Table of Contents

PART I

Item 1. *Business*

We, through our operating subsidiaries, are a leading global producer of branded bath and plumbing products for the residential, commercial and institutional markets. Our Bath Products segment manufactures whirlpool baths, spas, showers, sanitary ware, including sinks and toilets, and bathtubs for the construction and remodeling markets. Our Plumbing Products segment manufactures professional grade drainage, water control, commercial brass and PEX piping products for the commercial and institutional construction, renovation and facilities maintenance markets.

Our products are marketed through their widely recognized brand names, including JACUZZI®, SUNDANCE®, ZURN®, and WILKINS™. Through the strength of these brands and the ability to leverage them effectively across multiple retail and wholesale distribution channels, we have built and maintained leadership positions within most of the markets we serve. The JACUZZI® and SUNDANCE® branded products hold leading positions in the whirlpool bath and spa markets in the U.S. and Europe, and the ZURN® branded products hold leading market positions in most of the domestic commercial and institutional markets they serve.

We were originally incorporated in 1995 when we were spun-off from Hanson plc (Hanson). At that time, we had holdings in 34 diverse businesses, including Jacuzzi. We subsequently merged with Zurn in 1998. Through asset disposal programs, we have transformed from a diversified industrial conglomerate into a focused operating company.

On October 11, 2006, we announced that a definitive merger agreement had been signed under which affiliates of private equity firm Apollo Management L.P. (Apollo) will purchase Jacuzzi Brands for \$12.50 per share. The acquisition is subject to certain closing conditions, including the approval of our shareholders, regulatory approval, and the receipt by Apollo of all necessary debt financing, and is expected to close in the first quarter of calendar 2007.

As previously announced, in connection with the merger agreement, we launched a cash tender offer and consent solicitation on December 4, 2006 with respect to our outstanding \$380 million in aggregate principal amount 95/8% Senior Secured Notes due 2010 (Senior Notes). The consummation of the tender offer is conditioned upon, among other things, the consummation of the proposed merger as well as the receipt of consent from the majority of the holders of the Senior Notes.

We operate on a 52- or 53-week fiscal year ending on the last Saturday closest to September 30. The fiscal year periods presented in our Annual Report on Form 10-K consist of the 52 weeks ended September 30, 2006 (2006), the 52 weeks ended October 1, 2005 (2005) and the 53 weeks ended on October 2, 2004 (2004), but are presented as of September 30 for convenience. Our public filings may be obtained through the Securities and Exchange Commission at its website at www.sec.gov, free of charge. Our Internet address is www.jacuzzibrands.com. We also make our Annual Report on Form 10-K, our quarterly reports on Form 10-Q, our current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, available on our website, free of charge, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission.

Financial information for the segments discussed below, including financial information by geographic areas, can be found in **Note 11** to our Consolidated Financial Statements.

Bath Products Segment

Our Bath Products segment manufactures and distributes primarily whirlpool baths, spas, showers and some sanitary ware, for the domestic and international construction and remodeling markets.

Table of Contents

U.S. Bath Products. We distribute bath products throughout the U.S. primarily under the flagship JACUZZI® brand name and spas under both the JACUZZI® and SUNDANCE® brand names. We also offer shower enclosures under the BATHCRAFT® brand name.

We distribute these products through multiple distribution channels. These channels include wholesalers such as Ferguson, Hughes and Hajoca; home centers such as Lowes and Menards; and specialty kitchen, bath and spa retailers. Wholesalers distribute our bath products to homebuilders and building and plumbing contractors. We believe the strong brand power of the JACUZZI® and SUNDANCE® names are instrumental to our market presence.

Our spa products are primarily sold through our network of over 1,100 independent specialty retailers. We act as the exclusive spa supplier to a majority of these retailers, and we support them with extensive product training, comprehensive point-of-purchase marketing materials, advertising and a national warranty service support program. We serve mass merchant retailers primarily through private label offerings which provide them with brand exclusivity.

The majority of the bath products we distribute in the U.S. are manufactured domestically. Our whirlpool baths and showers are principally manufactured in facilities in Chino, CA and Valdosta, GA. We also have a spa manufacturing facility in Chino. Our Brazilian operation manufactures formed acrylic shells which are shipped to our operations in the U.S. for assembly. We are continually evaluating ways to further reduce costs at all of our manufacturing facilities as we simultaneously continue to evaluate foreign sourcing while stressing the importance of high quality in all of our products.

International Bath Products. We manufacture and distribute bath products in the same product categories as in the U.S. for European and other international construction and remodeling markets. For fiscal 2006, approximately 47% of our Bath Products segment net sales were derived from sales of bath products outside the U.S., most of which were in Europe. We offer our branded bath products in Europe under the following brand names: JACUZZI®, JACUZZI PREMIUM® and B.C. SANITAN® which serve premium retailers; FORDHAM® which serves the construction and builder markets; and NIAGARA® which serves wholesale distributors. We also market a full line of composite and stainless steel kitchen sinks under the ASTRACAST® brand name.

Our bath products are distributed in Europe through home centers including B&Q, Homebase and Focus; wholesalers including the Wolseley Group, St. Gobain, and Travis Perkins Group; and specialty kitchen and bath retailers. We serve the home centers primarily in the U.K. through private label offerings which provide them with brand exclusivity. In the U.K. and other parts of Europe, JACUZZI® products are marketed through a large network of specialty bath and kitchen boutiques. We primarily manufacture these bath products in Italy, the U. K., France and Malta.

We also sell our whirlpool bath, shower and spa products in South America and Asia under the JACUZZI® brand name. We distribute these products, which are principally manufactured in our plants in North America, South America and Italy, through home centers, wholesalers and specialty kitchen and bath retailers.

Plumbing Products Segment

Our Plumbing Products segment manufactures and distributes professional grade drainage, water safety, water control, commercial brass and PEX piping products for the commercial and institutional construction, renovation and facilities maintenance markets. Demand for these products is influenced by regulatory, building and plumbing code requirements. Many of these products must meet detailed specifications set forth by plumbing engineers, architects and other building designers for commercial and institutional application.

Our specification drainage and brass tubular products are sold under the ZURN® brand name. Our water control products, including the WILKINS™ backflow preventer, are sold under the WILKINS™ brand name. We market our sensor-operated flush valves and faucets and manual flush valves under the ZURN AQUAFLUSH® brand name, our heavy-duty commercial faucets under the ZURN AQUASPEC® brand name

Table of Contents

and our bathroom packages under Zurn One Systems™. Our PEX piping products and radiant heat systems are marketed as ZURN PEX® products.

Product innovation is crucial in the commercial and institutional plumbing products markets since new products must continually be developed to meet specifications and regulatory demands. Our plumbing products are known in the industry for such innovation. For example, in fiscal 2006, we introduced various labor-savings products especially designed to reduce installation times for plumbing contractors and several water-conserving bathroom accessories that utilize sensor technology. We also continue to develop new PEX products to enhance the conversion of copper pipe to PEX pipe for residential water supplies as well as the conversion of forced-air heating to radiant heating.

We distribute our branded products through independent sales representatives; wholesalers such as Ferguson, Hughes, and Hajoca; home centers such as The Home Depot and Lowe's; and industry-specific distributors in the food service, industrial, janitorial and sanitation industries. Independent sales representatives work with wholesalers to assess and meet the needs of building contractors. They also combine knowledge of our products, installation and delivery with knowledge of the local markets to provide contractors with value added services. We use several hundred independent sales representatives nationwide, along with a dealer network of approximately 80 warehouses, to provide our customers with 24-hour service and quick response times.

In addition to our domestic manufacturing facilities, we have maintained a global network of independent sources that manufacture high quality, lower cost component parts for our commercial and institutional products. These sources fabricate parts to our specifications using our proprietary designs and enable us to focus on product engineering, assembly, testing and quality control. By closely monitoring these sources and through extensive product testing, we are able to maintain product quality and be a low-cost producer of commercial and institutional products.

Rexair Segment

On June 30, 2005, we completed the sale of Rexair, Inc. (Rexair) to an affiliate of Rhone Capital, LLC (Rhone). We received net cash of \$149.2 million and an approximately 30% equity interest in Rexair's new parent. We recorded a gain of \$24.7 million based on EITF 01-02, *Interpretations of APB Opinion No. 29* (EITF No. 01-02) and debt retirement costs of \$3.2 million associated with this transaction. Rexair is not being accounted for as a discontinued operation as a result of this continuing investment. Beginning July 1, 2005, Rexair's results are no longer reported in operating income as a separate business segment. Our share of Rexair's net earnings after the date of sale is reported as Rexair equity earnings in our Consolidated Statement of Operations.

Discontinued Operations

In July 2006, we sold all of our shares of common stock of Spear & Jackson Inc. (S&J) to United Pacific Industries Limited for approximately \$5.0 million.

In June 2005, we completed the sale of substantially all the assets and liabilities of Eljer Plumbingware (Eljer) to an affiliate of Sun Capital Partners, Inc. (Sun Capital). Eljer was previously included in the results of the Bath Products segment.

In February 2003, our Board of Directors adopted a formal disposal plan to dispose of our swimming pool and equipment, hearth and water systems businesses. We completed the disposals of the swimming pool and equipment and hearth businesses in fiscal 2003, and completed the disposal of the water systems business in fiscal 2004. All of these businesses were previously included in our Bath Products segment.

A discussion of these disposals can be found in **Note 3** to our Consolidated Financial Statements.

Table of Contents

Seasonality

Demand for our products is influenced by new home starts, remodeling and non-residential construction activity. Accordingly, many external factors affect our business such as weather and the impact of the broader economy on our end markets. Weather is an important variable for us as it significantly impacts construction. Spring and summer months in the U.S. and Europe represent the main construction season for new housing starts and remodeling, as well as increased construction in the commercial and institutional markets. As a result, sales in both our segments increase significantly in our third and fourth fiscal quarters as compared to the first two quarters of our fiscal year. The autumn and winter months generally impede construction and installation activity.

Raw Materials, Energy and Suppliers

We purchase a broad range of materials and components throughout the world in connection with our manufacturing activities in all of our segments. Major raw materials and components include acrylic, resin, natural gas, stainless steel, brass, plastic molded parts, lumber and spa siding, electronics and pumps. Our policy is to maintain alternate sources of supply for our important materials and components wherever possible. The materials and components required for our manufacturing operations have been readily available, and we do not foresee any significant shortages.

Patents, Trademarks and Licenses

We have in excess of 900 U.S. and foreign patents, patent applications and registered trademarks that relate to the products we manufacture and sell. We believe that certain trademarks including JACUZZI®, SUNDANCE®, and ASTRACAST® in our Bath Products segment and ZURN® and WILKINS™ in our Plumbing Products segment are of material importance to our product lines. None of the material trademarks are of limited duration, and we believe our intellectual property is adequately protected in customary fashion under applicable law. Although protection of our patents and related technologies is an important component of our business strategy, none of the individual patents is material to our company as a whole.

Competition

We sell all of our products in highly competitive markets. We compete in each of our markets based on product design, quality of products and services, product performance, distribution and price. Some of our competitors have greater financial, marketing, manufacturing and distribution resources than we do. Our principal competitors in the Bath Products segment are Kohler, American Standard, Teuco, Roca, Sanitec and Masco. Though the plumbing market is relatively fragmented, one competitor, Watts, competes with us across several lines. Sloan is a competitor in flush valves while Wirsbo is a competitor in PEX piping. Geberit is a competitor in commercial faucets.

Backlog

Our backlog orders were \$56.5 million and \$55.4 million as of the end of fiscal 2006 and fiscal 2005, respectively. The backlog orders are in both our segments. Backlog is comprised of all open customer orders not yet shipped as of a particular date. For numerous reasons, including the timing of shipments, the product mix of, or adjustments to, customer orders and the mix of futures and at-once orders, our backlog as of any date may not be a reliable measure of sales or net income for future periods. We expect all of our backlog orders to be filled within one year.

Export and International Operations

Certain of our domestic businesses generate revenue from export sales and/or revenue from operations conducted outside the U.S. Export sales amounted to 6%, 7% and 9% of consolidated net sales in fiscal 2006, 2005 and 2004, respectively. The decrease in export sales reflects the absence of Rexair which sold to foreign distributors of RAINBOW® products in numerous countries. Revenue from international operations amounted

Table of Contents

to 29%, 31% and 31% of consolidated net sales in fiscal 2006, 2005 and 2004, respectively. Identifiable assets of international operations represented approximately 24%, 24% and 23% of total identifiable assets (excluding assets held for sale) at the end of fiscal years 2006, 2005 and 2004, respectively. These revenues and identifiable assets arise principally from international operations within our Bath Products segment.

Our export sales and international manufacturing and sourcing are subject to certain risks including currency fluctuation, transportation delays, political and economic instability, restrictions on the transfer of funds, the imposition of duties, tariffs and import and export controls and changes in governmental policies. We have a number of sourcing relationships with companies in Asia.

Employee Relations

We employed 4,907 persons at September 30, 2006, of whom 1,302 were salaried employees. Unions represented 7% of our employees. We currently have collective bargaining agreements with two union locals in North America. None of the collective bargaining contracts covering North American locations are due to expire during fiscal 2007. We also have agreements covering employees at facilities in Italy, Malta and the U.K. The agreement in the U.K. is an annual agreement and covers 42 employees. The agreement in Italy covers 198 employees (71 of whom are members of a union). This contract which expired in May 2003 remains valid until national representatives negotiate a new agreement, which negotiations are ongoing. The agreement in Malta covers 119 employees and expires in December 2007. We have not experienced any significant work stoppages with our ongoing businesses. We believe that our relations with our employees and unions are satisfactory.

Environmental Regulation

We are subject to numerous foreign, federal, state and local laws and regulations concerning such matters as zoning, health and safety and protection of the environment. Laws and regulations protecting the environment may in certain circumstances impose strict liability, rendering a person liable for environmental damage without regard to negligence or fault on the part of such person. In addition, from time to time, we may receive notices of violation or may be denied applications for environmental licenses or permits because the practices of the operating unit are not consistent with regulations or ordinances.

Our subsidiaries have made capital and maintenance expenditures over time to comply with these laws and regulations. While the amount of expenditures in future years will depend on legal and technological developments which cannot be predicted at this time, these expenditures may progressively increase if regulations become more stringent. In addition, while future costs for compliance cannot be predicted with precision, no information currently available reasonably suggests that these expenditures will have a material adverse effect on our financial condition, results of operations or cash flows.

We are investigating and remediating contamination at a number of present and former operating sites under the Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA or Superfund), the Federal Resource Conservation and Recovery Act (RCRA) or comparable state statutes or agreements with third parties. These proceedings are in various stages ranging from initial investigations to active settlement negotiations to the cleanup of sites. We have been named as a potentially responsible party at a number of Superfund sites under CERCLA or comparable state statutes. Under these statutes, responsibility for the entire cost of cleanup of a contaminated site can be imposed upon any current or former site owner or operator, or upon any party who sent waste to the site, regardless of the lawfulness of the original activities that led to the contamination. No information currently available reasonably suggests that projected expenditures associated with any of these proceedings or any remediation of these sites will have a material adverse effect on our financial condition, results of operations or cash flows.

As of September 30, 2006, we had accrued approximately \$8.1 million (\$0.6 million accrued as current liabilities and \$7.5 million as non-current liabilities), including \$5.8 million for discontinued operations, for environmental liabilities. These amounts have not been discounted. In conjunction with some of these liabilities, we have deposited \$10.2 million in escrow accounts pursuant to the terms of past disposal agreements. We accrue an amount for each case when the likelihood of an unfavorable outcome is probable

Table of Contents

and the amount of loss associated with such unfavorable outcome is reasonably estimable. We believe that the range of liability for these matters would only increase by \$0.1 million if it included cases where the likelihood of an unfavorable outcome is only reasonably possible. During the third quarter of 2006, we entered into a settlement agreement with Ames True Temper, Inc. regarding our environmental liabilities. We surrendered the cash that was deposited in escrow for these matters and paid \$2.5 million in return for our release from all pending claims and any future environmental liabilities associated with Ames True Temper, Inc.

We cannot predict whether future developments in laws and regulations concerning environmental protection or unanticipated enforcement actions will require material capital expenditures or otherwise affect our financial condition, results of operations or cash flows in a materially adverse manner, or whether our businesses will be successful in meeting future demands of regulatory agencies in a manner which will not have a material adverse effect on our financial condition, results of operations or cash flows.

Corporate Governance

In accordance with the corporate governance rules of the New York Stock Exchange, we have adopted Corporate Governance Guidelines relating to certain key areas such as director qualifications and responsibilities, responsibilities of key board committees and director compensation. We have also adopted a Code of Business Conduct and Ethics for directors, officers and employees. Our Corporate Governance Guidelines, our Code of Business Conduct and Ethics and the charters of our Audit Committee, Compensation Committee and Nominating & Corporate Governance Committee are published on our website. We will disclose any amendments to our Code of Business Conduct and Ethics or waivers of any provision thereof on our website within four business days following the date of the amendment or waiver, and that information will remain available for at least a twelve-month period. We will provide any shareholder with printed versions of any of the foregoing guidelines, code or committee charters upon request.

Executive Officers

Set forth below are the names, positions and ages, as of September 30, 2006, of our executive officers:

Name	Age	Position
Alex P. Marini	60	President and Chief Executive Officer
Steven C. Barre	46	Senior Vice President, General Counsel and Secretary
Marie S. Dreher	48	Senior Vice President Corporate Development and Strategy
Jeffrey B. Park	54	Senior Vice President, Chief Financial Officer and Treasurer
Diana E. Burton	61	Vice President Investor Relations
Francisco V. Puñal	47	Vice President and Corporate Controller
Edmund L. Krainski	54	Vice President, Finance

Alex P. Marini was appointed President and Chief Executive Officer in August 2006. Mr. Marini served as our President and Chief Operating Officer from August 2005 to August 2006, and as President of Zurn Industries, Inc. (Zurn), our Commercial Plumbing Products business, from 1996 to August 2006. He joined Zurn in 1969 and held a variety of financial positions, including Vice President and Group Controller. He was promoted to Vice President of Sales, Marketing and Administration in 1984, and in 1987 was named President of Wilkins, a Zurn division, a position he held until becoming President of Zurn.

Steven C. Barre has served as our Senior Vice President, General Counsel and Secretary since September 2001. From April 2000 to September 2001, Mr. Barre served as our Vice President, General Counsel and Secretary. Prior to that

date, Mr. Barre served as our Associate General Counsel beginning with our spin-off from Hanson in 1995.

