than 50% of common stock of 1st Detect or (3) in March 2020. No payments of interest or principal are due on the note unless there is a default, which would occur if 1st Detect moves its operations or headquarters outside of Texas at any time before March 2020. 1st Detect has the option to pay back the principal plus accrued interest by September 30, 2011, but repayment does not cancel the State of Texas common stock purchase right.

Management considers the likelihood of voluntarily repaying the note or of a default event as remote. As such, the first \$0.9 million installment was accounted for as a contribution to equity in the period ended June 30, 2010.

(14) Segment Information

Selected financial data for the year ended June 30, 2010 and 2009 of the Company's segments is as follows (in thousands):

Year ended June 30, 2010:

	Revenue	Income (loss) before income taxes	Net Fixed Assets	Depreciation & Amortization	Total Assets
ASO	\$ 27,979	\$ 6,332	\$ 39,670	\$ 2,025	\$ 48,670
Spacetech		(6,638)	250	110	6,233
Total	\$ 27,979	\$ (306)	\$ 39,920	\$ 2,135	\$ 54,903

Year ended June 30, 2009:

	Revenue	Income (loss) before income taxes	Net Fixed Assets	Depreciation & Amortization	Total Assets
ASO	\$ 31,856	\$ 7,345	\$ 40,051	\$ 2,073	\$ 52,595
Spacetech	129	(3,130)	175	136	6,324
Total	\$ 31,985	\$ 4,215	\$ 40,226	\$ 2,209	\$ 58,919

(15) Strategic Financial and Business Alternatives

In September 2009, the Company announced that the Board of Directors had engaged investment banking firm Lazard Ltd. to advise the Company in exploring strategic financial and business alternatives to enhance shareholder value. In July 2010, the Company announced that it had concluded its engagement with Lazard Middle Market following a review of strategic alternatives by its Board of Directors.

(16) Board of Director Resignation

On June 18, 2010, General (Ret.) Lance W. Lord resigned from the Board of Directors of Astrotech and as the Chief Executive Officer of Astrotech Space Operations. The vacancy on the Board of Directors created by General Lord's resignation is not expected to be filled until the next annual meeting. The role of Chief Executive Officer, Astrotech Space Operations, will remain open pending a review of internal and external candidates.

Table of Contents

On September 30, 2009, R. Scott Nieboer resigned from the Astrotech Board of Directors and the Audit Committee of the Board of Directors. Mr. Nieboer's decision to resign is not a result of a disagreement with the Company related to the Company's operations, policies or practices. In October 2009, the Board of Directors appointed current director Sha-Chelle Manning to fill the vacancy on the Audit Committee.

(17) Related Party Transactions

The Company engaged in certain transactions with directors, executive officers, shareholders, and certain former officers during fiscal years 2010 and 2009. Following is a description of these transactions:

Senior Convertible Note Repurchase

In October 2008, the Company purchased \$1.8 million principal amount of its outstanding 5.5% Senior Convertible Notes. At the time, company Director Mr. R. Scott Nieboer was a beneficial owner of the repurchased securities. The Company paid \$1.1 million for these securities and has recognized a gain of \$0.7 million on the transaction in fiscal year 2009.

Directors Compensation

Our independent directors are paid an annual cash retainer fee upon their appointment or annual re-election to the Board of Directors and are granted annual equity based compensation grants. We amortize the expense of these annual awards over the period between annual meetings of shareholders. Meeting fees, expenses, and other costs are expensed as incurred. The director fees expensed in 2010 and 2009 were \$0.2 million and \$0.3 million, respectively.

James D. Royston

Effective December 2008, the Company entered into a seven month auto-renewable lease agreement with Mr. Royston for a house located in Melbourne Florida to be used by employees of the Company while conducting business on behalf of the Company. The lease provides for monthly rental payments of \$2,900 plus utilities and consumables to be paid by the Company. The lease was terminated by the Company as of March 2010.

(18) Adverse Event

On January 30, 2007, Sea Launch experienced a launch failure resulting in the loss of a satellite and damage to the floating launch platform. A full inspection, evaluation, and repair of the damage occurred and Sea Launch returned to operations in October 2007. We were paid under our contract with Sea Launch upon launch of each mission; therefore, revenues were delayed until the resumption of normal operations. As a result of the launch failure, the Company lost revenue on at least three launch missions either through cancellation or schedule delay. We submitted a claim under our business interruption insurance for \$750,000, the limit of our policy.

After negotiation with our Insurance Company, Affiliated FM, we received a letter in February 2009 denying coverage. In June 2009, Sea Launch filed for Chapter 11 bankruptcy protection. We see no further method of recourse and now consider the matter closed.

(19) NASDAQ Listing Qualifications

On April 7, 2008, we received a NASDAQ Staff Determination letter indicating that we failed to comply with NASDAQ Marketplace Rule 4310(c)(4), which requires that we maintain a \$1.00 bid price, and our securities were, therefore, subject to delisting from The NASDAQ Capital Market.

In June 2009, we received a letter from the NASDAQ Listing Qualifications Staff indicating that we regained compliance with the bid price rule. As of June 30, 2010, we are in compliance with all continued listing standards.

(20) Subsequent Events

In July 2010, the Company announced that it has concluded its engagement with Lazard Middle Market following a review of strategic alternatives by its Board of Directors (See Note 15). As a result, the Company realigned its corporate structure in order to optimize operational efficiencies.

Table of Contents

The Company's corporate realignment included the termination of James Royston, President of Astrotech Corporation, allowing for a greater focus on the satellite payload processing of its ASO business unit. The Company has no immediate plans to fill the vacancy created by Mr. Royston's termination.

The Company and ARES have resolved certain issues relative to the early termination of the subcontract in May 2008, including, but not limited to, a receivable from ARES under this contract totaling \$1.4 million. The Company wrote off \$0.1 million of unbilled receivables in connection with this agreement in the period ended June 30, 2010. In July 2010, the Company received \$1.2 million from ARES. The remaining \$0.2 million balance is expected to be paid upon completion of the 2005 through 2008 governmental audits by the DCAA.

(21) Recent Accounting Pronouncements

In December 2007, the Financial Accounting Standards Board (FASB) issued Accounting Standard Codification (ASC) No. 805, *Business Combinations* (ASC 805), previously referred to as Statement of Financial Accounting Standard (SFAS) 141 (revised 2007), *Business Combinations*. ASC 805 will significantly change current practices regarding business combinations. Among the more significant changes, ASC 805 expands the definition of a business and a business combination; requires the acquirer to recognize the assets acquired, liabilities assumed and noncontrolling interests (including goodwill), measured at fair value at the acquisition date; requires acquisition-related expenses and restructuring costs to be recognized separately from the business combination; and requires in-process research and development to be capitalized at fair value as an indefinite-lived intangible asset. ASC 805 is effective for financial statements issued for fiscal years beginning after December 15, 2008. The Company adopted the provisions of ASC 805 in the first quarter of 2010 and its adoption did not have a material effect on its consolidated financial statements.

In June 2009, the FASB issued ASC No. 105, *Generally Accepted Accounting Principles* (GAAP) (ASC 105 or FASB Codification), previously referred to as SFAS No. 168, *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles – a replacement of FASB Statement No 162* (SFAS 168). The effective date for use of the FASB Codification is for interim and annual periods ending after September 15, 2009. Companies should account for the adoption of the guidance on a prospective basis. The Company adopted the FASB Codification in the first quarter of 2010 and its adoption did not have an effect on its consolidated financial statements.

In June 2009, the FASB issued ASC No. 810, Consolidation, previously referred to as SFAS 167, *Amendments to FASB Interpretation No. 46(R)*, which significantly changes the consolidation model for variable interest entities. ASC No. 810 requires companies to qualitatively assess the determination of the primary beneficiary of a variable interest entity (VIE) based on whether the entity (1) has the power to direct matters that most significantly affect the activities of the VIE, and (2) has the obligation to absorb losses or the right to receive benefits of the VIE that could potentially be significant to the VIE. The standard shall be effective as of the beginning of each reporting entity's first annual reporting period that begins after November 15, 2009, for interim periods within that first annual reporting period, and for interim and annual reporting periods thereafter. Earlier application is prohibited. The Company does not expect that the adoption of ASC No. 810 will have a material effect on its consolidated financial position or results of operations.

