Commission file number 1-12378

NVR, Inc.

(Exact Name of Registrant as Specified in its Charter)

Virginia

54-1394360

(State or Other Jurisdiction of Incorporation or
Organization)

(IRS Employer Identification Number)

11700 Plaza America Drive, Suite 500
Reston, Virginia

20190

(Address of Principal Executive Offices)

(Zip Code)

Registrant's telephone number, including area code: (703) 956-4000

Securities registered pursuant to Section 12(b) of the Act:

Title of each class

Name of each exchange on which registered

Common stock, par value \$0.01 per share

New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: NVR INC - Form 10-K

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12-2 of the Exchange Act. (Check One):

Large accelerated filer <input type="checkbox"/>	Accelerated filer <input type="checkbox"/>	Non-accelerated filer <input type="checkbox"/> (Do not check if a Smaller Reporting Company)	Smaller Reporting Company <input type="checkbox"/>
-----------------------------------------------------	-----------------------------------------------	----------------------------------------------------------------------------------------------------	-------------------------------------------------------

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No
The aggregate market value of the voting stock held by non-affiliates of NVR, Inc. on June 30, 2010, the last business day of NVR, Inc.'s most recently completed second fiscal quarter, was approximately \$3,693,820,000.

As of February 21, 2011 there were 5,893,203 total shares of common stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Proxy Statement of NVR, Inc. to be filed with the Securities and Exchange Commission pursuant to Regulation 14A of the Securities Exchange Act of 1934 on or prior to April 30, 2011 are incorporated by reference into Part III of this report.

PART I

Item 1. Business.

General

NVR, Inc. ("NVR") was formed in 1980 as NVHomes, Inc. Our primary business is the construction and sale of single-family detached homes, townhomes and condominium buildings. To more fully serve customers of our homebuilding operations, we also operate a mortgage banking and title services business. We conduct our homebuilding activities directly. Our mortgage banking operations are operated primarily through a wholly owned subsidiary, NVR Mortgage Finance, Inc. ("NVRM"). Unless the context otherwise requires, references to "NVR", "we", "us" or "our" include NVR and its consolidated subsidiaries.

We are one of the largest homebuilders in the United States. While we operate in multiple locations in fourteen states, primarily in the eastern part of the United States, approximately 37% of our home settlements in 2010 occurred in the Washington, D.C. and Baltimore, MD metropolitan areas, which accounted for 47% of our 2010 homebuilding revenues. Our homebuilding operations include the construction and sale of single-family detached homes, townhomes and condominium buildings under four trade names: Ryan Homes, NVHomes, Fox Ridge Homes and Rymarc Homes. The Ryan Homes, Fox Ridge Homes, and Rymarc Homes products are marketed primarily to first-time homeowners and first-time move-up buyers. The Ryan Homes product is currently sold in twenty-three metropolitan areas located in Maryland, Virginia, West Virginia, Pennsylvania, New York, North Carolina, South Carolina, Ohio, New Jersey, Delaware, Kentucky, Indiana and Florida. The Fox Ridge Homes product is sold solely in the Nashville, TN metropolitan area and the Rymarc Homes product is sold solely in the Columbia, SC metropolitan area. The NVHomes product is marketed primarily to move-up and upscale buyers and is sold in the Washington, D.C., Baltimore, MD, Philadelphia, PA and the Maryland Eastern Shore metropolitan areas. In 2010, our average price of a settled unit was approximately \$297,100.

Historically, we generally have not engaged in land development (see discussion below on our recent limited land development activities). Instead, we typically acquire finished building lots at market prices from various development entities under fixed price purchase agreements ("purchase agreements") that require deposits that may be forfeited if we fail to perform under the purchase agreement. The deposits required under the purchase agreements are in the form of cash or letters of credit in varying amounts and represent a percentage, typically ranging up to 10%, of the aggregate purchase price of the finished lots.

We believe that our lot acquisition strategy avoids the financial requirements and risks associated with direct land ownership and land development. We may, at our option, choose for any reason and at any time not to perform under these purchase agreements by delivering notice of our intent not to acquire the finished lots under contract. Our sole legal obligation and economic loss for failure to perform under these purchase agreements is limited to the amount of the deposit pursuant to the liquidated damage provision contained within the purchase agreements. We do not have any financial guarantees or completion obligations and we typically do not guarantee lot purchases on a specific performance basis under these purchase agreements. None of the creditors of any of the development entities with which we have entered these purchase agreements have recourse to our general credit. We generally seek to maintain control over a supply of lots believed to be suitable to meet our five-year business plan.

Our continued success is contingent upon our ability to control an adequate supply of finished lots on which to build and on our developers' ability to timely deliver finished lots to meet the sales demands of our customers. However, current economic conditions and the continued downturn of the homebuilding industry have exerted pressure on our developers' ability to obtain acquisition and development financing or to raise equity investments to finance land development activity, potentially constraining our supply of finished lots. This pressure has necessitated that in certain specific strategic circumstances we deviate from our historical lot acquisition strategy and engage in joint venture arrangements with land developers or directly acquire raw ground already zoned for its intended use for development. Once we acquire control of any raw ground, we will determine whether to sell the raw parcel to a developer and enter into a fixed price purchase agreement with the

developer to purchase the finished lots, or whether we will hire a developer to develop the land on our behalf. While joint venture arrangements and direct land development activity are not our preferred method of acquiring finished building lots, we may enter into additional transactions in the future on a limited basis where there exists a compelling strategic or prudent financial reason to do so. We expect, however, to continue to acquire substantially all of our finished lot inventory using fixed price purchase agreements with forfeitable deposits.

As of December 31, 2010, we controlled approximately 50,400 lots under purchase agreements with deposits in cash and letters of credit totaling approximately \$174.3 million and \$6.6 million respectively. Included in the number of controlled lots are approximately 10,300 lots for which we have recorded a contract land deposit impairment reserve of approximately \$73.5 million as of December 31, 2010. In addition, we had an aggregate investment totaling approximately \$37 million in three separate joint venture limited liability corporations (*JVs*), through which we controlled approximately 1,100 lots. Further, as of December 31, 2010, we directly acquired four separate raw parcels of land, zoned for their intended use, with a current cost basis, including development costs, of approximately \$78 million that we intend to develop into approximately 890 finished lots for use in our homebuilding operations. See Note 3 to the consolidated financial statements included herein for additional information regarding *JVs* and land under development.

In addition to building and selling homes, we provide a number of mortgage-related services through our mortgage banking operations. Through operations in each of our homebuilding markets, NVRM originates mortgage loans almost exclusively for our homebuyers. NVRM generates revenues primarily from origination fees, gains on sales of loans and title fees. NVRM sells all of the mortgage loans it closes into the secondary markets on a servicing released basis.

Segment information for our homebuilding and mortgage banking businesses is included in Note 2 in the accompanying consolidated financial statements.

Current Business Environment

During 2010 the homebuilding environment continued to be negatively impacted by economic uncertainty. The market stabilization we experienced toward the end of 2009 and into the first quarter of 2010 was negatively impacted by the April 30, 2010 expiration of the federal homebuyer tax credit. After April 30, 2010, new home sales experienced sharp declines, providing evidence that rather than increasing overall demand, the tax credit may have merely accelerated existing demand. The current home sales environment continues to be adversely impacted by high inventory levels; low consumer confidence driven by high unemployment rates; and a highly restrictive mortgage lending environment that has made it more difficult for our customers to obtain mortgage financing. For additional information and analysis of recent trends in our operations and financial condition, see *Management's Discussion and Analysis of Financial Condition and Results of Operations* in Item 7 of this Form 10-K.

Homebuilding

Products

We offer single-family detached homes, townhomes and condominium buildings with many different basic home designs. These home designs have a variety of elevations and numerous other options. Our homes combine traditional or colonial exterior designs with contemporary interior designs and amenities, generally include two to four bedrooms and range from approximately 1,000 to 7,300 square feet. During 2010, the prices at which we settled homes ranged from approximately \$97,000 to \$1.7 million and averaged approximately \$297,100. During 2009, our average price was approximately \$296,400.

Markets

Our four reportable homebuilding segments operate in the following geographic regions:

- Mid Atlantic:* Maryland, Virginia, West Virginia and Delaware
- North East:* New Jersey and eastern Pennsylvania
- Mid East:* Kentucky, New York, Ohio, western Pennsylvania and Indiana
- South East:* North Carolina, South Carolina, Florida and Tennessee

Further discussion of settlements, new orders and backlog activity by homebuilding reportable segment for each of the last three years can be found in Management's Discussion and Analysis of Financial Condition and Results of Operations in Item 7 of this Form 10-K.

Backlog

Backlog totaled 2,916 units and approximately \$1.0 billion at December 31, 2010 compared to backlog of 3,531 units and approximately \$1.1 billion at December 31, 2009. Backlog, which represents homes sold but not yet settled with the customer, may be impacted by customer cancellations for various reasons that are beyond our control, such as failure to obtain mortgage financing, inability to sell an existing home, job loss, or a variety of other reasons. In any period, a portion of the cancellations that we experience are related to new sales that occurred during the same period, and a portion are related to sales that occurred in prior periods and therefore appeared in the opening backlog for the current period. Expressed as the total of all cancellations during the period as a percentage of gross sales during the period, our cancellation rate was approximately 14%, 14% and 23% in 2010, 2009 and 2008, respectively. During 2010, 2009 and 2008, approximately 6%, 7% and 10% of a reporting quarter's opening backlog cancelled during the fiscal quarter, respectively. We can provide no assurance that our historical cancellation rates are indicative of the actual cancellation rate that may occur in future periods. See Risk Factors in Item 1A of this Form 10-K.

Construction

We utilize independent subcontractors under fixed price contracts to perform construction work on our homes. The subcontractors' work is performed under the supervision of our employees who monitor quality control. We use several independent subcontractors in our various markets and we are not dependent on any single subcontractor or on a small number of subcontractors.

Sales and Marketing

Our preferred marketing method is for customers to visit a furnished model home featuring many built-in options and a landscaped lot. The garages of these model homes are usually converted into temporary sales centers where alternative facades and floor plans are displayed and designs for other models are available for review. Sales representatives are compensated predominantly on a commission basis.

Regulation

We and our subcontractors must comply with various federal, state and local zoning, building, environmental, advertising and consumer credit statutes, rules and regulations, as well as other regulations and requirements in connection with our construction and sales activities. All of these regulations have increased the cost to produce and market our products, and in some instances, have delayed our developers' abilities to deliver us finished lots. Counties and cities in which we build homes have at times declared moratoriums on the issuance of building permits and imposed other restrictions in the areas in which sewage treatment facilities and other public facilities do not reach minimum standards. To date, restrictive zoning laws and the imposition of moratoriums have not had a material adverse effect on our construction activities. However, in certain markets in which we operate, we believe that our growth has been hampered by the longer time periods necessary for our developers to obtain the necessary governmental approvals.

Competition and Market Factors

The housing industry is highly competitive. We compete with numerous homebuilders of varying size, ranging from local to national in scope, some of which have greater financial resources than we do. We also face competition from the home resale market. Our homebuilding operations compete primarily on the basis of price, location, design, quality, service and reputation. Historically we have been one of the market leaders in each of the markets where we build homes.

The housing industry is cyclical and is affected by consumer confidence levels, prevailing economic conditions and interest rates. Other factors that affect the housing industry and the demand for new homes include the availability and the cost of land, labor and materials; changes in consumer preferences; demographic trends; and the availability of mortgage finance programs. See *Risk Factors* in Item 1A of this Form 10-K.

We are dependent upon building material suppliers for a continuous flow of raw materials. Whenever possible, we utilize standard products available from multiple sources. In the past, such raw materials have been generally available to us in adequate supply.

Mortgage Banking

We provide a number of mortgage related services to our homebuilding customers through our mortgage banking operations. Our mortgage banking operations also include separate subsidiaries that broker title insurance and perform title searches in connection with mortgage loan closings for which they receive commissions and fees. Because NVRM originates mortgage loans almost exclusively for our homebuilding customers, NVRM is dependent on our homebuilding segment. In 2010, NVRM closed approximately 8,600 loans with an aggregate principal amount of approximately \$2.2 billion as compared to approximately 8,000 loans with an aggregate principal amount of approximately \$2.1 billion in 2009.

NVRM sells all of the mortgage loans it closes to investors in the secondary markets on a servicing released basis, typically within 30 days from the loan closing. NVRM is an approved seller/servicer for FNMA, GNMA, FHLMC, VA and FHA mortgage loans.

Competition and Market Factors

NVRM's main competition comes from national, regional, and local mortgage bankers, mortgage brokers, thrifts and banks in each of these markets. NVRM competes primarily on the basis of customer service, variety of products offered, interest rates offered, prices of ancillary services and relative financing availability and costs.

Regulation

NVRM is an approved seller/servicer of FNMA, GNMA, FHLMC, FHA and VA mortgage loans, and is subject to all of those agencies' rules and regulations. These rules and regulations restrict certain activities of NVRM. NVRM is currently eligible and expects to remain eligible to participate in such programs. In addition, NVRM is subject to regulation at the state and federal level with respect to specific origination, selling and servicing practices.

Pipeline

NVRM's mortgage loans in process that have not closed (*Pipeline*) at December 31, 2010 and 2009, had an aggregate principal balance of approximately \$670 million and \$770 million, respectively. NVRM's cancellation rate was approximately 29% in 2010. During 2009 and 2008, NVRM's loan cancellation rates were approximately 35% and 49%, respectively. We can provide no assurance that our historical loan cancellation rates are indicative of the actual loan cancellation rate that may occur in future periods. See *Risk Factors* in Item 1A in this Form 10-K.

Employees

At December 31, 2010, we employed 2,822 full-time persons, of whom 1,076 were officers and management personnel, 174 were technical and construction personnel, 580 were sales personnel, 490 were administrative personnel and 502 were engaged in various other service and labor activities. None of our employees are subject to a collective bargaining agreement and we have never experienced a work stoppage. We believe that our employee relations are good.

Available Information

We file annual, quarterly and current reports, proxy statements and other information with the Securities and Exchange Commission (the "SEC"). These filings are available to the public over the Internet at the SEC's website at <http://www.sec.gov>. You may also read and copy any document we file at the SEC's public reference room located at 100 F Street, NE, Washington, DC 20549. Please call the SEC at 1-800-SEC-0330 for further information on the public reference room.

Our principal Internet website can be found at <http://www.nvrinc.com>. We make available free of charge on or through our website, access to our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports as soon as reasonably practicable after such material is electronically filed, or furnished, to the SEC.

Our website also includes a corporate governance section which contains our Corporate Governance Guidelines (which includes our Directors' Independence Standards), Code of Ethics, Board of Directors' Committee Charters for the Audit, Compensation, Corporate Governance, Nominating and Qualified Legal Compliance Committees, Policies and Procedures for the Consideration of Board of Director Candidates, Policies and Procedures Regarding Communications with the NVR, Inc. Board of Directors, the Independent Lead Director and the Non-Management Directors as a group. Additionally, amendments to and waivers from a provision of the Code of Ethics that apply to our principal executive officer, principal financial officer, principal accounting officer or persons performing similar functions will be disclosed on our website.

Item 1A. Risk Factors.

Forward-Looking Statements

Some of the statements in this Form 10-K, as well as statements made by us in periodic press releases or other public communications, constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934. Certain, but not necessarily all, of such forward-looking statements can be identified by the use of forward-looking terminology, such as believes, expects, may, will, should, or anticipates or the negative or other comparable terminology. All statements other than of historical facts are forward looking statements. Forward looking statements contained in this document include those regarding market trends, NVR's financial position, business strategy, the outcome of pending litigation, projected plans and objectives of management for future operations. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual results or performance of NVR to be materially different from future results, performance or achievements expressed or implied by the forward-looking statements. Such risk factors include, but are not limited to the following: general economic and business conditions (on both a national and regional level); interest rate changes; access to suitable financing by NVR and NVR's customers; competition; the availability and cost of land and other raw materials used by NVR in its homebuilding operations; shortages of labor; weather related slow-downs; building moratoriums; governmental regulation; fluctuation and volatility of stock and other financial markets; mortgage financing availability; and other factors over which NVR has little or no control. NVR undertakes no obligation to update such forward-looking statements.

Our business is affected by the risks generally incident to the residential construction business, including, but not limited to:

the availability of mortgage financing;

actual and expected direction of interest rates, which affect our costs, the availability of construction financing, and long-term financing for potential purchasers of homes;

the availability of adequate land in desirable locations on favorable terms;

unexpected changes in customer preferences; and

changes in the national economy and in the local economies of the markets in which we have operations.

All of these risks are discussed in detail below.

The homebuilding industry continues to experience a significant downturn. The continuation of this slowdown could adversely affect our business and our results of operations.

The homebuilding industry has continued to experience a significant downturn as a result of declining consumer confidence driven by an economic recession, high unemployment levels, affordability issues and uncertainty as to the stability of home prices. Additionally, the tightening credit markets have made it more difficult for customers to obtain financing to purchase homes. As a result, we have experienced reduced demand for new homes. Our cancellation rate was approximately 14% in both 2010 and 2009 and was 23% in 2008. These ongoing market factors have also resulted in pricing pressures and in turn gross profit margin pressure in all of our markets. A continued downturn in the homebuilding industry could result in a material adverse effect on our sales (fewer gross sales and/or higher cancellation rates), profitability, stock performance, ability to service our debt obligations and future cash flows.

If the market value of our inventory or controlled lot position declines, our profit could decrease and we may incur losses.

Inventory risk can be substantial for homebuilders. The market value of building lots and housing inventories can fluctuate significantly as a result of changing market conditions. In addition, inventory carrying costs can be significant and can result in losses in a poorly performing project or market. We must, in the ordinary course of our business, continuously seek and make acquisitions of lots for expansion into new markets as well as for replacement and expansion within our current markets, which is accomplished by us entering fixed price purchase agreements and paying forfeitable deposits under the purchase agreement to developers for the contractual right to acquire the lots. In the event of further adverse changes in economic or market conditions, we may cease further building activities in communities or restructure existing purchase agreements, resulting in forfeiture of some or all of any remaining land contract deposit paid to the developer. Either action may result in a loss which could have a material adverse effect on our profitability, stock performance, ability to service our debt obligations and future cash flows.

If the underwriting quality of our mortgage originations is found to be deficient, our profit could decrease and we may incur losses.

We originate several different loan products to our customers to finance the purchase of their home. We sell all of the loans we originate into the secondary mortgage market generally within 30 days from origination. All of the loans that we originate are underwritten to the standards and specifications of the ultimate investor. Insofar as we underwrite our originated loans to those standards, we bear no increased concentration of credit risk from the issuance of loans, except in certain limited instances where early payment default occurs. In the event that a substantial number of the loans that we have originated fall into default and the investors to whom we sold the loan determine that we did not underwrite the loan in accordance with their requirements, we could be required to repurchase the loans from the investor or indemnify the investor for any losses incurred. This may result in a loss which could have a material adverse effect on our profitability, stock performance, ability to service our debt obligations and future cash flows.

Because almost all of our customers require mortgage financing, the availability of suitable mortgage financing could impair the affordability of our homes, lower demand for our products, and limit our ability to fully deliver our backlog.

Our business and earnings depend on the ability of our potential customers to obtain mortgages for the purchase of our homes. In addition, many of our potential customers must sell their existing homes in order to buy a home from us. The tightening of credit standards and the availability of suitable mortgage financing could prevent customers from buying our homes and could prevent buyers of our customers' homes from obtaining mortgages they need to complete that purchase, both of which could result in our potential customers' inability to buy a home from us. If our potential customers or the buyers of our customers' current homes are not able to obtain suitable financing, the result could have a material adverse effect on our sales, profitability, stock performance, ability to service our debt obligations and future cash flows.

If our ability to sell mortgages to investors is impaired, we may be required to fund these commitments ourselves, or may not be able to originate loans at all.

Our mortgage segment sells all of the loans it originates into the secondary market usually within 30 days from the date of closing, and has up to approximately \$100 million available in a repurchase agreement to fund mortgage closings. In the event that disruptions to the secondary markets similar to those which occurred during 2007 and 2008 continue to tighten or eliminate the available liquidity within the secondary markets for mortgage loans, or the underwriting requirements by our secondary market investors continue to become more stringent, our ability to sell future mortgages could decline and we could be required, among other things, to fund our commitments to our buyers with our own financial resources, which is limited, or require our home buyers to find another source of financing. The result of such secondary market disruption could have a material adverse effect on our sales, profitability, stock performance, ability to service our debt obligations and future cash flows.

Interest rate movements, inflation and other economic factors can negatively impact our business.

High rates of inflation generally affect the homebuilding industry adversely because of their adverse impact on interest rates. High interest rates not only increase the cost of borrowed funds to homebuilders but also have a significant effect on housing demand and on the affordability of permanent mortgage financing to prospective purchasers. We are also subject to potential volatility in the price of commodities that impact costs of materials used in our homebuilding business. Increases in prevailing interest rates could have a material adverse effect on our sales, profitability, stock performance, ability to service our debt obligations and future cash flows.

Our financial results also are affected by the risks generally incident to our mortgage banking business, including interest rate levels, the impact of government regulation on mortgage loan originations and servicing and the need to issue forward commitments to fund and sell mortgage loans. Our homebuilding customers account for almost all of our mortgage banking business. The volume of our continuing homebuilding operations therefore affects our mortgage banking business.

Our mortgage banking business also is affected by interest rate fluctuations. We also may experience marketing losses resulting from daily increases in interest rates to the extent we are unable to match interest rates and amounts on loans we have committed to originate with forward commitments from third parties to purchase such loans. Increases in interest rates may have a material adverse effect on our mortgage banking revenue, profitability, stock performance, ability to service our debt obligations and future cash flows.

Our operations may also be adversely affected by other economic factors within our markets such as negative changes in employment levels, job growth, and consumer confidence and availability of mortgage financing, one or all of which could result in reduced demand or price depression from current levels. Such negative trends could have a material adverse effect on homebuilding operations.

