DISCLOSURE REGARDING FORWARD-LOOKING INFORMATION

This annual report contains or incorporates by reference statements which constitute forward-looking statements within the meaning of the U. S. Private Securities Litigation Reform Act of 1995 and we intend that such forward-looking statements be subject to the safe harbors created thereby. Forward-looking statements are statements other than historical information or statements of current condition that refer to expectations, projections or other characterizations of future events and circumstances. They are not guarantees of future performance and involve risks and uncertainties. Actual results may differ materially from those in forward-looking statements due to various factors including continued global economic, competitive and market uncertainty, capital spending in the telecommunications sector and our ability to execute successfully in these uncertain conditions; the effects of actions we have taken in response to such uncertainties; market acceptance of new products and upcoming new products; limited visibility of customer orders and the timing thereof; the competitive landscape; successful integration of our acquired and to-be-acquired companies. Assumptions relating to the foregoing involve judgments and risks, all of which are difficult or impossible to predict and many of which are beyond our control. Other risk factors that may affect our future performance and operations are detailed the factors discussed under "Risk Factors" set forth in Item 3D of this annual report. We believe that the expectations reflected in the forward-looking statements are reasonable based on information currently available to us, but we cannot assure you that the expectations will prove to have been correct. Accordingly, you should not place undue reliance on these forward-looking statements. These statements speak only as of the date of this document and shall not be revised or updated to reflect events after the date of this document.

PART I.

ITEM 1. IDENTITY OF DIRECTORS, SENIOR MANAGEMENT AND ADVISORS

Not Applicable.

ITEM 2. OFFER STATISTICS AND EXPECTED TIMETABLE

Not Applicable.

ITEM 3. KEY INFORMATION

A. SELECTED FINANCIAL DATA

The consolidated statements of earnings data for the years ended August 31, 1998 and 1999 and the consolidated balance sheets data as at August 31, 1998, 1999 and 2000 are derived from our audited consolidated financial statements not included in this annual report. The consolidated statements of earnings data for each of the three years ended August 31, 2000, 2001 and 2002 and the consolidated balance sheets data as at August 31, 2001 and 2002 are

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

derived from our audited consolidated financial statements that are included elsewhere in this annual report.

2

Our consolidated financial statements are prepared in accordance with Canadian GAAP, which differ in certain respects from U.S. GAAP. For a description of the significant differences between Canadian and U.S. GAAP in regard to our consolidated financial statements, see note 19 to our consolidated financial statements. The historical results below are not necessarily indicative of the results to be expected for any future period.

The selected financial data should be read in conjunction with our audited consolidated financial statements and the related notes included elsewhere in this annual report, and "Item 5. Operating and Financial Review and Prospects" of this annual report.

D. RISK FACTORS

RISKS RELATED TO OUR INDUSTRY AND BUSINESS

IF THE DOWNTURN IN THE TELECOMMUNICATIONS INDUSTRY PERSISTS OR WORSENS, DEMAND FOR OUR PRODUCTS MAY DECREASE WHICH COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, RESULTS OF OPERATIONS AND FINANCIAL CONDITION.

The current downturn in the global telecommunications industry has resulted in significant bankruptcies, reduced purchasing and decreased capital expenditures in the markets that we serve worldwide. Our sales and orders have been affected by this downward cycle characterized by diminished product demand, excess manufacturing capacity and the erosion of average selling prices. Those conditions have also caused a lack of visibility, which reduces our capacity to plan. The ultimate severity of the current downturn and how long it will last is unknown. Continued weak economic conditions, additional bankruptcies and decreased capital expenditures would likely result in a further reduction in demand for our products and low visibility and could harm our consolidated financial position, results of operations, cash flows and stock price.

WE HAVE ADOPTED MEASURES AND MAY CONTINUE TO ADOPT MEASURES THAT ALIGN OUR COST STRUCTURE TO THE CONTINUING DIFFICULT MARKET CONDITIONS. IF CURRENT DEPRESSED MARKET CONDITIONS ARE PROLONGED, IT COULD HAVE MATERIAL ADVERSE LONG-TERM EFFECTS ON OUR BUSINESS, RESULTS OF OPERATIONS AND FINANCIAL CONDITION.

In June 2001, we were forced to re-align our cost structure to market conditions by implementing various measures including postponement of plans to build a new facility in the Quebec Metro High-Tech Park, termination of non-core operations at a subsidiary that specialized in manufacturing fiber-optic temperature sensors, and reduction of our workforce by 15%. Then, on December 5, 2001, we announced the lowering of our operating expenses, a freeze in employee salaries, and the further reduction of our workforce by 10%.

Again in May 2002, we reduced our global workforce by an additional 20% and definitively cancelled our plans to build the new facility. These and, if needed, subsequent measures could have material adverse long-term effects on our business, results of operations and financial condition if we deplete our pool of highly qualified personnel or are unable to retain key personnel; if we are unable to sustain sufficient research and development efforts for the launch of new products; if we are unable to meet the needs of our customers; and if we are not capable of ramping up manufacturing when market conditions improve. In addition, if we fail to adopt and implement adequate and pertinent measures on a timely basis to align our cost structure to further declining market conditions, it could have a material adverse long-term effect on our business, results of operations and financial condition.

5

IF THE SUPPLY OF HIGH-BANDWIDTH TRANSMISSION NETWORKS SHOULD CONTINUE TO SURPASS DEMAND, OR IF OPTICAL FIBER IS REPLACED BY ANOTHER MEDIUM AS THE PRIMARY SOLUTION FOR BANDWIDTH-INTENSIVE APPLICATIONS, WE COULD EXPERIENCE FURTHER SIGNIFICANT LONG-TERM LOSS OF SALES.

Fiber-optic deployment and network capacity increases have slowed due to the current downturn in the telecommunications industry. This has affected optical component and network equipment manufacturers and operators causing reduced demand for fiber-optic test, measurement, monitoring and automation equipment and the erosion of average selling prices. Any further downturn in our

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

markets or in general economic conditions, or if optical fiber is replaced by a higher performance medium, would likely result in further reduction in demand for our products, which would harm our business, results of operations and financial condition.

IF CUSTOMERS FAIL TO MEET THEIR FINANCIAL COMMITMENTS TO US, IT COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, RESULTS OF OPERATIONS AND FINANCIAL CONDITION.

With the continuing economic slowdown, some of our customers are experiencing, or may possibly experience, serious cash flow problems. As a result, we have had customers who delayed payment or were not able to meet their financial commitments to us. Furthermore, they may not order as many products from us as originally forecasted or any products at all. We attempt to reduce the possibility of large outstanding bills remaining unpaid by carrying out credit checks on customers and by having a diversified customer base. For example, no customer represented more than 10.2% of our sales in fiscal 2002. However, there is no assurance that such measures will reduce our exposure to customer credit risks. If customers fail to meet their financial commitments to us, it could have a material adverse effect on our business, results of operations and financial condition and the failure of our customers to order products will also result in decreased revenues.

WE MUST CONTINUE TO OVERCOME SIGNIFICANT COMPETITION IN OUR INDUSTRY IN ORDER TO GAIN MARKET SHARE AND ACHIEVE OUR GROWTH STRATEGY.

The market for fiber-optic test, measurement, monitoring and automation equipment is rapidly evolving and is marked by intense competition and technical innovations. We expect the pace of change to accelerate in the future. We expect new competitors to emerge or current competitors to consolidate as the market for fiber-optic test, measurement, monitoring and automation equipment evolves in response to technical innovations and economic conditions, thereby accelerating the pace of change and the competitive pressures that we face. Our growth depends in part on our ability to increase our market share by increasing sales of current products, introducing new products and product enhancements and exploiting new markets.

In the financial year ended August 31, 2002, we acquired technologies allowing us to almost double our addressable market by expanding in to the protocol-layer testing market. This new market brings additional competition. Moreover, our competitors may have more experience operating in these markets and be better established with customers in this new market. Some of our current and potential competitors are global electronic test and measurement manufacturers who complement their broad range of products with fiber-optic test, measurement, monitoring and automation equipment. Competitors, such as Acterna Corporation, Agilent Technologies Inc., ANDO Corporation, Anritsu Corporation, NetTest and Tektronix, Inc. may have greater financial, technical and marketing resources. Consequently, these competitors may be able to devote greater resources to the development, marketing, sale and support of their products. They may also be better positioned than we are to acquire

companies and new technologies that may displace our products or make them obsolete. We cannot predict whether our current or future competitors will develop or market products that offer higher performance or more features or are more cost-effective than our current or future products. To remain competitive and achieve our growth strategy, we must continue to increase our sales and develop cost-effective products and product enhancements in current and new markets, which offer higher performance and more functionality so that we can

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

increase our market share. Our failure to do so may harm our business, results of operations and financial condition.

WE HAVE FACED PRICING PRESSURES ON OUR EXISTING PRODUCTS AND EXPECT THAT THIS PRESSURE WILL CONTINUE. IF WE DO NOT CONTROL OUR MANUFACTURING COSTS OR INTRODUCE NEW PRODUCTS WITH HIGHER MARGINS, OUR GROSS MARGINS WILL DECLINE AND OUR OPERATING RESULTS WILL BE ADVERSELY AFFECTED.

Reduced demand for fiber-optic test, measurement, monitoring and automation equipment, in addition to competitiveness in our industry will likely result in a continuing downward pressure on the prices for fiber-optic test, measurement, monitoring and automation equipment. These price declines result from factors such as:

- o increased competition for business;
- o reduced demand;
- o limited number of potential customers;
- o competition from companies with lower production costs;
- o introduction of new products by competitors;
- o greater economies of scale for higher-volume competitors;
- o resale of used equipment; and
- o equipment sales resulting from manufacturing and rental companies bankruptcies.

As prices of our existing products may experience continuing downward pressure, we may have to increase our unit volume sold in order to maintain our existing sales level. If we are unable to increase the level of sales, continuously monitor our manufacturing costs or introduce new products with higher margins, our gross margins may decline and our operating results may suffer.

OUR QUARTERLY REVENUES AND OPERATING RESULTS ARE SUBJECT TO SIGNIFICANT FLUCTUATIONS AND YOU SHOULD NOT RELY ON THEM AS AN INDICATION OF OUR FUTURE PERFORMANCE.

Our sales and operating results have fluctuated from quarter to quarter in the past and significant fluctuations may occur in the future. In addition, our revenue and operating results generally depend on the volume and timing of the orders we receive from customers as well as our ability to fulfill the orders received. Our operating expenses, which include research and development, selling and administrative and amortization expenses, are relatively fixed in the short term. If our revenue is lower than we expect because we sell fewer products than we anticipate, if there is a delay in the release of new products or if prices for our products decline, we may not be able to quickly reduce our operating expenses in response. Factors that could affect the amount and timing of our revenue, and cause quarterly fluctuations in our revenue and operating results include:

- o the length of the product sales cycle for certain of our products, especially those that are higher priced and more complex;

7

- o the timing of introduction and market acceptance of new products by us, our competitors or our suppliers;
- o our ability to sustain product volumes and high levels of quality across all product lines;
- o the timing of shipments for large orders; and
- o the effect of potential seasonality in sales.

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

Our revenue and operating results could also be affected by the following factors, some of which we have little or no control over:

- o fluctuating demand for fiber-optic test, measurement, monitoring and automation equipment;
- o changes in the capital budgets of our customers, which may cause seasonal or other fluctuations in the product mix, volume, timing and number of orders we receive from our customers;
- o order cancellations or rescheduled delivery dates; o pricing changes by our competitors or suppliers;
- o customer bankruptcies and difficulties in collecting accounts receivable;
- o the level of used test, measurement and automation equipment available for resale;
- o restructuring charges; and
- o general economic conditions.

In addition, we may in the future choose to reduce prices, increase spending, or add or eliminate products in response to actions by competitors or as an effort to pursue new market opportunities. These actions may also adversely affect our business and operating results and may cause our quarterly results to be lower than the results of previous quarters. Due to these factors, you should not rely on quarter-to-quarter comparisons of our results of operations as an indication of our future performance.

AS OUR CUSTOMERS CONSOLIDATE, THEY MAY REDUCE OR HALT PURCHASES OF OUR PRODUCTS, WHICH WOULD CAUSE OUR SALES TO DECLINE.

Consolidation in the telecommunications industry could reduce the number of customers to whom our products could be sold. Some of our customers have been subject to consolidation and could reduce their orders, demanding more favorable terms and conditions and obtaining products from a source other than us, which could cause our sales to decline. As a result, some of our manufacturer customers may discontinue their relationships with us.

WE DEVOTE CONSIDERABLE TIME AND RESOURCES TO SECURING NEW CUSTOMERS AND IMPROVING SALES TO EXISTING CUSTOMERS. IF WE ARE UNSUCCESSFUL, OUR FUTURE OPERATING RESULTS MAY SUFFER.

The long sales cycle for some of our products may cause our sales and operating results to vary significantly from period to period. Many of our products are complex, and customers for these products may require substantial time to make purchase decisions. The period of time between our initial contact with a customer and the receipt of a purchase order may span a year or more. In addition, customers perform and require us to perform, extensive product evaluation and testing of new instruments before purchasing them. If we are unable to satisfy customer demands, considerable resources would have been expended without deriving corresponding sales. In addition, some of our customers and potential customers require that a bidding

8

process be followed or that our products be pre-approved. Both of these situations involve inherent risks over which we have little control, for example, missing the approval opportunity or unsuccessful pricing.

OUR CUSTOMERS ARE NOT OBLIGATED TO BUY MATERIAL AMOUNTS OF OUR PRODUCTS AND MAY CANCEL OR DEFER PURCHASES ON SHORT NOTICE.

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

Our customers typically purchase our products under individual purchase orders and may cancel or defer purchases on short notice without significant penalty. Accordingly, sales in a particular period are difficult to predict. Decreases in purchases, cancellations of purchase orders, or deferrals of purchases may have a material adverse effect on our operating results, particularly if we do not anticipate them.

WE CANNOT ASSURE THAT WE WILL SUCCESSFULLY INTEGRATE THE BUSINESSES, PRODUCTS, TECHNOLOGIES OR PERSONNEL OF OUR RECENT AND FUTURE ACQUISITIONS, WHICH MAY HARM OUR BUSINESS.

We have historically achieved growth through a combination of internally developed new products and acquisitions. Since December 2000, we have made four major acquisitions, and as part of our strategy to sustain growth, we expect to continue to pursue acquisitions of other companies, technologies and complementary product lines in the future.

However, mergers and acquisitions of high technology businesses are inherently risky. For our past and future transactions to be successful, we must appropriately integrate the businesses, products, technologies and personnel already acquired, as well as those of any future acquisitions, with our own business, product portfolios and personnel in a manner that anticipates or responds to new technological developments and customer requirements on a timely basis. In addition, we must coordinate the operations and product portfolios of newly acquired companies with our own operations and product portfolios and manage all aspects of geographically dispersed operations. Integration requires the dedication of management resources that may distract their attention from our day-to-day business and operations. If we fail to integrate the companies quickly and efficiently, we may not be able to realize the benefits we expect from these transactions.

We cannot assure that any business of our recent or future acquisitions will achieve anticipated net sales and profits. In May 2002, as part of our review of financial results and due to the continued downturn in the telecommunications industry, the persisting unfavourable market conditions affecting our subsidiaries' industries and the decline in technology valuations, we performed an assessment of the carrying value of goodwill and intangible assets recorded in conjunction with the acquisitions of EXFO Burleigh, EXFO Photonic and EXFO Protocol. As a result, we concluded that the carrying value of goodwill and certain acquired intangible assets was impaired and we recorded a US\$222.2 million write-down of goodwill and a US\$23.7 million write-down of intangible assets, which had a negative impact on our reported earnings. This type of assessment is completed annually and further write-downs may become necessary in the future if market conditions worsen.

All of these factors could materially harm our business, results of operations and financial condition.

9

WE MAY NOT BE ABLE TO MAKE THE NECESSARY ACQUISITIONS NEEDED FOR THE DEVELOPMENT OF OUR BUSINESS AND ANY ACQUISITIONS WE MAKE COULD DISRUPT OUR BUSINESS AND HARM OUR FINANCIAL CONDITION.

We intend to seek acquisitions of businesses, products and technologies that are complementary to ours or that will increase our markets. There can be no assurance that we will ultimately make any such acquisition. The consolidation of our competitors may improve their capacity to acquire the same businesses, products and technologies that we wish to acquire. In addition, our

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

fluctuating stock price or our cash position at the time of the acquisition may affect our ability to complete an acquisition.

We have made strategic acquisitions in the past and we intend that in the future, as part of our growth strategy, we will continue to make strategic acquisitions of complementary business, products and technologies. In the event of any future acquisition, we could:

- o issue shares that would dilute individual shareholder percentage ownership;
- o incur debt;
- o assume liabilities and commitments;
- o incur expenses related to amortization of other intangible assets; or
- o incur significant impairment losses of goodwill and intangible assets related to such acquisitions.

These acquisitions also involve numerous risks, including:

- o problems combining the acquired operations, technologies, products and personnel;
- o unanticipated costs or liabilities;
- o diversion of management's attention from our core business;
- o adverse effects on existing business relationships with suppliers and customers;
- o risks associated with entering markets in which we have no or limited prior experience; and
- o potential loss of key employees, particularly those of acquired organizations.

WE MAY BE SUBJECT TO CERTAIN LIABILITIES ASSUMED IN CONNECTION WITH OUR ACQUISITIONS THAT COULD ADVERSELY AFFECT OUR BUSINESS.

We conduct due diligence in connection with our acquisitions and incorporate indemnification provisions in our acquisition agreements. To the extent that prior owners of any acquired businesses failed to comply with or otherwise violated applicable laws, we may be financially responsible for these violations or otherwise be adversely affected. The discovery of any material liabilities after the closing of the transaction could have a material adverse effect on our financial condition and results of operations. In connection with the acquisitions we have completed since December 2000, there may be liabilities that we failed to discover at the time of the acquisition or that we inadequately assessed in our due diligence efforts.

IF WE FAIL TO PREDICT OUR SUPPLY REQUIREMENTS ACCURATELY, WE WILL HAVE EXCESS INVENTORY OR INSUFFICIENT INVENTORY, EITHER OF WHICH COULD CAUSE US TO INCUR ADDITIONAL COSTS, EXPERIENCE MANUFACTURING DELAYS OR EXCESS OR OBSOLETE INVENTORY.

We provide non-binding forecasts of our requirements to some of our suppliers up to six months prior to scheduled delivery of products to our customers. If we overestimate our

forecasted requirements, we may have excess inventory, which could harm our relationships with our suppliers due to reduced future orders, increase our costs and require inventory write-offs. In the financial year ended August 31, 2002, we recorded inventory write-offs totaling \$18.5 million for excess and obsolete inventory. If we underestimate our requirements, we may have an

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

inadequate inventory of parts, which could interrupt manufacturing of our products and result in delays in shipments. In addition, lead times for materials and parts that we order may be long and depend on factors such as the procedures of, or supply terms with, a specific supplier and demand for each part at a given time.

WE DEPEND ON A SINGLE SUPPLIER OR A LIMITED NUMBER OF SUPPLIERS FOR SOME OF THE KEY COMPONENTS AND MATERIALS IN OUR PRODUCTS, WHICH MAKES US SUSCEPTIBLE TO SUPPLY SHORTAGES OR PRICE FLUCTUATIONS THAT COULD ADVERSELY AFFECT OUR OPERATING RESULTS.

We depend on a limited number of suppliers for some of the parts used to manufacture our products for which alternative sources may not be readily available. In addition, all our orders are placed through individual purchase orders and, therefore, our suppliers may stop supplying parts to us at any time. The reliance on a single source or limited number of suppliers could result in increased costs, delivery problems and reduced control over product pricing and quality. Financial difficulties of suppliers could also affect our ability to obtain necessary parts in a timely manner. Any interruptions or delays in the supply of any of these parts could significantly harm our ability to meet scheduled product deliveries to our customers and cause us to lose sales. Furthermore, the process of qualifying a new manufacturer for complex products, designed to our specifications, such as our optical and mechanical parts, is lengthy and would consume a substantial amount of time of our technical personnel and management. If we were required to change manufacturers in a short period of time, our business would be disrupted. In addition, we may be unsuccessful in identifying a new manufacturer capable of and willing to meet our needs on terms that we would find acceptable. Consolidation involving suppliers could further reduce the number of alternatives available to us and affect the cost of parts, which make our products less competitive and result in lower margins.

IF WE ARE UNABLE TO ADAPT TO CURRENT AND FUTURE CHANGES IN TECHNOLOGY OR IF WE ARE NOT ABLE TO INTRODUCE NEW AND ENHANCED PRODUCTS ON A TIMELY BASIS, OUR PRODUCTS MAY BECOME OBSOLETE, WHICH COULD PREVENT US FROM ACHIEVING OUR GROWTH STRATEGY AND ADVERSELY AFFECT OUR OPERATING RESULTS.

The telecommunications industry is characterized by rapidly evolving technology and industry standards that result in frequent new product introductions. Any failure by us to anticipate or respond to new technological developments, customer requirements and evolving standards could have a material adverse effect on our business, results of operations and financial condition. The development of proprietary technologies entails significant technical and business risks and requires substantial expenditures and lead-time. The success of our new product offerings will depend on several factors, including our ability to:

- o properly identify customer needs;
- o innovate and develop new products;
- o gain timely market acceptance for new products;
- o manufacture and deliver our new products on time and in sufficient volume;
- o price our products competitively; and
- o anticipate competitor's announcements of new products.

In addition, failure to do so could be exploited by our competitors. If we lose market share as a result of lapses in our product development, our business would suffer.

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

OUR PRODUCTS MAY HAVE UNFORESEEN DEFECTS THAT COULD HARM OUR REPUTATION, IMPEDE MARKET ACCEPTANCE OF OUR PRODUCTS AND NEGATIVELY IMPACT OUR RESULTS OF OPERATIONS.

As a result of their complexity, our products may contain undetected software or hardware defects or compatibility problems or regulatory compliance issues, particularly when they are first introduced or when new versions are released. There can be no assurance that, despite our testing, defects will not be found in new products after they have been fully deployed and operated under peak stress conditions. If we are unable to fix defects or other problems, we could experience, among other things:

- o costly repairs
- o product returns or recalls;
- o damage to our brand reputation;
- o loss of customers, failure to attract new customers or achieve market acceptance;
- o diversion of development and engineering resources;
- o legal actions by our customers, including claims for consequential damages and loss of profits; and
- o legal actions by governmental entities, including actions to impose product recalls and/or forfeitures.

The occurrence of any one or more of the foregoing could seriously harm our business, results of operations and financial condition.

OUR PRODUCTS MAY BE REQUIRED TO CONFORM TO NEW AND UNFORESEEN REGULATORY REQUIREMENTS THAT COULD INCREASE OUR COSTS AND REDUCE OUR MARKET SHARE.

Our products are designed to conform to the regulatory requirements of the countries in which they are marketed. In the event that the technical regulations applicable in a given country are in any way changed, we may be required to modify, redesign or recall some or all of our products in order to continue participating in that market. These changes may prove costly and time consuming and could create technical advantages for products marketed by our competitors. We cannot assure that our products will continue to meet evolving standards in the future. In addition, failure to comply, or delays in compliance with such regulatory requirements or delays in receipt of certifications could delay the introduction of new products or cause our existing products to become obsolete.

OUR SALES WOULD SUFFER IF A KEY SALES REPRESENTATIVE OR DISTRIBUTOR STOPPED SELLING OR REDUCED SALES OF OUR PRODUCTS.

We sell a large portion of our products through a network of independent sales representatives and distributors, the majority of whom have exclusive rights to sell our products in specific territories or markets. Our sales representatives and distributors may not market our products effectively or if we are unable to provide competitive sales commissions, maintain an appropriate sales volume, or offer sufficient channel-support, our independent sales representatives and distributors may discontinue sales of our products and switch to representing one or more of our competitors, which would result in reduced sales for us.

IF WE FAIL TO ADAPT APPROPRIATELY TO THE CHALLENGES ASSOCIATED WITH OPERATING INTERNATIONALLY, THE GROWTH OF OUR BUSINESS MAY BE IMPEDED AND OUR OPERATING RESULTS MAY BE AFFECTED.

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

For the fiscal year ended August 31, 2002, customers outside of the United States and Canada accounted for 43% of our sales and for the fifteen months ended November 30, 2002, these customers accounted for 42% of our sales. Our international sales will be limited if we cannot establish relationships with international distributors, establish additional foreign operations, expand international sales channel management, hire additional personnel, develop relationships with international service providers and operate adequate after sales support internationally. Even if we are able to successfully continue our international operations, we may not be able to maintain or increase international market demand for our products. Our international operations are subject to a number of risks, including:

- o challenges in staffing and managing foreign operations due to the limited number of qualified candidates, employment laws and practices in foreign countries, any of which could increase the cost and reduce the efficiency of operating in foreign countries;
- o technology standards that differ from those on which our products are based, which could require expensive redesign and retention of personnel familiar with those standards;
- o longer accounts receivable payment cycles and possible difficulties in collecting payments which may increase our operating costs and hurt our financial performance; and
- o certification requirements.

Any of these factors could harm our international operations and negatively affect our financial performance. The recurrence of weakness in these economies or of weakness in other foreign economies could have a significant negative effect on our future operating results.

ECONOMIC, POLITICAL AND OTHER RISKS ASSOCIATED WITH INTERNATIONAL SALES AND OPERATIONS COULD ADVERSELY AFFECT OUR RESULTS OF OPERATIONS.

We maintain operations in three major geographic areas: the Americas, Europe and Asia. During the last financial year, approximately half of our revenues were from international sales. As a result, the business is subject to the worldwide economic and market conditions risks generally associated with doing business globally, such as fluctuating exchange rates, the instability of international monetary conditions, tariff and trade policies, domestic and foreign tax policies, foreign governmental regulations, political unrest, wars and other acts of terrorism and changes in other economic or political conditions. These factors, among others, could influence our ability to succeed in global markets. A significant downturn in the global economy could adversely affect our results of business, results of operations and financial condition.

WE ARE SUBJECT TO LAWS AND REGULATIONS APPLYING TO GOVERNMENT CONTRACTS, AND OUR FAILURE TO ADDRESS THESE LAWS AND REGULATIONS OR COMPLY WITH GOVERNMENT CONTRACTS COULD HARM OUR BUSINESS.

We have agreements relating to the sale of our products to government entities and, as a result, we are subject to various statutes and regulations that apply to companies doing business with the government. The laws applicable to government contracts differ from those

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

governing private contracts. For example, many government contracts contain pricing terms and conditions that are not applicable to private contracts. We are also subject to investigation for compliance with the regulations applying to government contracts. Any failure to comply with these laws and regulations could harm our business.

THE PRICE OF OUR SECURITIES IS VOLATILE AND MAY DECLINE.

The market price of our securities has been, and is likely in the future to be, subject to wide, rapid fluctuations. Such fluctuations may be due to factors specific to us, such as changes in operating results, new product introductions by us or our competitors, competitive activities, changes in analysts' ratings, or the liquidity of our stock. Fluctuations in stock price may also be due to factors relating to the global telecommunications industry or the securities markets in general. These fluctuations have often been unrelated or disproportionate to the operating performance of the specific companies whose stocks are traded. These broad market and industry factors may have a material adverse effect on the market price of our securities, regardless of our actual operating performance. Shareholders should be willing to incur the risk of such fluctuations.

WE REQUIRE EMPLOYEES WHO ARE KNOWLEDGEABLE ABOUT THE SPECIALIZED NATURE OF OUR BUSINESS. IF WE ARE UNABLE TO ATTRACT AND RETAIN SUFFICIENT NUMBERS OF HIGHLY SKILLED TECHNICAL, SALES AND MARKETING AND OTHER PERSONNEL, OUR OPERATIONS AND FINANCIAL RESULTS WOULD SUFFER.

Due to the specialized nature of our business, we are highly dependent on the continued service of and on the ability to attract and retain, qualified engineering, sales, marketing and senior management personnel. The loss of key employees or management personnel could have a material adverse effect on our business and operating results. We may not be able to continue to attract and retain the qualified personnel necessary for the development of our business.

We must provide significant training for our employee base due to the highly specialized nature of fiber-optic test, measurement and automation equipment. Our current engineering personnel may be inadequate and we may fail to assimilate and train new employees. Highly skilled employees with the education and training that we require, especially employees with significant experience and expertise in fiber optics, international business development and product management, may be difficult to find. Once trained, our employees may be hired by our competitors.

OUR BUSINESS STRATEGY AND OUR ABILITY TO MAINTAIN OUR COMPETITIVE POSITION DEPEND ON THE CONTINUED SERVICES OF OUR SENIOR MANAGEMENT TEAM LED BY GERMAIN LAMONDE, OUR CHAIRMAN OF THE BOARD, PRESIDENT AND CHIEF EXECUTIVE OFFICER. THE LOSS OF ANY MEMBER OF THE SENIOR MANAGEMENT TEAM MAY ADVERSELY AFFECT OUR BUSINESS.

Our ability to maintain our competitive position depends to a significant extent on the efforts and abilities of our senior management, particularly Germain Lamonde, our Chairman of the Board, President and Chief Executive Officer. The managerial, technical and other services of our senior management team could be difficult to replace and if we lose the services of one or more of our executive officers, or if one of them decides to join a competitor or otherwise compete directly or indirectly against us, our business could be seriously harmed. Though members of our senior management team have signed non-competition clauses that we believe are binding, they may not turn out to be effective in all situations and the loss of such

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

personnel could jeopardize our ability to maintain our competitive position. We do not have "key person" life insurance policies covering any of our employees.

OUR INTELLECTUAL PROPERTY AND PROPRIETARY TECHNOLOGY ARE IMPORTANT TO THE CONTINUED SUCCESS OF OUR BUSINESS. OUR FAILURE TO PROTECT THIS PROPRIETARY TECHNOLOGY MAY SIGNIFICANTLY IMPAIR OUR COMPETITIVE POSITION.

Our success and ability to compete depend to a significant extent on our proprietary technology, since that is how we attempt to keep others from using the innovations that are central to our existing and future products. We currently hold 22 U.S. and 7 Canadian issued patents and have 28 U.S. and 22 Canadian patent applications pending, along with 5 patent applications pending under the Patent Cooperation Treaty. We also rely on a combination of copyright and trademark laws, trade secrets, confidentiality procedures, contractual provisions and license agreements to protect our proprietary technology. We may have to engage in litigation in order to protect our patents and other intellectual property rights, or to determine the validity or scope of the proprietary rights of others. This kind of litigation can be time-consuming and expensive, regardless of whether we win or lose. Because it is critical to our success that we are able to prevent competitors from copying our innovations, we intend to continue to seek patent and trade secret protection for our technologies. The process of seeking patent protection can be long and expensive and we cannot be certain that any currently pending or future applications will actually result in issued patents, or that, even if patents are issued, they will be of sufficient scope or strength to provide meaningful protection or any commercial advantage to us. Furthermore, others may develop technologies that are similar or superior to our technology, or design around the patents that we own. We also rely on trade secret protection for our technology, in part through confidentiality agreements with our employees, consultants, distributors and third parties. However, these agreements may be breached or otherwise not effective and we may not have adequate remedies for any breach or shortfall of these agreements. In any case, others may come to know about our trade secrets through a variety of methods. In addition, the laws of some territories in which we sell our products may not protect our intellectual property rights to the same extent as do the laws of Canada and the United States.

Despite our efforts, our intellectual property rights, particularly our existing or future patents, may be invalidated, circumvented, challenged or required to be licensed to others. Furthermore, others may develop technologies that are similar or superior to our technology, duplicate or reverse engineer our technology, or design around the patents owned or licensed by us. We cannot be sure that the steps that we take to protect our technology will prevent misappropriation or infringement. If we fail to protect our technology so that others may copy or use it, we will be less able to differentiate our products and our sales will decline.

OTHERS MAY CLAIM THAT OUR PRODUCTS INFRINGE UPON THEIR INTELLECTUAL PROPERTY RIGHTS, OR THEY MAY INFRINGE OUR INTELLECTUAL PROPERTY, AND WE MAY EXPEND SIGNIFICANT RESOURCES ENFORCING OR DEFENDING OUR RIGHTS OR SUFFER COMPETITIVE INJURY.

Litigation regarding intellectual property rights is common in the technology industry and, for this reason, we expect that third-party infringement claims involving technologies may increase. If an infringement claim is filed against us, we may be prevented from using some of our technologies and may incur significant costs to resolve the claim. Conversely, we may be required to spend significant resources to monitor and police our intellectual property rights.

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

We could incur substantial costs in defending ourselves and our customers against infringement claims or in bringing infringement claims against others. Litigation could also adversely affect sales of the challenged product or technology and divert the efforts of our management and technical personnel. In the event of a claim of infringement, we may be required to obtain one or more licenses from third parties. We cannot assure you that we, or our customers, could obtain necessary licenses from third parties at a reasonable cost or at all. If we fail to obtain a license where one is required, we could incur substantial liabilities and be forced to suspend the marketing of the challenged products.

OUR INSURANCE MAY NOT BE SUFFICIENT TO COVER ALL POTENTIAL LIABILITY. A SUCCESSFUL CLAIM EXCEEDING OUR POLICY LIMITS WILL REDUCE OUR WORKING CAPITAL, INCREASE OUR EXPENSES AND HAVE A NEGATIVE EFFECT ON OUR OPERATING RESULTS.

Our products are designed to help telecommunications carriers and manufacturers of optical components, value-added optical modules and optical networking systems ensure network reliability. The failure of our products to perform to client expectations could give rise to product liability and warranty claims. We carry insurance for product liability and take accounting reserves for warranty claims that we consider adequate in view of industry practice. In addition, we may face other types of claims by third parties in relation to the conduct of our business and a successful claim against us for an amount exceeding our policy limits would force us to use our own resources to pay the claim, which could result in a reduction of our working capital available for other uses, increase our expenses and have a negative effect on our business, results of operations and financial condition.