In January 2010, the FASB issued ASU No. 2010-06, *Fair Value Measurements and Disclosures* (Topic 820): *Improving Disclosures about Fair Value Measurements* (ASU 2010-06). Reporting entities will have to provide information about movements of assets among Levels 1 and 2; and a reconciliation of purchases, sales, issuance, and settlements of activity valued with a Level 3 method, of the three-tier fair value hierarchy established by SFAS No. 157, Fair Value Measurements (ASC 820). The ASU 2010-06 also clarifies the existing guidance to require fair value measurement disclosures for each class of assets and liabilities. ASU 2010-06 is effective for interim and annual reporting periods beginning after December 15, 2009 for Level 1 and 2 disclosure requirements and after December 15, 2010 for Level 3 disclosure requirements. The Company adopted ASU No. 2010-06 in the third quarter of 2010 and it did not have a material effect on its consolidated financial statements.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None to report for the year ended June 30, 2010.

Table of Contents

Item 9A. Controls and Procedures.

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we have evaluated the effectiveness of our design and operation of our disclosure controls and procedures as of the end of the period covered by this annual report, and, based on that evaluation, our principal executive officer and principal financial officer have concluded that these controls and procedures are effective. There have been no changes in our internal control over financial reporting that occurred during our last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Disclosure controls and procedures are our controls and other procedures that are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file under the Exchange Act is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Under the supervision and with the participation of our management, including our principal executive and financial officers, we conducted an evaluation of the effectiveness of our internal control over financial reporting as of June 30, 2010, based on the framework in the Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation under the framework in Internal Control-Integrated Framework, our management concluded that our internal control over financial reporting was effective as of June 30, 2010.

This annual report does not include an attestation report of our registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by our registered accounting firm pursuant to §989G of the Dodd-Frank Wall Street Reform and Consumer Protection Act, which exempts the Company from the requirement that it include an attestation report of the Company's registered public accounting firm regarding internal control over our management's assessment of internal controls over financial reporting.

Item 9B. Other Information.

None to report for the period ended June 30, 2010.

Table of Contents**PART III****Item 10. Directors, Executive Officers and Corporate Governance.**

A Board of six directors was elected at the 2009 Annual Meeting. The Company's Articles of Incorporation authorize the Board of Directors (Board) to determine the number of its members. A director who is appointed by the existing Board of Directors, due to a vacant position or the need for an additional director, will serve until the next Annual Meeting of Shareholders or until a successor is duly elected and qualified.

The following table shows information as of June 30, 2010, regarding members of the Company's Board of Directors:

Current Directors **	Principal Occupation	Age as of June 30, 2010	Director Since
Thomas B. Pickens, III	Chairman and Chief Executive Officer of Astrotech Corporation	53	2004
Mark Adams*	Founder, President and CEO, Advocate MD Financial Group, Inc.	48	2007
John A. Oliva*	Managing Principal, Capital City Advisors, Inc.	54	2008
William F. Readdy*	Founder, Discovery Partners, International LLC	58	2008
Sha-Chelle Devlin Manning*	Managing Director, Nanoholdings LLC	42	2009

member of the
Board of
Directors during
the time from
the 2009 Annual
Meeting through
his resignation
on June 18,
2010.

Current Directors**Thomas B. Pickens, III**

Mr. Pickens was named Astrotech's Chief Executive Officer in January 2007 and Chairman in February 2008. In 1985, Mr. Pickens founded T.B. Pickens & Co., a company that provides consulting services to corporations, public institutions, and start-up organizations. Additionally, Mr. Pickens is the Managing Partner and Founder of Tactic Advisors, Inc., a company specializing in corporate turnarounds on behalf of creditors and investors that have aggregated to over \$20 billion in value. Since 1985, Mr. Pickens has served as President of T.B. Pickens & Co. From 1991 to 2002, Mr. Pickens was the Founder and Chairman of U.S. Utilities, Inc., a company which operated 114 water

and sewer utilities on behalf of various companies affiliated with Mr. Pickens. From 1995 to 1999, Mr. Pickens directed over 20 direct investments in various venture capital investments and was Founder and Chairman of the Code Corporation. From 1988 to 1993, Mr. Pickens was the Chairman of Catalyst Energy Corporation and was Chairman of United Thermal Corporation (NYSE). Mr. Pickens was also the President of Golden Bear Corporation, Slate Creek Corporation, Eury Dam Corporation, Century Power Corporation, and Vidilia Hydroelectric Corporation. From 1982 to 1988, Mr. Pickens founded Beta Computer Systems, Inc., and Sumpter Partners, and was the General Partner of Grace Pickens Acquisition L.P.

Table of Contents**Mark Adams**

Mr. Adams founded Advocate, MD Financial Group, Inc., a leading Texas-based medical liability insurance holding company, in July 2003. Since July 2003, Mr. Adams has served as its Chairman, President, and Chief Executive Officer. He is also a founding partner in several other companies including the Endowment Development Group, a Houston-based life insurance company specializing in placing large multimillion dollar life insurance policies throughout the U.S. market. Mr. Adams founded Murphy Adams Restaurant Group in 2007. He owns and operates Mama Fu s Asian House restaurants throughout the southeast United States. In 2008, Mr. Adams founded Small Business United, LLC, a cutting edge health insurance company for small businesses. Mr. Adams founded Sozo Global, LLC, a rapidly expanding network marketing functional beverage company. Mr. Adams is the winner of the 2008 Prestigious Ernst and Young Entrepreneur of the Year Award for Central Texas. After his career with global public companies such as Xerox and Johnson & Johnson (1985-1988), beginning in 1988, Mr. Adams then spent the next 12 years at Bostik Adhesives where he served in senior management, sales and strategic business roles for their worldwide markets in North America, Latin America, Asia, and Europe. In 1997, Mr. Adams then served as Global Sales Director for Bostik and General Manager of Nitta-Findley Company based in Osaka, Japan and later joined Ward Adhesives, Inc. as a minority owner, General Manager, and Vice President of Sales and Marketing. Mr. Adams currently serves as a Director for several public and private companies, as well as a board member for multiple nonprofit organizations. Mr. Adams is also an advisory board member for the McCoy College of Business at Texas State University.

John A. Oliva

John A. Oliva has 30 years of experience in the private equity, investment banking, capital markets, branch management, and asset management sectors. Since 2002, Mr. Oliva has been the Managing Principal of Southeastern Capital Partners BD Inc., a FINRA registered broker/dealer and independent investment banking and advisory firm. Since 2002, Southeast Capital Partners has provided financial advisory services, including mergers/acquisitions, underwriting and raising expansion capital to select mid-tier companies. In addition, Mr. Oliva is the Managing Partner of Capital City Advisors Inc., which provides private merchant banking services to clients in Europe and Asia. Mr. Oliva has eight FINRA licenses including the Managing Principal and Financial Principal licenses. Prior to joining Southeastern Capital Partners, he worked for Morgan Stanley & Co and served as an advisor to their Private Wealth Management group, developing, reviewing and implementing solutions for investment banking clients, he was also a group manager at Morgan Stanley. Mr. Oliva has been nationally recognized for achievements while at Morgan Stanley & Co. and Shearson/Lehman Brothers in the asset management and investment banking sector. He performed similar key roles at Interstate/Johnson Lane and The Robinson Humphrey Company. Mr. Oliva has also worked on the floor of the New York Stock Exchange.

William F. Readdy

From 1974 to 2005, Mr. Readdy served the United States as a naval aviator, pilot astronaut, military officer, and civil service executive. In 2005, Mr. Readdy established Discovery Partners, International LLC, a consulting firm to provide strategic planning, risk management, safety and emerging technology solutions to aerospace and high-tech industries.