These factors and thus, the homebuilding business, have at times in the past been cyclical in nature. Any downturn in the national economy or the local economies of the markets in which we operate could have a material adverse effect on our sales, profitability, stock performance and ability to service our debt obligations. In particular, approximately 37% of our home settlements during 2010 occurred in the Washington, D.C. and Baltimore, MD metropolitan areas, which accounted for 47% of our homebuilding revenues in 2010. Thus, we are dependent to a significant extent on the economy and demand for housing in those areas.

Our inability to secure and control an adequate inventory of lots could adversely impact our operations.

The results of our homebuilding operations are dependent upon our continuing ability to control an adequate number of homebuilding lots in desirable locations. There can be no assurance that an adequate supply of building lots will continue to be available to us on terms similar to those available in the past, or that we will not be required to devote a greater amount of capital to controlling building lots than we have historically. An insufficient supply of building lots in one or more of our markets, an inability of our developers to deliver finished lots in a timely fashion due to their inability to secure financing to fund development activities or for other reasons, or our inability to purchase or finance building lots on reasonable terms could have a material adverse effect on our sales, profitability, stock performance, ability to service our debt obligations and future cash flows.

Volatility in the credit and capital markets may impact our ability to access necessary financing.

Our homebuilding operations are dependent in part on the availability and cost of working capital financing, and may be adversely affected by a shortage or an increase in the cost of such financing. If we require working capital greater than that provided by our operations, we may be required to seek to obtain alternative financing. No assurance can be given that additional financing will be available on terms that are favorable or acceptable. In addition, the credit and capital markets are experiencing significant volatility that is difficult to predict. If we are required to seek financing to fund our working capital requirements, continued volatility in these markets may restrict our flexibility to access financing. If we are at any time unsuccessful in obtaining sufficient capital to fund our planned homebuilding expenditures, we may experience a substantial delay in the completion of any homes then under construction, or we may be unable to control or purchase finished building lots. Any delay could result in cost increases and could have a material adverse effect on our sales, profitability, stock performance, ability to service our debt obligations and future cash flows.

Our mortgage banking operations are dependent on the availability, cost and other terms of mortgage financing facilities, and may be adversely affected by any shortage or increased cost of such financing. No assurance can be given that any additional or replacement financing will be available on terms that are favorable or acceptable. Our mortgage banking operations are also dependent upon the securitization market for mortgage-backed securities, and could be materially adversely affected by any fluctuation or downturn in such market.

Our current indebtedness may impact our future operations.

Our existing indebtedness contains financial and other restrictive covenants and any future indebtedness may also contain covenants. These covenants include, or could include, limitations on our ability, and the ability of our subsidiaries, to incur additional indebtedness, pay cash dividends and make distributions, make loans and investments, enter into transactions with affiliates, effect certain asset sales, incur certain liens, merge or consolidate with any other person, or transfer all or substantially all of our properties and assets. Substantial losses by us or other action or inaction by us or our subsidiaries could result in the violation of one or more of these covenants which could result in decreased liquidity or a default on our current or future indebtedness, thereby having a material adverse effect on our sales, profitability, stock performance, ability to service our debt obligations and future cash flows.

Government regulations and environmental matters could negatively affect our operations.

We are subject to various local, state and federal statutes, ordinances, rules and regulations concerning zoning, building design, construction and similar matters, including local regulations that impose restrictive zoning and density requirements in order to limit the number of homes that can eventually be built within the boundaries of a particular area. These regulations may further increase the cost to produce and market our products. In addition, we have from time to time been subject to, and may also be subject in the future to, periodic delays in our homebuilding projects due to building moratoriums in the areas in which we operate. Changes in regulations that restrict homebuilding activities in one or more of our principal markets could have a material adverse effect on our sales, profitability, stock performance, ability to service our debt obligations and future cash flows.

We are also subject to a variety of local, state and federal statutes, ordinances, rules and regulations concerning the protection of health and the environment. We are subject to a variety of environmental conditions that can affect our business and our homebuilding projects. The particular environmental laws that apply to any given homebuilding site vary greatly according to the location and environmental condition of the site and the present and former uses of the site and adjoining properties. Environmental laws and conditions may result in delays, cause us to incur substantial compliance and other costs, or prohibit or severely restrict homebuilding activity in certain environmentally sensitive regions or areas, thereby adversely affecting our sales, profitability, stock performance, ability to service our debt obligations and future cash flows.

In addition, the Dodd-Frank Wall Street Reform and Consumer Protection Act, enacted on July 21, 2010, contains numerous provisions affecting residential mortgages and mortgage lending practices. Because these provisions are to be implemented through future rulemaking, the ultimate impact of such provisions on lending institutions, including our mortgage banking subsidiary, will depend on how the implementing rules are written.

We are an approved seller/servicer of FNMA, GNMA, FHLMC, FHA and VA mortgage loans, and are subject to all of those agencies' rules and regulations. Any significant impairment of our eligibility to sell/service these loans could have a material adverse impact on our mortgage operations. In addition, we are subject to regulation at the state and federal level with respect to specific origination, selling and servicing practices including the Real Estate Settlement and Protection Act. Adverse changes in governmental regulation may have a negative impact on our mortgage loan origination business.

We face competition in our housing and mortgage banking operations.

The homebuilding industry is highly competitive. We compete with numerous homebuilders of varying size, ranging from local to national in scope, some of whom have greater financial resources than we do. We face competition:

for suitable and desirable lots at acceptable prices;

from selling incentives offered by competing builders within and across developments; and

from the existing home resale market.

Our homebuilding operations compete primarily on the basis of price, location, design, quality, service and reputation.

The mortgage banking industry is also competitive. Our main competition comes from national, regional and local mortgage bankers, thrifts, banks and mortgage brokers in each of these markets. Our mortgage banking operations compete primarily on the basis of customer service, variety of products offered, interest rates offered, prices of ancillary services and relative financing availability and costs.

There can be no assurance that we will continue to compete successfully in our homebuilding or mortgage banking operations. An inability to effectively compete may have an adverse impact on our sales, profitability, stock performance, ability to service our debt obligations and future cash flows.

A shortage of building materials or labor, or increases in materials or labor costs may adversely impact our operations.

The homebuilding business has from time to time experienced building material and labor shortages, including shortages in insulation, drywall, certain carpentry work and concrete, as well as fluctuating lumber prices and supply. In addition, high employment levels and strong construction market conditions could restrict the labor force available to our subcontractors and us in one or more of our markets. Significant increases in costs resulting from these shortages, or delays in construction of homes, could have a material adverse effect upon our sales, profitability, stock performance, ability to service our debt obligations and future cash flows.

Product liability litigation and warranty claims may adversely impact our operations.

Construction defect and home warranty claims are common and can represent a substantial risk for the homebuilding industry. The cost of insuring against construction defect and product liability related claims, as well as the claims themselves, can be high. In addition, insurance companies limit coverage offered to protect against these claims. Further restrictions on coverage availability, or significant increases in premium costs or claims, could have a material adverse effect on our financial results.

We are subject to litigation proceedings that could harm our business if an unfavorable ruling were to occur.

From time to time, we may become involved in litigation and other legal proceedings relating to claims arising from our operations in the normal course of business. As described in, but not limited to, Part I, Item 3, *Legal Proceedings* of this Form 10-K, we are currently subject to certain legal proceedings. Litigation is subject to inherent uncertainties, and unfavorable rulings may occur. We cannot assure you that these or other litigation or legal proceedings will not materially affect our ability to conduct our business in the manner that we expect or otherwise adversely affect us should an unfavorable ruling occur.

Weather-related and other events beyond our control may adversely impact our operations.

Extreme weather or other events, such as significant snowfalls, hurricanes, tornadoes, earthquakes, forest fires, floods, terrorist attacks or war, may affect our markets, our operations and our profitability. These events may impact our physical facilities or those of our suppliers or subcontractors, causing us material increases in costs, or delays in construction of homes, which could have a material adverse effect upon our sales, profitability, stock performance, ability to service our debt obligations and future cash flows.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

Our corporate offices are located in Reston, Virginia, where we currently lease approximately 61,000 square feet of office space. The current corporate office lease expires in April 2015.

In connection with the operation of the homebuilding segment, we lease manufacturing facilities in the following six locations: Thurmont, Maryland; Burlington County, New Jersey; Farmington, New York; Kings Mountain, North Carolina; Darlington, Pennsylvania; and Portland, Tennessee. These facilities range in size from approximately 40,000 square feet to 400,000 square feet and combined total approximately 1 million square feet of manufacturing space. Each of these leases contains various options for extensions of the lease and

for the purchase of the facility. The Portland, Thurmont and Farmington leases expire in 2014, and the Kings Mountain and Burlington County leases expire in 2022 and 2023, respectively. The Darlington lease expires in 2025. We expect to purchase a new manufacturing facility in the first quarter of 2011 in Dayton, OH. The new facility will contain approximately 100,000 square feet of manufacturing space and production from the Dayton facility is expected to begin by the end of 2011. Due to the economic downturn and the related decline in our homebuilding activity, our current plant utilization has dropped to approximately 40% of total capacity.

We also, in connection with both our homebuilding and mortgage banking businesses, lease office space in multiple locations for homebuilding divisional offices and mortgage banking and title services branches under leases expiring at various times through 2018, none of which are individually material to our business. We anticipate that, upon expiration of existing leases, we will be able to renew them or obtain comparable facilities on terms acceptable to us.

Item 3. Legal Proceedings.

On July 18, 2007, former and current employees filed lawsuits against the Company in the Court of Common Pleas in Allegheny County, Pennsylvania and Hamilton County, Ohio, in Superior Court in Durham County, North Carolina, and in the Circuit Court in Montgomery County, Maryland, and on July 19, 2007 in the Superior Court in New Jersey, alleging that we incorrectly classified our sales and marketing representatives as being exempt from overtime wages. These lawsuits are similar in nature to another lawsuit filed on October 29, 2004 by another former employee in the United States District Court for the Western District of New York. The complaints seek injunctive relief, an award of unpaid wages, including fringe benefits, liquidated damages equal to the overtime wages allegedly due and not paid, attorney and other fees and interest, and where available, multiple damages. The suits were filed as purported class actions. However, while a number of individuals have filed consents to join and assert federal claims in the New York action, none of the groups of employees that the lawsuits purport to represent have been certified as a class. The lawsuits filed in Ohio, Pennsylvania, Maryland, New Jersey and North Carolina have been stayed pending further developments in the New York action.

We believe that our compensation practices in regard to sales and marketing representatives are entirely lawful and in compliance with two letter rulings from the United States Department of Labor (DOL) issued in January 2007. The two courts to most recently consider similar claims against other homebuilders have acknowledged the DOL s position that sales and marketing representatives were properly classified as exempt from overtime wages and the only court to have directly addressed the exempt status of such employees concluded that the DOL s position was valid. Accordingly, we have vigorously defended and intend to continue to vigorously defend these lawsuits. Because we are unable to determine the likelihood of an unfavorable outcome of this case, or the amount of damages, if any, we have not recorded any associated liabilities in the accompanying condensed, consolidated balance sheets.

In June 2010, we received a Request for Information from the United States Environmental Protection Agency (the EPA) pursuant to Section 308 of the Clean Water Act. The request seeks information about storm water discharge practices in connection with homebuilding projects completed or underway by us. We have been cooperating with this request, have provided information to the EPA and intend to continue cooperating with the EPA s inquiries. At this time, we cannot predict the outcome of this inquiry, nor can we reasonably estimate the potential costs that may be associated with its eventual resolution.

In April 2010, NVRM received a Report of Examination (ROE) from the Office of the Commissioner of Banks of the State of North Carolina (the NCCOB) reporting certain findings that resulted from the NCCOB s examination of selected files relating to loans originated by us in North Carolina between August 1, 2006 and August 31, 2009. The ROE alleged that certain of the loan files reflected violations of North Carolina and/or U.S. lending or consumer protection laws. The ROE requested that we correct or otherwise address the alleged violations and in some instances requested that we undertake an examination of all of our other loans in North Carolina to determine whether similar alleged violations may have occurred, and if so, to take corrective action. We responded to the ROE by letter dated June 10, 2010, contesting the findings and allegations, providing factual information to correct certain of the findings, and refuting the NCCOB s interpretation of applicable law. On November 15, 2010, the NCCOB provided a written response to our June 10, 2010 letter

closing certain alleged violations while reasserting certain others. On January 12, 2011, we responded to the NCCOB's November 15, 2010 letter providing additional factual information to address the remaining findings and refuting the NCCOB's interpretation of applicable law. Accordingly, while the outcome of the matter is currently not determinable, we do not expect resolution of the matter to have a material adverse effect on our financial position.

We are also involved in various other litigation arising in the ordinary course of business. In the opinion of management, and based on advice of legal counsel, this litigation is not expected to have a material adverse effect on our financial position or results of operations.

Item 4. [Removed and Reserved].

Executive Officers of the Registrant

Name	Age	Positions
Paul C. Saville	55	President and Chief Executive Officer of NVR
Robert A. Goethe	56	President of NVRM
Dennis M. Seremet	56	Senior Vice President, Chief Financial Officer and Treasurer of NVR
Robert W. Henley	44	Vice President and Controller of NVR

Paul C. Saville was named President and Chief Executive Officer of NVR, effective July 1, 2005. Prior to July 1, 2005, Mr. Saville had served as Senior Vice President Finance, Chief Financial Officer and Treasurer of NVR since September 30, 1993 and Executive Vice President from January 1, 2002 through June 30, 2005.

Robert A. Goethe was named President of NVRM effective January 25, 2010. From 2008 until January, 2010, Mr. Goethe served as a Senior Principal of Mortgage Connect Corp. From 2006 to 2008, Mr. Goethe served as the Senior Executive Vice President of Regions Mortgage Corporation, and from 1996 until 2006, he served as the Chief Executive Officer of Regions Financial Corporation.

Dennis M. Seremet was named Vice President, Chief Financial Officer and Treasurer of NVR, effective July 1, 2005 and Senior Vice President effective December 14, 2007. Prior to July 1, 2005, Mr. Seremet had been Vice President and Controller of NVR since April 1, 1995.

Robert W. Henley was named Vice President and Controller of NVR effective July 1, 2005. From May 2000 to June 30, 2005, Mr. Henley was the Assistant Controller.

PART II**Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.**

Our shares of common stock are listed and principally traded on the New York Stock Exchange. The following table sets forth the high and low prices per share for our common stock for each fiscal quarter during the years ended December 31, 2010 and 2009:

	HIGH	LOW
Prices per Share:		
2010		
Fourth Quarter	\$699.28	\$611.50
Third Quarter	\$680.05	\$595.00
Second Quarter	\$769.50	\$627.43
First Quarter	\$759.27	\$655.00
2009		
Fourth Quarter	\$742.00	\$607.00
Third Quarter	\$698.28	\$477.41
Second Quarter	\$533.89	\$416.24
First Quarter	\$500.05	\$310.69

As of the close of business on February 21, 2011, there were 364 shareholders of record.

We have never paid a cash dividend on our shares of common stock.

We had one repurchase authorization outstanding during the quarter ended December 31, 2010. On July 29, 2010 (July Authorization), we publicly announced the Board of Directors' approval for us to repurchase up to an aggregate of \$300 million of our common stock in one or more open market and/or privately negotiated transactions. The July Authorization does not have an expiration date. The following table provides information regarding common stock repurchases for the quarter ended December 31, 2010:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs
October 1 - 31, 2010				\$148,986,000
November 1 - 30, 2010	52,216	\$627.94	52,216	\$116,198,000
December 1 - 31, 2010	11,300	\$619.33	11,300	\$109,200,000
Total	63,516	\$626.41	63,516	

Stock Performance Graph

COMPARISON OF CUMULATIVE TOTAL EQUITYHOLDER RETURN ON EQUITY

The following chart graphs our performance in the form of cumulative total return to holders of our Common Stock since December 31, 2005 in comparison to the Dow/Home Construction Index and the Dow Jones Industrial Index for that same period. The Dow/Home Construction Index is comprised of NVR, Inc., Pulte Homes, Inc., DR Horton, Inc., Lennar Corp., Toll Brothers, Inc., MDC Holdings, Inc., KB Home, Ryland Group, Inc., Meritage Homes Corp., Standard Pacific Corp., Skyline Corp. and M/I Homes, Inc.

Assumes that \$100 was invested in NVR stock and the indices on December 31, 2005.

Item 6. Selected Financial Data.

(dollars in thousands, except per share amounts)

The following tables set forth selected consolidated financial data. The selected income statement and balance sheet data have been derived from our consolidated financial statements for each of the periods presented and is not necessarily indicative of results of future operations. The selected financial data should be read in conjunction with, and is qualified in its entirety by, the consolidated financial statements and related notes included elsewhere in this report.

	Year Ended December 31,				
	2010	2009	2008	2007	2006
Consolidated Income Statement Data:					
<i>Homebuilding data:</i>					
Revenues	\$2,980,758	\$2,683,467	\$3,638,702	\$5,048,187	\$6,036,236
Gross profit	542,466	497,734	457,692	821,128	1,334,971
<i>Mortgage Banking data:</i>					
Mortgage banking fees	61,134	60,381	54,337	81,155	97,888
Interest income	5,411	2,979	3,955	4,900	7,704
Interest expense	1,126	1,184	754	681	2,805
<i>Consolidated data:</i>					
Income from continuing operations	\$ 206,005	\$ 192,180	\$ 100,892	\$ 333,955	\$ 587,412
Income from continuing operations per diluted share (1)	\$ 33.42	\$ 31.26	\$ 17.04	\$ 54.14	\$ 88.05

	December 31,				
	2010	2009	2008	2007	2006
Consolidated Balance Sheet Data:					
Homebuilding inventory	\$ 431,329	\$ 418,718	\$ 400,570	\$ 688,854	\$ 733,616
Contract land deposits, net	100,786	49,906	29,073	188,528	402,170
Total assets	2,260,061	2,395,770	2,103,236	2,194,416	2,473,808
Notes and loans payable	92,089	147,880	210,389	286,283	356,632
Shareholders' equity	1,740,374	1,757,262	1,373,789	1,129,375	1,152,074
Cash dividends per share					

(1) For the years ended December 31, 2010, 2009, 2008, 2007 and 2006, income from continuing operations per diluted share was computed based on 6,164,617; 6,148,769; 5,920,285; 6,167,795 and 6,671,571 shares, respectively, which represents the weighted average number of shares and share equivalents outstanding for each year.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

(dollars in thousands, except per share data)

Results of Operations for the Years Ended December 31, 2010, 2009 and 2008

Overview

Business

Our primary business is the construction and sale of single-family detached homes, townhomes and condominium buildings, all of which are primarily constructed on a pre-sold basis. To fully serve customers of our homebuilding operations, we also operate a mortgage banking and title services business. We primarily conduct our operations in mature markets. Additionally, we generally grow our business through market share gains in our existing markets and by expanding into markets contiguous to our current active markets. Our four homebuilding reportable segments consist of the following regions:

Mid Atlantic: Maryland, Virginia, West Virginia and Delaware

North East: New Jersey and eastern Pennsylvania

Mid East: Kentucky, New York, Ohio, western Pennsylvania and Indiana

South East: North Carolina, South Carolina, Tennessee and Florida

Our lot acquisition strategy is predicated upon avoiding the financial requirements and risks associated with direct land ownership and development. Historically, we have not engaged in land development to obtain finished lots for use in our homebuilding operations. Instead, we have acquired finished lots at market prices from various third party land developers pursuant to fixed price purchase agreements. These purchase agreements require deposits, typically ranging up to 10% of the aggregate purchase price of the finished lots, in the form of cash or letters of credit that may be forfeited if we fail to perform under the purchase agreement. This strategy has allowed us to maximize inventory turnover, which we believe enables us to minimize market risk and to operate with less capital, thereby enhancing rates of return on equity and total capital.

Our continued success is contingent upon our ability to control an adequate supply of finished lots on which to build and on our developers' ability to timely deliver finished lots to meet the sales demands of our customers. However, current economic conditions and the continued downturn of the homebuilding industry have exerted pressure on our developers' ability to obtain acquisition and development financing or to raise equity investments to finance land development activity, potentially constraining our supply of finished lots. This pressure has necessitated that in certain specific strategic circumstances we deviate from our historical lot acquisition strategy and engage in joint venture arrangements with land developers or directly acquire raw ground already zoned for its intended use for development. Once we acquire control of any raw ground, we will determine whether to sell the raw parcel to a developer and enter into a fixed price purchase agreement with the developer to purchase the finished lots, or whether we will hire a developer to develop the land on our behalf. While joint venture arrangements and direct land development activity are not our preferred method of acquiring finished building lots, we may enter into additional transactions in the future on a limited basis where there exists a compelling strategic or prudent financial reason to do so. We expect, however, to continue to acquire substantially all of our finished lot inventory using fixed price purchase agreements with forfeitable deposits.

As of December 31, 2010, we controlled approximately 50,400 lots under purchase agreements with deposits in cash and letters of credit totaling approximately \$174,300 and \$6,600, respectively. In addition, we controlled approximately 1,100 lots through joint ventures. Included in the number of controlled lots are approximately 10,300 lots for which we have recorded a contract land deposit impairment reserve of approximately \$73,500 as of December 31, 2010. See Note 3 to the consolidated financial statements included herein for additional information regarding contract land deposits. Further, as of December 31, 2010, we had approximately \$78,000 in land under development, that once fully developed will result in approximately 890 lots.

In addition to constructing homes primarily on a pre-sold basis and utilizing what we believe is a conservative lot acquisition strategy, we focus on obtaining and maintaining a leading market position in each market we serve. This strategy allows us to gain valuable efficiencies and competitive advantages in our markets, which we believe contributes to minimizing the adverse effects of regional economic cycles and provides growth opportunities within these markets.

