

MORGAN STANLEY INSURED MUNICIPAL INCOME TRUST

Form N-30D

June 27, 2002

Morgan Stanley Insured Municipal Income Trust
Letter to the Shareholders o April 30, 2002

Dear Shareholder:

During the six-month period ended April 30, 2002, the U.S. economy began to recover from recession and the aftermath of September 11. Consumer spending and rebuilding of business inventories led an economic rebound in the first quarter of 2002. In spite of April's six percent unemployment rate, the relatively mild recession, which began in March 2001, is widely regarded as having ended.

The economic turnaround was fueled by monetary and fiscal policies, which sought to stimulate growth. The Federal Reserve Board's aggressive monetary policy cut the benchmark federal funds rate by 475 basis points in 2001 to its current level of 1.75 percent. Congress provided fiscal stimulus by passing reductions in personal tax rates as well as a number of spending initiatives after the September attacks.

The Fed's actions and the Treasury Department's cessation of the 30-year bond auction led to a bond-market rally that dropped long-term interest rates to 40-year lows at the end of October. Within the fixed-income market, yields on short maturities declined the most and the yield curve steepened. In November and December, as the economy improved, the bond market reversed course and yields increased. Demand for fixed-income investments revived in 2002, because of stock-market volatility and Federal Reserve Chairman Alan Greenspan's comments that the Fed would take a go-slow approach to tightening monetary policy.

Municipal Market Conditions

The yield on the 30-year insured municipal bond index, which reached a low of 5.04 percent in October 2001, increased to 5.45 percent in March. As the Fed's outlook shifted to neutral, the index yield declined to 5.30 percent in April. Throughout the period, the slope of the municipal yield curve remained positive. The yield pick up for extending maturities from one to 30 years was 335 basis points versus 240 basis points last April.

The ratio of municipal yields as a percentage of U.S. Treasury yields is used as a gauge of the relative value of municipals. A declining yield ratio indicates stronger relative performance by municipals. The ratio of 30-year municipal bond yields to 30-year Treasuries jumped to 104 percent in October 2001. By the end of April the ratio had returned to 94 percent. In the 10-year-maturity range, the ratio declined from 95 percent in October to 85 percent in April.

New-issue volume increased 43 percent, to \$286 billion, during 2001. State and local government infrastructure and cash flow needs have contributed to the surge in underwriting activity. Refunding issues, the most interest-rate-sensitive category of underwriting, represented almost one-quarter of the total. California, Florida, New York and Texas, the four states with the heaviest issuance, accounted for 33 percent of national volume. New-issue volume for the first four months of 2002 reached \$87 billion.

Performance

During the six-month period ended April 30, 2002, the net asset value (NAV) of Morgan Stanley Insured Municipal Income Trust (IIM) decreased from \$15.42 to \$15.16 per share. Based on this change, plus a reinvestment of tax-free dividends totaling \$0.405 per share, the Trust's total NAV return was 1.21 percent. IIM's value on the New York Stock Exchange (NYSE) decreased from \$14.13 to \$13.93 per share during this period. Based on this change plus reinvestment of tax-free dividends, IIM's total market return was 1.49 percent. As of April 30, 2002, IIM's share price was at an 8.11 percent discount to its NAV.

Monthly dividends for the second quarter of 2002, declared in March, were unchanged at \$0.0675 per share. The Trust's level of undistributed net investment income was \$0.136 per share on April 30, 2002, versus \$0.086 per share six months earlier. Current earnings continued to benefit from lower short-term borrowing costs of Auction Rate Preferred Shares (ARPS).

2

Morgan Stanley Insured Municipal Income Trust
Letter to the Shareholders o April 30, 2002 continued

Portfolio Structure

The Trust's total net assets of \$546.7 million were diversified among 13 long-term sectors and 80 credits. At the end of April, the portfolio's average maturity was 19 years. Average duration, a measure of sensitivity to interest-rate changes, was 5.5 years. The accompanying charts provide current information on the portfolio's credit enhancements, maturity distribution, sector allocation and geographic concentration. Optional redemption provisions by year of the call and respective cost (book) yields are also charted.