THIS YEAR, WE IMPLEMENTED AN ENTERPRISE RESOURCE PLANNING (ERP) SYSTEM AT OUR QUEBEC CITY LOCATION, AND IF THIS INFORMATION MANAGEMENT TOOL PROVES TO BE UNWIELDY, IF THE SOFTWARE TOOL TURNS OUT TO BE INEFFICIENT OR IF TECHNICAL OR SECURITY PROBLEMS ARISE, IT COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, RESULTS OF OPERATIONS AND FINANCIAL CONDITION.

We implemented an ERP system in early December 2001 to help increase the efficiency of our operations. This required a significant investment in money, time and resources. More than 400 employees were trained on the software tool and though we have completed the transition from one system to another, this information technology project may still prove to be unwieldy or turn out to be ineffective. If this occurs it could have a material adverse effect on our business, results of operations and financial condition.

WE MAY BECOME INVOLVED IN COSTLY AND TIME-CONSUMING LITIGATION THAT MAY SUBSTANTIALLY INCREASE OUR COSTS AND HARM OUR BUSINESS.

We may from time to time become involved in various lawsuits and legal proceedings. For example, EXFO is a defendant in a putative securities class action filed in the United States District Court for the Southern District of New York involving approximately 300 other issuing companies. In addition, we have instituted a claim against a former employee of one of our subsidiaries, in relation to a breach of contractual confidentiality obligations. Litigation is subject to inherent uncertainties, and an adverse result in these or other matters that may arise from time to time could have a material adverse effect on our business, results of operations or financial condition.

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

involvement of our senior management and may divert management attention from our business and operations. For more information about current legal proceedings, see "Item 4B - Legal Proceedings".

FLUCTUATIONS IN THE EXCHANGE RATES BETWEEN THE CANADIAN DOLLAR AND OTHER CURRENCIES MAY ADVERSELY AFFECT OUR OPERATING MARGINS.

The majority of our sales is denominated in currencies other than the Canadian dollar (principally US dollars and Euros). However, a large portion of our operating expenses and capital expenditures is denominated in Canadian dollars. As a result, we are exposed to fluctuations in the exchange rates between the Canadian dollar on the one hand and the U.S. dollar and the Euro on the other. An increase in the value of the Canadian dollar relative to either of these currencies could have a material adverse effect on our operating margins.

UNEXPECTED DECLINES IN OUR RESEARCH AND DEVELOPMENT AND OTHER TAX CREDITS AND GRANTS MAY HAVE AN ADVERSE EFFECT ON OUR BUSINESS.

Our historical operating results reflect substantial benefits from programs sponsored by federal, provincial and state governments for the support of research and development activities, as well as in relation to other activities. For example, research and development tax credits and grants represented 25% of our gross research and development expenses for the year ended August 31, 2002 and 24% for the fifteen months ended November 30, 2002.

If unexpected changes in the laws or government policies terminate or adversely modify the Canadian and Quebec government programs, under which we receive the major part of our research and development and other tax credits and grants, or if we unexpectedly become unable to participate in or take advantage of these programs, then our net research and development and other expenses will materially increase or we may decrease our research and development activities. In addition, to the extent that we increase our research and development activities outside Canada or Quebec, which could result from, among other things, future acquisitions, the increased activities may not be eligible for these programs. If we were required to decrease our research and development activities, or were unable to benefit from other tax credits and grants, this could have a material adverse effect on our business, results of operations and financial condition.

OUR CURRENT PRINCIPAL STOCKHOLDER HAS EFFECTIVE CONTROL OVER OUR BUSINESS.

As of November 30, 2002, Germain Lamonde, our Chairman of the Board, President and Chief Executive Officer, held approximately 94% of the voting rights in our stock. By virtue of such stock ownership, Mr. Lamonde has effective control over all matters submitted to our stockholders, including the election of our directors, and exercises significant control over our policies and affairs. Such concentration of voting power could have the effect of delaying, deterring or preventing a change in control or other business combinations that might otherwise be beneficial to our stockholders.

17

WE MAY NEED ADDITIONAL CAPITAL, AND MAY NOT BE ABLE TO RAISE ADDITIONAL CAPITAL ON FAVORABLE TERMS OR AT ALL, WHICH COULD LIMIT OUR ABILITY TO GROW AND COULD INCREASE OUR COSTS.

Our future liquidity and capital requirements are difficult to predict because they depend on numerous factors, including the success of our existing and new product offerings as well as competing technological and market developments. As a result, we may not be able to generate sufficient cash from

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

our operations to meet additional working capital requirements, support additional capital expenditures or take advantage of acquisition opportunities. Accordingly, we may need to raise additional capital in the future.

Our ability to obtain additional financing will be subject to a number of factors, including market conditions and our operating performance. These factors may render the timing, amount, terms and conditions of additional financing unattractive for us. If we raise additional funds by selling equity securities, the relative ownership of our existing investors could be diluted or the new investors could obtain terms more favorable than previous investors. If we raise additional funds through debt financing, we could incur significant borrowing costs. If we are unable to raise additional funds when needed, our ability to operate and grow our business could be impeded.

18

Item 4. INFORMATION ON THE COMPANY

A. HISTORY AND DEVELOPMENT OF THE COMPANY

Our legal name and commercial name is EXFO Electro-Optical Engineering Inc. /EXFO Ingenierie electro-optique Inc. Our head office is located at 465 Godin Avenue, Vanier, Quebec, Canada, G1M 3G7 and our telephone number is (418) 683-0211. Our e-mail address is info@exfo.com and our Web site is www.exfo.com. Information on our Web site is not incorporated by reference in this annual report. Our agent for service in the United States is CT Corporation System, 111 Eighth Avenue, New York, New York 10011. This annual report contains trademarks and registered trademarks of EXFO and other companies.

We were incorporated on September 18, 1985 pursuant to the CANADA BUSINESS CORPORATIONS ACT. Since that date, we have amended our articles on various occasions mainly to modify our corporate name and our share capital.

In 1996, GEXFO Investissements Technologiques inc. ("GEXFO"), a company controlled by Germain Lamonde, acquired a majority interest in GAP Optique S.A. ("GAP Optique"), a Swiss limited liability company carrying out activities in the field of fiber-optic testing and measurement technology. In 1996, GEXFO, EXFO, GAP Optique and the University of Geneva entered into agreements whereby GAP Optique, EXFO and GEXFO obtained worldwide exclusive rights to commercially develop, manufacture and market specified technologies relating to fiber-optic telecommunications testing and measurement instruments developed by the University of Geneva. This agreement was renegotiated under similar terms and conditions in 1999 for a five-year term. On June 1, 2000, we acquired the 85% interest held by GEXFO in GAP Optique for a consideration equal to its book value of approximately \$16,000 and GEXFO transferred all of its rights in the agreements to us.

In February 2000, we acquired all of the shares of Nortech Fibronic Inc., a company specializing in fiber-optic testing and temperature-sensing for a total consideration of \$2.8 million of which \$2.1 million was paid in cash. We also issued CA\$800,000 (approximately \$553,000) of Class "G" shares, which were converted into 800,000 preferred shares series 1 in June 2000, and a debenture of \$200,000 (approximately \$138,000) bearing no interest and payable on November 30, 2000. In November 2000, the former shareholders of Nortech agreed with us to make a purchase price adjustment, as a result of which we received \$104,000 in cash from a portion of the purchase price previously held in escrow and reduced the purchase price for the 800,000 preferred shares series 1 from CA\$800,000 (\$543,000) to CA\$544,000 (\$354,000), which were purchased by us on November 30, 2000 and subsequently cancelled. In June 2001, Nortech ceased operations. The majority of its assets were sold to a third party and we acquired the remaining

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

assets.

In connection with and immediately prior to our initial public offering in July 2000, we modified our authorized share capital to its current status, which consists of:

- o an unlimited number of subordinate voting shares without par value;
- o an unlimited number of multiple voting shares without par value;
- o an unlimited number of preferred shares without par value, issuable in series; and proceeded with the following exchanges:
- o the 38,000,000 Class "A" shares outstanding at that time were exchanged into 38,000,000 multiple voting shares;
- o the 707,264 Class "F" shares outstanding at that time were exchanged into 707,264 subordinate voting shares;

19

- o the 800,000 Class "G" shares outstanding at that time were exchanged into 800,000 preferred shares series 1.

The exchange of Class "A" shares into multiple voting shares, of Class "F" shares into subordinate voting shares and of Class "G" shares into preferred shares series 1 was part of our capital reorganization completed prior to our initial public offering and did not involve any disbursement of funds.

On July 6, 2000, we completed our initial public offering as a result of which we issued a total of 8,050,000 subordinate voting shares, including 1,050,000 subordinate voting shares pursuant to the exercise of the over-allotment by the underwriters. All the 8,050,000 subordinate voting shares were sold to the public at an offering price of \$26.00.

On December 20, 2000, we acquired all of the issued and outstanding shares of common stock of EXFO Burleigh Products Group Inc. (formerly Burleigh Instruments, Inc.) ("EXFO Burleigh"), Burleigh Instruments GmbH and Burleigh Instruments (U.K.) Ltd. for an aggregate purchase price of approximately US\$189.3 million, comprised of 6,488,816 of our subordinate voting shares and approximately US\$42.5 million in cash pursuant to the terms of an Agreement of Merger and Plan of Reorganization among us, EXFO Sub, Inc. and the selling shareholders, dated November 4, 2000, as amended on December 20, 2000. In April 2002, the name of Burleigh Instruments, Inc. was changed to EXFO Burleigh Products Group Inc.

EXFO Burleigh, which has been in operation for 31 years, has received industry recognition for its high-performance optical wavelength meters and precision positioning equipment. Its Wavemeter (R) instruments offer one of the highest wavelength measurement accuracy in the industry. These products are able to determine the absolute wavelength of a laser under test within 0.3 picometers at 1500 nm. Its Inchworm (R) precision positioning equipment provides nanometer accuracy, which is critical for precision alignment in the optical component manufacturing process. Both of these product lines are supported by a broad proprietary intellectual property portfolio.

In March 2001, we acquired all of the shares of EXFO Photonic Solutions

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

Inc. (formerly EFOS Inc.) ("EXFO Photonic"), a privately held company in Toronto, Canada, for a total consideration of \$111 million, of which \$25 million was paid in cash. We also issued 3,700,000 of our subordinate voting shares. In September 2001, the name EFOS Inc. was changed to EXFO Photonic Solutions Inc.

EXFO Photonic, operating since 1984, is a supplier of precision light-based adhesive spot curing products as well as curing process control for the global optical component manufacturing market and other non-telecom markets. Its products deliver precise doses of the appropriate spectral light into photo-sensitive and heat-cured adhesives to significantly reduce bonding time and increase repeatability in optical component and other manufacturing activities. EXFO Photonic light-based curing technologies are supported by an extensive understanding of bonding and material sciences and by a broad intellectual property portfolio, including 15 patents and 25 patents pending.

Also in March 2001, our wholly owned subsidiary, Burleigh Automation Inc. ("Burleigh Automation"), acquired substantially all the assets of Vanguard, a wholly owned subsidiary of DT Industries, Inc. for a purchase price of approximately \$600,000 paid in cash. Vanguard, an automation equipment manufacturer in Tucson, Arizona, specializes in the design and manufacturing of ultra-precision assembly equipment for sensitive process and critical assembly

20

challenges on the production floor. This acquisition, which complements our acquisition of Burleigh fits with our overall strategy to provide customers with a comprehensive solution for the assembly, alignment and testing of optical components and subsystems. Since September 2001, Burleigh Automation has ceased operations and we have transferred all material intellectual property assets and most of the physical assets of EXFO Automation to EXFO Burleigh.

In November 2001, we acquired all of the shares of Avantas Networks Corporation and simultaneously changed the name of that company to EXFO Protocol Inc. ("EXFO Protocol"). We paid a total consideration of approximately \$69 million (or \$95 million for the equity minus \$26 million of cash in the hands of the acquired company) to acquire EXFO Protocol. Consideration paid consisted of 4,374,573 of our subordinate voting shares and \$10 million in cash, net of cash acquired. EXFO Protocol, a company based in Montreal, Canada operating since 1998 is a supplier of fiber-optic testing and optical network performance management equipment that supports a wide range of protocols and data transmission rates.

On December 12, 2001, we announced the signing of a strategic alliance agreement with ATS Automation Tooling Systems Inc. The agreement facilitates integration of EXFO's automated manufacturing subsystems and test systems into ATS' turnkey custom and standard automation solutions to respond to specific needs of optical component and systems manufacturers. Under terms of non-exclusive strategic alliance, ATS and EXFO will jointly generate business leads, establish training programs for end-users, share marketing strategies and forecasts and validate product development initiatives.

During the past year, we continued our efforts to re-align our cost structure to market conditions. First, on December 5, 2001, we announced the lowering of our operating expenses, a freeze in employee salaries, and the reduction of our workforce by 10%. Then, on May 15, 2002, we announced a further 20% reduction of our global workforce in an effort to lower our cost structure. In May 2002, we performed an assessment of the carrying value of goodwill and intangible assets recorded in conjunction with the three acquisitions made during the last two years. Considering the ongoing unfavourable market conditions, we recorded a charge of US\$222.2 million to write down a significant

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

portion of goodwill and a charge of US\$23.7 million to write down a significant portion of acquired intangible assets. Also, overall for fiscal 2002, we wrote off US\$18.5 million in excess and obsolete inventories.

In August 2002, EXFO Burleigh received confirmation of the extension of its contract with the U.S. Air Force Research Laboratory into phase 2 of a project for the development by EXFO Burleigh of new high-precision actuator system. The contract for phase 2 provides for an additional funding of US\$1.7 million and will extend through the first quarter of 2005.

In October 2002, our newly created, wholly owned subsidiary, EXFO Gnubi Products Group Inc. ("EXFO Gnubi"), acquired substantially all the assets of gnubi communications L.P., including its technology, expertise, customer base, inventories and capital assets. Consideration paid consisted of US\$1.8 million in cash and 1,479,290 of our subordinate voting shares. In addition, a further cash amount up to a maximum of US\$2.9 million will be paid one year and 60 days after closing according to earn out provisions based on sales volumes. With the acquisition of these assets, EXFO Gnubi, based in Dallas, Texas, continues the operations of gnubi communications, L.P., as a supplier of multi-channel telecom and datacom testing solutions serving optical transport equipment manufacturers and research and development laboratories. At the time of the asset acquisition, 30 employees of gnubi communications transferred to EXFO Gnubi.

21

B. BUSINESS OVERVIEW

EXFO is a leading designer, manufacturer and marketer of fiber-optic test, measurement, monitoring and automation solutions for the global telecommunications industry. Our field-testing solutions enable telecommunications carriers and network service providers ("NSPs") to deploy, upgrade and operate their optical systems with the efficiency and cost-effectiveness. Our high-end optical testing and manufacturing solutions support system vendors, component makers and researchers in their quest to lower costs and increase yield in their respective environments. EXFO's comprehensive product portfolio extends across the entire life cycle of an optical network including research and development, manufacturing, installation, maintenance and telecommunications network monitoring. Altogether, we market more than 90 product families to 2000-plus customers in 70 countries around the world.

We develop products for two main markets. Our Portable and Monitoring Division provides handheld and modular instruments for the physical-, optical- and protocol-layer testing needs of carriers and NSPs as well as full-time, real-time network surveillance. Our Industrial and Scientific Division offers an extensive line of high-performance instruments, test automation systems and manufacturing automation equipment for system vendors, component makers as well as for research and development labs.

EXFO was founded in Quebec City, Canada in 1985. Our original products were focused primarily on the needs of installers and operators of fiber-optic networks. These products are marketed in what is known today as our Portable and Monitoring Division. Customers use Portable and Monitoring products for installation, maintenance, monitoring and troubleshooting of optical networking applications. In 1996, we supplemented our product portfolio with an extensive line of Industrial and Scientific products that are mainly dedicated to research and development as well as manufacturing activities. Our Industrial and Scientific products tend to be more complex and higher priced than our Portable and Monitoring products. In fiscal 1999, we entered the market for remote fiber test systems. Remote fiber test systems, which are marketed through our Portable and Monitoring Division, allow carriers to monitor the integrity of their entire

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

fiber-optic systems by verifying the protocol, optical and physical layers on a real-time basis, twenty-four hours a day, seven days a week.

One of our strongest competitive advantages is our modular platform design. EXFO introduced modular test platforms in 1996, and remains the industry leader with all-in-one test sets that provide added value for customers seeking enhanced productivity. Our PC-based platforms, which are supported by an extensive suite of plug-and-play test modules, are widely accepted among major network service providers and system manufacturers with an established base of more than 10,000 modular platforms sold.

During the last two years, we have strengthened our competitive positioning through acquisitions. In fiscal 2001, we completed two acquisitions to bolster growth in our Industrial and Scientific Division. We acquired EXFO Burleigh for its wavelength measurement instruments and nanopositioning alignment systems. We also added EXFO Photonic for its precision light-based, adhesive spot-curing technology. In fiscal 2002, we expanded into protocol-layer testing with the closing of the Avantas Networks Corporation acquisition (renamed EXFO Protocol Inc.), a supplier of fiber-optic testing and optical-network-performance management equipment. This acquisition was highly strategic because it enabled us to combine protocol-, optical- and physical-layer testing inside a single platform -- the FTB-400 Universal Test System -- to help our customers increase revenues and reduce operational costs in a fast-changing market.

22

Subsequent to the year-end, we announced that our wholly owned subsidiary, EXFO Gnubi, had purchased substantially all the assets of gnubi communications, L.P., a supplier of multi-channel telecom and datacom testing solutions. EXFO Gnubi's protocol-layer test equipment for system vendors fully complements EXFO Protocol's offering that is targeted at the network service provider market. As a result, these latest acquisitions enabled us to double our addressable market, while offering a complete fiber optic test solution to customers.

We introduced a record 25 new products in fiscal 2002 including the FTB-8000 SONET/SDH Analyzer for deployments of 10 Gb/s optical networks; the FTB-8500 Packet Blazer(TM) to ensure Gigabit Ethernet performance in high-speed optical networking; the FTB-5800 Chromatic Dispersion Analyzer for high-speed, dense wavelength division multiplexing ("DWDM"); the next-generation IQS-500 Intelligent Test System and related test modules for automated testing and manufacturing applications; and the ProAlign(TM) 5000 Component Assembly Workstation for the automated assembly of array-type devices.

Over our 17 year history, we have received more than 45 industry and commerce awards. In 2001, we were named one of the top 100 employers in Canada by Maclean's, a national current affairs magazine. In 2000, we were chosen winners of the Outstanding Corporate Innovator Award by the U.S.-based Product Development and Management Association. Prior to becoming a public company in June 2000, we had been recognized as one of the 50 Best-Managed Private Companies in Canada by Arthur Andersen Consulting and the Financial Post for five consecutive years.

THE EXFO SOLUTION

We believe that we offer the most extensive range of products in the fiber-optic test, measurement, monitoring and automation industry. Our success has been largely predicated on our exclusive focus on fiber optics. Our solution is based on the following key attributes:

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

MODULAR SYSTEM DESIGN. In 1996, we introduced the first products designed around our modular system design. This system design consists of a PC-based, Windows-driven platform that can accommodate several data acquisition test modules. We have since developed products for each division based on the same modular design. Our modular design provides the following advantages:

- o Unlike stand-alone units, new test modules can be rapidly developed to address the changing requirements of the industry.
- o As customers' testing requirements change, they can purchase additional modules that are compatible with their previously purchased platforms, thus protecting their initial investments.
- o Our standard graphical user interface reduces training costs because customers are familiar with previously acquired software products.
- o The flexibility of our systems allows customers to develop customized and automated solutions for their specific testing requirements.

23

HIGH DEGREE OF TECHNOLOGICAL INNOVATION. We have established a strong reputation for technological innovation over the last 17 years. In fact, this attribute represents a key differentiator for EXFO within a competitive marketplace. Following are some of our industry firsts in recent years:

- o ALL-IN-ONE TEST SOLUTION. In 2002, we launched the first all-in-one solution for protocol-, optical- and physical-layer testing to enable customers to increase efficiency and reduce costs in the field. The added value of this concept means that field technicians no longer need to carry separate instruments like bit-error-rate testers ("BERTs"), optical spectrum analyzers ("OSAs") and optical time-domain reflectometers ("OTDRs") to fulfill their testing requirements. All they need is the next-generation FTB-400 field-testing platform and related modules to handle all their testing, storage and retrieval needs.
- o OPTICAL WAVEGUIDE ANALYZER. In 2001, we released our Optical Waveguide Analyzer, which represents the industry's first commercial refractive index profiler for planar and arrayed waveguides. The refractive index profile of next-generation optical devices like arrayed waveguides is a critical parameter to measure in order to control and optimize the manufacturing process.
- o HIGH-PERFORMANCE PORTABLE OSA. In 2000, we introduced the first OSA to provide lab-quality specifications for rugged, portable use in the field. This instrument is useful for measuring key parameters of each wavelength in a DWDM system.

HIGH-QUALITY PRODUCTS. Product quality is an integral part of our solution. Our Quebec City-based operations have maintained ISO 9001 certification since 1994 and they are now certified to the new 2000 edition of the standard, as are our Toronto operations. Our subsidiary in Victor, New York

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

is presently working toward ISO9001/2000 registration. Our subsidiaries in Montreal and Dallas, Texas, have rigorous quality assurance programs, but they are not yet certified. All of our products meet required industry standards, and some of our products meet additional voluntary standards, such as those set by Telcordia, formerly Bellcore, IEC, and other industry-leading standards bodies. During manufacturing, each product has a related quality assurance plan, with rigorous checkpoints, to reduce defects to a minimum. Various tasks in the quality assurance process in all our facilities include quality control, conformity testing, product documentation, product improvement, regulatory compliance, metrology and calibration.

CUSTOMER SUPPORT. We use qualified and specialized internal groups to offer pre-sales evaluation, installation, channel and customer training, communications and post-sales support. We believe that this approach provides us with an advantage over our competitors, who often outsource some of these functions. Our customer service teams are mainly responsible for supporting our sales force, recommending instruments that best match our customers' testing, measurement, monitoring or automation needs, providing detailed quotations, order management, technical support and training as well as calibration and repair services.

OUR STRATEGY

We intend to improve our competitive position in the fiber-optic test, measurement, monitoring and automation industry through the following initiatives:

24

FOCUS ON QUALITY OF EXECUTION

We plan on returning to profitability without sacrificing innovation. In fiscal 2002, we took actions to align our cost structure to deteriorating market conditions. We reduced our workforce by 350 employees, froze employee salaries and implemented rigorous cost-control measures. We also improved the efficiency of the organization, in terms of management, manufacturing operations and supply-chain processes. In terms of innovation, we launched a record 25 new products in 2002, and revenues from products that have been on the market two years or less accounted for 48% of our sales. We are working to establish a balance between becoming profitable in the short-term and ensuring growth in the long-term.

INCREASE MARKET SHARE AND EXPAND ADDRESSABLE MARKET

We believe that gaining market share and tapping into new revenue streams will lead to future growth and profitability. EXFO has taken the first steps in that direction by increasing sales 12% and 5% sequentially during the last two quarters of fiscal 2002, and by raising our net bookings in the last three quarters of 2002 with bookings of \$13.3 million, \$15.5 million and \$17.8 million, respectively. Most industry players, meanwhile, witnessed their top lines drop or remain flat during the same period. In terms of market development, we entered the protocol-layer test sector in the 2002 financial year to complement our optical- and physical-layer testing products. The acquisitions of EXFO Protocol in November 2001 and of the assets of gnubi communications, L.P. in October 2002 not only enhanced our competitive position with network service providers and system vendors, but they also allowed us to double our addressable market and expand our presence in the healthier data communications test market. We plan to continue increasing our market share by leveraging competitive advantages, such as our modular platform design, new

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

product development strategy and global customer base, by building on growth vehicles like our new product pipeline, protocol-layer testing solutions and selective acquisition of strategic companies or product lines that further strengthen our competitive position.

MAINTAIN SOUND FINANCIAL POSITION

Over the years we have maintained a solid balance sheet and presently have a cash position of approximately \$50 million and practically no debt. This fiscal responsibility, in turn, provides our customers with the assurance that they can count on EXFO as a reliable vendor. We intend to take full advantage of our sound financial position by providing customers with the comfort of a solid, long-term partner.

PRODUCTS

At the core of our test, measurement, monitoring and automation equipment are our FTB-400 Universal Test System ("UTS") and IQS-500 Intelligent Test System ("ITS") platforms. Our FTB-400 UTS provides carriers with a simple, yet efficient way to perform multiple, advanced test operations for installation, maintenance and troubleshooting applications. Our IQ-500 ITS is a scalable unit that is suited for manufacturing, laboratory engineering and research applications. The added benefit of our IQS-500 ITS is that manufacturers can design their own automated test setup or we can customize a setup for them. Our FTB-400 UTS and IQ-500 ITS platforms are fully supported by integrated and highly intuitive graphical user interfaces, enabling the user to easily store, handle and retrieve a large amount of data.

25

The following table summarizes the principal types of instruments we provide, their typical applications and the format in which we offer them:

INSTRUMENT TYPE	TYPICAL APPLICATION	FORMAT		
		PORTABLE		IQS-500 ITS MODULES
		FTB 400 UTS MODULES	HANDHELDS	
Broadband source	Used for testing wavelength dependent behavior of fiber cables and DWDM optical components.			X
Channel selectors	Selects and isolates any International Telecommunication Union (ITU) DWDM channel in the C-Band for bit-error-rate testing and protocol-layer analysis.	X	X	
Chromatic dispersion analyzer	Measures increasing levels of chromatic dispersion in high-capacity optical networks. Chromatic dispersion is a physical phenomenon inherent to optical fiber and optical components that causes information bits to spread	X		

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

	along a network. This degrades the quality of the transmission signal and, in turn, limits the transmission speed carried by optical networks.			
Clip-on coupling device	Clips to an optical fiber and allows non-invasive testing.		X	
Component assembly workstation	Semi-automated workstation for arrayed-type devices that combines precision alignment, spot-curing and optical testing.			
Digital frequency locker	Used to automatically or manually lock the frequency of a laser source to a reference optical filter.			
Femtosecond polarization mode dispersion analyzer	Measures very small levels of polarization mode dispersion in DWDM and broadband components in the simplest, fastest and most repeatable manner.			
Gigabit Ethernet tester	Measures data integrity for high-speed internet protocol communications in metro and edge networks.		X	X
Light-based curing instrument	Technology by which a dose of energy of a specific wavelength, bandwidth and irradiance is used to cause an adhesive, encapsulant or sealant to change from a liquid to a solid in a small area. Used to bond optical components and sub-components.			
Live fiber detector	Clips on to a fiber and is used to detect the presence and direction of a signal without interrupting the traffic.		X	
Loss test sets	Integrates a power meter and a light source to manually or automatically measure the loss of optical signal along a fiber.	X	X	X
Multi-wavelength meters	Measures the power and drift for multiple wavelengths in a DWDM system.	X		X
Nanorobot photonics alignment system	Offers multi-axis alignment and can position optical devices with a nanometer resolution, which is essential during the alignment of optical components in the			

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

INSTRUMENT TYPE	TYPICAL APPLICATION	FORMAT		
		PORTABLE		
		FTB 400 UTS MODULES	HANDHELDS	IQS- ITS MO
	manufacturing process.			
Narrowly tunable lasers	A laser that can be precisely tuned to simulate a DWDM light sources. Used primarily in testing optical amplifiers.			X
Optical amplifier	Boosts the power of laser sources. Used for the testing and calibration of test systems.			X
Optical couplers	Used in test system to combine sources or signals. Also used as splitters to monitor signals.			X
Optical fiber parameter analyzer	Measures the geometric and light guiding properties of an optical fiber. Used in new fiber research and development and quality control applications.			
Optical power meters	Measures the power of an optical signal. It is the basic tool for the verification of transmitters, amplifiers and optical transmission path integrity.	X	X	X
Optical power reference module	Provides a highly accurate and traceable measurement of power for the calibration or verification of other power measurement instruments.			X
Optical return loss meters	Combines a laser and a power meter to measure the amount of potentially degrading back reflection.	X	X	X
Optical spectrum analyzers	Produces a graphical representation of power versus wavelength for an optical signal. Useful for measuring the drift, power and signal-to-noise ratio for each wavelength in a DWDM system.	X		X
Optical switches	Provides switching between fibers. Used to provide flexible and automated test setups such as the measurement of multiple fibers or components with multiple ports with one instrument.	X		X
Optical time domain	Like a radar, it measures the time			

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

reflectometers (OTDRs)	of arrival of reflections of an optical signal to determine the distance to the breaks or points of excessive loss in a fiber network.	X
Optical waveguide analyzer	Provides the refractive index profile of glass and fused silica-based devices used in next generation networks.	
Passive component analyzer	Characterizes passive wavelength-selective devices, such as multiplexers, demultiplexers and add/drop filters, with respect to absolute wavelength in order to guarantee their performance within DWDM systems.	
Polarization dependent loss meters	Measures the difference in loss of power for the different states of polarization.	
Polarization mode dispersion analyzers	Measures the dispersion of light that is caused by polarization. Generally used to determine the speed-distance limitation of fiber and cables.	X

27

INSTRUMENT TYPE	TYPICAL APPLICATION	FORMAT		
		PORTABLE		IQS-
		FTB 400 UTS MODULES	HANDHELDS	ITS MO
SONET/ SDH Analyzers	Provide accurate bit-error rate and performance analysis of SONET/SDH overhead format that reflect the quality of a transmission system.	X		X
Stable light sources	Emitting diode or lasers used in connection with a power meter to measure signal loss.	X	X	X
Talk sets	A device that attaches to an optical fiber and serves as a temporary voice link facilitating coordination of work among installation crews.	X	X	
Variable optical attenuators	Used in network simulation setups to provide calibrated variable reduction of the strength of an optical signal.		X	X
Visual fault locators	A visible laser that can be			

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

connected to an optical fiber network to help locate breaks or points of excessive loss. X X

Widely tunable lasers Can produce laser light across a broad range of wavelengths. Used to test DWDM components and value-added optical modules.

* PC-based modular test platform (from EXFO Gnubi)

PORTABLE AND MONITORING PRODUCTS

We offer an extensive range of products for fiber-optic testing, measurement and monitoring applications. Our test and measurement products are available as handheld test instruments or as field-portable platforms with related modules. Our handheld instruments are durable, compact and easy to use. Our second-generation field-testing platform, the FTB-400 UTS, is available in a two-slot configuration for basic OTDR and optical loss testing, or a seven-slot configuration for high-end DWDM testing, Gigabit Ethernet bit-error-rate testing, protocol-layer analysis, PMD and CD characterization, high fiber-count testing as well as OTDR and optical loss testing and with a SONET/SDH add-on to handle rates from 64 Kb/s to 10 Gb/s. We also offer the FTB-100 Mini-OTDR with an integrated power meter option. This cost-effective platform provides field technicians with basic OTDR testing capabilities. Our portable platforms are PC-centric, Windows-based, highly flexible and fully scalable. Their large environmentally robust touchscreens are very practical for field use.

Our Portable and Monitoring products cover the physical, optical and protocol layers of an optical network. If you compare a network to a highway, EXFO products test the road, or the fiber and optical components that make up the physical layer of a network. Our products also characterize the numerous lanes along the highway, or the various wavelengths carrying bandwidth within the optical layer of a network. And our products test the traffic, or the bits and bytes, streaming through the protocol layer of a network.

We also offer stand-alone, autonomous solutions for physical-, optical- and protocol-layer monitoring. Our physical-layer monitoring solution, Fiber Guardian, carries out constant real-time monitoring on up to 32 fibers within an optical network. This monitoring solution displays a message on its embedded screen and sends out an alarm if a measurement falls outside a user-defined threshold. Through state-of-the-art instrumentation, Fiber Guardian can

28

specify the location of a fault to reduce downtime to a minimum, or it can identify minor degradations to prevent loss of service.

Our optical-layer monitoring product, Optical Guardian, continuously monitors critical parameters of optical channels within "DWDM" or coarse wavelength division multiplexing ("CWDM") networks. Likewise, an alarm is automatically generated when a measurement falls outside user-defined thresholds.

Finally, our protocol-layer monitoring solution, Network Guardian, is an optical network performance management system that supports a wide range of protocols like SONET, T-Carrier, SDH, PDH, 10/100 Ethernet and Gigabit Ethernet. It remotely carries out tests on points of presence, handoff points, co-location sites and customer premise equipment sites. Our portable and monitoring products

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

accounted for 57% of our sales in the financial year ended August 31, 2002 and 48% and 69% of our sales in the 2001 and 2000 financial years respectively.

INDUSTRIAL AND SCIENTIFIC PRODUCTS

Our Industrial and Scientific product line is mainly built around our IQS-500 ITS platform and is available as test modules or stand-alone, benchtop instruments. The IQS-500 ITS is a next-generation scalable platform that enables system vendors, optical component manufacturers and research labs to reduce costs and increase efficiency. It efficiently runs as many as 100 test modules using a single controller unit. These modules can be stacked to produce a high-performance test station for a number of network elements including DWDM multiplexers, optical cross-connects, optical transponders, optical patchcords and VCSEL lasers.

The IQS-500 platform is equipped with the latest in software and hardware technology to support single-button operation for automated testing. Its system-based approach--one box, several test modules--combined with an open architecture (PXI, Windows, LabVIEW(TM), etc.) and ease of programming, produces a highly flexible test and automation environment.

The IQS-500 also provides backward compatibility with recent IQ-generation test modules, while delivering all the power and advantages of a next-generation platform. EXFO's wide selection of high-performance test modules includes high-speed power meters, light sources, WDM laser sources, tunable laser sources, variable attenuators, optical spectrum analyzers, polarization mode dispersion ("PMD") analyzers, multi-wavelength meters, channel selectors, polarization dependent loss ("PDL") and optical return loss ("ORL") meters, polarization controllers and optical switches.