He served as a test pilot and instructor between carrier deployments to the North Atlantic, Caribbean and Mediterranean in the late 1970s and early 1980s. Mr. Readdy joined the National Aeronautics and Space Administration (NASA) in 1986 and in 1987 became a member of the astronaut corps, but continued his military service in the Naval Reserve, attaining the rank of captain before retiring in 2000.

Mr. Readdy logged more than 672 hours in space on three shuttle missions. He commanded his third flight, docking space shuttle *Atlantis* at the Russian space station *Mir* in 1996 and oversaw the first exchange of American astronaut researchers living aboard the Russian outpost.

In 2001, Mr. Readdy was appointed as NASA s associate administrator for space operations and moved to Washington D.C. Following the loss of space shuttle *Columbia* in February 2003, Mr. Readdy chaired NASA s Space Flight Leadership Council, and oversaw the agency s recovery from the accident and the shuttle s successful return to flight in July 2005.

Mr. Readdy was honored as a Meritorious Rank Executive by President Bush in 2003 and in 2005 was awarded NASA's highest honor, the Distinguished Service Medal for the second time. He has also been the recipient of NASA's Outstanding Leadership Medal three times and the Exceptional Service Medal twice. In addition he is the recipient of numerous national and international aviation and space awards, and has been recognized for his contributions to aerospace safety.

Table of Contents**Sha-Chelle Manning**

Since September 1, 2008, Sha-Chelle Manning has been Managing Director of Nanoholdings LLC, a company that commercializes scientific breakthroughs in nanotechnology that solve energy efficiency challenges with some of the world's best scientists and universities. From January 2007 to December 31, 2008, Ms. Manning was Vice-President at Authentix, a Carlyle company, that is the leader in authentication solutions for Fortune 500 companies and governments around the world for brand protection, excise tax recovery, and nano-scaled enabled authentication of security documents and pharmaceutical drugs. From September 2005 to April 2007, Ms. Manning was a consultant to the Office of the Governor of Texas, Rick Perry, where she led the development of various strategic initiatives including the Texas Nanotechnology Initiative. Prior to these assignments, Ms. Manning was Director of Alliances at Zyvex Corporation from August 2002 to September 2005, where she was responsible for the commercialization of nanotechnology products (consumer, energy, and defense) introduced and sold into the marketplace in partnership with key government agencies and industry. Ms. Manning also served as a Vice President for Winstar Communications (acquired by IDT) where she commercialized and brought to market broadband wireless technologies and web-enabled platforms. Several of her projects were launched by the White House including the Virtual Wall (www.vvmf.org), honoring the 58,195 Vietnam Veterans who made the ultimate sacrifice for their country.

Ms. Manning continues and or has provided strategic consulting for some of the following organizations: Lockheed Martin (Office of the CTO), Texas A&M University System (Vice-Chancellor for Research); HRL Laboratories (Office of the CEO); KERA-PBS, Zyvex Labs (atomically precise manufacturing to enable quantum devices and computing), and Nano-Retina (a nano-enabled artificial retina to restore vision).

Ms. Manning serves on the advisory boards of the non-profit organizations; Soul Arts and Music Foundation, and the Clean Technology and Sustainable Industries. Ms. Manning has served as one of the NSTI (Nanotechnology Society Technical Industry) Conference Chairs both in 2008 and 2010. Ms. Manning received a MBA in Telecommunications from the University of Dallas.

Executive Officers and Key Employees of the Company who are Not Directors

Set forth below is a summary of the background and business experience of the executive officers of the Company who are not nominees of the Board of Directors:

Name	Position(s)	Age as of June 30, 2010	With Company Since
John M. Porter	Senior Vice President, Chief Financial Officer, Treasurer and Secretary	38	2008
Don M. White Jr.	Senior Vice President, GM of Astrotech Space Operations	47	2005

James Royston served as President until his termination from Astrotech Corporation in July 2010.

The executive officers and key employees named below will serve in such capacities until the next annual meeting of the Company's Board of Directors, or until their respective successors have been duly elected and have been qualified, or until their earlier death, resignation, disqualification, or removal from office.

John M. Porter

Mr. Porter joined Astrotech in October 2008 and serves as the Company's Senior Vice President, Chief Financial Officer, Treasurer and Secretary. He is responsible for overall strategic planning, corporate development and finance. His primary areas of focus is utilizing financial management to support the core spacecraft payload processing business while efficiently advancing the Company's biotechnology initiatives in microgravity processing and commercializing advanced technologies that have been developed in and around the space industry.

Prior to joining the Company, Mr. Porter co-founded Arabella Securities, an investment banking firm that specialized in providing trading services and equity research on small-cap companies to institutional investors. He headed the Equity Research department, and published research on small companies in the Healthcare Technology sector. Arabella Securities subsequently merged with another broker/dealer in 2006 where Mr. Porter continued to lead the firm's Healthcare investment banking practice. Mr. Porter previously served as Director of Business Development for Luminex Corporation (NASDAQ: LMNX), a leading developer of biological testing technologies for the Diagnostic and life sciences industries. While at Luminex, Mr. Porter was responsible for the development, negotiation and management of Luminex's strategic partnership program. During his tenure at Luminex, over 40 new strategic licensing partnerships were formed with companies around the globe including Hitachi Software (Japan), Qiagen (Germany), Tepnel (UK), Invitrogen (formerly Biosource, US), Inverness Medical (US), Millipore Corporation (formerly Upstate Biotech, US), and many other world class companies. Mr. Porter performed additional duties including strategic planning, product development, marketing management, and investor relations. Mr. Porter also served in multiple capacities during the preparation, and execution of Luminex's initial public offering (IPO) in March 2000, where the company successfully raised approximately \$100M.

Table of Contents

Mr. Porter has a Bachelor of Science in Chemistry from Hampden-Sydney College in Virginia. In addition, Mr. Porter earned a Master of Business Administration from the A.B. Freeman School of Business at Tulane University and holds a Master of Science in Physical Chemistry & Material Science from Tulane University in New Orleans.

Don M. White Jr.

Don M. White has been instrumental in leading Astrotech's satellite processing operations since 2005. As Senior Vice President and General Manager of Astrotech Space Operations, Mr. White oversees a rigorous satellite payload processing schedule. He is also responsible for expanding business services, improving profitability, and managing current contracts. Additionally, Mr. White maintains ongoing negotiations with all customers, pledging that every mission contract process is streamlined with the utmost efficacy and safety.

Prior to joining the Astrotech team, Mr. White's 21 years of Aerospace experience included employment at Lockheed Martin as their Payloads/Ordnance Chief Engineer. He was then promoted to Mission Support Manager, leading various aspects of the Atlas V Development Program. Mr. White's extensive aerospace experience also includes providing leadership to the Titan and Shuttle External Tank programs while at Martin Marietta Corporation.

Mr. White has a Master of Business Administration from the Florida Institute of Technology and a Bachelor of Science in Industrial technology from the University of West Florida.

Operations of the Board of Directors

Board Member Attendance at Annual Meeting of Stockholders

The Company strongly encourages each member of the Board of Directors to attend each annual meeting of stockholders. Accordingly, we expect most, if not all, of the Company's directors to be in attendance at the meeting. All of our directors attended the 2009 annual meeting of stockholders.

Meetings and Committees of the Board of Directors

The Board of Directors and its committees meet periodically during the year as deemed appropriate. During 2010, the Board of Directors met eight times. No director attended fewer than 75% of all the 2010 meetings of the Board of Directors and its committees on which each such director served.

Director Nomination Process

Astrotech's Director nominees are approved by the Board after considering the recommendation of the Corporate Governance and Nominating Committee.

A Board of five Directors is expected to be elected at the Annual Meeting. The Company's Articles of Incorporation provide that, with respect to any vacancies or newly created directorships, the Board will nominate such individuals as may be specified by a majority vote of the then sitting directors.