The Impact of Leveraging

As discussed in previous shareholder reports, the total income available for distribution to common shareholders includes incremental income provided by the Trust's outstanding Auction Rate Preferred shares. ARPS dividends reflect prevailing short-term interest rates on maturities normally ranging from one week to one year. Incremental income to common shareholders depends on two factors. The first factor is the amount of ARPS outstanding, while the second is the spread between the portfolio's cost yield and ARPS expenses (ARPS auction rate and expenses). The greater the spread and amount of ARPS outstanding, the greater the amount of incremental income available for distribution to common shareholders. The level of net investment income

Edgar Filing: MORGAN STANLEY INSURED MUNICIPAL INCOME TRUST - Form N-30D

available for distribution to common shareholders varies with the level of short-term interest rates. ARPS leverage also increases the price volatility of common shares and has the effect of extending portfolio duration.

During the six-month period, ARPS leverage contributed approximately \$0.08 per share to common share earnings. IIM has five ARPS series totaling \$155 million and representing 28 percent of total net assets. The yields on IIM's weekly ARPS series ranged between 0.90 and 2.05 percent. The yields on the ARPS series with auctions maturing in July 2002, September 2002 and January 2004 were 2.95 percent, 2.47 percent and 2.47 percent, respectively.

Looking Ahead

The Federal Reserve Board's cautious approach toward tightening has helped stabilize the fixed-income markets. However, we believe that the economic recovery will eventually lead the Fed to raise short-term interest rates. Despite market uncertainty, we believe that the relationship between high-grade tax-exempt securities and Treasuries continues to favor municipal bonds as an attractive choice for tax-conscious investors.

The Trust's procedure for reinvesting all dividends and distributions in common shares is through purchases in the open market. This method helps support the market value of the Trust's shares. In addition, we would like to remind you that the Trustees have approved a procedure whereby the Trust may, when appropriate, purchase shares in the open market or in privately negotiated transactions at a price not above market value or net asset value, whichever is lower at the time of purchase. The Trust may also utilize procedures to reduce or eliminate the amount of outstanding ARPS, including their

3

Morgan Stanley Insured Municipal Income Trust
Letter to the Shareholders o April 30, 2002 continued

purchase in the open market or in privately negotiated transactions. During the six-month period ended April 30, 2002 the Trust purchased and retired 452,100 shares of common stock at a weighted average market discount of 8.16 percent.

We would like to take this opportunity to notify shareholders that in January 2002, Joseph R. Arcieri and Robert W. Wimmel joined James F. Willison as portfolio managers for the Trust.

We appreciate your ongoing support of Morgan Stanley Insured Municipal Income Trust and look forward to continuing to serve your investment needs.

Very truly yours,

/s/ Charles A. Fiumefreddo

Morgan Stanley Insured Municipal Income Trust
Notes to Financial Statements o April 30, 2002 (unaudited)

1. Organization and Accounting Policies

Morgan Stanley Insured Municipal Income Trust (the "Trust") is registered under the Investment Company Act of 1940, as amended, as a diversified, closed-end management investment company. The Trust's investment objective is to provide current income which is exempt from federal income tax. The Trust was organized as a Massachusetts business trust on March 12, 1992 and commenced operations on February 26, 1993.

The preparation of financial statements in accordance with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts and disclosures. Actual results could differ from those estimates.

The following is a summary of significant accounting policies:

A. Valuation of Investments - Portfolio securities are valued by an outside independent pricing service approved by the Trustees. The pricing service has informed the Trust that in valuing the portfolio securities, it uses both a computerized matrix of tax-exempt securities and evaluations by its staff, in each case based on information concerning market transactions and quotations

Edgar Filing: MORGAN STANLEY INSURED MUNICIPAL INCOME TRUST - Form N-30D

from dealers which reflect the bid side of the market each day. The portfolio securities are thus valued by reference to a combination of transactions and quotations for the same or other securities believed to be comparable in quality, coupon, maturity, type of issue, call provisions, trading characteristics and other features deemed to be relevant. Short-term debt securities having a maturity date of more than sixty days at time of purchase are valued on a mark-to-market basis until sixty days prior to maturity and thereafter at amortized cost based on their value on the 61st day. Short-term debt securities having a maturity date of sixty days or less at the time of purchase are valued at amortized cost.