Current Business Environment

The homebuilding environment in 2010 remained challenging as it continued to be impacted by the economic downturn that began several years prior. The market stabilization we had experienced toward the end of 2009 and into the first quarter of 2010 was negatively impacted by the April 30, 2010 expiration of the federal homebuyer tax credit. After April 30, 2010, new home sales experienced sharp declines, providing evidence that rather than increasing overall demand, the tax credit may have merely accelerated existing demand. The current home sales environment continues to be adversely impacted by high inventory levels, low consumer confidence driven by high unemployment rates, and a highly restrictive mortgage lending environment that has made it more difficult for our customers to obtain mortgage financing. Our new orders for 2010 remained flat with new orders in 2009, however, new housing demand declined in both the third and fourth quarters of 2010 from the higher new order results experienced in the first two quarters of 2010. In addition, cancellation rates increased to 18% in both the third and fourth quarters of 2010, compared to 14% and 15% in the third and fourth quarters of 2009, respectively, and 12% in the second quarter of 2010.

Consolidated revenues totaled \$3,041,892 for 2010, an increase of 11% from \$2,743,848 in 2009. The increase in revenues was driven by increased home settlements primarily resulting from the expiration of the federal homebuyer tax credit in the second quarter of 2010. Net income and diluted earnings per share in 2010 each increased 7% from 2009. Gross profit margins within our homebuilding business declined slightly to 18.2% in 2010 from 18.5% in 2009.

Although we believe we have once again begun to experience some pricing stabilization in several of our markets as we enter 2011, we believe that significant economic uncertainties remain which could result in continued sales and pricing pressure over the next several quarters. In addition, the Dodd-Frank Wall Street Reform and Consumer Protection Act, enacted on July 21, 2010, contains numerous provisions affecting residential mortgages and mortgage lending practices. Because these provisions are to be implemented through future rulemaking, the ultimate impact of such provisions on lending institutions, including our mortgage banking subsidiary, will depend on how the implementing rules are written.

Despite these ongoing economic uncertainties, we believe that we are well positioned to take advantage of opportunities that may arise due to the strength of our balance sheet and liquidity. As of December 31, 2010, our cash and cash equivalents balance totaled approximately \$1,200,000. In addition, during 2010, we redeemed the remaining \$133,370 of our outstanding senior notes upon their maturity and repurchased approximately \$417,080 of our common stock.

Homebuilding Operations

The following table summarizes the results of our consolidated homebuilding operations and certain operating activity for each of the last three years:

	Year Ended December 31,		
	2010	2009	2008
Revenues	\$2,980,758	\$2,683,467	\$3,638,702
Cost of sales	\$2,438,292	\$2,185,733	\$3,181,010
Gross profit margin percentage	18.2%	18.5%	12.6%
Selling, general and administrative expenses	\$ 257,394	\$ 233,152	\$ 308,739
Settlements (units)	10,030	9,042	10,741
Average settlement price	\$ 297.1	\$ 296.4	\$ 338.4
New orders (units)	9,415	9,409	8,760
Average new order price	\$ 304.0	\$ 292.7	\$ 311.3
Backlog (units)	2,916	3,531	3,164
Average backlog price	\$ 328.6	\$ 304.9	\$ 316.9
New order cancellation rate	14%	14%	23%

Consolidated Homebuilding Revenues

Homebuilding revenues for 2010 increased 11% from 2009, as a result of an 11%, or 988 unit, increase in the number of homes settled. The increase in the number of homes settled was primarily attributable to the impact of the federal homebuyer tax credit which resulted in strong first quarter sales and increased settlements through the second quarter of 2010 as compared to the same period in 2009. In addition, the increase in settlements was also favorably impacted by a 12% higher beginning backlog unit balance entering 2010 compared to the same period in 2009. Homebuilding revenues for 2009 decreased 26% from 2008, as a result of a 16%, or 1,699 unit, decrease in the number of homes settled and a 12% decrease in the average settlement price. The decrease in the number of units settled was primarily attributable to our beginning backlog units being approximately 39%, or 1,981 units, lower entering 2009 compared to the backlog unit balance entering 2008, offset partially by a higher backlog turnover rate period over period. Average settlement prices were impacted primarily by a 15% lower

average price of homes in the beginning backlog entering 2009 compared to the same period in 2008, coupled with a 9% decline in the average sales price of new orders for the first six months of 2009 as compared to the same period in 2008.

Consolidated Homebuilding New Orders

New orders in 2010 remained flat with 2009 new orders, while the average sales price of new orders increased 4% year over year. New orders remained flat despite a strong first quarter in 2010, driven we believe by the federal homebuyer tax credit, and increased sales in the Indianapolis, IN, Orlando, FL and Raleigh, NC markets, each of which began operations in the second half of 2009. Since the first quarter of 2010, we experienced a consistent decline in the number of new orders across all of our markets in each of the second, third and fourth quarters of 2010 compared to the respective periods in 2009. The increase in the average price of new orders was attributable to a product mix shift away from our attached products to our detached product which generally sell at higher price points. We expect to continue to face selling pressure over the next several quarters due to continuing economic uncertainties, including low consumer confidence and high unemployment rates, as discussed in the Overview section above.

New orders in 2009 increased by 7% compared to 2008, while the average sales price of new orders decreased 6% year over year. The increase in new orders in 2009 was in part attributable to a 47% increase in new orders in the fourth quarter of 2009 compared to the same period in 2008, a period in which we experienced a significant drop-off in new orders due to a sharp decline in overall economic conditions. In addition, new orders in 2009 were favorably impacted by higher absorption rates, offsetting the 17% decrease in the average number of active communities year over year. We believe new orders in 2009 were also favorably impacted by the first-time homebuyer federal tax credit as well as by a decrease in the cancellation rate to 14% in 2009 from 23% in 2008. During 2009, to meet affordability issues in many of our markets, we altered our product offerings to provide smaller, lower priced products.

Consolidated Homebuilding Gross Profit

Gross profit margins in 2010 declined slightly to 18.2% from 18.5% in 2009. Gross profit margins in 2010 were negatively impacted by a contract land deposit impairment charge of approximately \$4,300, or 14 basis points, while 2009 gross profit margins were favorably impacted by the recovery of approximately \$6,500, or 24 basis points, of contract land deposits previously determined to be uncollectible. We expect to experience gross profit margin pressure over at least the next several quarters due to significant market uncertainties as discussed in the *Overview* section above.

Gross profit margins in 2009 improved to 18.5% compared to 12.6% in 2008 primarily due to a favorable variance in contract land deposit impairment charges year over year. In 2009 we recognized the recovery of approximately \$6,500, or 24 basis points, of contract land deposits previously determined to be uncollectible. In 2008 we recognized a contract land deposit impairment charge of approximately \$165,000, or 454 basis points. Gross profit margins in 2009 were also favorably impacted as a result of us exiting a significant number of poor performing communities in 2008 which were producing lower gross profit margins. In addition, gross profit margins in 2009 were favorably impacted by lower lumber and certain other commodity costs as well as by cost control measures implemented to reduce subcontractor and material costs in prior periods.

Consolidated Homebuilding Selling, General and Administrative (SG&A)

SG&A expenses in 2010 increased approximately \$24,200 compared to 2009, but remained flat as a percentage of revenue year over year. The increase in SG&A expenses was attributable to an approximate \$13,500 increase in stock-based compensation costs in 2010 compared to the same period in 2009, due to the grant of non-qualified stock options and restricted share units under the 2010 Equity Incentive Plan, offset partially by a reversal of approximately \$6,600 in stock-based compensation expense previously recorded to SG&A expense as we adjusted our stock option forfeiture estimates to our actual forfeiture experience. SG&A expense was also higher due to an approximate \$5,600 increase in management incentive costs as 2009 incentive

plans were limited to payouts of 50% of incentive earned, while no similar restrictions are imposed on 2010 incentive compensation. In addition, SG&A expenses were impacted by an approximate \$7,600 increase in selling and marketing costs year over year due primarily to an approximate \$5,700 increase in advertising and model home costs attributable in part to an increase in the average number of active communities to 371 communities in 2010 from 355 communities in 2009.

SG&A expenses in 2009 decreased approximately \$75,600 compared to 2008, but increased slightly as a percentage of revenue to 8.7% in 2009 from 8.5% in 2008. The decrease in SG&A expenses was primarily attributable to a \$36,300 decrease in selling and marketing costs in 2009 compared to 2008 due to a 17% decrease in the average number of active communities year over year to 355 in 2009 from 427 in 2008. In addition, personnel costs were down approximately \$26,900 due primarily to 24% decrease in average staffing levels year over year.

Consolidated Homebuilding Backlog

Backlog units and dollars decreased approximately 17% to 2,916 and 11% to \$958,287, respectively, as of December 31, 2010 compared to 3,531 and \$1,076,437 as of December 31, 2009. The decrease in backlog units was primarily attributable to the increased settlement activity in 2010 as discussed above. Backlog dollars were negatively impacted by the decrease in backlog units.

Backlog, which represents homes sold but not yet settled with the customer, may be impacted by customer cancellations for various reasons that are beyond our control, such as failure to obtain mortgage financing, inability to sell an existing home, job loss, or a variety of other reasons. In any period, a portion of the cancellations that we experience are related to new sales that occurred during the same period, and a portion are related to sales that occurred in prior periods and therefore appeared in the opening backlog for the current period. Expressed as the total of all cancellations during the period as a percentage of gross sales during the period, our cancellation rate was approximately 14% in both 2010 and 2009, and 23% in 2008. During 2010, 2009 and 2008, approximately 6%, 7% and 10% of a reporting quarter's opening backlog cancelled during the fiscal quarter, respectively. We can provide no assurance that our historical cancellation rates are indicative of the actual cancellation rate that may occur in future periods. See Risk Factors in Item 1A of this Report.

Backlog units and dollars were 3,531 and \$1,076,437, respectively, as of December 31, 2009 compared to 3,164 and \$1,002,795 as of December 31, 2008. Net new order and settlement activity during 2009 resulted in the increase in backlog units year over year. The 7% increase in backlog dollars was primarily attributable to the 12% increase in backlog units offset partially by a 4% decrease in the average price of homes in ending backlog.

Consolidated Homebuilding Other Charges

We reassessed our goodwill and intangible asset balances for impairment in the fourth quarter of 2008, as a result of the continuing declines in new orders and backlog in 2008, and the continuing deterioration of the homebuilding environment in each of our markets spurred further in 2008 by the credit crisis in the latter part of 2008. As a result of that assessment, we determined that the goodwill and intangible assets related to our Rymarc Homes and Fox Ridge Homes operations were fully impaired and we wrote-off a total of \$11,686 related to such assets in 2008. We completed the annual assessment of the intangible asset balance in 2010 and 2009 and determined that there was no impairment. See Note 1 in the accompanying consolidated financial statements included herein for further discussion of intangible assets.

Reportable Homebuilding Segments

Homebuilding profit before tax includes all revenues and income generated from the sale of homes, less the cost of homes sold, SG&A expenses, and a corporate capital allocation charge determined at the corporate headquarters. The corporate capital allocation charge eliminates in consolidation, is based on the segment's average net assets employed, and is charged using a consistent methodology in the years presented. The corporate capital allocation charged to the operating segment allows the Chief Operating Decision Maker to determine whether the operating segment's results are providing the desired rate of return after covering our cost

of capital. We record charges on contract land deposits when we determine that it is probable that recovery of the deposit is impaired. For segment reporting purposes, impairments on contract land deposits are generally charged to the operating segment upon the determination to terminate a finished lot purchase agreement with the developer or to restructure a lot purchase agreement resulting in the forfeiture of the deposit. We evaluate our entire net contract land deposit portfolio for impairment each quarter. For additional information regarding our contract land deposit impairment analysis, see the *Critical Accounting Policies* section within this Management Discussion and Analysis. For presentation purposes below, the contract land deposit reserve at December 31, 2010, 2009 and 2008, respectively, has been allocated to the reportable segments to show contract land deposits on a net basis. The net contract land deposit balances below also includes approximately \$6,600, \$4,900 and \$5,400 at December 31, 2010, 2009 and 2008, respectively, of letters of credit issued as deposits in lieu of cash. The following tables summarize certain homebuilding operating activity by reportable segment for each of the last three years:

Selected Segment Financial Data:

	Year Ended December 31,

**Mid Atlantic
2010 versus 2009**

The Mid Atlantic segment had an approximate \$23,600, or 13%, increase in segment profit in 2010 compared to 2009. Revenues increased approximately \$119,300, or 7%, in 2010 from 2009 on a 7% increase in the number of units settled. The increase in units settled was attributable to the impact of the federal homebuyer tax credit which we believe resulted in higher first quarter sales and increased settlements through the second quarter of 2010 as compared to the same period in 2009. In addition, 2010 settlements were also favorably impacted by a 5% higher beginning backlog unit balance entering 2010 as compared to 2009. The segment's

gross profit margin percentage increased to 19.0% in 2010 from 18.5% in 2009. Segment profit and gross profit margins were favorably impacted by lower contract land deposit impairment charges in 2010 of \$9,150, or 51 basis points, compared to \$18,425, or 111 basis points in 2009.

Segment new orders in 2010 declined approximately 1%, while the average sales price of new orders in 2010 increased approximately 5%, as compared to new orders and the average sales price in 2009. The increase in the average price of new orders was attributable to a product mix shift away from our attached products to our detached product which generally sell at higher price points.

2009 versus 2008

The Mid Atlantic segment had an approximate \$82,200, or 79%, increase in segment profit in 2009 compared to 2008. Revenues for the Mid Atlantic segment, which represents approximately 62% of total homebuilding revenues for the year, decreased approximately \$500,500, or 23%, in 2009 compared to 2008. Revenues declined due to a 10%, or 518 unit, decrease in units settled and a 15% decrease in the average settlement price of homes in 2009 compared to 2008. The decrease in units settled is attributable to a 35%, or 950 unit, lower backlog balance at the beginning of 2009 compared to the same period in 2008, offset partially by a higher backlog turnover rate year over year. The decrease in the average settlement price was primarily attributable to a 17% lower average price of homes in the beginning backlog year over year, coupled with a 9% decline in the average sales price of new orders for the first six months of 2009 as compared to the same period in 2008. The segment's gross profit margin percentage increased to 18.5% in 2009 from 13.6% in 2008. Gross profit margins were favorably impacted by lower contract land deposit impairment charges in 2009 of \$18,425, or 111 basis points, compared to \$81,834, or 379 basis points, in 2008. Gross profit margins in 2009 were also favorably impacted as a result of us exiting poor performing communities in 2008 which were producing lower gross profit margins. In addition, 2009 gross profit margins as well as segment profit were favorably impacted by lower lumber and certain other commodity costs as well as by cost control measures taken in prior quarters, reducing material and personnel costs.

Segment new orders in 2009 increased 12% from 2008, while the segment's average sales price of new orders decreased 7% year over year. New orders were favorably impacted in part by a 43% increase in the number of new orders in the fourth quarter of 2009 compared to the same period in 2008, as a result of the significant impact of the fourth quarter 2008 credit crisis on the homebuilding market. New orders were also favorably impacted in 2009 by a decrease in the cancellation rate in 2009 to 14% from 24% during 2008. In addition, we believe that the federal tax credit for first-time homebuyers had a favorable impact on new orders in 2009, as first-time homebuyers made up a higher percentage of our total sales in the segment year over year.

North East

2010 versus 2009

The North East segment had an approximate \$5,500, or 28% increase in segment profit in 2010 compared to 2009. Revenues increased approximately \$32,900, or 13%, in 2010 from 2009. Revenues increased due to a 4% increase in the number of units settled and an 8% increase in the average settlement price year over year. The increase in units settled was primarily attributable to the impact of the federal homebuyer tax credit which we believe resulted in higher first quarter sales and increased settlements through the second quarter of 2010 as compared to the same period in 2009. The increase in the average settlement price resulted from a product mix shift away from our attached products to our detached product, which generally sells at higher price points. Gross profit margins remained relatively flat period over period, as the higher contract land deposit impairment charges in 2010 of \$4,898, or 170 basis points, compared to 2009 of \$2,489, or 98 basis points, were offset by improved leveraging of fixed operating costs due to higher settlement volume year over year.

Segment new orders in 2010 decreased 9% compared to 2009, while the average sales price of new orders increased 8% year over year. Subsequent to the April 30, 2010 expiration of the federal homebuyer tax credit, we experienced a decline in new orders in each quarter of 2010 as compared to the respective quarters of

2009. The average sales price of new orders has been favorably impacted by a product mix shift away from our attached products to our detached product, which generally sells at higher price points.

2009 versus 2008

The North East segment had an approximate \$6,400, or 49%, increase in segment profit in 2009 compared to 2008, despite a decrease in revenues of approximately \$92,500, or 27%, year over year. The decline in revenues was due to a 19%, or 204 unit, decrease in the number of units settled and a 10% decrease in the average settlement price year over year. The decrease in the number of units settled and the average settlement price was primarily attributable to a 40%, or 202 unit, lower beginning backlog balance entering 2009 compared to 2008 and 15% lower average price of homes in beginning backlog year over year. Gross profit margins increased to 16.6% in 2009 from 13.4% in 2008. The increase in gross margins was attributable primarily to lower contract land deposit impairment charges in 2009 of \$2,489, or 98 basis points, compared to 2008 of \$11,190, or 322 basis points. In addition, 2009 gross profit margins as well as segment profit were favorably impacted by lower lumber and certain other commodity costs as well as by cost control measures taken in prior quarters, reducing material and personnel costs.

Segment new orders in 2009 increased 2% from 2008, while the segment's average sales price for new orders decreased 2% year over year. New orders were favorably impacted in part by a 26% increase in the number of new orders in the fourth quarter of 2009 compared to the same period in 2008, as a result of the significant impact of the fourth quarter 2008 credit crisis on the homebuilding market. We believe new orders were also favorably impacted in 2009 by the federal tax credit for first-time homebuyers and by a decrease in the cancellation rate to 15% in 2009 from 20% in 2008.

Mid East

2010 versus 2009

The Mid East segment had an approximate \$18,900, or 50%, increase in segment profit in 2010 compared to 2009. The increase in segment profit was driven by an increase in revenues of approximately \$126,900, or 25%, in 2010 compared to 2009 primarily due to a 24% increase in the number of units settled year over year. The increase in units settled was attributable to the impact of the federal homebuyer tax credit which we believe resulted in higher first quarter sales and increased settlements through the second quarter of 2010 as compared to the same period in 2009. In addition, settlements were favorably impacted by a 31% higher beginning backlog entering 2010 compared to the same period in 2009. Gross profit margins remained relatively flat year over year, at 17.3% in 2010 compared to 17.0% in 2009.

Segment new orders and the average new order selling price in 2010 increased 4% and 2%, respectively compared to 2009. New orders were favorably impacted primarily by the 178 new orders in the current year in Indianapolis, IN, market which began operations in the fourth quarter of 2009. This increase was offset partially by an increase in the cancellation rate in both the third and fourth quarters of 2010 to 21% in each quarter as compared to 15% and 13% in the third and fourth quarters of 2009, respectively.

2009 versus 2008

The Mid East segment had an approximate \$1,600, or 4%, decrease in segment profit and an approximate \$154,200, or 23%, decrease in revenues in 2009 compared to 2008. Revenues decreased due to a 16%, or 439 unit, decrease in the number of units settled and a 9% decrease in the average settlement price period over period. The decreases in the number of units settled and the average settlement price were primarily attributable to a 34%, or 382 unit, lower beginning backlog balance and 9% lower average price of homes in beginning backlog year over year, respectively. In addition, average settlement prices were negatively impacted by a 10% decline in the average sales price of new orders for the first six months of 2009 as compared to the same period in 2008. Gross profit margins increased year over year, as cost reduction measures initiated in prior periods offset the decrease in the average settlement price in 2009 compared to 2008. Gross profit margins in 2009 were also favorably impacted as a result of us exiting poor performing communities in 2008 which were producing lower gross profit margins.

Segment new orders in 2009 increased 7% from 2008, while the segment's average sales price for new orders decreased 5% year over year. New orders were favorably impacted in part by a 51% increase in the number of new orders in the fourth quarter of 2009 compared to the same period in 2008, as a result of the significant impact of the fourth quarter 2008 credit crisis on the homebuilding market. We believe new orders in 2009 were also favorably impacted by the federal tax credit for first-time homebuyers, and a decrease in the cancellation rate to 14% in 2009 from 18% in 2008, despite a reduction in the average number of active communities year over year. New order average sale prices continued to be negatively impacted by market conditions, which required us to alter our product offerings and reduce prices in each market within this segment.

South East

2010 versus 2009

The South East segment had an approximate \$3,500 increase in segment profit in 2010 compared to 2009. The increase in segment profit was driven by an increase of approximately \$18,200, or 7%, in revenues in 2010 from 2009 due primarily to a 6% increase in the number of units settled. The increase in units settled was primarily attributable to the impact of the federal homebuyer tax credit which we believe resulted in higher first quarter sales and increased settlements through the second quarter of 2010 as compared to the same period in 2009. In addition, settlements were favorably impacted by an 8% higher beginning backlog entering 2010 compared to the same period in 2009. Gross profit margins increased to 14.7% in 2010 from 13.9% in 2009 due in part to lower contract land deposit impairment charges in 2010 of \$4,618, or 165 basis points, compared to \$5,236, or 200 basis points in 2009, coupled with improved leveraging of fixed operating costs due to higher settlement volume year over year.

Segment new orders and the average sales price of new orders for 2010 remained relatively flat with 2009. New orders were favorably impacted by an 18% increase in the average number of active communities year over year, and by the increase of approximately 80 new orders in 2010 in the Orlando, FL and Raleigh, NC markets, in which we began operations in the third quarter of 2009. These favorable variances were offset by higher cancellations rates in the segment in both the third and fourth quarters of 2010 of 32% and 19% respectively, compared to 14% and 18% for the respective quarters of 2009 and lower absorption rates year over year. Market conditions continued to deteriorate in this segment throughout 2010. The challenging market conditions, coupled with the expiration of the federal homebuyer tax credit in April of 2010, attributed to the segment's higher cancellation rates and fewer new orders in each the second, third and fourth quarters of 2010 as compared to the respective quarters in 2009. We believe we will continue to face significant new order and sales pricing pressure in many of our markets in the South East segment over the next several quarters due to continuing difficult market conditions.

