- \* In U.S. dollars unless otherwise indicated.
- (1) Senior floating-rate interests (Senior Loans) often require prepayments from excess cash flows or permit the borrowers to repay at their election. The degree to which borrowers repay, whether as a contractual requirement or at their election, cannot be predicted with accuracy. As a result, the actual remaining maturity may be substantially less than the stated maturities shown. However, Senior Loans will have an expected average life of approximately two to four years. The stated interest rate represents the weighted average interest rate of all contracts within the senior loan facility and includes commitment fees on unfunded loan commitments, if any. Senior Loans typically have rates of interest which are redetermined either daily, monthly, quarterly or semi-annually by reference to a base lending rate, plus a premium. These base lending rates are primarily the London Interbank Offered Rate ( LIBOR ) and secondarily, the prime rate offered by one or more major United States banks (the Prime Rate ) and the certificate of deposit ( CD ) rate or other base lending rates used by commercial lenders.
  - (2) Unfunded or partially unfunded loan commitments. The Fund may enter into certain credit agreements all or a portion of which may be unfunded. The Fund is obligated to fund these commitments at the borrower s discretion.
  - (3) Represents a payment-in-kind security which may pay all or a portion of interest/dividends in additional par/shares.
  - (4) Defaulted matured security. For a variable rate security, interest rate has been adjusted to reflect non-accrual status.
  - (5) Security valued at fair value using methods determined in good faith by or at the direction of the Trustees.
  - (6) Currently the issuer is in default with respect to interest payments. For a variable rate security, interest rate has been adjusted to reflect non-accrual status.
  - (7) Amount is less than 0.05%.
  - (8) This Senior Loan will settle after January 31, 2011, at which time the interest rate will be determined.
  - (9) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities may be sold in certain transactions (normally to qualified institutional buyers) and remain exempt from registration. At January 31, 2011, the aggregate value of these securities is \$343,742,536 or 17.3% of the Fund s net assets applicable to common shares.
  - (10) Security converts to floating rate after the indicated fixed-rate coupon period.
  - (11) Adjustable rate mortgage security. Rate shown is the rate at January 31, 2011.
  - (12) Security (or a portion thereof) has been pledged to cover collateral requirements on open financial contracts.
  - (13) Weighted average fixed-rate coupon that changes/updates monthly.
  - (14) Security held as collateral for borrowings under the Term Asset-Backed Securities Loan Facility (TALF).
  - (15) Variable rate security. The stated interest rate represents the rate in effect at January 31, 2011.
  - (16) Non-income producing security.
  - (17) Security was acquired in connection with a restructuring of a Senior Loan and may be subject to restrictions on resale.
  - (18) Restricted security.
  - (19) Affiliated investment company available to Eaton Vance portfolios and funds which invests in high quality, U.S. dollar denominated money market instruments. The rate shown is the annualized seven-day yield as of January 31, 2011. Net income allocated from the investment in Eaton Vance Cash Reserves Fund, LLC for the fiscal year to date ended January 31, 2011 was \$61,078.

A summary of open financial instruments at January 31, 2011 is as follows:

				<b>\$ 52,019</b>

At January 31, 2011, the Fund had sufficient cash and/or securities to cover commitments under these contracts.

The Fund is subject to foreign exchange risk in the normal course of pursuing its investment objective. Because the Fund holds foreign currency denominated investments, the value of these investments and related receivables and payables may change due to future changes in foreign currency exchange rates. To hedge against this risk, the Fund enters into forward foreign currency exchange contracts. The Fund also enters into such contracts to hedge the currency risk of investments it anticipates purchasing.

At January 31, 2011, the aggregate fair value of derivative instruments (not considered to be hedging instruments for accounting disclosure purposes) in an asset position and in a liability position and whose primary underlying risk exposure is foreign exchange risk was \$162,225 and \$110,206, respectively.

The cost and unrealized appreciation (depreciation) of investments of the Fund at January 31, 2011, as determined on a federal income tax basis, were as follows:

<b>Aggregate cost</b>	<b>\$ 2,656,953,717</b>
Gross unrealized appreciation	\$ 134,176,638
Gross unrealized depreciation	(78,549,811)
<b>Net unrealized depreciation</b>	<b>\$ 55,626,827</b>

**Restricted Securities**

At January 31, 2011, the Fund owned the following securities (representing 0.4% of net assets applicable to common shares) which were restricted as to public resale and not registered under the Securities Act of 1933 (excluding Rule 144A securities). Under generally accepted accounting principles for fair value measurements, a three-tier hierarchy to prioritize the assumptions, referred to as inputs, is used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including a fund's own assumptions in determining the fair value of investments)

In cases where the inputs used to measure fair value fall in different levels of the fair value hierarchy, the level disclosed is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

Transfers are reflected at the value of the securities at the beginning of the period. Transfers from Level 2 to Level 3 were due to a reduction in the availability of significant observable inputs in determining the fair value of these investments. Transfers from Level 3 to Level 2 were due to increased market trading activity resulting in the availability of significant observable inputs in determining the fair value of these investments.

At January 31, 2011, the value of investments transferred between Level 1 and Level 2, if any, during the fiscal year to date then ended was not significant.