Marie S. Dreher was named Senior Vice President – Corporate Development and Strategy in August 2005. Ms. Dreher joined our Company from Millennium Chemicals, Inc (Millennium), a

Table of Contents

manufacturer of titanium dioxide and other chemical products. She was made Vice President and Corporate Controller in 1996 following their spin-off from Hanson. She was named Senior Vice President, Strategy and Corporate Development of Millennium in 2003.

Jeffrey B. Park has served as our Senior Vice President and Chief Financial Officer since April 2003 and Treasurer since February 2004. Mr. Park had served as Vice President and Chief Financial Officer of Jacuzzi, Inc., one of our wholly-owned subsidiaries, from August 2002 to April 2003. Prior to that, Mr. Park served as Vice President, Finance from April 2000 to August 2002 and Vice President, Corporate Controller from November 1986 to April 2000 of Gaylord Container Corporation, a manufacturer of packaging products.

Diana E. Burton has served as our Vice President Investor Relations since our spin-off from Hanson in 1995. Ms. Burton served as a consultant to Hanson Industries from January 1995 through February 1995, when she became an employee of a Hanson subsidiary. Ms. Burton was Vice President and Corporate Secretary of Marine Harvest, a publicly held aquaculture company, with principal responsibility for administration and investor relations, from September 1991 until its acquisition in November 1994.

Francisco V. Puñal joined our company as Vice President of Finance in January 2001, and was promoted to Vice President and Corporate Controller in 2002. Mr. Puñal was previously associated with Vitas Healthcare Corporation, a privately held healthcare provider, where he was Vice President and Controller from 1997 to 2000. Prior to that, Mr. Puñal served as Director of Finance of Vitas Healthcare Corporation.

Edmund L. Krainski was appointed Vice President, Finance in February 2006. Prior to that, he held various financial positions at Zurn over a period of 22 years, including Treasurer, Assistant Treasurer and Group Controller.

Table of Contents

Item 1A. Risk Factors

The following risk factors and other information included in this Annual Report on Form 10-K should be carefully considered. The risks and uncertainties described below are not the only ones we face. Additional risks and uncertainties not presently known to us or that we presently deem less significant may also impair our business operations. If any of the following risks actually occur, our business, operating results, cash flows and financial condition could be materially adversely affected.

Risks Related to Our Business

The seasonality of our sales and economic events may adversely affect our financial results and our ability to service our debt.

Our businesses experience seasonal business swings. We experience downturns in the autumn and winter months of the northern hemisphere, which encompasses the vast majority of our markets. This seasonality requires us to manage our cash flows over the course of the year. If our sales were to fall substantially below what we would normally expect during certain periods, our annual financial results would be adversely impacted and our ability to service our debt may also be adversely affected.

Weather could adversely affect the demand for our products and decrease our net sales.

Demand for our products is influenced by new home starts, remodeling and construction activity. Weather is an important variable affecting our financial performance as it significantly impacts construction activity. Spring and summer months in the U.S. and Europe represent the main construction season for new housing starts and remodeling, as well as increased construction in the commercial and institutional markets. However, adverse weather conditions, such as prolonged periods of cold or rain, blizzards, hurricanes and other severe weather patterns, could delay or halt construction and remodeling activity. For example, an unusually severe winter can lead to reduced construction activity and magnify the seasonal decline in our net sales and earnings during the winter months. In addition, a prolonged winter season can delay construction and remodeling plans and hamper the seasonal increase in our net sales and earnings during the spring months.

Demand for building and home improvement products may depend on availability of financing.

Many customers who purchase building and home improvement products and our other products depend on financing either by independent consumer finance companies or, to a lesser extent, by independent distributors in order to make purchases. Fluctuations in the prevailing interest rates could affect the availability and cost of financing to our customers. The lack of availability of consumer credit could lead to a reduction in demand for our products and have a material adverse effect on our business, financial condition, cash flows and results of operations.

We may be adversely affected by downturns in the markets we serve.

Demand in the building and home improvement product industries is influenced by new construction activity and the level of repair and remodeling activity. The level of new construction and repair and remodeling activity is affected by a number of factors beyond our control, including the overall strength of the U.S., U.K. and European economies (including confidence in these economies by our customers), the strength of the residential and commercial real estate markets, institutional building activity, the age of existing housing stock, unemployment rates and interest rates. Any declines in new housing or commercial construction starts or demand for replacement building and home

improvement products may adversely impact us, and there can be no assurance that any such adverse effects would not be material and would not continue for an indeterminate period of time. Further, while we attempt to minimize our exposure to economic or market fluctuations by serving a balanced mix of end markets and geographic regions, we cannot assure you that a significant or sustained downturn in a specific end market or geographic region would not have a material adverse effect on us.

Table of Contents

The markets in which we sell our products are highly competitive.

We compete against both large international and national rivals, as well as many regional competitors. Some of our competitors have greater financial, marketing and distribution resources than we do. Significant competition in any given market can result in substantial pressure on our pricing and profit margins, thereby adversely affecting our financial results. As a result of pricing pressures, we may in the future experience reductions in profit margins. We cannot assure you that we will be able to maintain or increase the current market share of our products successfully in the future.

The loss of any significant customer could adversely affect our business.

We have certain customers, such as Lowe's and Ferguson that are very important to our business. Ferguson accounted for 11.0% of our total sales in fiscal 2006. Our competitors may adopt more aggressive sales policies and devote greater resources to the development, promotion and sale of their products than we do, which could result in a loss of customers. The loss of one or more of our major customers or deterioration in our relationship with any of them could have a material adverse effect on our business, results of operations and financial condition.

An increase in the price of raw materials, components, finished goods and other commodities could adversely affect our operations.

We purchase most of the raw materials for our products on the open market, and rely on third parties for the sourcing of certain finished goods. Accordingly, our cost of products may be affected by changes in the market price of raw materials or sourced components or finished goods. Natural gas and electricity prices have historically been volatile, particularly in California and the U.K., where we have a significant manufacturing presence. We do not generally engage in commodity hedging transactions for raw materials. Significant increases in the prices of raw materials sourced components or finished goods or other commodities could require us to increase the prices of our products, which may reduce consumer demand for our products or make us more susceptible to competition. Furthermore, in the event we are unable to pass along increases in our operating costs to our customers, our margins and profitability may be adversely affected.

We are exposed to political, economic and other risks that arise from operating a multinational business.

We have significant operations outside the U.S. We currently have operations in Europe, Canada and South America, with approximately 24% of our assets (excluding assets held for sale) located outside the U.S. as of the end of fiscal 2006. Further, certain of our businesses obtain raw materials and finished goods from foreign suppliers. Accordingly, our business is subject to the political, economic and other risks that are inherent in operating in numerous countries. These risks include:

the difficulty of enforcing agreements and collecting receivables through foreign legal systems;

trade protection measures and import or export licensing requirements;

tax rates in certain foreign countries that exceed those in the U.S. and the imposition of withholding requirements on foreign earnings;

the imposition of tariffs, exchange controls or other restrictions;

difficulty in staffing and managing widespread operations and the application of foreign labor regulations;

required compliance with a variety of foreign laws and regulations; and

changes in general economic and political conditions in countries where we operate, particularly in emerging markets.

Our business success depends in part on our ability to anticipate and effectively manage these and other risks. We cannot assure you that these and other factors will not have a material adverse effect on our international operations or on our business as a whole.

Table of Contents

We are subject to currency exchange rate and other related risks.

We conduct operations in and generate sales from many areas of the world involving transactions denominated in a variety of currencies. We are subject to currency exchange rate risk to the extent that our costs are denominated in currencies other than those in which we earn revenues. In addition, since our financial statements are denominated in U.S. dollars, changes in currency exchange rates between the U.S. dollar and other currencies have had, and will continue to have, an impact on our earnings. We cannot assure you that currency exchange rate fluctuations will not adversely affect our results of operations and financial condition.

We also face risks arising from the imposition of exchange controls and currency devaluations. Exchange controls may limit our ability to convert foreign currencies into U.S. dollars or to remit dividends and other payments by our foreign subsidiaries or businesses located in or conducted within a country imposing controls. Currency devaluations result in a diminished value of funds denominated in the currency of the country instituting the devaluation. Actions of this nature, if they occur or continue for significant periods of time, could have an adverse effect on our results of operations and financial condition in any given period.

Adverse investment returns and other factors may increase our pension liability and pension expense.

We have defined benefit pension plans covering many of our U.S. and U.K. employees, former employees and retirees. Our pension plan assets are invested primarily in equity securities, fixed-income securities and short-term securities. At present, our U.S. aggregate pension plan assets exceed the present value of the accrued benefit liabilities, while the U.K. plan has liabilities that exceed their assets. Under applicable law, we are required to make cash contributions to underfunded pension plans to the extent necessary to comply with minimum funding requirements imposed by regulatory requirements. The amount of such required cash contributions is based on an actuarial valuation of the plans. The funding status of the plans can change as a result of changes in the investment returns on plan assets, discount rates, mortality rates of plan participants, and a number of other factors. We cannot provide assurance that the value of our pension plan assets or the investment returns on plan assets will continue to be sufficient in the future. It is possible that we could be required to make significant additional cash contributions to our plans, which would reduce the cash available for our business and other needs, or to incur a significant pension liability adjustment.

Our financial statements are based upon estimates and assumptions that may differ from actual results.

Our financial statements have been prepared in accordance with U.S. generally accepted accounting principles and necessarily include amounts based on estimates and assumptions made by us or by our actuaries. Actual results could differ from these amounts. Significant items subject to such estimates and assumptions include allowances for doubtful accounts receivable, carrying values of long-lived assets, liabilities for litigation and claims, liabilities for self-insurance, liabilities for deferred taxes, reserves for future warranty costs, and pension plan liabilities, among others.

We are subject to numerous asbestos claims that could adversely affect us.

Zurn operates as one of our wholly-owned subsidiaries. Zurn, along with many other unrelated companies, is a co-defendant in numerous asbestos related lawsuits pending in the U.S. Plaintiffs' claims primarily allege personal injuries allegedly caused by exposure to asbestos used primarily in industrial boilers formerly manufactured by a segment of Zurn that has been accounted for as a discontinued operation. For further information, refer to **Item 3. Legal Proceedings**.

We are subject to environmental regulation and incur costs relating to environmental matters.

Our past and present business operations and our past and present ownership and operation of real property are subject to extensive and changing federal, state, local and foreign environmental laws and regulations pertaining to the discharge of materials into the environment, the generation, storage, use, transportation, handling and disposal of wastes (including solid and hazardous wastes) and the exposure to hazardous substances. If our operating units fail to completely comply with these laws and regulations, we

Table of Contents

could be fined or otherwise sanctioned or we could incur liability for cleanup costs or other damages. Changes in environmental regulations or their interpretation, or other unanticipated events may also give rise to increased expenditures or liabilities.

We are investigating and remediating contamination at a number of present and former operating sites and we have been named as a potentially responsible party at a number of Superfund sites pursuant to CERCLA, RCRA or comparable state statutes. Our actual costs to clean up these sites may exceed our current estimates due to factors beyond our control, such as the discovery of presently unknown environmental conditions, changes in environmental laws and regulations and the insolvency of other responsible parties at the sites at which we are involved.

We may not be able to protect our intellectual property rights.

We believe that a number of our U.S. and foreign patents, patent applications and registered trademarks are important to our success, potential growth and competitive position. Our actions to establish and protect our trademarks and other proprietary rights, however, may not prevent imitation of our products by others or prevent others from claiming violations of their trademarks and proprietary rights by us. Any infringement or related claims, even if not meritorious, may be costly and time consuming to defend, may distract management from our business and may result in the loss of significant financial and managerial resources.

Our failure to attract and retain qualified personnel could have an adverse effect on us.

Our success depends in part on our ability to attract, hire, train and retain qualified managerial, marketing and sales personnel. The market for these people is competitive. We may be unsuccessful in attracting and retaining the personnel we require to generate sales and to expand our operations successfully, and, in such event, our business could be materially and adversely affected. Our success also depends to a significant extent on the continued service of our senior management team. The loss of any member of our senior management team could impair our ability to execute our business plan and could therefore have an adverse effect on our business, results of operations and financial condition.

Work stoppages and other labor problems could affect us.

As of September 30, 2006, 7% of our employees were represented by labor unions. While we believe our relations with our employees are satisfactory, a lengthy work stoppage at any of our facilities could have a material adverse effect on us. The collective bargaining agreements with two local unions in North America (covering 117 employees) are due for renegotiation in fiscal 2010. We also have agreements covering employees in Italy, Malta and the U.K. One agreement expired in May 2003 (covering 198 employees), but remains valid until national representatives negotiate a new agreement; one agreement expires annually (covering 42 employees) and another agreement will expire in December 2007 (covering 119 employees). Negotiations for the extension of these agreements may result in modifications to the terms of these agreements, and these modifications could cause us to incur increased costs relating to our labor force.

Our proposed merger with Apollo may not be consummated

In the event that the merger agreement is not adopted by our stockholders or if the merger is not completed for any other reason, our stockholders will not receive any payment for their shares in connection with the merger. Instead, we will remain an independent public company and our common stock will continue to be listed on the NYSE.

If the merger agreement is terminated, the agreement specifies that under certain circumstances, we will be obligated to pay a termination fee to Apollo which could range from \$6 million to \$25 million.

Risks Related to Our Indebtedness

Refer to **Liquidity and Capital Resources** in **Item 7** of this Annual Report on Form 10-K for more information and definitions related to our indebtedness.

Table of Contents

We have substantial indebtedness and servicing our indebtedness reduces funds available to operate our business.

We and our subsidiaries may be able to incur substantial additional indebtedness in the future. Our substantial indebtedness could interfere with our ability to operate our business. For example, it could:

increase our vulnerability to general adverse economic and industry conditions;

limit our ability to obtain additional financing;

require us to dedicate a substantial portion of our cash flow from operations to the payment of principal and interest on our indebtedness, reducing the amount of our cash flow available for other general corporate purposes, including capital expenditures, research and development efforts and working capital;

require us to sell other securities or to sell some of our core assets, possibly on unfavorable terms, to meet payment obligations;

restrict us from making strategic acquisitions, investing in new products or capital assets or taking advantage of business opportunities;

limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate; and

place us at a possible competitive disadvantage compared to less leveraged competitors.

Our debt instruments contain covenants which will limit our ability to operate our business.

Our financing arrangements, including our credit facilities and the indenture governing the senior notes, contain various provisions that limit management's discretion by restricting our ability to, among other things:

incur additional debt or enter into sale-and-lease-back transactions;

pay dividends or distributions on our capital stock or repurchase our capital stock;

issue preferred stock of subsidiaries;

make certain investments;

create liens to secure debt;

enter into transactions with affiliates;

merge or consolidate with another company; and

transfer and sell assets.

In addition, our credit facilities require that we meet specified financial ratios and tests. These restrictions could limit our ability to plan for or react to market conditions or meet extraordinary capital needs or could otherwise restrict corporate activities.

Upon our failure to comply with any of the covenants in our financing arrangements, the lenders under those agreements might be able (even without declaring a default) to cause us to use all of our available cash and free cash flow to service their indebtedness or otherwise prevent us from making payments of principal or interest on the senior notes. In addition, if following a default any of our lenders declares an event of default or accelerates our indebtedness, other creditors with cross default provisions in their debt instruments may be able to declare a default and accelerate their indebtedness. If any of our indebtedness is accelerated, we may not have sufficient funds available to make the required payments under our indebtedness.

Table of Contents

To service our indebtedness, we will require a significant amount of cash. Our ability to generate cash depends on many factors beyond our control.

Our ability to make payments on and to refinance our indebtedness, including the senior notes, and to fund operations will depend on our ability to generate cash in the future. Our ability to generate cash is subject to general economic, financial, competitive, business and other factors that are beyond our control.

Our historical financial results have been, and we anticipate that our future financial results will be, subject to fluctuations. We cannot assure you that our business will generate sufficient cash flows from operations, that currently anticipated cost savings and operating improvements will be realized on schedule or that future borrowings will be available to us under our credit facilities or otherwise in amounts sufficient to enable us to pay our indebtedness, including the senior notes, or to fund our other liquidity needs. If we are unable to meet our debt obligations or fund our other liquidity needs, we may need to restructure or refinance all or a portion of our indebtedness, on or before maturity. We cannot assure you that we will be able to restructure or refinance any of our indebtedness on satisfactory terms, if at all, which could cause us to default on our obligations and impair our liquidity. Our ability to restructure or refinance our debt will depend on the condition of the capital markets and our financial condition at such time. Any refinancing of our debt could be at higher interest rates and may require us to comply with more restrictive covenants, which could further restrict our business operations.

Item 2. Properties

We lease approximately 15,134 square feet of office space for our headquarters in West Palm Beach, Florida. The principal properties of each of our operating companies as of September 30, 2006, and the location, primary use, approximate square footage and ownership status, are set forth below:

Location	Use	Approximate Square Footage	Owned/Leased
Bath Products:			
<i>Europe</i>			
Valvasone, Italy	Manufacturing/Warehouse	251,472	Owned
Newcastle, England	Manufacturing	99,429	Owned
Birstal, England	Manufacturing/Showroom	136,375	Owned
Hilton, England	Warehouse	125,000	Leased
Bradford, England	Warehouse	202,000	Leased
Paris, France	Warehouse	79,653	Leased
Cusset, France	Manufacturing	10,764	Owned
Marsa, Malta	Manufacturing	57,834	Leased
<i>South America</i>

Dallas, Texas	Warehouse/Office	55,020	Leased

In addition, we lease sales office space in Idaho Falls, Idaho; Nice, France; Lohne, Germany; Rome, Italy; Barcelona, Spain; Taipei, R.O.C.; Dubai, UAE and Bensheim, Germany and an engineering and sourcing center in Zhuhai, China. We lease additional warehouse space in southern California on a week-to-week basis as it is needed. We also own several properties being held for sale in: Thomasville, North Carolina; Salem, Ohio; Milford, Virginia; Itu, Brazil and Bradford, England. We believe our owned/leased properties are sufficient for our current and future needs.

Item 3. Legal Proceedings

We and our subsidiaries are parties to legal proceedings that we believe to be either ordinary, routine litigation incidental to the business of present and former operations or immaterial to our financial condition, results of operations or cash flows.