Our Industrial and Scientific Division also addresses testing issues that cannot be handled by standard test modules or stand-alone benchtop instruments. We have developed a number of integrated test systems and offered them as off-the-shelf solutions to suit a wide range of customer needs. In addition, we have created a software development kit for developers who prefer writing their own programs for our instruments. Following is list of integrated test systems that EXFO provides for characterizing optical components, sub-systems and networks:

29

- o Multifiber test system Used for quality-assurance testing of multifiber patchcords and interconnect assemblies. These devices, including hybrid and fan-out patchcords, are commonly used in fiber systems.
- o Cable assembly test system Used to perform insertion loss and mandrel-free reflection measurements with the highest degree of accuracy and repeatability on short fiber assemblies.
- o Optical calibration test system Used to calibrate power meters, light sources, variable attenuators and optical time domain reflectometers.

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

- o Environmental test system Allows users to perform long-term qualification testing of optical components and sub-systems under varying environmental conditions primarily to ensure compliance with industry standards.

- o DWDM passive component test system Used to automatically characterize all critical specifications, including spectral insertion loss, polarization-dependent loss, and optical return loss, of a DWDM passive component with a high degree of accuracy, ease of use, and speed.

- o Multi-wavelength comb controller Used to adjust the power of a bank of DFB-ITU lasers in order to test loading conditions of optical amplifiers.

EXFO Burleigh and EXFO Photonic further enhance our Industrial and Scientific Division product portfolio by enabling customers to automate critical steps in the optical component manufacturing process. These critical steps include automated fiber alignment (EXFO Burleigh) and precision light-based, adhesive spot-curing (EXFO Photonic). In fiscal 2002, both of these subsidiaries combined with EXFO to produce the ProAlign(TM) 5000 Component Assembly Workstation, the industry's first semi-automated solution for arrayed-type waveguide devices.

Another product from EXFO Burleigh includes the FR-3000 NanoRobot (R) Alignment System, which provides multi-axis alignment and can position optical devices with a 0.1 nanometer of mechanical resolution. EXFO Burleigh also offers test and measurement instruments like optical channel analyzers and passive component analyzers.

EXFO Photonic provides precision light-based, adhesive spot-curing technologies as well as curing process control for the optical component, semiconductor and life science markets. Its products deliver precise doses of the appropriate spectral light onto photosensitive and heat-cured adhesives to significantly reduce bonding time and increase repeatability. Key products include the Novacure(R) IR, which uses infrared spot-curing on conventional heat-cure adhesives; the Novacure(R), a bonding solution that delivers all the benefits of ultraviolet and visible spot-curing on photosensitive adhesives; and the Acticure(R) 4000 Ultraviolet/Visible Spot Cure System, which has an increased lamp life of 2,000 hours and an optional automated controller that offers user-programmable profiles for bonding. All of these light-based curing systems can be adapted to automated or manual assembly environments. In addition, in October 2002, EXFO Photonic released its X-Cite™ 120 fluorescence illumination system, a self-contained illumination unit for fluorescence microscopy applications.

Our modular and benchtop instruments are complemented by multi-channel telecom and datacom test solutions coming from EXFO Gnubi's protocol-layer test instruments that handle data rates from 64 Kb/s to 10 Gb/s - as well as Gigabit Ethernet - inside a PC-based modular platform that is highly comparable to EXFO's. EXFO Gnubi's product offering addresses test requirements for multiple communication ports in lambda routers, optical switches, cross-connects and DWDM

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

systems.

Our Industrial and Scientific products accounted for 43% of our sales in the financial year ended August 31, 2002 and 52% and 31% in the 2001 and 2000 financial years respectively.

RESEARCH AND DEVELOPMENT

We believe that our future success largely depends on our ability to maintain and enhance our core technology and product functionality. To keep developing new products and enhancements, it is important that we recruit and retain highly skilled engineers, scientists and technicians. As of December 31, 2002, our research and development departments included 244 full-time engineers, scientists and technicians, of whom 41 hold post-graduate degrees. Gross research and development expenditures for fiscal 2002 reached \$17million compared to \$17.6 million for fiscal 2001.

Despite the addition of the EXFO Protocol research and development activities further to that acquisition in November 2001, we effectively reduced our research and development personnel and expenditures during fiscal 2002 as a result of restructuring and cost reduction efforts. However, through our market-oriented product portfolio review process we ensure that our investments in research and development are aligned with our customers' needs and strategies. This process enables us to maximize our returns on research and development investments by focusing our resources on prioritized projects. Quarterly product portfolio review meetings enable us to choose a realistic, balanced mix of new products and allocate the necessary resources for their development. All our projects, including those already underway, are reviewed, given a priority rating and allocated budgets and resources. Our existing projects can be stopped or substantially redefined if there have been significant changes in market conditions, or if the project development schedule or budget has been significantly exceeded.

To manage our research projects once they are underway, we use a structured management process known as the stage-gate approach. The stage-gate approach is based on a systematic review of a project's feasibility at various stages of its life cycle. The following are the key review stages of the stage-gate approach:

- o market study and research feasibility;
- o product definition;
- o development feasibility;
- o development;
- o qualification; and
- o transfer to production.

At each stage, we review our project risks, costs and estimated completion time. We compare our design to anticipated market needs and ensure that our project is synchronized with other internal departments and external industry events. The inter-related portfolio review and stage-gate processes enabled us to be named winners of the Outstanding Corporate

31

Innovator Award in 2000 by the U.S.-based Product Development and Management Association.

CUSTOMERS

More than 2,000 customers in 70 countries around the world rely on our

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

test instruments and systems in research and development laboratories and production environments and to enable optical networks to perform impeccably during their complete lifecycles. Our customers include telecommunications carriers, cable television companies, public utilities, private network operators, third-party installers, equipment rental companies as well as optical component and system manufacturers. During fiscal 2002, only one customer accounted for more than 10% of our sales and our top three customers represented 15.4% of our sales during this period. With regard to geographic distribution, North American customers represented 57% of our sales, while international customers accounted for 43% during fiscal 2002. For the financial years ended August 31, 2001 and 2000, North American sales accounted for 58% and 62%, and international sales for 42% and 38% respectively. Our international sales are largely handled by a network of distributors around the world.

SALES

We sell our fiber-optic test, measurement and automation products through direct and indirect sales networks in the United States and Canada as well as around the world. We also have two Customer Service Groups to meet the needs of existing and new customers in North America and on the international front. These groups are responsible for providing quotations to customers, supporting our sales force, managing demonstration units, order management, technical support and training as well as calibration and repair services.

UNITED STATES AND CANADA SALES

In the United States and Canada, we utilize hybrid (direct and/or indirect) sales organizations as best-suited for particular market segments to generate revenue. Higher technology products to sophisticated buyers is typically a direct sale model. Low to medium technology products to less stringent technical buying groups is typically done through a manufacturer representative organization supported by our local regional sales managers. The team consists of a vice-president supported by a 24-member team of sales directors and regional sales managers, account managers sales engineers and application engineers, who are located throughout major metropolitan areas. Our group of sales professionals has an average of 13 years of experience in the fields of telecommunications, fiber optics, or test, measurement and monitoring.

In Canada, the direct to customer sales team addresses the carrier, manufacturing and research and development markets for our test, measurement and monitoring equipment and our manufacturing automation products. Sales personnel are located in metropolitan areas throughout the country.

In the United States, we have adopted a market-specific sales strategy. Different sales organizations have been created to maximize coverage and penetration of our main markets:

- o CARRIER MARKET. This sales team targets customers who own, operate or install networks as their primary business. This market includes telecommunications

32

carriers, cable television companies, public utilities, private network operators, as well as third-party installers and equipment rental companies.

- o MANUFACTURING/R&D MARKET. This sales team specializes in selling our test, measurement and monitoring equipment and our manufacturing automation products targeted to customers who

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

research, develop or manufacture optical networking products and components. In this market, regional sales managers also have direct responsibility for serving our larger manufacturing customers. This organizational structure allows us to adequately cover the demands of a highly technical customer base and to identify and penetrate the large multi-function accounts, diverse and smaller customers, university researchers, military contractors, contract manufacturers and other evolving market segments.

Our main sales office in the United States is located in Richardson, Texas. We also maintain sales personnel in numerous metropolitan areas and rely on more than 40 sales representatives and distributors situated throughout the United States.

INTERNATIONAL SALES

Our international sales network includes a vice-president, a general manager in Europe and two sales directors covering Latin America and Asia, all supported by a team of 21 sales professionals. Our direct sales network in Europe is supported by a main office and service center in Paris, France, which maintains our head of European sales operations and also provides repair and calibration services for our European, Middle East and African customers. Our main offices for Asia are in Singapore and Beijing and we have also established service centers in Singapore and Beijing to better serve our customer base in the Asia-Pacific region. In addition, we have other sales offices in strategic locations around the world to support our network of distributors and customers. Finally, we rely on more than 90 distributors to support our international sales. We feel that the local presence and cultural attributes of our distributors allow us to better serve our global markets.

MARKETING, COMMUNICATIONS AND CUSTOMER SUPPORT

MARKETING

Our Marketing Group consists of over 30 product managers and marketing analysts who have various degrees in engineering, science and business administration. Product managers, with the assistance of marketing analysts, are responsible for all aspects of our marketing program including product strategy, new product introductions, definition of new features and functions, pricing, product launches and advertising campaigns. Marketing analysts help product managers develop marketing programs with tools such as our Web site, CD-ROMs, advertisements, mail outs and customer presentations. We follow up our marketing initiatives by attending industry trade shows. Furthermore, we have implemented a customer relationship management system to compile market and customer information including forecasts, leads and competitive data. We use this information to make strategic business decisions. Finally, our strategic marketing team analyses markets, market trends, compiles competitive information and identifies macro-trends in our sector.

33

COMMUNICATIONS

Our Communications Group, which mainly consists of commercial writers and graphic artists, supports our Marketing Group by producing marketing and corporate documentation. Literature includes specification sheets, application notes, product catalogues, advertising copy and a bi-monthly corporate newsletter. Our Communications Group is also responsible for maintaining and updating our Web site.

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

CUSTOMER SUPPORT

We have developed a Customer Support Group that serves customers and distributors around the world in English, French, Spanish, Chinese and German. Our Customer Support Group consists of three distinct units: technical support, order management and a repair and calibration authorization service centers. A frequently asked question database is also updated regularly on our Web site.

Through service facilities located in Canada, the United States, Europe and Asia, we provide full after-sales service to our customers that includes the following: technical support and software upgrades, application support, calibration verification, calibration adjustment, repairs (including hardware upgrades and preventive maintenance), training, and field services (including on site installation, repairs, calibration verification, preventive maintenance and training).

MANUFACTURING

Manufacturing operations consist mainly of material planning, procurement, sub-assembly, final assembly, testing, software loading, calibration, quality assurance, shipping, billing and customs management.

As of December 31, 2002, we had 256 employees involved in our manufacturing operations. Our manufacturing operations, which occupy a total of approximately 97,475 square feet, are spread among six buildings in five cities. Manufacturing operations occupy 66,225 square feet in Quebec City, Canada, 10,000 square feet in Victor, United States, 16,000 square feet in Toronto, Canada, 3,300 square feet in Montreal, Canada and 1,950 square feet in Addison, United States. Our manufacturing operations in Quebec City are handled by three inter-related departments:

- o PRODUCTION. Our production department is responsible for manufacturing high-quality products on time. Each cell consists of specialized technicians and has full responsibility over a product group. Technicians are versatile enough so that they can perform specific functions within a cell and they can be transferred to other cells when required to alleviate bottlenecks. Furthermore, this department is responsible for manufacturing schedules, finished goods warehousing, customs management, shipping and billing.
- o PRODUCTION ENGINEERING AND QUALITY. This department, which supports our production cells, acts like a gatekeeper to ensure the quality of our products and the effectiveness of our manufacturing processes. It is responsible for the transfer of products from research and development to manufacturing, product improvement, documentation, metrology, repairs and the quality assurance and regulatory

compliance process. Quality assurance represents a key element in our manufacturing operations. Quality is assured through product testing at numerous stages in the manufacturing process to ensure that our products meet stringent industry requirements and our customers performance requirements. Our quality assurance program in Quebec City has been certified ISO 9001 since 1994.

- o SUPPLY-CHAIN MANAGEMENT. This department is responsible for parts procurement, raw materials and forecasting. Our products consist of optical, electronic and mechanical parts. Approximately one-third of our parts are manufactured to our specifications. Some parts are obtained from single-source suppliers. We manage risks associated with single-source suppliers, as well as parts that are subject to industry shortages or long delivery lead times, through a strategic forecasting process that involves procuring excess inventory where appropriate.

Manufacturing operations at EXFO Burleigh, EXFO Photonic, EXFO Protocol and EXFO Gnubi follow a similar process with the exception that some non-critical tasks, such as the stuffing of printed circuit boards, are outsourced.

COMPETITION

The fiber-optic test, measurement and automation industry is highly competitive and subject to rapid change as a result of technological developments and other factors. We compete with many different companies, depending on product family and geographical market. We believe that the main competitive factors in the industry include the following:

- o product performance and reliability;
- o level of technological innovation;
- o product lead times;
- o breadth of product offering;
- o ease of use;
- o customer service and technical support;
- o strength of sales and distribution relationships;
- o financial stability; and
- o price.

The fiber-optic test and measurement sector has recently undergone, and will continue to undergo, significant restructuring and consolidation. We have seen, and expect to continue to see, some competitors opting for strategic retreat, redirecting their research and development to other sectors, divesting or merging.

Generally, our competitors fall into two categories. The first category consists of global electronic test and measurement manufacturers, who complement their broad range of products with fiber-optic test, measurement and automation equipment. These companies include Acterna Corporation, Agilent Technologies, Inc., Ando Corporation, Anritsu Corporation, NetTest, Spirent plc and Tektronix, Inc.

The second category refers to niche companies in the fiber-optic test, measurement and automation industry or those serving that industry as a niche market. These companies typically have limited product lines and in some cases may be geographically limited in their customer base. Such companies include Digital Lightwave, Inc., ILX Lightwave Corporation,

JDS Uniphase Corporation, Kingfisher International PTY Ltd., Newport Corporation and Santec Corporation.

REGULATORY ENVIRONMENT

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

In most countries where our products are sold, our products must comply with the regulations of one or more governmental entities. These regulations often are complex and vary from country to country. Depending upon the country and the relevant product, the applicable regulations may require product testing, approval, registration, marking and unique design restrictions. Accordingly, we have appointed a team of engineers who are responsible for ensuring that our products comply with all applicable regulations.

In the United States, our products must comply with the regulations of several agencies of the U.S. federal government, including the Federal Communications Commission, or the FCC, the Food and Drug Administration, or the FDA and the Occupational Safety and Health Administration, or OSHA. Under the FCC's regulations, our products must comply with, among other things, rules concerning unintentional radio frequency emissions that interfere with protected radio communications systems. Depending upon the product, compliance with these rules may necessitate applying for and obtaining an FCC equipment authorization prior to importing into the United States, or marketing, any units of the relevant product. Additionally, some of our products must comply with the FDA's performance standards and related rules concerning light-emitting products, such as lasers. The FDA's regulations are intended to promote safety by limiting human exposure to harmful electromagnetic radiation. Similarly, our products must comply with OSHA's design safety standards for systems that utilize electricity. These rules are intended to reduce the risk of accidental human electrocution.

Similar regulations apply in other countries. For example, our products are subject to the safety standards of Industry Canada and the Canadian Standards Association with respect to electricity utilization and radio frequency emissions. Other countries in the world require equipment marking in accordance with the standards of the European Community, often referred to as CE marking, testing to ensure compliance with International Electrotechnical Commission standards and other international product approval. Other significant types of regulations not described in this annual report also may apply, depending upon the relevant product and country.

INTELLECTUAL PROPERTY

Our success and ability to compete are dependent in part on our ability to develop and protect our proprietary technology. We file U.S. and Canadian patent applications to protect technology, inventions and improvements important to the development of our business. We also rely on a combination of copyright, trademark, trade secret rights, licensing and confidentiality agreements.

We currently hold 20 U.S.-issued and seven Canadian-issued patents and we have 28 U.S., 22 Canadian and five Patent Cooperation Treaty patent applications pending. These issued and pending patents cover various aspects of our products and processes. The expiration dates of our issued patents range from January 16, 2010 to March 31, 2021.

We consider six of our inventions for which patents have either been granted or are pending to be material. These inventions are:

36

- o the optical time domain reflectometer with internal reference reflector for which a patent was granted in the United States and is pending in Canada. This invention permits the control of the optical time domain reflectometer detector gain and the determination of the loss of the initial optical connector and

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

is used in most of our optical time domain reflectometer-based products;

- o the measurement of attenuation of optical fibers using bidirectional transmission of information via the fiber for which patents were granted in the United States and Canada. This invention forms the basis of our FOT-920 and FTB-3920 products;
- o an apparatus and method to determine optical phase delay, which forms the basis of our new FTB-5800 product for the measurement of chromatic dispersion in field-installed optical fibers. A US patent has been granted, and applications have been submitted in Canada, Europe (pursuant to PCT), and China;
- o an optical spectrum analyzer using optical fibers as input and output "slits". This invention forms the basis of our FTB-5240, FTB-5240B and IQ -5250 products. This patent application is in process in the United States, Canada, Europe (pursuant to PCT) and China;
- o the light cure system with closed loop control and work piece recording which is at the heart of the spot-curing systems manufactured by EXFO Photonic Solutions for which patents were granted in the United States and Canada; and
- o the portable test gear for TDM and packet based communications for which patent applications have been filed in Canada, the United States and pursuant to the Patent Cooperation Treaty form the basis of the technology used by EXFO Protocol for its protocol testing products.

Confidentiality and proprietary information agreements with our senior management, employees and others generally stipulate that all confidential information developed or made known to these individuals by us during the course of their relationship is to be kept confidential and not disclosed to third parties, except in specific circumstances. The agreements also generally provide that all intellectual property developed by the individual in the course of rendering services to us belongs exclusively to us. These efforts afford only limited protection.

LEGAL PROCEEDINGS

On November 27, 2001, a class action suit was filed in the United States District Court for the Southern District of New York by John Williams, and others similarly situated, against us, four of the underwriters of our initial public offering (Merrill Lynch, Pierce, Fenner & Smith, Inc., RBC Dominion Securities Inc., Wit Soundview Corporation and CIBC World Markets Inc.) and Messrs. Germain Lamonde and Pierre Plamondon pursuant to the SECURITIES EXCHANGE ACT OF 1934 and Rule 106-5 promulgated thereunder and sections 11, 12 and 16 of the SECURITIES ACT OF 1933. This class action, involving more than 300 other public companies, alleges that our registration statement and prospectus filed with the Securities and Exchange Commission on June 29, 2000 contained material misrepresentations and/or omissions resulting from (i) the underwriters allegedly soliciting and receiving additional, excessive and undisclosed commissions from certain investors in exchange for which they allocated material portions of our shares issued in connection with our initial public offering; and (ii) the underwriters allegedly entering into agreements with customers whereby our shares issued in connection with our initial public offering would be allocated to those customers in exchange for which such customers agreed to purchase additional amounts of our shares in the after market at pre-determined prices.

On April 19, 2002, the plaintiffs filed an amended complaint containing master allegations against all of the underwriters in all of the 310 cases included in this class action and, also filed an amended complaint containing allegations specific to four of the company's underwriters, the company and two of its executive officers. In addition to the allegations mentioned above, the amended complaint alleges that the underwriters (i) used their analysts to manipulate the stock market; and (ii) implemented schemes that allowed issuer insiders to sell their shares rapidly after an initial public offering and benefit from high market prices. As concerns the company and its two executive officers in particular, the amended complaint alleges that (i) the company's registration statement was materially false and misleading because it failed to disclose the additional commissions and compensation to be received by underwriters; (ii) the two named executive officers learned of or recklessly disregarded the alleged misconduct of the underwriters; (iii) the two named executive officers had motive and opportunity to engage in alleged wrongful conduct due to personal holdings of the company's stock and the fact that an alleged artificially inflated stock price could be used as currency for acquisitions; and (iv) the two named executive officers, by virtue of their positions with the company, controlled the company and the contents of the registration statement and had the ability to prevent its issuance or cause it to be corrected. The plaintiffs in this suit seek an unspecified amount for damages suffered.

In July 2002, the issuers filed a motion to dismiss the plaintiffs' amended complaint and on October 8, 2002, the claims against Messrs. Lamonde and Plamondon were dismissed pursuant to the terms of Reservation of Rights and Tolling Agreements entered into with the plaintiffs.

We believe that our executive officers and we have fully complied with all applicable securities laws and that the claims against us are without merit. We have referred this matter to our insurers and are vigorously defending our position in this litigation. However, we are unable to predict the outcome of this case and if it is adversely determined, it could have certain adverse effects on our business, including potential monetary damages that may exceed available insurance protections.

On December 12, 2000, GAP Optique instituted legal proceedings with the Jurisdiction des Prud'hommes in Geneva, Switzerland against an ex-employee for breach of a confidentiality obligation as stipulated in his employment contract. GAP is claiming monetary damages only since Swiss law does not allow injunctive relief in this case. Mr. Patrick Stamp was hired by our subsidiary, GAP Optique on May 1, 1998. Mr. Stamp's employment contract contained a confidentiality clause that prohibits disclosure or use of any confidential information he may obtain during the course of his work. The contract provides that this obligation continues for a period of one year following termination of the employment agreement. Mr. Stamp left GAP Optique in February 2000 to create a start-up company called LUCIOL Instruments, S.A ("LUCIOL") with the help of two former employees of the University of Geneva. LUCIOL presently manufactures and sells fiber optic test instruments, of which two (a chromatic dispersion analyzer and a photon-counting OTDR) were developed jointly by GAP Optique and the University of Geneva. Mr. Stamp participated in the development of these instruments during employment with GAP Optique and the University. Therefore, it is the contention of GAP Optique that Mr. Stamp is now using illegally, through LUCIOL, the proprietary and confidential information he obtained during his employment in order to market the particular test instruments. A preliminary hearing was held on November 1, 2001 and the proceedings resumed on January 15, 2002, at which time the court ordered the preparation and filing of an

independent expert report. Both parties have submitted to the court a list of questions and issues to be addressed by the expert. The Court's ruling provided that the report be filed by November 30, 2002, however, we still have not received confirmation of the filing.

On November 28, 2002, EXFO, GAP Optique and the University of Geneva filed a joint motion for provisional measures, with the District Court in the Canton Vaud, Switzerland, against LUCIOL. The joint plaintiffs are seeking an order to prohibit LUCIOL from manufacturing and selling the chromatic dispersion analyzer and the photon-counting OTDR that are both described in the preceding paragraph. The defendant is expected to appear before the court to file an answer to the application in early January 2003.

There are no other legal or arbitration proceedings pending or threatened of which we are aware which may have or have had a significant effect on our financial position.

C. ORGANIZATIONAL STRUCTURE

As of December 31, 2002, the following chart presents our corporate structure, the jurisdiction of incorporation of our subsidiaries and the percentage of shares that we hold in those subsidiaries.

D. PROPERTY, PLANT AND EQUIPMENT

Our main offices and facilities are located in Quebec City, Canada where we occupy three buildings. These buildings house our executive and administrative offices, research and development facilities and production facilities. In addition, we maintain sales offices in China, France, Germany, Great Britain, Japan, Singapore and the United States. EXFO Burleigh's facilities are located in Victor, in the state of New York, EXFO Gnubi is located near Dallas, Texas, EXFO Photonic is located near Toronto, Canada and EXFO Protocol is located in Montreal, Canada.

39

In September 2002, we obtained ownership of one of the buildings housing production facilities in Quebec City that was previously leased from a company controlled by EXFO's president and chief executive officer.

The following table sets forth information with respect to the main facilities that we occupy as of December 31, 2002.

LOCATION	USE OF SPACE	SQUARE FOOTAGE

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

The following discussion and analysis of the consolidated financial condition and results of operations of EXFO for the fiscal years ended August 31, 2002, 2001 and 2000 should be read in conjunction with our consolidated financial statements and the related notes included elsewhere in this annual report. Our consolidated financial statements are reported in US dollars and have been prepared in accordance with generally accepted accounting principles in Canada, or Canadian GAAP. To the extent applicable to our consolidated financial statements included elsewhere in this annual report, these principles conform in all material respects with generally accepted accounting principles in the United States, or U.S. GAAP, except as described in Note 19 to our consolidated financial statements.

CORPORATE HIGHLIGHTS

EXFO LAUNCHES 25 PRODUCTS IN 2002

EXFO announced in September 2002 that it had launched 25 new products in fiscal 2002. Key product launches included the FTB-8000 SONET/SDH Analyzer for deployments of 10 Gb/s optical networks; the FTB-8500 Packet Blazer(TM) to ensure Gigabit Ethernet performance in high-speed optical networking; the FTB-5800 Chromatic Dispersion Analyzer for high-speed, dense wavelength-division multiplexing; the next-generation IQS-500 Intelligent Test System and related test modules for automated testing and manufacturing applications; and the ProAlign(TM) 5000 Component Assembly Workstation for the automated assembly of array-type devices.

EXFO CARRIES OUT RESTRUCTURING ACTIONS AND REVIEWS ASSETS FOR IMPAIRMENT

As a result of the telecommunications downturn that affected several markets, EXFO carried out a series of restructuring measures in fiscal 2002 to accelerate its return to profitability. Several proactive actions were taken to lower the company's cost structure, including workforce reductions and inventory write-offs. Overall for fiscal 2002, EXFO reduced its workforce by 350 people and wrote off \$18.5 million in excess and obsolete inventories.

EXFO also performed in May 2002 an assessment of the carrying value of goodwill and intangible assets recorded in conjunction with the three strategic acquisitions made during the last two years. Considering the ongoing unfavorable market conditions, the company recorded a charge of \$222.2 million to write down a significant portion of goodwill and a pre-tax charge of \$23.7 million to write down a significant portion of acquired intangible assets.

EXFO IMPLEMENTS NEW ERP SYSTEM

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

In December 2001, a new enterprise resource planning ("ERP") system was implemented at EXFO's headquarters in Quebec City, QC. This ERP system will enable the company to improve the efficiency of its operations and should provide customers with better and more prompt service.

41

EXFO COMPLETES ACQUISITION OF AVANTAS NETWORKS

EXFO announced in November 2001 that it had completed its previously announced acquisition of Avantas Networks Corporation (renamed EXFO Protocol) for a total consideration of \$95.0 million, or \$69.4 million net of \$25.6 million of cash and cash equivalents acquired. This acquisition was accounted for using the purchase method and has resulted in goodwill of \$58.0 million, which is not amortized under new accounting rules. In May 2002, as part of the assessment of the carrying value of goodwill recorded in business combinations, EXFO Protocol's goodwill was written down to its fair value, resulting in an impairment loss of \$49.3 million. EXFO Protocol is a supplier of leading-edge fiber-optic testing and optical-network-performance management equipment supporting a wide range of protocols and data transmission rates.

SUBSEQUENT EVENT

Subsequent to the year-end, EXFO announced it had acquired substantially all the assets of gnubi communications, L.P., including its technology, expertise, customer base and inventories, in a stock-and-cash deal that ranged between \$4.3 million and \$7.2 million. Consideration paid consisted of \$2.5 million in EXFO stock, \$1.8 million in cash and a cash earn-out based upon sales volume up to a maximum of \$2.9 million. gnubi, a privately held company in Dallas, Texas, is a leading supplier of multi-channel telecom and datacom testing solutions with an established customer base of Tier 1 optical transport equipment manufacturers and R&D labs.

INDUSTRY OVERVIEW

OPTICAL NETWORKING MARKET

The past decade has witnessed growth in the volume of data traffic largely due to the popularity of the Internet and related bandwidth-intensive applications. According to the Computer Industry Almanac, the number of Internet users around the world is expected to increase from 530 million in 2001 to 1.12 billion in 2005. In addition, users are continuously seeking applications that require a great deal of bandwidth such as virtual private networking ("VPN"), storage area networking ("SAN") and rich media streaming over the Internet.

The increase in Internet users and in bandwidth-intensive applications created a need for high-capacity communications networks. To meet this increasing demand for bandwidth, many telecommunications carriers designed and installed new networks based on optical fiber, deployed additional fiber within their existing networks or used advances in optical technology such as dense wavelength-division multiplexing. DWDM involves combining beams of light of slightly different wavelengths through a single fiber, with each wavelength carrying its own stream of information. DWDM gained wide market acceptance because it incorporates technologies that greatly reduce the cost of optical transmission over long distances and because it provides network flexibility in access and metropolitan areas.

Following a period of significant growth, the telecommunications industry is enduring a market correction. Network service providers have lowered their capital spending to improve short-term financials and reduce debt-loads

which, in turn, have initiated an industry-wide consolidation period. Despite these challenging market conditions, new bandwidth-hungry applications are pushing telecom and datacom demand deeper into metropolitan, access and

42

enterprise networks. As a result, NSPs are continuously upgrading their existing networks with higher transmission rates, newer protocols and additional channels to meet the latest bandwidth and application requirements. The system and component manufacturing markets, meanwhile, have been sharply affected by the reduction in capital spending of NSPs. During the past 18 months, NSPs have repeatedly downsized their capital spending budgets for deploying new networks, which has resulted in a slowdown among system and component vendors.

OPTICAL TEST, MEASUREMENT AND AUTOMATION EQUIPMENT MARKET

The fiber-optic test, measurement and automation market has not been immune to the challenging conditions in the optical networking sector. However, vendors with extensive product portfolios, which include all-in-one protocol-, optical- and physical-layer test solutions, marketed their products to NSPs, who needed to upgrade their networks to higher transmission rates, add DWDM channels or maintain their existing networks. Likewise, test, measurement and automation vendors, whose products increase efficiency and reduce costs on the production floor, still attracted the attention of system and optical component manufacturers, who kept investing in their R&D programs to stay ahead of the competition.

Fiber-optic test, measurement and automation equipment is essential for research and development, manufacturing, installation and maintenance as well as network monitoring. When light travels along optical fiber and through the optical components and systems that link optical fibers together, it is subject to unwanted effects such as reflection, attenuation, noise and various types of dispersion, all of which degrade signal quality and reduce transmission performance. Fiber-optic test and measurement equipment is critical for measuring these effects and helping NSPs and manufacturers of optical components, sub-systems and optical networking systems ensure performance and reliability.

Fiber-optic test and measurement equipment like a bit-error-rate tester is also used to ensure data integrity. Data sent along an optical network must respect transmission protocols, such as ATM, SONET, SDH, Ethernet and Gigabit Ethernet, and fall within accepted data transmission rates from 64 Kb/s to 10 Gb/s. Otherwise, the information sent from a transmitter will be incomprehensible to the receiver.

Automation equipment is necessary to reduce costs and increase productivity on the manufacturing floor. Optical components and sub-systems, which make up an optical network, are typically assembled by hand. As a result, optical component vendors are increasingly looking for ways to increase efficiency and yield as well as reduce costs by adopting automated manufacturing solutions. They either build these complex solutions in-house or turn to equipment manufacturers to help them automate critical steps in the manufacturing process such as alignment, curing and optical testing. The latter option enables optical component vendors to devote their technical resources to developing next-generation products instead of manufacturing tools.

COMPANY OVERVIEW

EXFO was incorporated on September 18, 1985. Our original products were focused primarily on the needs of installers and operators of fiber-optic

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

networks. These products are marketed in what is known today as our Portable and Monitoring Division. This division markets its products mainly to telecommunications carriers and network service providers around the world. These customers use Portable and Monitoring Division products for installation and maintenance, monitoring and troubleshooting applications. In 1996, we supplemented our

43

product portfolio with an extensive line of Industrial and Scientific products that are dedicated to the research and development and manufacturing activities of optical system and component vendors worldwide. Our Industrial and Scientific products tend to be more complex and higher priced than our Portable and Monitoring products. In fiscal 1999, we entered the market for remote fiber test systems. Remote fiber test systems, which are marketed through our Portable and Monitoring Division, allow carriers to monitor the integrity of their entire fiber-optic systems by verifying the protocol, optical and physical layers.

One of our strongest competitive advantages is our modular platform design. EXFO introduced modular test platforms more than six years ago, and remains the uncontested leader with all-in-one test sets that provide greater value for customers seeking enhanced productivity. Our PC-based platforms, which are supported by an extensive suite of plug-and-play test modules, are widely accepted among Tier 1 carriers and system manufacturers with an established base of more than 10,000 units on the market today.

During the last two years, we strengthened our competitive positioning with a string of acquisitions. In fiscal 2001, we completed two key acquisitions to bolster growth in our Industrial and Scientific Division. We acquired Burleigh Instruments, Inc. (renamed EXFO Burleigh Products Group Inc.) for its wavelength measurement instruments and nanopositioning alignment systems. We also added EFOS Inc. (renamed EXFO Photonic Solutions Inc.) for its precision light-based, adhesive spot-curing technology.

In fiscal 2002, we expanded into protocol-layer testing with the closing of the Avantas Networks Corporation acquisition (renamed EXFO Protocol Inc.), a supplier of leading-edge, fiber-optic testing and optical-network-performance management equipment. This acquisition was highly strategic because it enabled us to combine protocol-, optical- and physical-layer testing inside a single platform--the FTB-400 Universal Test System--to help our customers increase revenues and reduce operational costs in a fast-changing market.

Subsequent to the year-end, we also announced that our wholly-owned subsidiary, EXFO Gnubi Products Group Inc. had purchased substantially all the assets of gnubi communications, L.P., a leading supplier of multi-channel telecom and datacom testing solutions. EXFO Gnubi's protocol-layer test equipment for optical transport equipment manufacturers fully complements EXFO Protocol's offering that is targeted at the network service provider market. As a result, these latest acquisitions enabled us to double our addressable market, while offering a complete test solution for the entire lifecycle of an optical network: R&D, manufacturing, installation and maintenance, as well as network monitoring.

SALES

We sell our products to more than 2000 customers in 70 countries around the world through our direct sales force and, indirectly, through distribution channels. North America accounted for 57% of our sales in fiscal 2002 compared to 43% for the rest of the world. With regard to sales distribution, it was a

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

57-43% split in favor of our Portable and Monitoring products in 2002. In terms of customer breakdown, we had one 10%-customer in 2002 with our top three customers representing 15.4% of sales for the year.

44

COST OF SALES

Cost of sales includes raw materials, salaries and related expenses for direct and indirect manufacturing personnel and manufacturing overhead. We expense cost of sales as the related revenue is recognized. Excess, obsolete or scrapped materials are included in cost of sales.