B. Accounting for Investments - Security transactions are accounted for on the trade date (date the order to buy or sell is executed). Realized gains and losses on security transactions are determined by the identified cost method. The Trust amortizes premiums and accretes discounts over the life of the respective securities. Interest income is accrued daily.

C. Federal Income Tax Status - It is the Trust's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable and nontaxable income to its shareholders. Accordingly, no federal income tax provision is required.

D. Dividends and Distributions to Shareholders - The Trust records dividends and distributions to its shareholders on the ex-dividend date. The amount of dividends and distributions from net investment income and net realized capital gains are determined in accordance with federal income tax regulations

18

Morgan Stanley Insured Municipal Income Trust
Notes to Financial Statements o April 30, 2002 (unaudited) continued

which may differ from generally accepted accounting principles. These "book/tax" differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal tax-basis treatment; temporary differences do not require reclassification. Dividends and distributions which exceed net investment income and net realized capital gains for financial reporting purposes but not for tax purposes are reported as dividends in excess of net investment income or distributions in excess of net realized capital gains. To the extent they exceed net investment income and net realized capital gains for tax purposes, they are reported as distributions of paid-in-capital.

2. Investment Management Agreement

Pursuant to an Investment Management Agreement, with Morgan Stanley Investment Advisors, Inc. (the "Investment Manager") the Trust pays the Investment Manager a management fee, calculated weekly and payable monthly, by applying the annual rate of 0.35% to the Trust's weekly total net assets.

3. Security Transactions and Transactions with Affiliates

The cost of purchases and proceeds from sales of portfolio securities, excluding short-term investments, for the six months ended April 30, 2002

Edgar Filing: MORGAN STANLEY INSURED MUNICIPAL INCOME TRUST - Form N-30D

aggregated \$18,603,338 and \$40,048,197, respectively.

Morgan Stanley Trust, an affiliate of the Investment Manager, is the Trust's transfer agent. At April 30, 2002, the Trust had transfer agent fees and expenses payable of approximately \$5,100.

The Trust has an unfunded noncontributory defined benefit pension plan covering all independent Trustees of the Trust who will have served as independent Trustees for at least five years at the time of retirement. Benefits under this plan are based on years of service and compensation during the last five years of service. Aggregate pension costs for the six months ended April 30, 2002 included in Trustees' fees and expenses in the Statement of Operations amounted to \$3,609. At April 30, 2002, the Trust had an accrued pension liability of \$46,371 which is included in accrued expenses in the Statement of Assets and Liabilities.

4. Preferred Shares of Beneficial Interest

The Trust is authorized to issue up to 1,000,000 non-participating preferred shares of beneficial interest having a par value of \$.01 per share, in one or more series, with rights as determined by the Trustees, without approval of the common shareholders. The Trust has issued Series 1 through 5 Auction Rate Preferred Shares ("Preferred Shares") which have a liquidation value of \$50,000 per share plus the redemption premium, if any, plus accumulated but unpaid dividends, whether or not declared, thereon to the date of distribution. The Trust may redeem such shares, in whole or in part, at the original purchase price of \$50,000 per share plus accumulated but unpaid dividends, whether or not declared, thereon to the date of redemption.

19

Morgan Stanley Insured Municipal Income Trust
Notes to Financial Statements o April 30, 2002 (unaudited) continued

Dividends, which are cumulative, are reset through auction procedures.

SERIES	SHARES*	AMOUNT IN THOUSANDS*	RATE*	RESET DATE	RANGE OF DIVIDEND RATES**
1	400	\$20,000	1.65%	05/06/02	1.13% - 2.05%
2	900	45,000	2.47	09/09/02	2.47
3	1,000	50,000	2.95	07/08/02	2.95
4	400	20,000	2.47	01/05/04	2.47 - 2.79
5	400	20,000	1.60	05/06/02	0.90 - 2.05

* As of April 30, 2002.

** For the six months ended April 30, 2002.

Subsequent to April 30, 2002 and up through June 7, 2002, the Trust paid dividends to each of the Series 1 through 5 at rates ranging from 1.35% to 2.95% in the aggregate amount of \$587,670.