Regarding nominations for directors, the Corporate Governance and Nominating Committee identifies nominees in various ways. The Corporate Governance and Nominating Committee considers the current directors that have expressed interest in, and that continue to satisfy, the criteria for serving on the Board. Other nominees may be proposed by current directors, members of management, or by shareholders. The Corporate Governance and Nominating Committee may engage a professional firm to identify and evaluate potential director nominees, but has not paid any of such fees to date. The Corporate Governance and Nominating Committee considers the Board at a strategic level looking for industry and professional experience that complements the Company's goals and direction. The Corporate Governance and Nominating Committee has established certain criteria it considers as nominating guidelines for the Board of Directors. The criteria include:

- the candidate's independence;

- the candidate's depth of business experience;

- the candidate's availability to serve;

Table of Contents

the candidate's integrity and personal and professional ethics;

the balance of the business experience on the Board as a whole; and

the need for specific expertise on the Board.

The criteria are not exhaustive and the Corporate Governance and Nominating Committee and the Board of Directors may consider other qualifications and attributes which they believe are appropriate in evaluating the ability of an individual to serve as a member of the Board of Directors. The Corporate Governance and Nominating Committee's goal is to assemble a Board of Directors that brings to the Company a variety of perspectives and skills derived from high quality business and professional experience. In order to ensure that the Board consists of members with a variety of perspectives and skills, the Corporate Governance and Nominating Committee has not set any minimum qualifications and also considers candidates with appropriate non-business backgrounds. Other than ensuring that at least one member of the Board is a financial expert and a majority of the Board members meet all applicable independence requirements, the Corporate Governance and Nominating Committee does not have any specific skills that it believes are necessary for any individual director to possess. Instead, the Corporate Governance and Nominating Committee evaluates potential nominees based on the contribution such nominee's background and skills could have upon the overall functioning of the Board.

Committees of the Board of Directors

During fiscal year 2010, the Board of Directors had three standing committees: an Audit Committee, a Compensation Committee and a Corporate Governance and Nominating Committee. Each such committee currently consists of three persons and each member of the Audit Committee, Compensation Committee and Corporate Governance and Nominating Committees is required, at the minimum, to meet the independence requirements of the Nasdaq Capital Market's Marketplace Rules. The Governance and Nominating Committee, the Audit Committee and the Compensation Committee have adopted a charter that governs its authority, responsibilities and operation. The Company periodically reviews, both internally and with the Board, the provisions of the Sarbanes-Oxley Act of 2002, and the rules of the SEC and NASDAQ regarding corporate governance policies, processes and listing standards. In conformity with the requirement of such rules and listing standards, we have adopted a written Audit Committee Charter, a Compensation Committee Charter, and a Corporate Governance and Nominating Committee Charter, which may be found on the Company's web site at www.astrotechcorp.com under "For Investors" or by writing to Astrotech Corporation, 401 Congress Avenue, Suite 1650, Austin, Texas 78701, Attention: Investor Relations and requesting copies.

The Board of Directors has determined each of the following directors to be an independent director as such term is defined by Rule 5605(a)(2) of the NASDAQ Marketplace Rules: Mark Adams; John A. Oliva; Sha-Chelle Manning and William F. Readdy.

The Corporate Governance and Nominating Committee

The Corporate Governance and Nominating Committee was created by the Board of Directors in February 2004. The Corporate Governance and Nominating Committee's charter was adopted by the Committee and approved by the Board in May 2004. The charter is available in the "For Investors" section of the Company's web site at www.astrotechcorp.com. The primary purpose of the Corporate Governance and Nominating Committee is to provide oversight on the broad range of issues surrounding the composition and operation of the Board of Directors, including identifying individuals qualified to become Board members and recommending to the Board director nominees for the next Annual Meeting of Shareholders. As of the end of fiscal year 2010 the Corporate Governance and Nominating Committee consisted of Mr. Adams (Chairman), Ms. Manning and Mr. Oliva. During fiscal year 2010, the Corporate Governance and Nominating Committee met once.

Table of Contents***The Audit Committee***

The Audit Committee is composed solely of independent directors that meet the requirements of NASDAQ and SEC rules and operates under a written charter adopted by the Audit Committee and approved by the Board of Directors in May 2004. The charter is available on the Company's web site which is www.astrotechcorp.com. The Audit Committee is responsible for appointing and compensating a firm of independent registered public accountants to audit the Company's financial statements, as well as oversight of the performance and review of the scope of the audit performed by the Company's independent registered public accountants. The Audit Committee also reviews audit plans and procedures, changes in accounting policies, and the use of the independent registered public accountants for non-audit services. As of the end of fiscal year 2010, the Audit Committee consisted of Mr. Oliva (Chairman), Mr. Adams, and Ms. Manning. During fiscal year 2010, the Audit Committee met five times. The Board of Directors has determined that John A. Oliva met the qualification guidelines as an audit committee financial expert as such term is defined in Item 407(d)(5)(ii) of Regulation S-K promulgated by the SEC.

Mr. Nieboer resigned as Director on September 30, 2009. Subsequently, Ms. Manning was appointed to the Audit Committee in October 2009.

The Compensation Committee

The Compensation Committee is composed solely of independent directors that meet the requirements of NASDAQ and SEC rules and operates under a written charter adopted by the Compensation Committee and approved by the Board of Directors in May 2004, and amended in May 2005. The charter is available on the Company's web site at www.astrotechcorp.com. The Compensation Committee is responsible for determining the compensation and benefits of all executive officers of the Company and establishing general policies relating to compensation and benefits of employees of the Company. The Compensation Committee also administers the Company's 2008 Stock Incentive Plan, the 1994 Stock Incentive Plan, the 1995 Directors' Stock Option Plan, and the Employee Stock Purchase Plan in accordance with the terms and conditions set forth in those plans. As of the end of fiscal year 2010, the Compensation Committee consisted of Mr. Adams (Chairman), Mr. Readdy, and Mr. Oliva. During fiscal year 2010, the Compensation Committee met three times.

Code of Ethics and Business Conduct

The Company's Code of Ethics and Business Conduct applies to all directors, officers, and employees of Astrotech. The key principles of this code include acting legally and ethically, speaking up, getting advice, and dealing fairly with the Company's Shareholders. The Code of Ethics and Business Conduct is available on the Company's web site at www.astrotechcorp.com and is available to the Company's Shareholders upon request. The Code of Ethics and Business Conduct meets the requirements for a Code of Conduct under the SEC rules for financial officers.

Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Securities Exchange Act of 1934 requires the Company's directors, executive officers and persons who beneficially own more than 10% of the Company's Common Stock to file reports of ownership and changes in ownership with the SEC. Such directors, executive officers, and greater than 10% Shareholders are required by SEC regulation to furnish to the Company copies of all Section 16(a) forms they file. Due dates for the reports are specified by those laws, and the Company is required to disclose in this document any failure in the past fiscal year to file by the required dates. Based solely on written representations of the Company's directors, executive officers and 10% Shareholders and on copies of the reports that they have filed with the SEC, it is the Company's belief that all of Astrotech's directors, executive officers and 10% Shareholders complied with all filing requirements applicable to them with respect to transactions in the Company's equity securities during fiscal year 2010.

Item 11. Executive Compensation.**Compensation Discussion and Analysis****Overview**

Astrotech provides a range of products and services that focus on utilizing space for the needs of government and commercial applications. Our core business operates spacecraft pre-launch facilities and provides supporting services at three domestic launch sites. We develop and operate space flight hardware assets, provide manned and unmanned payload processing services, and develop commercial product using space-based technology. In anticipation of the planned 2011 space shuttle retirement, we began developing new products and services within our strategic focus on

the commercial exploitations of space.

Table of Contents

Achieving our Company's aspirations requires a highly skilled, motivated team. Thus, our compensation system is designed to be competitive with those of other companies that compete for highly skilled technical employees and executives. Our performance-based compensation system is intended to include incentives for innovation and entrepreneurial spirit.