OPERATING EXPENSES

We classify our operating expenses into three general categories: selling and administrative expenses, research and development expenses and amortization expenses.

Selling and administrative expenses consist primarily of salaries and related expenses for personnel, sales commissions, travel expenses, marketing programs, professional services, management information systems, human resources and other corporate expenses.

Gross research and development expenses consist primarily of salaries and related expenses for engineers and other technical personnel, material component costs as well as fees paid to third-party consultants. We expense our research and development costs as they are incurred. We are eligible to receive research and development tax credits and government grants on research and development carried out in Canada. Related research and development tax credits and government grants are recorded as a reduction of gross research and development expenses.

Operating expenses related to our restructuring plans have been recorded as a separate component of operating expenses. These expenses consist primarily of severance expenses, costs to exit leased facilities, a write-off of property, plant and equipment, as well as a write-down of intangible assets.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Management's discussion and analysis of financial conditions and results of operations is based on our consolidated financial statements included elsewhere in this annual report. They have been prepared in accordance with Canadian GAAP. The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. On an ongoing basis, we evaluate these estimates and assumptions, including those related to revenue recognition, allowance for doubtful accounts, allowance for excess and obsolete inventories, research and development tax credits and government grants, impairment of intangible assets and goodwill, future income taxes, warranty obligations, restructuring charges, contingencies and other obligations. We base our estimates on historical experience and on other factors that we believe to be reasonable under the circumstances, the result of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could differ from those estimates.

The following summarizes our critical accounting policies and those

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

that require the most significant judgment and estimates in the preparation of our consolidated financial statements.

45

REVENUE RECOGNITION. For products in which software is incidental, we recognize revenue when persuasive evidence of an arrangement exists, the product has been delivered, the price is fixed and determinable and collection of the resulting receivable is reasonably assured. In addition, provisions are made for estimated returns, warranties and support obligations.

For products in which software is not incidental, revenues are separated into two categories: product and customer support revenues based upon vendor-specific objective evidence of fair value. Product revenues for these sales are recognized as described above. Customer support revenues are deferred and recognized ratably over the years of the support arrangement. Except when provided within one year of delivery, costs of providing this support are insignificant and accrued at the time of delivery and no software upgrades are provided.

For all sales, we use a binding purchase order as evidence that a sales arrangement exists.

Delivery generally occurs when the product is shipped to a common carrier.

At the time of the transaction, we assess whether the price associated with our revenue transactions is fixed and determinable and whether or not collection is reasonably assured. We assess whether the price is fixed and determinable based on the payment terms associated with the transaction. We assess collection based on a number of factors, including past transaction history and the creditworthiness of the customer. Generally, collateral or other security is not requested from customers.

Most sales arrangements do not generally include acceptance clauses. However, if a sales arrangement includes an acceptance provision, acceptance occurs upon the earliest of receipt of a written customer acceptance or expiration of the acceptance period. For these sales arrangements, the sale is recognized when acceptance occurs.

ALLOWANCE FOR DOUBTFUL ACCOUNTS. We estimate collectibility of accounts receivable on an ongoing basis by periodically reviewing balances outstanding over a certain period of time. We determine our allowance for doubtful accounts receivable based on our historical accounts receivable collection experience and on the information that we have about the status of our accounts receivable balances. If the financial conditions of our customers deteriorate, resulting in an impairment of their ability to make required payments, additional allowance may be required, which could adversely affect our future results.

ALLOWANCE FOR EXCESS AND OBSOLETE INVENTORIES. We state our inventories at the lower of cost and net realizable value and provide reserves for excess and obsolete inventories. We determine our reserves for excess and obsolete inventories considering our quantities on hand and our expected needs for these inventories to support future sales of our products. It is possible that additional inventory reserves may occur if future sales are less than our forecasts, which could adversely affect our future results.

RESEARCH AND DEVELOPMENT TAX CREDITS AND GOVERNMENT GRANTS. We record research and development tax credits and government grants based on our interpretation of tax laws and grant programs, especially regarding related

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

eligible projects and expenses, and when there is a reasonable assurance that we have complied and will continue to comply with all conditions and laws. Also, our judgment and estimates are based on historical experience. It is possible, however, that the tax authorities have a different interpretation of laws and application of

46

conditions related to the programs or that we will not comply with all conditions related to grants in the future, which could adversely affect our future results.

IMPAIRMENT OF GOODWILL AND INTANGIBLE ASSETS. We assess impairment of goodwill and intangible assets when events or circumstances indicate that costs may not be recoverable. Impairment exists when the carrying value of the asset is greater than the pre-tax undiscounted future cash flows expected to be provided by the asset. The amount of impairment loss, if any, is the excess of the carrying value over the estimated pre-tax undiscounted future cash flows. Intangible assets and goodwill are written down for any permanent impairment value of the unamortized portion. In fiscal 2002, we incurred significant impairment losses on goodwill and intangible assets recorded in conjunction with our three strategic acquisitions made during the last two years.

On September 1, 2002, upon the adoption of section 3062 of the Canadian Institute of Chartered Accountants Handbook (CICA), we performed an initial impairment test of goodwill based on a fair value method. Based on that initial test, goodwill was not considered impaired. Moving forward, this test will be performed on an annual basis or more frequently if events or circumstances occur that more likely than not trigger an impairment.

FUTURE INCOME TAX ASSETS. We account for income taxes using the liability method of tax allocation. Under this method, future income tax assets and liabilities are determined based on deductible or taxable temporary differences between financial statement values and tax values of assets and liabilities using enacted income tax rates for the years in which the differences are expected to reverse. In assessing the recoverability of our future income tax assets, we consider whether it is more likely than not that some or all of the future income tax assets will not be realized. The ultimate realization of certain future income tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences will become deductible. If we obtain information that causes our forecast of future taxable income to change or if actual future taxable income differs from our forecast, we may have to revise the carrying value of our future income tax assets, which would affect our net earnings in the period in which the change was made. We review the recoverability of our future income tax assets on a quarterly basis.

47

RESULTS OF OPERATIONS

The following table sets forth certain Canadian GAAP consolidated statements of earnings data in thousands of US dollars, except per share data, and as a percentage of sales for the years indicated:

YEARS ENDED AUGUST 31,	2000	2001	2002	2000	2001	2002
------------------------	------	------	------	------	------	------

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

Sales	\$ 71,639	\$ 146,013	\$ 68,330	100.0%	100.
Cost of sales	24,712	54,946	50,801	34.5	37.

* Including inventory write-offs of nil, nil and \$18,463 for the years ended August 31, 2000, 2001 and 2002, respectively. Excluding inventory write-offs of \$18,463 for the year ended August 31, 2002, gross margin would have reached 52.7% for that year. This latter information is unaudited and is a non-GAAP measure.

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

** Net earnings (loss) excluding amortization and write-down of goodwill and the after-tax effect of amortization and write-down of intangible assets, restructuring and other charges as well as inventory write-offs. This information may not be comparable to similarly titled measures reported by other companies because it is non-GAAP information. Please refer to page 55 of this annual report for a detailed quantitative reconciliation.

48

SALES

Sales totaled \$68.3 million, \$146.0 million and \$71.6 million in fiscal 2002, 2001 and 2000, respectively. Sales decreased 53% in fiscal 2002 compared to 2001 due to a reduced demand for our products and pricing pressure attributable to the severe downturn in the telecommunications industry. The fiber-optic telecommunications industry has not rebounded as quickly as many industry experts forecasted. Established telecommunications carriers have decreased their capital expenditures to improve short-term financials and reduce debt loads, while a number of others have filed for bankruptcy. Lower spending levels have produced a trickle-down effect throughout the fiber-optic industry, including in research and development, manufacturing, installation and maintenance, as well as network monitoring companies. Test, measurement, monitoring and automation equipment vendors, in turn, have been negatively affected due to the dramatic reduction in the deployment of optical networks. Consequently, both our Portable and Monitoring products and our Industrial and Scientific products suffered from this lack of demand and pricing pressure. Our Industrial and Scientific products, however, were more severely affected by the downturn. With regard to sales distribution, it was a 57%-43% split in favor of our Portable and Monitoring products in fiscal 2002 compared to 52%-48% in favor of our Industrial and Scientific products in 2001.

Net accepted orders decreased 56% to \$58.3 million in fiscal 2002 from \$132.1 million in 2001. Our book-to-bill ratio decreased to 0.85 in fiscal 2002 compared to 0.90 in 2001. However, our book-to-bill ratio, which began decreasing in the third quarter of 2001, has been steadily increasing since the second quarter of 2002. Our book-to-bill ratio for the last quarter of fiscal 2002 was 1.03.

Sales increased 104% in fiscal 2001 compared to 2000 due to increased demand for our Industrial and Scientific products as well as our Portable and Monitoring products, market acceptance of several products launched in 2001 and the impact of the EXFO Burleigh Products Group ("EXFO Burleigh") and EXFO Photonic Solutions acquisitions completed during the year. In addition, the increase in sales of our Industrial and Scientific products significantly increased our top line because these products have a higher average selling price than Portable and Monitoring products. Altogether, our Industrial and Scientific products accounted for 52% of sales in fiscal 2001 compared to 31% in 2000.

Net accepted orders increased 53% to \$132.1 million in fiscal 2001 from \$86.2 million for 2000. Our book-to-bill ratio, however, decreased to 0.90 in fiscal 2001 compared to 1.20 in 2000. The decrease in our book-to-bill ratio reflects the downturn in the telecommunications industry, which began affecting our bookings in the third quarter of 2001.

North American sales accounted for 57%, 58% and 62% of global sales in fiscal 2002, 2001 and 2000, respectively. International sales represented 43%, 42% and 38% of global sales in fiscal 2002, 2001 and 2000, respectively. Despite the relative stability in our international sales between fiscal 2002 and 2001

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

as a percentage of total sales, sales to the Asian market reached 19% of global sales in fiscal 2002 compared to 13% in 2001 as a result of our sustained efforts to develop this market. On the other hand, sales to the European market decreased to 14% of global sales in fiscal 2002 compared to 21% of sales in 2001, mainly because this market has been the most affected by the downturn in the telecommunications industry.

49

The increase in international sales in fiscal 2001 compared to 2000 mainly reflects our sustained efforts to develop the Asian market. We almost tripled our sales in this region and added service centers in Beijing and Singapore to better serve our customers.

We sell our products to a broad range of customers including telecommunications carriers, network service providers, optical component and system manufacturers, as well as research and development laboratories. No customer accounted for more than 10.2%, 6.4% and 5.8% of sales in fiscal 2002, 2001 and 2000, respectively. In fiscal 2002, our three most significant customers represented 15.4% of sales.

GROSS MARGIN

Gross margin amounted to 25.7%, 62.4% and 65.5% of sales for fiscal 2002, 2001 and 2000, respectively.

In fiscal 2002, we recorded inventory write-offs of \$18.5 million for obsolete and excess inventories. These special charges were recorded due to weaker demand for our products and our expected needs for the upcoming 24 months at the time of the write-offs. Excluding these special charges, our gross margin would have reached 52.7% of sales. Even excluding these special charges, our gross margin decreased 9.7% in fiscal 2002 from 62.4% in 2001, mainly because of the significant decrease in our sales in 2002. Weaker demand for our products and pricing pressure prevented us from a better absorption of our fixed manufacturing costs. Our manufacturing capacity in Quebec City, Quebec and Victor, New York almost doubled in fiscal 2001, while sales decreased significantly in 2002.

Despite the increase in sales of Industrial and Scientific products in fiscal 2001, which tend to be slightly higher-margin products, gross margin decreased in fiscal 2001 compared to 2000 due to a number of reasons. First of all, we significantly increased our manufacturing capacity in 2001 as well as hired and trained related manufacturing employees to face then and expected demand for our products. Secondly, we re-engineered our manufacturing processes to be more cost-effective and to better mitigate the impact of potential pricing pressure in the future. Thirdly, we acquired EXFO Photonic, which operates in a market that has relatively lower-margin products. Finally, the slowdown in the telecommunications industry, which affected us mostly in the last quarter of fiscal 2001, prevented us from a better absorption of our fixed manufacturing costs.

Gross margin can be negatively affected by competitive pricing pressure, increase in obsolescence costs, shifts in product mix, reductions in government grants, under-absorption of fixed manufacturing costs and increases in product offerings by other suppliers in the fiber-optic test, measurement, monitoring and automation industry.

SELLING AND ADMINISTRATIVE

Selling and administrative expenses reached \$35.4 million, \$46.2

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

million and \$24.3 million for fiscal 2002, 2001 and 2000, respectively. As a percentage of sales, selling and administrative expenses amounted to 51.9%, 31.7% and 33.9% for fiscal 2002, 2001 and 2000, respectively. The dollar decrease in fiscal 2002 compared to 2001 is directly related to lower expenses resulting from our restructuring plans implemented since June 2001 and lower commission expenses since our sales decreased significantly in fiscal 2002. However, this decrease was offset in part by the impact of the acquisition of EXFO Protocol in November 2001. On the other hand, the significant drop in sales in fiscal 2002 caused the selling and

50

administrative expenses percentage to increase since these expenses tend to be fixed and because sales decreased at a faster rate than selling and administrative expenses.

The dollar increase in fiscal 2001 compared to 2000 is directly related to higher commissions resulting from increased sales activity, increased promotional and marketing expenses, expenses to consolidate our sales force in Asia, expenses related to running a public company and the impact of the EXFO Burleigh and EXFO Photonic acquisitions. The percentage decrease is mainly due to a better absorption of these expenses because sales increased at a faster rate than selling and administrative expenses.

Considering the challenging market conditions, we will continue to maintain our selling and administrative expenses at an acceptable level without impeding our efforts to strategically position our company, improve our sales, as well as provide quality service to customers and integrate our acquired companies.

RESEARCH AND DEVELOPMENT

Gross research and development expenses totaled \$17.0 million, \$17.6 million and \$9.4 million for fiscal 2002, 2001 and 2000, respectively. As a percentage of sales, gross research and development expenses amounted to 24.9%, 12.1% and 13.1% for fiscal 2002, 2001 and 2000, respectively.

The slight decrease in gross research and development dollars in fiscal 2002 compared to 2001 is mainly due to the mix and timing of research and development projects and the effect of our restructuring plans implemented in 2002; these factors were partially offset by the impact of the acquisition of EXFO Protocol. The percentage increase reflects our strong focus on innovation despite the significant decrease in sales. We firmly believe that innovation and new product introductions are the key to gaining market share in this current economic environment and ensuring the long-term growth and profitability of the company. In fiscal 2002, 48% of sales originated from products that have been on the market for two years or less. This is a slight improvement compared to 46% of our sales in fiscal 2001. In fiscal 2002, we released 25 new products compared to 20 in 2001. These figures confirm our dedication to innovation and our anticipation of customer needs and expectations.

The increase in gross research and development dollars in fiscal 2001 compared to 2000 reflects the hiring of additional research and development personnel, as well as the acquisitions of EXFO Burleigh and EXFO Photonic. The decrease, as a percentage of sales, in fiscal 2001 compared to 2000 is mainly due to the fact that sales increased at a faster rate than research and development expenses during that period.

Tax credits and grants from federal, provincial and state governments for research and development activities were \$4.2 million, \$4.0 million and \$3.0

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

million for fiscal 2002, 2001 and 2000, respectively. Our tax credits and grants remained relatively flat between fiscal 2002 and 2001 since our gross research and development expenses were relatively unchanged year-over-year. The increase in our tax credits and grants in fiscal 2001 compared to 2000 is directly related to the hiring of additional research and development personnel as well as the impact of the EXFO Photonic Solutions acquisition.

Tax credits and grants, as a percentage of gross research and development expenses, were 24.8%, 22.7% and 31.7% for fiscal 2002, 2001 and 2000, respectively. Tax credits and grants, as a percentage of gross research and development expenses, increased slightly

51

between 2001 and 2002 since more research and development activities were carried out in Canada, where such activities are entitled to research and development tax credits, following the acquisition of EXFO Protocol. The decrease in fiscal 2001 compared to 2000 is related to a reduction in the effective tax credit rate and grants on research and development carried out in Canada. It should be noted that research and development carried out by U.S.-based EXFO Burleigh is not eligible for tax credits. As a result, tax credits and grants, as a percentage of gross research and development expenses, was further reduced in fiscal 2001.

In terms of net research and development expenses, they amounted to 18.7%, 9.3% and 8.9% of sales for fiscal 2002, 2001 and 2000, respectively. Although we intend to reduce our research and development expenses as a percentage of sales, we expect to continue investing heavily in research and development in the upcoming year, reflecting our focus on innovation, our desire to gain market share and our goal to exceed customer needs and expectations.

AMORTIZATION OF INTANGIBLE ASSETS

In conjunction with the acquisitions of EXFO Burleigh, EXFO Photonic and EXFO Protocol during the last two years, we recorded \$61.1 million in intangible assets, primarily consisting of core technology. These intangible assets, which are amortized over periods from five months to five years from the date of acquisitions, resulted in amortization expenses of \$11.6 million and \$9.9 million in fiscal 2002 and 2001, respectively.

Intangible assets related to these acquisitions have been reviewed for impairment as described below and this resulted in a pre-tax write-down charge of \$23.7 million in the third quarter of 2002. Considering this write-down, the amortization of intangible assets will decrease by approximately \$6.5 million in the upcoming fiscal year.

WRITE-DOWN OF GOODWILL AND INTANGIBLE ASSETS

In May 2002, as part of our review of financial results, we performed an assessment of the carrying value of goodwill and intangible assets recorded in conjunction with the acquisitions of EXFO Burleigh, EXFO Photonic and EXFO Protocol. The assessment was performed because of the severe and continued downturn in the telecommunications industry, the persisting unfavorable market conditions affecting our subsidiaries' industries and the decline in technology valuations. The growth prospects for our subsidiaries were significantly lower than previously expected and less than those of historical periods. In addition, the decline in market conditions affecting the subsidiaries is significant and other than temporary. As a result, we concluded that the carrying value of goodwill and certain acquired intangible assets was impaired and we recorded a charge of \$222.2 million to write down a significant portion of goodwill and a

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

pre-tax charge of \$23.7 million to write down a significant portion of acquired core technology. Of the total impairment loss of \$245.8 million, \$125.0 million relates to EXFO Burleigh, \$71.5 million relates to EXFO Photonic and \$49.3 million relates to EXFO Protocol.

The impairment loss was calculated as the excess of the carrying value of the assets over the pre-tax undiscounted future cash flows. The pre-tax undiscounted future cash flows were estimated at the subsidiaries' level since we had distinct cash flows for each of them and because they are not fully integrated into our activities. The cash flow periods used ranged from three to five years, using annual growth rates between 15% and 30%.

The assumptions supporting the estimated undiscounted future cash flows, including the annual growth rates, reflect our best estimates.

52

On September 1, 2002, upon the adoption of section 3062 of the CICA and under its transitional provisions, we performed an initial impairment test to identify potential goodwill impairment using a fair value-based method. Under the new section, a goodwill impairment loss exists when the carrying value of a reporting unit exceeds its fair value. For the purposes of the impairment test, we allocated our existing goodwill to our reporting units and completed an evaluation of the fair value of such reporting units. Based upon the comparison of the fair value of the reporting units to their carrying value, goodwill of the reporting units was not considered impaired.

For a more complete description of this new accounting standard, please refer to the "New Accounting Standards" section further in this item.

RESTRUCTURING AND OTHER CHARGES

In fiscal 2001, we implemented a structured plan to reduce our costs and increase our efficiency. Under that plan, we recorded charges of \$3.3 million, including \$0.8 million in severance expenses for the 245 employees who were terminated, \$1.5 million for unused assets and \$1.0 million for future payments on exited leased facilities.

In fiscal 2002, we incurred additional charges of \$2.9 million to further reduce our costs. Under additional structured plans, we recorded \$2.0 million in severance expenses for the additional 350 employees who were terminated and \$0.9 million for the write-off of property, plant and equipment.

Our cost-cutting measures represent our best efforts to respond to the difficult market conditions. However, these efforts may be inappropriate or insufficient. Our actions in this regard may not be successful in achieving the cost reductions or other benefits expected, may be insufficient to align our cost structure to market conditions, or may be more costly or extensive than anticipated.

INTEREST INCOME, NET

Net interest income amounted to \$1.5 million, \$6.1 million and \$1.5 million for fiscal 2002, 2001 and 2000, respectively. The decrease in our net interest income in fiscal 2002 compared to 2001 is directly related to the use of short-term investments to finance our strategic acquisitions, our operating activities and the purchases of property, plant and equipment, as well as a general decrease in interest rates.

The increase in our net interest income in fiscal 2001 compared to 2000

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

results solely from short-term investments of the remaining net proceeds of our Initial Public Offering on June 29, 2000.

We expect our net interest income to decrease in the upcoming fiscal year because of the aforementioned reasons.

FOREIGN EXCHANGE GAIN (LOSS)

Foreign exchange loss amounted to \$0.5 million in fiscal 2002 compared to a foreign exchange gain of \$3.3 million in fiscal 2001 and a foreign exchange loss of \$0.7 million in 2000.

53

The foreign exchange loss in fiscal 2002 is the result of the translation of operating activities denominated in currencies other than the Canadian dollar.

The foreign exchange gain in fiscal 2001 can be mostly attributed to the disposal of short-term investments denominated in US dollars and the translation of operating activities denominated in currencies other than the Canadian dollar.

We manage our exposure to currency risk with forward exchange contracts and operating activities of Canadian entities denominated in currencies other than the Canadian dollar.

INCOME TAXES

Our effective income tax recovery rate was 34.5% in fiscal 2002 compared to income tax rates of 34.1% for both fiscal 2001 and 2000.

As at August 31, 2002, future income tax assets were \$10.0 million and mainly relate to tax losses, provisions and accruals as well as research and development expenses, as described in note 15 to our consolidated financial statements. Our current forecasts demonstrate that most of the future income tax assets should be recovered over the next three fiscal years. However, if we obtain information that causes our forecast of future taxable income to change or if actual future taxable income differs from our forecast, we may have to revise the carrying value of our future income tax assets, which would affect our net earnings in the period in which the change was made. We review the recoverability of our future income tax assets on a quarterly basis.

Research and development expenses and most of the provisions and accruals can be carried forward indefinitely against future years taxable income. The Canadian tax losses, which represent \$3.5 million in future income tax assets, expire over the next seven years while U.S. tax losses, which represent \$3.4 million in future income tax assets, expire in 20 years.

AMORTIZATION OF GOODWILL

In conjunction with the acquisitions of EXFO Burleigh and EXFO Photonic, we recorded \$248.5 million in goodwill, which is amortized over five years. These acquisitions resulted in amortization expenses of \$38.0 million and \$31.1 million for fiscal 2002 and 2001, respectively. The acquisition of EXFO Protocol has been accounted for using new accounting standards contained in sections 1581 and 3062 of the CICA and, consequently, goodwill resulting from this acquisition was not amortized.

Goodwill related to these acquisitions has been reviewed for

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

impairment, as described above, and this resulted in a write-down charge of \$222.2 million in the third quarter of 2002. Starting on September 1, 2002, goodwill will no longer be amortized under new accounting standard.

NET EARNINGS (LOSS)

Net loss amounted to \$308.5 million and \$15.3 million in fiscal 2002 and 2001, respectively, compared to net earnings of \$9.9 million in 2000. In terms of per share amounts, we recorded a net loss of \$5.09 and \$0.29 in fiscal 2002 and 2001, respectively, compared to net earnings of \$0.25 in 2000.

54

PRO FORMA NET EARNINGS (LOSS)

As a measure to assess financial performance, we use pro forma net earnings (loss) and pro forma net earnings (loss) per share. Pro forma net earnings (loss) represent net earnings (loss) excluding amortization and write-down of goodwill and the after-tax effect of amortization and write-down of intangible assets, restructuring and other charges as well as inventory write-offs.

Pro forma net loss amounted to \$11.2 million in fiscal 2002 compared to pro forma net earnings of \$24.5 million and \$10.3 million in fiscal 2001 and 2000, respectively. In terms of pro forma per share amounts, we recorded a loss of \$0.19 in fiscal 2002 compared to net earnings of \$0.46 and \$0.26 in fiscal 2001 and 2000, respectively.

Pro forma net earnings (loss) is reconciled as follows:

	YEARS ENDED AUGUST 31,		
	2000	2001	2002
	(unaudited)	(unaudited)	(unaudited)
Net earnings (loss) in accordance with GAAP	\$ 9,924	\$ (15,294)	\$ (308,524)

Basic and diluted pro forma net earnings (loss) per share	\$ 0.26	\$ 0.46	\$ (0.19)

We provide pro forma financial information to help the investor better understand our operating results. This information is not in accordance with, or an alternative for, generally accepted accounting principles and may not be comparable to similarly titled measures reported by other companies.

LIQUIDITY AND CAPITAL RESOURCES

We finance our operations and major investments and meet our capital expenditure requirements mainly through the use of cash and cash equivalents, short-term investments and the issuance of subordinate voting shares.

55

CASH POSITION AND SHORT-TERM INVESTMENTS

As at August 31, 2002, cash and cash equivalents as well as short-term investments consisted of \$49.7 million. Our working capital was at \$91.4 million. Our cash and cash equivalents and short-term investments decreased by \$24.9 million in fiscal 2002 mainly due to \$8.7 million for financing of operating activities as well as cash payments of \$9.8 million and \$5.2 million, respectively, for the acquisition of EXFO Protocol and the purchases of property, plant and equipment.

The acquisition of substantially all the assets of gnubi communications, L.P. will be partially financed with \$1.8 million of cash on hand. In fiscal 2003, however, we expect to recover \$13.5 million in income taxes mainly due to the carry-back of current tax losses and tax credits on our research and development activities. As at August 31, 2002, total commitments under operating leases and long-term debt for fiscal 2003 amounted to \$1.4 million.

OPERATING ACTIVITIES

Cash flows used by operating activities were \$8.7 million in fiscal 2002 compared to cash flows provided of \$3.9 million in fiscal 2001 and cash flows used of \$4.0 million in 2000. Cash flows used by operating activities in fiscal 2002 were primarily due to the net loss after items not affecting cash and cash equivalents of \$1.1 million combined with the increase of income taxes receivable of \$19.7 million and the decrease in accounts payable and accrued liabilities of \$7.5 million. These figures were partially offset by the result of the net decrease in accounts receivable and inventories of \$19.7 million. The increase in our income taxes receivable is related to income tax recovery following the carry-back to previous years' taxable income of our consolidated tax loss, while the decrease in our accounts payable and accrued liabilities is due to the reduction in our purchases following the slowdown in our industry. The decrease in our accounts receivable is due to the reduction in our sales level and the improvement in our days of sales outstanding ("DSOs"), while the decrease in our inventories is due to our efforts to maintain them at the lowest acceptable level considering the decrease in sales.

Cash flows provided by operating activities in fiscal 2001 were primarily due to net earnings after items not affecting cash and cash equivalents of \$25.3 million. This figure was mainly offset by the increase of

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

\$20.3 million in inventories required to ensure minimal manufacturing and delivery lead times.

In fiscal 2002, the major items not affecting cash and cash equivalents consisted of inventory write-offs of \$18.5 million, write-down of goodwill and intangible assets of \$245.8 million, amortization expenses of \$55.6 million and future income tax recovery of \$13.4 million. In fiscal 2001, the major items not affecting cash and cash equivalents consisted of amortization expenses of \$44.5 million and realized foreign exchange gains on disposal of short-term investments of \$3.4 million.

FINANCING ACTIVITIES

Cash flows used by financing activities were \$90,000 and \$4.6 million in fiscal 2002 and 2001, respectively, compared to cash flows provided of \$172.8 million in 2000. Cash flows used by financing activities in fiscal 2002 were due to the repayment of our long-term debt. Cash

56

flows used in financing activities in fiscal 2001 were mainly due to the repayment of our bank advances and our long-term debt of \$5.4 million.

As at August 31, 2002, we had credit facilities that provide for advances of up to CA\$10 million (US\$6.4 million) under a line of credit. This line of credit bears interest at prime rate.

INVESTING ACTIVITIES

Cash flows provided by investing activities were \$10.5 million and \$8.4 million in fiscal 2002 and 2001, respectively, compared to cash flows used of \$169.0 million in 2000.

In fiscal 2002, we disposed of \$25.5 million in short-term investments to finance our operating activities of \$8.7 million as well as the respective cash payments of \$9.8 million and \$5.2 million for the acquisition of EXFO Protocol and the purchases of property, plant and equipment.

In fiscal 2001, we disposed of \$92.6 million in short-term investments to finance the cash payments of \$68.3 million and \$15.9 million for the acquisitions of EXFO Burleigh and EXFO Photonic and the purchases of property, plant and equipment, respectively. Despite these investments and purchases, the disposal of short-term investments generated net cash flows of \$8.4 million in fiscal 2001.

OUTLOOK

As described above, we incurred an operating loss of \$74.8 million in fiscal 2002 and operating activities used \$8.7 million in cash flows. There can be no assurance as to whether and when we will return to profitability or that our sales will return to prior levels. However, we believe that our cash balances and short-term investments, combined with available credit facilities, will be sufficient to meet our expected liquidity and capital requirements for at least the next 12 months. On the other hand, possible additional operating losses and/or possible investments in or acquisitions of complementary businesses, products or technologies may require additional financing prior to such time. There can be no assurance that additional debt or equity financing will be available when required or, if available, it can be secured on satisfactory terms.

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

STOCK OPTION PLAN

The aggregate number of subordinate voting shares covered by options granted under the stock option plan was 2,597,574 as at August 31, 2002. The weighted average exercise price of those stock options was \$22 compared to the market price of \$2.13 per share as at August 31, 2002. The maximum number of subordinate voting shares issuable under the plan cannot exceed 4,470,961 shares. The following table summarizes information about stock options granted to the members of the Board of Directors and to Management and Corporate Officers of the company and its subsidiaries as at August 31, 2002:

57

	NUMBER	% OF ISSUED AND OUTSTANDING		WEIGHT AVERA EXERCI PRI
	-----	-----		-----

	=====	=====		=====

In November 2001, the CICA issued section 3870, "Stock-Based Compensation and Other Stock-Based Payments", which is effective for fiscal years beginning on or after January 1, 2002. As described in the "New Accounting Standards" section below, we will adopt this new standard prospectively on September 1, 2002, and as permitted by the CICA, we will not account for the stock-based compensation costs arising from awards to employees, but we will comply with the required pro forma disclosures with respect to net earnings and net earnings per share.

Like many other companies, we do not believe that the use of the Black-Scholes option valuation model provides a reliable single measure of the fair value of our employees' stock options and stock awards. For example, using of the Black-Scholes model as required under U.S. GAAP, our 2,597,574 outstanding options with an average exercise price of \$22 would have generated aggregate stock-based compensation costs of \$26,589,000. None of the options issued by EXFO have been exercised because the market price of the company's common shares as at August 31, 2002, is well below the exercise price.

Please refer to note 19 to our consolidated financial statements for further explanation of stock-based compensation costs.

NEW ACCOUNTING STANDARDS

In November 2001, the CICA revised section 1650, "Foreign Currency Translation", which is effective for fiscal years beginning on or after January 1, 2002. The revised standard, which we will adopt retroactively on September 1, 2002, no longer permits the deferral and amortization of unrealized exchange gains and losses that arise on the translation of long-term foreign currency

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

denominated monetary assets and liabilities. Under the new rules, such gains and losses must be reported in earnings as they arise. Adopting this revised standard will not have a significant impact on our financial statements since we currently have no such long-term monetary items.

In November 2001, the CICA issued Accounting Guideline No. 13, "Hedging Relationships", which shall be applied to hedging relationships in effect in fiscal years beginning on or after July 1, 2003. This new accounting guideline, which we will adopt prospectively on September 1, 2003, establishes basic criteria that must be met before hedge accounting can be used. It also describes the types of exposures that can be hedged and the types of instruments that qualify as hedges, sets detailed designation and documentation requirements and requires

58

formal effectiveness testing. We have not yet assessed the impact of the adoption of this new guideline.

In November 2001, the CICA issued section 3870, "Stock-Based Compensation and Other Stock-Based Payments", which is effective for fiscal years beginning on or after January 1, 2002. The new section applies to awards granted on or after the date of adoption, and requires that stock-based payments to non-employees and direct awards of stock to employees be accounted for using a fair value-based method. The new section also encourages, but does not require, the use of a fair value-based method to account for stock-based compensation costs arising from awards to employees. The new section requires pro forma disclosures with respect to net earnings and net earnings per share if a fair value-based method of accounting is not adopted for awards granted to employees. We will adopt this new standard prospectively on September 1, 2002. We will not account for the stock-based compensation costs arising from awards to employees. However, we will provide the required pro forma disclosures with respect to net earnings and net earnings per share. Consequently, the adoption of this new standard will not have a significant impact on our financial results.

In August 2001, the CICA issued section 1581 "Business Combinations" and section 3062 "Goodwill and Other Intangible Assets". Section 1581 requires business combinations initiated after June 30, 2001, or business combinations accounted for by the purchase method with a date of acquisition after June 30, 2001, to be accounted for using the purchase method of accounting. This section also broadens criteria for recording intangible assets separately from goodwill. Upon the adoption of section 3062, recorded goodwill and intangible assets will be evaluated against those new criteria and may result in certain intangible assets being reclassified into goodwill or, alternatively, amounts initially recorded as goodwill being separately identified and recognized apart from goodwill as intangible assets. Section 3062 requires the use of a non-amortization approach to account for purchased goodwill and indefinite-lived intangibles.

Under transitional provisions of section 3062, we did not amortize the goodwill resulting from the acquisition of EXFO Protocol, for which the acquisition date was November 2, 2001.

We adopted section 3062 prospectively on September 1, 2002. Upon the adoption of this new section, goodwill recorded prior to July 1, 2001, is no longer subject to amortization. Also, under the transitional provisions of the section, we performed an initial impairment test to identify goodwill impairment using a fair value-based method. Under the new section, a goodwill impairment exists when the carrying value of a reporting unit exceeds its fair value. For

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

the purposes of the impairment test, we allocated our existing goodwill to our reporting units and completed an evaluation of the fair value of such reporting units. Based on the comparison of the fair value of the reporting units to their carrying value, goodwill of the reporting units was not considered impaired.