Certain of our subsidiaries are defendants or plaintiffs in lawsuits that have arisen in the normal course of business. While certain of these matters involve substantial amounts, it is management's opinion, based on the advice of counsel, that the ultimate resolution of such litigation and environmental matters will not have a material adverse effect on our financial condition, results of operations or cash flows.

As a consequence of the previously announced merger transaction with Apollo, the Company and related parties have been named as defendants in several lawsuits. See **Note 10** in the Consolidated Financial Statements.

In June 1998, we acquired Zurn Industries, Inc. (Zurn), which operates as one of our wholly-owned subsidiaries. At the time of the acquisition, Zurn had itself owned various subsidiaries. Zurn, along with many other unrelated companies, is a co-defendant in numerous asbestos related lawsuits pending in the U.S. Plaintiffs' claims primarily allege personal injuries allegedly caused by exposure to asbestos used primarily in industrial boilers formerly manufactured by a segment of Zurn that has been accounted for as a discontinued operation. Zurn did not manufacture

asbestos or asbestos components. Instead, Zurn purchased it from suppliers.

Federal legislation has been proposed that would remove asbestos claims from the current tort system and place them in a trust fund system. This trust would be funded by the insurers and defendant companies. There can be no assurance as to when or if this or any other legislation will be passed and become law or what, if any, the financial impact it could have on Zurn.

New claims filed against Zurn were lower year-over-year. During 2006, approximately 6,400 new asbestos claims were filed against Zurn versus 10,400 in 2005. As of September 30, 2006, the number of asbestos

Table of Contents

claims pending against Zurn was approximately 46,200 compared to 69,900 as of October 1, 2005. The pending claims against Zurn as of September 30, 2006 were included in approximately 4,900 lawsuits, in which Zurn and an average of 80 other companies are named as defendants, and which cumulatively allege damages of approximately \$11.2 billion against all defendants. The claims are handled pursuant to a defense strategy funded by Zurn's insurers. Defense costs currently do not erode the coverage amounts in the insurance policies, although a few policies that will be accessed in the future may count defense costs toward aggregate limits.

During 2006 and as of the end of such period, approximately 16,300 claims were paid and/or pending payment and approximately 24,600 claims were dismissed and/or pending dismissal. During 2005 and as of the end of such period, approximately 17,000 claims were paid and/or pending payment and approximately 13,600 claims were dismissed and/or pending dismissal. Since Zurn received its first asbestos claim in the 1980s, Zurn has paid or dismissed or agreed to settle or dismiss approximately 146,000 asbestos claims including dismissals or agreements to dismiss of approximately 48,900 of such claims through the end of 2006 compared to 115,900 and 23,900 claims, respectively, through the end of 2005.

Zurn uses an independent economic consulting firm with substantial experience in asbestos liability valuations to assist in the estimation of Zurn's potential asbestos liability. At September 30, 2006, that firm estimated that Zurn's potential liability for asbestos claims pending against it and for claims estimated to be filed through 2016 is approximately \$136 million, of which Zurn expects to pay approximately \$102 million through 2016 on such claims, with the balance of the estimated liability being paid in subsequent years. As discussed below in more detail, Zurn expects all such payments to be paid by its carriers.

This asbestos liability estimate was based on the current and anticipated number of future asbestos claims, the timing and amounts of asbestos payments, the status of ongoing litigation and the potential impact of defense strategies and settlement initiatives. However, there are inherent uncertainties involved in estimating the number of future asbestos claims, future settlement costs, and the effectiveness of Zurn's defense strategies and settlement initiatives. In addition, Zurn's current estimate could be affected due to changes in law and other factors beyond its control. As a result, Zurn's actual liability could differ from Zurn's estimate described herein.

Zurn's current estimate of its asbestos liability of \$136 million for claims filed through 2016 assumes that (i) its continuous vigorous defense strategy will remain effective; (ii) new asbestos claims filed annually against it will decline modestly through 2016; (iii) the values by disease will remain consistent with past experience; and (iv) its insurers will continue to pay defense costs without eroding the coverage amounts of its insurance policies. While Zurn believes there is evidence, in its claims settlements experience, for such an impact of a successful defense strategy, if the defense strategy ultimately is not successful to the extent assumed by Zurn, the severity and frequency of asbestos claims could increase substantially above Zurn's estimates. Further, while Zurn's current asbestos liability is based on an estimate of claims through 2016, such liability may continue beyond 2016, and such liability could be substantial.

Zurn estimates that its available insurance to cover its potential asbestos liability as of September 30, 2006 is approximately \$286 million. Zurn estimated that its available insurance to cover its potential asbestos liability as of October 1, 2005 was approximately \$293 million. The decrease in the amount of available insurance reflects the payments made during 2006. Zurn believes, based on its experience in defending and dismissing such claims and the coverage available, that it has sufficient insurance to cover the pending and reasonably estimable future claims. This conclusion was reached after considering Zurn's experience in asbestos litigation, the insurance payments made to date by Zurn's insurance carriers, existing insurance policies, the industry ratings of the insurers and the advice of insurance coverage counsel with respect to applicable insurance coverage law relating to the terms and conditions of those policies. As of September 30, 2006 and October 1, 2005, Zurn recorded a receivable from its insurance carriers of \$136 million and \$153 million, respectively, which corresponds to the amount of Zurn's potential asbestos liability that is covered by available insurance and is probable of recovery.

However, there is no assurance that \$286 million of insurance coverage will ultimately be available or that Zurn's asbestos liabilities will not ultimately exceed \$286 million. Factors that could cause a decrease in

Table of Contents

the amount of available coverage include changes in law governing the policies, potential disputes with the carriers on the scope of coverage, and insolvencies of one or more of Zurn's carriers.

Principally as a result of the past insolvency of certain of Zurn's insurance carriers, coverage analysis reveals that certain gaps exist in Zurn's insurance coverage, but only if and after Zurn uses approximately \$216 million of its remaining approximate \$286 million of insurance coverage. As noted above, the estimate of Zurn's potential liability for asbestos claims pending against it and for claims estimated to be filed through 2016 is \$136 million with the expected amount to be paid through 2016 being \$102 million. In order to use approximately \$261 million of the \$286 million of its insurance coverage from solvent carriers, Zurn estimates that it would need to satisfy approximately \$14 million of asbestos claims, with additional gaps of \$80 million layered within the final \$25 million of the \$286 million of coverage. We will pursue, if necessary, any available recoveries on our approximately \$148 million of coverage with insolvent carriers, which includes approximately \$83 million of coverage attributable to the gaps discussed above. These estimates are subject to the factors noted above.

After review of the foregoing with Zurn and its consultants, we believe that the resolution of Zurn's pending and reasonably estimable asbestos claims will not have a material adverse effect on Zurn's financial condition, results of operations or cash flows.

Item 4. Submission of Matters to a Vote of Security Holders

We did not submit any matter to a vote of security holders during the last quarter of fiscal 2006.

PART II**Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities****(a) Market Information.**

Our common stock is traded on the NYSE under the symbol JJZ. The following table sets forth, for the fiscal periods indicated, the high and low closing sales price per share of common stock as reported by the NYSE.

	Fiscal 2006		Fiscal 2005	
	High	Low	High	Low
First Quarter	\$ 8.70	\$ 6.95	\$ 9.75	\$ 7.94
Second Quarter	\$ 10.10	\$ 8.45	\$ 10.85	\$ 8.28
Third Quarter	\$ 10.22	\$ 8.09	\$ 11.35	\$ 8.09
Fourth Quarter	\$ 10.66	\$ 7.80	\$ 11.57	\$ 7.23

(b) Holders.

As of November 30, 2006, there were approximately 16,340 record holders of our common stock.

(c) Dividends.

We have not paid cash dividends in the past three fiscal years. Our credit facilities and Senior Note indentures include restrictions on the payment of dividends (See **Liquidity and Capital Resources** in **Item 7** of this Annual Report on

Form 10-K).

(d) Securities authorized for issuance under equity compensation plans.

Table of Contents

The following table sets forth information, as of the end of fiscal year 2006, with respect to our compensation plans under which shares of our common stock is or was authorized for issuance and is outstanding:

Plan Category	Column(a) Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights	Column(b) Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights	Column(c) Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans⁽¹⁾
Equity compensation plans:			
Approved by security holders	930,632	\$ 5.11	3,225,948
Not approved by security holders			
Total	930,632	\$ 5.11	3,225,948

(1) Excluding securities reflected in Column (a).

Item 6. Selected Financial Data

Our business has undergone significant changes during the last five years. Accordingly, results from any one period may not be comparable to results from any other year. The following matters affect the comparability of the selected financial data included in the table that follows.

Operating income in fiscal 2006 includes restructuring and other charges of \$7.2 million. Income from continuing operations in fiscal 2006 includes a pre-tax gain of \$9.3 million related to the collection of a note which had been previously deferred until collection and \$3.8 million pre-tax equity earnings from our investment in Rexair's parent company. Income from continuing operations also includes the recognition of a valuation allowance against U.K. deferred tax assets in the amount of \$15.9 million, partially offset by the reversal of a valuation allowance related to Italian income tax refund receivables of \$14.0 million.

We disposed of the Rexair segment on June 30, 2005 and obtained an approximately 30% equity interest in Rexair's new parent company in conjunction with this transaction. As a result of the sale, only nine months of Rexair's sales and operating income are included in our consolidated sales and consolidated operating income results for fiscal 2005. The 30% equity interest is accounted for under the equity method of accounting. Rexair is not being accounted for as a discontinued operation as a result of this continuing investment. Operating income in fiscal 2005 includes restructuring charges of \$9.4 million. Income from continuing operations in fiscal 2005 includes a pre-tax gain on the sale of Rexair of \$24.7 million, pre-tax equity earnings from our investment in Rexair's parent company of \$0.6 million and a tax benefit of \$8.8 million. Income from continuing operations also includes pre-tax charges of \$3.2 million associated with the retirement of the term loan.

Operating income in fiscal 2004 includes impairment, restructuring, and other charges of \$2.9 million related to downsizing initiatives as well as the consolidation of administrative functions into our shared services center.

Net sales in fiscal 2003 include \$8.6 million from the sale of a license for certain patented technology. Operating income in fiscal 2003 includes impairment, restructuring and other charges of \$9.6 million. Income from continuing operations in fiscal 2003 includes pre-tax charges of \$21.5 million associated with the extension and eventual refinancing of our debt in July 2003. Income from continuing operations also includes a tax benefit of \$13.6 million recorded as a result of an IRS audit settlement.

Operating income in fiscal 2002 includes impairment, restructuring and other charges of \$7.2 million. Income from continuing operations in fiscal 2002 includes \$9.2 million of pre-tax charges related to financing initiatives. Also, we recorded a tax benefit of \$29.6 million in fiscal 2002 largely attributable to the utilization of loss carry backs.

Table of Contents

The following table presents summary historical consolidated financial data. The summary consolidated financial data for the fiscal years 2006, 2005 and 2004 has been derived from our audited consolidated financial statements included in **Item 8** of this Annual Report on Form 10-K. You should read the following summary consolidated financial data in conjunction with **Items 7** and **8** of this Annual Report on Form 10-K.

	For the Fiscal Years Ended				
	September 30,	September 30,	September 30,	September 30,	September 30,
	2006	2005	2004	2003	2002
	(in millions, except per share amounts)				
Statements of Operations:					
Net sales	\$ 1,202.4	\$ 1,210.0	\$ 1,201.2	\$ 1,025.2	\$ 904.1
Operating income	103.6	94.4	127.2	99.1	95.2
Earnings from continuing operations	43.8	58.0	48.3	21.4	32.4

Stockholders' equity	345.5	285.2	288.5	245.5	254.4

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations**Overview**

We are a leading global producer of branded bath and plumbing products for the residential, commercial and institutional markets. Our results of operations are reported in two business segments, consisting of the Bath Products segment and the Plumbing Products segment. Prior year amounts include the results of the Rexair segment, which was sold in fiscal 2005. Our Bath Products segment manufactures whirlpool baths, spas, showers, sanitary ware, including sinks and toilets, and bathtubs for the construction and remodeling markets. Our Plumbing Products segment manufactures professional grade drainage, water control, commercial brass and PEX piping products for the

commercial and institutional construction, renovation and facilities maintenance markets.

On June 30, 2005, we completed the sale of Rexair to Rhone Capital, LLC (Rhone) in a transaction valued at \$170 million. We recorded a gain of \$24.7 million and debt retirement costs of \$3.2 million associated with this transaction. We also obtained an approximately 30% equity interest in Rexair s new parent company in conjunction with this transaction. This investment is accounted for under the equity method in

Table of Contents

accordance with Accounting Principles Board Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock* (APB No. 18). Rexair is not being accounted for as a discontinued operation as a result of this continuing investment. Beginning in the fourth quarter of fiscal 2005, our share of Rexair's earnings has been recorded in Rexair equity earnings in our Consolidated Statements of Earnings. In all periods prior to the fourth quarter of fiscal 2005, Rexair's sales and operating income are included in our consolidated sales and operating income results.

Housing starts, residential re-sales, consumer spending and remodeling expenditures have a major impact on the consumer-focused bath and spa businesses of our Bath Products segment. The Bath Products segment generates the majority of its sales in the residential construction and remodeling markets. We believe that worldwide macro-economic and demographic factors such as population growth and household formation will continue to drive demand in these markets over the long-term.

Our Plumbing Products business is dependent upon commercial and institutional construction activity and is therefore affected by macro-economic factors such as economic growth and interest rates. The U.S. commercial and institutional construction market is cyclical in nature. Commercial and institutional construction increased slightly in 2004 after a few years of decline, and this market has continued to show signs of improvement during 2005 and 2006. Sales of our products have grown at rates in excess of market growth over the past few years as a result of product innovation, targeted marketing programs and an emphasis on customer service. We believe that macro-economic and demographic factors such as population growth and infrastructure demands will ultimately drive growth in these markets over the long-term.

Weather is an important variable for us as it significantly impacts construction. Spring and summer months in the U.S. and Europe represent the main construction season for new housing starts and remodeling, as well as increased construction in the commercial and institutional markets. As a result, sales in our Bath Products and Plumbing Products segments increase in our third and fourth fiscal quarters as compared to the first two quarters of our fiscal year. The autumn and winter months generally impede construction and installation activity.

During the fourth quarter of 2006, we sold all of our shares of common stock of S&J to United Pacific Industries Limited for a purchase price of approximately \$5.0 million. We recorded a gain on sale of \$2.5 million, net of \$1.3 million in expenses from the sale of S&J. Two of our directors at that time were also directors and significant stockholders of the purchaser. The transaction was considered and approved by a committee of independent directors, without participation by the interested directors.

In the third quarter of fiscal 2005, we completed the sale of substantially all the assets and liabilities of Eljer to Sun Capital. Eljer's operations are classified as discontinued for all periods presented and are excluded from the following discussion of continuing operations. Eljer was previously accounted for as part of the Bath Products segment.

Results of discontinued operations largely reflect the Eljer and S&J operations and are not included in our discussion of **Results of Operations** of this Annual Report on Form 10-K. Summarized results of the discontinued operations through the dates of sale are as follows:

	For the Fiscal Years Ended September 30,		
	2006	2005	2004
	(in millions)		
Net sales	\$ 82.0	\$ 133.0	\$ 148.1
Operating loss	(6.3)	(9.1)	(31.6)

Loss from discontinued operations	(3.4)	(63.6)	(19.9)
-----------------------------------	-------	--------	--------

The decrease in net sales and operating loss over the periods presented is primarily the result of the lost contribution from the businesses for the periods subsequent to their sale. In addition, loss from discontinued operations for fiscal 2005 included the loss on the disposal of Eljer of \$57.8 million, net of tax. Loss from discontinued operations for all three years also includes our share of S&J's net (losses)/income. Our share of S&J's net sales and operating income (loss) have been included in the respective lines of the above table from

Table of Contents

the date of consolidation in the third quarter of fiscal 2005. Prior to consolidation, net sales and operating loss would not have been impacted by the equity earnings. Changes in estimates for all of our previously discontinued operations are recorded in the period in which they arise. Refer to **Note 3** to our Consolidated Financial Statements for additional information regarding the businesses sold and the corresponding sale dates.

Results of Operations

The following table presents our results of operations by segment for the periods indicated. Certain amounts reported for the prior periods have been reclassified to conform to the current year's presentation.

	For the Fiscal Years Ended		
	September 30,		
	2006	2005	2004
	(in millions)		
Net Sales			
Bath Products	\$ 766.6	\$ 780.8	\$ 788.4
Plumbing Products	435.8	353.1	308.0
Rexair ⁽¹⁾		76.1	104.8
Total Net Sales	\$ 1,202.4	\$ 1,210.0	\$ 1,201.2
Operating Income			
Bath Products	\$ 38.5	\$ 30.1	\$ 57.2
Plumbing Products	90.9	75.3	60.7
Rexair ⁽¹⁾		19.0	27.3
	129.4	124.4	145.2
Corporate Expenses	(25.8)	(30.0)	(18.0)
Total Operating Income	\$ 103.6	\$ 94.4	\$ 127.2

⁽¹⁾ Reflects sales and operating income through June 30, 2005.

Fiscal 2006 Compared to Fiscal 2005***Overall***

Net sales for fiscal 2006 remained virtually unchanged at approximately \$1.2 billion as compared to fiscal 2005. During fiscal 2006, the \$82.7 million (23.4%) increase in Plumbing Products sales compensated for a \$14.2 million (1.8%) decline in Bath Products sales, as well as the loss of \$76.2 million in sales from Rexair, which was sold in the third quarter of fiscal 2005.

Operating income increased 9.7% to \$103.6 million from \$94.4 million in fiscal 2005, with both our segments reporting double digit increases over the prior year. Operating income included restructuring and other charges of \$7.2 million in fiscal 2006 compared to \$9.4 million in fiscal 2005.

Bath Products

Sales in the Bath Products segment decreased by \$14.2 million in fiscal 2006 compared to fiscal 2005 as weak overall demand in the markets we serve was partially offset by new product introductions and price increases. Approximately \$6.5 million of the Bath Products sales decline was due to unfavorable translation effects of foreign currency. The weak overall demand was primarily in our two largest markets, the U.S. and the U.K. We anticipate that the U.K. market will begin to improve in fiscal 2007, however we do not anticipate a significant improvement in the U.S. market. We expect sales growth in the upcoming year to be driven by increased market share and growth in Europe and the reversal of the negative foreign currency trend experienced in fiscal 2006.