Guiding Principles

The Compensation Committee strives to achieve our strategic objectives by designing our compensation program to offer competitive base compensation to attract and retain experienced qualified executives while offering incentives to foster the innovation and entrepreneurial spirit necessary for executing our business strategy and rewards for successful achievement of performance goals. In designing our executive compensation program, we are guided by five principles:

- Establish target compensation levels that are competitive within the industries and the markets in which we compete for executive talent;

- Structure executive compensation so that our executives share in Astrotech's successes and failures by correlating compensation with target levels based upon business performance;

- Link pay to performance by making a percentage of total executive compensation variable, or "at risk", through an annual determination of performance-based incentive compensation;

- Align a portion of executive pay with shareholder interests through equity awards; and

- Maintain a company-wide entrepreneurial atmosphere by minimizing special executive only benefits or prerequisites.

Operation of the Compensation Committee

The Compensation Committee of the Board of Directors administers our executive compensation program and monitors the Company's overall compensation strategy to ensure that executive compensation supports the Company's business objectives. The Compensation Committee reviews and determines salary, short-term incentives, long-term incentives and other benefits for the Company's Chief Executive Officer (CEO) and certain named executive officers (NEOs).

For a more complete discussion of the responsibilities of the Compensation Committee, see the Operations of the Board of Directors - The Compensation Committee, and the charter for the Compensation Committee, posted on our web site at www.astrotechcorp.com.

The Compensation Program

The key components of our current compensation program for Astrotech executive officers are:

- Base salary;

- Short-term cash incentives;

- Long-term performance-based and other equity awards; and

- Other benefits.

To remain competitive, the Compensation Committee periodically benchmarks our executive compensation program to determine how actual compensation targets and levels compare to our overall philosophy and target markets. The primary focus of the benchmarking process is on public companies in the aerospace, defense and government contractor industries of similar or otherwise comparable size and complexity. This benchmarking considers information from proxy data for the peer group's CEO and NEOs and was last presented to the Compensation Committee in July 2010.

Other Considerations in Determining Executive Compensation

We believe that our executive compensation properly incentivizes our senior management to focus on the overall goals of the Company. Each element of our Executive Compensation Program is structured towards specific objectives. If a unique situation occurs where incentive goal adjustment or stock option repricing are considered, the Compensation Committee will perform a review of the individual facts and circumstances before taking any action.

Table of Contents**Role of the Compensation Committee and CEO in Determining Executive Compensation**

Mr. Pickens is not a member of the Compensation Committee. He did not attend the Compensation Committee meetings in August 2009 or July 2010, which discussed NEO and all other employee compensation.

Base Salary

Base salary is designed to compensate our employees in part for their roles and responsibilities, and also to provide a fixed level of compensation that serves as a retention tool throughout the executive's career. Initial base salaries were set considering each executive's roles and responsibilities, current skills, future potential and comparable market compensation. Typically, the Compensation Committee reviews the base salaries of each NEO annually. Adjustments are made based on individual performance, changes in roles and responsibilities, and external market data for similar positions.

Short-term Cash Incentives

At the discretion of the Compensation Committee, we provide annual incentive awards under our Key Employee Incentive Bonus Plan (the "Bonus Plan"). These short-term cash incentives are designed to reward the achievement of specific, pre-set financial results measured over the fiscal year in which that compensation is earned. Generally, we compute the Bonus Plan after the end of each fiscal year and make the cash awards during the first quarter of the next fiscal year. The Bonus Plan encompasses all employees of the Company based upon maximum award levels stated as a percentage of base salary ("Payout Percentage"). The maximum award levels are set within our salary-grade structure for each salary grade ranging from 5% to 50%.

For fiscal year 2010, the Compensation Committee approved a Bonus Plan encompassing three equally weighted Bonus Elements, each based upon specific objectives set by the Compensation Committee at the beginning of the fiscal year. The sum of the Payout Percentage for each of the Bonus Elements, then is applied to the award levels for each employee to determine the Bonus Award. For fiscal year 2010, the Compensation Committee had established the following three Bonus Elements:

Individual Performance A Payout Percentage of up to 33% of the individual's total bonus is based upon the officer or employee's performance of his job responsibilities and achievement of individual goals as determined through the annual performance review process.

Business Unit Performance A Payout Percentage of up to 33% of the individual's total bonus is to be awarded based upon the financial performance of the officer or employee's business unit based upon net income, relative to the approved budget for the fiscal year.

Corporate Performance A Payout Percentage of up to 33% of the individual's total bonus is to be awarded based upon the financial performance of the Company, as measured by comparing the approved budget of revenue, net income and backlog to actual results for the fiscal year.

Given the dynamic marketplace and the possibility of unforeseen developments, the Compensation Committee has discretionary authority to adjust such awards to reflect actual performance in light of such developments or to make other discretionary adjustments to the overall Payout Percentage or to individual employee bonuses. Bonus maximum award levels range from 30% to 50% of base salaries for our NEOs. On average, we target our short term cash incentives to comprise approximately 15% of the total compensation package of our NEOs.

Long-term Non-cash Incentive Awards

Our long-term incentive awards are used to link Company performance and increases in shareholder value to the total compensation of our NEOs. These awards are also key components of our ability to attract and retain our NEOs. The annualized value of the awards to our NEOs is intended to be a significant component of the overall compensation package. On average, and assuming performance is on target, these awards are targeted to represent up to 40% of the total compensation package, consistent with our emphasis on linking executive pay to shareholder value.

Our shareholder-approved incentive plans allow for the granting of stock options based upon Astrotech's stock prices in the public markets. Stock options are granted with an exercise price not less than the market price of our common stock on the grant date. Options generally vest over a period of four years with 25% becoming exercisable on each anniversary of the grant date as long as the recipient is still employed by the Company on the date of vesting, and generally expire after ten years.

Table of Contents

Stock awards, restricted stock grants and stock option awards were made to our NEOs in August 2009 and November 2009, in the amounts set forth in the table labeled Fiscal Year 2010 Grants of Plan-Based Awards.

Benefits

Our benefit programs are established based upon an assessment of competitive market factors and a determination of what is needed to attract and retain high caliber executives and other employees. Astrotech's primary benefits for executives include participation in the Company's broad-based plans: the 401(k) Plan, the Company's health, dental and vision plans and term life and disability insurance plans. The Company also provides certain executives, including some NEOs, with supplemental disability insurance. This plan offers additional income protection to Senior Vice Presidents and above and is provided to supplement the monthly benefit amounts that are capped in the general disability policy. The Company provides 1.5 times of each NEOs annual base salary to a maximum of \$300,000 in term life insurance and pays the premium for such insurance. The fair value of premiums paid in excess of IRS limitations are included as other income reported for the NEO.

Indemnification Agreements

The Company has entered into indemnification agreements with each of its NEOs. The agreements provide that the Company shall indemnify and hold harmless each indemnitee from liabilities incurred as a result of such indemnitee's status as an officer or employee of the Company, subject to certain limitations.

Post-Termination Compensation

The Compensation Committee believes that severance benefits and change of control benefits are necessary in order to attract and retain the caliber and quality of executive that the Company needs in its most senior positions. These benefits are particularly important to provide for continuity of senior management allowing executives to focus on results and long-term strategic initiatives.

As of June 30, 2010, Mr. Pickens, Mr. Royston and Mr. White were the executives with existing employment contracts. In July 2010, Mr. Royston was terminated from Astrotech. The agreements provide for severance payments and benefits if termination occurs without cause or if the executive leaves for good reason. There is also additional compensation provided in circumstances following such termination after a change in control. Additional information regarding the severance and change in control payments, including a definition of key terms and a quantification of benefits that would have been received by our NEOs at termination is found under Potential Payments upon Termination or Change in Control, which follows.

Stock Ownership Guidelines

The Company has not established stock ownership guidelines.

Tax Deductibility Policy

The Compensation Committee considers the deductibility of compensation for federal income tax purposes in the design of the Company's compensation programs. We believe that all of the incentive compensation paid to our NEOs for fiscal year 2010 qualifies as performance-based compensation and thus, is fully deductible by the Company for federal income tax purposes. While we generally seek to ensure the deductibility of the incentive compensation paid to our NEOs, the Compensation Committee intends to retain the flexibility necessary to provide cash and equity compensation in line with competitive practice, our compensation philosophy, and the best interest of our Shareholders even if these amounts are not fully tax deductible. The employment agreements between the Company and its NEOs provide for interpretation, operation and administration consistent with the intent of Section 409A of the Internal Revenue Code, to the extent applicable.