Goodwill will also be tested for impairment on an annual basis or more frequently if events or circumstances occur that more likely than not reduce the fair value of a reporting unit below its carrying value. Any impairment loss arising from this test will be charged to earnings in the period in which it is incurred.

For details on new U.S. accounting standards, please refer to note 19 to our consolidated financial statements.

59

RISKS AND UNCERTAINTIES

Over the past few years, we have been able to manage our activities, focus on research and development of new and innovative products, penetrate international markets and close important strategic acquisitions. However, we operate in a highly competitive field that is in constant evolution and, as a result, we encounter various risks and uncertainties that must be given appropriate consideration in our strategic management policies.

The main risks and uncertainties related to the fiber-optic test, measurement, monitoring and automation industry involve the rapid development of new products that have short life cycles and require extensive research and development; the difficulty of retaining highly skilled employees as well as offering them effective training programs; and the ability to quickly adapt our cost structure to changing market conditions in order to achieve profitability.

In addition, given our strategic goals for growth and competitive positioning in our industry, we are expanding into international markets. This exposes us to certain risks and uncertainties related to changes in local laws and regulations, multiple technological standards, protective legislation and pricing pressure.

Furthermore, while the important strategic acquisitions we have made are essential to our long-term growth, they also expose us to certain risks and uncertainties related to the rapid and effective integration of these companies as well as their products, technologies and personnel.

We are also exposed to currency risks as a result of the export of our products manufactured in Canada, substantially all of which are denominated in US dollars. These risks are partially hedged by the operating expenses of certain international subsidiaries, the purchase of raw materials in US dollars and forward exchange contracts.

The economic slowdown in our industry could also result in some of our customers experiencing difficulties and, consequently, this could have a negative effect on our results especially in terms of future sales and recoverability of accounts receivable. However, the sectorial and geographic diversity of our customer base provides us with a reasonable level of protection in this area. Finally, other financial instruments, which potentially subject us to credit risks, consist mainly of cash and cash equivalents, short-term investments and forward exchange contracts. Our short-term investments consist of debt instruments issued by high-credit quality corporations. Our cash and cash equivalents and forward exchange contracts are held with or issued by high-credit quality financial institutions; therefore, we consider the risk of

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

non-performance on these instruments to be remote.

For a more complete understanding of risk factors that may affect us, please refer to the risk factors set forth in Item 3D of this annual report.

60

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

A. DIRECTORS AND SENIOR MANAGEMENT

The following table sets forth information about our executive officers, senior managers and directors as of December 31, 2002.

NAME AND MUNICIPALITY OF RESIDENCE	POSITIONS WITH EXFO
JEAN-FRANCOIS BOULET Montmagny, Quebec	Vice-President, Customer Service and Human Resources
BRUCE BONINI Fairview, Texas	Vice-President, North American Sales
STEPHEN BULL Lac-Beauport, Quebec	Vice-President, Research and Development
DAVID J. FARRELL Victor, New York	President, EXFO Burleigh Products Group Inc.
ALLAN FIRHOJ Mississauga, Ontario	General Manager, EXFO Photonic Solutions Inc.
JUAN-FELIPE GONZALEZ Singapore	Vice-President, International Sales
GERMAIN LAMONDE Cap-Rouge, Quebec	Chairman of the Board, President and Chief Executive Officer
PIERRE MARCOUILLER Magog, Quebec	Director
KIMBERLEY ANN OKELL Quebec City, Quebec	Secretary and Legal Counsel
PIERRE PLAMONDON, CA Quebec City, Quebec	Vice-President, Finance and Chief Financial Officer
GREGORY SCHINN Quebec City, Quebec	Chief Technology Officer
DAVID A. THOMPSON Newton, North Carolina	Director
ANDRE TREMBLAY Outremont, Quebec	Director
MICHAEL UNGER Woodbridge, Ontario	Director

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

SAMI YAZDI
Beaconsfield, Quebec

President, EXFO Protocol Inc.

The address of each of our executive officers, senior managers and directors is c/o EXFO Electro-Optical Engineering Inc., 465 Godin Avenue, Vanier, Quebec, Canada. The following is a brief biography of each of our executive officers, senior managers and directors.

JEAN-FRANCOIS BOULET joined us in March 2000 as Vice-President, Human Resources. In September 2002, Mr. Boulet also assumed responsibility for customer service. Mr. Boulet was formerly employed by Societe de portefeuille du Groupe Desjardins -- Assurances Generales

61

since 1996 where he had been successively Senior Vice-President, Human Resources and Senior Vice-President, Human Resources and Corporate Communications. From 1992 to 1996, Mr. Boulet held different senior management positions related to human resources, customer service and organizational development for Inglis Limited, a leading manufacturer of home appliances. Mr. Boulet holds a bachelor's degree in Industrial Relations from Laval University in Canada.

BRUCE BONINI has been our Vice-President, North American Sales since December 1998. Prior to joining us, Mr. Bonini held the position of Vice-President Sales-Eastern Region for Wandel & Golterman, now Acterna, a company specializing in communications test solutions, from September 1997 to December 1998. Mr. Bonini was successively Sales Director and Vice-President of Sales for Digital Lightwave Inc., a synchronous optical network test equipment manufacturer, from August 1996 to January 1997. From August 1987 to August 1996, Mr. Bonini held different sales and senior management positions for Laser Precision Corporation, an optical test equipment manufacturer. Following the acquisition of Laser Precision by GN Nettest, Mr. Bonini was named Global Vice-President of Sales for GN Nettest/Fiber-Optics Division. Mr. Bonini holds a bachelor's degree in Business Administration (Industrial Marketing) from Western Michigan University in the United States and is a member of the Optical Society of America.

STEPHEN BULL was appointed our Vice-President, Research and Development in December 1999. He joined us in July 1995 and held the positions of Assistant Director-Engineering from September 1997 to December 1999 and Group Leader (Engineering Management) from July 1995 to September 1997. From June 1990 to March 1995, Mr. Bull held the position of General Manager and Managing Director for Space Research Corporation, a military engineering company in Belgium. Mr. Bull holds a bachelor's degree in Electrical Engineering from Laval University in Canada.

DAVID FARRELL has been President of EXFO Burleigh since 1987. Mr. Farrell has more than 24 years of industry experience at Burleigh, a wholly owned subsidiary of EXFO since December 2000. Before joining Burleigh as a Sales Engineer in 1977, Mr. Farrell was a member of the Department of Radiation Biology and Biophysics at the University of Rochester Graduate School of Medicine. In 1979, he was appointed Marketing Manager at Burleigh and, in 1983, he was named Vice-President and General Manager, positions he held until becoming President. Mr. Farrell has a Bachelor of Arts degree from the State University of Oswego and a master's degree in Physics from Kent State University. Mr. Farrell is a member of several organizations including the American Association for the Advancement of Science, Optical Society of America, Society of Photo-Optical Instrumentation Engineering and Sigma Xi Research

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

Society.

ALLAN FIRHOJ has been General Manager of EXFO Photonic Solutions Inc. since November 2001. He is responsible for the overall strategic direction and management of EXFO Photonic Solutions. When Mr. Firhoj joined EFOS in 1996, he was responsible for Sales, Marketing and Business Development of the Dental Curing-Products Division. Following the sale of this division to Dentsply International in 1997, he was appointed Director of Marketing and Business Development. Mr. Firhoj continued in this capacity until being appointed to the position of General Manager of EXFO Photonic Solutions. Prior to joining the company, Mr. Firhoj spent six years with The Horn Group, a plastics business involved in medical devices/instrumentation and office communication equipment. He successively held the positions of ISO 9000 Implementation Manager, Technical Sales Manager as well as Marketing and Business Development Manager. In this latter role, he successfully contributed to

62

increasing sales in their medical market by an annual average of 60% during a three-year period. Mr. Firhoj holds a bachelor's degree in Political Science from Bishop's University in Lennoxville, Quebec.

JUAN-FELIPE GONZALEZ has been our Vice-President, International Sales since September 1998. From January 1997 to September 1998, he was our International Sales Director and, from September 1993 to January 1997, our Sales Manager for Latin America and the Caribbean. Prior to joining us in September 1993, Mr. Gonzalez was Marketing and Sales Director at Reyde, Barcelona, a plastics technical product corporation in Spain. Mr. Gonzalez holds a bachelor's degree in Industrial Chemistry from Complutense University of Madrid in Spain and a master's degree in Business Administration from the School of Industrial Organization in Spain.

GERMAIN LAMONDE is one of our founders. Germain Lamonde has been our Chairman of the Board, President and Chief Executive Officer since our inception in 1985. Mr. Lamonde holds a bachelor's degree in Physics Engineering from Ecole Polytechnique, University of Montreal in Canada and a master's degree in Optics from Laval University in Canada.

PIERRE MARCOUILLER has served as our director since May 2000. Mr. Marcouiller is Chairman of the Board and Chief Executive Officer of Camoplast Inc., a supplier of components to the recreational and motorized vehicle and automotive parts markets. He is the founder and has been sole shareholder of Nexcap Inc., an investment company in the manufacturing sector, since December 1996. Mr. Marcouiller worked with Venmar Ventilation Inc., a private ventilation equipment manufacturer, from January 1983 to December 1996. Mr. Marcouiller was the controlling shareholder of Venmar from 1991 to 1996 and held the position of President and General Manager of Venmar from December 1986 to December 1996. Mr. Marcouiller is also a director of Heroux-Devtek Inc., a publicly traded company that manufactures aerospace and industrial turbines, and holds directorships in other privately held companies. Mr. Marcouiller holds a bachelor's degree in Business Administration from Universite du Quebec a Trois-Rivieres in Canada and a Master in Business Administration from Sherbrooke University in Canada.

KIMBERLEY ANN OKELL has been our in-house legal counsel since February 2000 and our Secretary since May 2000. Prior to joining us, Ms. Okell was Vice-President Legal Affairs and Secretary with Groupe Equiconcept Inc. from October 1999 to February 2000 and Director of Legal Services and Secretary with Informission Group Inc., now nurun Inc., an information technology company, from December 1997 to October 1999. Prior to that, Ms. Okell was an associate with the law firm McCarthy Tetrault from August 1994 to December 1997. Ms. Okell has

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

been a member of the Quebec Bar since September 1993. Ms. Okell holds a bachelor's degree in Civil Law from Laval University in Canada, a bachelor's degree in Common Law from The University of Western Ontario in Canada and an Honors bachelor of Arts degree from York University in Canada.

PIERRE PLAMONDON has been our Vice-President, Finance and Chief Financial Officer since January 1996 and was a director from December 1999 to May 2000. Prior to joining us, Mr. Plamondon served as senior manager for Price Waterhouse, now PricewaterhouseCoopers LLP, from September 1981 to December 1995 in Canada and France. Mr. Plamondon holds a bachelor's degree in Business Administration and a license in Accounting, both from Laval University in Canada. Mr. Plamondon has been a member of the Canadian Institute of Chartered Accountants since 1983 and a member of the Board of Directors of SOVAR Inc. (Societe de valorisation des applications de la recherche de l'Universite Laval) since December 2000.

63

GREGORY SCHINN was appointed our Chief Technology Officer in November 1999, after simultaneously holding the positions of Scientific Director and Head of the Research Group since joining us in April 1996. Prior to joining us, Dr. Schinn led the research and development team responsible for optical amplifier and fiber laser development at MPB Technologies, Inc., a diversified technology company, in Montreal from 1990 to 1996. Dr. Schinn holds a bachelor's degree in Engineering Science and a master's degree in Aerospace Engineering from the University of Toronto. He also holds a Ph.D. in Physics from the University of Colorado at Boulder and has spent two years as a post-doctoral research associate at the University of Virginia. Dr. Schinn has been published in numerous scientific journals and he has served on the technical organizing committees of several international scientific conferences. He is currently the Director of the Division of Applied Physics of the Canadian Association of Physicists.

DAVID A. THOMPSON has served as our director since June 2000. He has held various positions with Corning Inc., a manufacturer of optical fiber and other products for the telecommunications, television and other communications-related industries, since 1976. Mr. Thompson was the Director -- Technology and Strategy of Corning's Components Business--Photonic Technologies since March 1995, after which he acted as Director, Operations and Project Management for the Optical Physics Technology Directorate and in February 2001, he was named Division Vice President Strategy and Innovation. Mr. Thompson holds a bachelor's degree in Chemistry from the Ohio State University, in the United States, and a doctorate in Inorganic Chemistry from the University of Michigan, in the United States.

ANDRE TREMBLAY has served as our director since May 2000. He has been President and Chief Executive Officer of Microcell Telecommunications Inc., a wireless telecommunications provider, since May 1995. Mr. Tremblay has been a member of the board of directors of Microcell since November 1995. In addition, Mr. Tremblay is a member of the executive committee and a member of the board of directors of Telesystem Ltd. and, since 1992, Executive Vice-President of Telesystem Ltd. Prior to joining Telesystem Ltd., a privately-held holding company, Mr. Tremblay was a tax partner and member of the management committee of Raymond, Chabot, Martin, Pare, a Canadian accounting firm. Mr. Tremblay is also a member of the Boards of Directors of Telesystem International Wireless Inc., a global mobile communications company; Boomerang Tracking Inc., a publicly traded company that assembles, markets and distributes a cellular-based asset tracking system; and SignalGene Inc., a genomics-based drug discovery company. Mr. Tremblay holds a bachelor's degree in Business Administration and a license in Accounting from Laval University in Canada, as well as a master's

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

degree in taxation from Sherbrooke University in Canada. He also completed the Advanced Management Program offered by the Harvard Business School in the United States.

MICHAEL UNGER has served as our director since May 2000. He worked with Nortel Networks Limited, now Nortel Networks Corporation, from 1962 to 2000. Mr. Unger's most recent position was President of Nortel's Optical Networks Business Unit, a position he held from May 1998 to April 2000. Prior to this appointment, Mr. Unger was Nortel's Group Vice-President, Transport Networks from March 1990 to May 1998. Mr. Unger also serves on the board of Tundra Semiconductor Corporation a publicly traded company with its shares listed on The Toronto Stock Exchange that designs, develops and markets networking and network access technology for use by communications infrastructure equipment companies. He is also a member of the boards of a number of privately-held companies active in the areas of photonic and optical components, optical network systems and solutions for cable operators and other communications service providers. Mr. Unger holds a bachelor's degree in Science from Concordia University in Canada.

64

SAMI YAZDI co-founded Avantas Networks Corporation (now EXFO Protocol Inc.) and served as President and Chief Executive Officer until the company was acquired by EXFO in November 2001. He is responsible for the overall strategic direction and management of EXFO Protocol. Prior to launching Avantas Networks, Mr. Yazdi was a co-founder of Positron Fiber Systems, a Montreal-based fiber-optic company that went public in 1997 and was acquired by Reltec Corporation in 1998. In his capacity at Positron Fiber Systems, Mr. Yazdi served as Vice-President of Product Management and built a product portfolio to grow the company from product inception to annual sales of over US\$60 million. Prior to joining Positron Fiber Systems, Mr. Yazdi spent more than 10 years at Nortel Networks, holding various management positions in the Optical Networking product division. Mr. Yazdi graduated with a bachelor's degree in Electrical Engineering from Concordia University in 1982.

TERM OF EXECUTIVE OFFICERS

Executive officers are appointed annually by the board of directors and serve until their successors are appointed and qualified or until earlier resignation or removal.

B. COMPENSATION

DIRECTOR COMPENSATION

In the financial year terminated August 31, 2002, our directors who are not officers or employees received annual compensation of CA\$25,000 comprised of cash, the equivalent value of our subordinate voting shares under our directors' compensation plan or options to purchase some of our subordinate voting shares under our stock option plan. In addition, such directors each received 12,500 options under our stock option plan as partial compensation for the financial year commencing September 1, 2002. Directors who are also committee members received additional annual compensation of CA\$3,000 per committee and committee chairpersons received CA\$5,000 annually comprised of cash, the equivalent value of our subordinate voting shares under our directors' compensation plan or options to purchase some of our subordinate voting shares under our stock option plan. Fees of CA\$1,000 for each meeting of the Board of Directors or of a Committee attended by them in person and fees of CA\$500 if such participation was made by telephone were also paid. If more than one meeting occurs on the same day, only one fee is paid. All directors will be reimbursed for traveling and other expenses incurred in connection with attendance at meetings.

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

As partial remuneration for the financial year ended August 31, 2001, a total of 20,359 options were granted under our Stock Option Plan in October 2001 to directors who are not employees. Then in January 2002, 2,479 options were granted to one director who chose to receive a portion of his remuneration in the form of stock options.

EXECUTIVE COMPENSATION

The table below shows certain compensation information for Mr. Germain Lamonde, the President and Chief Executive Officer of the Corporation, and the four other most highly compensated executive officers of the Corporation and its subsidiaries during the financial year ended August 31, 2002 (collectively, the "Named Executive Officers"). This information includes the US dollar value of base salaries, bonus awards and long term incentive plan payments, the number of options granted, and certain other compensation, if any, whether paid or deferred.

65

SUMMARY COMPENSATION TABLE

NAME AND PRINCIPAL POSITION	FINANCIAL YEAR	SALARY (US\$)	BONUS (1) (US\$)	OTHER ANNUAL COMPENSATION (US\$)	SECURITIES UNDER OPTIONS (2) (#)
Germain Lamonde, President and Chief Executive Officer	2002	174,758	21,329	-	70,000
	2001	180,044	99,024	-	5,080
	2000	134,932	63,566	-	25,402
Bruce Bonini, Vice-President, North American Sales	2002	217,500	-	-	20,000
	2001	272,678 (4)	33,450	-	82,780
	2000	309,801	20,000	-	3,900
David J. Farrell, President, EXFO Burleigh Products Group Inc.	2002	184,500	-	-	10,000
	2001	184,500 (5)	16,326 (8)	-	40,000
Juan-Felipe Gonzalez, Vice-President, International Sales	2002	158,193	-	-	30,000
	2001	204,781 (6)	129,629 (9)	-	45,630
	2000	153,502	15,879	-	6,900
Sami Yazdi, President, EXFO Protocol Inc.	2002	111,210 (7)	5,550	-	50,000

(1) A portion of the bonus amounts is paid in cash in the year for which they are awarded and the balance is paid in cash in the year following the

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

financial year for which they are awarded.

- (2) Indicates the number of Subordinate Voting Shares underlying the options granted under the Stock Option Plan during the financial year indicated.
- (3) Indicates the amount contributed by the Corporation during the financial year indicated to the Deferred Profit Sharing Plan or the 401K plans, as applicable, for the benefit of the Named Executive Officer. Mr. Lamonde is not eligible to participate in the Deferred Profit Sharing Plan and Mr. Gonzalez did not participate.
- (4) This amount includes an amount of US\$28,654 paid as a retroactive adjustment to salary for the financial year ended August 31, 2000.
- (5) This amount represents Mr. Farrell's base annual salary. Since he joined the Corporation on December 20, 2000, the base salary paid to him for the financial year ended August 31, 2001 amounted to US\$134,097.
- (6) This amount includes an amount of US\$4,935 paid as a retroactive adjustment to salary for the financial year ended August 31, 2000.
- (7) This amount represents Mr. Yazdi's base annual salary. Since he joined the Corporation on November 2, 2001, the base salary paid to him for the financial year ended August 31, 2002 amounted to US\$90,959.
- (8) This is the amount paid or payable for the financial year ended August 31, 2001 to Mr. Farrell, as applicable, since December 20, 2000, the date that he joined the Corporation.
- (9) This amount includes an amount of US\$2,771 paid as a retroactive adjustment to bonus for the financial year ended August 31, 2000.

66

The following table indicates additional information on the options granted to our Named Executive Officers during the 2002 fiscal year.

NAME	SECURITIES UNDER OPTIONS GRANTED (1) (#)	PERCENTAGE OF NET TOTAL OF OPTIONS GRANTED TO EMPLOYEES IN FINANCIAL YEAR (%)	EXERCISE OR BASE PRICE (2) (US\$/ SECURITY)	MARKET VALUE OF SECURITIES UNDERLYING OPTIONS ON THE DATE OF GRANT (US\$/SECURITY) (3)
Germain Lamonde	70,000	7.8%	9.13	9.01
Bruce Bonini	5,000	0.6%	12.22	12.42
	15,000	2.3%	9.13	9.01
David J. Farrell	10,000	1.2%	9.13	9.01
Juan-Felipe Gonzalez	15,000	1.7%	12.22	12.42
	15,000	1.7%	9.13	9.01
Sami Yazdi	50,000	5.6%	10.86	10.68

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

- (1) Underlying securities: Subordinate Voting Shares.
- (2) The exercise price of options granted is determined based on the highest of the closing prices of the Subordinate Voting Shares on The Toronto Stock Exchange and the NASDAQ National Market on the last trading day preceding the grant date, using the noon buying rate of the Federal Reserve Bank of New York on the grant date to convert the NASDAQ National Market closing price to Canadian dollars, as required. Options vest at a rate of 25% annually commencing on the first anniversary date of the grant.
- (3) Based on the closing price on the NASDAQ National Market on the date of the grant.

EMPLOYMENT AGREEMENTS

We have an employment agreement with Germain Lamonde. The agreement provides for Mr. Lamonde's employment as President and Chief Executive Officer at a base salary applicable from September 1, 2001 to August 31, 2002 of CA\$275,000 (US\$174,758) per year. In addition, an annual bonus of CA\$137,500 (US\$87,429) will be payable if the Corporation's performance-based objectives are met. If the Corporation's performance objectives are not met or are exceeded, such bonus will be lesser or greater in a proportional amount, as applicable. The agreement is for an indeterminate period and the salary is reviewed annually. In the event of the termination of Mr. Lamonde's employment without cause, Mr. Lamonde will be entitled to severance payments (in no case exceeding 24 months of remuneration) and the vesting of all stock options. In addition, in the event that Mr. Lamonde's employment is terminated following a merger or an acquisition by a third party of substantially all of our assets or of the majority of our share capital or if Mr. Lamonde voluntarily resigns, he will be entitled to the vesting of all stock options.

We also have employment agreements with Mr. Bruce Bonini and Mr. Juan-Felipe Gonzalez, and our subsidiaries, EXFO Burleigh and EXFO Protocol, have employment agreements with Mr. David J. Farrell and Mr. Sami Yazdi, respectively.

The agreement with Mr. Bonini provides for Mr. Bonini's employment as Vice-President, North American Sales at a base salary of US\$145,000, plus commissions of US\$145,000 if sales objectives are met, for the period from September 1, 2001 to August 31, 2002. If sales objectives are not attained or are exceeded, commissions will vary accordingly. The agreement is for an indeterminate period and salary is reviewed annually. In addition, bonuses totaling US\$16,000 will be payable if various performance-based objectives are met. If performance

67

objectives are exceeded, such bonus will be greater in a proportional amount. In the event Mr. Bonini's employment terminates for any reason whatsoever and he is unable to accept new employment due to his non-competition obligations to us, Mr. Bonini may receive compensation for a period of 18 months following the date of termination in amounts varying from 5% to 125% of his base monthly salary at the time of termination depending on the cause of the termination.

The agreement between EXFO Burleigh and Mr. Farrell provides for Mr. Farrell's employment as President of EXFO Burleigh at an annual base salary of US\$184,500. The agreement is for an indeterminate period and salary is reviewed annually. In the event of termination of Mr. Farrell's employment other than for cause, Mr. Farrell will be entitled to severance payments equivalent to 6 months

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

of remuneration. In the event of Mr. Farrell's termination due to a merger or acquisition by a third party of substantially all of EXFO Burleigh's assets or of the majority of its share capital, Mr. Farrell shall be entitled to severance benefits ranging from 6 to 12 months of remuneration, based on his length of service with EXFO Burleigh from the time it was acquired by us.

The agreement with Mr. Gonzalez provides for Mr. Gonzalez's employment as Vice-President, International Sales at a base salary of US\$120,753, plus commissions on sales of US\$74,952, for the period from September 1, 2001 to August 31, 2002. If sales objectives are not attained or are exceeded, commissions will vary accordingly. The agreement is for an indeterminate period and salary is reviewed annually. In addition, bonuses totaling US\$32,000 will be payable if various performance-based objectives are met. If performance objectives are exceeded, such bonus will be greater in a proportional amount. In addition Mr. Gonzalez shall be paid a bonus of CA\$750,000 if he has not voluntarily resigned or been dismissed with cause prior to September 2003. In the event Mr. Gonzalez's employment terminates for any reason whatsoever and he is unable to accept new employment due to his non-competition obligations to us, Mr. Gonzalez may receive compensation for a period of 18 months following the date of termination in amounts varying from 5% to 50% of his base monthly salary at the time of termination depending on the cause of the termination.

The agreement between EXFO Protocol and Mr. Yazdi provides for Mr. Yazdi's employment as President of EXFO Protocol at an annual base salary of CA\$175,000 (US\$111,210). In addition, an annual bonus of CA\$43,750 (US\$27,818) will be payable if performance-based objectives are met. If such performance objectives are not met or are exceeded, such bonus will be lesser or greater in a proportional amount, as applicable. The agreement is for an indeterminate period and salary is reviewed annually. In the event of termination of Mr. Yazdi's employment other than for cause, Mr. Yazdi will be entitled to severance payments equivalent to 6 months of remuneration.

STOCK OPTION PLAN

We have a stock option plan for our directors, executive officers, employees and consultants and those of our subsidiaries as determined by our board of directors, to attract and retain competent directors, executive officers, employees and consultants motivated to work toward ensuring our success and to encourage them to acquire our shares.

All of the options that will be granted under the plan must be exercised within a maximum period of ten years following the grant date of the options or they will be forfeited. The board of directors will designate the recipients of options and determine the number of subordinate voting shares covered by each of these options, the date of vesting of each option,

68

the exercise price of each option, the expiry date and any other conditions relating to these options, in each case in accordance with the applicable legislation of the securities regulatory authorities. The price at which the subordinate voting shares may be purchased under the plan will not be lower than the highest of the closing prices of the subordinate voting shares on the stock exchanges where the subordinate voting shares are listed at the date preceding the date of grant.

The maximum number of subordinate voting shares that is issuable under the plan may not exceed 4,470,961 shares, which represents 7.1 % of our issued and outstanding share capital as at November 30, 2002. The maximum number of subordinate voting shares that may be granted to any individual may not exceed

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

5% of the outstanding subordinate voting shares. The board of directors may accelerate the vesting of any or all outstanding options of any or all options upon the occurrence of a change of control.

The aggregate number of subordinate voting shares covered by options granted during the financial year ended August 31, 2002 was 896,975 (net of cancelled options due to employment terminations) at a weighted average exercise price of \$10 (CA\$15.73) per subordinate voting share. At the end of the financial year ended August 31, 2002, there were 2,597,574 subordinate voting shares covered by options granted and outstanding pursuant to the stock option plan having a weighted average exercise price of US\$22 per option. Following these grants, and net of cancelled options for departures, as of August 31, 2002, there were 1,873,387 options available for future grants under the plan. Since August 31, 2002 we have made the following grants to directors and employees: September 1, 2002: 10,500 options and September 25, 2002: 1,013,500 options.

Except for certain options granted to independent directors of the Corporation, all options granted prior to September 1, 2002 vest on a cumulative basis at a rate of 25 % annually commencing on the first anniversary date of their grant and may be exercised in whole or in part once vested. Some options granted to non-employee directors vest on the first anniversary date of their grant and may be exercised in whole or in part once vested and options granted after September 1, 2002 vest on a cumulative basis at a rate of 12.5% six months and twelve months after the date of grant and subsequently at a rate of 25% annually and may be exercised in whole or in part once vested.

SHARE PLAN

In September 1998, we established a stock purchase plan for officers, directors and key employees as amended in April 2000. A total of 707,264 subordinate voting shares were issued and fully paid under the 1998 Stock Purchase Plan, having a weighted average cash consideration of \$0.67 (CA\$0.98) per share. The plan provides that all shares issued under the plan are restricted as to sale and transferability for a minimum period of five years upon the date of acquisition.

On April 3, 2000, we adopted a new share plan that replaced the 1998 Stock Purchase Plan. No additional shares will be issued under the new share plan. The new share plan established restrictions on the rights of the holders of subordinate voting shares who hold those shares as a result of the conversion of the Class "F" shares issued under the 1998 Stock Purchase Plan. The new share plan also requires the subordinate voting shares to be held in trust by a trustee until August 31, 2004, except for 256,017 subordinate voting shares that will be released between October 21, 2003 and January 20, 2004. The new share plan also provides for the earlier release of shares in the event that the employment of a holder of shares

69

is terminated or upon the occurrence of a change of control. The new share plan does not permit any transfer, except within the trust to a registered retirement savings plan or a registered retirement income fund or to a trustee in bankruptcy. The new share plan also established the conditions pursuant to which the shares of a shareholder are to be sold by the trustee on the public market. As of August 31, 2002, 654,683 subordinate voting shares were being held in trust under the new share plan.

RESTRICTED STOCK AWARD PLAN

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

The EXFO Electrical-Optical Engineering Restricted Stock Award Plan (the "Plan") was established to provide a means through which employees of EXFO Burleigh can be granted awards of restricted shares ("Restricted Shares") of our subordinate voting shares to promote retention and foster identity of interest between our stockholders and employees of EXFO Burleigh.

The effective date of the Plan is December 20, 2000. The expiration date of the Plan is the business day next following the final grant of Restricted Shares under the Plan. However, the administration of the Plan shall continue until all awards of Restricted Shares have been forfeited or settled. The aggregate number of shares subject to the Plan is 360,000. Grants of Restricted Shares are to be made in accordance with a pre-determined schedule. The Plan is administered by the committee that is designated to administer our Stock Option Plan.

Awards of Restricted Shares are subject to forfeiture and restrictions on transfer until the Restricted Shares become vested at which point a stock certificate will be issued to a participant with respect to the number of vested shares, which are then freely transferable. Restricted Shares become vested, subject to a participant's continued employment with the Company or its affiliates, on each of the first four anniversaries of the date of grant of an award of Restricted Shares. On December 20, 2001 and on December 20, 2002, we issued an aggregate of 83,657 subordinate voting shares and 69,935 subordinate voting shares respectively in accordance with the vesting schedule under the Plan.

Upon a participant's termination of employment with us, or any of our affiliates due to the participant's death, disability or retirement on or after age 60, the participant's award of restricted shares becomes fully vested and is no longer subject to forfeiture. However, the transfer restrictions remain in place until the occurrence of the vesting dates originally contemplated by the award.

Upon the voluntary resignation of a participant, the termination of a participant's employment for cause, the termination of a participant who is not designated a member of EXFO Burleigh's "Management Team" without cause prior to a change in control of EXFO or a termination without cause of a participant who is designated a member of EXFO Burleigh's Management Team that is initiated by EXFO Burleigh prior to a change in control of EXFO, the unvested portion of the participant's award of Restricted Shares will be forfeited. However, the Plan provides for discretion in the application of the forfeiture provisions where a change in circumstances renders such action appropriate. During the financial year ended August 31, 2002, we were required to lay-off 42 participants as a result of restructuring. At that time, we decided that the awards of the Plan participants affected by the lay-offs would not be subject to forfeiture, though the transfer restrictions would remain in place until the occurrence of the vesting dates originally contemplated by the award.

70

Upon the termination without cause of a participant who is designated a member of EXFO Burleigh's Management Team that is initiated by us or a termination of a participant's employment without cause following a change in control of EXFO, a participant's award of Restricted Stock will become fully vested and all restrictions will lapse.

In the event of a change in control, the committee administering the Plan may in its discretion remove restrictions on Restricted Shares or provide for the cancellation of awards in exchange for payment in respect of the Restricted Shares subject to an award.

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

STOCK APPRECIATION RIGHTS PLAN

On August 4, 2001, the Corporation established a Stock Appreciation Rights Plan ("SAR Plan") for the benefit of certain employees residing in countries where the granting of options under the Stock Option Plan is not feasible in the opinion of the Corporation. The Board has full and complete authority to interpret the SAR Plan and to establish the rules and regulations applying to it and to make all other determinations it deems necessary or useful for the administration of the SAR Plan.

Under the SAR Plan, eligible employees are entitled to receive a cash amount equivalent to the difference between the market price of the subordinate voting shares on the date of exercise and the exercise price determined on the date of grant. No subordinate voting shares are issuable under the SAR Plan.

The Board of Directors has delegated to Management the task of designating the recipients of stock appreciation rights, the date of vesting, the expiry date and other conditions. Under the terms of the SAR Plan, the exercise price of the stock appreciation rights may not be lower than the highest of the closing prices of the subordinate voting shares on The Toronto Stock Exchange and on the NASDAQ National Market on the last trading day preceding the grant date, using the noon buying rate of the Federal Reserve Bank of New York on the grant date to convert the NASDAQ National Market closing price to Canadian dollars. Stock appreciation rights are non-transferable.

The stock appreciation rights vest over a four-year period, with 25% vesting annually commencing on the first anniversary date of the date of grant. Once vested, stock appreciation rights may be exercised between the second and the fifteenth business day following each release of the Corporation's quarterly financial results. All of the stock appreciation rights that are granted under the SAR Plan may be exercised within a maximum period of 10 years following the date of their grant. Any stock appreciation rights granted under the SAR Plan will lapse immediately upon the termination of the relationship with the Corporation or one of its subsidiaries for a good and sufficient cause or at the date on which an employee resigns or leaves his employment with the Corporation or one of its subsidiaries (or within 30 days if the holder is dismissed without cause). In the event of retirement or disability, any stock appreciation right held by an employee lapses 30 days after the date of any such disability or retirement. In the event of death, any stock appreciation right lapses 6 months after the date of death.

As of December 31, 2002, there were 13,000 SAR's outstanding.

71

DEFERRED PROFIT SHARING PLAN

We maintain a deferred profit sharing plan for certain eligible Canadian resident employees. Under the plan, we may contribute an amount equal to 1% of each employee's gross salary to that employee's individual deferred profit sharing plan to the extent that such employee contributes at least 2% of his or her gross salary to his or her individual tax-deferred registered retirement savings plan. Since June 2002, we have suspended our contributions to the plan as part of our cost reduction efforts. In the year ended August 31, 2002, the aggregate amount of contributions under the plan was \$88,000 (CA\$136,000).