2009 versus 2008

The South East segment had an approximate \$500, or 7% decrease in segment profit and an approximate \$208,000, or 44%, decrease in revenues in 2009 compared to 2008. Revenues decreased primarily due to a 33%, or 538 unit, decrease in the number of units settled and a 17% decrease in the average settlement price year over year. The decrease in units settled was attributable to a 56%, or 447 unit, lower beginning backlog balance entering 2009 compared to the same period in 2008 coupled with a 25%, or 203 unit, decrease in new orders during the first six months of 2009 as compared to the first six months of 2008. The decrease in the average settlement price was primarily attributable to a 16% lower average price of units in backlog entering 2009 compared to the same period in 2008, coupled with a 16% decline in the average sales price of new orders for the first six months of 2009 as compared to the same period in 2008. Gross profit margins increased to 13.9% in 2009 from 12.8% in 2008. Gross profit margins were favorably impacted by lower contract land deposit impairment charges in 2009 of \$5,236, or 200 basis points, compared to \$20,081, or 427 basis points, in 2008. This favorable impact on gross profit margins year over year was partially offset by a 12% decline in average new order sales prices in 2009 from 2008, as the South East segment market conditions were more challenging than those seen in our other market segments.

Segment new orders and the average new order sales price decreased 5% and 12%, respectively, in 2009 compared to 2008. New orders have been negatively impacted by a 23% decrease in the average number of active communities year over year. In addition, the challenging market conditions in the South East segment had continued to negatively impact both new orders and new order sales prices. We believe new orders were favorably impacted in 2009 by the federal tax credit for first-time homebuyers and by a decrease in cancellation rates to 15% in 2009 from 29% in 2008.

Homebuilding Segment Reconciliations to Consolidated Homebuilding Operations

In addition to the corporate capital allocation and contract land deposit impairments discussed above, the other reconciling items between homebuilding segment profit and homebuilding consolidated profit before tax include unallocated corporate overhead (which includes all management incentive compensation), stock option compensation expense, goodwill and intangible asset impairment charges, consolidation adjustments and external corporate interest expense. Our overhead functions, such as accounting, treasury, human resources, etc., are centrally performed and the costs are not allocated to our operating segments. Consolidation adjustments consist of such items to convert the reportable segments' results, which are predominantly maintained on a cash basis, to a full accrual basis for external financial statement presentation purposes, and are not allocated to our operating segments. Likewise, stock option compensation expense and goodwill and intangible asset impairment charges are not charged to the operating segments. External corporate interest expense is primarily comprised of interest charges on our senior notes, and is not charged to the operating segments because the charges are included in the corporate capital allocation discussed above.

	Year Ended December 31,		
	2010	2009	2008
Homebuilding Consolidated Gross Profit:			
Homebuilding Mid Atlantic	\$ 338,586	\$ 307,525	\$ 294,699
Homebuilding North East	48,528	42,282	46,607
Homebuilding Mid East	109,579	85,931	104,761
Homebuilding South East	41,074	36,490	60,173
Consolidation adjustments and other (1)	4,699	25,506	(48,548)
Consolidated homebuilding gross profit	\$ 542,466	\$ 497,734	\$ 457,692

	Year Ended December 31,		
	2010	2009	2008
Homebuilding Consolidated Profit Before Tax:			
Homebuilding Mid Atlantic	\$ 209,496	\$ 185,861	\$ 103,690
Homebuilding North East	25,090	19,572	13,182
Homebuilding Mid East	56,882	38,012	39,643
Homebuilding South East	10,870	7,384	7,904
Reconciling items:			
Contract land deposit impairment reserve (2)	16,206	42,939	(41,134)
Equity-based compensation expense (3)	(50,357)	(43,495)	(38,681)
Corporate capital allocation (4)	65,971	61,753	108,509
Unallocated corporate overhead (5)	(55,992)	(44,103)	(52,696)
Consolidation adjustments and other	15,848	4,970	24,437
Impairment of goodwill and intangible assets (6)			(11,686)
Corporate interest expense	(4,546)	(9,810)	(12,417)
Reconciling items sub-total	(12,870)	12,254	(23,668)
Homebuilding consolidated profit before taxes	\$ 289,468	\$ 263,083	\$ 140,751

- (1) The year over year variances in consolidation adjustments and other relates primarily to changes to the contract land deposit impairment reserve, which are not allocated to the reportable segments.
- (2) This item represents changes to the contract land deposit impairment reserve, which are not allocated to the reportable segments. During both 2010 and 2009, unallocated reserves decreased from the respective prior years primarily as a result of charging previously reserved land impairments to the operating segments and certain recoveries of deposits previously determined to be impaired.
- (3) The increase in equity-based compensation expense in 2010 compared to the prior year was primarily due to the granting of non-qualified stock options and restricted share units from the 2010 Equity Incentive Plan in the current year. The current year increase in stock based compensation expense was partially offset by an approximate \$7,000 pre-tax reversal of stock-based compensation expense attributable to an adjustment of our option forfeiture estimates based on our actual forfeiture experience.
- (4) This item represents the elimination of the corporate capital allocation charge included in the respective homebuilding reportable segments. The corporate capital allocation charge is based on the segment's monthly average asset balance, and is as follows for the years presented:

	Year Ended December 31,		
	2010	2009	2008
Homebuilding Mid Atlantic	\$ 44,758	\$ 40,765	\$ 73,042
Homebuilding North East	5,926	6,473	10,081
Homebuilding Mid East	9,657	8,863	12,902
Homebuilding South East	5,630	5,652	12,484
Total	\$ 65,971	\$ 61,753	\$ 108,509

- (5) The increases in unallocated corporate overhead in 2010 from 2009 is attributable to increased personnel levels year over year and to higher management incentive costs as the 2009 incentive plan was limited to a payout of 50% of the maximum bonus opportunity. The decrease in 2009 from 2008 was primarily driven by a reduction in personnel and other overhead costs as part of our focus to size our organization to meet current activity levels.
- (6) The 2008 impairment charge relates to the write-off of goodwill and indefinite life intangible assets related to the Company's 2005 acquisition of Rymarc Homes and the goodwill related to the 1997 acquisition of Fox Ridge Homes.

Mortgage Banking Segment

We conduct our mortgage banking activity through NVR Mortgage Finance, Inc. (NVRM), a wholly owned subsidiary. NVRM focuses almost exclusively on serving the homebuilding segment's customer base. Following is a table of financial and statistical data for the years ended December 31, 2010, 2009 and 2008:

	2010	2009	2008
Loan closing volume:			
Total principal	\$ 2,219,946	\$ 2,060,376	\$ 2,351,341
Loan volume mix:			
Adjustable rate mortgages	4%	1%	5%
Fixed-rate mortgages	96%	99%	95%
Operating Profit:			
Segment Profit	\$ 35,704	\$ 38,138	\$ 29,227
Equity-based compensation expense	(2,779)	(2,807)	(2,523)
Mortgage banking income before tax	\$ 32,925	\$ 35,331	\$ 26,704
Capture rate:	90%	91%	85%
Mortgage Banking Fees:			
Net gain on sale of loans	\$ 46,225	\$ 46,960	\$ 38,921
Title services	14,108	12,787	14,581
Servicing fees	801	634	835
	\$ 61,134	\$ 60,381	\$ 54,337

2010 versus 2009

Loan closing volume for the year ended December 31, 2010 increased 8% from 2009. The 2010 increase was primarily attributable to a 7% increase in the number of units closed and a 1% increase in the average loan amount year over year. The increases in the number of units closed and the average loan amount are attributable to the aforementioned increase in the homebuilding segment's number of units settled and the increase in the average settlement prices in 2010 as compared to 2009.

Segment profit for the year ended December 31, 2010 decreased approximately \$2,400 from 2009. The decrease in segment profit was primarily attributable to an approximately \$5,800 increase in general and administrative expenses. The increase in general and administrative expenses was primarily the result of a \$6,000 increase in the provision for loan loss compared to 2009. The \$5,800 increase in general and administrative expenses was partially offset by an approximate \$2,500 increase in interest income primarily as a result of the change in our loan sale distribution channels (refer to Mortgage Banking-Other section below for additional information).

2009 versus 2008

Loan closing volume for the year ended December 31, 2009 decreased 12% from 2008. The 2009 decrease was primarily attributable to a 7% decrease in the number of units closed and a 6% decrease in the average loan amount year over year. These decreases are attributable to the aforementioned decrease in the homebuilding segment's number

of units settled and the decrease in the average settlement prices in 2009 as compared to 2008. The aforementioned decrease in builder settlements in 2009 compared to 2008, was partially offset by a 6 percentage point increase in the number of loans closed by NVRM for our homebuyers who obtain a mortgage to purchase the home (Capture Rate), which increased to 91% for the period ended December 31, 2009, compared to 85% for the same period in 2008.

Segment profit for the year ended December 31, 2009 increased approximately \$8,900 from 2008. The increase was partially attributable to an approximate \$6,000 increase in mortgage banking fees, which was primarily the result of a decrease in incentives. The increase was partially offset by a decrease in fees attributable to the aforementioned decrease in closed loan volume. The increase in mortgage banking fees for the year ended December 31, 2009 was also partially attributable to an approximate \$440 increase in unrealized income from the fair value measurement of our locked loan commitments, forward mortgage-backed securities sales, and closed loans held for sale, which is included in mortgage banking fees. The fair value calculations are classified as Level 2 observable inputs as defined by GAAP (refer to Note 11, in the accompanying consolidated financial statements for additional information). The aforementioned fair value measurements will be impacted in the future by the change in the value of the servicing rights and the change in volume and product mix of our closed loans and locked loan commitments.

The increase in segment profit for the year ended December 31, 2009 was also partially attributable to an approximate \$4,400 decrease in general and administrative expenses compared to the same period for 2008. The decrease in general and administrative expenses was primarily the result of a decrease in salary and other personnel costs primarily as the result of an approximate 24% decrease in staffing compared to the same period for 2008.

Mortgage Banking Other

We sell all of the loans we originate into the secondary mortgage market. Insofar as we underwrite our originated loans to the standards and specifications of the ultimate investor, we have no further financial obligations from the issuance of loans, except in certain limited instances where early payment default occurs. Those underwriting standards are typically equal to or more stringent than the underwriting standards required by FNMA, VA and FHA. NVRM has always maintained an allowance for losses on mortgage loans originated that reflects our judgment of the present loss exposure in the loans that we have originated and sold. The allowance is calculated based on an analysis of historical experience and anticipated losses on mortgages held for investment, real estate owned, and specific expected loan repurchases or indemnifications. For the period January 1, 2005 to December 31, 2010, we have originated approximately \$17,200,000 of mortgage loans and have cumulative actual charges incurred related to mortgage indemnifications and repurchases of approximately \$5,400 during that period. It has been reported that investors have become increasingly aggressive in looking for any type of underwriting deficiency incurred on loans that have gone into default to force the seller or the originator of the loans to assume any losses incurred on the defaulted loans. We have not experienced an abnormal increase in the number of loans that we have been requested to either repurchase or provide indemnification for losses. Because we sell all of our loans and do not service them, there is often a substantial delay between the time that a loan goes into default and the time that the servicer requests us to reimburse them for losses incurred because of the default. We believe that all of the loans that we originate are underwritten to the standards and specifications of the ultimate investor to whom we sell our originated loans. We employ a quality control department to ensure that our underwriting controls are effective, and further assess the underwriting function as part of our assessment of internal controls over financial reporting. At December 31, 2010, we had an allowance for loan losses of approximately \$8,200. Although we consider the allowance for loan losses reflected on the December 31, 2010 balance sheet to be adequate, there can be no assurance that this allowance will prove to be adequate to cover losses on loans previously originated.

NVRM continues to manage its interest rate risk by entering into optional or mandatory delivery forward sale contracts to sell whole loans and mortgage-backed securities to broker/dealers to mitigate the effect of the interest rate risk inherent in providing rate lock commitments to our borrowers. However, in April 2010, NVRM changed the method by which we deliver loans into our sale distribution channels in order to increase our profitability. While loans are still typically sold to investors within 30 days of settlement, the change has resulted in loans remaining in inventory for a longer period of time than under our previous loan sale channels. This change has resulted in an increase in the mortgages held for sale balance included in the consolidated balance sheet for December 31, 2010 compared to previous years and in the related interest income.

NVRM is dependent on our homebuilding segment's customers for business. As new orders and selling prices of the homebuilding segment decline, NVRM's operations will also be adversely affected. In addition, the mortgage segment's operating results may be adversely affected in future periods due to the continued tightening and volatility of the credit markets as well as increased regulation of mortgage lending practices.

Seasonality

Overall, we do not experience material seasonal fluctuations in sales, settlements or loan closings.

Effective Tax Rate

Our consolidated effective tax rate in 2010, 2009 and 2008 was 36.1%, 35.6% and 39.75%, respectively. The lower effective tax rates in 2010 and 2009 as compared to 2008 were due to the expiration of certain tax reserves previously established, the amendment of certain prior year federal and state income tax returns that we believe will result in tax refunds, and changes under Internal Revenue Code Section 199, domestic manufacturing deduction, that provides us the ability to obtain a larger tax benefit. In addition, the 2009 effective tax rate was favorably impacted by Mr. Schar relinquishing his Executive Officer role with us in 2009, generating a tax benefit related to compensation expense recorded for certain outstanding option grants held by Mr. Schar that were previously considered to be a permanent non-deductible tax difference.

Recent Accounting Pronouncements Pending Adoption

There have not been any pronouncements issued but not yet implemented that we believe will have a material impact on our financial statements. See Note 1 in the accompanying consolidated financial statements for discussion of pronouncements adopted in 2010.

Liquidity and Capital Resources

Lines of Credit and Notes Payable

Our homebuilding segment has generally provided for its working capital cash requirements using cash generated from operations, a short-term unsecured working capital revolving credit facility and the public debt and equity markets. Effective October 27, 2010, we voluntarily terminated our \$300,000 unsecured working capital revolving credit facility which was set to expire on December 6, 2010. We currently do not intend to enter into a new credit facility; however, effective October 27, 2010, we entered into an uncommitted collateralized letter of credit facility to issue letters of credit in our ordinary course of business. See Note 10 in the accompanying consolidated financial statements for further discussion of letters of credit.

Our mortgage subsidiary, NVRM, provides for its mortgage origination and other operating activities using cash generated from operations as well as a revolving mortgage repurchase facility, which is non-recourse to NVR. On July 30, 2010, we renewed and amended our Master Repurchase Agreement dated August 5, 2008 with U.S. Bank National Association, as Agent and representative of itself as a Buyer, and the other Buyers thereto (the "Master Repurchase Agreement") pursuant to a Second Amendment to Master Repurchase Agreement with U.S. Bank National Association, as Agent and representative of itself as Buyer ("Agent"), and the other Buyers thereto (together with the Master Repurchase Agreement, the "Repurchase Agreement"). The purpose of the Repurchase Agreement is to finance the origination of mortgage loans by NVRM. The Repurchase Agreement provides for loan purchases up to \$100,000, subject to certain sub limits. In addition, the Repurchase Agreement provides for an accordion feature under which NVRM may request that the aggregate commitments under the Repurchase Agreement be increased to an amount up to \$125,000. The Repurchase Agreement expires on August 2, 2011.

Advances under the Repurchase Agreement carry a Pricing Rate based on the LIBOR Rate plus the LIBOR Margin, or the Default Pricing Rate, as determined under the Repurchase Agreement, provided that the Pricing Rate shall not be less than 4.5%. Prior to the July 30, 2010 renewal date, the Pricing Rate was based on LIBOR plus LIBOR Margin, or at NVRM's option, the Balance Funded Rate, which included credit for

compensating balances. Under the Repurchase Agreement, we may enter into separate agreements with the Buyers party to the Repurchase Agreement, adjusting the Pricing Rate in effect. These separate agreements do not effect the maximum aggregate commitment available under the Repurchase Agreement. There are several restrictions on purchased loans, including that they cannot be sold to others, they cannot be pledged to anyone other than the agent, and they cannot support any other borrowing or repurchase agreement. The average Pricing Rate on outstanding balances at December 31, 2010 was 4.1%. The average Pricing Rate for amounts outstanding under the previous Repurchase Agreement at December 31, 2009 was 4.1%.

At December 31, 2010, there was \$90,338 outstanding under the Repurchase Agreement, which is included in the mortgage banking segment's Note payable in the accompanying consolidated balance sheet. Amounts outstanding under the Repurchase Agreement are collateralized by the our mortgage loans held for sale, which are included in assets in the December 31, 2010 balance sheet in the accompanying consolidated financial statements. There were no borrowing base limitations at December 31, 2010.

The Repurchase Agreement contains various affirmative and negative covenants with which NVRM must comply. The negative covenants include among others, certain limitations on transactions involving acquisitions, mergers, the incurrence of debt, sale of assets and creation of liens upon any of its Mortgage Notes. Additional covenants include (i) a tangible net worth requirement, (ii) a minimum liquidity requirement, (iii) a minimum tangible net worth ratio, (iv) a minimum net income requirement, and (v) a maximum leverage ratio requirement. We were in compliance with all covenants under the Repurchase Agreement at December 31, 2010.

On June 17, 2003, we completed an offering, at par, for \$200,000 of 5% Senior Notes due 2010 (the Senior Notes) under a shelf registration statement filed in 1998 with the Securities and Exchange Commission (the SEC). The Senior Notes bore interest at 5%, payable semi-annually in arrears on June 15 and December 15. Upon their maturity on June 15, 2010, we redeemed the remaining \$133,370 in outstanding Senior Notes upon maturity at par.

On September 8, 2008, we filed a shelf registration statement (the 2008 Shelf Registration) with the SEC to register for future offer and sale an unlimited amount of debt securities, common shares, preferred shares, depositary shares representing preferred shares and warrants. We expect to use the proceeds received from future offerings, if any, issued under the 2008 Shelf Registration for general corporate purposes. This discussion of NVR's shelf registration capacity does not constitute an offer of any securities for sale.

Equity Repurchases

In addition to funding growth in our homebuilding and mortgage banking operations, we historically have used a substantial portion of our excess liquidity to repurchase outstanding shares of our common stock in open market and privately negotiated transactions. This ongoing repurchase activity is conducted pursuant to publicly announced Board authorizations, and is typically executed in accordance with the safe-harbor provisions of Rule 10b-18 promulgated under the Securities and Exchange Act of 1934, as amended. In addition, the Board resolutions authorizing us to repurchase shares of our common stock specifically prohibit us from purchasing shares from our officers, directors, Profit Sharing/401K Plan Trust or Employee Stock Ownership Plan Trust. The repurchase program assists us in accomplishing our primary objective, creating increases in shareholder value. See Part II, Item 5 of this Form 10-K for disclosure of amounts repurchased during the fourth quarter of 2010. For the year ended December 31, 2010, we repurchased 644,562 shares of our common stock at an aggregate purchase price of \$417,079. As of December 31, 2010, we had \$109,200 available under a \$300,000 board approved repurchase authorization.

Cash Flows

For the year ended December 31, 2010, cash and cash equivalents decreased by \$56,400. Net cash provided by operating activities was \$55,388. Cash was provided primarily by homebuilding operations and was used to fund increases to contract land deposits. The presentation of operating cash flows was reduced by \$63,558, which is the amount of the excess tax benefit realized from the exercise of stock options and deferred

compensation during 2010 and credited directly to additional paid in capital. Investing activities provided net cash of \$212,440, primarily due to the net redemption of \$219,535 in marketable securities at maturity during the year. Net cash used by financing activities was \$324,228. During 2010, we repurchased 644,562 shares of our common stock at an aggregate purchase price of \$417,079 under our ongoing common stock repurchase program as discussed above. In addition, we redeemed the remaining outstanding 5% Senior Notes due 2010, totaling \$133,370, upon their maturity on June 15, 2010. Stock option exercise activity during 2010 provided \$77,492 in exercise proceeds and we realized \$63,558 in excess income tax benefits from the exercise of stock options and deferred compensation plan distributions. We also increased net borrowings under the mortgage warehouse facility by \$77,579 due to a change in the distribution channel for the sale of mortgage loans closed, as discussed previously in the Mortgage Banking Segment discussion.

In 2009, cash and cash equivalents increased by approximately \$102,500. Operating activities provided cash of \$241,642. Cash was provided primarily by homebuilding operations and by an approximate \$32,400 decrease in mortgage loans held for sale. The presentation of operating cash flows was reduced by approximately \$66,400, which is the amount of the excess tax benefit realized from the exercise of stock options and deferred compensation during the period and credited directly to additional paid in capital. Net cash used for investing activities during 2009 was \$221,617 for the year ended December 31, 2009, which primarily resulted from the net purchase of marketable securities during 2009. The marketable securities, which were debt securities issued by the U.S. Treasury and other U.S. government corporations and agencies, were classified as held-to-maturity securities and matured within one year. Net cash provided by financing activities during 2009 was \$82,482. Financing cash flow was favorably impacted by approximately \$78,500 of proceeds from the exercise of stock options and deferred compensation and the realization of approximately \$66,400 in excess income tax benefits from the exercise of stock options. Cash was used by financing activities to reduce net borrowings under the mortgage warehouse facility by approximately \$32,200 and we repurchased \$29,950 of our 5% Senior Notes due 2010, at par during 2009.

In 2008, cash and cash equivalents increased by approximately \$483,000. Operating activities provided cash of \$462,361. Cash was provided primarily by homebuilding operations and a reduction in our homebuilding inventories of approximately \$288,000 due to a reduction in the number of homes under construction at the end of 2008 as compared to the same period in 2007. Operating cash flow was reduced by a decrease in our customer deposits of approximately \$66,000. The presentation of operating cash flows was also reduced by approximately \$50,000, which is the amount of the excess tax benefit realized from the exercise of stock options during the period and credited directly to additional paid in capital. Cash used for investing activities of \$5,498 in 2008, was used primarily for property and equipment purchases. Financing activities in 2008 provided \$26,571 due primarily to proceeds from the exercise of stock options of approximately \$52,000 and the realization of approximately \$50,000 in excess income tax benefits from the exercise of stock options. Cash was used in financing activities to reduce net borrowings under the mortgage warehouse facility by approximately \$39,000 and to repurchase \$36,680 of our 5% Senior Notes due 2010 at a cost of approximately \$36,400.