Table of Contents

Operating income increased \$8.4 million in fiscal 2006 largely due to cost reductions, sourcing initiatives and price increases implemented to offset higher raw material costs, which more than offset lower sales volumes. We anticipate energy, freight and raw material costs to escalate, but at a slower rate than fiscal 2006. We intend to increase prices as necessary to help offset cost increases but anticipate increased competition resulting from the expected decline in the residential housing market. Fiscal 2006 operating income included restructuring and other charges of \$7.0 million as well as a \$1.0 million adjustment to retirement benefits which related to prior years.

Fiscal 2005 included restructuring charges of \$4.5 million, as well as higher costs associated with our global branding, marketing and product development initiatives, costs associated with the enhancement of our overseas sourcing capabilities and the expansion of the Malta stainless steel sink plant. Partially offsetting these items in fiscal 2005 was a reduction in warranty costs of \$2.2 million due to a favorable settlement of a dispute. Restructuring charges in fiscal 2006 were largely associated with our U.K. business. We expect to see the benefits from these initiatives bring our U.K. operations back to profitability in fiscal 2007. Refer to **Note 4** to our Consolidated Financial Statements for a discussion of these charges.

Plumbing Products

Sales in the Plumbing Products segment increased 23.4% to \$435.8 million in fiscal 2006 compared to last year. The higher sales reflect greater market penetration, industry growth, price increases implemented to offset higher raw material costs and the introduction of new products. All the major product lines posted double digit sales increases over prior year. Sales of PEX products increased most significantly due to the continued market conversion from copper products to PEX. We believe we will see continued growth in the plumbing business in the coming year as we intend to continue to improve market share and expect a strong domestic commercial and institutional construction market. We expect continued conversion from copper plumbing to PEX products but also expect difficult market conditions as a result of the decrease in the residential market and increased competition.

Operating income for fiscal 2006 increased 20.7% to \$90.9 million compared to last year primarily due to the strong sales volume. As a percentage of sales, operating margins were 20.8% and 21.3% in fiscal 2006 and 2005, respectively, as price increases offset substantially all of the increases in raw material costs. Zurn values its inventory using the last-in-first-out (LIFO) method which, because of raw material price increases, resulted in cost of sales that were \$13.9 million more than if the inventory was valued using the first-in-first-out (FIFO) method. We do not expect raw material to increase in price in fiscal 2007 at the same rate experienced in fiscal 2006. We intend to offset any increase in raw material prices with price increases in fiscal 2007. Another factor which may continue to affect margins is a shift in mix due to increasing sales of lower margin products.

Corporate Expenses

Corporate expenses in fiscal 2006 decreased \$4.2 million from fiscal 2005 largely as a result of a reduction in professional fees of \$3.4 million. This reduction was primarily due to lower costs associated with Sarbanes-Oxley compliance as fiscal 2005 was our implementation year. We also benefited from reduced staffing costs, largely a result of the restructuring implemented in the prior year.

Corporate expenses include the following charges/(credits):

For the Fiscal Years Ended	Favorable/ (Unfavorable)
September 30, 2006	September 30, 2005
2006	2005
(in millions)	
	Variance

Pension income	\$	(5.2)	\$	(7.2)	\$	(2.0)
Post-retirement expenses		4.9		1.3		(3.6)
Restructuring and severance		2.8		4.9		2.1
Intangible tax		(1.6)		2.2		3.8
	\$	0.9	\$	1.2	\$	0.3

Table of Contents

Pension income decreased in the current year due to a lower discount rate and increase in actuarial losses recognized in the current year. For fiscal 2007, we expect to record pension income of \$10.2 million due to a higher discount rate and decrease in the amortization of actuarial losses. Post-retirement expenses in fiscal 2006 include an adjustment of \$1.6 million relating to prior years. The remaining increase over fiscal 2005 was primarily due to enhanced benefits which were required to be recognized over a short service period. For fiscal 2007, we expect to record post-retirement expenses of \$1.2 million. Restructuring and severance for both years relates primarily to several key executives. Fiscal 2006 includes \$2.6 million of costs associated with the retirement of our former Chairman and Chief Executive Officer. Approximately \$1.2 million of these costs is associated with restricted stock vesting, while the remainder are cash charges. Fiscal 2005 includes restructuring charges of \$4.9 million related to the elimination of certain executive positions. We are continuing to evaluate how we can further reduce our corporate overhead costs. Intangible tax in fiscal 2005 includes \$2.0 million related to establishing a reserve for an expected settlement. In fiscal 2006 we reached a more favorable settlement than originally anticipated and reversed \$1.7 million of the reserve established in the previous year.

Interest Income and Expense

The decrease in interest expense of \$5.9 million from fiscal 2005 to fiscal 2006 was primarily due to lower debt levels, resulting primarily from the proceeds on the sale of Rexair in June 2005. Interest income in fiscal 2006 includes interest of \$2.6 million related to Italian tax refunds, of which \$1.8 million was received in the first quarter of fiscal 2007.

Gain on sale of business

The gain on sale of \$24.7 million in fiscal 2005 relates to the sale of the Rexair business in June 2005.

Other income/(expense), net

Other income/(expense), net consists of the following:

	For the Fiscal Years Ended September 30, 2006 2005 (in millions)	
Keller Ladder income (expense)	\$ 0.5	\$ (1.0)
Gain (loss) on collection or sales of non-operating assets	9.3	(0.7)
(Loss) gain on sale of excess properties and equipment	(0.6)	1.7
Foreign currency transaction (losses) gains	(1.7)	0.4
Debt retirement costs		(3.2)
Gain on litigation of environmental claim	3.5	
Other, net	(3.5)	(3.8)
	\$ 7.5	\$ (6.6)

We retained certain obligations related to our Keller Ladder operations, the majority of which relate to claims for defective ladders sold before the sale of Keller Ladder in October 1999. We continue to incur income and expenses related to those obligations. As a result of a favorable trend in the settlement of these obligations we reduced our

estimated liability in fiscal 2006; however future year expenses are expected to be more in line with the expense recognized in the past two years. The gain on collection or sales of non-operating assets of \$9.3 million in fiscal 2006 relates to a gain on the collection of a note which had previously been deferred until collection. We had obtained the note in October 2002 upon the sale of a piece of property to Woodlands Ventures, LLC. Debt retirement costs are associated with the repayment of the term loan, which was retired with proceeds from the sale of Rexair in 2005. Gain on litigation of environmental claim was the result of a favorable judgment received on an environmental liability retained as part of the sale of Rexair.

Table of Contents

Taxes

Our effective tax rate in fiscal 2006 was 45.9%. The rate was affected by the recognition of a valuation allowance against U.K. net operating loss in the amount of \$15.9 million in fiscal 2006 due to continuing pretax losses in our U.K. operations. The rate was further affected by the reversal of \$14.0 million of reserves against Italian income tax refunds. We received \$7.9 million in refunds from the Italian government in the first quarter of fiscal 2007.

During fiscal 2005, we recognized a \$2.9 million tax benefit upon the completion of a Federal tax audit of a subsidiary and a \$5.9 million tax benefit as a result of a Federal tax audit of our consolidated tax returns for fiscal years 1998 through 2002. Also no taxes were incurred on the Rexair gain because it resulted in a capital loss for tax purposes.

Fiscal 2005 Compared to Fiscal 2004

Overall

Overall net sales increased \$8.8 million in fiscal 2005 compared to fiscal 2004. The overall sales increase was driven by a 14.6% increase in Plumbing Products segment sales, which offset a slight decline in Bath Product segment sales and the absence of Rexair sales following its June 30, 2005 disposition. Rexair contributed \$24.1 million of sales in the fourth quarter of fiscal 2004. Sales in fiscal 2005 also benefited from \$13.5 million of favorable foreign currency exchange rate fluctuations.

Operating income decreased \$32.8 million in fiscal 2005 compared to the prior year primarily as a result of the absence of Rexair's earnings for the fourth quarter of fiscal 2005 and a decrease in Bath Products unit sales. Rexair provided \$7.1 million in operating income in the fourth quarter of fiscal 2004. The Plumbing Products segment reported an increase in operating income, which partially mitigated the decline in the Bath Products segment. Operating income included restructuring charges of \$9.4 million in fiscal 2005 compared to \$2.9 million in fiscal 2004. In addition, operating income included a \$1.1 million benefit from favorable foreign currency exchange rates in fiscal 2005.

Bath Products

Sales in the Bath Products segment decreased slightly in fiscal 2005 as compared to fiscal 2004. Foreign currency benefits of \$13.5 million were offset by a decline in unit sales primarily caused by a slow down in the U.K. market and softness in the Italian bath and U.S. spa markets. Bath sales benefited from higher product pricing initiated to help offset higher energy, freight and raw material costs. However, these higher prices were not enough to offset the reduced volume, primarily in our U.K. markets. Sales in the U.K., our largest market outside the U.S., declined by 7.4% in local currency as the slow down in the U.K. market, which began in the second quarter of fiscal 2005, continued through the end of the fiscal year. As retail sales in the U.K. declined, customers reacted by reducing their inventory levels.

Operating income decreased \$27.1 million in fiscal 2005. The decline in unit sales also triggered decreases in production levels, which resulted in lower absorption of fixed manufacturing costs. The U.K. and Italian bath businesses were also affected by a shift in mix to lower margin products. Fiscal 2005 operating income also included higher costs associated with our global branding, marketing and product development initiatives, costs associated with the enhancement of our overseas sourcing capabilities and the expansion of the Malta stainless steel sink plant. These costs were partially offset by the settlement of a dispute with the previous owners of the Sundance Spas business over pre-acquisition warranty costs for \$3.5 million, resulting in a reduction in warranty costs of \$2.2 million. Results for fiscal 2004 included a \$4.1 million increase in bad debt reserves associated with financial difficulties encountered by several Brazilian distributors and \$1.0 million in severance related to the replacement of the management team and

staffing reductions in Brazil. Our Brazilian operations experienced significant increases in sales and operating income in fiscal 2005 as a result of the organizational changes and new programs implemented by the new management team.

Operating income included net restructuring charges of \$4.5 million in fiscal 2005 and \$3.5 million in fiscal 2004. Refer to **Note 4** to our Consolidated Financial Statements for a discussion of these charges.

Table of Contents*Plumbing Products*

Sales in the Plumbing Products segment increased 14.6% to \$353.1 million in fiscal 2005 compared to last year. The higher sales were driven by continued growth in principal markets, successful new product introductions and improved pricing.

Operating income for fiscal 2005 increased 24.0% to \$75.3 million as compared to fiscal 2004 primarily as a result of strong sales volume. Increased brass, steel and resin costs were offset by favorable pricing and lower purchased parts costs resulting from new sourcing initiatives.

Corporate Expenses

Corporate expenses increased \$12.0 million in fiscal 2005 compared to fiscal 2004. Fiscal 2005 expenses included restructuring charges of \$4.9 million primarily related to the elimination of certain executive positions. In addition to the restructuring charge, the year-over-year increase was primarily attributable to a reserve for an intangible tax settlement (\$2.0 million), reduced pension income due to a lower discount rate and increased amortization of net actuarial losses (\$4.2 million), and increased audit and other fees associated with Sarbanes-Oxley compliance (\$3.8 million) partially offset by a reduction in compensation and benefit costs (\$1.3 million). Fiscal 2004 included a reversal of the restructuring reserve for unused leased space of \$0.6 million associated with the customer service function that was relocated to the shared services operations center.

Interest Income and Expense

The decrease in interest expense of \$2.4 million from fiscal 2004 to fiscal 2005 was primarily due to lower debt balances. Interest income in fiscal 2004 includes interest of \$2.5 million received from the IRS for an audit settlement.

Other Expense, net

Other expense, net consists of the following:

	For the Fiscal Years Ended September 30, 2005 2004 (in millions)	
Keller Ladder expenses	\$ 1.0	\$ 1.6
Loss (gain) on sales of other non-operating assets	0.7	(2.5)
(Gain) loss on sale of excess properties and equipment	(1.7)	0.1
Foreign currency transaction (gains) losses	(0.4)	1.9
Debt retirement costs	3.2	
Other, net	3.8	2.1
	\$ 6.6	\$ 3.2

We retained certain obligations related to our Keller Ladder operations, the majority of which relate to claims for defective ladders sold before the sale of Keller Ladder in October 1999. We continue to incur expenses related to those obligations. The debt retirement costs are associated with the pay down of the term loan, which was retired with

proceeds from the sale of Rexair.

Taxes

Our effective tax rate for fiscal 2005 declined as a result of the following:

No taxes will be incurred on the Rexair gain because it resulted in a capital loss for tax purposes.

A \$2.9 million tax benefit was recognized in the second quarter of fiscal 2005 upon the completion of a Federal tax audit of a subsidiary.

Table of Contents

A \$5.9 million tax benefit was recognized in fiscal 2005 as a result of a Federal tax audit of our consolidated tax returns for the fiscal years 1998 through 2002. The benefit resulted from agreed upon computational adjustments. The IRS provided their final report for this audit in August 2005. We filed an appeal with the IRS in September 2005 regarding various issues that we could not reach agreement on.

Excluding the impact of these three items, our effective tax rate for the year increased as a result of the change in the mix of foreign and domestic earnings after the sales of Rexair and Eljer. During fiscal 2004, we received a refund of \$4.0 million relating to the examination of the federal income tax returns for the fiscal years 1995 through 1997. This refund was already included in our estimated tax rates in prior periods. In addition to the tax refund, we received \$2.5 million in interest relating to the refund, which was included in interest income in 2004.

Liquidity and Capital Resources

Our primary sources of liquidity and capital resources are cash and cash equivalents, cash provided from operations and available borrowings. We expect to satisfy operating needs including the cash requirements related to capital expenditures, acquisitions and restructuring programs through operating cash flows, cash on hand, and borrowings under our existing credit facilities.

Net cash provided by operating activities of continuing operations was \$34.8 million for fiscal 2006, compared to \$52.2 million for fiscal 2005. The comparison was impacted by the sale of Rexair, which contributed \$17.0 million of cash during fiscal 2005 prior to the sale. In fiscal 2006 we received \$7.6 million from Rexair of which \$4.4 million was accounted for as a dividend and included in operating cash flows and \$3.2 million was accounted for as a return of our investment and is included in investing cash flows. The comparison was also negatively impacted by higher net tax payments; higher inventory levels, as well as \$3.0 million paid to buyout certain vested post-retirement benefit plan liabilities in fiscal 2006. Higher tax payments were required based on our higher profits as well as a shift in income towards our domestic operations. Higher inventory levels reflect higher costs of raw materials as well as additional requirements to support the sales growth in our Plumbing segment. Included in fiscal 2005 is \$3.5 million received from the previous owners of the Sundance Spas business as a result of the resolution of a litigation claim. We were able to mitigate much of these negative factors with better operating results and the decreased cash requirement of our restructuring plans.

During fiscal 2006, we paid approximately \$6.7 million related to our restructuring plans, and expect to pay approximately \$2.4 million in the next 12 months (see **Note 4** to our Consolidated Financial Statements). During fiscal 2005, we paid approximately \$11.2 million related to our restructuring plans.

In the first quarter of fiscal 2007 we received \$9.7 million from the Italian government which consisted of a refund on withholding taxes for tax years 1998 and 1999 of \$7.9 million and related interest of \$1.8 million.

We typically use cash for operations in the first half of the fiscal year due to the seasonality of most of our businesses. Weather can significantly impact construction and installation, which ultimately impacts sales in both our segments. Sales of outdoor jetted spas and other products are also sensitive to weather conditions and tend to decrease during the fall and winter months (predominantly the first and second fiscal quarters).

Net cash used in operating activities by discontinued operations in fiscal 2006 was \$18.1 million as compared to net cash used of \$31.2 million in fiscal 2005. The decrease in net cash used was due to the sale of Eljer in fiscal 2005. Net cash used in fiscal 2006 was primarily associated with payment of liabilities we assumed in conjunction with the Eljer sale and a \$2.5 million payment related to the settlement of Ames True Temper environmental liabilities. We have \$12.5 million accrued at September 30, 2006 related to environmental, product liability, workers compensation and

other retained liabilities of disposed businesses accounted for as discontinued operations. These liabilities are expected to be paid over the next ten years and represent the only expenditures expected to be incurred over this period for businesses disposed of as of this date.

Table of Contents

Net cash provided by investing activities of continuing operations during fiscal 2006 was \$5.7 million compared to \$125.4 million last year. Net cash provided in fiscal 2006 consisted of proceeds from the collection of our Woodlands note of \$9.3 million, net proceeds from the sale of Spear & Jackson of \$3.7 million as well as proceeds on the sale of an excess property located in Waynesboro, GA of \$1.7 million. Also, in fiscal 2006, is \$3.2 million related to cash received from Rexair (see also discussion in operating activities). These items were partially offset by \$12.5 million of cash used for capital expenditures. Net cash provided in fiscal 2005 consisted mainly of net proceeds of \$149.2 million from the sale of Rexair, net of \$8.5 million of costs associated with the sale of Eljer. Also included were proceeds of \$4.4 million related to the sale of a note receivable. The note was obtained in conjunction with the sale of our swimming pool and equipment business in May 2003. We also received net proceeds of \$3.0 million from the sale of excess property and fixed assets. These proceeds were partially offset by cash used for capital expenditures of \$22.7 million.

We expect total capital expenditures for fiscal 2007 to be approximately \$15 million to \$20 million for new business requirements, system upgrades and implementations, initiatives involving the consolidation of workflows and improvement of manufacturing efficiencies and other capital requirements in the ordinary course of business. We are also considering broadening our Plumbing Products segment product portfolio through acquisitions, remaining mindful that any such purchase be strategic in fit and accretive to earnings.

Investing activities of discontinued operations reflect the results of the S&J business in both fiscals 2006 and 2005.

Net cash provided by financing activities of continuing operations was \$9.8 million in fiscal 2006 compared to cash used in fiscal 2005 of \$76.6 million. Net cash provided by financing activities in fiscal 2006 consisted mainly of \$12.8 million received from restricted cash collateral accounts and \$1.7 million received from the issuance of common stock related to option exercises. These items were partially offset by \$4.9 million used for repayment of notes and debt. During fiscal 2005, we reduced our total debt borrowings by \$64.4 million. In addition, we paid \$1.0 million in fees associated with the retirement of our term loan, and we deposited \$12.4 million into restricted cash collateral accounts in conjunction with the sales of Rexair and Eljer. The outflows were partially offset by \$1.4 million in proceeds from stock option exercises.