401(K) PLAN

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

We maintain a 401(k) plan for eligible United States resident employees of our subsidiaries. Employees become eligible to participate in the 401(k) plan on the first day of the month following the completion of three months of continuous service. Employees may elect to defer their current compensation up to the lesser of 1% of eligible compensation or the statutorily prescribed annual limit and have the deferral contributed to the 401(k) plan. The 401(k) plan permit, but do not require, us to make additional matching contributions to the 401(k) plan on behalf of the eligible participants, subject to a maximum of 50% of the first 6% of the participant's current compensation subject to certain legislated maximum contribution limits. In the year ended August 31, 2002, we made an aggregate of \$317,000 in matching contributions to the 401(k) plan. Contributions by employees or by us to the 401(k) plan and income earned on plan contributions are generally not taxable to the employees until withdrawn and contributions by us are generally deductible by us when made. At the direction of each participant, the trustees of the 401(k) plan invest the assets of the 401(k) plan in selected investment options.

INDEMNIFICATION OF DIRECTORS AND EXECUTIVE OFFICERS AND LIMITATION OF LIABILITY

Our by-laws require us, subject to the limitations provided by law, to indemnify our present or former directors and officers or any persons who act or acted at our request as directors or officers of a body corporate of which we are or were a shareholder and for all costs, losses, charges and expenses that arose or may arise by reason of their status as directors or officers of EXFO or such body corporate. A policy of directors' and officers' liability insurance is maintained by us which insures our directors and officers and those of our subsidiaries against liability incurred by, arising from or against them for certain of their acts, errors or omissions.

C. BOARD PRACTICES

BOARD OF DIRECTORS

Our directors are elected at the annual meeting of shareholders for one-year terms and serve until their successors are elected or appointed, unless they resign or are removed earlier. Our articles of incorporation provide for a board of directors of a minimum of three and a maximum of 12 directors. Our board presently consists of five directors. Under the CANADA BUSINESS CORPORATIONS ACT, twenty-five percent of the directors and of the members of any committee of the board of directors must be resident Canadians. We have no arrangements with any of our directors providing for the payment of benefits upon their termination of service as director.

72

COMMITTEES OF THE BOARD OF DIRECTORS

Our board of directors has established an audit committee, a human resources committee and a disclosure committee.

Our audit committee will recommend a firm to be appointed as independent auditors to audit financial statements and to perform services related to the audit, review the scope and results of the audit with the independent auditors, review with management and the independent auditors our annual operating results and consider the adequacy of the internal accounting procedures and the effect of the procedures relating to the auditors' independence. Further to proposed changes to Nasdaq corporate governance rules and new Securities and Exchange rules flowing from the adoption of the SARBANES-OXLEY ACT, our audit committee charter will be revised during the current financial year to ensure that we comply with all new requirements. The

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

audit committee is composed of three independent directors: Andre Tremblay, Michael Unger and Pierre Marcouiller. The chairperson of the audit committee is Andre Tremblay.

Our human resources committee will evaluate, review and supervise our procedures with regards to human resources and will assess the performance of our executive officers and the chief executive officer. This committee will also review annually the remuneration of the directors and will recommend to the board of directors general remuneration policies regarding salaries, bonuses and other forms of remuneration for our directors, executive officers and employees as a whole. In addition, the human resources committee will monitor the board's corporate governance practices and generally review the functioning of the board and the powers, mandates and performance of the committees. Finally, the human resources committee will review our organizational structure annually and the development and maintenance of a succession plan. The human resources committee is composed of four independent directors: Pierre Marcouiller, David A. Thompson, Andre Tremblay and Michael Unger. The chairperson of the human resources committee is Michael Unger.

The disclosure committee is responsible for overseeing our disclosure practices. This committee consists of the chief executive officer, the chief financial officer, investor relations and corporate development director, communications director, manager of financial reporting and accounting as well as legal counsel and corporate secretary.

In addition, in order to deal with issues arising from our implication in the IPO class action suit, in October 2002, the Board of Directors appointed a litigation committee composed of our four independent directors.

D. EMPLOYEES

We have fostered a corporate culture where growth and change are strongly encouraged. In fact, employees are constantly evolving with the rapid pace of technology to meet new challenges and realities. We believe that we possess a good cross-section of experience and youth to handle these inevitable changes in the industry.

As of December 31, 2002, we had a total of 805 employees, down from a total of 1,099 on December 31, 2001. We have 645 employees in Canada, primarily based in Quebec, and 160 employees based outside of Canada. Two hundred and forty-four are involved in research and development, 256 in manufacturing, 144 in sales and marketing, 94 in general administrative positions and 67 in communications and customer support. In the financial year ended August 31, 2002, we were forced to lay off a total of 350 employees as part of our efforts

73

to reduce costs in response to a general slowdown in the telecommunications industry. We have agreements with almost all of our employees covering confidentiality and non-competition. Only manufacturing employees are represented by a collective bargaining agreement, which expires in 2004. In December 2002, we implemented a temporary work sharing program for these employees as a further cost reduction measure that is expected to terminate no later than May 31, 2003. We have never experienced a work stoppage. We believe that relations with our employees are good.

E. SHARE OWNERSHIP

The following table presents information regarding the beneficial ownership of our share capital as of December 31, 2002 by our directors, our

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

Chief Executive Officer and our four highest compensated executive officers; and all of our directors and executive officers as a group.

Each multiple voting share is convertible at the option of the holder into one subordinate voting share. Holders of our subordinate voting shares are entitled to one vote per share and holders of our multiple voting shares are entitled to ten votes per share.

NAME -----	MULTIPLE VOTING SHARES BENEFICIALLY OWNED (1)		SUBORDINATE VOTING SHARES BENEFICIALLY OWNED (1)		TOTAL PERCENTAGE OF VOTING POWER

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

A. MAJOR SHAREHOLDERS

The following table presents information regarding the beneficial ownership of our share capital as of December 31, 2002 by persons or groups of affiliated persons known by us to own more than 5% of our voting shares.

NAME -----	MULTIPLE VOTING SHARES BENEFICIALLY OWNED (1)		SUBORDINATE VOTING SHARES BENEFICIALLY OWNED (1)		TOT
	NUMBER -----	PERCENT -----	NUMBER -----	PERCENT -----	
Germain Lamonde (2)	37,900,000	100%	106,791	*	
Fiducie Germain Lamonde (3)	1,900,000	5%	Nil	Nil	
G. Lamonde Investissements Financiers inc. (4)	36,000,000	95%	Nil	Nil	
Placements Lamonde, SENC	Nil	Nil	93,000	*	

* Less than 1%

- (1) Beneficial ownership is determined in accordance with the rules of the SEC and generally includes voting or investment power with respect to securities. Options that are currently exercisable are deemed to be outstanding and to be beneficially owned by the person holding such options for the purpose of computing the percentage ownership of such person, but are not treated as outstanding for the purpose of computing the percentage ownership of any other person.
- (2) The number of shares held by Germain Lamonde includes 1,900,000 multiple voting shares held of record by Fiducie Germain Lamonde and 36,000,000 multiple voting shares held of record by G. Lamonde Investissements Financiers inc. and 93,000 subordinate voting shares held of record by Placements Lamonde, SENC.
- (3) Fiducie Germain Lamonde is a family trust for the benefit of Mr. Lamonde and members of his family.
- (4) G. Lamonde Investissements Financiers inc. is a company controlled by Mr. Lamonde.
- (5) Placements Lamonde, SENC is a partnership controlled by Mr. Lamonde.

Each multiple voting share is convertible at the option of the holder into one subordinate voting share. Holders of our subordinate voting shares are entitled to one vote per share and holders of our multiple voting shares are

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

entitled to ten votes per share.

Unless otherwise indicated, the address of each person who beneficially owns 5% or more of our subordinate voting shares or multiple voting shares is c/o EXFO Electro-Optical Engineering Inc., 465 Godin Avenue, Vanier, Quebec, Canada.

As of December 31, 2002, approximately 66% of our subordinate voting shares were held in bearer form and the remainder (8,609,490 subordinate voting shares) were held by 290 record holders. As of December 31, 2002, we believe approximately 67% of our outstanding subordinate voting shares were held in the United States.

B. RELATED PARTY TRANSACTIONS

INDEBTEDNESS OF DIRECTORS, EXECUTIVE OFFICERS AND EMPLOYEES

We have guaranteed the repayment of loans granted to employees by a financial institution for the purchase of our Class "F" shares that were converted into subordinate voting

76

shares immediately prior to our initial public offering. As of August 31, 2002, the total principal amount guaranteed by us is CA\$125,899 (approximately \$80,052) and \$56,200. We have outstanding loans to some of our employees up to \$7,900 to finance the acquisition of our Class "F" shares. These loans are to be reimbursed no later than five years from the date of the loans. These loans accrue interest at prime rate and are secured by a pledge of the employees' shares to us. Except as disclosed in this section, none of our directors, executive officers, associates or affiliates had any material interest in any transaction with us during the past three years or in any proposed transaction which has materially affected or could materially affect us.

LEASES

We have a lease agreement with G. Lamonde Investissements financiers inc., a company controlled by Mr. Germain Lamonde, for the executive and administrative offices located at 465 Godin Avenue in Vanier, Quebec. This lease was renewed in December 2001, with all terms and conditions remaining the same. The table below sets forth the leased space and annual rent:

LOCATION	SQUARE FOOTAGE	ANNUAL RENT	EXPIRY DATE
-----	-----	-----	-----
465 Godin	24,000	CA\$144,000	November 30, 2006

Based on third-party valuations of the property values, we believe this lease agreement is at prevailing market terms.

In September 2002, we acquired from G. Lamonde Investissements financiers inc. the building located at 436 Nolin Street that houses some of our manufacturing activities. Previous to this acquisition, we had a lease agreement with this company for these premises. We paid CA\$1,450,000 for the building and this purchase price is based on an independent third party valuation and the transaction was approved by our audit committee and the board of directors with Mr. Lamonde abstaining.

REGISTRATION RIGHTS AGREEMENTS

REGISTRATION RIGHTS AGREEMENT WITH MR. LAMONDE

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

In July 2000, we entered into a registration rights agreement with Germain Lamonde, under which Mr. Lamonde and entities affiliated with him were granted demand registration rights in the United States in respect of the subordinate voting shares, including the subordinate voting shares issued upon conversion of the multiple voting shares held by him or entities affiliated with him. With respect to the demand registration rights of Mr. Lamonde, subject to minimum dollar amounts, Mr. Lamonde may make a demand once every 12 consecutive month period. Mr. Lamonde also has an unlimited number of piggyback registration rights in respect of the subordinate voting shares issued upon conversion of the multiple voting shares held by him or entities affiliated with him. The piggyback registration rights generally will allow Mr. Lamonde to include all or a portion of the subordinate voting shares issuable upon conversion of the multiple voting shares under any registration statement filed by us.

We will pay all expenses, other than underwriting discounts and commissions and taxes, in connection with the exercise of any demand registration rights or piggyback registration rights. We also will agree to indemnify any sellers and underwriters against some liabilities, including liabilities arising under applicable securities laws.

77

REGISTRATION RIGHTS AGREEMENT WITH EXFO BURLEIGH SHAREHOLDERS

In December 2000 in connection with the acquisition of EXFO Burleigh, we issued registration rights to the former shareholders of EXFO Burleigh. In July 2001, we fulfilled our obligations to the former shareholders of EXFO Burleigh by filing a registration statement on Form F-3 relating to the resale of the subordinate voting shares held by the former shareholders of EXFO Burleigh. The EXFO Burleigh shareholders also have an unlimited number of piggyback registration rights in respect of their subordinate voting shares. The piggyback registration rights generally will allow the EXFO Burleigh shareholders to include all or a portion of their subordinate voting shares under any registration statement filed by us. The piggyback registration rights cease to apply on June 1, 2002.

We paid all expenses, other than underwriting commissions or discounts, taxes and fees and expenses of counsel and advisors to the EXFO Burleigh shareholders, in connection with the preparation and filing of the foregoing registration statement. We also agreed to indemnify any sellers and underwriters against some liabilities, including liabilities arising under applicable securities laws, incurred in connection with the registration statement on Form F-3.

REGISTRATION RIGHTS AGREEMENT WITH AVANTAS SHAREHOLDERS

In November 2001, in connection with the acquisition of EXFO Protocol (formerly Avantas Networks Corporation), we issued registration rights to the former shareholders of EXFO Protocol. In March 2002, we fulfilled our obligations to the former shareholders of EXFO Protocol by filing a registration statement on Form F-3 relating to the resale of the subordinate voting shares held by the former shareholders of EXFO Protocol.

We paid all expenses, other than underwriting commissions or discounts, taxes and fees and expenses of counsel and advisors to the EXFO Protocol shareholders, in connection with the preparation and filing of the foregoing registration statement. We also agreed to indemnify any sellers against some liabilities, including liabilities arising under applicable securities laws, incurred in connection with any of the foregoing registration statements.

Item 8. FINANCIAL INFORMATION

Consolidated financial statements: pages F-1 to F-45

Valuation and qualifying accounts are as follows (in thousands of US dollars):

Allowance for doubtful accounts

	YEARS ENDED AUGUST 31,		
	2000	2001	2002
Balance - Beginning of year	\$ 30	\$ 149	\$ 893
Addition charged to earnings	147	1,134	1,097
Write-off of uncollectible accounts	(41)	(184)	(925)
Reversal of collectible accounts	(3)	(268)	(538)
Foreign currency translation adjustment	16	62	(7)
Balance - End of year	\$ 149	\$ 893	\$ 520

For information regarding our valuation allowance on future income tax assets, refer to Note 15 in our financial statements.

LEGAL PROCEEDINGS

A description of legal proceedings is set forth in Item 4 of this annual report.

DIVIDEND POLICY

We do not currently anticipate paying dividends for at least the three next years. Our current intention is to reinvest our earnings in our business long-term growth. Any future determination by us to pay dividends will be at the discretion of our board of directors and in accordance with the terms and conditions of any outstanding indebtedness and will depend on our financial condition, results of operations, capital requirements and such other functions as our board of directors considers relevant.

Item 9. THE OFFER AND LISTING

Not Applicable, except for Item 9A (4) and Item 9C.

Our subordinate voting shares have been quoted on the NASDAQ National Market under the symbol "EXFO" and listed on The Toronto Stock Exchange under the symbol "EXF" since our initial public offering on June 29, 2000. Prior to that time, there was no public market for our subordinate voting shares. The following table sets forth, for the periods indicated, the high and low closing sales prices per subordinate voting share as reported on the NASDAQ National Market and The Toronto Stock Exchange.

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

On January 10, 2003, the last reported sale price for our subordinate voting shares on the NASDAQ National Market was \$2.96 per share and the last reported sale price for our subordinate voting shares on The Toronto Stock Exchange was CA\$4.50 per share.

PERIOD	NASDAQ		TSE	
	HIGH	LOW	HIGH	LOW
June 29, 2000 to August 31, 2000	92.50	26.00	134.00	51.00
September 1, 2000 to August 31, 2001	57.75	11.80	85.00	17.82
September 1, 2001 to August 31, 2002	15.00	1.35	23.80	2.05
2002 1st Quarter	15.00	8.51	23.80	13.49
2002 2nd Quarter	14.00	5.58	22.10	9.02
2002 3rd Quarter	8.54	2.59	13.55	3.85
2002 4th Quarter	2.83	1.35	4.20	2.05
2003 1st Quarter	3.53	1.40	5.40	2.30

ITEM 10 ADDITIONAL INFORMATION

A. SHARE CAPITAL

Not Applicable

B. MEMORANDUM AND ARTICLES OF ASSOCIATION

Incorporated by reference to our registration statement on Form F-1 (Reg. No. 333-38956).

C. MATERIAL CONTRACTS

Except as otherwise disclosed in this annual report and our financial statements and notes included elsewhere in this annual report, we have no other material contracts.

D. EXCHANGE CONTROLS

Subject to the following paragraph, there is no law or governmental decree or regulation in Canada that restricts the export or import of capital, or affects the remittance of dividends, interest or other payments to non-resident holders of our subordinate voting shares, other than withholding tax requirements.

There is no limitation imposed by Canadian law or by our articles of incorporation or our other charter documents on the right of a non-resident to hold or vote subordinate voting shares, other than as provided by the INVESTMENT CANADA ACT, the NORTH AMERICAN FREE TRADE AGREEMENT IMPLEMENTATION ACT (Canada) and the WORLD TRADE ORGANIZATION AGREEMENT IMPLEMENTATION ACT. The INVESTMENT CANADA ACT requires notification and, in certain cases, advance review and approval by the Government of Canada of an investment to establish a new

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

Canadian business by a non-Canadian or of the acquisition by a "non-Canadian" of "control" of a "Canadian business", all as defined in the INVESTMENT CANADA ACT. Generally, the threshold for review will be higher in monetary terms for a member of the World Trade Organization or North American Free Trade Agreement.

E. TAXATION

UNITED STATES TAXATION

The information set forth below under the caption "United States Taxation" is a summary of the material U.S. federal income tax consequences of the ownership and disposition of subordinate voting shares by a U.S. Holder, as defined below. These discussions are not a complete analysis or listing of all of the possible tax consequences of such transactions and do not address all tax considerations that may be relevant to particular holders in light of their personal circumstances or to persons that are subject to special tax rules. In particular, the information set forth under the caption "United States Taxation" deals only with U.S. Holders that will hold subordinate voting shares as capital assets within the meaning of the Internal Revenue Code of 1986, as amended, and who do not at any time own individually, nor are treated as owning 10% or more of the total combined voting power of all classes of our stock entitled to vote. In addition, this description of U.S. tax consequences does not address the tax treatment of special classes of U.S. Holders, such as banks, tax-exempt entities, insurance companies, persons holding subordinate voting shares as part of a hedging or conversion

81

transaction or as part of a "straddle," U.S. expatriates, persons subject to the alternative minimum tax, dealers or traders in securities or currencies and holders whose "functional currency" is not the U.S. dollar. This summary does not address estate and gift tax consequences or tax consequences under any foreign, state or local laws other than as provided in the section entitled "Canadian Federal Income Tax Considerations" provided below.

As used in this section, the term "U.S. Holder" means:

- (a) an individual citizen or resident of the United States;
- (b) a corporation created or organized under the laws of the United States or any state thereof including the District of Columbia;
- (c) an estate the income of which is subject to United States federal income taxation regardless of its source;
- (d) a trust if a court within the United States is able to exercise primary jurisdiction over its administration and one or more U.S. persons have authority to control all substantial decisions of the trust; or
- (e) a partnership to the extent the interests therein are owned by any of the persons described in clauses (a), (b), (c) or (d) above.

Holders of subordinate voting shares who are not U.S. Holders, sometimes referred to as "Non-U.S. Holders", should also consult their own tax advisors, particularly as to the applicability of any tax treaty.

The following discussion is based upon:

- o the Internal Revenue Code;
- o U.S. judicial decisions;
- o administrative pronouncements;
- o existing and proposed Treasury regulations; and
- o the Canada--U.S. Income Tax Treaty.

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

Any of the above is subject to change, possibly with retroactive effect. We have not requested, and will not request, a ruling from the U.S. Internal Revenue Service with respect to any of the U.S. federal income tax consequences described below, and as a result, there can be no assurance that the U.S. Internal Revenue Service will not disagree with or challenge any of the conclusions we have reached and describe here.

HOLDERS OF SUBORDINATE VOTING SHARES ARE URGED TO CONSULT THEIR TAX ADVISORS AS TO THE PARTICULAR CONSEQUENCES TO THEM UNDER U.S. FEDERAL, STATE, LOCAL AND APPLICABLE FOREIGN TAX LAWS OF THE ACQUISITION, OWNERSHIP AND DISPOSITION OF SUBORDINATE VOTING SHARES.

DIVIDENDS

Subject to the discussion of passive foreign investment companies below, the gross amount of any distribution paid by us to a U.S. Holder will generally be subject to U.S. federal income tax as foreign source dividend income to the extent paid out of our current or accumulated earnings and profits, as determined under U.S. federal income tax principles. The amount of any distribution of property other than cash will be the fair market value of such property on the date of the distribution. Dividends received by a U.S. Holder will not be eligible for the dividends received deduction allowed to corporations. To the extent that an amount

82

received by a U.S. Holder exceeds such holder's allocable share of our current and accumulated earnings and profits, such excess will be applied first to reduce such U.S. Holder's tax basis in his subordinate voting shares, thereby increasing the amount of gain or decreasing the amount of loss recognized on a subsequent disposition of the subordinate voting shares. Then, to the extent such distribution exceeds such U.S. Holder's tax basis, it will be treated as capital gain. We do not currently maintain calculations of our earnings and profits for U.S. federal income tax purposes.

The gross amount of distributions paid in Canadian dollars, or any successor or other foreign currency, will be included in the income of such U.S. Holder in a dollar amount calculated by reference to the spot exchange rate in effect on the day the distributions are paid regardless of whether the payment is in fact converted into U.S. dollars. If the Canadian dollars, or any successor or other foreign currency, are converted into U.S. dollars on the date of the payment, the U.S. Holder should not be required to recognize any foreign currency gain or loss with respect to the receipt of Canadian dollars as distributions. If, instead, the Canadian dollars are converted at a later date, any currency gains or losses resulting from the conversion of the Canadian dollars will be treated as U.S. source ordinary income or loss. Any amounts recognized as dividends will generally constitute foreign source "passive income" or, in the case of certain U.S. Holders, "financial services income" for U.S. foreign tax credit purposes. A U.S. Holder will have a basis in any Canadian dollars distributed equal to their dollar value on the payment date.

A Non-U.S. Holder of subordinate voting shares generally will not be subject to U.S. federal income or withholding tax on dividends received on subordinate voting shares unless such income is effectively connected with the conduct by such Non-U.S. Holder of a trade or business in the United States.

SALE OR EXCHANGE

A U.S. Holder's initial tax basis in the subordinate voting shares will

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

generally be cost to the holder. A U.S. Holder's adjusted tax basis in the subordinate voting shares will generally be the same as cost, but may differ for various reasons including the receipt by such holder of a distribution that was not made up wholly of earnings and profits as described above under the heading "Dividends." Subject to the discussion of passive foreign investment companies below, gain or loss realized by a U.S. Holder on the sale or other disposition of subordinate voting shares will be subject to U.S. federal income taxation as capital gain or loss in an amount equal to the difference between the U.S. Holder's adjusted tax basis in the subordinate voting shares and the amount realized on the disposition. In the case of a non-corporate U.S. Holder, the federal tax rate applicable to capital gains will depend upon:

- o the holder's holding period for the subordinate voting shares, with a preferential rate available for subordinate voting shares held for more than one year; and
- o the holder's marginal tax rate for ordinary income.

Any gain realized will generally be treated as U.S. source gain and loss realized by a U.S. Holder generally also will be treated as from sources within the United States.

The ability of a U.S. Holder to utilize foreign taxes as a credit to offset U.S. taxes is subject to complex limitations and conditions. The consequences of the separate limitation calculation will depend upon the nature and sources of each U.S. Holder's income and the deductions allocable thereto. Alternatively, a U.S. Holder may elect to claim all foreign taxes

83

paid as an itemized deduction in lieu of claiming a foreign tax credit. A deduction does not reduce U.S. tax on a dollar-for-dollar basis like a tax credit, but the availability of the deduction is not subject to the same conditions and limitations applicable to foreign tax credits.

If a U.S. Holder receives any foreign currency on the sale of subordinate voting shares, such U.S. Holder may recognize ordinary income or loss as a result of currency fluctuations between the date of the sale of subordinate voting shares and the date the sale proceeds are converted into U.S. dollars.

A Non-U.S. Holder of subordinate voting shares generally will not be subject to U.S. federal income or withholding tax on any gain realized on the sale or exchange of such subordinate voting shares unless:

- o such gain is effectively connected with the conduct by such Non-U.S. Holder of a trade or business in the United States; or
- o in the case of any gain realized by an individual Non-U.S. Holder, such Non-U.S. Holder is present in the United States for 183 days or more in the taxable year of such sale and certain other conditions are met.

Personal Holding Company

We could be classified as a personal holding company for U.S. federal income tax purposes if both of the following tests are satisfied:

- o if at any time during the last half of our taxable year, five

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

or fewer individuals own or are deemed to own more than 50% of the total value of our shares; and

- o we receive 60% or more of our U.S. related gross income from specified passive sources, such as royalty payments.

A personal holding company is taxed on a portion of its undistributed U.S. source income, including specific types of foreign source income which are connected with the conduct of a U.S. trade or business, to the extent this income is not distributed to shareholders. We do not believe we are a personal holding company presently and we do not expect to become one. However, we can not assure you that we will not qualify as a personal holding company in the future.

FOREIGN PERSONAL HOLDING COMPANY

We could be classified as a foreign personal holding company if in any taxable year both of the following tests are satisfied:

- o five or fewer individuals who are United States citizens or residents own or are deemed to own more than 50% of the total voting power of all classes of our shares entitled to vote or the total value of our shares; and
- o at least 60%, 50% in some cases, of our gross income, as adjusted, consists of "foreign personal holding company income", which generally includes passive income such as dividends, interests, gains from the sale or exchange of shares or securities, rent and royalties.

84

If we are classified as a foreign personal holding company and if you hold shares in us, you may have to include in your gross income as a dividend your pro rata portion of our undistributed foreign personal holding company income. If you dispose of your shares prior to such date, you will not be subject to tax under these rules. We do not believe we are a foreign personal holding company presently and we do not expect to become one. However, we can not assure you that we will not qualify as a foreign personal holding company in the future.

PASSIVE FOREIGN INVESTMENT COMPANY

We believe that our subordinate voting shares should not currently be treated as stock of a passive foreign investment company for United States federal income tax purposes, but this conclusion is a factual determination made annually and thus may be subject to change based on future operations and composition and valuation of our assets. In general, we will be a passive foreign investment company with respect to a U.S. Holder if, for any taxable year in which the U.S. Holder holds our subordinate voting shares, either:

- o at least 75% of our gross income for the taxable year is passive income; or
- o at least 50% of the average value of our assets is attributable to assets that produce or are held for the production of passive income.

For this purpose, passive income includes income such as:

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

- o dividends;
- o interest;
- o rents or royalties, other than certain rents or royalties derived from the active conduct of trade or business;
- o annuities; or
- o gains from assets that produce passive income.

If a foreign corporation owns at least 25% by value of the stock of another corporation, the foreign corporation is treated for purposes of the passive foreign investment company tests as owning its proportionate share of the assets of the other corporation and as receiving directly its proportionate share of the other corporation's income.

If we are treated as a passive foreign investment company, a U.S. Holder that did not make a qualified electing fund election or, if available, a mark-to-market election, as described below, would be subject to special rules with respect to:

- o any gain realized on the sale or other disposition of subordinate voting shares; and
- o any "excess distribution" by us to the U.S. Holder.

Generally, "excess distributions" are any distributions to the U.S. Holder in respect of the subordinate voting shares during a single taxable year that are greater than 125% of the average annual distributions received by the U.S. Holder in respect of the subordinate voting shares during the three preceding taxable years or, if shorter, the U.S. Holder's holding period for the subordinate voting shares.

85

Under the passive foreign investment company rules,

- o the gain or excess distribution would be allocated ratably over the U.S. Holder's holding period for the subordinate voting shares;
- o the amount allocated to the taxable year in which the gain or excess distribution was realized would be taxable as ordinary income;
- o the amount allocated to each prior year, with certain exceptions, would be subject to tax at the highest tax rate in effect for that year; and
- o the interest charge generally applicable to underpayments of tax would be imposed in respect of the tax attributable to each such year.

A U.S. Holder owning actually or constructively "marketable stock" of a passive foreign investment company may be able to avoid the imposition of the passive foreign investment company tax rules described above by making a mark-to-market election. Generally, pursuant to this election, such holder would include in ordinary income, for each taxable year during which such stock is held, an amount equal to the increase in value of the stock, which increase will

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

be determined by reference to the value of such stock at the end of the current taxable year compared with their value as of the end of the prior taxable year. Holders desiring to make the mark-to-market election should consult their tax advisors with respect to the application and effect of making such election.

In the case of a U.S. Holder who does not make a mark-to-market election, the special passive foreign investment company tax rules described above will not apply to such U.S. Holder if the U.S. Holder makes an election to have us treated as a qualified electing fund and we provide certain required information to holders. For a U.S. Holder to make a qualified electing fund election, we would have to satisfy certain reporting requirements. We have not determined whether we will undertake the necessary measures to be able to satisfy such requirements in the event that we were treated as a passive foreign investment company.

A U.S. Holder that makes a qualified electing fund election will be currently taxable on its pro rata share of our ordinary earnings and net capital gain, at ordinary income and capital gains rates, respectively, for each of our taxable years, regardless of whether or not distributions were received. The U.S. Holder's basis in the subordinate voting shares will be increased to reflect taxed but undistributed income. Distributions of income that had previously been taxed will result in a corresponding reduction of basis in the subordinate voting shares and will not be taxed again as a distribution to the U.S. Holder. U.S. Holders desiring to make a qualified electing fund election should consult their tax advisors with respect to the advisability of making such election.

UNITED STATES BACKUP WITHHOLDING AND INFORMATION REPORTING

A U.S. Holder will generally be subject to information reporting with respect to dividends paid on, or proceeds of the sale or other disposition of, our subordinate voting shares, unless the U.S. Holder is a corporation or comes within certain other categories of exempt recipients. A U.S. Holder that is not an exempt recipient will generally be subject to backup withholding with respect to the proceeds from the sale or the disposition of, or with respect to dividends on, subordinate voting shares unless the U.S. Holder provides a taxpayer identification number and otherwise complies with applicable requirements of the backup withholding rules. Any amount withheld under these rules will be creditable against the U.S. Holder's U.S. federal income tax liability or refundable to the extent that it exceeds such liability. A U.S. Holder who does not

86

provide a correct taxpayer identification number may be subject to penalties imposed by the United States Internal Revenue Service.

Non-U.S. Holders will generally be subject to information reporting and possible backup withholding with respect to the proceeds of the sale or other disposition of subordinate voting shares effected within the United States, unless the holder certifies to its foreign status or otherwise establishes an exemption if the broker does not have actual knowledge that the holder is a U.S. holder. Payments of dividends on or proceeds from the sale of subordinate voting shares within the United States by a payor within the United States to a non-exempt U.S. or Non-U.S. Holder will be subject to backup withholding if such holder fails to provide appropriate certification. In the case of such payments by a payor within the United States to a foreign partnership other than a foreign partnership that qualifies as a "withholding foreign partnership" within the meaning of such Treasury regulations, the partners of such partnership will be required to provide the certification discussed above in order to establish

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

an exemption from backup withholding tax and information reporting requirements.

CANADIAN FEDERAL INCOME TAX CONSIDERATIONS

The following is a summary of the material Canadian federal income tax considerations generally applicable to a U.S. person who holds subordinate voting shares and who, for the purposes of the INCOME TAX ACT (Canada), or the ITA, and the CANADA-UNITED STATES INCOME TAX CONVENTION (1980), or the Convention, as applicable and at all relevant times:

- o is resident in the United States and not resident in Canada,
- o holds the subordinate voting shares as capital property,
- o does not have a "permanent establishment" or "fixed base" in Canada, as defined in the Convention; and
- o deals at arm's length with us. Special rules, which are not discussed below, may apply to "financial institutions", as defined in the ITA, and to non-resident insurers carrying on an insurance business in Canada and elsewhere.

This discussion is based on the current provisions of the ITA and the Convention and on the regulations promulgated under the ITA, all specific proposals to amend the ITA or the regulations promulgated under the ITA announced by or on behalf of the Canadian Minister of Finance prior to the date of this annual report and the current published administrative practices of the Canada Customs and Revenue Agency, or the Agency. It does not otherwise take into account or anticipate any changes in law or administrative practice nor any income tax laws or considerations of any province or territory of Canada or any jurisdiction other than Canada, which may differ from the Canadian federal income tax consequences described in this document.

Under the ITA and the Convention, dividends paid or credited, or deemed to be paid or credited, on the subordinate voting shares to a U.S. person who owns less than 10% of the voting shares will be subject to Canadian withholding tax at the rate of 15% of the gross amount of those dividends or deemed dividends. If a U.S. person is a corporation and owns 10% or more of the voting shares, the rate is reduced from 15% to 5%. As described above and subject to specified limitations, a U.S. person may be entitled to credit against U.S. federal income tax liability for the amount of tax withheld by Canada.

87

Under the Convention, dividends paid to specified religious, scientific, charitable and similar tax exempt organizations and specified organizations that are resident and exempt from tax in the United States and that have complied with specified administrative procedures are exempt from this Canadian withholding tax.

A capital gain realized by a U.S. person on a disposition or deemed disposition of the subordinate voting shares will not be subject to tax under the ITA unless the subordinate voting shares constitute taxable Canadian property within the meaning of the ITA at the time of the disposition or deemed disposition. In general, the subordinate voting shares will not be "taxable Canadian property" to a U.S. person if they are listed on a prescribed stock exchange, which includes The Toronto Stock Exchange, unless, at any time within the five-year period immediately preceding the dispositions, the U.S. person, persons with whom the U.S. person did not deal at arm's length, or the U.S. person together with those persons, owned or had an interest in or a right to

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

acquire more than 25% of any class or series of our shares.

If the subordinate voting shares are taxable Canadian property to a U.S. person, any capital gain realized on a disposition or deemed disposition of those subordinate voting shares will generally be exempt from tax under the ITA by virtue of the Convention if the value of the subordinate voting shares at the time of the disposition or deemed disposition is not derived principally from real property, as defined by the Convention, situated in Canada. The determination as to whether Canadian tax would be applicable on a disposition or deemed disposition of the subordinate voting shares must be made at the time of the disposition or deemed disposition.