Compensation Committee Interlocks and Insider Participation

The Company's Compensation Committee consists of Mr. Adams (Chairman), Mr. Readdy and Mr. Oliva. Mr. Adams is Chairman, President and Chief Executive Officer of Advocate MD. Mr. Pickens previously served on the Board of Directors of Advocate MD until his resignation in November 2009.

Compensation Committee Report

Astrotech's Compensation Committee reviewed and discussed with management the Compensation Discussion and Analysis required by item 402(b) of Regulation S-K and, based on such review and discussion, has recommended to the Board of Directors that such Compensation Discussion and Analysis be included in Form 10-K for fiscal year ended June 30, 2010.

James D. Royston ⁽²⁾	8,077	881		8,958
Lance W. Lord ⁽³⁾		995	23,077	24,072

(1) Mr. Pickens employment contract includes a car allowance of \$1,000 per month. Astrotech paid \$561 for a healthclub membership for Mr. Pickens during fiscal 2010.

(2) Mr. Royston was terminated on July 13, 2010.

(3) Mr. Lord resigned as Chief Executive Officer of Astrotech Space Operations in June 2010. Included in Other Benefits is accrued vacation paid upon his resignation.

Table of Contents**Fiscal Year 2010 Grants of Plan-Based Awards**

The following table shows additional information regarding: (i) the target and presumed maximum level of annual cash incentive awards for the Company's executive officers for performance during fiscal year 2011, as established by the Compensation Committee under the Company's Key Employee Incentive Bonus Plan; and (ii) Spacotech equity awards granted in January 2010 that were awarded to help retain the NEOs and focus their attention on building Shareholder value. The actual amount of the annual cash incentive award received by each NEO for performance during fiscal year 2010 is shown in the Fiscal Year 2010 Summary Compensation Table.

Name	Estimated Future Payouts Under Non-Equity Incentive Plan Awards		All Other Stock Awards: Number of Shares Restricted Stock	Spacotech Restricted Stock Warrants		Grant Date Fair Value of Equity	Grant Date of Equity Awards
	Target (\$) ⁽¹⁾	Maximum (\$) ⁽¹⁾	(#) ⁽²⁾	(#) ⁽³⁾	(#) ⁽³⁾	(\$)	
Thomas B. Pickens, III	119,700	199,500		800	1,680	361,782	January 19, 2010
John M. Porter	82,500	137,500		600	980	227,704	January 19, 2010
Don M. White	67,500	112,500					
James D. Royston ⁽⁴⁾			100,000	300		235,100	November 13, 2009 & January 19, 2010
Lance Lord ⁽⁵⁾			200,000			370,000	November 13, 2009

No options were awarded to NEOs during fiscal year 2010.

- (1) Estimated bonus for Mr. Pickens, Mr. Porter, and Mr. White are computed at a maximum of 50% of base salary. Estimated target

bonus
percentage is
30% of base
salary.

- (2) Represents restricted stock granted to Mr. Royston on November 13, 2009.
- (3) Represents Astrogenetix and 1st Detect restricted stock and warrants granted to Mr. Pickens, Mr. Porter and Mr. Royston on January 19, 2010.
- (4) Mr. Royston was terminated from Astrotech on July 13, 2010.
- (5) Mr. Lord resigned from Astrotech on June 18, 2010.

Employment Agreements

During fiscal year 2010, the Company had employment agreements in place with Mr. Pickens, Mr. White, Mr. Lord and Mr. Royston. Each employment agreement sets forth, among other things, the NEO's minimum base salary, bonus opportunities and provisions with respect to certain payments and other benefits upon termination of employment under certain circumstances such as without Cause, leaving employment for Good Reason or a Change in Control. Please see Potential Payments Upon Termination or Change in Control for a description of such provisions.

The minimum base salary set in the employment agreement for Mr. Pickens is \$360,000, for Mr. White is \$184,765, for Mr. Lord is \$175,000 and for Mr. Royston is \$210,000. Mr. Lord was paid his salary pro rata through the date of his resignation, June 18, 2010. Mr. Royston was paid his salary pro rata through the date of his termination on July 13, 2010.

The NEOs participate in the Key Employee Incentive Bonus Plan in accordance with the terms of the plan which includes all employees of the Director level and above. In accordance with that Plan, all NEO's maximum bonus is 50%, subject to Compensation Committee discretion.

Awards

On January 19, 2010, an independent committee of the Board of Directors of 1st Detect, a subsidiary of the Company, approved a grant of 1,180 restricted stock shares and 1,820 stock purchase warrants to certain officers, Directors and employees of 1st Detect. Additionally, on the same day, an independent committee of the Board of Directors of

Astrogenetix, a subsidiary of the Company, approved a grant of 1,550 restricted stock shares and 2,050 stock purchase warrants to certain officers, directors and employees of Astrogenetix.

The Compensation Committee also awarded bonuses to directors, NEOs, and employees in August 2010, in recognition of the employee performance during fiscal year 2010.

Salary and Bonus in Proportion to Total Compensation

We believe that a substantial portion of each NEO's compensation should be in the form of performance based awards, particularly equity based awards which align the interests of management with that of the Shareholders. In 2010, the total compensation of our NEOs was consistent with this philosophy. Providing long-term compensation such as equity awards allows the Company to attract and incentivize qualified executives with less cash outlay, and to retain the executives over a longer period.

Table of Contents**Outstanding Equity Awards at Fiscal Year 2010 End**

The following table shows certain information about unexercised options as of June 30, 2010.

Schedule of Outstanding Equity Awards

Name	Option Awards & Warrants

	1,500	500	11.50		08/09/2016

(1) All exercisable options will expire 90 days after the date of an employee's termination.

(2) Options vest ratably over a four year period, with the exception of the July 18, 2009, grants, which

vested on
January 15,
2009 and
expired on
July 18, 2010.

- (3) Spacotech warrants are unexercisable. Stock price is based on grant date fair value: \$212.00 for 1st Detect and \$167.00 for Astrogenetix.
- (4) All exercisable options with an expiration date of July 18, 2010 were exercised prior to expiration date.
- (5) All exercisable options with an expiration date of July 18, 2010 were exercised prior to expiration date. Mr. Royston was terminated on July 13, 2010.

The following table provides information with respect to the vesting of each NEO's outstanding unexercisable options and warrants:

Schedule of Vesting Astrotech Stock Option Grants

Name	08/09/2010	10/06/2010	10/06/2011	10/06/2012
Don M. White	300	12,500	12,500	12,500
James D. Royston	500			

Schedule of Vesting Spacotech Warrant Grants

Name	01/19/2011	01/19/2012
Thomas B. Pickens, III ⁽¹⁾	840	840

John Porter ⁽¹⁾	490	490
(1) Warrants granted to Mr. Pickens and Mr. Porter in January 2010 for 1 st Detect and Astrogenetix.		

Table of Contents**2010 Option Exercises and Stock Granted**

During fiscal year 2010, there were no stock options exercised by the Company's CEO or other NEOs. The following table sets forth the number and corresponding value realized during fiscal year 2010 and reflecting the grants made on August 19, 2009 and November 13, 2009, with respect to common stock or restricted stock grants.

Name	Option Awards		Restricted Stock Awards		Spacotech Warrant Awards		Spacotech Restricted Stock Awards	
	Number of Shares Acquired on Exercise	Value Realized on Exercise	Number of Shares Acquired on Grant	Value Realized on Grant (\$)	Number of Shares Acquired on Grant	Value Realized on Grant (\$)	Number of Shares Acquired on Grant	Value Realized on Grant (\$)
Thomas B. Pickens III ⁽¹⁾			750,000	847,500	1,680	214,682	800	147,100
John M. Porter ⁽¹⁾			300,000	339,000	980	118,504	600	109,200
James D. Royston ⁽²⁾			100,000	185,000			300	50,100
Lance W. Lord ⁽³⁾			200,000	370,000				

(1) Awards of restricted stock vesting 33.33% on August 19, 2010, 33.33% on August 19, 2011, and 33.33% on August 19, 2012.