The outstanding debt balances at September 30, 2006 were as follows:

	Maximum Availability	Amount Outstanding	Applicable Interest Rate
	(in millions)		
Senior Notes	\$ 380.0	\$ 380.0	9.625%
Asset-based credit facility ⁽¹⁾	131.2		2.0% over LIBOR or Prime
US Brass note	3.5	3.5	Interest imputed at 9.5%
Total	\$ 514.7	\$ 383.5	

⁽¹⁾ \$30.7 million of the facility is utilized for letters of credit at the end of fiscal 2006.

The 9.625% Senior Secured Notes (Senior Notes) are due on July 1, 2010 and require the payment of interest of \$18.3 million on January 1 and July 1 of each year. We are restricted in our ability to cause a mandatory redemption of the Senior Notes per the terms of the indenture for the Senior Notes. On and after July 1, 2007, we can redeem the

Senior Notes subject to a redemption premium of 104.8% for the first 12 months and 102.4% for the following 12 months. On and after July 1, 2009, the Senior Notes can be redeemed at face value. The indenture for the Senior Notes limits our ability to pay dividends, repurchase stock and make other restricted payments as defined therein.

As required by the indenture governing the Senior Notes, on April 11, 2006 we commenced an offer to purchase up to \$47.7 million aggregate principal amount of our Senior Notes at par, plus accrued and unpaid interest. The amount of the offer was equivalent to the remaining proceeds from both the Rexair and Eljer dispositions, net of certain expenses and payments incurred in connection with the dispositions. At September 30, 2005, we had restricted cash accounts of \$12.4 million that were held for the benefit of the

Table of Contents

bondholders related to the proceeds from the Rexair and Eljer dispositions. None of the Senior Notes were tendered thus the restricted cash balance was reclassified to cash and cash equivalents.

We have an asset-based revolving credit facility that matures on July 15, 2008. Under this facility, we can borrow up to \$200.0 million subject to a borrowing base consisting of eligible accounts receivable and eligible inventory. The interest rate under the facility is currently 2.0% over LIBOR or Prime. This rate is reset each quarter based on our Consolidated Leverage Ratio as defined in the agreement, and could range from 2.0% to 2.5% over LIBOR (Applicable LIBOR Margin). The weighted-average interest rate was 5.22% for 2005 and 3.98% for 2004. There are several fees associated with the asset-based credit facility including an unused commitment fee of 0.5%, a letter of credit fee equal to the applicable LIBOR margin and a fronting fee of 0.125% on all outstanding letters of credit. We had no amounts outstanding under the facility during 2006 or at September 30, 2005.

The asset-based credit facility requires us to maintain a minimum consolidated fixed charge coverage ratio, which is only applicable if our availability under the asset-based credit facility falls below \$20.0 million. We were not subject to this debt covenant during fiscal 2006 because our availability exceeded the required threshold. We expect to maintain availability in excess of \$20.0 million for the foreseeable future. This credit facility also includes a restriction on the payment of dividends.

Certain of our existing and future domestic restricted subsidiaries guarantee the Senior Notes, jointly and severally, on a senior basis. The Senior Notes are secured by an eligible first lien on domestic property, plant and equipment, and a second lien on the assets that secure the credit facilities. The asset-based credit facility is secured by a first lien on accounts receivable, inventory, the stock of our domestic subsidiaries and 65% of the stock of our first-tier foreign subsidiaries. In addition, the asset-based credit facility has a second lien on the property, plant and equipment securing the Senior Notes.

We paid \$39.8 million, \$45.3 million and \$45.1 million of interest on our borrowings in 2006, 2005 and 2004, respectively.

Commitments

At September 30, 2006, we had approximately \$131.2 million available to be borrowed under the asset-based facility, of which we had utilized approximately \$30.7 million for letters of credit, leaving \$100.5 million available for additional borrowings. In addition, we have outstanding foreign commercial letters of credit of \$2.0 million which do not affect availability under the asset-based facility. We do not have any other significant off-balance sheet obligations.

Below is a summary of our significant contractual cash obligations as of September 30, 2006:

	Total	Payments Due in Fiscal			Payments Due
		2007	2008-2009	2010-2011	Thereafter
		(in millions)			
Long-term debt	\$ 383.5	\$ 1.7	\$ 1.8	\$ 380.0	\$
Notes payable	19.8	19.8			
Lease obligations	51.6	12.7	17.7	12.6	8.6
Purchase obligations ⁽¹⁾	117.8	117.8			
Interest payments ⁽²⁾	137.2	36.6	73.2	27.4	

Other ⁽³⁾	4.6	2.6	1.6	0.3	0.1
Total	\$ 714.5	\$ 191.2	\$ 94.3	\$ 420.3	\$ 8.7

- (1) Purchase obligations are all open purchase orders at September 30, 2006. Of this amount, \$9.9 million represents obligations that were relieved by October 5, 2006.
- (2) Interest payments represent interest on the Senior Notes.

Table of Contents

- (3) Other includes \$3.6 million of restructuring and other cash obligations which are accrued on our balance sheet at September 30, 2006. The remaining \$1.0 million relates to a consulting agreement which will be expensed as incurred.

As discussed in Note 6 to our Consolidated Financial Statements, we have long-term liabilities for pension and other supplemental retirement benefit plans. The payments related to these plans are not included above since they are dependent upon when the employee retires or leaves the Company. Retiree health care and life insurance benefits are dependent on future claim activity. Minimum pension funding requirements are not included above as such amounts are not available for all periods presented. During 2007, we expect to contribute \$4.0 million to our pension plans. During 2006, we contributed \$3.9 million to these plans. For estimated future benefit payments related to these plans, please see Note 6.

Guarantees and Indemnifications

We continue to guarantee the lease payments of an Ames True Temper master distribution center. The lease obligation will expire in 2015. The scheduled lease payments totaled \$3.9 million for fiscal 2006, and increase by 2.25% each year thereafter. In connection with the sale of Ames True Temper in January 2002, we obtained a security interest and indemnification from Ames True Temper on the lease that would enable us to exercise remedies in the event of default.

We have an agreement with a third party financing company that we will repurchase any new or salable spas returned to us within twelve months of the original sale date. The costs associated with this agreement have been minimal to date.

We have sold a number of assets and businesses over the last several years and have, on occasion, provided indemnifications for liabilities relating to product liability, environmental, insurance and other claims. We have recorded reserves totaling approximately \$11.4 million as of September 30, 2006 for asserted and probable unasserted claims related to these liabilities. These amounts have not been discounted.

New Accounting Pronouncements

In June 2006, the Financial Accounting Standards Board (FASB) issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No. 109* (FIN 48). This interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with Statement of Financial Accounting Standard No. 109, *Accounting for Income Taxes*. This interpretation clarifies the accounting for income taxes by prescribing the recognition threshold a tax position is required to meet before being recognized in the financial statements. This interpretation also provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006. We are currently evaluating the impact of FIN 48 on our consolidated results of operations and financial position.

In September 2006, the FASB issued Statement No. 157, *Fair Value Measurements*. The standard provides enhanced guidance for using fair value to measure assets and liabilities. The standard also responds to investors' requests for expanded information about the extent to which companies measure assets and liabilities at fair value, the information used to measure fair value, and the effect of fair value measurements on earnings. This statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements and is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. The Statement applies under other accounting pronouncements that require or permit fair value measurements. We are currently evaluating the impact of this

statement on our results of operations and financial position.

On September 13, 2006 the Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin No. 108 (SAB 108), *Considering the Effects of Prior Year Misstatements when Qualifying Misstatements in Current Year Financial Statements*. The interpretations in this Staff Accounting Bulletin are

Table of Contents

being issued to address diversity in practice in quantifying financial statement misstatements and the potential under current practice for the build up of improper amounts on the balance sheet. SAB 108 is effective for fiscal years beginning after November 15, 2006. We are currently evaluating the impact of SAB 108 on our results of operations; however we do not expect the impact to be material to our financial position or results of operations.

On September 29, 2006, the FASB issued Statement No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans - An Amendment of FASB Statements No. 87, 88, 106, and 123R*. This new standard requires an employer to: (a) recognize in its statement of financial position an asset for a plan's overfunded status or a liability for a plan's underfunded status; (b) measure a plan's assets and its obligations that determine its funded status as of the end of the employer's fiscal year (with limited exceptions); and (c) recognize changes in the funded status of a defined benefit postretirement plan in the year in which the changes occur. Those changes will be reported in comprehensive income of a business entity. The requirement to recognize the funded status of a benefit plan and the disclosure requirements are effective as of the end of the fiscal year ending after December 15, 2006. The requirement to measure plan assets and benefit obligations as of the date of the employer's fiscal year-end statement of financial position is effective for fiscal years ending after December 15, 2008. We are currently evaluating the impact of FASB Statement No. 158 on our consolidated results of operations and financial position.

Foreign Currency Matters

The functional currency of each of our foreign operations is the local currency. Assets and liabilities of foreign subsidiaries are translated at the exchange rates in effect at the balance sheet dates, while net sales, expenses and cash flows are translated at average exchange rates for the period. Translation gains and losses are reported as a component of stockholders' equity.

Effects of Inflation

Because of the relatively low level of inflation experienced in most of our principal markets, general inflation did not have a material impact on our results of operations during the periods presented. We have, however, experienced increased energy, freight, oil and metal based raw material costs. Favorable pricing of our products have helped to offset these increases.

Critical Accounting Policies and Estimates

Management's discussion and analysis of its financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the U.S. The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, sales and expenses as well as the disclosure of contingent assets and liabilities. We regularly review our estimates and assumptions. These estimates and assumptions, which are based upon historical experience and on various other factors believed to be reasonable under the circumstances, form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Reported amounts and disclosures may have been different had management used different estimates and assumptions or if different conditions had occurred in the periods presented. Our accounting policies can be found in **Note 2** to our Consolidated Financial Statements. Below is a discussion of the policies that we believe may involve a high degree of judgment and complexity.

Trade Receivables

We record an allowance for doubtful accounts; reducing our receivables balance to an amount we estimate is collectible from our customers. We use significant judgment in estimating uncollectible amounts, considering

numerous factors such as current overall economic conditions, industry specific economic conditions, historical and current customer performance and customer relationships. Although we consider our allowances for uncollectible accounts to be adequate and proper, changes in economic conditions or customer

Table of Contents

circumstances could have a material effect on the reserve balances required. Historically, actual results have not deviated significantly from those previously estimated by management.

Inventories

Our inventories are stated at the lower of cost or market value. We review our inventory balances to determine if inventories can be sold at amounts equal to or greater than their recorded values. The review includes the identification of slow-moving inventories, obsolete inventories and discontinued products based on the historical performance of the inventories and current operational plans for inventories, as well as estimated future customer demand for the inventories. Historically, actual results have not deviated significantly from those previously estimated by management.

Income Taxes

Deferred tax assets and liabilities represent the tax effects, based on current law, of any temporary differences in the timing of when net sales and expenses are recognized for tax purposes and when they are recognized for financial statement purposes. Management reviews the deferred tax assets periodically for recoverability, and valuation allowances are provided as necessary. We consider expected future income and gains from investments as well as tax planning strategies, including the potential sale of certain assets, in assessing the need for a valuation allowance against our deferred tax assets. If future taxable income is different than expected, we may need to change our valuation allowance on our deferred tax assets.

Significant judgment is required in determining our effective tax rate and in evaluation of our tax provisions. Despite our belief that our tax return positions are fully supportable, we estimate tax exposures and establish reserves when in our judgment we believe they are required. We adjust these reserves in light of changing facts and circumstances, such as the progress of a tax audit.

Assets Held for Sale

We record reserves for the difference between the carrying value and the net realizable value of our net assets held for sale. These reserves require that management make assumptions about estimated proceeds, based on the demand for these assets and current market conditions, and about estimated costs to sell, based on management's professional knowledge and experience. We monitor these reserves on an on-going basis and record adjustments to our estimates based on actual results and management's updated knowledge. Assets held for sale have been evaluated for impairment in accordance with SFAS No. 144, *Accounting for Impairment or Disposal of Long-lived Assets* (SFAS No. 144).

Goodwill

We have significant intangible assets related to goodwill. The determination of related estimated useful lives and whether or not these assets are impaired involves significant judgment. Changes in strategy, reporting unit operating results and/or market conditions could significantly impact our judgment and could require adjustments to recorded asset balances. In accordance with SFAS No. 142, *Goodwill and Intangible Assets* (SFAS No. 142), we test our goodwill for impairment at the reporting unit level annually in the fourth quarter of each fiscal year, or earlier in the year if indications of impairment arise. The results of any of these tests could require adjustments to recorded asset balances in future periods.

Costs Associated with Exit or Disposal Activities

In establishing accruals for restructuring costs associated with exit or disposal activities, we measure our liability at fair value in the period in which the liability is incurred in accordance with SFAS No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*. In estimating the fair value of expected exit and disposal costs, we make certain assumptions to determine the remaining lease obligations, sublease income, severance costs, relocation costs and other exit costs. While we feel our assumptions are appropriate, there can be no assurance that actual costs will not differ from estimates used to establish the restructuring

Table of Contents

reserves. If actual results differ from our estimates, we may need to adjust, upward or downward, our restructuring reserves in the future. Additionally, long-lived assets are evaluated for impairment in accordance with SFAS No. 144, which involves the use of estimates to calculate fair value, future cash flows and costs to sell. These estimates may differ from actual amounts realized in future periods.

Commitments and Contingencies

We are subject to proceedings, lawsuits and other claims related to environmental, labor, product and other matters. We are required to assess the likelihood of any adverse judgments or outcomes to these matters as well as potential ranges of probable losses. We determine the amount of reserves needed, if any, for each individual issue based on our professional knowledge and experience and discussions with legal counsel. The required reserves may change in the future due to new developments in each matter, the ultimate resolution of each matter or changes in approach, such as a change in settlement strategy, in dealing with these matters.

We have sold a number of assets and businesses over the last several years and have, on occasion, provided indemnification for liabilities relating to product liability, environmental and other claims. We have recorded reserves for claims related to these obligations when appropriate and, on certain occasions, have obtained the assistance of an independent actuary in the determination of those reserves. If actual experience deviates from our estimates, we may need to record adjustments to these liabilities in future periods.

Our insurance programs for workers' compensation, general liability, vehicle liability and employee-related health care benefits are effectively self-insured. We record self-insurance accruals based on our estimates of the fully developed cost of claims filed and claims incurred but not reported. Estimates of claims development and claims incurred but not reported are developed by us with the help of an independent actuary. If actual experience of claims development is significantly different than our estimates, an adjustment to our self-insurance accruals may need to be recorded in future periods.

We are aware of four purported class action lawsuits related to the merger filed against the Company, each of the Company's directors and various other defendants, as the case may be, including Apollo, Parent, Merger Subsidiary and George M. Sherman (the non-executive Chairman of Rexnord Corporation, a portfolio company affiliated with Apollo), in the Court of Chancery in the State of Delaware in and for New Castle County. The lawsuits *Usheroff v. Jacuzzi Brands, Inc., et al.*, C. A. No. 2473-N (filed Oct. 13, 2006), *Ryan v. Victor, et al.*, C.A. No. 2477-N (filed Oct. 13, 2006), *Rubenstein v. Marini, et al.*, C. A. No. 2485-N (filed Oct. 20, 2006) and *Worcester Retirement System v. Jacuzzi Brands, Inc., et al.*, C.A. No. 2531-N (filed Nov. 8, 2006) generally allege, among other things, that the merger consideration to be paid to the Company's stockholders in the merger is unfair and grossly inadequate. In addition, the complaints allege that the Company's directors violated their fiduciary duties by, among other things, failing to take all reasonable steps to assure the maximization of stockholder value, including the exploration of strategic alternatives that will return greater or equivalent short-term value to the Company's stockholders. Certain of the complaints further allege that the preliminary proxy statement on Form 14A filed by the Company on November 2, 2006 is materially misleading and omits material facts. The complaints each seek, among other relief, certification of the lawsuit as a class action, a declaration that the merger is unfair, unjust and inequitable to the Company's stockholders, an injunction preventing completion of the merger at a price that is not fair and equitable, compensatory damages to the class, attorneys' fees and expenses, along with such other relief as the court might find just and proper. In addition, the complaint filed by Worcester Retirement System seeks to expedite its application for a preliminary injunction and related discovery. We believe that these lawsuits are without merit and plan to defend them vigorously. However, even if these lawsuits are determined to be without merit, they may potentially delay or, if the delay is substantial enough to prevent the consummation of the merger by February 15, 2007, potentially prevent the consummation of the merger. Additional lawsuits pertaining to the merger could be filed in the future.

Warranty Reserves

Reserves are recorded on our consolidated balance sheets to reflect our contractual liabilities relating to warranty commitments to our customers. We provide warranty coverage of various lengths and terms to our

Table of Contents

customers depending on standard offerings and negotiated contractual agreements. We record an estimate for warranty expense at the time of sale based on historical warranty return rates and repair costs. Should future warranty experience differ materially from our historical experience, we may be required to record additional warranty reserves which could have a material adverse effect on our results of operations in the period in which these additional reserves are required.

Pension and Other Post-Employment Benefits

We have significant pension and post-retirement benefit income and expense and assets/liabilities that are developed from actuarial valuations. These valuations include key assumptions regarding discount rates, expected return on plan assets, mortality rates, merit and promotion increases and the current health care cost trend rate. We consider current market conditions in selecting these assumptions. Changes in the related pension and post-retirement benefit income/costs or assets/liabilities may occur in the future due to changes in the assumptions and changes in asset values.

Future changes in the assumptions underlying our pension valuations, including those that arise as a result of declines in equity markets and interest rates, could result in reductions in pension income, which could negatively affect our consolidated results of operations in future periods.

Included in operating income is \$7.5 million of pension expense in fiscal 2006 and \$0.3 million and \$4.9 million of pension income in fiscal 2005 and 2004, respectively. Fiscal 2006 includes \$2.9 million of expense related to prior years (see **Note 6**). Excluding service costs, we recognize pension income related to our domestic Master Pension Plan. This income is included as a reduction of our corporate expenses. Our domestic Master Pension Plan covers certain past and present employees and retirees in our operating segments and our corporate office, as well as certain employees of companies that we previously owned. Service costs associated with our domestic Master Pension Plan are allocated to the operating segments and corporate based on employee data. Pension expense associated with our foreign pension plans and our other post-employment benefit plans are recorded by the business whose employees benefit from such plans and are not shared between operating segments.