HOLDERS OF SUBORDINATE VOTING SHARES ARE URGED TO CONSULT THEIR OWN TAX ADVISORS TO DETERMINE THE PARTICULAR TAX CONSEQUENCES TO THEM, INCLUDING THE APPLICATION AND EFFECT OF ANY STATE, LOCAL OR FOREIGN INCOME AND OTHER TAX LAWS, OF THE ACQUISITION, OWNERSHIP AND DISPOSITION OF SUBORDINATE VOTING SHARES.

H. DOCUMENTS ON DISPLAY

Any statement in this annual report about any of our contracts or other documents is not necessarily complete. If the contract or document is filed as an exhibit to the registration statement, the contract or document is deemed to modify the description contained in this annual report. You must review the exhibits themselves for a complete description of the contract or document.

You may review a copy of our filings with the SEC, including exhibits and schedules filed with it, at the SEC's public reference facilities in Room 1024, Judiciary Plaza, 450 Fifth Street, N.W., Washington, D.C. 20549 and at the regional offices of the SEC located at 233 Broadway, New York, New York 10279 and at the Northwestern Atrium Center, 500 West Madison Street, Suite 1400, Chicago, Illinois 60661. You may also obtain copies of such materials from the Public Reference Section of the SEC, Room 1024, Judiciary Plaza, 450 Fifth Street, N.W.,

88

Washington, D.C. 20549, at prescribed rates. You may call the SEC at 1-800-SEC-0330 for further information on the public reference rooms. The SEC maintains a Web site ([HTTP://WWW.SEC.GOV](http://www.sec.gov)) that contains reports, proxy and information statements and other information regarding registrants that file electronically with the SEC. Although we make many of our filings with the SEC electronically as a foreign private issuer, we are not obligated to do so.

You may read and copy any reports, statements or other information that we file with the SEC at the addresses indicated above and you may also access them electronically at the Web site set forth above. These SEC filings are also available to the public from commercial document retrieval services.

WE ARE REQUIRED TO FILE REPORTS AND OTHER INFORMATION WITH THE SEC UNDER THE SECURITIES EXCHANGE ACT OF 1934. REPORTS AND OTHER INFORMATION FILED BY US WITH THE SEC MAY BE INSPECTED AND COPIED AT THE SEC'S PUBLIC REFERENCE FACILITIES DESCRIBED ABOVE. AS A FOREIGN PRIVATE ISSUER, WE ARE EXEMPT FROM THE

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

RULES UNDER THE EXCHANGE ACT PRESCRIBING THE FURNISHING AND CONTENT OF PROXY STATEMENTS AND OUR OFFICERS, DIRECTORS AND PRINCIPAL SHAREHOLDERS ARE EXEMPT FROM THE REPORTING AND SHORT-SWING PROFIT RECOVERY PROVISIONS CONTAINED IN SECTION 16 OF THE EXCHANGE ACT. UNDER THE EXCHANGE ACT, AS A FOREIGN PRIVATE ISSUER, WE ARE NOT REQUIRED TO PUBLISH FINANCIAL STATEMENTS AS FREQUENTLY OR AS PROMPTLY AS UNITED STATES COMPANIES.

I. SUBSIDIARY INFORMATION

See Item 4.C. of this annual report.

89

Item 11. QUALITATIVE AND QUANTITATIVE DISCLOSURES ABOUT MARKET RISK

MARKET RISK

CURRENCY RISK

We are exposed to currency risk as a result of the export of our products manufactured in Canada, substantially all of which are denominated in US dollars. Our exposure to foreign exchange rate fluctuations is partially hedged by operating expenses of certain international subsidiaries and the purchase of raw materials in US dollars. In addition, we frequently enter into forward exchange contracts to sell US dollars at fixed forward rates in exchange for Canadian dollars. We enter into such contracts to manage the risk of exchange rate fluctuations between the Canadian and US dollars on cash flows related to anticipated future revenue streams denominated in US dollars. We do not enter into forward exchange contracts for trading purposes.

The following table summarizes the forward exchange contracts in effect as at August 31, 2002, classified by expected transaction dates, none of which exceed two years, as well as the notional amounts of such contracts (in thousands of US dollars) along with the weighted average contractual forward rates under such contracts. The notional amounts of such contracts are used to calculate the contractual payments to be made under these contracts.

	YEARS ENDING AUGUST 31,	
	2003	2004
	----	----
Forward exchange contracts to sell US dollars in exchange for Canadian dollars		
Contractual amounts.....	\$ 6,400	\$ 2,200
Weighted average contractual exchange rates.....	1.5464	1.5679

FAIR VALUE

The fair value of these contracts as at August 31, 2002, based on the prevailing exchange rate at that date of \$1.00 = CA\$1.5589, amounted to CA\$13,406,540 compared to a contractual value of CA\$13,346,340, resulting in a deferred unrealized loss of CA\$60,200 (approximately \$39,000).

INTEREST RATE RISK

We are exposed to the impact of interest rate changes and changes in the market values of our available-for-sale securities. We do not use derivative financial instruments for our available-for-sale securities. Our available-for-sale securities consist of debt instruments issued by high-credit quality corporations. The debt instruments bear interest at fixed rate and may have their

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

fair market value adversely impacted due to a rise in interest rate. However, due to their very short-term maturity, we consider this risk to be insignificant.

ITEM 15. CONTROLS AND PROCEDURES

Prior to the adoption of the SARBANES-OXLEY ACT OF 2002, we maintained formal and informal procedures that were designed to ensure that we comply with disclosure obligations and that there is a flow of important information to the appropriate collection and disclosure points in a timely manner.

The evaluation of our disclosure controls and procedures, which occurred on December 20, 2002, was supervised and reviewed by our senior management. In doing so, they considered the controls and procedures that we have implemented, and evaluated the existence of any material weaknesses or deficiencies that would significantly and adversely affect our ability to collect, process or disclose required information on a timely basis, all in the context of our relatively small size (805 employees as of December 31, 2002), and the hands-on role that is played by our chief executive officer and our chief financial officer in our day-to-day operations. As a result, our chief executive officer and our chief financial officer have concluded that the procedures and controls that we have implemented ensure timely collection and evaluation of information potentially subject to disclosure under applicable securities laws, and that such procedures and controls capture information that is relevant to an assessment of the need to disclose developments and risks that pertain to our business.

Finally, we confirm that there were no significant changes in our internal controls or in other factors that would significantly affect these controls subsequent to the date of their evaluation.

The registrant hereby certifies that it meets all of the requirements for filing on Form 20 -F and that it has duly caused and authorized the undersigned to sign this annual report on its behalf.

EXFO ELECTRO-OPTICAL ENGINEERING INC.

By: /s/ Germain Lamonde

Name: Germain Lamonde
Title: Chairman of the Board, President
and Chief Executive Officer

Date: January 15, 2003.

CERTIFICATIONS

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

I, Germain Lamonde, Chairman of the Board, President and Chief Executive Officer, certify that:

1. I have reviewed this annual report on Form 20-F of EXFO Electro-Optical Engineering Inc.

2. Based on my knowledge, this annual report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statement made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this annual report;

3. Based on my knowledge, the financial statements, and other financial information included in this annual report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this annual report;

4. The registrants' other certifying officers and I have responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and have:

a) Designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this annual report is being prepared;

b) Evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this annual report (the "Evaluation date"); and

c) Presented in this annual report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;

95

5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function);

a) All significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and

b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and

6. The registrant's other certifying officers and I have indicated in this annual report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

AUDITORS' REPORT

TO THE SHAREHOLDERS OF
EXFO ELECTRO-OPTICAL ENGINEERING INC.

We have audited the consolidated balance sheets of EXFO ELECTRO-OPTICAL ENGINEERING INC. as at August 31, 2001 and 2002 and the consolidated statements of earnings, retained earnings (deficit) contributed surplus and cash flows for the years in the three-year period ended August 31, 2002. These financial statements are the responsibility of the company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with Canadian generally accepted auditing standards and with auditing standards generally accepted in the United States. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the company as at August 31, 2001 and 2002 and the results of its operations and its cash flows for each of the years in the three-year period ended August 31, 2002 in accordance with Canadian generally accepted accounting principles. In addition, in our opinion, the financial report statement schedule on the variation in the allowance for doubtful accounts included in Form 20-F presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements.

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

The accompanying notes are an integral part of
these consolidated financial statements

F-5

EXFO ELECTRO-OPTICAL ENGINEERING INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,
except share and per share data and as otherwise noted)

1 INCORPORATION AND NATURE OF ACTIVITIES

The company, incorporated in 1985 under the Canada Business Corporations Act, designs, manufactures and markets a full line of fiber-optic test, measurement, monitoring and automation solutions for the global telecommunications industry. These solutions measure the physical-, optical- and protocol-layers of optical fiber and related hardware and help automate manufacturing processes. The company derives substantially all of its revenue from customers located in the United States, Canada, Europe and Asia. The company's customers consist primarily of telecommunications carriers, network service providers, optical component and system manufacturers, as well as research and development laboratories.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

BASIS OF PRESENTATION

These consolidated financial statements have been prepared in accordance with generally accepted accounting principles in Canada. These principles conform, in all material respects, with accounting principles generally accepted in the United States, except for the differences and additional disclosures provided in note 19. The principal accounting policies of the company, which have been consistently applied, are summarized as follows:

ACCOUNTING ESTIMATES

The preparation of financial statements in accordance with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting years. Actual results could differ from those estimates.

CONSOLIDATION

These consolidated financial statements include the accounts of the company and its domestic and international subsidiaries. Intercompany accounts and transactions have been eliminated.

REPORTING CURRENCY

The functional currency of the company is the Canadian dollar. However, the company has adopted the US dollar as its reporting currency. The financial statements are translated into the reporting currency using the current rate method. Under this method, the financial statements are translated into the reporting currency as follows: assets and liabilities are translated at the

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

exchange rate in effect at the date of the balance sheet and revenues and expenses are translated at the monthly average exchange rates. All gains and losses resulting from the translation of the financial statements into the reporting currency are included in the cumulative translation adjustment in shareholders' equity.

In the event that management decides to declare dividends, such dividends would be declared in Canadian dollars.

F-6

EXFO ELECTRO-OPTICAL ENGINEERING INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,
except share and per share data and as otherwise noted)

FOREIGN CURRENCY TRANSLATION

FOREIGN CURRENCY TRANSACTIONS

Transactions denominated in currencies other than the functional currency are translated into the functional currency as follows: monetary assets and liabilities are translated at the exchange rate in effect at the balance sheet date and revenues and expenses are translated at the exchange rate in effect on the date of the transaction. Non-monetary assets and liabilities are translated at historical rates. Gains and losses arising from such translation are reflected in the statements of earnings.

FOREIGN SUBSIDIARIES

The financial statements of integrated foreign operations are remeasured into the functional currency using the temporal method. Under this method, monetary assets and liabilities are remeasured at the exchange rate in effect at the balance sheet date. Non-monetary assets and liabilities are remeasured at historical rates. Revenues and expenses are remeasured at the monthly average exchange rates. Gains and losses resulting from remeasurement are reflected in the statements of earnings.

FORWARD EXCHANGE CONTRACTS

The company enters into forward exchange contracts in order to hedge against potential exchange rate fluctuations on cash flows related to anticipated future revenue streams denominated in foreign currencies. Unrealized gains and losses on these forward exchange contracts are deferred and recognized upon settlement of the related transactions. Accordingly, cash flows resulting from forward exchange contract settlements are classified as cash flows from operating activities along with the corresponding cash flows being hedged.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents consist of cash on hand and balances with banks and highly liquid short-term investments with original maturities of three months or less.

SHORT-TERM INVESTMENTS

Short-term investments are valued at the lower of cost and market value. Cost is composed of acquisition cost plus amortization of discount or less amortization

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

of premium.

INVENTORIES

Inventories are valued at the lower of cost and net realizable value. The cost of raw materials and work in progress is determined using the first-in, first-out method. The cost of finished goods is determined using the average cost method.

F-7

EXFO ELECTRO-OPTICAL ENGINEERING INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,
except share and per share data and as otherwise noted)

PROPERTY, PLANT AND EQUIPMENT AND AMORTIZATION

Property, plant and equipment are recorded at cost less related government grants and research and development tax credits. Amortization is provided on a straight-line basis over their estimated useful lives as follows:

	TERM
Buildings	15 and 25 years
Equipment	2 to 10 years
Leasehold improvements	Remaining lease term

The carrying value of property, plant and equipment is evaluated for impairment whenever significant events or circumstances occur which may indicate an impairment in value, based upon a comparison of the carrying value to the net recoverable amount.

INTANGIBLE ASSETS, GOODWILL AND AMORTIZATION

Intangible assets include the cost of acquired in-process research and development, core technology, workforce and trademark, net of accumulated amortization. Core technology represents the existing technology acquired in business combinations that has reached technological feasibility while acquired in-process research and development represents the existing technology that has not reached technological feasibility and has no future alternative use. Intangible assets are amortized on a straight-line basis over their estimated useful lives ranging from five to ten months for in-process research and development, five years for core technology, one year for workforce and two years for trademark.

Goodwill represents the excess of the purchase price of acquired businesses over the estimated fair value of net identifiable assets acquired. Goodwill related to business combinations with a date of acquisition prior to July 1, 2001, is amortized on a straight-line basis over the estimated useful life of five years until August 31, 2002. Goodwill related to business combinations with a date of acquisition after June 30, 2001, is not amortized but is reviewed for impairment.

Intangible assets and goodwill are reviewed for impairment when events or circumstances indicate that costs may not be recoverable. Impairment exists when the carrying value of the asset is greater than the pre-tax undiscounted future cash flows expected to be provided by the asset. The amount of impairment loss, if any, is the excess of the carrying value over the estimated pre-tax

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

undiscounted future cash flows. Intangible assets and goodwill are written down for any permanent impairment in value of the unamortized portion.

REVENUE RECOGNITION

For products in which software is incidental, the company recognizes revenue when persuasive evidence of an arrangement exists, the product has been delivered, the price is fixed and determinable and collection of the resulting receivable is reasonably assured. In addition, provisions are made for estimated returns, warranties and support obligations.

For products in which software is not incidental, revenues are separated into two categories: product and customer support revenues, based upon vendor-specific objective evidence of fair value. Product revenues for these sales are recognized as described above. Customer support revenues are deferred and recognized ratably over the years of the support arrangement. Except when

F-8

EXFO ELECTRO-OPTICAL ENGINEERING INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,
except share and per share data and as otherwise noted)

provided within one year of delivery, costs of providing this support are insignificant and accrued at the time of delivery and no software upgrades are provided.

For all sales, the company uses a binding purchase order as evidence that a sales arrangement exists.

Delivery generally occurs when the product is shipped to a common carrier.

At the time of the transaction, the company assesses whether the price associated with its revenue transactions is fixed and determinable and whether or not collection is reasonably assured. The company assesses whether the price is fixed and determinable based on the payment terms associated with the transaction. The company assesses collection based on a number of factors, including past transaction history and the creditworthiness of the customer. Generally, collateral or other security is not requested from customers.

Most sales arrangements do not generally include acceptance clauses. However, if a sales arrangement includes an acceptance provision, acceptance occurs upon the earliest receipt of a written customer acceptance or expiration of the acceptance period. For these sales arrangements, the sale is recognized when acceptance occurs.

ADVERTISING COSTS

Advertising costs are expensed as incurred.

GOVERNMENT GRANTS

Government grants are accrued as a receivable when there is reasonable assurance that the company has complied and will continue to comply with all the conditions related to the grant. Grants related to operating expenses are included in earnings when the related expenses are incurred. Grants related to capital expenditures are deducted from the related assets. Grants related to job creation and training programs for extended periods are deferred and amortized

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

on a straight-line basis over the minimum period for which the created job must be maintained or training provided.

RESEARCH AND DEVELOPMENT EXPENSES

All expenses related to development activities, which do not meet generally accepted criteria for deferral, and research, are expensed as incurred, net of related tax credits and government grants. Development expenses which meet generally accepted criteria for deferral are capitalized, net of related tax credits and government grants, and amortized against earnings over the estimated period of benefit.

As at August 31, 2002, the company had not deferred any development costs.

INCOME TAXES

The company provides for income taxes using the liability method of tax allocation. Under this method, future income tax assets and liabilities are determined based on deductible or taxable temporary differences between financial statement values and tax values of assets and liabilities using enacted income tax rates for the years in which the differences are expected to reverse.

F-9

EXFO ELECTRO-OPTICAL ENGINEERING INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,
except share and per share data and as otherwise noted)

The company establishes a valuation allowance against future income tax assets if, based on available information, it is more likely than not that some or all of the future income tax assets will not be realized.

EARNINGS (LOSS) PER SHARE

Basic earnings (loss) and dividends per share are determined using the weighted average number of common shares outstanding during the year.

Diluted earnings per share are determined using the weighted average number of common shares outstanding during the year, plus the effects of dilutive potential common shares outstanding during the year. This method requires that diluted earnings per share be calculated, using the treasury stock method, as if all dilutive potential common shares had been exercised at the later of the beginning of the year or the date of issuance, as the case may be, and that the funds obtained thereby be used to purchase common shares of the company at the average fair value of the common shares during the year.

STOCK-BASED COMPENSATION PLANS

The company maintains stock-based compensation plans, which are described in note 13. Under accounting principles generally accepted in Canada, no compensation cost is recognized when stocks, stock options or stock awards are issued to plan participants. Any consideration received from plan participants upon the purchase of stock or the exercise of stock options or stock awards is credited to share capital. The costs related to the stock appreciation rights are accrued and charged to earnings.

NEW ACCOUNTING STANDARDS

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

In November 2001, The Canadian Institute of Chartered Accountants (CICA) revised section 1650, "Foreign Currency Translation", which is effective for fiscal years beginning on or after January 1, 2002. The revised standard, which the company will adopt retroactively on September 1, 2002, no longer permits the deferral and amortization of unrealized exchange gains and losses that arise on the translation of long-term foreign currency denominated monetary assets and liabilities. Under the new rules, such gains and losses must be reported in earnings as they arise. Adopting this revised standard will not have a significant impact on the company's financial statements since the company currently has no such long-term monetary items.

In November 2001, the CICA issued Accounting Guideline No. 13, "Hedging Relationships", which shall be applied to hedging relationships in effect in fiscal years beginning on or after July 1, 2003. This new accounting guideline, which the company will adopt prospectively on September 1, 2003, establishes basic criteria that must be met before hedge accounting can be used. It also describes the types of exposures that can be hedged and the types of instruments that qualify as hedges, sets detailed designation and documentation requirements and requires formal effectiveness testing. The company has not yet assessed the impact of the adoption of this new guideline.

In November 2001, the CICA issued section 3870, "Stock-Based Compensation and Other Stock-Based Payments", which is effective for fiscal years beginning on or after January 1, 2002. The new section applies to awards granted on or after the date of adoption, and requires that stock-based payments to non-employees and direct awards of stock to employees be accounted for using a fair

F-10

EXFO ELECTRO-OPTICAL ENGINEERING INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,
except share and per share data and as otherwise noted)

value-based method. The new section also encourages, but does not require, the use of a fair value-based method to account for stock-based compensation costs arising from awards to employees. The new section requires pro forma disclosures with respect to net earnings and net earnings per share if a fair value-based method of accounting is not adopted for awards granted to employees. The company will adopt this new standard prospectively on September 1, 2002. The company will not account for the stock-based compensation costs arising from awards to employees. However, it will provide the required pro forma disclosures with respect to net earnings and net earnings per share. Consequently, the adoption of this new standard will not have a significant impact on the company's financial results.

In August 2001, the CICA issued section 1581 "Business Combinations" and section 3062 "Goodwill and Other Intangible Assets". Section 1581 requires business combinations initiated after June 30, 2001 or business combinations accounted for by the purchase method with a date of acquisition after June 30, 2001, to be accounted for using the purchase method of accounting. This section also broadens criteria for recording intangible assets separately from goodwill. Upon the adoption of section 3062, recorded goodwill and intangible assets will be evaluated against those new criteria and may result in certain intangible assets being reclassified into goodwill or, alternatively, amounts initially recorded as goodwill being separately identified and recognized apart from goodwill as intangible assets. Section 3062 requires the use of a non-amortization approach to account for purchased goodwill and indefinite-lived intangibles.

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

Under the transitional provisions of section 3062, the company did not amortize the goodwill resulting from the acquisition of EXFO Protocol Inc., for which the acquisition date was November 2, 2001.

The company adopted section 3062 prospectively from September 1, 2002. Upon the adoption of this new section, goodwill recorded prior to July 1, 2001, is no longer subject to amortization. Also, under the transitional provisions of the section, the company performed an initial impairment test to identify goodwill impairment using a fair value-based method. Under the new section, a goodwill impairment exists when the carrying value of a reporting unit exceeds its fair value. For the purposes of the impairment test, the company allocated its existing goodwill to its reporting units and completed an evaluation of the fair value of such reporting units. Based on the comparison of the fair value of the reporting units to their carrying value, goodwill of the reporting units was not considered impaired.

Goodwill will also be tested for impairment on an annual basis or more frequently if events or circumstances occur that more likely than not reduce the fair value of a reporting unit below its carrying value. Any impairment loss arising from this test will be charged to earnings in the period in which it is incurred.

3 BUSINESS COMBINATIONS

The company made a number of business combinations in 2000, 2001 and 2002. The fair value allocated to intangible assets acquired was based upon independent valuations performed in conjunction with the business combinations. Also, acquired goodwill is not deductible for income tax purposes.

F-11

EXFO ELECTRO-OPTICAL ENGINEERING INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,
except share and per share data and as otherwise noted)

BUSINESS COMBINATION DURING 2002

AVANTAS NETWORKS CORPORATION (RENAMED EXFO PROTOCOL INC.)

On November 2, 2001, the company acquired a 100% interest in EXFO Protocol Inc. ("EXFO Protocol"), a Canadian company specializing in fiber-optic protocol testing, in exchange for a total consideration valued at \$94,952,000 or \$69,381,000 net of \$25,571,000 of cash and cash equivalents acquired. The total consideration includes acquisition-related costs of \$1,272,000.

The consideration paid consisted of \$9,756,000 in cash, net of cash and cash equivalents acquired of \$25,571,000 and the issuance of 4,374,573 subordinate voting shares valued at \$59,625,000. The fair value of the subordinate voting shares issued was determined based on the market price of the shares beginning three days before and ending three days after the terms of the acquisition were agreed upon and announced, being August 20, 2001.

This acquisition has been accounted for using the purchase method and, consequently, the results of operations of EXFO Protocol have been included in the consolidated statement of earnings of the company since November 2, 2001,

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

being the date of acquisition.

The purchase price, including acquisition-related costs, has been allocated based on the estimated fair value of net assets at the date of acquisition as follows:

Assets acquired	
Current assets	\$ 6,040
Property, plant and equipment	2,003
In-process research and development	1,400
Core technology	5,050
Future income tax assets	476
Current liabilities assumed	(3,575)

Net identifiable assets acquired	11,394
Goodwill (note 4)	57,987

Purchase price	69,381
Less: Subordinate voting shares issued	59,625

Cash paid, net of cash and cash equivalents acquired	\$ 9,756
	=====

BUSINESS COMBINATIONS DURING 2001

BURLEIGH INSTRUMENTS, INC. (RENAMED EXFO BURLEIGH PRODUCTS GROUP INC.)

On December 20, 2000, the company acquired a 100% interest in EXFO Burleigh Products Group Inc. ("EXFO Burleigh"), a U.S. company which manufactures precision scientific instruments used in basic and applied research, engineering and production test applications in a variety of fields, in exchange for a total consideration valued at \$189,270,000, including acquisition-related costs of \$2,461,000.

F-12

EXFO ELECTRO-OPTICAL ENGINEERING INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,
except share and per share data and as otherwise noted)

The consideration paid consisted of \$42,461,000 in cash and the issuance of 6,488,816 subordinate voting shares valued at \$146,809,000.

Furthermore, as part of this acquisition, the company established a restricted stock award plan for employees of EXFO Burleigh (note 13). This plan provides that in the event of an employee's departure, shares to be issued to this employee under the plan will be issued to EXFO Burleigh's former shareholders. In such circumstances, this issuance of shares will be recorded as additional goodwill.

EFOS INC. (RENAMED EXFO PHOTONIC SOLUTIONS INC.)

On March 15, 2001, the company acquired a 100% interest in EXFO Photonic

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

Solutions Inc. ("EXFO Photonic Solutions"), a Canadian company specializing in precision light-based adhesive spot-curing technologies as well as curing process control for the global optical component manufacturing market. This acquisition was settled for a total consideration valued at \$110,146,000, including acquisition-related costs of \$194,000. The consideration paid consisted of \$25,194,000 in cash and the issuance of 3,700,000 subordinate voting shares valued at \$84,952,000.

These two acquisitions have been accounted for using the purchase method and, consequently, the net earnings of EXFO Burleigh and EXFO Photonic Solutions have been included in the consolidated statement of earnings of the company from the date of acquisition of these subsidiaries, being December 20, 2000, for EXFO Burleigh and March 15, 2001, for EXFO Photonic Solutions.

The fair value of subordinate voting shares issued as part of these business combinations was determined based on the market price of the shares beginning three days before and ending three days after the dates of acquisition of the subsidiaries.

The purchase price, including acquisition-related costs, has been allocated based on the estimated fair value of net assets at the dates of acquisition as follows:

	EXFO BURLEIGH	EXFO PHOTONIC SOLUTIONS
	-----	-----
Assets acquired		
Current assets	\$ 7,092	\$ 9,195
Property, plant and equipment	4,457	1,054

	=====	=====

F-13

EXFO ELECTRO-OPTICAL ENGINEERING INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,
except share and per share data and as otherwise noted)

VANGUARD TECHNICAL SOLUTIONS, INC.

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

On March 16, 2001, the company, through one of its subsidiaries, Burleigh Automation Inc., acquired substantially all the assets of Vanguard Technical Solutions, Inc., a U.S. company specializing in the design and manufacturing of ultra-precision assembly equipment for sensitive process and critical assembly challenges on the production floor. This acquisition, which was settled for a total cash consideration of \$600,000 allocated to property and equipment, has been accounted for using the purchase method.

BUSINESS COMBINATIONS DURING 2000

NORTECH FIBRONIC INC.

On February 4, 2000, the company acquired a 100% interest in Nortech Fibronic Inc. ("Nortech"), a Canadian company specializing in fiber-optic testing and temperature sensing, in exchange for total consideration valued at \$2,799,000. The consideration paid consisted of \$2,108,000 in cash, the issuance of 800,000 Class G shares which, were mandatorily redeemable, for cash or subordinate voting shares at the option of the company, for an amount of \$553,000, and a non-interest-bearing debenture in the amount of \$138,000, repaid in 2001.

This acquisition has been accounted for using the purchase method. The estimated fair value of assets and liabilities acquired amounted to \$2,488,000 and \$2,231,000, respectively, resulting in goodwill of \$2,542,000 related to the telecommunication core business.

The net earnings of Nortech have been included in the consolidated statement of earnings of the company from the date of acquisition, being February 4, 2000.

The mandatorily redeemable preferred shares were settled in 2001 for \$354,000, resulting in a purchase price adjustment of \$189,000, which has been applied against goodwill.

GAP OPTIQUE S.A.

On June 1, 2000, the company acquired the 85% interest in GAP Optique S.A. held by its parent company for a cash consideration of \$16,000. The carrying value of the net assets of GAP Optique S.A. was \$19,000 as at December 31, 1999. Since the exchange occurred between entities under common control, the exchange has been accounted for in a manner similar to a pooling of interests. The assets, liabilities and shareholders' equity of the company and GAP Optique S.A. have been combined using their respective carrying amounts, and financial statements of prior years have been restated as if the companies had always been combined.

4 SPECIAL CHARGES

WRITE-DOWN OF GOODWILL AND INTANGIBLE ASSETS

In May 2002, as part of its review of financial results, the company performed an assessment of the carrying value of goodwill and intangible assets recorded in conjunction with the acquisitions of EXFO Burleigh, EXFO Photonic Solutions and EXFO Protocol. The assessment was performed because of the severe and continued downturn in the telecommunications industry, the persisting

F-14

EXFO ELECTRO-OPTICAL ENGINEERING INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

except share and per share data and as otherwise noted)

unfavorable market conditions affecting the subsidiaries' industries and the decline in technology valuations. The growth prospects for those subsidiaries were significantly lower than previously expected and less than those of historical periods and the decline in market conditions affecting the subsidiaries is significant and other than temporary. As a result, the company concluded that the carrying value of goodwill and certain acquired intangible assets was impaired and it recorded a charge of \$222,169,000 to write down a significant portion of goodwill and a pre-tax charge of \$23,657,000 to write down a significant portion of acquired core technology. Of the total impairment loss of \$245,826,000, \$125,017,000 relates to EXFO Burleigh, \$71,508,000 relates to EXFO Photonic Solutions and \$49,301,000 relates to EXFO Protocol.

The impairment loss was calculated as the excess of the carrying value of the assets over the pre-tax undiscounted future cash flows. The pre-tax undiscounted future cash flows were estimated at the subsidiaries' level since the company had distinct cash flows for each of them and because they are not fully integrated into the company's activities. The cash flow periods used ranged from three to five years, using annual growth rates between 15% and 30%.

The assumptions supporting the estimated undiscounted future cash flows, including the annual growth rates, reflect management's best estimates.

RESTRUCTURING AND OTHER CHARGES AND INVENTORY WRITE-OFFS

During 2001, the company implemented a structured plan to reduce costs and increase efficiency. Under that plan, the company recorded charges of \$3,288,000, including \$844,000 in severance expenses for the 245 employees who were terminated, \$1,476,000 for unused assets and \$968,000 for future payments on exited leased facilities. These charges have been included in the restructuring and other charges in the statement of earnings for the year ended August 31, 2001. As at August 31, 2002, the accrued liabilities related to this restructuring plan amounted to \$483,000 and consisted of future payments on exited leased facilities.

During 2002, the company incurred additional charges of \$21,343,000 to further reduce its costs. Under additional structured plans, the company recorded \$2,012,000 in severance expenses for the additional 350 employees who were terminated and \$868,000 for the write-off of property, plant and equipment. These charges are included in the restructuring and other charges in the statement of earnings for the year ended August 31, 2002. Also, the company recorded \$18,463,000 in inventory write-offs for excess and obsolete inventories, which are included in the cost of sales in the statement of earnings for the year ended August 31, 2002. As at August 31, 2002, the accrued liabilities related to the severance expenses incurred in 2002 amounted to \$299,000.

5 INVENTORIES

8 CREDIT FACILITIES

The company has available credit facilities under a line of credit which provide for advances of up to Cdn\$10,000,000 (US\$6,415,000). These facilities, which are renewable annually, bear interest at prime rate (prime rate in 2001). Short-term investments, accounts receivable, inventories and all tangible and intangible assets of the company have been pledged as collateral against these facilities. As at August 31, 2001 and 2002, these credit facilities were unused.

As at August 31, 2002, minimum principal repayments required in each of the next five years are \$100,000 in 2003, \$110,000 in 2004, \$122,000 in 2005, \$136,000 in 2006 and \$146,000 in 2007.

11 COMMITMENTS

The company has entered into operating leases for certain of its premises and equipment, which expire at various dates through May 2011. Minimum rentals payable under these operating leases amount to \$6,800,000 as at August 31, 2002.

F-17

EXFO ELECTRO-OPTICAL ENGINEERING INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,
except share and per share data and as otherwise noted)

For the years ended August 31, 2000, 2001 and 2002, rental expense amounted to \$579,000, \$1,580,000 and \$1,936,000, respectively, of which \$163,000, \$238,000 and \$234,000, respectively, were paid to a company owned by the President of the company.

12 CONTINGENCIES

On November 27, 2001, a class action suit was filed in the United States District Court for the Southern District of New York against the company, four of the underwriters of its Initial Public Offering and some of its executive officers pursuant to the Securities Exchange Act of 1934 and Rule 10b-5 promulgated thereunder and sections 11, 12 and 16 of the Securities Act of 1933. This class action alleges that the company's registration statement and prospectus filed with the Securities and Exchange Commission on June 29, 2000, contained material misrepresentations and/or omissions resulting from (i) the underwriters allegedly soliciting and receiving additional, excessive and undisclosed commissions from certain investors in exchange for which they allocated material portions of the shares issued in connection with the company's Initial Public Offering; and (ii) the underwriters allegedly entering into agreements with customers whereby shares issued in connection with the company's Initial Public Offering would be allocated to those customers in exchange for which customers agreed to purchase additional amounts of shares in the after market at pre-determined prices.

On April 19, 2002, the plaintiffs filed an amended complaint containing master allegations against all of the underwriters in all of the 310 cases included in this class action and, also filed an amended complaint containing allegations specific to four of the company's underwriters, the company and two of its executive officers. In addition to the allegations mentioned above, the amended complaint alleges that the underwriters (i) used their analysts to manipulate the stock market; and (ii) implemented schemes that allowed issuer insiders to sell their shares rapidly after an initial public offering and benefit from high

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

market prices. As concerns the company and its two executive officers in particular, the amended complaint alleges that (i) the company's registration statement was materially false and misleading because it failed to disclose the additional commissions and compensation to be received by underwriters; (ii) the two named executive officers learned of or recklessly disregarded the alleged misconduct of the underwriters; (iii) the two named executive officers had motive and opportunity to engage in alleged wrongful conduct due to personal holdings of the company's stock and the fact that an alleged artificially inflated stock price could be used as currency for acquisitions; and (iv) the two named executive officers, by virtue of their positions with the company, controlled the company and the contents of the registration statement and had the ability to prevent its issuance or cause it to be corrected. The plaintiffs in this suit seek an unspecified amount for damages suffered.

In July 2002, the issuers filed a motion to dismiss the plaintiffs' amended complaint.

Management believes that the company and its executive officers have fully complied with all applicable securities laws and that the claims against it and its officers are without merit. The company has referred this matter to its insurers and is vigorously defending its position in this litigation. However, at this time, it is not possible to predict the outcome of this case, nor determine the amount of possible losses. Accordingly, no provision for this case has been made in the consolidated financial statements as of August 31, 2002.

F-18

EXFO ELECTRO-OPTICAL ENGINEERING INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,
except share and per share data and as otherwise noted)

As at August 31, 2002, the company has outstanding letters of guarantee of Cdn\$741,000 (US\$475,000), which expire at various dates through 2011.