At December 31, 2010, 2009 and 2008, the homebuilding segment had restricted cash of approximately \$22,889, \$4,600 and \$4,500, respectively. The increase in restricted cash in 2010 is primarily attributable to holding requirements related to outstanding letters of credit issued under our letter of credit agreement as discussed further in Note 10 in the accompanying consolidated financial statements. In addition, restricted cash relates to customer deposits for certain home sales.

We believe that our current cash holdings, cash generated from operations and borrowings available under our mortgage repurchase agreement and the public debt and equity markets will be sufficient to satisfy near and long term cash requirements for working capital and debt service in both our homebuilding and mortgage banking operations.

Off Balance Sheet Arrangements

Lot Acquisition Strategy

We generally do not engage in land development. Instead, we typically acquire finished building lots at market prices from various land developers under fixed price purchase agreements that require deposits that may be forfeited if we fail to perform under the agreement. The deposits required under the purchase agreements are in the form of cash or letters of credit in varying amounts and represent a percentage, typically ranging up to 10%, of the aggregate purchase price of the finished lots.

We believe that our lot acquisition strategy reduces the financial requirements and risks associated with direct land ownership and land development. We may, at our option, choose for any reason and at any time not to perform under these purchase agreements by delivering notice of our intent not to acquire the finished lots under contract. Our sole legal obligation and economic loss for failure to perform under these purchase agreements is limited to the amount of the deposit pursuant to the liquidated damage provision contained within the purchase agreements. We do not have any financial guarantees or completion obligations and we typically do not guarantee lot purchases on a specific performance basis under these purchase agreements.

At December 31, 2010, we controlled approximately 50,400 lots with an aggregate purchase price of approximately \$4,600,000, by making or committing to make deposits of approximately \$180,900 in the form of cash and letters of credit. Our entire risk of loss pertaining to the aggregate purchase price contractual commitment resulting from our non-performance under the contracts is limited to the \$180,900 deposit. Of the \$180,900 deposit total, approximately \$174,300 is in cash and approximately \$6,600 is in letters of credit which have been issued as of December 31, 2010. Subsequent to December 31, 2010, we will pay approximately \$43,200 in additional deposits assuming that contractual development milestones are met by the developers (see Contractual Obligations section below). As of December 31, 2010, we had recorded an impairment valuation allowance of approximately \$73,500 related to the cash deposits currently outstanding. Please refer to Note 1 in the accompanying consolidated financial statements for a further discussion of the contract land deposits and Note 3 in the accompanying consolidated financial statements for a description of our lot acquisition strategy in relation to our accounting related to the consolidation of variable interest entities.

Bonds and Letters of Credit

We enter into bond or letter of credit arrangements with local municipalities, government agencies, or land developers to collateralize our obligations under various contracts. We had approximately \$38,300 of contingent obligations under such agreements as of December 31, 2010 (inclusive of the \$6,600 of lot acquisition deposits in the form of letters of credit discussed above). We believe we will fulfill our obligations under the related contracts and do not anticipate any material losses under these bonds or letters of credit.

Mortgage Commitments and Forward Sales

In the normal course of business, our mortgage banking segment enters into contractual commitments to extend credit to buyers of single-family homes with fixed expiration dates. The commitments become effective when the borrowers lock-in a specified interest rate within time frames established by us. All mortgagors are evaluated for credit worthiness prior to the extension of the commitment. Market risk arises if interest rates move adversely between the time of the lock-in of rates by the borrower and the sale date of the loan to a broker/dealer. To mitigate the effect of the interest rate risk inherent in providing rate lock commitments to borrowers, we enter into optional or mandatory delivery forward sale contracts to sell whole loans and mortgage-backed securities to broker/dealers. The forward sale contracts lock in an interest rate and price for the sale of loans similar to the specific rate lock commitments. We do not engage in speculative or trading derivative activities. Both the rate lock commitments to borrowers and the forward sale contracts to broker/dealers are undesignated derivatives, and, accordingly, are marked to fair value through earnings. At December 31, 2010, there were contractual commitments to extend credit to borrowers aggregating \$96,265 and open forward delivery contracts aggregating \$262,839. Please refer to Note 11 in the accompanying consolidated financial statements for a description of our fair value accounting.

Contractual Obligations

Our fixed, non-cancelable obligations as of December 31, 2010, were as follows:

	Payments due by period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Debt (a)	\$ 90,338	\$ 90,338	\$	\$	\$
Capital leases (b)	2,359	346	1,288	725	
Operating leases (c)	74,408	19,014	24,020	14,448	16,926
Purchase obligations (d)	43,178	*	*	*	*
Executive Officer employment contracts (e)	9,323	1,863	3,730	3,730	
Other long-term liabilities (f)	\$ 28,963	28,377	586		
Total	\$ 248,569	\$ 139,938	\$ 29,624	\$ 18,903	\$ 16,926

- (a) See Note 6 in the accompanying consolidated financial statements for additional information regarding debt and related matters.
- (b) The present value of these obligations is included on the Consolidated Balance Sheets. See Note 6 in the accompanying consolidated financial statements for additional information regarding capital lease obligations.
- (c) See Note 10 in the accompanying consolidated financial statements for additional information regarding operating leases.
- (d)(*) Amounts represent required payments of forfeitable deposits with land developers under existing, fixed price purchase agreements, assuming that contractual development milestones are met by the developers. We expect to make all payments of these deposits within the next three years, but due to the nature of the contractual development milestones that must be met, we are unable to accurately estimate the portion of the deposit obligation that will be made within one year and that portion that will be made within one to three years.
- (e) We have entered into employment agreements with four of our executive officers. Each of the agreements expires on January 1, 2016 and provides for payment of a minimum base salary, which may be increased at the discretion of the Compensation Committee of NVR's Board of Directors (the "Compensation Committee"), and annual incentive compensation of up to 100% of base salary upon achievement of annual performance objectives established by the Compensation Committee. The agreements also provide for payment of severance benefits upon termination of employment, in amounts ranging from \$0 to two times the executive officer's then annual base salary, depending on the reason for termination, plus up to \$100 in outplacement assistance. Accordingly, total payments under these agreements will vary based on length of service, any future increases to base salaries, annual incentive payments earned, and the reason for termination. The agreements have been reflected in the above table assuming the continued employment of the executive officers for the full term of the respective agreements, and at the executive officers' current base salaries. The above balances do not include any potential annual incentive compensation. The actual amounts paid could differ from that presented.
- (f) Amounts represent payments due under incentive compensation plans and are included on the Consolidated Balance Sheet, approximately \$2,900 of which is recorded in the Mortgage Banking accounts payable and other liabilities line item.

Critical Accounting Policies

General

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires us to make estimates and assumptions that affect the reported

amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting periods. We continually evaluate the estimates we use to prepare the consolidated financial statements and update those estimates as necessary. In general, our estimates are based on historical experience, on information from third party professionals, and other various assumptions that are believed to be reasonable under the facts and circumstances. Actual results could differ materially from those estimates made by management.

Homebuilding Inventory

The carrying value of inventory is stated at the lower of cost or market value. Cost of lots and completed and uncompleted housing units represent the accumulated actual cost of the units. Field construction supervisors' salaries and related direct overhead expenses are included in inventory costs. Interest costs are not capitalized into inventory, with the exception of land under development. Upon settlement, the cost of the unit is expensed on a specific identification basis. Cost of manufacturing materials is determined on a first-in, first-out basis.

Sold inventory is evaluated for impairment based on the contractual selling price compared to the total estimated cost to construct. Unsold inventory is evaluated for impairment by analyzing recent comparable sales prices within the applicable community compared to the costs incurred to date plus the expected costs to complete. Any calculated impairments are recorded immediately.

Land Under Development and Contract Land Deposits

Land Under Development

On a very limited basis, we directly acquire raw parcels of land already zoned for its intended use to develop into finished lots. Land under development includes the land acquisition costs, direct improvement costs, capitalized interest, where applicable, and real estate taxes.

Land under development, including the land under development held by our unconsolidated joint ventures and the related joint venture investments, is reviewed for potential write-downs when impairment indicators are present. In addition to considering market and economic conditions, we assess land under development impairments on a community-by-community basis, analyzing, as applicable, current sales absorption levels, recent sales gross profit, and the dollar differential between the projected fully-developed cost of the lots and the current market price for lots. If indicators of impairment are present for a community, we perform an analysis to determine if the undiscounted cash flows estimated to be generated by those assets are less than their carrying amounts, and if so, impairment charges are required to be recorded if the fair value of such assets is less than their carrying amounts. For those assets deemed to be impaired, the impairment to be recognized is measured as the amount by which the carrying amount of the asset exceeds the fair value of the assets. Our determination of fair value is primarily based on discounting the estimated future cash flows at a rate commensurate with the inherent risks associated with the asset and related estimated cash flow streams. We do not believe that any of the land under development, all of which was acquired during 2010, is impaired at this time. However, there can be no assurance that we will not incur impairment charges in the future due to unanticipated adverse changes in the economy or other events adversely affecting specific markets or the homebuilding industry.

Contract Land Deposits

We purchase finished lots under fixed price purchase agreements that require deposits that may be forfeited if we fail to perform under the contract. The deposits are in the form of cash or letters of credit in varying amounts and represent a percentage of the aggregate purchase price of the finished lots.

We maintain an allowance for losses on contract land deposits that reflects our judgment of the present loss exposure in the existing contract land deposit portfolio at the end of the reporting period. To analyze contract land deposit impairments, we utilize a loss contingency analysis that is conducted each quarter. In

addition to considering market and economic conditions, we assess contract land deposit impairments on a community-by-community basis pursuant to the purchase contract terms, analyzing, as applicable, current sales absorption levels, recent sales gross profit, the dollar differential between the contractual purchase price and the current market price for lots, a developer's financial stability, a developer's financial ability or willingness to reduce lot prices to current market prices, and the contract's default status by either us or the developer along with an analysis of the expected outcome of any such default.

Our analysis is focused on whether we can sell houses profitably in a particular community in the current market with which we are faced. Because we don't own the finished lots on which we had placed a contract land deposit, if the above analysis leads to a determination that we can't sell homes profitably at the current contractual lot price, we then determine whether we will elect to default under the contract, forfeit our deposit and terminate the contract, or whether we will attempt to restructure the lot purchase contract, which may require us to forfeit the deposit to obtain contract concessions from a developer. We also assess whether an impairment is present due to collectability issues resulting from a developer's non-performance because of financial or other conditions.

Although we consider the allowance for losses on contract land deposits reflected on the December 31, 2010 balance sheet to be adequate (see Note 1 to the accompanying consolidated financial statements included herein), there can be no assurance that this allowance will prove to be adequate over time to cover losses due to unanticipated adverse changes in the economy or other events adversely affecting specific markets or the homebuilding industry.

Intangible Assets

Reorganization value in excess of identifiable assets (excess reorganization value) is an indefinite life intangible asset that was created upon our emergence from bankruptcy on September 30, 1993. Based on the allocation of our reorganization value, the portion of our reorganization value which was not attributed to specific tangible or intangible assets has been reported as excess reorganization value, which is treated similarly to goodwill. Excess reorganization value is not subject to amortization. Rather, excess reorganization value is subject to an impairment assessment on an annual basis or more frequently if changes in events or circumstances indicate that impairment may have occurred. Because excess reorganization value was based on the reorganization value of our entire enterprise upon bankruptcy emergence, the impairment assessment is conducted on an enterprise basis based on the comparison of our total equity compared to the market value of our outstanding publicly-traded common stock. We do not believe that excess reorganization value is impaired at this time. However, changes in strategy or continued adverse changes in market conditions could impact this judgment and require an impairment loss to be recognized if our book value, including excess reorganization value, exceeds the fair value.

Warranty/Product Liability Accruals

Warranty and product liability accruals are established to provide for estimated future costs as a result of construction and product defects, product recalls and litigation incidental to our business. Liability estimates are determined based on our judgment considering such factors as historical experience, the likely current cost of corrective action, manufacturers' and subcontractors' participation in sharing the cost of corrective action, consultations with third party experts such as engineers, and evaluations by our General Counsel and outside counsel retained to handle specific product liability cases. Although we consider the warranty and product liability accrual reflected on the December 31, 2010 balance sheet to be adequate (see Note 10 to the accompanying consolidated financial statements included herein), there can be no assurance that this accrual will prove to be adequate over time to cover losses due to increased costs for material and labor, the inability or refusal of manufacturers or subcontractors to financially participate in corrective action, unanticipated adverse legal settlements, or other unanticipated changes to the assumptions used to estimate the warranty and product liability accrual.

Stock-Based Compensation Expense

Compensation costs related to our stock based compensation plans are recognized within our income statement. The costs recognized are based on the grant date fair value. Compensation cost for share-based grants is recognized on a straight-line basis over the requisite service period for the entire award (from the date of grant through the period of the last separately vesting portion of the grant).

We calculate the fair value of our non-publicly traded, employee stock options using the Black-Scholes option-pricing model. While the Black-Scholes model is a widely accepted method to calculate the fair value of options, its results are dependent on input variables, two of which, expected term and expected volatility, are significantly dependent on management's judgment. We have concluded that our historical exercise experience is the best estimate of future exercise patterns to determine an option's expected term. To estimate expected volatility, we analyze the historical volatility of our common stock over a period equal to the option's expected term. Changes in management's judgment of the expected term and the expected volatility could have a material effect on the grant-date fair value calculated and expensed within the income statement. In addition, we are required to estimate future grant forfeitures when considering the amount of stock-based compensation costs to record. We have concluded that our historical forfeiture rate is the best measure to base our estimate of future forfeitures of equity-based compensation grants. However, there can be no assurance that our future forfeiture rate will not be materially higher or lower than our historical forfeiture rate, which would affect the aggregate cumulative compensation expense recognized.

Mortgage Loan Loss Allowance

We originate several different loan products to our customers to finance the purchase of their home. We sell all of the loans we originate into the secondary mortgage market generally within 30 days from origination. All of the loans that we originate are underwritten to the standards and specifications of the ultimate investor. Those underwriting standards are typically equal to or more stringent than the underwriting standards required by FNMA, VA and FHA. Insofar as we underwrite our originated loans to those standards, we bear no increased concentration of credit risk from the issuance of loans, except in certain limited instances where early payment default occurs. We employ a quality control department to ensure that our underwriting controls are effectively operating, and further assess the underwriting function as part of our assessment of internal controls over financial reporting. We maintain an allowance for losses on mortgage loans originated that reflects our judgment of the present loss exposure in the loans that we have originated and sold. The allowance is calculated based on an analysis of historical experience and anticipated losses on mortgages held for investment, real estate owned, and specific expected loan repurchases or indemnifications. Although we consider the allowance for loan losses reflected on the December 31, 2010 balance sheet to be adequate (see Note 12 to the accompanying consolidated financial statements included herein), there can be no assurance that this allowance will prove to be adequate over time to cover losses due to unanticipated changes to the assumptions used to estimate the mortgage loan loss allowance.

Impact of Inflation, Changing Prices and Economic Conditions

See Risk Factors included in Item 1A herein. See also the discussion above under Overview of Current Business Environment.

Item 7A. Quantitative and Qualitative Disclosure About Market Risk.

Market risk is the risk of loss arising from adverse changes in market prices and interest rates. Our market risk arises from interest rate risk inherent in our financial instruments. Interest rate risk results from the possibility that changes in interest rates will cause unfavorable changes in net income or in the value of interest rate-sensitive assets, liabilities and commitments. Lower interest rates tend to increase demand for mortgage loans for home purchasers, while higher interest rates make it more difficult for potential borrowers to purchase residential properties and to qualify for mortgage loans. We have no market rate sensitive instruments held for speculative or trading purposes.

Our mortgage banking segment is exposed to interest rate risk as it relates to its lending activities. The mortgage banking segment originates mortgage loans, which are sold through either optional or mandatory forward delivery contracts into the secondary markets. All of the mortgage banking segment's loan portfolio is held for sale and subject to forward sale commitments. NVRM also sells all of its mortgage servicing rights on a servicing released basis.

NVRM generates operating liquidity primarily through the mortgage Repurchase Agreement, which provides for loan repurchases up to \$100,000, subject to certain sub limits. The Repurchase Agreement is used to fund NVRM's mortgage origination activities. Advances under the Repurchase Agreement carry a Pricing Rate based on the LIBOR Rate plus the LIBOR Margin, or the Default Pricing Rate, as determined under the Repurchase Agreement, provided that the Pricing Rate shall not be less than 4.5%. Under the Repurchase Agreement, we may enter into separate agreements with the Buyers party to the Repurchase Agreement, adjusting the Pricing Rate in effect. The average Pricing Rate on outstanding balances at December 31, 2010 was 4.1%.

The following table represents the contractual balances of our on-balance sheet financial instruments at the expected maturity dates, as well as the fair values of those on-balance sheet financial instruments at December 31, 2010. The expected maturity categories take into consideration the actual and anticipated amortization of principal and do not take into consideration the reinvestment of cash or the refinancing of existing indebtedness. Because we sell all of the mortgage loans we originate into the secondary markets, we have made the assumption that the portfolio of mortgage loans held for sale will mature in the first year. Consequently, advances outstanding under the Repurchase Agreement are also assumed to mature in the first year.

Maturities (000_s)

	2011	2012	2013	2014	2015	Thereafter	Total	Fair Value
Mortgage banking segment								
<i>Interest rate sensitive assets:</i>								
Mortgage loans held for sale	\$ 181,697						\$ 181,697	\$ 177,244
Average interest rate	4.2%						4.2%	
<i>Interest rate sensitive liabilities:</i>								
Variable rate repurchase agreement	\$ 90,338						\$ 90,338	\$ 90,338
Average interest rate (a)	4.1%						4.1%	
<i>Other:</i>								
Forward trades of mortgage-backed securities (b)	\$ 4,904						\$ 4,904	\$ 4,904
Forward loan commitments (b)	557						557	557
Homebuilding segment								
<i>Interest rate sensitive assets:</i>								
Interest-bearing deposits	\$1,163,623						\$1,163,623	\$1,163,623
Average interest rate	0.3%						0.3%	
<i>Interest rate sensitive liabilities:</i>								
Fixed rate obligations	\$ 346	\$ 644	\$ 644	\$ 669	\$ 56	\$	\$ 2,359	\$ 2,359
Average interest rate	13.1%	13.2%	13.3%	13.9%	14.1%		13.2%	

(a) Average interest rate is net of credits received for compensating cash balances.

(b) Represents the fair value recorded pursuant to ASC 815, *Derivatives and Hedging*.

Item 8. Financial Statements and Supplementary Data.

The financial statements listed in Item 15 are filed as part of this report and are incorporated herein by reference.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report, an evaluation was performed under the supervision and with the participation of our management, including the principal executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934.

Based on that evaluation, the principal executive officer and principal financial officer concluded that the design and operation of these disclosure controls and procedures as of December 31, 2010 were effective to provide reasonable assurance that information required to be disclosed in our reports under the Securities and Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure.

There have been no changes in our internal controls over financial reporting identified in connection with the evaluation referred to above that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) under the Securities and Exchange Act of 1934. Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation under the framework in *Internal Control - Integrated Framework*, our management concluded that our internal control over financial reporting was effective as of December 31, 2010. Our internal control over financial reporting as of December 31, 2010 has been audited by KPMG LLP, an independent registered public accounting firm, as stated in their attestation report which is included herein.

Item 9B. Other Information.

None.

PART III**Item 10. Directors, Executive Officers, and Corporate Governance.**

Item 10 is hereby incorporated by reference to our Proxy Statement expected to be filed with the Securities and Exchange Commission on or prior to April 30, 2011. Reference is also made regarding our executive officers to Executive Officers of the Registrant following Item 4 of Part I of this report.

Item 11. Executive Compensation.

Item 11 is hereby incorporated by reference to our Proxy Statement expected to be filed with the Securities and Exchange Commission on or prior to April 30, 2011.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

Security ownership of certain beneficial owners and management is hereby incorporated by reference to our Proxy Statement expected to be filed with the Securities and Exchange Commission on or prior to April 30, 2011.

Equity Compensation Plan Information

The table below sets forth information as of the end of our 2010 fiscal year for (i) all equity compensation plans approved by our shareholders and (ii) all equity compensation plans not approved by our shareholders:

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in the first column)
Equity compensation plans approved by security holders (1)	533,638	\$ 469.99	270,247
Equity compensation plans not approved by security holders	669,514	\$ 458.02	
Total	1,203,152	\$ 463.33	270,247

(1) This category includes the restricted share units (RSUs) authorized by the 2010 Equity Incentive Plan, which was approved by our shareholders at the May 4, 2010 Annual Meeting. At December 31, 2010, there are 149,727 RSUs outstanding, issued at a \$0 exercise price. Of the total 270,247 shares remaining available for future issuance, up to 90,273 may be issued as RSUs.

Equity compensation plans approved by our shareholders include the NVR, Inc. Management Long-Term Stock Option Plan; the NVR, Inc. 1998 Management Long-Term Stock Option Plan; the 1998 Directors Long-Term Stock Option Plan; and the 2010 Equity Incentive Plan. The only equity compensation plan that

was not approved by our shareholders is the NVR, Inc. 2000 Broadly-Based Stock Option Plan. See Note 9 in the accompanying consolidated financial statements for a description of each of our equity compensation plans.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

Item 13 is hereby incorporated by reference to our Proxy Statement expected to be filed with the Securities and Exchange Commission on or prior to April 30, 2011.

Item 14. Principal Accountant Fees and Services.

Item 14 is hereby incorporated by reference to our Proxy Statement expected to be filed with the Securities and Exchange Commission on or prior to April 30, 2011.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders

NVR, Inc.:

We have audited the accompanying consolidated balance sheets of NVR, Inc. and subsidiaries as of December 31, 2010 and 2009, and the related consolidated statements of income, shareholders' equity and cash flows for each of the years in the three-year period ended December 31, 2010. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of NVR, Inc. as of December 31, 2010 and 2009, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2010, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), NVR, Inc.'s internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 25, 2011 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

KPMG LLP

McLean, Virginia

February 25, 2011

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders

NVR, Inc.:

We have audited NVR, Inc.'s internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). NVR, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, NVR, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of NVR, Inc. as of December 31, 2010 and 2009, and the related consolidated statements of income, shareholders' equity and cash flows for each of the years in the three-year period ended December 31, 2010, and our report dated February 25, 2011 expressed an unqualified opinion on those consolidated financial statements.