Environmental Liabilities

We accrue an estimated liability for each environmental matter when the likelihood of an unfavorable outcome is probable and the amount of loss associated with such unfavorable outcome is reasonably estimable. We presume that a matter is probable of an unfavorable outcome if (a) litigation has commenced or a claim has been asserted or if commencement of litigation or assertion of a claim is probable and (b) if we are somehow associated with the site. In addition, if the reporting entity has been named as a Potentially Responsible Party (PRP), an unfavorable outcome is presumed.

Estimating environmental remediation liabilities involves an array of issues at any point in time. In the early stages of the process, cost estimates can be difficult to derive because of uncertainties about a variety of factors. For this reason, estimates developed in the early stages of remediation can vary significantly; and, in many cases, early estimates later require significant revision. The following are some of the factors that are integral to developing cost estimates:

The extent and types of hazardous substances at a site;

The range of technologies that can be used for remediation;

Evolving standards of what constitutes acceptable remediation; and

The number and financial condition of other PRPs and the extent of their responsibility for the remediation.

An estimate of the range of an environmental remediation liability typically is derived by combining estimates of various components of the liability, which themselves are likely to be ranges. At the early stages of the remediation process, particular components of the overall liability may not be reasonably estimable. This fact does not preclude our recognition of a liability. Rather, the components of the liability that can be

Table of Contents

reasonably estimated are viewed as a surrogate for the minimum in the range of our overall liability. Estimated legal and consulting fees are included as a component of our overall liability.

Asbestos Claims and Insurance for Asbestos Claims

As noted in **Item 3 Legal Proceedings** of this Annual Report on Form 10-K, Zurn records a liability for pending and potential future asbestos claims, as well as a receivable for insurance coverage of such liability. The valuation of Zurn's potential asbestos liability, which was performed this year by an independent economic consulting firm with substantial experience in asbestos liability valuations, was based on the number and severity of future asbestos claims, future settlement costs, and the effectiveness of Zurn's defense strategies and settlement initiatives.

Zurn's present estimate of its asbestos liability assumes (i) its continuous vigorous defense strategy will remain effective; (ii) new asbestos claims filed annually against it will decline modestly through 2016; (iii) the values by disease will remain consistent with past experience and (iv) its insurers will continue to pay defense costs without eroding the coverage amounts of its insurance policies. Zurn's potential asbestos liability could be adversely affected by changes in law and other factors beyond its control. Further, while Zurn's current asbestos liability is based on an estimate of claims through 2016, such liability may continue beyond 2016, and such liability could be substantial.

Zurn estimates that its available insurance to cover its potential asbestos liability as of the end of fiscal 2006 is greater than its potential asbestos liability. This conclusion was reached after considering Zurn's experience in asbestos litigation, the insurance payments made to date by Zurn's insurance carriers, existing insurance policies, the industry ratings of the insurers and the advice of insurance coverage counsel with respect to applicable insurance coverage law relating to the terms and conditions of those policies. Zurn used these same considerations when evaluating the recoverability of its receivable for insurance coverage of potential asbestos claims.

Revenue Recognition

We recognize revenue when all of the following criteria are met: persuasive evidence of the arrangement exists; delivery has occurred and we have no remaining obligations; prices are fixed or determinable; and collectibility is probable. We make shipments to approved customers based on orders placed. Prices are fixed when the customer places the order. An approved customer is one that has been subjected to our credit evaluation. We record revenue when title passes, which is either at the time of shipment or upon delivery to the customer. The passage of title is dependent on the arrangements made with each customer. Provisions are made for sales returns and allowances at the time of sale.

We use significant judgment in estimating sales return costs, considering numerous factors such as current overall and industry-specific economic conditions and historical sales return rates. Although we consider our sales return reserves to be adequate and proper, changes in historical customer patterns could require adjustments to the reserves. Historically, however, actual results have not deviated significantly from those previously estimated by management. We also record reductions to our revenues for customer and distributor programs and incentive offerings including special pricing agreements, promotions and other volume-based incentives. We may take actions to increase customer incentive offerings possibly resulting in an incremental reduction of revenue at the time the incentive is offered.

Accounting for Stock-Based Compensation

Effective October 2, 2005, we adopted the fair value recognition provisions of FASB Statement No. 123R, *Share-Based Payment*, and related interpretations (SFAS No. 123R) using the modified prospective transition method. Under that method, compensation cost recognized beginning in the first quarter of 2006 includes (a) compensation cost for all share-based payments granted prior to, but not yet vested as of, October 2, 2005 based on

the grant date fair value estimated in accordance with the original provisions of SFAS No. 123 and (b) compensation cost for all share-based payments granted on or subsequent to October 2, 2005, based on the grant-date fair value estimated in accordance with the provisions of SFAS No. 123R.

Table of Contents

Compensation cost related to stock awards granted prior to, but not vested as of, October 2, 2005 continues to be amortized using the expense attribution method described in FIN 28, while compensation cost associated with stock awards granted on or after October 2, 2005 is being recognized on a straight-line basis over the requisite service period for the entire award in accordance with the provisions of SFAS No. 123R. Results for the prior periods have not been restated. For further information regarding our stock option plans, see **Note 8** to our Consolidated Financial Statements.

Discontinued Operations

Effective October 1, 2002, we adopted SFAS No. 144, which establishes a single accounting model for the impairment or disposal of long-lived assets, including discontinued operations. SFAS No. 144 supersedes SFAS No. 121, *Accounting for the Impairment of Long-lived Assets and for Long-lived Assets to be Disposed Of*. The swimming pool and equipment, hearth and water systems businesses, Eljer and (S&J) have all been accounted for in accordance with SFAS No. 144. This accounting standard contains criteria that must be met in order for a business to be presented as a discontinued operation.

In connection with our accounting for these dispositions, we segregated the assets, liabilities and operations of the discontinued businesses. The operations are presented as discontinued operations in our consolidated statements of operations. The assets and liabilities of these businesses are included in assets held for sale and liabilities associated with assets held for sale in the balance sheets until they are sold.

Variable Interest Entities

Any potential variable interest entity (VIE) created after January 31, 2003 in which we hold a variable interest must be assessed to determine whether the VIE should be consolidated into our results based on criteria established by FASB Interpretation No. 46, *Consolidation of Variable Interest Entities, an Interpretation of ARB No. 51* (FIN 46). Management uses judgment to determine whether an entity is a variable interest entity and whether we are the primary beneficiary. We have completed an evaluation of our variable interests and believe that we do not have any interests in any VIEs.

Disclosure Concerning Forward-Looking Statements and Factors That May Affect Future Results

In December 1995, the Private Securities Litigation Reform Act of 1995 (the Act) was enacted by the U.S. Congress. The Act, as amended, contains certain amendments to the Securities Act of 1933 and the Securities Exchange Act of 1934. These amendments provide protection from liability in private lawsuits for forward-looking statements made by public companies. We take advantage of the safe harbor provisions of the Act.

Our Annual Report on Form 10-K contains both historical information and other information that may be used to infer future performance. Examples of historical information include our annual financial statements and the commentary on past performance contained in the MD&A. While we have specifically identified certain information as being forward-looking in the context of its presentation, we caution the reader that, with the exception of information that is clearly historical, all the information contained in this Annual Report on Form 10-K should be considered to be forward-looking statements as referred to in the Act. Without limitation, when we use the words believe, estimate, plan, expect, intend, anticipate, continue, project, probably, should, and similar expressions, we intend to express that the information deals with possible future events and is forward-looking in nature.

The following are some of the factors we believe could cause our actual results to differ materially from expected and historical results:

The seasonality of our sales and economic events may adversely affect our financial results and our ability to service our debt.

Weather could adversely affect the demand for our products and decrease our net sales.

Demand for building and home improvement products may depend on availability of financing.

Table of Contents

We may be adversely affected by downturns in the markets we serve.

The markets in which we sell our products are highly competitive.

The loss of any significant customer could adversely affect our business.

An increase in the price of raw materials, components, finished goods and other commodities could adversely affect our operations.

We are exposed to political, economic and other risks that arise from operating a multinational business.

We are subject to currency exchange rate and other related risks.

Adverse investment returns and other factors may increase our pension liability and pension expense.

Our financial statements are based upon estimates and assumptions that may differ from actual results.

We are subject to numerous asbestos claims that could adversely affect us.

We are subject to environmental regulation and incur costs relating to environmental matters.

We may not be able to protect our intellectual property rights.

Our failure to attract and retain qualified resources could have an adverse effect on us.

Work stoppages and other labor problems could affect us.

We have substantial indebtedness and servicing our indebtedness reduces funds available to operate our business.

Our debt instruments contain covenants which will limit our ability to operate our business.

To service our indebtedness, we will require a significant amount of cash. Our ability to generate cash depends on many factors beyond our control.

Other factors besides those listed here could also adversely affect results. For more information regarding these forward-looking statements and factors that may affect future results, refer to the **Risk Factors** section in **Item 1** of this Annual Report on Form 10-K.

Table of Contents

Item 7A. *Qualitative and Quantitative Disclosures About Market Risk*

We are exposed to foreign currency exchange risk related to our international operations as well as our U.S. businesses, which import or export goods. We have made limited use of financial instruments to manage this risk and have no such instruments outstanding as of September 30, 2006. Hypothetical unfavorable movements of 10% across each of the foreign exchange rates from which we have exposure would have decreased our estimated earnings from continuing operations by approximately \$1.8 million, before taxes, in fiscal 2006. This calculation assumes that each exchange rate would change in the same direction relative to the U.S. dollar. In addition to the direct effects of changes in exchange rates, which are a changed dollar value of the resulting sales, changes in exchange rates also affect the volume of sales or the foreign currency sales price as competitors' products become more or less attractive. Our sensitivity analysis of the effects of changes in foreign currency exchange rates does not factor in a potential change in sales levels or local currency prices.

We did not have any significant variable interest rate debt at September 30, 2006, and we do not anticipate incurring substantial amounts of such debt during fiscal 2007. Therefore, market risks associated with interest rate changes are expected to be minimal for fiscal 2007.

Item 8. *Financial Statements and Supplementary Data*

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management of Jacuzzi Brands, Inc. is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934. We recognize that internal control over financial reporting cannot provide absolute assurance of achieving financial reporting objectives because of its inherent limitations. Internal control over financial reporting is a process that involves human diligence and is subject to the possibility of human error or the circumvention or the overriding of internal control. Therefore, there is a risk that material misstatements may not be prevented or detected on a timely basis by internal control over financial reporting. However, we believe we have designed into the process safeguards to reduce, though not eliminate, this risk. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In order to ensure that the Company's internal control over financial reporting was effective as of September 30, 2006, we conducted an assessment of its effectiveness under the supervision and with the participation of our management group including our Chief Executive Officer and Chief Financial Officer. This assessment was based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Based on our assessment of internal control over financial reporting under the criteria established in Internal Control Integrated Framework, we have concluded that, as of September 30, 2006, the Company's internal control over financial reporting is effective. Our assessment of the effectiveness of the Company's internal control over financial reporting as of September 30, 2006 has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their attestation report which is included herein.

Board of Directors and Stockholders

Jacuzzi Brands, Inc.

We have audited the accompanying consolidated balance sheets of Jacuzzi Brands, Inc. as of September 30, 2006 and 2005, and the related consolidated statements of operations, cash flows and changes in stockholders' equity for each of the three years in the period ended September 30, 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Jacuzzi Brands, Inc. at September 30, 2006 and 2005, and the consolidated results of its operations and its cash flows for each of the three years in the period ended September 30, 2006, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Jacuzzi Brands, Inc.'s internal control over financial reporting as of September 30, 2006, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated December 1, 2006 expressed an unqualified opinion thereon.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders

Jacuzzi Brands, Inc.

We have audited management's assessment, included in the accompanying Management's Report on Internal Control Over Financial Reporting, that Jacuzzi Brands, Inc. maintained effective internal control over financial reporting as of September 30, 2006, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO Criteria). Jacuzzi Brands, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that Jacuzzi Brands, Inc. maintained effective internal control over financial reporting as of September 30, 2006, is fairly stated, in all material respects, based on the COSO Criteria. Also in our opinion, Jacuzzi Brands, Inc. maintained, in all material respects, effective internal control over financial reporting as of September 30, 2006, based on the COSO Criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Jacuzzi Brands, Inc. as of September 30, 2006 and 2005, and the related consolidated statements of operations, cash flows and changes in stockholders' equity for each of the three years in the period ended September 30, 2006 and our report dated December 1, 2006 expressed an unqualified opinion thereon.

JACUZZI BRANDS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 Basis of Presentation

We manufacture and distribute a broad range of consumer and industrial products through our operating subsidiaries in two business segments – Bath Products and Plumbing Products. Prior year amounts also include the Rexair segment (see **Note 3** regarding the sale of Rexair, Inc.). Please refer to **Note 11** regarding our business segments.

On October 11, 2006, we announced that a definitive merger agreement had been signed under which affiliates of private equity firm Apollo Management L.P. (Apollo) will purchase Jacuzzi Brands for \$12.50 per share. The acquisition is subject to certain closing conditions, including the approval of our shareholders, regulatory approval, and the receipt by Apollo of all necessary debt financing, and is expected to close in the first quarter of calendar 2007. If the merger agreement is terminated, the agreement specifies that under certain circumstances, we will be obligated to pay a termination fee to Apollo which could range from \$6 million to \$25 million.

As previously announced, in connection with the merger agreement, we launched a cash tender offer and consent solicitation on December 4, 2006 with respect to our outstanding \$380 million in aggregate principal amount 95/8% Senior Secured Notes due 2010 (Senior Notes). The consummation of the tender offer is conditioned upon, among other things, the consummation of the proposed merger as well as the receipt of consent from the majority of the holders of the Senior Notes.

We operate on a 52- or 53-week fiscal year ending on the Saturday nearest to September 30. The fiscal year periods presented in our consolidated financial statements consist of the 52 weeks ended September 30, 2006 (2006), the 52 weeks ended October 1, 2005 (2005) and the 53 weeks ended on October 2, 2004 (2004), but are presented as of September 30 in each of those years for convenience. Businesses over which we had the ability to exercise significant influence, but are not consolidated into our results, were accounted for using the equity method. We eliminate inter-company balances and transactions when consolidating the account balances of our subsidiaries.

Any potential variable interest entity (VIE) in which we hold a variable interest has been assessed to determine whether the VIE should be consolidated into our results based on criteria established by FASB Interpretation No. 46, *Consolidation of Variable Interest Entities, an Interpretation of ARB No. 51* (FIN 46). We have evaluated our interests in our wholly-owned subsidiaries and continue to consolidate them under the guidelines set forth in ARB No. 51, *Consolidated Financial Statements* (ARB 51), and FASB Statement No. 94, *Consolidation of All Majority-Owned Subsidiaries*. We have also completed an evaluation of all of our variable interests and believe that we do not have any interests in variable interest entities, as defined by FIN 46.

Certain amounts have been reclassified in our prior year consolidated financial statements to conform them to the presentation used in the current year.

Revision of Statements of Cash Flows

In 2006, we have separately disclosed the operating, investing and financing portion of the cash flows attributable to our discontinued operations, which in prior periods were reported on a combined basis as a

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 1 Basis of Presentation (Continued)**

single amount. The annual Statements of Cash Flows have been revised to reflect this change. The revision had the following impact on the past three fiscal years ended:

	September 30,		
	2005	2004	2003
Net cash used in discontinued operations, as reported	\$ (31.2)	\$ (14.6)	\$ (8.9)
Adjustments		0.3	1.5
Net cash used in operating activities of discontinued operations, revised	(31.2)	(14.3)	(7.4)
Net cash used in investing activities of discontinued operations, as reported			
Adjustments	(0.7)	(0.3)	(1.5)
Net cash used in investing activities of discontinued operations, revised	(0.7)	(0.3)	(1.5)
Net cash provided by financing activities of discontinued operations, as reported			
Adjustments	0.7		
Net cash provided by financing activities of discontinued operations, revised	0.7		

Note 2 Accounting Policies

Use of Estimates: Generally accepted accounting principles require us to make estimates and assumptions that affect amounts reported in our financial statements and accompanying notes. Actual results could differ from those estimates.

Foreign Currency Translation: Our subsidiaries outside of the U.S. record transactions using their local currency as their functional currency. In accordance with FASB Statement No. 52, *Foreign Currency Translation*, the assets and liabilities of our foreign subsidiaries are translated into U.S. dollars using the exchange rates in effect at the balance sheet dates. Revenues, expenses and cash flow items are translated at average daily exchange rates for the period. The gains and losses resulting from the changes in exchange rates from year to year have been reported in other comprehensive earnings.

Cash and Cash Equivalents: We consider all highly liquid investments with original maturities of three months or less when purchased to be cash equivalents.

Trade Receivables and Concentration of Credit Risk: We record an allowance for doubtful accounts, reducing our receivables balance to an amount we estimate is collectible from our customers. A rollforward of the balances in allowance for doubtful accounts is as follows:

Deductions

Description	Balance at Beginning of Period	Additions Charged to Expense	Write-offs, Payments and Other Adjustments (in millions)	Balance at End of Period
Allowance for doubtful accounts:				
2006	\$ 8.2	\$ 1.9	\$ (0.8)	\$ 9.3
2005	8.7	3.1	(3.6)	8.2
2004	8.9	5.0	(5.2)	8.7

We operate in the U.S., Europe and, to a lesser extent, in other regions of the world. We perform periodic credit evaluations of our customers' financial condition and generally do not require collateral. We encounter a

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 2 Basis of Presentation (Continued)**

certain amount of credit risk as a result of a concentration of receivables among a few significant customers, the largest of which, Ferguson, accounted for 11.0% of our total sales in 2006. As of September 30, 2006, this customer represented approximately 15.2% of our trade receivables. No single customer accounted for more than 10% of our total sales in fiscal 2005 or 2004.

Income Taxes: Deferred tax assets and liabilities represent the tax effects, based on current law, of any temporary differences in the timing of when revenues and expenses are recognized for tax purposes and when they are recognized for financial statement purposes. The deferred tax assets are reviewed periodically for recoverability and valuation allowances are provided as necessary.

Inventories: Our inventories are stated at the lower of cost or market value. We used the first-in-first-out (FIFO) method for determining the cost of approximately 39.0% of our inventories in 2006 and approximately 52.4% of our inventories in 2005, and the last-in-first-out (LIFO) method for the remainder of our inventories. The FIFO method approximates replacement cost. Our inventories are categorized as follows:

	At September 30,	
	2006	2005
	(in millions)	
Finished products	\$ 147.4	\$ 112.1
In-process products	15.1	12.9
Raw materials	49.4	43.4
Inventory at FIFO	211.9	168.4
LIFO reserve	(17.3)	(3.4)
	\$ 194.6	\$ 165.0

The LIFO reserve represents the difference between the carrying value of our LIFO inventories and their FIFO cost value. The increase over 2005 is due to an increase in raw material costs, most notably the cost of brass.