As at August 31, 2002, the company has guaranteed the repayment of third-party loans totalling Cdn\$214,000 (US\$137,000) detained by certain employees with respect to the purchase of Class F shares under the stock purchase plan (note 13).

13 SHARE CAPITAL

Authorized - unlimited as to number, without par value

Subordinate voting and participating, bearing a non-cumulative dividend to be determined by the Board of Directors, ranking pari passu with multiple voting shares

Multiple voting and participating, entitling to ten votes each, bearing a non-cumulative dividend to be determined by the Board of Directors, convertible at the holder's option into subordinate voting shares on a one-for-one basis, ranking pari passu with subordinate voting shares

Prior to June 29, 2000, the company's authorized share capital consisted of Class A, D and F shares.

On June 29, 2000, the company filed articles of amendment pursuant to which subordinate and multiple voting shares were created, the 38,000,000 issued and

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

outstanding Class A shares were converted into 38,000,000 multiple voting shares, the 707,264 issued and outstanding Class F shares were converted into 707,264 subordinate voting shares and the Class A, D and F shares were canceled.

The following tables summarize the share capital activity since August 31, 1999:

			=====	

STOCK PURCHASE PLAN

The company's stock purchase plan terminated at the time of the initial public offering, being June 29, 2000. In accordance with that plan, officers, directors and key employees could purchase Class F shares up to a maximum of 5% of all participating, issued and outstanding shares of the company. The purchase price of shares under that plan was determined as a multiple of the company's equity as at the end of the preceding fiscal year. Shares issued under that plan are restricted as to sale and transferability for a period of at least five years from the date of acquisition.

F-20

EXFO ELECTRO-OPTICAL ENGINEERING INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,
except share and per share data and as otherwise noted)

Prior to its initial public offering, the company issued 707,264 Class F shares in exchange for a weighted average cash consideration of Cdn\$0.98 (US\$0.67) per share.

STOCK OPTION PLAN

In May 2000, the company established a stock option plan for directors, executive officers, employees and consultants and those of the company's subsidiaries, as determined by the Board of Directors.

The maximum number of subordinate voting shares issuable under the plan cannot exceed 4,470,961 shares. The maximum number of subordinate voting shares that

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

may be granted to any individual cannot exceed 5% of the number of outstanding subordinate voting shares. The exercise price is the market price of the common shares on the date of grant. Options granted under the plan generally expire ten years from the date of grant. Options granted under the plan generally vest over a four-year period, with 25% vesting on an annual basis commencing on the first anniversary of the date of grant. Up to October 10, 2000, the number of options, which ultimately would become exercisable in any given year, and in aggregate, was dependent on the degree to which the company's financial performance objectives were met. Nevertheless, on October 10, 2000, the Board of Directors of the company amended the vesting terms for options granted pursuant to the option plan to remove the financial performance criterion. Accordingly, options granted vest over the four-year period. The Board of Directors may accelerate the vesting of any or all outstanding options upon the occurrence of a change of control.

The following table summarizes the stock option activity since May 2000:

	YEARS ENDED AUGUST 31,

RESTRICTED STOCK AWARD PLAN

On December 20, 2000, the company established a restricted stock award plan for employees of EXFO Burleigh. Each stock award entitles employees to receive one subordinate voting share at a purchase price of nil. Stock awards granted under the plan vest over a four-year period, with 25% vesting on an annual basis commencing on the first anniversary of the date of grant. According to the plan, upon the involuntary termination of a member of the defined management team, all outstanding restricted stock awards granted to such employees automatically vest. The plan will expire on December 20, 2004.

The following table summarizes the restricted stock award activity since December 2000:

	YEARS ENDED AUGUST 31,	
	2001	2002
	-----	-----
Outstanding - Beginning of year	-	359,781
Granted	359,781	-

STOCK APPRECIATION RIGHTS PLAN

On August 4, 2001, the company established a stock appreciation rights plan for certain of its employees. Under that plan, eligible employees are entitled to receive a cash amount equivalent to the difference between the market price of the common shares on the date of exercise and the exercise price determined on the date of grant. Stock appreciation rights granted under the plan generally expire ten years from the date of grant. Stock appreciation rights generally vest over a four-year period, with 25% vesting on an annual basis commencing on the first anniversary of the date of grant.

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

Considering the market price of the common shares of US\$2.13 as at August 31, 2002, no compensation expense has been recorded in 2002 under that plan.

The following table summarizes the stock appreciation rights activity since August 2001:

	YEARS ENDED AUGUST 31,			
	2001		2002	
	NUMBER	WEIGHTED AVERAGE EXERCISE PRICE	NUMBER	WEIGHTED AVERAGE EXERCISE PRICE

14 OTHER DISCLOSURES

NET RESEARCH AND DEVELOPMENT EXPENSES

Net research and development expenses comprise the following:

	YEARS ENDED AUGUST 31,		
	2000	2001	2002
Gross research and development expenses	\$ 9,374	\$ 17,601	\$ 17,000
Research and development tax credits	(2,436)	(3,369)	(3,800)
Government grants	(536)	(631)	(3,000)
	\$ 6,402	\$ 13,601	\$ 12,200

OTHER GRANTS AND TAX CREDITS

During 1998, the company entered into an agreement with the Quebec Minister of Industry, Commerce, Science and Technology (the "Minister"). Pursuant to this agreement, the Minister agreed to contribute, in the form of grants, up to a maximum of Cdn\$600,000 (US\$385,000) toward interest costs incurred over the period from January 1, 1998, through December 31, 2002. In addition, the Minister agreed to provide grants up to a maximum of Cdn\$2,220,000 (US\$1,424,000) over the period from January 1, 1998, through December 31, 2002, payable based on the number of full-time jobs created during the period.

The above grants are subject to the condition that the company maintains its Canadian principal place of business within the Province of Quebec until at least December 31, 2002 and that jobs created pursuant to the agreement be maintained for a period of at least five years from the date of creation. Should these conditions not be met by the company, the Minister may enforce various recourse options, which include suspension or cancellation of the agreement or requiring the repayment of amounts received by the company. During the period from January 1, 1998 to August 31, 2002, the company recognized a total of Cdn\$2,820,000 (US\$1,809,000) under this program, of which Cdn\$1,801,000 (US\$1,155,000) have been credited to earnings with the balance of Cdn\$1,019,000 (US\$654,000) having been included in deferred grants in the balance sheet.

Furthermore, in 1999, the company entered into another agreement with the Minister. Pursuant to this agreement, the Minister agreed to provide grants over the period from February 1998 to June 2002, payable based on the number of jobs created and certain specific training expenses related to such jobs. The above grant is subject to the condition that the new employees continue to participate in the specific training program for a period of at least ten consecutive months. Should this condition not be met by the company, the Minister may enforce various recourse, which include suspension or cancellation of the agreement or requiring the repayment of amounts received by the company. Since 1998, the company has recognized a total of Cdn\$2,965,000 (US\$1,902,000) under this program, which has been credited to earnings.

Should any repayments of amounts received pursuant to these agreements be required, such repayments will be charged to earnings as the amounts of any repayments become known.

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

EXFO ELECTRO-OPTICAL ENGINEERING INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,
except share and per share data and as otherwise noted)

Finally, since 2000, companies operating in the Quebec City area are eligible for a refundable tax credit granted by the Province of Quebec government. This credit is earned on the increase of production and marketing salaries incurred in the Quebec City area at a rate of 40%. Since 2000, the company has recognized a total of Cdn\$3,911,000 (US\$2,509,000) under this program, which has been credited to earnings.

The reduction in the company's work force described in note 4 had no effect on amounts already recognized in the statements of earnings under these programs.

Following is a summary of the classification of these and certain other grants and tax credits (government grants) in the statements of earnings.

Interest income for the years ended August 31, 2000, 2001 and 2002, is net of related government grants of \$196,000, \$15,000 and nil, respectively.

Cost of sales for the years ended August 31, 2000, 2001 and 2002, is net of government grants of \$915,000, \$1,742,000 and \$546,000, respectively.

Selling and administrative expenses for the years ended August 31, 2000, 2001 and 2002, are net of government grants of \$386,000, \$260,000 and \$213,000, respectively.

Research and development expenses for the years ended August 31, 2000, 2001 and 2002, are net of government grants of \$536,000, \$631,000 and \$333,000, respectively.

DEFINED CONTRIBUTION PLANS

The company maintains separate defined contribution plans for certain eligible employees. These plans, which are accounted for on an accrual basis, are summarized as follows:

- o Deferred profit-sharing plan

The company maintains a plan for certain eligible Canadian resident employees, under which the company may elect to contribute an amount equal to 1% of an employee's gross salary, provided that the employee has contributed at least 2% of gross salary to a tax-deferred registered retirement savings plan. Since June 2002, the company has suspended its contributions to the plan as part of its cost-reduction efforts. Contributions to this plan during the years ended August 31, 2000, 2001 and 2002, amounted to Cdn\$202,000 (US\$137,000), Cdn\$407,000 (US\$266,000) and Cdn\$136,000 (US\$88,000), respectively.

- o 401K plan

The company maintains a 401K plan for eligible U.S. resident employees. Under this plan, the company may elect to contribute an amount of up to 50% of the first 6% of an employee's current compensation, subject to certain legislated maximum contribution limits. During the years ended August 31, 2000, 2001 and 2002, the company recorded contributions totaling \$23,000, \$285,000 and \$317,000, respectively.

As at August 31, 2002, a company's subsidiary has accumulated losses for income tax purposes of approximately \$896,000 and research and development expenses of approximately \$955,000 at the provincial level for which a valuation allowance of \$359,000 has been established. These losses can be carried forward against the subsidiary's future years' taxable income until 2008. These accumulated research and development expenses can be carried forward indefinitely against the subsidiary's future years' provincial taxable income.

16 SEGMENT INFORMATION

Management has organized the company under one operating segment, being the development, manufacturing and marketing of fiber-optic test, measurement, monitoring and automation solutions. This operating segment is composed of Portable and Monitoring products and the Industrial and Scientific products.

Product sales are detailed as follows:

	YEARS ENDED AUGUST 31,		
	2000	2001	2002
Portable and Monitoring products	\$ 49,075	\$ 69,399	\$ 38,887
Industrial and Scientific products	22,564	76,614	29,443
	\$ 71,639	\$ 146,013	\$ 68,330

Sales to external customers by geographic region are detailed as follows:

	YEARS ENDED AUGUST 31,		
	2000	2001	2002
United States	\$ 36,139	\$ 72,604	\$ 35,129
Canada	8,006	12,531	3,971
Europe	14,503	30,568	9,539
Asia	6,486	19,059	12,971
South America	2,221	5,838	2,581
Other	4,284	5,413	4,139
	\$ 71,639	\$ 146,013	\$ 68,330

=====
 Sales have been allocated to geographic regions based on the country of residence of the related customers. During 2002, the company derived 10.2% of its sales (\$6,965,000) from one customer. The three most significant customers represented 15.4% of sales for that same year. During 2000 and 2001, there were no customers from which 10% or more of total sales were derived.

Long-lived assets by geographic region are detailed as follows:

	AS AT AUGUST 31,	
	2001	2002
United States	\$ 171,450	\$ 16,141
Canada	119,932	44,145
	\$ 291,382	\$ 60,286

Long-lived assets consist of property, plant and equipment, intangible assets and goodwill.

 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,
 except share and per share data and as otherwise noted)

17 EARNINGS (LOSS) PER SHARE

The following table summarizes the reconciliation of the basic weighted average number of shares outstanding and the diluted weighted average number of shares outstanding used in the diluted earnings per share calculations:

	YEARS ENDED AUGUST 31,	
	2000	2001
Basic weighted average number of shares outstanding (000's)	39,951	53,014
Conversion of preferred shares Series I	26	-
Stock options	109	231
Restricted stock awards	-	250
Diluted weighted average number of shares outstanding (000's)	40,086	53,495
Stock options excluded from the calculation of diluted earnings per share because the exercise price was greater than the average market price of the common shares (000's)	-	953

The diluted loss per share for the years ended August 31, 2001 and 2002, was the same as the basic loss per share since the dilutive effect of stock options and restricted stock awards was not included in the calculation; otherwise, the effect would be anti-dilutive. Accordingly, diluted loss per share for those years was calculated using the basic weighted average number of shares outstanding.

18 FINANCIAL INSTRUMENTS

SHORT-TERM INVESTMENTS

Short-term investments consist of the following:

	AS AT AU
	----- 2001 -----
Commercial paper denominated in Canadian dollars, bearing interest at annual rates of 4.35% to 4.60% in 2001 and 2.61% to 2.93% in 2002, maturing on different dates between September 2001 and November 2001 in 2001 and September 2002 and November 2002 in 2002	52,000
Mutual fund denominated in Canadian dollars	\$ 14,861

	\$ 66,861
	=====

F-29

EXFO ELECTRO-OPTICAL ENGINEERING INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,
except share and per share data and as otherwise noted)

FAIR VALUE

Cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities and long-term debt are financial instruments whose fair values approximate their carrying values.

The fair value of short-term investments, determined based on market value, amounted to \$66,861,000 and \$40,553,000 as at August 31, 2001 and 2002, respectively.

CREDIT RISK

Financial instruments which potentially subject the company to credit risk consist principally of cash and cash equivalents, short-term investments, accounts receivable and forward exchange contracts. The company's short-term

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

investments consist of debt instruments issued by high-credit quality corporations. The company's cash and cash equivalents and forward exchange contracts are held with or issued by high-credit quality financial institutions; therefore, the company considers the risk of non-performance on these instruments to be remote.

Due to the geographic distribution of the company's customers, there is no particular concentration of credit risk. Generally, the company does not require collateral or other security from customers for trade accounts receivable; however, credit is extended to customers following an evaluation of creditworthiness. In addition, the company performs ongoing credit reviews of all its customers and establishes an allowance for doubtful accounts receivable when accounts are determined to be uncollectible. Allowance for doubtful accounts amounted to \$893,000 and \$520,000 as at August 31, 2001 and 2002, respectively.

INTEREST RATE RISK

As at August 31, 2002, the company's exposure to interest rate risk is summarized as follows:

Cash and cash equivalents	Non-interest bearing
Short-term investments	As described above
Accounts receivable	Non-interest bearing
Accounts payable and accrued liabilities	Non-interest bearing
Long-term debt	As described in note 10

F-30

EXFO ELECTRO-OPTICAL ENGINEERING INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,
except share and per share data and as otherwise noted)

FORWARD EXCHANGE CONTRACTS

The company is exposed to currency risks as a result of its export sales of products manufactured in Canada, substantially all of which are denominated in US dollars. These risks are partially hedged by forward exchange contracts and certain operating expenses. As at August 31, 2001 and 2002, the company held contracts to sell US dollars at various forward rates, which are summarized as follows:

	CONTRACTUAL AMOUNTS	WEIGHTED AVERAGE CONTRACTUAL FORWARD RATES
	-----	-----
As at August 31, 2001		
September 2001 to August 2002	\$ 15,200	1.4969
September 2002 to February 2003	1,800	1.5184
As at August 31, 2002		
September 2002 to August 2003	\$ 6,400	1.5464
September 2003 to June 2004	2,200	1.5679

As at August 31, 2001 and 2002, these contracts generated deferred unrealized losses of US\$533,000 and US\$39,000, respectively, which have not been reflected in the statements of earnings.

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

19 UNITED STATES GENERALLY ACCEPTED ACCOUNTING PRINCIPLES

As a registrant with the Securities and Exchange Commission in the United States, the company is required to reconcile its financial results for significant differences between generally accepted accounting principles as applied in Canada (Canadian GAAP) and those applied in the United States (U.S. GAAP). Additional significant disclosures required under U.S. GAAP have also been provided in the accompanying financial statements and notes. The following summarizes the significant differences between Canadian and U.S. GAAP and other required disclosures under U.S. GAAP not already provided in the accompanying financial statements.

STATEMENTS OF CASH FLOWS

For the years ended August 31, 2000, 2001 and 2002, there are no significant differences between the statements of cash flows under Canadian GAAP as compared to U.S. GAAP.

RECONCILIATION ITEMS

a) ACCOUNTING FOR STOCK-BASED COMPENSATION

To conform with U.S. GAAP, the company measures stock-based compensation costs using the intrinsic value method (APB 25 "Accounting for Stock Issued to Employees").

F-37

EXFO ELECTRO-OPTICAL ENGINEERING INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,
except share and per share data and as otherwise noted)

STOCK PURCHASE PLAN

Under APB 25, compensation cost related to the stock purchase plan is measured as the difference between the fair value of the purchased stock and the purchase price paid by plan participants. Compensation cost is amortized to expense over a period of five years, being the restriction period. This plan terminated at the time of the Initial Public Offering on June 29, 2000.

STOCK OPTION PLAN

In accordance with APB 25, the company's stock option plan was considered to be a variable plan until October 10, 2000. As a result of the amendment to the stock option plan described in note 13, the performance criterion was removed and the number of shares to be issued under the plan was fixed and the company recorded, in 2001, a net reduction of the compensation cost and deferred compensation cost previously recognized of \$467,000 and \$14,544,000, respectively. Compensation cost under this plan is measured as the difference between the fair value of the underlying stock at the date of grant and the exercise price of the option. Compensation cost is amortized to expense over the estimated vesting period up to a maximum of four years.

RESTRICTED STOCK AWARD PLAN

Under APB 25, compensation cost related to the restricted stock award plan is measured as the difference between the fair value of the underlying stock at the date of grant and the exercise price, which is nil. Compensation cost is amortized to expense over the estimated vesting period up to a maximum of four years, being the acquisition period.

Under Canadian GAAP, no compensation cost is recognized for these stock-based compensation plans.

b) CHANGE IN REPORTING CURRENCY

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

On September 1, 1999, the company adopted the US dollar as its reporting currency. Under U.S. GAAP, the financial statements, including prior years, are translated according to the current rate method. Under Canadian GAAP, at the time of change in reporting currency, the historical financial statements are presented using a translation of convenience.

Under Canadian GAAP, the statement of earnings for the year ended August 31, 1999, was translated into US dollars using an exchange rate of US\$1.00 = Cdn\$1.4958. Under U.S. GAAP, revenues and expenses would be translated at exchange rates prevailing at the respective transaction dates. Average exchange rate for the year ended August 31, 1999, was US\$1.00 = Cdn\$1.5068. The exchange rate as at August 31, 1999, was US\$1.00 = Cdn\$1.4958.

As a result, a permanent difference of \$1,016,000 has been created on September 1, 1999, affecting the cumulative translation adjustment and the retained earnings under both Canadian GAAP and U.S. GAAP.

F-38

EXFO ELECTRO-OPTICAL ENGINEERING INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,
except share and per share data and as otherwise noted)

c) FORWARD EXCHANGE CONTRACTS

On September 1, 2000, the company prospectively adopted Statement of Financial Accounting Standard No. 133, "Accounting for Derivative Instruments and Hedging Activities" (SFAS 133) and its amendments (SFAS 138), which require all derivatives to be carried on the balance sheet at fair value. The forward exchange contracts used by the company have not qualified for hedging accounting treatment during the years ended August 31, 2001 and 2002; accordingly, changes in the fair value of the derivatives have been charged to earnings during these years.

Under Canadian GAAP, the company's forward exchange contracts held for the purpose of hedging anticipated sales qualified for hedge accounting and any unrealized gains or losses were deferred and recognized in the statement of earnings upon settlement of the related transactions.

d) BUSINESS COMBINATIONS

Under Canadian GAAP, until June 30, 2001, the value of shares issued upon a business combination was determined based on the market price of the shares over a reasonable period of time before and after the date of acquisition while under U.S. GAAP, the value of shares was determined based on the market price of the shares over a reasonable period of time before and after the companies have reached an agreement on the purchase price, the significant terms of the agreement are known and the proposed transaction is announced.

Consequently, the measurement dates of the acquisitions of EXFO Burleigh and EXFO Photonic Solutions for U.S. GAAP purposes occurred on December 14, 2000 and on March 6, 2001, respectively, the dates on which all significant terms of the agreements were known. The average market price of the shares a few days before and after those dates was \$31.09 and \$25.84, respectively. Considering the number of shares issued upon those acquisitions, the total consideration for U.S. GAAP purposes amounts to \$244,198,000 (\$189,270,000 under Canadian GAAP)

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

for EXFO Burleigh and \$120,802,000 (\$110,146,000 under Canadian GAAP) for EXFO Photonic Solutions, thus increasing share capital and goodwill under U.S. GAAP.

However, since July 1, 2001, the shares issued upon a business combination are valued under Canadian GAAP using the same method as used under U.S. GAAP.

Furthermore, under U.S. GAAP, in-process research and development acquired in a business combination is written off at the time of acquisition and no future income taxes are recognized on this asset in the purchase price allocation process. Under Canadian GAAP, in-process research and development acquired in a business combination is capitalized and amortized over its estimated useful life. Future income taxes are recognized on the acquisition date on that asset in the purchase price allocation process. As at August 31, 2001 and 2002, in-process research and development recorded under Canadian GAAP was fully amortized.

e) WRITE-DOWN OF GOODWILL AND INTANGIBLE ASSETS

Under U.S. GAAP, when assets being tested for recoverability were acquired in business combinations accounted for by the purchase method, the goodwill that arose in that transaction shall be included as part of the assets grouping in determining recoverability. The intangible

F-39

EXFO ELECTRO-OPTICAL ENGINEERING INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,
except share and per share data and as otherwise noted)

assets tested for recoverability in 2002 were acquired in business combinations accounted for using the purchase method and, consequently, the company allocated goodwill to those assets on a pro rata basis using the relative fair values of the long-lived assets and identifiable intangible assets acquired as determined at the date of acquisition. The carrying value of goodwill identified with the impaired intangible assets was written down before any reduction was made to the impaired intangible assets. Intangible assets were then written down to their fair value.

The fair value of intangible assets was determined based on discounted future cash flows. The cash flows periods used were ten and eleven years, using annual growth rates ranging between 10% and 30% and discount rates between 15% and 18%. The assumptions supporting discounted cash flows, including the cash flow periods, the annual growth rates and the discount rates, reflect management's best estimates. The discount rates were based upon the company's weighted average cost of capital as adjusted for the risks associated with operations.

The unallocated portion of goodwill was tested for recoverability at the subsidiaries' level based on the related pre-tax undiscounted future cash flows using the same assumptions and methodology as used for Canadian GAAP purposes.

Under U.S. GAAP, the company recorded a charge of \$281,278,000 to write down a significant portion of goodwill and a pre-tax charge of \$27,105,000 to write down a significant portion of acquired core technology. Of the total charge of \$308,383,000, \$170,079,000 relates to EXFO Burleigh, \$83,637,000 relates to EXFO Photonic Solutions and \$54,667,000 relates to EXFO Protocol.

Under Canadian GAAP, no allocation of goodwill is required and each asset is tested for recoverability separately based on its pre-tax undiscounted cash

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

flows over its expected period of use.

Also, under Canadian GAAP, the impairment loss for intangible assets is measured as the difference between the carrying value and the pre-tax undiscounted future cash flows.

Finally, under U.S. GAAP, the carrying value of goodwill reviewed for impairment was \$46,380,000 higher than the carrying value of the same goodwill tested under Canadian GAAP because the measurement dates used to account for the business combinations were different between Canadian GAAP and U.S. GAAP as explained in item d).

f) SHORT-TERM INVESTMENTS

Under U.S. GAAP, the short-term investments would be classified as "available-for-sale" securities. Consequently, these securities would be carried at fair value, with any unrealized holding gains or losses at each balance sheet date being reflected in other comprehensive income (loss) on a net-of-tax basis. Under Canadian GAAP, short-term investments are carried at the lower of cost and market value and cost is composed of acquisition cost plus amortization of discount or less amortization of premium.

F-40

EXFO ELECTRO-OPTICAL ENGINEERING INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,
except share and per share data and as otherwise noted)

g) EARNINGS (LOSS) PER SHARE

Under U.S. GAAP, the presentation of per share figures for earnings (loss) before amortization and write-down of goodwill is not permitted. In addition, under U.S. GAAP, amortization and write down of goodwill would be included in the computation of earnings from operations.

h) SHARE CAPITAL

Under Canadian GAAP, restricted shares reacquired from employees under the stock purchase plan are treated as arm's length repurchases of shares whereas under U.S. GAAP, the reacquisition of shares would be accounted for as a forfeiture by the employee, resulting in any difference between the amount originally credited to share capital and the remaining deferred compensation cost being credited to compensation expense in the current period. The subsequent resale of the shares would be treated as an issuance of shares for the proceeds received.

i) NEW ACCOUNTING STANDARDS

In July 2001, the Financial Accounting Standards Board (FASB) issued SFAS 141 "Business Combinations" and SFAS 142 "Goodwill and Other Intangible Assets". SFAS 141 requires business combinations initiated after June 30, 2001, or business combinations accounted for by the purchase method with a date of acquisition after June 30, 2001, to be accounted for using the purchase method of accounting. SFAS 141 also broadens criteria for recording intangible assets separately from goodwill. Upon the adoption of SFAS 142, recorded goodwill and intangible assets will be evaluated against those new criteria and may result in certain intangible assets being reclassified into goodwill or, alternatively, amounts initially recorded as goodwill being separately identified and recognized apart from goodwill as intangible assets. SFAS 142 requires the use

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

of a non-amortization approach to account for purchased goodwill and indefinite-lived intangibles.

Under transitional provisions of SFAS 142, the company did not amortize the goodwill resulting from the acquisition of EXFO Protocol Inc., for which the acquisition date was November 2, 2001.

The company adopted SFAS 142 prospectively on September 1, 2002. Upon the adoption of this new section, goodwill recorded prior to July 1, 2001, is no longer subject to amortization. Also, under the transitional provisions of the SFAS 142, the company performed an initial impairment test to identify goodwill impairment using a fair value-based method. Under SFAS 142, a goodwill impairment exists when the carrying value of a reporting unit exceeds its fair value. For the purposes of the impairment test, the company allocated its existing goodwill to its reporting units and completed an evaluation of the fair value of such reporting units. Based on the comparison of the fair value of the reporting units to their carrying value, goodwill of the reporting units was not considered impaired.

Goodwill will also be tested for impairment on an annual basis or more frequently if events or circumstances occur that more likely than not reduce the fair value of a reporting unit below its carrying value. Any impairment loss arising from this test will be charged to earnings in the period in which it is incurred.

(tabular amounts in thousands of US dollars,
except share and per share data and as otherwise noted)

In June 2001, the FASB issued SFAS 143 "Accounting for Asset Retirement Obligation", which is effective for fiscal years beginning on or after June 15, 2002. This standard requires that the fair value of a liability for an asset retirement obligation be recognized in the period in which it is incurred if a reasonable estimate of fair value can be made. The company will adopt this new standard prospectively on September 1, 2002 and its adoption will not have a significant impact on the company's financial statements.

In October 2001, the FASB issued SFAS 144 "Accounting for Impairment or Disposal of Long-Lived Assets", which supersedes SFAS 121 and the provisions of APB 30, "Reporting the Results of Operations - Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions" with regard to reporting the effects of a disposal of a segment of a business. SFAS 144 retains many of the provisions of SFAS 121, but significantly changes the criteria that would have to be met to classify an asset as held for disposal such that long-lived assets to be disposed of other than by sale are considered held and used until disposed of. In addition, SFAS 144 retains the basic provisions of APB 30 for presentation of discontinued operations in the statement of earnings but broadens that presentation to a component of an entity. This new standard is effective for fiscal years beginning on or after December 15, 2001. The company will adopt this new standard prospectively on September 1, 2002, and its adoption will not have a significant impact on the company's financial statements.

In April 2002, the FASB issued SFAS 145 "Rescission of FASB Statements No. 4, 44 and 64, Amendment of FASB Statement No. 13 and Technical Corrections". This new standard is effective for fiscal years beginning on or after May 15, 2002, or

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

for transactions occurring after May 15, 2002 related to SFAS 13, paragraph 8 and 9 (c). This statement rescinds SFAS 4 "Reporting Gains and Losses from Extinguishment of Debt" and an amendment of that Statement, SFAS 64 "Extinguishments of Debt Made to Satisfy Sinking-Funds Requirements". This Statement also rescinds SFAS 44 "Accounting for Intangible Assets of Motor Carriers". This Statement amends SFAS 13 "Accounting for Leases" to eliminate an inconsistency between the required accounting for sale-leaseback transactions. This Statement also amends other existing authoritative pronouncements to make various technical corrections, clarify meanings, or describe their applicability under changed conditions. The company will adopt this new standard prospectively on September 1, 2002, and its adoption will not have a significant impact on the company's financial statements.

In June 2002, the FASB issued SFAS 146 "Accounting for Costs Associated with Exit or Disposal Activities". This Statement addresses financial accounting and reporting for costs associated with exit or disposal activities and nullifies EITF No. 94-3, "Liability Recognition of Certain Employee Termination Benefits and Other Costs to Exit an Activity". This Statement improves financial reporting by requiring that a liability for a cost associated with an exit or disposal activity be recognized and measured initially at fair value only when the liability is incurred. This Statement specifies that a liability for a cost associated with an exit or disposal activity is incurred when the definition of a liability in SFAS 6 is met. This Statement is effective for exit or disposal activities that are initiated after December 31, 2002. The company will adopt this new standard prospectively on January 1, 2003, and has not yet assessed the impact of its adoption.

UNAUDITED PRO FORMA INFORMATION ON BUSINESS COMBINATIONS

Under U.S. GAAP, pro forma information must be provided as though the business combinations had occurred at the beginning of the reported periods.

The following unaudited pro forma information reflects the results of operations as if the 2002 acquisition had been completed on September 1, 2001 and 2000; the 2001 acquisitions had been completed on September 1, 2000.

Such information is not necessarily indicative of the actual results which would have been achieved, nor is it necessarily indicative of future consolidated results of the company.

	YEARS ENDED AUGUST 31,	
	2001	2002
	(UNAUDITED)	
Sales	\$ 166,083	\$ 683,371
Net loss	\$ (63,203)	\$ (385,870)
Basic and diluted net loss per share	\$ (1.03)	\$ (6.29)

ACCOUNTING FOR STOCK-BASED COMPENSATION

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

Under U.S. GAAP, the company has elected to measure compensation costs related to grants of stock options and stock awards using the intrinsic value method of accounting. In this instance, however, under SFAS 123, "Accounting for Stock-Based Compensation", the company is required to make pro forma disclosures of net earnings (loss), basic and diluted net earnings (loss) per share as if the fair value-based method of accounting had been applied.

The fair value of options or awards granted was estimated using the Black-Scholes options pricing model with the following weighted average assumptions:

	YEARS ENDED AUGUST 31,		
	2000	2001	2002
Risk-free interest rate	6.04%	5.36%	4.50%
Expected volatility	75%	75%	80%
Dividend yield	Nil	Nil	Nil
Weighted average expected life	32 months	33 months	40 months

The Black-Scholes options valuation model was developed for use in estimating the fair value of traded options and awards which have no vesting restrictions, and are fully transferable. In addition, option and award valuation models require the input of highly subjective assumptions, including the expected stock price volatility. Because the company's employee stock options and stock awards have characteristics significantly different from those of traded options and awards, and because changes in the subjective input assumptions can materially affect the fair value estimate, in management's opinion, the existing models do not necessarily provide a reliable single measure of the fair value of its employee stock options and stock awards.

EXFO ELECTRO-OPTICAL ENGINEERING INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,
except share and per share data and as otherwise noted)

If the fair value-based method had been used to account for stock-based compensation costs related to stock options and stock awards issued to employees, the net earnings (loss) and related net earnings (loss) per share figures under U.S. GAAP would be as follows:

	YEARS ENDED AUGUST 31,		
	2000	2001	2002
Pro forma net earnings (loss) for the year	\$ 8,939	\$ (39,109)	\$ (390,000)
Pro forma basic and diluted net earnings (loss) per share	\$ 0.22	\$ (0.74)	\$ (0.00)

The following table summarizes the stock-based compensation costs for options outstanding based on the fair value-based method:

Edgar Filing: EXFO ELECTRO OPTICAL ENGINEERING INC - Form 20-F

STOCK-BASED COMPENSATION COSTS FOR THE YEARS ENDED
AUGUST 31,

	2000	2001	2002
EXERCISE PRICE			
\$2.59	\$ -	\$ -	\$ 1
\$5.65	-	-	54
\$9.13 to \$12.69	-	-	2,631
\$19.19 to \$27.80	447	6,636	1,815
\$34.07 to \$45.94	-	2,902	1,076
\$56.75	-	1,047	4
	-----	-----	-----
	\$ 447	\$ 10,585	\$ 5,581
	=====	=====	=====

These options will generate aggregate stock-based compensation costs of \$26,589,000 over their vesting periods. As at August 31, 2002, the deferred stock-based compensation costs amount to \$9,976,000 and will be charged to expense over the next four years. For the years ended August 31, 2000, 2001 and 2002, the weighted average fair value of options amounted to \$15.07, \$14.64 and \$9.19, respectively.

As of August 31, 2002, none of the vested options has been exercised. As of August 31, 2002, the market price of the company's common shares was \$2.13.

20 SUBSEQUENT EVENTS

On September 3, 2002, EXFO acquired a building from a company owned by the President of the company for a cash consideration of \$930,000. This transaction was measured at the exchange amount since it was not in the normal course of operations, the change in ownership interest in the building was substantive and the exchange amount was supported by independent evidence.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(tabular amounts in thousands of US dollars,
except share and per share data and as otherwise noted)

On September 5, 2002, the company entered into an agreement to acquire substantially all the assets of gnubi communications, L.P., a U.S. company which supplies multi-channel telecom and datacom testing solutions for optical transport equipment manufacturers and research and development laboratories. This acquisition is expected to be settled for a total consideration ranging between \$4,300,000 and \$7,200,000. The consideration paid will consist of \$1,800,000 in cash, \$2,500,000 by the issuance of subordinate voting shares and a cash contingent consideration based on sales volume for 2003. This acquisition will be accounted for using the purchase method. This acquisition is expected to be closed in the first quarter of 2003.