(2) Awards of restricted stock vesting 33.33% on November 13, 2010, 33.33% on November 13, 2011, and 33.33% on November 13, 2012. Mr.

Royston was terminated on July 13, 2010.

- (3) Awards of restricted stock vesting 33.33% on November 13, 2010, 33.33% on November 13, 2011, and 33.33% on November 13, 2012. Mr. Lord resigned on June 18, 2010.

The Company granted restricted stock units to the NEOs during fiscal 2010. Refer to the table entitled "Fiscal Year 2010 Grants of Plan-Based Awards" included in Item 11 of this Form 10-K for further detail.

Pension Benefits

All employees of the Company, including NEOs, are eligible to participate in the Astrotech 401(k) plan. In accordance with this plan, employees are eligible to contribute up to 25% of their base salary subject to Internal Revenue Service limitations into the plan with all such contributions being fully vested upon contribution. The Company will match, dollar for dollar, up to 5% of the employee's contributions. Employer contributions into the plan vest pro-rata after 3 years of vesting service and are fully vested thereafter. The Company has no additional pension benefits for its NEOs.

The Company does not have a nonqualified deferred compensation plan and the NEOs have not accrued any benefits or rights to payments other than the Astrotech 401(k) Plan and potential payments upon termination discussed below.

Potential Payments Upon Termination or Change in Control

As noted under Compensation Discussion and Analysis - Post-Termination Compensation, the Company has entered into employment agreements with Mr. Pickens and Mr. White that provide for payments and other benefits in connection with the officer's termination for a qualifying event or circumstance and for enhanced payments in connection with such termination after a Change in Control (as defined in the applicable agreement). A description of the terms with respect to each of these types of terminations follows.

Table of Contents

Termination Other Than After a Change in Control

The employment agreements provide for payments of certain benefits upon the termination of the employment of the NEO. The NEO's rights upon termination of his or her employment depend upon the circumstances of the termination. Central to an understanding of the rights of each NEO under the employment agreements is an understanding of the definitions of "Cause" and "Good Reason" as those terms are used in those agreements. For purposes of the employment agreements, the Term of Employment may be terminated at any time by the Company upon any of the following:

Death of the NEO;

In the event of physical or mental disability where the NEO is unable to perform his/her duties;

For Cause or Material Breach where Cause is defined as conviction of certain crimes and/or felonies, and Material Breach is defined to include certain specified failures to perform duties or uphold fiduciary responsibilities; or

Otherwise at the discretion of the Company and subject to the termination obligations set forth in the employment agreement.

The NEO may terminate the Term of Employment at any time upon any of the following:

Upon the death of the NEO;

In the event of physical or mental disability where the NEO is unable to perform his/her duties;

Upon the Company's material reduction in the NEO's authority, perquisites, position, title or responsibilities or other actions that would give the NEO the right to resign for "Good Reason"; or

Otherwise at the discretion of the NEO and subject to the termination obligations set forth in the employment agreement.

The benefits to be provided to the NEO in each of these situations are described in the tables below, which assume that the termination had taken place in fiscal 2011.

Termination after a Change in Control

A termination after a Change in Control is similar to the severance provisions described above, except that the NEO becomes entitled to benefits under these provisions only if his employment is terminated within twelve months following a Change in Control. A Change in Control for this purpose is defined to mean (i) the acquisition by any person or entity of the beneficial ownership of securities representing 50% or more of the outstanding securities of the Company having the right under ordinary circumstances to vote at an election of the Board of Directors of the Company; (ii) the date on which the majority of the members of the Board of Directors of the Company consists of persons other than directors nominated by a majority of the directors on the Board of Directors at the time of their election; and (iii) the consummation of certain types of transactions, including mergers and the sale or other disposition of all, or substantially all, of the Company's assets.

As with the severance provisions described above, the rights to which the NEO is entitled under the Change in Control provisions upon a termination of employment are dependent on the circumstances of the termination. The definitions of Cause and other reasons for termination are the same in this termination scenario as in a termination other than after a Change in Control.

Payment Obligations Under Employment Agreements Upon Termination of Employment of NEO

The following tables set forth Astrotech's potential future payment obligations under the employment agreements under the circumstances specified upon a termination of the employment of our NEOs. Unless otherwise noted, the descriptions of the payments below are applicable to all of the tables relating to potential payments upon termination or a Change in Control.

Equity Acceleration The Company's employment agreements include provisions to accelerate the vesting of outstanding equity awards upon termination, including termination pursuant to a Change in Control. The

Compensation Committee oversees the Executive Stock Option Plan and is charged with the responsibility of reviewing and granting exceptions to previously issued equity grants on a case by case basis.

Table of Contents

Health Care Benefits The employment agreements generally provide that, after resignation for Good Reason or termination without Cause, the Company will continue providing medical, dental, and vision coverage to the NEO and the NEO's dependents at least equal to that which would have been provided if the NEO's employment had not terminated, if such coverage continues to be available to the Company, until the earlier of (a) the date the NEO becomes eligible for any comparable medical benefits provided by any other employer or (b) the end date of an enumerated period following the NEO's date of termination.

As termination benefits would be payable upon an event following June 30, 2010, the tables below reflect salary changes made by the Compensation Committee for fiscal year 2011.

Thomas B. Pickens, III

Benefits and Payments Upon Termination	Resignation for Good Reason or Termination Without Cause (\$)⁽¹⁾	Termination for Other Than Good Reason or Termination With Cause (\$)	Resignation for Good Reason or Termination Without Cause After Change- in-Control (\$)⁽²⁾	Disability (\$)	Death (\$)
Compensation:					
Base Salary	399,000		598,500	399,000	399,000
Bonus ⁽³⁾	99,750		149,625	99,750	99,750
Equity⁽⁴⁾:					
Restricted Stock	930,000		930,000	930,000	930,000
Spacotech Equity Awards	361,782		361,782	361,782	361,782
Benefits and Perquisites:					
Post-Termination Health Care	19,557		29,336	19,557	19,557
Accrued Vacation Pay ⁽⁵⁾	38,365	38,365	38,365	38,365	38,365
Total:	1,848,454	38,365	2,107,608	1,848,454	1,848,454

(1) Pursuant to the employment agreement, this estimate assumes twelve months of base salary and benefits after

termination.

- (2) Provision on change in control provides for 18 months salary if terminated.
- (3) Bonus calculated at 50% of estimated maximum bonus.
- (4) Astrotech equity awards assumed exercise price of \$1.24, which was the closing ASTC stock price as of June 30, 2010. Unvested options with a strike price above market value as of June 30, 2010 were not included in the calculation. Spacotech warrants were valued based on the Black Scholes Model and Spacotech restricted stock was based on a third party valuation.
- (5) Assumes 5 weeks of accrued vacation upon termination (maximum contractual

allowance).

Table of Contents**Don M. White**

(1) Pursuant to the employment agreement, this estimate assumes six months of base salary and benefits after termination.

(2) Provision on change in control provides for nine months

salary if
terminated.

- (3) Bonus estimated at 50% of maximum bonus.
- (4) Equity awards assumed exercise price of \$1.24, which was the ASTC closing stock price as of June 30, 2010.
- (5) Option awards assumed market price of \$1.24, which was the ASTC closing stock price as of June 30, 2010. Unvested options with a strike price above market value as of June 30, 2010, were not included in the calculation.
- (6) Assumes five weeks of accrued vacation upon termination (maximum contractual allowance).

Table of Contents

Director Compensation

Overview

Astrotech's director compensation program consists of cash-based as well as equity-based compensation. The Board of Directors recognizes that cash compensation is an integral part of the compensation program and has instituted a fixed and variable fee structure to provide compensation relative to the required time commitment of each director. The equity component of Astrotech's director compensation program is designed to build an ownership stake in the Company while conveying an incentive to directors relative to the returns recognized by our Shareholders.