(dollars in thousands, except per share data)

1. Summary of Significant Accounting Policies

Principles of Consolidation

The accompanying consolidated financial statements include the accounts of NVR, Inc. (NVR or the Company) and its subsidiaries and certain other entities in which the Company is deemed to be the primary beneficiary (see Note 3 herein for additional information). All significant intercompany transactions have been eliminated in consolidation.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting periods. Management continually evaluates the estimates used to prepare the consolidated financial statements and updates those estimates as necessary. In general, the Company's estimates are based on historical experience, on information from third party professionals, and other various assumptions that are believed to be reasonable under the facts and circumstances. Actual results could differ materially from those estimates made by management.

Cash and Cash Equivalents

Cash and cash equivalents include short-term investments with original maturities of three months or less. At December 31, 2010, \$358 of cash related to a consolidated variable interest entity is included in Assets related to consolidated variable interest entities in the accompanying balance sheet.

The homebuilding segment had restricted cash of \$22,889 and \$4,613 at December 31, 2010 and 2009, respectively. Restricted cash in 2010 is primarily attributable to holding requirements related to outstanding letters of credit issued under the Company's letter of credit agreement as discussed further in Note 10. In addition, restricted cash relates to customer deposits for certain home sales. Restricted cash is recorded in Other assets in the homebuilding section of the accompanying consolidated balance sheets.

The mortgage banking segment had restricted cash of \$555 and \$49 at December 31, 2010 and 2009, respectively, which included amounts collected at closing related to mortgage loans held for sale. The mortgage banking segment's restricted cash is recorded in Other assets in the mortgage banking section of the accompanying consolidated balance sheets.

Marketable Securities

As of December 31, 2010 and 2009 the Company held marketable securities totaling \$0 and \$219,535, respectively. These securities, which are debt securities issued by U.S. government agencies, are classified by the Company as held to maturity and are measured at amortized cost and mature within one year.

Homebuilding Inventory

The carrying value of inventory is stated at the lower of cost or market value. Cost of lots and completed and uncompleted housing units represent the accumulated actual cost of the units. Field construction supervisors' salaries and related direct overhead expenses are included in inventory costs. Interest costs are not capitalized into inventory, with the exception of land under development, as

NVR, Inc.

Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

applicable (see below). Upon settlement, the cost of the unit is expensed on a specific identification basis. Cost of manufacturing materials is determined on a first-in, first-out basis.

Sold inventory is evaluated for impairment based on the contractual selling price compared to the total estimated cost to construct. Unsold inventory is evaluated for impairment by analyzing recent comparable sales prices within the applicable community compared to the costs incurred to date plus the expected costs to complete. Any calculated impairments are recorded immediately.

Contract Land Deposits

The Company purchases finished lots under fixed price purchase agreements that require deposits that may be forfeited if NVR fails to perform under the contract. The deposits are in the form of cash or letters of credit in varying amounts and represent a percentage of the aggregate purchase price of the finished lots.

NVR maintains an allowance for losses on contract land deposits that reflects the Company's judgment of the present loss exposure in the existing contract land deposit portfolio at the end of the reporting period. To analyze contract land deposit impairments, NVR utilizes an Accounting Standards Codification (ASC) 450, *Contingencies*, loss contingency analysis that is conducted each quarter. In addition to considering market and economic conditions, NVR assesses contract land deposit impairments on a community-by-community basis pursuant to the purchase contract terms, analyzing, as applicable, current sales absorption levels, recent sales gross profit, the dollar differential between the contractual purchase price and the current market price for lots, a developer's financial stability, a developer's financial ability or willingness to reduce lot prices to current market prices, and the contract's default status by either the Company or the developer along with an analysis of the expected outcome of any such default.

NVR's analysis is focused on whether the Company can sell houses profitably in a particular community in the current market with which the Company is faced. Because the Company does not own the finished lots on which the Company has placed a contract land deposit, if the above analysis leads to a determination that the Company can't sell homes profitably at the current contractual lot price, the Company then determines whether it will elect to default under the contract, forfeit the deposit and terminate the contract, or whether the Company will attempt to restructure the lot purchase contract, which may require it to forfeit the deposit to obtain contract concessions from a developer. The Company also assesses whether an impairment is present due to collectibility issues resulting from a developer's non-performance because of financial or other conditions.

For the year ended December 31, 2010, the Company incurred pre-tax charges of approximately \$4,300 related to the impairment of contract land deposits. During the year ended December 31, 2009, the Company had a net pre-tax recovery of approximately \$6,500 of contract land deposits previously considered to be uncollectible. For the year ended December 31, 2008, the Company incurred pre-tax charges of approximately \$165,000. These impairment charges were recorded in cost of sales on the accompanying consolidated statements of income. The contract land deposit asset on the accompanying consolidated balance sheets is shown net of an approximate \$73,500 and \$89,500 impairment valuation allowance at December 31, 2010 and 2009, respectively.

Land Under Development

On a very limited basis, NVR directly acquires raw parcels of land already zoned for its intended use to develop into finished lots. Land under development includes the land acquisition costs, direct improvement costs, capitalized interest, where applicable, and real estate taxes.

NVR, Inc.

Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

Land under development, including the land under development held by our unconsolidated joint ventures and the related joint venture investments, is reviewed for potential write-downs when impairment indicators are present. In addition to considering market and economic conditions, the Company assesses land under development impairments on a community-by-community basis, analyzing, as applicable, current sales absorption levels, recent sales gross profit, and the dollar differential between the projected fully-developed cost of the lots and the current market price for lots. If indicators of impairment are present for a community, NVR performs an analysis to determine if the undiscounted cash flows estimated to be generated by those assets are less than their carrying amounts, and if so, impairment charges are required to be recorded if the fair value of such assets is less than their carrying amounts. For those assets deemed to be impaired, the impairment to be recognized is measured as the amount by which the carrying amount of the asset exceeds the fair value of the assets. The Company's determination of fair value is primarily based on discounting the estimated future cash flows at a rate commensurate with the inherent risks associated with the asset and related estimated cash flow streams. NVR does not believe that any of the land under development, all of which was acquired during 2010, is impaired at this time.

Property, Plant, and Equipment

Property, plant, and equipment are carried at cost less accumulated depreciation and amortization. Depreciation is based on the estimated useful lives of the assets using the straight-line method. Amortization of capital lease assets is included in depreciation expense. Model home furniture and fixtures are generally depreciated over a two-year period, office facilities and other equipment are depreciated over a period from three to ten years, manufacturing facilities are depreciated over periods of from five to forty years and property under capital leases is depreciated in a manner consistent with the Company's depreciation policy for owned assets, or the lease-term if shorter.

Intangible Assets

Reorganization value in excess of identifiable assets (excess reorganization value) is an indefinite life intangible asset that was created upon NVR's emergence from bankruptcy on September 30, 1993. Based on the allocation of the reorganization value, the portion of the reorganization value which was not attributed to specific tangible or intangible assets has been reported as excess reorganization value, which is treated similarly to goodwill. Excess reorganization value is not subject to amortization. Rather, excess reorganization value is subject to an impairment assessment on an annual basis or more frequently if changes in events or circumstances indicate that impairment may have occurred. Because excess reorganization value was based on the reorganization value of NVR's entire enterprise upon bankruptcy emergence, the impairment assessment is conducted on an enterprise basis based on the comparison of NVR's total equity compared to the market value of NVR's outstanding publicly-traded common stock. The Company completed its annual assessment of impairment and management determined that there was no impairment of excess reorganization value.

Warranty/Product Liability Accruals

The Company establishes warranty and product liability reserves to provide for estimated future expenses as a result of construction and product defects, product recalls and litigation incidental to NVR's homebuilding business. Liability estimates are determined based on management's judgment considering such factors as historical experience, the likely current cost of corrective action, manufacturers' and subcontractors' participation in sharing the cost of corrective action, consultations with third party experts such as engineers, and discussions with the Company's general counsel and outside counsel retained to handle specific product liability cases.

NVR, Inc.

Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

Mortgage Loans Held for Sale, Derivatives and Hedging Activities

NVR originates several different loan products to its customers to finance the purchase of a home through its wholly-owned mortgage subsidiary. NVR sells all of the loans it originates into the secondary market typically within 30 days from origination. All of the loans that the Company originates are underwritten to the standards and specifications of the ultimate investor. Those underwriting standards are typically equal to or more stringent than the underwriting standards required by FNMA, VA and FHA. Insofar as the Company underwrites its originated loans to those standards, the Company bears no increased concentration of credit risk from the issuance of loans, except in certain limited instances where early payment default occurs. The Company employs a quality control department to ensure that its underwriting controls are effectively operating, and further assesses the underwriting function as part of its assessment of internal controls over financial reporting. The Company maintains an allowance for losses on mortgage loans originated that reflects NVR's judgment of the present loss exposure in the loans that it has originated and sold. The allowance is calculated based on an analysis of historical experience and anticipated losses on mortgages held for investment, real estate owned, and specific expected loan repurchases or indemnifications (see Note 12 herein for further information).

Mortgage loans held for sale are recorded at fair value at closing and thereafter are carried at the lower of cost or fair value, net of deferred origination costs, until sold.

In the normal course of business, our mortgage banking segment enters into contractual commitments to extend credit to buyers of single-family homes with fixed expiration dates. The commitments become effective when the borrowers lock-in a specified interest rate within time frames established by NVR. All mortgagors are evaluated for credit worthiness prior to the extension of the commitment. Market risk arises if interest rates move adversely between the time of the lock-in of rates by the borrower and the sale date of the loan to a broker/dealer. To mitigate the effect of the interest rate risk inherent in providing rate lock commitments to borrowers, the Company enters into optional or mandatory delivery forward sale contracts to sell whole loans and mortgage-backed securities to broker/dealers. The forward sale contracts lock in an interest rate and price for the sale of loans similar to the specific rate lock commitments. NVR does not engage in speculative or trading derivative activities. Both the rate lock commitments to borrowers and the forward sale contracts to broker/dealers are undesignated derivatives, and, accordingly, are marked to fair value through earnings. At December 31, 2010, there were contractual commitments to extend credit to borrowers aggregating \$96,265, and open forward delivery sale contracts aggregating \$262,839. See Note 11 herein for a description of our fair value accounting calculation.

Earnings per Share

The following weighted average shares and share equivalents are used to calculate basic and diluted earnings per share for the years ended December 31, 2010, 2009 and 2008:

NVR, Inc.
Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

	Year Ended December 31, 2010	Year Ended December 31, 2009	Year Ended December 31, 2008
Weighted average number of shares outstanding used to calculate basic EPS	5,893,105	5,806,773	5,379,409
<i>Dilutive securities:</i>			
Stock options and restricted share units	271,512	341,996	540,876
Weighted average number of shares and share equivalents outstanding used to calculate diluted EPS	6,164,617	6,148,769	5,920,285

The assumed proceeds used in the treasury method for calculating NVR's diluted earnings per share includes the amount the employee must pay upon exercise, the amount of compensation cost attributed to future services and not yet recognized and the amount of tax benefits that would be credited or charged to additional paid-in capital assuming exercise of the stock option or vesting of the restricted share unit. The assumed amount credited to additional paid-in capital equals the tax benefit from assumed exercise of stock options or the assumed vesting of restricted share units after consideration of the intrinsic value upon assumed exercise or vesting less the actual stock-based compensation expense to be recognized in the income statement from 2006 and future periods.

Stock options issued under equity benefit plans to purchase 443,565; 134,405 and 316,747 shares of common stock were outstanding during the years ended December 31, 2010, 2009 and 2008, respectively, but were not included in the computation of diluted earnings per share because the effect would have been anti-dilutive.

Revenues-Homebuilding Operations

NVR builds single-family detached homes, townhomes and condominium buildings, which generally are constructed on a pre-sold basis for the ultimate customer. Revenues are recognized at the time the unit is settled and title passes to the customer, adequate cash payment has been received and there is no continuing involvement. In situations where the buyer's financing is originated by NVR Mortgage Finance, Inc. (NVRM), a wholly-owned subsidiary of NVR, and the buyer has not made an adequate initial or continuing investment as prescribed by GAAP, the profit on such settlement is deferred until the sale of the related loan to a third-party investor has been completed.

Mortgage Banking Fees

Mortgage banking fees include income earned by NVRM for originating mortgage loans, servicing mortgage loans held on an interim basis, title fees, gains and losses on the sale of mortgage loans and mortgage servicing and other activities incidental to mortgage banking. Mortgage banking fees are generally recognized after the loan has been sold to an unaffiliated, third party investor.

Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on the deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

NVR, Inc.

Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

ASC 740-10 provides that a tax benefit from an uncertain tax position may be recognized when it is more-likely-than-not (defined as a likelihood of more than 50%) that the position will be sustained upon examination, including resolutions of any related appeals or litigation processes, based on the technical merits. If a tax position does not meet the more-likely-than-not recognition threshold, despite the Company's belief that its filing position is supportable, the benefit of that tax position is not recognized in the statements of income. The Company recognizes interest related to unrecognized tax benefits as a component of income tax expense. Based on its historical experience in dealing with various taxing authorities, the Company has found that it is the administrative practice of the taxing authorities to not seek penalties from the Company for the tax positions it has taken on its returns, related to its unrecognized tax benefits. Therefore, the Company does not accrue penalties for the positions in which it has an unrecognized tax benefit. However, if such penalties were to be accrued, they would be recorded as a component of income tax expense. The Company recognizes unrecognized tax benefits in the period that the uncertainty is eliminated by either affirmative agreement of the uncertain tax position by the applicable taxing authority, or by expiration of the applicable statute of limitation.

Financial Instruments

Except as otherwise noted herein, NVR believes that insignificant differences exist between the carrying value and the fair value of its financial instruments (see Note 11 herein for further information).

Stock-Based Compensation

The company accounts for its stock-based compensation in accordance with ASC 718, *Compensation - Stock Compensation*. ASC 718 requires an entity to recognize an expense within its income statement for all share-based payment arrangements, which includes employee stock option and restricted share unit plans. The expense is based on the grant-date fair value of the stock options and restricted share units granted, and is recognized ratably over the requisite service period. The Company calculates the fair value of its non-publicly traded, employee stock options using the Black-Scholes option-pricing model. The grant date fair value of the restricted share units is the closing price of the Company's common stock on the day immediately preceding the date of grant. The Company's equity-based compensation programs are accounted for as equity-classified awards. See Note 9 herein for further discussion of stock-based compensation plans.

Comprehensive Income

For the years ended December 31, 2010, 2009 and 2008, comprehensive income equaled net income; therefore, a separate statement of comprehensive income is not included in the accompanying Consolidated Financial Statements.

Recent Accounting Pronouncements

In January 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2010-06, *Fair Value Measurements and Disclosures (Topic 820) - Improving Disclosures about Fair Value Measurements*, which amends ASC 820 to require the disclosure of additional information related to fair value measurement and provide clarification to existing requirements for fair value measurement disclosure. ASU 2010-06 was effective for the Company beginning January 1, 2010. The Company's disclosures conform to the requirements of ASU 2010-06. See Note 11 herein for additional discussion of fair value measurements.

NVR, Inc.

Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

In June 2009, the FASB issued SFAS No. 166, *Accounting for Transfers of Financial Assets*, as codified in ASC 860, *Transfers and Servicing*, which changes the conditions for reporting a transfer of a portion of a financial asset as a sale and requires additional year-end and interim disclosures. ASC 860 was effective for the Company beginning January 1, 2010. The adoption of ASC 860 did not have a material impact on the Company's financial statements.

In June 2009, the FASB issued SFAS No. 167, *Amendments to FASB Interpretation No. 46(R)*, as codified in ASC 810, *Consolidation*, through Accounting Standards Update 2009-17. This statement amends FASB Interpretation 46R related to the consolidation of variable interest entities (VIEs) and revises the approach to determining the primary beneficiary of a VIE to be more qualitative in nature and requires companies to more frequently reassess whether they must consolidate a VIE. The amendment to ASC 810 was effective for the Company's fiscal year beginning January 1, 2010. Upon adoption of ASC 810, all of the assets and liabilities of consolidated VIEs at December 31, 2009 were deconsolidated, and there was no resultant gain or loss. See Note 3 herein for further discussion of consolidated VIEs.

2. Segment Information, Nature of Operations, and Certain Concentrations

NVR's homebuilding operations primarily construct and sell single-family detached homes, townhomes and condominium buildings under four trade names: Ryan Homes, NVHomes, Fox Ridge Homes, and Rymarc Homes. The Ryan Homes, Fox Ridge Homes, and Rymarc Homes products are marketed primarily to first-time homeowners and first-time move-up buyers. The Ryan Homes product is sold in twenty-three metropolitan areas located in Maryland, Virginia, West Virginia, Pennsylvania, New York, North Carolina, South Carolina, Florida, Ohio, New Jersey, Delaware, Indiana and Kentucky. The Fox Ridge Homes product is sold solely in the Nashville, TN metropolitan area. The Rymarc Homes product is sold solely in the Columbia, SC metropolitan area. The NVHomes product is sold in the Washington, D.C., Baltimore, MD, Philadelphia, PA and Maryland Eastern Shore metropolitan areas, and is marketed primarily to move-up and up-scale buyers. NVR derived approximately 47% of its 2010 homebuilding revenues in the Washington, D.C. and Baltimore, MD metropolitan areas.

NVR's mortgage banking segment is a regional mortgage banking operation. Substantially all of the mortgage banking segment's loan closing activity is for NVR's homebuilding customers. NVR's mortgage banking business generates revenues primarily from origination fees, gains on sales of loans, and title fees. A substantial portion of the Company's mortgage operations is conducted in the Washington, D.C. and Baltimore, MD metropolitan areas.

The following disclosure includes four homebuilding reportable segments that aggregate geographically the Company's homebuilding operating segments, and the mortgage banking operations presented as a single reportable segment. The homebuilding reportable segments are comprised of operating divisions in the following geographic areas:

Homebuilding Mid Atlantic Virginia, West Virginia, Maryland, and Delaware

Homebuilding North East New Jersey and eastern Pennsylvania

Homebuilding Mid East Kentucky, New York, Ohio, western Pennsylvania and Indiana

Homebuilding South East North Carolina, South Carolina, Florida and Tennessee

Homebuilding profit before tax includes all revenues and income generated from the sale of homes, less the cost of homes sold, selling, general and administrative expenses, and a corporate capital allocation charge. The corporate capital allocation charge eliminates in consolidation, is based on the segment's average net assets employed, and is charged using a consistent methodology in the years presented. The corporate

NVR, Inc.

Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

capital allocation charged to the operating segment allows the Chief Operating Decision Maker to determine whether the operating segment's results are providing the desired rate of return after covering the Company's cost of capital. The Company records charges on contract land deposits when it is determined that it is probable that recovery of the deposit is impaired. For segment reporting purposes, impairments on contract land deposits are charged to the operating segment upon the determination to terminate a finished lot purchase agreement with the developer, or to restructure a lot purchase agreement resulting in the forfeiture of the deposit. Mortgage banking profit before tax consists of revenues generated from mortgage financing, title insurance and closing services, less the costs of such services and general and administrative costs. Mortgage banking operations are not charged a capital allocation charge.

In addition to the corporate capital allocation and contract land deposit impairments discussed above, the other reconciling items between segment profit and consolidated profit before tax include unallocated corporate overhead (including all management incentive compensation), equity-based compensation expense, consolidation adjustments and external corporate interest expense. NVR's overhead functions, such as accounting, treasury, human resources, etc., are centrally performed and the costs are not allocated to the Company's operating segments. Consolidation adjustments consist of such items necessary to convert the reportable segments' results, which are predominantly maintained on a cash basis, to a full accrual basis for external financial statement presentation purposes, and are not allocated to the Company's operating segments. Likewise, equity-based compensation expense is not charged to the operating segments. External corporate interest expense is primarily comprised of interest charges on the Company's Senior Notes and is not charged to the operating segments because the charges are included in the corporate capital allocation discussed above.

Following are tables presenting revenues, segment profit and segment assets for each reportable segment, with reconciliations to the amounts reported for the consolidated enterprise, where applicable:

	Year Ended December 31,		
	2010	2009	2008

NVR, Inc.
Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

- (1) This item represents changes to the contract land deposit impairment reserve, which are not allocated to the reportable segments. During both 2010 and 2009, unallocated reserves decreased from the respective prior years primarily as a result of charging previously reserved land impairments to the operating segments and to certain recoveries of deposits previously determined to be impaired.
- (2) The increase in equity-based compensation expense in 2010 compared to the prior year was primarily due to the granting of non-qualified stock options and restricted share units from the 2010 Equity Incentive Plan in the current year. The current year increase in stock based compensation expense was partially offset by an approximate \$7,600 pre-tax reversal of stock-based compensation expense attributable to an adjustment of the Company's option forfeiture estimates based on the Company's actual forfeiture experience.
- (3) This item represents the elimination of the corporate capital allocation charge included in the respective homebuilding reportable segments. The corporate capital allocation charge is based on the segment's monthly average asset balance, and is as follows for the years presented:

	Year Ended December 31,		
	2010	2009	2008
Homebuilding Mid Atlantic	\$ 44,758	\$ 40,765	\$ 73,042
Homebuilding North East	5,926	6,473	10,081
Homebuilding Mid East	9,657	8,863	12,902
Homebuilding South East	5,630	5,652	12,484
Total	\$ 65,971	\$ 61,753	\$ 108,509

- (4) The increases in unallocated corporate overhead in 2010 from 2009 is attributable to increased personnel levels year over year and to higher management incentive costs as the prior year incentive plan was limited to a payout of 50% of the maximum bonus opportunity. The decrease in 2009 from 2008 was primarily driven by a reduction in personnel and other overhead costs as part of the Company's focus to size the organization to meet current activity levels.
- (5) The 2008 impairment charge relates to the write-off of goodwill and indefinite life intangible assets related to the Company's 2005 acquisition of Rymarc Homes and the goodwill related to the 1997 acquisition of Fox Ridge Homes.
- (6) The decrease in consolidated variable interest entities (VIEs) was attributable to the adoption of amended ASC 810, which resulted in the deconsolidation in 2010 of all VIEs consolidated in 2009. The current year balance relates to the assets of one joint venture consolidated under ASC 810. See Note 3 for additional discussion of VIEs.
- (7) Land under development is not allocated to the respective operating segment until the building lots are finished. See Note 3 for additional discussion of land under development.
- (8) The increase in consolidation adjustments and other was attributable to an approximate \$18,000 increase in restricted cash resulting from the transition to a new letter of credit agreement which requires the Company to

maintain cash reserves equal to the value of letter of credits outstanding. The decrease in 2009 from 2008 was primarily attributable to changes in the corporate consolidation entries based on production volumes year over year.