Property, Plant and Equipment: We record our property, plant and equipment at cost. We record depreciation and amortization in a manner that recognizes the cost of our depreciable assets in operations over their estimated useful lives using the straight-line method. We estimate the useful lives of our depreciable assets to be 20-50 years for buildings and 1-15 years for machinery, equipment and furniture. Leasehold improvements are amortized over the shorter of the terms of the underlying leases, including probable renewal periods, or the estimated useful lives of the improvements.

Property, plant and equipment consist of:

	At September 30,	
	2006	2005
	(in millions)	
Land and buildings	\$ 59.8	\$ 63.6
Machinery, equipment and furniture	164.8	161.9
Accumulated depreciation	(132.1)	(121.8)
	\$ 92.5	\$ 103.7

Other Non-current Assets: Included in other non-current assets at September 30, 2006 is \$1.8 million related to our equity investment in Rexair. Upon the sale of Rexair in June 2005, we retained an approximate 30% equity interest in Rexair's new parent company. The investment is accounted for under the equity method in accordance with APB No. 18, *The Equity Method of Accounting for Investments in Common Stock* (see also

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 2 Basis of Presentation (Continued)**

Note 3). In the fourth quarter of 2006, we received \$7.6 million related to this investment, of which \$4.4 million was accounted for as a dividend and included in operating cash flows and \$3.2 million was accounted for as a return of our investment and included in investing cash flows. Also included in other non-current assets is \$8.8 million of debt related fees. This amount will be amortized over the remaining lives of our Senior Notes and revolving credit facility (see **Note 5**).

Goodwill: Goodwill is not amortized, but is subject to annual impairment tests in accordance with FASB Statement No. 142, *Goodwill and Other Intangible Assets* (SFAS No. 142). Finite-lived intangible assets are amortized over their useful lives and are subject to impairment evaluation under FASB Statement No. 144, *Accounting for the Impairment or Disposal of Long-lived Assets* (SFAS No. 144).

We test our goodwill for impairment at the reporting unit level utilizing a two-step methodology. The initial step requires us to determine the fair value of each reporting unit and of each indefinite-lived intangible asset and compare it to the carrying value, including goodwill, of such reporting unit. If the fair value exceeds the carrying value, no impairment loss is recognized and the second step, which is a calculation of the impairment, is not performed. However, if the carrying value of the reporting unit or intangible asset exceeds its fair value, an impairment charge equal to the difference in the values should be recorded. We perform an impairment test annually in the fourth quarter of each year, unless an event occurs earlier in the year that requires us to perform an interim test. In 2006 and 2005, the fair values of each of our reporting units exceeded their respective carrying values. Consequently, no impairment of our goodwill was indicated.

In accordance with SFAS No. 142, any allocation of goodwill to an entity sold is done based on relative fair values. We sold our Rexair and Eljer business during 2005. Rexair was the only business in the Rexair segment; thus, we wrote off all goodwill associated with that segment. Eljer was part of our Bath Products segment. However, none of the goodwill was allocated to Eljer as part of the sale since Eljer's fair value at the date of the transaction was minimal.

Goodwill by reporting unit is as follows:

	At September 30,	
	2006	2005
	(in millions)	
Bath Products	\$ 105.6	\$ 102.4
Plumbing Products	125.8	125.8
	\$ 231.4	\$ 228.2

Accrued Expenses and Other Current Liabilities: Accrued expenses and other current liabilities consist of the following:

	At September 30,	
	2006	2005
	(in millions)	
Compensation related	\$ 21.4	\$ 16.0
Insurance	3.5	4.8
Customer incentives	25.6	23.8
Interest	9.5	9.6
Warranty	13.2	12.2
Commissions	7.1	6.2
Other ⁽¹⁾	29.0	41.8

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

	At September 30,	
	2006	2005
	(in millions)	
Note 2 Basis of Presentation (Continued)	\$ 109.3	\$ 114.4

⁽¹⁾ The decrease in other relates primarily to current year payments associated with liabilities retained from the sales of Rexair and Eljer in 2005.

We record a reserve for future warranty costs based on current unit sales, historical experience and management's judgment regarding anticipated rates of warranty claims and cost per claim. The adequacy of the recorded warranty reserves is assessed each quarter and adjustments are made as necessary. The specific terms and conditions of the warranties vary depending on the products sold and the countries in which we do business.

Changes in our warranty reserves, a portion of which are classified as long-term on our consolidated balance sheets, during 2006 and 2005 are as follows:

	At September 30,	
	2006	2005
	(in millions)	
Beginning balance	\$ 24.3	\$ 25.3
Warranty accrual	17.8	15.4
Cash payments	(17.0)	(15.4)
Other	0.5	
Sale of Rexair (See Note 3)		(1.0)
Ending balance	\$ 25.6	\$ 24.3

Fair Value of Financial Instruments: FASB Statement No. 107, *Disclosure about Fair Value of Financial Instruments*, requires that we disclose the fair value of our financial instruments when it is practical to estimate. We have determined the estimated fair values of our financial instruments, which are either recognized in our consolidated balance sheets or disclosed within these notes, using available market information and appropriate valuation methodologies. However, considerable judgment is required in interpreting market data to develop estimates of fair value. Accordingly, the estimates presented are not necessarily indicative of the amounts we could realize in a current market exchange.

Short-term Assets and Liabilities: The fair values of our cash and cash equivalents, trade receivables and accounts payable approximate their carrying values because of their short-term nature.

Long-term Debt: The fair values of our Senior Notes (as defined in **Note 5**) were determined by reference to quoted market prices. The fair value of our remaining debt is determined by discounting the cash flows using current interest rates for financial instruments with similar characteristics and maturities. The fair value of our remaining debt approximates its carrying value as of September 30, 2006 and 2005.

There were no other significant differences as of September 30, 2006 and 2005 between the carrying value and fair value of our financial instruments except as disclosed below:

	At September 30, 2006		At September 30, 2005	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(in millions)			
9.625% Senior Notes	\$ 380.0	\$ 402.8	\$ 380.0	\$ 402.8

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 2 Basis of Presentation (Continued)**

Revenue Recognition: We recognize revenue when all of the following criteria are met: persuasive evidence of the arrangement exists; delivery has occurred and we have no remaining obligations; prices are fixed or determinable; and collectibility is probable. We make shipments to approved customers based on orders placed. Prices are fixed when the customer places the order. An approved customer is one that has been subjected to our credit evaluation. We record revenue when title passes, which is either at the time of shipment or upon delivery to the customer. The passage of title is dependent on the arrangements made with each customer. Provisions are made for sales returns and allowances at the time of sale.

Management uses significant judgment in estimating sales returns, considering numerous factors such as current overall and industry-specific economic conditions and historical sales return rates. Although we consider our sales return reserves to be adequate and proper, changes in historical customer patterns could require adjustments to the reserves. We also record reductions to our revenues for customer and distributor programs and incentive offerings including special pricing agreements, promotions and other volume-based incentives.

As required by Emerging Issues Task Force Issue No. 01-09, *Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Products)*, we account for sales incentives, such as discounts, rebates and volume incentives, as a reduction of revenue at the later of 1) the date that the related revenue is recognized or 2) the date when the sales incentive is offered. In the case of volume incentives, we recognize the reduction of revenue ratably over the period of the underlying transactions that result in progress by the customer toward earning the incentive. We record free product given to customers as a sales incentive in cost of products sold.

Shipping and Handling Fees and Costs: We classify amounts charged to our customers for shipping and handling as revenues, while shipping and handling costs are recorded as cost of products sold.

Other Income/(Expense), net: Other income/(expense), net consists of the following:

	For the Fiscal Years Ended September 30,		
	2006	2005	2004
	(in millions)		
Keller Ladder expenses	\$ 0.5	\$ (1.0)	\$ (1.6)
Gain (Loss) on collection or sales of other non-operating assets	9.3	(0.7)	2.5
(Loss) gain on sale of excess properties and equipment	(0.6)	1.7	(0.1)
Foreign currency translation (losses) gains	(1.7)	0.4	(1.9)
Debt retirement costs		(3.2)	
Gain on litigation of environmental claim	3.5		
Other, net	(3.5)	(3.8)	(2.1)
	\$ 7.5	\$ (6.6)	\$ (3.2)

We retained certain obligations related to our Keller Ladder operations, the majority of which relate to claims for defective ladders sold before the sale of Keller Ladder in October 1999. We continue to incur income and expenses related to those obligations. As a result of a favorable trend in the settlement of these obligations we reduced our estimated liability in fiscal 2006; however future year expenses are expected to be more in line with the expense recognized in the past two years. The gain on collection or sale of non-operating assets of \$9.3 million in fiscal 2006 relates to a gain on the collection of a note which had previously been deferred until collection. We had obtained the note in October 2002 upon the sale of a piece of property to Woodlands Ventures, LLC. Foreign currency translation (losses)/gains in fiscal 2006 include \$1.6 million recorded in the current period related to a prior year transaction. The impact of the adjustment if made in the

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 2 Basis of Presentation (Continued)**

appropriate periods would not have a material effect on the financial position or operating results of those periods. Debt retirement costs are associated with the repayment of the term loan, which was retired with proceeds from the sale of Rexair in 2005. Gain on litigation of environmental claim was the result of a favorable judgment received on an environmental liability retained as part of the sale of Rexair.

Advertising Costs: Advertising costs are charged to expense when incurred. Advertising expense totaled \$31.9 million, \$37.3 million and \$27.8 million in 2006, 2005 and 2004, respectively.

Research and Development Costs: Research and development costs are expensed as incurred. Such amounts totaled \$5.9 million, \$7.2 million and \$4.1 million in 2006, 2005 and 2004, respectively.

Stock-Based Compensation: We account for stock-based compensation under the fair value recognition provisions of FASB Statement No. 123R, Share-Based Payment, and related interpretations (SFAS No. 123R) using the modified prospective transition method. Prior to October 2, 2005, we accounted for these plans under the recognition and measurement provisions of APB Opinion No. 25, *Accounting for Stock Issued to Employees, and related Interpretations*, (APB 25) as permitted by FASB Statement No. 123, *Accounting for Stock-Based Compensation* (SFAS No. 123). Compensation cost recorded for our Stock Plans (as defined in Note 8) approximated \$5.3 million, \$4.4 million and \$3.8 million in 2006, 2005 and 2004, respectively.

Earnings (Loss) Per Share: Net earnings (loss) per basic share are based on the weighted-average number of shares outstanding during each period, excluding the weighted average of restricted shares outstanding during each period (see **Note 8**). Net earnings (loss) per diluted share further assumes that, under the treasury stock method, any dilutive stock options are exercised, restricted stock awards are vested and any other dilutive equity instruments are converted.

The information required to compute net earnings (loss) per basic and diluted share is as follows:

	For the Fiscal Years Ended		
	September 30,		
	2006	2005	2004
	(in millions)		
Basic weighted-average number of common shares outstanding	76.3	75.5	75.0
Potential dilution of common shares	1.3	1.2	0.7
Diluted weighted-average number of common shares outstanding	77.6	76.7	75.7

Options to purchase 0.1 million, 0.1 million and 1.0 million shares in the years ended September 30, 2006, 2005 and 2004, respectively, were not included in the computation of earnings (loss) per share because the exercise prices of these options exceeded the average market price of the common shares during the respective periods.

New Accounting Pronouncements: In June 2006, the Financial Accounting Standards Board (FASB) issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No. 109* (FIN 48). This interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with Statement of Financial Accounting Standard No. 109, *Accounting for Income Taxes*. This interpretation clarifies the accounting for income taxes by prescribing the recognition threshold a tax position is required to meet before being recognized in the financial statements. This interpretation also provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006. We are currently evaluating the impact of FIN 48 on our consolidated results of operations and financial position.

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 2 Basis of Presentation (Continued)**

On September 13, 2006 the Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin No. 108 (SAB 108) *Considering the Effects of Prior Year Misstatements when Qualifying Misstatements in Current Year Financial Statements*. The interpretations in this Staff Accounting Bulletin are being issued to address diversity in practice in quantifying financial statement misstatements and the potential under current practice for the build up of improper amounts on the balance sheet. SAB 108 is effective for fiscal years beginning after November 15, 2006. We are currently evaluating the impact of SAB 108 on our results of operations; however we do not expect the impact to be material to our financial position or results of operations.

In September 2006, the FASB issued Statement No. 157, *Fair Value Measurements*. The standard provides enhanced guidance for using fair value to measure assets and liabilities. The standard also responds to investors' requests for expanded information about the extent to which companies measure assets and liabilities at fair value, the information used to measure fair value, and the effect of fair value measurements on earnings. This statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. The Statement applies under other accounting pronouncements that require or permit fair value measurements and is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. We are currently evaluating the impact of this statement on our results of operations and financial position.

On September 29, 2006, the FASB issued Statement No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans - An Amendment of FASB Statements No. 87, 88, 106, and 123R*. This new standard requires an employer to: (a) recognize in its statement of financial position an asset for a plan's overfunded status or a liability for a plan's underfunded status; (b) measure a plan's assets and its obligations that determine its funded status as of the end of the employer's fiscal year (with limited exceptions); and (c) recognize changes in the funded status of a defined benefit postretirement plan in the year in which the changes occur. Those changes will be reported in comprehensive income of a business entity. The requirement to recognize the funded status of a benefit plan and the disclosure requirements are effective as of the end of the fiscal year ending after December 15, 2006. The requirement to measure plan assets and benefit obligations as of the date of the employer's fiscal year-end statement of financial position is effective for fiscal years ending after December 15, 2008. We are currently evaluating the impact of FASB Statement No. 158 on our consolidated results of operations and financial position.

Note 3 Dispositions and Discontinued Operations

On June 30, 2005, we completed the sale of Rexair, Inc. (Rexair) to an affiliate of Rhone Capital, LLC (Rhone), which was initially computed based on EITF 01-02, *Interpretations of APB Opinion No. 29* (EITF No. 01-02). We received net cash of \$149.2 million and an approximately 30% equity interest in Rexair's new parent company (see **Note 2**, other non-current assets section for information on the retained interest). We recorded a gain of \$24.7 million and debt retirement costs of \$3.2 million associated with this transaction. As a result of applying EITF No. 01-02, there is a difference between the carrying value and the underlying equity in the investment. Rexair is not being accounted for as a discontinued operation as a result of this continuing investment. Our share of Rexair's net earnings after the date of sale is reported as Rexair equity earnings in our Consolidated Statement of Operations. Beginning July 1, 2005, Rexair's results are no longer reported in operating income as a separate business segment.

Discontinued Operations

On April 15, 2005, we adopted a plan to dispose of our investment in Spear and Jackson Inc. (S&J). In the third quarter of 2005, we began accounting for S&J as a discontinued operation in accordance with

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 3 Dispositions and Discontinued Operations (Continued)**

SFAS No. 144. On July 28, 2006, we sold all of our shares of common stock of S&J to United Pacific Industries Limited for a purchase price of approximately \$5.0 million. We recorded a gain on sale of \$2.5 million, net of \$1.3 million in expenses from the sale of S&J. Two of our directors were also directors and significant stockholders of the purchaser at the time of the sale. The transaction was considered and approved by a committee of independent directors, without participation by the interested directors. The Finance Committee also received a fairness opinion from an independent financial advisor to the effect that the sale of the shares was fair to Jacuzzi Brands from a financial point of view. For further information, see our Reports on Form 8-K filed March 27, 2006 and July 28, 2006.

On May 20, 2005, the Board of Directors approved a plan to dispose of Eljer Plumbingware (Eljer). In the third quarter of 2005, we completed the sale of substantially all the assets, the current liabilities, the long-term retiree medical liability and certain other liabilities of Eljer to Sun Capital Partners, Inc. (Sun Capital). Sun Capital also took over our Ford City, PA and Tupelo, MS operations. We retained the Salem, OH manufacturing facility, which was closed in 2004, and several liabilities associated with events occurring before the acquisition, such as employee and environmental claims. We also agreed to provide transition services at no cost for a period of up to four months after the sale and to pay any severance liabilities for any Eljer employee not retained by Sun Capital. The sale of Eljer resulted in a loss of \$57.8 million, net of tax for fiscal 2005. Eljer s operations were previously included in our Bath Products segment.

In February 2003, our Board of Directors adopted a formal disposal plan to dispose of our swimming pool and equipment, hearth and water systems businesses (the 2003 Disposal Plan). In connection with the disposal plan, we recorded a charge in 2003 of \$39.9 million, net of tax, which represents the difference between the historical net carrying value (including allocated goodwill of \$7.2 million) and the estimated net realizable value of these businesses. We sold the swimming pool and equipment business in May 2003, the hearth business in June 2003 and the water systems business in October 2003.

Each of these disposal plans qualified for treatment as discontinued operations. The operating loss of these discontinued operations was not included in our results from continuing operations. Instead, the results were recorded as a loss from discontinued operations in the period in which they occurred in accordance with SFAS No. 144.

Summarized results of the discontinued operations through the dates of sale are as follows:

	2006	September 30, 2005	2004
	(in millions)		
Net sales	\$ 82.0	\$ 133.0	\$ 148.1
Operating loss	(6.3)	(9.1)	(31.6)
Loss from discontinued operations	(3.4)	(63.6)	(19.9)

The assets and liabilities of these businesses were included in assets held for sale and liabilities associated with assets held for sale, respectively, until they were sold. The assets and liabilities of S&J included in assets and liabilities held

for sale at

September 30, 2005 were as follows:

	September 30, 2005 (in millions)
Cash	\$ 7.3
Trade receivables, net	16.4
Inventories	25.0
Other current assets	1.3

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

	September 30, 2005
	(in millions)
Note 3 Dispositions and Discontinued Operations (Continued)	
Deferred taxes	15.3
Property, plant and equipment, net	1.4
Equity investment	0.2
Assets held for sale	\$ 66.9
Notes payable	\$ 0.8
Trade accounts payable	8.1
Other current liabilities	11.3
Other long term liabilities	36.7
Minority interest	10.0
Liabilities associated with assets held for sale	\$ 66.9

Also included in assets held for sale are properties held for sale of \$7.4 million at September 30, 2006 and \$2.8 million at September 30, 2005. Liabilities associated with assets held for sale at September 30, 2006 includes \$0.8 million of environmental liabilities associated with these properties. These properties are currently being marketed for sale and meet all of the criteria for classification as held for sale at September 30, 2006 and 2005 as required by SFAS No. 144. These properties are recorded at the lower of their carrying value or fair value less cost to sell.