Cash-Based Compensation

Company directors, other than the Chairman of the Audit Committee and Chairman of the Compensation Committee, receive an annual stipend of \$30,000 paid upon the annual election of each non-employee director or upon joining the Board of Directors. The Chairman of the Audit Committee receives an annual stipend of \$40,000 and the Chairman of the Compensation Committee receives an annual stipend of \$35,000, recognizing the additional duties and responsibilities of those roles. In addition, each non-employee director receives a meeting fee of \$3,000 for each meeting of the Board of Directors attended in person and \$1,000 for each such meeting attended by conference call.

Audit Committee members received \$750 for attendance to meetings in person or by conference call, while the Compensation Committee and the Governance and Nominating Committee members received \$500 for attendance to meetings in person or by conference call. All directors are reimbursed ordinary and reasonable expenses incurred in exercising their responsibilities in accordance with Travel and Entertainment Expense Reimbursement policy applicable to all employees of the Company.

Equity-Based Compensation

Under provisions adopted by the Board of Directors, each non-employee director receives 25,000 shares of restricted common stock issued upon his first election to the Board of Directors, subject to board discretion. Restricted stock and stock options granted under the plan vest 25% annually, beginning after one year and terminate in 10 years. Already vested shares do not expire upon termination of the director's term on the Board of Directors.

Pension and Benefits

The non-employee directors are not eligible to participate in the Company's benefits plans, including the 401(k) plan.

Indemnification Agreements

The Company is party to indemnification agreements with each of its directors that require the Company to indemnify the directors to the fullest extent permitted by Washington state law. The Company's certificate of incorporation also requires the Company to indemnify both the directors and officers of the Company to the fullest extent permitted by Washington state law.

Table of Contents**Fiscal Year 2010 Non-Employee Director Compensation Table**

Name	Fees Earned or Paid in Cash (\$)	Restricted		All other compensation (\$)	Total (\$)
		Stock Awards (\$)	Stock Options (\$)		
Mark Adams	54,250				54,250
John A. Oliva	60,500				60,500
William F. Readdy ⁽¹⁾	46,000			12,708	58,708
Sha-Chelle Manning	47,500				47,500
Total Total	208,250			12,708	220,958

(1) Mr. Readdy served as a consultant to Astrogenetix during fiscal year 2010. In November 2009, he received \$12,708 in compensation for consulting fees and for the reimbursement of expenses incurred during his consulting-related international travel.

Table of Contents**Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.**

The following table sets forth as of June 30, 2010, certain information regarding the beneficial ownership of the Company's outstanding common stock held by (i) each person known by the Company to be a beneficial owner of more than five percent of any outstanding class of the Company's capital stock, (ii) each of the Company's directors, (iii) the Company's Chief Executive Officer and four most highly compensated executive officers at the end of the Company's last completed fiscal year, and (iv) all directors and executive officers of the Company as a group. Unless otherwise described below, each of the persons listed in the table below has sole voting and investment power with respect to the shares indicated as beneficially owned by each party.

Table of Contents**Securities Authorized for Issuance Under Equity Compensation Plans.
Equity Compensation Plan Information**

Plan Name	Type	Options Authorized	(a)		(b)	(c) Number of securities remaining available at September 30, 2009 for future issuance under equity compensation plans (excluding securities reflected in column (a))
			Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights		
Plans Previously Approved by Security Holders						
1 The 1994 Plan⁽¹⁾	Common Stock Options Incentive or Non-Qualified	395,000	24,900	\$	24.53	0
2 Directors Stock Option Plan⁽²⁾	Non-Qualified Common Stock Options	50,000	15,000	\$	12.64	30,000
3 1997 Employee Stock Purchase Plan⁽³⁾	Common Stock	150,000	0		N/A	1,735
4 2008 Stock Incentive Plan⁽⁴⁾	Common options, restricted stock, stock units and other equity awards	5,500,000	705,741	\$	0.40	329,389

(1) Under the terms of the 1994 Plan, the number and price of the options granted to employees is determined by the Board of

Directors and such options vest, in most cases, incrementally over a period of four years and expire no more than ten years after the date of grant. As of October 2009, additional shares cannot be granted from the 1994 Plan.

- (2) Options under the Directors Plan vest after one year and expire seven years from the date of grant.
- (3) The Employee Stock Purchase plan allowed eligible employees to purchase shares of Common Stock of the Company at prices no less than 85% of the current market price. Company discontinued employee purchases of common stock under the plan in the fourth quarter of fiscal year 2007.
- (4) The 2008 Stock Incentive Plan authorizes the award of stock

grants, restricted stock and stock options. The number and price of the awards granted to employees is determined by the Board of Directors and such options vest, in most cases, incrementally over a period of four years and expire no more than ten years after the date of grant. As of June 30, 2010, 2,180,205 shares of unvested restricted stock were outstanding.

Table of Contents

Additional information on the Company's equity compensation plan can be found under Item 11- Executive Compensation, above.

Item 13. Certain Relationships and Related Transactions and Director Independence.

Director Independence

The Board of Directors has determined each of the following directors to be an independent director as such term is defined by Nasdaq Listing Rule 5605(a)(2):

Mark E. Adams

John A. Oliva

William F. Readdy

Sha-Chelle Manning

The Board of Directors has also determined that each member of the Audit Committee, Compensation Committee and Corporate Governance and Nominating Committee during fiscal year 2010 meet the independence requirements applicable to those Committees prescribed by Nasdaq and SEC rules.

Item 14. Principal Accounting Fees and Services.

The Company's Independent Registered Public Accounting Firm

In March 2010, the Astrotech Shareholders ratified the appointment of PMB Helin Donovan LLP as the independent registered public accounting firm to audit the Company's financial statements. There were no discussions between the Company and PMB Helin Donovan LLP regarding the application of accounting principles to specific completed or contemplated transactions, or the type of audit opinion that might be rendered on the Company's financial statements. Furthermore, no written or oral advice was provided by PMB Helin Donovan LLP that was an important factor considered by the Company in reaching a decision as to any accounting, auditing or financial reporting issue. The Company has not consulted with PMB Helin Donovan LLP regarding any matter that was either the subject of a disagreement (as defined in paragraph (a)(1)(iv) of Item 304 of Regulation S-K and the related instructions to this item) or a reportable event (as described in paragraph (a)(1)(v) of Item 304 of Regulation S-K).

Table of Contents

The following table presents fees paid or to be paid for professional audit services rendered by PMB Helin Donovan LLP for the audit of the Company's annual financial statements during the years ended June 30, 2010 and 2009. PMB Helin Donovan LLP did not provide tax or other consulting services during 2010 or 2009.

	Fiscal 2010	Fiscal 2009
Audit Fees¹	\$ 191,000	\$ 161,000
Tax Fees		
All Other Fees		
Total All Fees	\$ 191,000	\$ 161,000

- (1) Audit Fees consisted of fees billed for professional services rendered for the audit of the Company's annual financial statements and review of the interim financial statements included in quarterly reports.

Audit Committee Pre-Approval Policy

The Audit Committee is responsible for appointing, setting compensation for, and overseeing the work of PMB Helin Donovan LLP, the Company's independent registered public accountants. In order to assure that the provision of such services does not impair the auditors' independence, the Audit Committee has established a policy requiring pre-approval of all audit and permissible non-audit services to be provided by independent registered public accountants. The policy provides for the general pre-approval of specific types of services and gives detailed guidance to management as to the specific audit, audit-related, and tax services that are eligible for general pre-approval. The policy requires specific pre-approval of the annual audit engagement, most statutory or subsidiary audits, and all permissible non-audit services for which no general pre-approval exists. For both audit and non-audit pre-approvals, the Audit Committee will consider whether such services are consistent with applicable law and SEC rules and regulations concerning auditor independence.

The policy delegates to the Chairman the authority to grant certain specific pre-approvals; provided, however, that the Chairman is required to report the granting of any pre-approvals to the Audit Committee at its next regularly scheduled meeting. The policy prohibits the Audit Committee from delegating to management the Committee's responsibility to pre-approve services performed by the independent registered public accountants.