3. Consolidation of Variable Interest Entities, Joint Ventures and Land Under Development

Effective January 1, 2010, NVR adopted Statement of Financial Accounting Standards No. 167, *Amendments to FASB Interpretation No. 46(R)*, as codified in ASC 810, *Consolidation*, through Accounting Standards Update 2009-17 (ASC 810). This statement amends FASB Interpretation 46R related to the consolidation of variable interest entities (VIEs), revises the approach to determining the primary

NVR, Inc.
Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

beneficiary of a VIE to be more qualitative in nature, and requires companies to more frequently reassess whether they must consolidate a VIE.

Fixed Price Purchase Agreements

NVR generally does not engage in the land development business. Instead, the Company typically acquires finished building lots at market prices from various development entities under fixed price purchase agreements. The purchase agreements require deposits that may be forfeited if NVR fails to perform under the agreement. The deposits required under the purchase agreements are in the form of cash or letters of credit in varying amounts, and typically range up to 10% of the aggregate purchase price of the finished lots.

NVR believes this lot acquisition strategy reduces the financial requirements and risks associated with direct land ownership and land development. NVR may, at its option, choose for any reason and at any time not to perform under these purchase agreements by delivering notice of its intent not to acquire the finished lots under contract. NVR's sole legal obligation and economic loss for failure to perform under these purchase agreements is limited to the amount of the deposit pursuant to the liquidated damage provisions contained within the purchase agreements. In other words, if NVR does not perform under a purchase agreement, NVR loses only its deposit. None of the creditors of any of the development entities with which NVR enters fixed price purchase agreements have recourse to the general credit of NVR. NVR generally does not have any specific performance obligations to purchase a certain number or any of the lots, nor does NVR guarantee completion of the development by the developer or guarantee any of the developers financial or other liabilities.

NVR is not involved in the design or creation of any of the development entities from which the Company purchases lots under fixed price purchase agreements. The developer's equity holders have the power to direct 100% of the operating activities of the development entity. NVR has no voting rights in any of the development entities. The sole purpose of the development entity's activities is to generate positive cash flow returns to the equity holders. Further, NVR does not share in any of the profit or loss generated by the project's development. The profits and losses are passed directly to the developer's equity holders.

The deposit placed by NVR pursuant to the fixed price purchase agreement is deemed to be a variable interest in the respective development entities. Those development entities are deemed to be variable interest entities. Therefore, the development entities with which NVR enters fixed price purchase agreements, including the joint venture limited liability corporations, as discussed below, are evaluated for possible consolidation by NVR. An enterprise must consolidate a VIE when that enterprise has a controlling financial interest in the VIE. An enterprise is deemed to have a controlling financial interest if it has i) the power to direct the activities of a variable interest entity that most significantly impact the entity's economic performance, and ii) the obligation to absorb losses of the VIE that could be significant to the VIE or the rights to receive benefits from the VIE that could be significant to the VIE.

NVR believes the activities that most significantly impact a development entity's economic performance are the operating activities of the entity. Unless and until a development entity completes finished building lots through the development process to be able to sell, the process of which the development entities' equity investors bear the full risk, the entity does not earn any revenues. The operating development activities are managed solely by the development entity's equity investors.

The development entities with which NVR contracts to buy finished lots typically select the respective projects, obtain the necessary zoning approvals, obtain the financing required with no support or guarantees from NVR, select who will purchase the finished lots and at what price, and manage the completion of the infrastructure improvements, all for the purpose of generating a cash flow return to the development entity's equity holders and all independent of NVR. The Company possesses no more than limited protective legal

NVR, Inc.
Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

rights through the purchase agreement in the specific finished lots that it is purchasing, and NVR possesses no participative rights in the development entities. Accordingly, NVR does not have the power to direct the activities of a developer that most significantly impact the developer's economic performance. For this reason, NVR has concluded that it is not the primary beneficiary of the development entities with which the Company enters fixed price purchase agreements, and therefore, NVR does not consolidate any of these VIEs.

As of December 31, 2010, NVR controlled approximately 50,400 lots with deposits in cash and letters of credit totaling approximately \$174,300 and \$6,600, respectively. As noted above, NVR's sole legal obligation and economic loss for failure to perform under these purchase agreements is limited to the amount of the deposit pursuant to the liquidated damage provisions contained within the purchase agreements and in very limited circumstances, specific performance obligations, as follows:

	December 31, 2010
Contract land deposits	\$ 174,303
Loss reserve on contract land deposits	(73,517)
 Contract land deposits, net	 100,786
 Contingent obligations in the form of letters of credit	 6,610
Contingent specific performance obligations (1)	1,944
 Total risk of loss	 \$ 109,340

(1) At December 31, 2010, the Company was committed to purchase 43 finished lots under specific performance obligations.

At December 31, 2009, the Company evaluated all of its fixed price purchase agreements and LLC arrangements and determined that it was the primary beneficiary of twenty-one of those development entities with which the agreements and arrangements are held. As a result, at December 31, 2009, NVR had consolidated such development entities in the accompanying consolidated balance sheet. Where NVR deemed itself to be the primary beneficiary of a development entity created after December 31, 2003 and the development entity refused to provide financial statements, NVR utilized estimation techniques to perform the consolidation. The effect of the consolidation at December 31, 2009 was the inclusion on the balance sheet of \$70,430 as Consolidated assets not owned, with a corresponding inclusion of \$65,915 as Liabilities related to consolidated assets not owned, after elimination of intercompany items. Inclusive in these totals were assets and liabilities of approximately \$40,900 for twelve development entities created after December 31, 2003 that did not provide financial statements. Upon adoption of ASC 810, all of the assets and liabilities of consolidated VIEs at December 31, 2009 were deconsolidated, and there was no resultant gain or loss.

Joint Ventures

On a limited basis, NVR also obtains finished lots using joint venture limited liability corporations (JVs). All JVs are typically structured such that NVR is a non-controlling member and is at risk only for the amount the Company has invested. NVR is not a borrower, guarantor or obligor on any debt of the JVs. The Company enters into a standard fixed price purchase agreement to purchase lots from these JVs, and as a result has a variable interest in these JVs.

At December 31, 2010, the Company had an aggregate investment totaling approximately \$37,200 in three JVs that are expected to produce approximately 1,100 finished lots. At December 31, 2010, NVR had additional funding commitments in the aggregate totaling \$5,000 to one of the three JVs. The Company has determined that it is not the

primary beneficiary of two of the JVs because NVR and the respective JV partner share power, and the joint venture investments related to those two JVs are included in other assets in the

68

NVR, Inc.

Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

accompanying consolidated balance sheet. NVR has concluded that it is the primary beneficiary of the remaining JV because the Company has the controlling financial interest in the JV. The condensed balance sheet at December 31, 2010 of the consolidated JV is as follows:

	December 31, 2010
Cash	\$ 358
Restricted cash	501
Other assets	126
Land under development	21,386
Total assets	\$ 22,371
Debt	\$ 7,592
Accrued expenses	59
Equity	14,720
Total liabilities and equity	\$ 22,371

At December 31, 2009, NVR had an aggregate investment totaling approximately \$25,000 in ten separate LLCs. As of December 31, 2009, eight of these LLCs were non-performing and as a result NVR had recorded an impairment reserve equal to the Company's total investment of approximately \$3,000 in these LLCs. NVR does not expect to obtain any lots from these eight LLCs in future periods. In the two performing LLCs, the Company's aggregate investment totaled \$22,000 and the Company controlled approximately 760 lots through these LLCs. The Company's investment in LLCs is recorded in Other assets in the consolidated financial statements. At December 31, 2009, NVR had additional funding commitments totaling \$4,000 to one of these two performing LLCs. Also included in Other assets in the 2009 consolidated balance sheet is an acquisition and development loan note receivable that the Company purchased for approximately \$20,000, on which the Company foreclosed on the underlying real estate.

Distributions received from joint ventures are considered operating cash flows within the accompanying statements of cash flows to the extent of NVR's cumulative share of joint venture income. Any distributions received in excess of that amount are considered a return of capital, and is classified as cash flows from investing activities.

Land Under Development

During 2010, NVR directly acquired four separate raw parcels of land zoned for their intended use with a cost basis at December 31, 2010 of approximately \$78,000 that it intends to develop into approximately 890 finished lots for use in its homebuilding operations. All of the raw parcels are located in the Washington, D.C. metropolitan area. One of the parcels, with a cost basis of approximately \$51,000 at December 31, 2010, was acquired from an entity controlled by Elm Street Development, Inc., which is controlled by one of our directors, William A. Moran. Land under development includes the land acquisition costs, direct improvement costs, capitalized interest, where applicable, and real estate taxes. Based on current market conditions, NVR may, on a very limited basis, directly acquire additional raw parcels to develop into finished lots.

4. Related Party Transactions

During the year ended December 31, 2010, NVR entered into new forward lot purchase agreements to purchase finished building lots for a total purchase price of approximately \$55,000 with Elm Street Development, Inc. (Elm Street), which is controlled by one of our directors, Mr. Moran. The independent members of our Board approved

these transactions, and the Company expects to purchase these finished lots over the next four years at the contract prices. During 2010, 2009 and 2008, NVR purchased developed lots at

NVR, Inc.

Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

market prices from Elm Street for approximately \$54,600, \$46,700 and \$38,000. NVR expects to purchase the majority of the remaining lots under contract at December 31, 2010 over the next four years for an aggregate purchase price of approximately \$117,000. During 2010, NVR forfeited \$118 of deposit to restructure a forward lot purchase agreement to obtain reduced purchase prices for finished lots under the agreement. The Company also continues to control a parcel of raw land expected to yield at least 600 finished lots through a joint venture entered into with Elm Street during 2009. NVR did not make any additional capital contributions to that joint venture in 2010. Further, during 2010, NVR also purchased a zoned, unimproved raw parcel of land from Elm Street for a total purchase price of approximately \$49,000 which is included in the land under development caption in the accompanying balance sheet at a current cost basis, including development costs, of approximately \$51,000. See Note 3 herein for further discussion of land under development.

NVR, Inc.

Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

- (a) During 2010 and 2009, the Company, as borrower, had available a \$300,000 unsecured working capital revolving credit facility (the Facility). Effective October 27, 2010, the Company voluntarily terminated the Facility which was set to expire on December 6, 2010. The Company currently does not intend to enter into a new credit facility; however, effective October 27, 2010, the Company entered into an uncommitted collateralized letter of credit facility to issue letters of credit in our ordinary course of business. See Note 10 for further discussion of letters of credit.
- (b) The capital lease obligations have fixed interest rates ranging from 13.1% to 14.1% and are collateralized by land, buildings and equipment with a net book value of approximately \$681 and \$866 at December 31, 2010 and 2009, respectively.

The following schedule provides future minimum lease payments under all capital leases together with the present value as of December 31, 2010:

	Year ending December 31,
2011	\$ 346
2012	644
2013	644
2014	669
2015	56
Thereafter	2,359
Amount representing interest	(608)
	\$ 1,751

- (c) On June 17, 2003, NVR completed an offering, at par, for \$200,000 of 5% Senior Notes due 2010 (the Senior Notes) under a shelf registration statement filed in 1998 with the Securities and Exchange Commission (the SEC). The Senior Notes bore interest at 5%, payable semi-annually in arrears on June 15 and December 15. The Senior Notes matured on June 15, 2010, and upon their maturity, the Company redeemed the \$133,370 in outstanding Senior Notes at par.

On September 8, 2008, the Company filed a shelf registration statement (the 2008 Shelf Registration) with the SEC to register for future offer and sale an unlimited amount of debt securities, common shares, preferred shares, depositary shares representing preferred shares and warrants. This discussion of the 2008 Shelf Registration does not constitute an offer of any securities for sale.

- (d) On July 30, 2010, NVRM renewed and amended its Master Repurchase Agreement dated August 5, 2008 with U.S. Bank National Association, as Agent and representative of itself as a Buyer, and the other Buyers thereto (the Master Repurchase Agreement) pursuant to a Second Amendment to Master Repurchase Agreement with U.S. Bank National Association, as Agent and representative of itself as Buyer (Agent), and the other Buyers thereto (together with the Master Repurchase Agreement, the Repurchase Agreement). The purpose of the Repurchase Agreement is to finance the origination of mortgage loans by NVRM. The Repurchase Agreement provides for loan purchases up to \$100,000, subject to certain sub limits. In addition, the Repurchase Agreement provides for an accordion feature under which NVRM may request that the aggregate commitments under the

Repurchase Agreement be increased to an amount up to \$125,000. The Repurchase Agreement expires on August 2, 2011.

Advances under the Repurchase Agreement carry a Pricing Rate based on the Libor Rate plus the

71

NVR, Inc.

Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

Libor Margin, or the Default Pricing Rate, as determined under the Repurchase Agreement, provided that the Pricing Rate shall not be less than 4.5%. Prior to the July 30, 2010 renewal date, the Pricing Rate was based on LIBOR plus LIBOR Margin, or at NVRM's option, the Balance Funded Rate, which included credit for compensating balances. Under the Repurchase Agreement, the Company may enter into separate agreements with the Buyers party to the Repurchase Agreement, adjusting the Pricing Rate in effect. These separate agreements do not effect the maximum aggregate commitment available under the Repurchase Agreement. There are several restrictions on purchased loans, including that they cannot be sold to others, they cannot be pledged to anyone other than the agent, and they cannot support any other borrowing or repurchase agreement. The average Pricing Rate on outstanding balances at December 31, 2010 was 4.1%. The average Pricing Rate for amounts outstanding under the previous Repurchase Agreement at December 31, 2009 was 4.1%.

At December 31, 2010, there was \$90,338 outstanding under the Repurchase Agreement, which is included in Mortgage Banking Note payable in the accompanying consolidated balance sheet. Amounts outstanding under the Repurchase Agreement are collateralized by the Company's mortgage loans held for sale, which are included in assets in the December 31, 2010 balance sheet in the accompanying consolidated financial statements. There were no borrowing base limitations at December 31, 2010.

The Repurchase Agreement contains various affirmative and negative covenants. The negative covenants include among others, certain limitations on transactions involving acquisitions, mergers, the incurrence of debt, sale of assets and creation of liens upon any of its Mortgage Notes. Additional covenants include (i) a tangible net worth requirement, (ii) a minimum liquidity requirement, (iii) a minimum tangible net worth ratio, (iv) a minimum net income requirement, and (v) a maximum leverage ratio requirement. The Company was in compliance with all covenants under the Repurchase Agreement at December 31, 2010.

* * * * *

Maturities with respect to the Company's debt as of December 31, 2010 are as follows:

	Year ending December 31,
2011	\$ 90,441
2012	456
2013	520
2014	616
2015	56
Thereafter	
Total	\$ 92,089

The \$90,441 maturing in 2011 includes \$90,338 of borrowings under the Repurchase Agreement.

7. Common Stock

There were 5,663,556 and 5,950,111 common shares outstanding at December 31, 2010 and 2009, respectively. As of December 31, 2010, NVR had reacquired a total of approximately 21,400,000 shares of NVR common stock at an aggregate cost of approximately \$3,837,000 since December 31, 1993. The Company repurchased 644,562 shares at an aggregate purchase price of approximately \$417,080 during 2010. The Company did not repurchase any shares during 2009 or 2008.

Since 1999, the Company has issued shares from the treasury for all stock option exercises. There

NVR, Inc.

Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

have been approximately 6,507,000 common shares reissued from the treasury in satisfaction of stock option exercises and other employee benefit obligations. The Company issued 359,765; 418,775 and 426,751 such shares during 2010, 2009 and 2008, respectively.

8. Income Taxes

The provision for income taxes consists of the following:

	Year Ended December 31, 2010	Year Ended December 31, 2009	Year Ended December 31, 2008
<i>Current:</i>			
Federal	\$ 96,449	\$ 69,911	\$ 63,614
State	12,468	8,556	9,785
<i>Deferred:</i>			
Federal	6,352	23,474	(5,702)
State	1,119	4,293	(1,134)
	\$ 116,388	\$ 106,234	\$ 66,563

In addition to amounts applicable to income before taxes, the following income tax benefits were recorded in shareholders' equity:

	Year Ended December 31, 2010	Year Ended December 31, 2009	Year Ended December 31, 2008
Income tax benefits arising from compensation expense for tax purposes in excess of amounts recognized for financial statement purposes	\$ 63,558	\$ 66,448	\$ 50,240

Deferred income taxes on NVR's consolidated balance sheets are comprised of the following:

	December 31, 2010	December 31, 2009
Deferred tax assets:		
Other accrued expenses and contract land deposit reserve	\$ 96,459	\$ 104,907
Deferred compensation	11,642	16,897
Equity-based compensation expense	49,469	43,149
Uniform capitalization	5,495	5,477
Unrecognized tax benefit	24,514	25,671
Other	5,856	10,480
Total deferred tax assets	193,435	206,581
Less: deferred tax liabilities	948	531
Net deferred tax position	\$ 192,487	\$ 206,050

Deferred tax assets arise principally as a result of various accruals required for financial reporting purposes, stock option expense and deferred compensation, which are not currently deductible for tax return purposes.

NVR, Inc.

Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

Management believes that the Company will have sufficient available carry-backs and future taxable income to make it more likely than not that the net deferred tax assets will be realized. Federal taxable income is estimated to be \$118,240 for the year ended December 31, 2010, and was \$56,157 for the year ended December 31, 2009.

A reconciliation of income tax expense in the accompanying Consolidated Statements of Income to the amount computed by applying the statutory Federal income tax rate of 35% to income before taxes is as follows:

	Year Ended December 31, 2010	Year Ended December 31, 2009	Year Ended December 31, 2008
Income taxes computed at the Federal statutory rate	\$ 112,838	\$ 104,445	\$ 58,609
State income taxes, net of Federal income tax benefit	7,731	7,467	6,004
Other, net	(4,181)	(5,678)	1,950
	\$ 116,388	\$ 106,234	\$ 66,563

The Company's effective tax rate in 2010, 2009 and 2008 was 36.10%, 35.60% and 39.75%, respectively. The lower effective tax rates in 2010 and 2009 as compared to 2008 were due to the expiration of certain tax reserves previously established, the amendment of certain prior year federal and state income tax returns that the Company believes will result in tax refunds, and changes under Internal Revenue Code Section 199, domestic manufacturing deduction, that provides the Company the ability to obtain a larger tax benefit. In addition, the 2009 effective tax rate was favorably impacted by Mr. Schar relinquishing his Executive Officer role with the Company in 2009, generating a tax benefit related to compensation expense recorded for certain outstanding option grants held by Mr. Schar that were previously considered to be a permanent non-deductible tax difference.

The Company files a consolidated U.S. federal income tax return, as well as state and local tax returns in all jurisdictions where the Company maintains operations. With few exceptions, the Company is no longer subject to income tax examinations by tax authorities for years prior to 2007.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

	Year Ended December 31, 2010	Year Ended December 31, 2009
Balance at beginning of year	\$ 48,669	\$ 53,339
Additions for tax positions for prior years		72
Additions based on tax positions related to the current year	4,092	2,769
Reductions for tax positions of prior years	(8,039)	(7,511)
Settlements		
Balance at end of year	\$ 44,722	\$ 48,669

If recognized, the total amount of unrecognized tax benefits that would affect the effective tax rate (on a net basis) is \$29,070.

The Company recognizes interest related to unrecognized tax benefits as a component of income tax expense. For the years ended December 31, 2010, 2009 and 2008 the Company accrued interest on unrecognized tax benefits in the amounts of \$573, \$932 and \$5,150, respectively. For the years ended December 31, 2010 and 2009, the Company had a total of \$22,721 and \$22,149, respectively, of accrued

NVR, Inc.

Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

interest on unrecognized tax benefits in its balance sheet. Based on its historical experience in dealing with various taxing authorities, the Company has found that it is the administrative practice of these authorities to not seek penalties from the Company for the tax positions it has taken on its returns, related to its unrecognized tax benefits. Therefore, the Company does not accrue penalties for the positions in which it has an unrecognized tax benefit. However, if such penalties were to be accrued, they would be recorded as a component of income tax expense.

The Company believes that within the next 12 months, it is reasonably possible that the unrecognized tax benefits will be reduced by approximately \$3,026 due to statute expiration in various state jurisdictions. The Company is currently under audit by the states of New York, Pennsylvania, South Carolina and Tennessee.

9. Equity-Based Compensation, Profit Sharing and Deferred Compensation Plans

Equity-Based Compensation Plans

NVR's equity-based compensation plans provide for the granting of non-qualified stock options to purchase shares of NVR common stock (Options) and restricted share units (RSUs) to key management employees, including executive officers and Board members, of the Company. The exercise price of Options granted is equal to the closing price of the Company's common stock on the New York Stock Exchange on the day prior to the date of grant, and RSUs are issued at a \$0 exercise price. Options are granted for a ten-year term and typically vest in separate tranches over periods of 3 to 8 years, depending upon the plan from which the shares were granted, based solely on continued employment or continued service as a Director. RSUs are also granted for a ten-year term and generally vest in separate tranches over a period of 2 years, based solely on continued employment or continued service as a Director. At December 31, 2010, there was an aggregate of 1,053,425 options and 149,727 RSUs outstanding, and there were an additional 270,247 available shares to be granted under existing equity-based compensation plans. Of the available shares to be granted, up to 90,273 shares may be granted in the form of RSUs.