Edgar Filing: MORGAN STANLEY INSURED MUNICIPAL INCOME TRUST - Form N-30D

The Trust is subject to certain restrictions relating to the preferred shares. Failure to comply with these restrictions could preclude the Trust from declaring any distributions to common shareholders or purchasing common shares and/or could trigger the mandatory redemption of preferred shares at liquidation value.

The preferred shares, which are entitled to one vote per share, generally vote with the common shares but vote separately as a class to elect two Trustees and on any matters affecting the rights of the preferred shares.

5. Common Shares of Beneficial Interest

Transactions in common shares of beneficial interest were as follows:

	SHARES	PAR
	-----	-----
Balance, October 31, 2000	27,191,713	\$27
Treasury shares purchased and retired (weighted average discount 8.88%)*	(907,700)	(
	-----	-----
Balance, October 31, 2001	26,284,013	26
Treasury shares purchased and retired (weighted average discount 8.16%)*	(452,100)	(
	-----	-----
Balance, April 30, 2002	25,831,913	\$25
	=====	=====

* The Trustees have voted to retire the shares purchased.

Morgan Stanley Insured Municipal Income Trust
Notes to Financial Statements o April 30, 2002 (unaudited) continued

6. Federal Income Tax Status

At October 31, 2001, the Trust had a net capital loss carryover of approximately \$6,080,000 to offset future capital gains to the extent provided by regulations, available through October 31 of the following years:

AMOUNT IN THOUSANDS		
-----	-----	-----
2002	2003	2004
----	----	----
\$1,047	\$4,412	\$621
=====	=====	=====

7. Dividends to Common Shareholders

On March 26, 2002, the Trust declared the following dividends from net

Edgar Filing: MORGAN STANLEY INSURED MUNICIPAL INCOME TRUST - Form N-30D

investment income:

AMOUNT PER SHARE	RECORD DATE	PAYABLE DATE
-----	-----	-----
\$0.0675	May 3, 2002	May 17, 2002
\$0.0675	June 7, 2002	June 21, 2002

8. Expense Offset

The expense offset represents a reduction of custodian fees for earnings on cash balances maintained by the Trust.

9. Risks Relating to Certain Financial Instruments

The Trust may invest a portion of its assets in residual interest bonds, which are inverse floating rates municipal obligations. The prices of these securities are subject to greater market fluctuations during periods of changing prevailing interest rates than are comparable fixed rate obligations.

At April 30, 2002, the Trust held positions in residual interest bonds having a total value of \$29,883,305, which represents 7.6% of the Trust's net assets applicable to common shareholders.

10. Change in Accounting Policy

Effective November 1, 2001, the Trust has adopted the provisions of the AICPA Audit and Accounting Guide for Investment Companies, as revised, related to premiums and discounts on debt securities. The cumulative effect of this accounting change had no impact on the net assets of the Trust, but resulted in a \$110,762 increase in the cost of securities and a corresponding increase to undistributed net investment income based on securities held as of October 31, 2001.

The effect of this change for the six months ended April 30, 2002 was to increase net investment income by \$8,825; decrease unrealized appreciation by \$6,519 and decrease net realized gains by \$2,306. The statement of changes in net assets and the financial highlights for prior periods have not been restated to reflect this change.

21

Morgan Stanley Insured Municipal Income Trust
Notes to Financial Statements o April 30, 2002 (unaudited) continued

11. Change in Financial Statement Classification for Preferred Shares

In accordance with the provisions of EITF D-98, "Classification and Measurement of Redeemable Securities", effective for the current reporting period, the Trust has reclassified its Preferred Shares out of the composition of net assets section on the Statement of Assets and Liabilities. In addition, dividends to preferred shareholders are now classified as a component of operations on the Statement of Operations, the Statement of Changes in Net Assets and the Financial Highlights. Additionally, the categories of investments on the Portfolio of Investments are shown as a percentage of net assets applicable to common shareholders. Prior year amounts have been reclassified to conform to this period's presentation. This change has no

Edgar Filing: MORGAN STANLEY INSURED MUNICIPAL INCOME TRUST - Form N-30D

impact on the net assets applicable to common shareholders of the Trust.