The following is a summary description of each of the Company's equity-based compensation plans for any plan with grants outstanding at December 31, 2010:

During 1996, the Company's shareholders approved the Board of Directors' adoption of the Management Long-Term Stock Option Plan (the 1996 Option Plan). There are 2,000,000 Options authorized under the Management Long Term Stock Option Plan. All Options were granted at an exercise price equal to the closing price of the Company's common stock on the New York Stock Exchange on the day prior to the date of grant. The outstanding Options expire 10 years after the dates upon which they were granted, and vest annually in 25% increments beginning on December 31, 2006, or later depending on the date of grant. There are no grants remaining available to issue from the 1996 Option Plan.

During 1999, the Company's shareholders approved the Board of Directors' adoption of the 1998 Management Long-Term Stock Option Plan (the 1998 Option Plan). There are 1,000,000 Options authorized under the 1998 Option Plan. All Options were granted at an exercise price equal to the closing price of the Company's common stock on the New York Stock Exchange on the day prior to the date of grant. The Options expire 10 years after the dates upon which they were granted. The outstanding Options generally vest in 25% increments beginning on December 31, 2006, or later depending on the date of grant. There are no grants remaining available to issue from the 1998 Option Plan.

NVR, Inc.

Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

During 1999, the Company's shareholders approved the Board of Directors' adoption of the 1998 Directors Long Term Stock Option Plan (the 1998 Directors Plan). There were 150,000 Options to purchase shares of common stock authorized for grant to the Company's outside directors under the 1998 Directors Plan. All Options are granted at an exercise price equal to the closing price of the Company's common stock on the New York Stock Exchange on the day prior to the date of grant. The Options were granted for a 10-year period and generally vest annually in twenty-five percent (25%) increments beginning on December 31, 2006, or later as determined by the date of grant. There are no grants remaining available to issue from the 1998 Directors Plan.

During 2000, the Board approved the 2000 Broadly-Based Stock Option Plan (the 2000 Plan). The Company did not seek approval from its shareholders for the 2000 Plan. There are 2,000,000 Options authorized under the 2000 Plan. All Options are granted at an exercise price equal to the closing price of the Company's common stock on the New York Stock Exchange on the day prior to the date of grant. Grants under the 2000 Plan are available to both employees and members of the Board. The distribution of Options to key employees and members of the board, in aggregate, are limited to 50% or less of the total options authorized under the 2000 Plan. Options granted under the 2000 Plan expire 10 years from the date of grant, and generally vest annually in 25% increments beginning on December 31, 2006, or later depending on the date of grant. There are no grants remaining available to issue from the 2000 Plan.

During 2010, the Company's shareholders approved the Board of Directors' adoption of the 2010 Equity Incentive Plan (the 2010 Equity Plan). The 2010 Equity Plan authorizes the Company to issue non-qualified stock options (Options) and restricted share units (RSUs) to key management employees, including executive officers and Board members, to acquire up to an aggregate 700,000 shares of the Company's common stock. Of the 700,000 aggregate shares available to issue, up to 240,000 may be granted in the form of RSUs. All Options are granted at an exercise price equal to the closing price of the Company's common stock on the New York Stock Exchange on the day prior to the date of grant, and all RSUs are granted at a \$0 exercise price. The Options and RSUs are granted for a 10-year period. The RSUs generally vest annually in 50% increments beginning on December 31, 2011, and the Options generally vest as to 50% of the underlying shares in annual increments beginning on December 31, 2013. At December 31, 2010, there were 270,247 shares available to be granted under the 2010 Equity Plan, of which 90,273 may be granted as RSUs.

During 2010, the Company issued Options to purchase 152,690 shares of its common stock under the 2000 Plan. The Company also issued 282,143 Options and 150,504 RSUs under the 2010 Plan. The exercise price of each Option granted was equal to the closing price of the Company's common stock on the day immediately preceding the date of grant, and each RSU was granted at a \$0 exercise price. Each Option and RSU was granted for a term of ten (10) years from the date of grant. The majority of the Options will vest in 50% increments on each of December 31, 2013 and 2014, and the RSUs will vest in 50% increments on each of December 31, 2011 and 2012. All Options and RSUs granted are subject to the grantee's continued employment or continued service as a Director, as applicable.

The following table provides additional information relative to NVR's equity-based compensation plans for the year ended December 31, 2010:

NVR, Inc.
Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

	Options	Weighted Average Exercise Price	Weighted Average Remaining Contract Life (Years)	Aggregate Intrinsic Value

Exercisable at end of period				\$

(1) RSUs granted in the current year were issued at a \$0 exercise price.

To estimate the grant-date fair value of its stock options, the Company uses the Black-Scholes option-pricing model. The Black-Scholes model estimates the per share fair value of an option on its date of grant based on the following factors: the option's exercise price; the price of the underlying stock on the date of grant; the estimated dividend yield; a risk-free interest rate; the estimated option term; and the expected volatility. For the risk-free interest rate, the Company uses a U.S. Treasury Strip due in a number of years equal to the option's expected term. NVR has concluded that its historical exercise experience is the best estimate of future exercise patterns to determine an option's expected term. To estimate expected volatility, NVR analyzed the historic volatility of its common stock over a period equal to the option's expected term. The fair value of the Options granted during 2010 was estimated on the grant date using the Black-Scholes option-pricing model based on the following assumptions:

	2010	2009	2008
Estimated option life	5.02 years	4.70 years	3.95 years
Risk free interest rate (range)	0.99% - 2.84%	1.78% - 3.65%	1.00% - 4.19%
Expected volatility (range)	34.34% - 41.12%	31.83% - 41.72%	31.57% - 38.75%
Expected dividend rate	0.00%	0.00%	0.00%
	\$ 256.35	\$ 187.10	\$ 156.85

Weighted average grant-date fair value per share of options granted

In accordance with ASC Topic 718, *Compensation-Stock Compensation*, the fair value of the RSUs is measured as if they were vested and issued on the grant date. Additionally, under ASC 718, service only restrictions on vesting of RSUs are not reflected in the fair value calculation at the grant date. As a result, the fair value of the RSUs was the closing price of the Company's common stock on the day immediately preceding the date of grant. The weighted average fair value of the RSUs granted in the current year was \$702.94 per share.

Compensation cost for Options and RSUs is recognized on a straight-line basis over the requisite service period for the entire award (from the date of grant through the period of the last separately vesting

NVR, Inc.

Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

portion of the grant). For the recognition of equity-based compensation, the RSUs are treated as a separate award from the Options. Compensation cost is recognized within the income statement in the same expense line as the cash compensation paid to the respective employees. ASC 718 also requires the Company to estimate forfeitures in calculating the expense related to stock-based compensation and requires that the compensation costs of stock-based awards be recognized net of estimated forfeitures. The impact on compensation costs due to changes in the expected forfeiture rate will be recognized in the period that they become known. In 2010, 2009, and 2008, the Company recognized \$53,136, \$46,302 and \$41,204 in equity-based compensation costs, respectively, and approximately \$19,200, \$18,000 and \$12,600 tax benefit related to equity-based compensation costs, respectively. In 2010, the Company reversed approximately \$7,600 in stock-based compensation expense previously recorded to adjust compensation expense for the actual forfeiture experience from prior forfeiture rate estimates. The reversal was made to the accounts originally charged as follows; approximately \$6,600 and \$400 from homebuilding general and administrative and cost of sales expense, respectively, and approximately \$600 from NVRM general and administrative expense.

As of December 31, 2010, the total unrecognized compensation cost for all outstanding Options and RSUs equals approximately \$165,232, net of estimated forfeitures. The unrecognized compensation cost will be recognized over each grant's applicable vesting period with the latest vesting date being December 31, 2016. The weighted-average period over which the unrecognized compensation will be recorded is equal to approximately 2.1 years.

The Company settles option exercises by issuing shares of treasury stock to option holders. Shares are relieved from the treasury account based on the weighted average cost of treasury shares acquired. During the years ended December 31, 2010, 2009 and 2008, options to purchase shares of the Company's common stock of 359,765; 418,775 and 426,751 were exercised. Information with respect to the exercised options is as follows:

	2010	2009	2008
Aggregate exercise proceeds (1)	\$ 78,626	\$ 79,157	\$ 70,978
Aggregate intrinsic value on exercise dates	\$165,007	\$135,652	\$175,190

(1) Aggregate exercise proceeds include the option exercise price received in cash or the fair market value of NVR stock surrendered by the optionee in lieu of cash.

The Company has elected the alternative transition method to establish the beginning balance of the additional paid-in capital pool available to absorb any future write-offs of deferred tax benefits associated with stock-based compensation.

Profit Sharing Plans

NVR has a trustee-administered, profit sharing retirement plan (the Profit Sharing Plan) and an Employee Stock Ownership Plan (ESOP) covering substantially all employees. The Profit Sharing Plan and the ESOP provide for annual discretionary contributions in amounts as determined by the NVR Board of Directors. The combined plan contribution for the years ended December 31, 2010, 2009 and 2008 was \$6,567, \$6,447 and \$6,856, respectively. The ESOP purchased approximately 8,700 and 9,400 shares of NVR common stock in the open market for the 2010 and 2009 plan year contributions, respectively, using cash contributions provided by the Company. As of December 31, 2010, all shares held by the ESOP had been allocated to participants' accounts. The 2010 plan year contribution was funded and fully allocated to participants in February 2011.

NVR, Inc.

Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)**Deferred Compensation Plans**

The Company has two deferred compensation plans (Deferred Comp Plans). The specific purpose of the Deferred Comp Plans is to i) establish a vehicle whereby named executive officers may defer the receipt of salary and bonus that otherwise would be nondeductible for Company tax purposes into a period where the Company would realize a tax deduction for the amounts paid, and ii) to enable certain of our employees who are subject to the Company's stock holding requirements to acquire shares of our common stock on a pre-tax basis in order to more quickly meet, and maintain compliance with those stock holding requirements. Amounts deferred into the Deferred Comp Plans are invested in NVR common stock, held in a rabbi trust account, and are paid out in a fixed number of shares upon expiration of the deferral period.

The rabbi trust account held 158,894 and 265,278 shares of NVR common stock as of December 31, 2010 and 2009, respectively. During 2010, 106,384 shares of NVR common stock were issued from the rabbi trust related to deferred compensation for which the deferral period ended. There were no shares of NVR common stock contributed to the rabbi trust in 2010, 2009 or 2008. Shares held by the Deferred Comp Plan are treated as outstanding shares in the Company's earnings per share calculation for each of the years ended December 31, 2010, 2009 and 2008.

10. Commitments and Contingent Liabilities

NVR is committed under multiple non-cancelable operating leases involving office space, model homes, manufacturing facilities, automobiles and equipment. Future minimum lease payments under these operating leases as of December 31, 2010 are as follows:

	Year ended December 31,	
2011		\$ 19,014
2012		13,715
2013		10,305
2014		8,188
2015		6,260
Thereafter		16,926
		74,408
Sublease income		(1,201)
		\$ 73,207

Total rent expense incurred under operating leases was approximately \$29,741, \$34,024 and \$45,841 for the years ended December 31, 2010, 2009 and 2008, respectively.

The Company generally does not engage in the land development business. Instead, the Company typically acquires finished building lots at market prices from various development entities under fixed price purchase agreements. The purchase agreements require deposits that may be forfeited if the Company fails to perform under the agreement. The deposits required under the purchase agreements are in the form of cash or letters of credit in varying amounts, and typically range up to 10% of the aggregate purchase price of the finished lots. The Company believes this lot acquisition strategy reduces the financial requirements and risks associated with direct land ownership and land development. The Company generally seeks to maintain control over a supply of lots believed to be suitable to meet its five-year business plan. At December 31, 2010, assuming that contractual development milestones are met, the Company is committed to placing additional forfeitable deposits with land developers under existing lot option contracts of \$43,178. The Company also has seven specific performance contracts pursuant to

NVR, Inc.

Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

which the Company is committed to purchasing forty-three finished lots at an aggregate purchase price of approximately \$1,900.

During the ordinary course of operating the mortgage banking and homebuilding businesses, the Company is required to enter into bond or letter of credit arrangements with local municipalities, government agencies, or land developers to collateralize its obligations under various contracts. The Company had approximately \$38,300 of contingent obligations under such agreements (including \$16,400 for letters of credit as described in Note 6(a) herein) as of December 31, 2010. The Company believes it will fulfill its obligations under the related contracts and does not anticipate any material losses under these bonds or letters of credit.

The following table reflects the changes in the Company's warranty reserve for the following (see Note 1 herein for further discussion of warranty/product liability reserves):

	Year Ended December 31, 2010	Year Ended December 31, 2009	Year Ended December 31, 2008
Warranty reserve, beginning of year	\$ 64,417	\$ 68,084	\$ 70,284
Provision	44,633	35,688	40,468
Payments	(39,263)	(39,355)	(42,668)
Warranty reserve, end of year	\$ 69,787	\$ 64,417	\$ 68,084

On July 18, 2007, former and current employees filed lawsuits against the Company in the Court of Common Pleas in Allegheny County, Pennsylvania and Hamilton County, Ohio, in Superior Court in Durham County, North Carolina, and in the Circuit Court in Montgomery County, Maryland, and on July 19, 2007 in the Superior Court in New Jersey, alleging that the Company incorrectly classified its sales and marketing representatives as being exempt from overtime wages. These lawsuits are similar in nature to another lawsuit filed on October 29, 2004 by another former employee in the United States District Court for the Western District of New York. The complaints seek injunctive relief, an award of unpaid wages, including fringe benefits, liquidated damages equal to the overtime wages allegedly due and not paid, attorney and other fees and interest, and where available, multiple damages. The suits were filed as purported class actions. However, while a number of individuals have filed consents to join and assert federal claims in the New York action, none of the groups of employees that the lawsuits purport to represent have been certified as a class. The lawsuits filed in Ohio, Pennsylvania, Maryland, New Jersey and North Carolina have been stayed pending further developments in the New York action.

The Company believes that its compensation practices in regard to sales and marketing representatives are entirely lawful and in compliance with two letter rulings from the United States Department of Labor (DOL) issued in January 2007. The two courts to most recently consider similar claims against other homebuilders have acknowledged the DOL's position that sales and marketing representatives were properly classified as exempt from overtime wages and the only court to have directly addressed the exempt status of such employees concluded that the DOL's position was valid. Accordingly, the Company has vigorously defended and intends to continue to vigorously defend these lawsuits. Because the Company is unable to determine the likelihood of an unfavorable outcome of this case, or the amount of damages, if any, the Company has not recorded any associated liabilities in the accompanying consolidated balance sheets.

In June 2010, the Company received a Request for Information from the United States Environmental Protection Agency (the EPA) pursuant to Section 308 of the Clean Water Act. The request seeks information about storm water discharge practices in connection with homebuilding projects completed or underway by the Company. The Company has been cooperating with this request, has provided information to the EPA and intends to continue cooperating with the EPA's inquiries. At this time, the Company cannot predict the outcome of this inquiry, nor can it reasonably

estimate the potential costs that may be associated

NVR, Inc.
Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

with its eventual resolution.

In April 2010, NVRM received a Report of Examination (ROE) from the Office of the Commissioner of Banks of the State of North Carolina (the NCCOB) reporting certain findings that resulted from the NCCOB 's examination of selected files relating to loans originated by NVRM in North Carolina between August 1, 2006 and August 31, 2009. The ROE alleged that certain of the loan files reflected violations of North Carolina and/or U.S. lending or consumer protection laws. The ROE requested that NVRM correct or otherwise address the alleged violations and in some instances requested that NVRM undertake an examination of all of its other loans in North Carolina to determine whether similar alleged violations may have occurred, and if so, to take corrective action. NVRM responded to the ROE by letter dated June 10, 2010, contesting the findings and allegations, providing factual information to correct certain of the findings, and refuting the NCCOB 's interpretation of applicable law. On November 15, 2010, the NCCOB provided a written response to NVRM 's June 10, 2010 letter closing certain alleged violations while reasserting certain other violations. On January 12, 2011, NVRM responded to the NCCOB 's November 15, 2010 letter providing additional factual information to address the remaining findings, and refuting the NCCOB 's interpretation of applicable law. Accordingly, while the outcome of the matter is currently not determinable, the Company does not expect resolution of the matter to have a material adverse effect on the Company 's financial position.

The Company and its subsidiaries are also involved in various other litigation arising in the ordinary course of business. In the opinion of management, and based on advice of legal counsel, this litigation is not expected to have a material adverse effect on the financial position or results of operations of the Company. Legal costs incurred in connection with outstanding litigation are expensed as incurred.

11. Fair Value

Financial Instruments

On June 15, 2010, the Company redeemed upon maturity, the outstanding 5% Senior Notes due 2010 (Senior Notes) at par. As of December 31, 2009, the carrying value of the Senior Notes was \$133,370, and the estimated fair value, which is based on a quoted market price, was \$134,829.

Derivative Instruments and Mortgage Loans Held for Sale

In the normal course of business, NVR 's mortgage banking segment enters into contractual commitments to extend credit to buyers of single-family homes with fixed expiration dates. The commitments become effective when the borrowers 'lock-in' a specified interest rate within time frames established by NVR. All mortgagors are evaluated for credit worthiness prior to the extension of the commitment. Market risk arises if interest rates move adversely between the time of the 'lock-in' of rates by the borrower and the sale date of the loan to a broker/dealer. To mitigate the effect of the interest rate risk inherent in providing rate lock commitments to borrowers, the Company enters into optional or mandatory delivery forward sale contracts to sell whole loans and mortgage-backed securities to broker/dealers. The forward sale contracts lock in an interest rate and price for the sale of loans similar to the specific rate lock commitments. NVR does not engage in speculative or trading derivative activities. Both the rate lock commitments to borrowers and the forward sale contracts to broker/dealers are undesignated derivatives and, accordingly, are marked to fair value through earnings. At December 31, 2010, there were contractual commitments to extend credit to borrowers aggregating \$96,265 and open forward delivery contracts aggregating \$262,839.

GAAP assigns a fair value hierarchy to the inputs used to measure fair value. Level 1 inputs are quoted prices in active markets for identical assets and liabilities. Level 2 inputs are inputs other than quoted market prices that are observable for the asset or liability, either directly or indirectly. Level 3 inputs are

NVR, Inc.

Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

unobservable inputs. The fair value of the Company's rate lock commitments to borrowers and the related input levels includes, as applicable:

- i) the assumed gain/loss of the expected resultant loan sale (level 2);
- ii) the effects of interest rate movements between the date of the rate lock and the balance sheet date (level 2); and
- iii) the value of the servicing rights associated with the loan (level 2).

The assumed gain/loss considers the amount that the Company has discounted the price to the borrower from par for competitive reasons and the excess servicing to be received or buydown fees to be paid upon securitization of the loan. The excess servicing and buydown fees are calculated pursuant to contractual terms with investors. To calculate the effects of interest rate movements, the Company utilizes applicable published mortgage-backed security prices, and multiplies the price movement between the rate lock date and the balance sheet date by the notional loan commitment amount. The Company sells all of its loans on a servicing released basis, and receives a servicing released premium upon sale. Thus, the value of the servicing rights, which averaged 148 basis points of the loan amount as of December 31, 2010, is included in the fair value measurement and is based upon contractual terms with investors and varies depending on the loan type. The Company assumes an approximate 7% fallout rate when measuring the fair value of rate lock commitments. Fallout is defined as locked loan commitments for which the Company does not close a mortgage loan and is based on historical experience.

The fair value of the Company's forward sales contracts to broker/dealers solely considers the market price movement of the same type of security between the trade date and the balance sheet date (level 2). The market price changes are multiplied by the notional amount of the forward sales contracts to measure the fair value.

Mortgage loans held for sale are recorded at fair value when closed, and thereafter are carried at the lower of cost or fair value, net of deferred origination costs, until sold. The fair value of loans held for sale of \$177,244 included in the accompanying consolidated balance sheet has been reduced by \$4,453 from the aggregate principal balance of \$181,697.

The undesignated derivative instruments are included in the accompanying consolidated balance sheet as follows:

	Balance Sheet	Fair Value December 31, 2010
	Location	
Derivative Assets:		
Rate Lock Commitments and Forward Sales Contracts	NVRM - Other assets	\$ 5,461

The unrealized gain or loss from the change in the fair value measurements is included in earnings as a component of mortgage banking fees in the accompanying consolidated statements of income as follows:

NVR, Inc.
Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

	Notional or Principal Amount	Assumed Gain (Loss) From Loan Sale	Interest Rate Movement Effect	Servicing Rights Value	Security Price Change	Total Fair Value Adjustment Gain/(Loss)
Rate lock commitments	\$ 96,265	\$ (459)	\$ (317)	\$ 1,333	\$	\$ 557
Forward sales contracts	\$ 262,839				4,904	4,904
Mortgages held for sale	\$ 181,697	(907)	(6,217)	2,671		(4,453)
Total Fair Value Measurement, December 31, 2010		(1,366)	(6,534)	4,004	4,904	1,008
Less: Fair Value Measurement, December 31, 2009		(788)	(2,501)	2,187	2,445	1,343
Total Fair Value Adjustment for the period ended December 31, 2010		\$ (578)	\$ (4,033)	\$ 1,817	\$ 2,459	\$ (335)

The fair value measurement will be impacted in the future by the change in the value of the servicing rights and the volume and product mix of the Company's closed loans and locked loan commitments.

12. Mortgage Loan Loss Allowance

During the years ended December 31, 2010, 2009 and 2008, the Company recorded pre-tax charges for loan losses of approximately \$6,200, \$200 and \$850, respectively. Included in the Mortgage Banking segment's Accounts Payable and Other Liabilities line item within the accompanying consolidated balance sheet is a mortgage loan loss allowance equal to approximately \$8,200 and \$3,200 at December 31, 2010 and December 31, 2009, respectively.

13. Quarterly Results (unaudited)

The following table sets forth unaudited selected financial data and operating information on a quarterly basis for the years ended December 31, 2010 and 2009.

	Year Ended December 31, 2010			
	4th Quarter	3rd Quarter	2nd Quarter	1st Quarter
Revenues-homebuilding operations	\$794,470	\$661,935	\$946,972	\$577,381