We retained liabilities related to certain of the businesses we disposed of in prior years and therefore have continued to use cash to satisfy these liabilities. Payments of such costs totaled \$15.5 million in fiscal 2006. We have an additional \$12.5 million accrued at September 30, 2006 related to environmental, product liability, workers compensation and other retained liabilities of disposed businesses. These liabilities are expected to be paid over the next ten years and represent the only expenditures expected to be incurred over this period for businesses disposed of as of this date. In accordance with EITF Issue No. 03-13 *Applying the Conditions in Paragraph 42 of FASB Statement No. 144 in Determining Whether to Report Discontinued Operations*, we concluded that these cash flows would not be direct cash flows of the disposed component because in each case we have had no significant involvement in the disposed businesses after the disposal. We have not migrated any of the operating activities of the disposed businesses to our current operations.

Note 4 Impairment, Restructuring and Other Charges

The principal components of impairment, restructuring and other charges are:

**For the Fiscal Years
Ended September 30,**

	2006	2005	2004
	(in millions)		
Impairment of assets	\$ 1.9	\$	\$
Lease obligations and other commitments	0.2	0.4	(0.6)
Severance and related costs	5.1	9.0	3.5
	\$ 7.2	\$ 9.4	\$ 2.9
Cash charges	\$ 5.3	\$ 8.1	\$ 2.9
Non-cash charges	1.9	1.3	
	\$ 7.2	\$ 9.4	\$ 2.9

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 4 Dispositions and Discontinued Operations (Continued)**

Below is a summary of the impairment, restructuring and other charges we incurred in 2006, 2005 and 2004. Charges are recorded when a liability is incurred in accordance with FASB Statement No. 146, *Accounting for Costs Associated with Exit or Disposal Activities* (SFAS No. 146), FASB Statement No. 88, *Employers Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits*, and SFAS No. 144 or other applicable guidance.

	For the Fiscal Years Ended September 30,		
	2006	2005	2004
	(in millions)		
Bath Products:			
U.K. initiatives	\$ 5.2 ⁽¹⁾	\$ 1.6	\$
Closure of Asia office	0.6		
Consolidation of administrative functions	1.2	2.9	3.5
Sub-total Bath Products	7.0	4.5	3.5
Corporate Expenses:			
Adjustment of estimated lease obligation			(0.6)
Corporate headquarters restructuring	0.2	4.9	
Sub-total Corporate Expenses	0.2	4.9	(0.6)
	\$ 7.2	\$ 9.4	\$ 2.9

(1) These amounts include \$1.8 million of inventory write-downs and accelerated depreciation recorded in cost of goods sold.

Restructuring and other charges for fiscal 2006 consisted of \$5.2 million related to our Bradford, U.K. consolidation and other U.K. initiatives and included \$1.8 million related to inventory write-downs and accelerated depreciation which was recorded in cost of goods sold. The remaining \$3.4 million was recorded as restructuring and consisted of severance and other cash related charges. We also incurred severance and lease related charges of \$0.6 million during 2006 associated with the closure of the Asia office and the termination of 11 employees. The remaining charges primarily relate to our continued efforts to consolidate administrative and other overhead of our domestic businesses. The \$1.4 million in restructuring charges are primarily associated with severance and include \$1.2 million in the Bath Products segment and \$0.2 million in corporate expenses.

In 2005, we reorganized and restructured the senior management of the Bath Products segment and corporate offices, reduced staff in the U.K. and domestic bath business and implemented other overhead reductions. We incurred severance charges of \$3.5 million in 2004 related to the consolidation and relocation of a number of administrative functions into a shared services operations center in Dallas, TX in an effort to reduce costs in our domestic bath and spa businesses. The shared service center occupies a portion of the unused office space in Dallas, TX that had remained vacant since our closing of the Zurn Industries, Inc. (Zurn) corporate office. A favorable adjustment of \$0.6 million was recorded in 2004, to reduce the associated accrual for lease costs that had originally been established in 2000.

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 4 Dispositions and Discontinued Operations (Continued)**

The activity in the restructuring liability accounts by cost category is as follows:

	Contract Related Costs	Severance and Related Costs (in millions)	Total Costs
At September 30, 2004	\$ 3.1	\$ 2.5	\$ 5.6
2005 charges	0.4	9.0	9.4
Cash payments	(1.8)	(9.4)	(11.2)
At September 30, 2005	1.7	2.1	3.8
2006 charges	0.2	5.1	5.3
Cash payments	(0.8)	(5.9)	(6.7)
Other	0.2		0.2
At September 30, 2006	\$ 1.3	\$ 1.3	\$ 2.6

At September 30, 2006, approximately \$2.4 million of the reserves are included in the balance sheet caption Accrued expenses and other current liabilities, while the remaining \$0.2 million are recorded in the balance sheet caption Other liabilities. We expect the remaining accruals to be paid with cash over the periods provided by the severance and lease agreements over the next fourteen months.

Note 5 Long-term Debt

Long-term debt consists of the following:

	September 30,	
	2006	2005
Senior Notes	\$ 380.0	\$ 380.0
Other long-term debt	3.5	5.0
	383.5	385.0
Less: current maturities	(1.7)	(1.5)
Long-term debt	\$ 381.8	\$ 383.5

The 9.625% Senior Secured Notes (Senior Notes) are due on July 1, 2010 and require the payment of interest of \$18.3 million on January 1 and July 1 of each year. We are restricted in our ability to cause a mandatory redemption of the Senior Notes per the terms of the indenture for the Senior Notes. On and after July 1, 2007, we can redeem the Senior Notes subject to a redemption premium of 104.8% for the first 12 months and 102.4% for the following 12 months. On and after July 1, 2009, the Senior Notes can be redeemed at face value. The indenture for the Senior Notes limits our ability to pay dividends, repurchase stock and make other restricted payments as defined therein.

As required by the indenture governing the Senior Notes, on April 11, 2006 we commenced an offer to purchase up to \$47.7 million aggregate principal amount of our Senior Notes at par, plus accrued and unpaid interest. The amount of the offer was equivalent to the remaining proceeds from both the Rexair and Eljer dispositions, net of certain expenses and payments incurred in connection with the dispositions. At September 30, 2005, we had restricted cash accounts of \$12.4 million that were held for the benefit of the bondholders related to the proceeds from the Rexair and Eljer dispositions. None of the Senior Notes were tendered thus the restricted cash balance was reclassified to cash and cash equivalents. We have an asset-based revolving credit facility that matures on July 15, 2008. Under this facility, we can borrow up to \$200.0 million

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 5 Long-term Debt (Continued)**

subject to a borrowing base consisting of eligible accounts receivable and eligible inventory. At September 30, 2006, we had approximately \$131.2 million available to be borrowed under the asset-based facility, of which we had utilized approximately \$30.7 million for letters of credit, leaving \$100.5 million available for additional borrowings. The interest rate under the facility is currently 2.0% over LIBOR or Prime. This rate is reset each quarter based on our Consolidated Leverage Ratio as defined in the agreement, and could range from 2.0% to 2.5% over LIBOR (Applicable LIBOR Margin). The weighted-average interest rate was 5.22% for 2005 and 3.98% for 2004. We had no amounts outstanding under the facility during 2006 or at September 30, 2005. Certain of our existing and future domestic restricted subsidiaries guarantee the Senior Notes, jointly and severally, on a senior basis. The Senior Notes are secured by an eligible first lien on domestic property, plant and equipment, and a second lien on the assets that secure the credit facilities. The asset-based credit facility is secured by a first lien on accounts receivable, inventory, the stock of our domestic subsidiaries and 65% of the stock of our first-tier foreign subsidiaries. In addition, the asset-based credit facility has a second lien on the property, plant and equipment securing the Senior Notes.

We paid \$39.8 million, \$45.3 million and \$45.1 million of interest on our borrowings in 2006, 2005 and 2004, respectively.

Principal reductions of senior debt and other borrowings for the next five years ended September 30 and thereafter are as follows (in millions):

2007	\$ 1.7
2008	1.8
2009	
2010	380.0
2011	
	\$ 383.5

Commitments

At September 30, 2006, we had approximately \$131.2 million available to be borrowed under the asset-based facility, of which we had utilized approximately \$30.7 million for letters of credit, leaving \$100.5 million available for additional borrowings. In addition, we have outstanding foreign commercial letters of credit of \$2.0 million which do not affect availability under the asset-based facility.

Note 6 Pension and Retirement Plans

We sponsor a number of domestic and foreign defined contribution plans. Contributions relating to defined contribution plans are made based upon the respective plans' provisions.

Domestic Benefit Arrangements

In 2004, all our domestic defined benefit pension plans were merged into a single pension plan. The benefits under this plan are based primarily on years of credited service and/or compensation as defined under the plan provisions. Our funding policy is to contribute amounts to the plan sufficient to meet the minimum funding requirements set forth in the Employee Retirement Income Security Act of 1974, plus such additional amounts as we may determine to be appropriate from time to time.

We also provide health care and life insurance benefits to certain groups of retirees with most retirees contributing back to us a portion of our costs. These other post-employment benefit plans are presented as Other Plans in the tables that follow. We use a September 30 measurement date for the plans.

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 6 Pension and Retirement Plans (Continued)**

The following table provides a reconciliation of changes in the projected benefit obligation, fair value of plan assets and the funded status of our defined benefit pension and other post-employment benefit plans to the amounts recorded in our balance sheets:

	Pension Plans		Other Plans	
	at September 30,		at September 30,	
	2006	2005	2006	2005
	(in millions)			
Benefit obligation at beginning of year	\$ 372.1	\$ 338.4	\$ 17.2	\$ 16.7
Adjustment relating to prior years ⁽¹⁾	5.5			
Service cost	4.3	6.5	0.3	0.3
Interest cost	19.6	18.8	0.9	0.9
Plan amendments		1.2		
Actuarial (gains)/losses	(15.7)	30.5	(2.6)	1.2
Benefits paid	(23.2)	(19.8)	(1.9)	(1.9)
Curtailments	(1.0)	(3.5)		
Benefit obligation at end of year	\$ 361.6	\$ 372.1	\$ 13.9	\$ 17.2
Fair value of plan assets at beginning of year	\$ 407.2	\$ 369.8	\$	\$
Actual return on plan assets	35.1	56.4		
Contributions	3.7	0.8	1.9	1.9
Benefits paid	(23.2)	(19.8)	(1.9)	(1.9)
Fair value of plan assets at end of year	\$ 422.8	\$ 407.2	\$	\$
Plan assets in excess of (less than) projected benefit obligation	\$ 61.2	\$ 35.1	\$ (13.9)	\$ (17.2)
Unrecognized net actuarial losses (gains)	59.5	85.7	(1.1)	1.5
Unrecognized prior service cost (income)	10.1	11.7	(3.3)	(4.3)
Net amount recognized	\$ 130.8	\$ 132.5	\$ (18.3)	\$ (20.0)
Prepaid benefits	\$ 148.1	\$ 145.4	\$	\$
Accrued benefits	(23.2)	(22.2)	(18.3)	(20.0)
Intangible assets	1.9	2.4		
Accumulated other comprehensive expense	4.0	6.9		
Net amount recognized	\$ 130.8	\$ 132.5	\$ (18.3)	\$ (20.0)

- (1) An adjustment relating to prior years was made in the third quarter of fiscal 2006 relating to benefits payable to several key executives (see also \$2.9 million adjustment to expense on next page).

In the first quarter of 2006, we paid \$3.0 million to buyout certain vested post-retirement benefit plan liabilities owed to participants who were retired or terminated. The curtailment charge of \$1.0 million in the table above and settlement charge of \$0.6 million in the table which follows relate to this buyout.

For both years presented, the fair value of the pension plan's assets exceeded its accumulated benefit obligation and projected benefit obligation.

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 6 Pension and Retirement Plans (Continued)**

The components of net periodic expense (income) for our domestic defined benefit pension and other plans are presented below:

	Pension Plans			Other Plans		
	for the Fiscal Years Ended			for the Fiscal Years Ended		
	September 30,			September 30,		
	2006	2005	2004	2006	2005	2004
	(in millions)					
Service cost	\$ 4.3	\$ 6.5	\$ 6.7	\$ 0.3	\$ 0.3	\$ 0.2
Interest cost	19.5	18.8	18.2	0.9	0.9	1.0
Expected return on plan assets	(32.2)	(31.5)	(31.8)			
Prior service cost	3.4	1.5	0.9	(1.0)	(1.0)	(1.0)
Net actuarial loss (gain)	6.2	5.1	1.9	0.1		(0.1)
Curtailments/settlements	0.6	4.8	2.5		(0.4)	
Periodic expense (income) of defined benefit plans	1.8	5.2	(1.6)	0.3	(0.2)	0.1
Adjustment relating to prior years ⁽¹⁾	2.9					
Net reclassification adjustment for discontinued operations		(4.5)	(3.9)			
Net periodic expense (income):						
Defined benefit plans	4.7	0.7	(5.5)	0.3	(0.2)	0.1
Defined contribution plans	1.3	1.3	1.4			
	\$ 6.0	\$ 2.0	\$ (4.1)	\$ 0.3	\$ (0.2)	\$ 0.1

⁽¹⁾ We made an adjustment to pension expense in the third quarter of fiscal 2006 related to several employment contracts, of which \$2.9 million should have been recorded during the period beginning with our 1995 spin off from Hanson plc through fiscal 2005. No single fiscal year was materially misstated so the entire amount was recorded in the third quarter of fiscal 2006. We also adjusted paid-in capital by \$0.5 million to reflect the additional retiree benefit liability associated with these contracts which should have been recorded at the time of our 1995 spin-off.

Assumptions

The weighted-average assumptions used to determine the benefit obligation for our domestic defined benefit pension and other plans are as follows:

	Pension Plans at September 30,			Other Plans at September 30,		
	2006	2005	2004	2006	2005	2004
Discount rate	5.65%	5.35%	5.75%	5.65%	5.35%	5.75%
Rate of compensation increases	3.25%	3.25%	3.25%			

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 6 Pension and Retirement Plans (Continued)**

The weighted-average assumptions used to determine the net periodic pension expense (income) for our domestic defined benefit pension and other plans are as follows:

	Pension Plans			Other Plans		
	for the Fiscal Years Ended			for the Fiscal Years Ended		
	September 30,			September 30,		
	2006	2005	2004	2006	2005	2004
Discount rate	5.35%	5.75%	6.00%	5.35%	5.75%	6.00%
Rate of compensation increases	3.25%	3.25%	3.25%			
Expected rate of return on assets	8.75%	8.75%	8.75%			

The expected rate of return on assets is based on several factors. Such factors include current and expected target asset allocation, the historical experience of returns provided by plan assets, the evaluation of market conditions and interest rates, tolerance for risk within plan guidelines and cash requirements for benefit payments. In conjunction with our actuaries we analyze the foregoing factors as well as the advice of our pension investment advisors to develop the return on assets assumptions.

The weighted-average annual assumed rate of increase in the per capita cost of covered benefits (i.e., the health care cost trend rate) for the other post-employment benefit plans was 9% for 2006 and 9.5% for 2005. The rate used as of September 30, 2006 was 9% and is assumed to decrease 0.5% a year to 5%. A one-percentage-point change in the assumed health care cost trend rate would have had the following effects as of and for the year ended September 30, 2006 (in millions):

	Increase (Decrease)
	Costs/Obligations
Effect of a 1% increase in the health care cost trend rate on:	
Service cost plus interest cost	\$ 0.2
Accumulated post-employment benefit obligation	1.4
Effect of a 1% decrease in the health care cost trend rate on:	
Service cost plus interest cost	\$ (0.1)
Accumulated post-employment benefit obligation	(1.1)

Plan Assets

Our domestic defined benefit pension plan's weighted-average asset allocations by asset category are as follows:

At September 30,

	2006	2005
	(in millions)	
Equity securities	\$ 289.6	\$ 279.5
Debt securities	98.3	98.8
Other	34.9	28.9
	\$ 422.8	\$ 407.2

The overall investment strategy for our domestic pension plan is to manage the plan's assets in a prudent and productive manner. The selected investment managers seek to increase the aggregate value of the assets under management while conscious of the need to preserve asset value. Reasonable consistency of returns is expected on a year-to-year basis. Active management strategies are used to meet investment objectives of the

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 6 Pension and Retirement Plans (Continued)**

pension plan, which are to satisfy all pension benefit payments and to realize investment returns in excess of market indices. Consistent with these investment objectives, the plan has set the following range of target percentages for the allocation of plan assets by each major category.

Equity securities	45% - 75%
Debt securities	20% - 40%
Real estate	0% - 5%
Other	0% - 25%

The assets for our domestic plan are included in a master trust which principally invests in listed stocks and bonds, including the common stock of our company. At September 30, 2006 and 2005, 1,333,100 shares of our common stock representing \$13.3 million and \$10.7 million of the master trust's assets as of September 30, 2006 and September 30, 2005, respectively, were included in plan assets.

Expected Contributions and Benefit Payments

We do not expect to make any contributions to our domestic defined benefit pension plan in 2006. Based on our assumptions discussed above, we expect to make the following estimated future benefit payments under the plans as follows:

	Pension Plans (in millions)	Other Plans (in millions)
2007	\$ 18.9	\$ 0.9
2008	19.7	1.0
2009	20.0	1.0
2010	20.3	1.0
2011	20.9	1.0
2012 - 2016	117.1	5.2
	\$ 216.9	\$ 10.1

The tables above and on the previous pages set forth the historical components of net periodic pension cost and a reconciliation of the funded status of the pension and other plans for our domestic employees. This information, however, is not necessarily indicative of the amounts we will recognize on a prospective basis.

We recorded a reduction of the minimum pension liability in accordance with SFAS No. 87, totaling \$2.9 million (\$1.8 million net of taxes) in 2006 and \$1.9 million (\$1.2 million net of taxes) in 2005 upon completion of our annual

pension valuation for our domestic plans. The adjustment to the minimum pension liability was included in accumulated other comprehensive income as a direct charge to shareholders' equity, net of related tax effect.

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 6 Pension and Retirement Plans (Continued)*****Foreign Benefit Arrangements***

Our foreign defined benefit pension plans cover certain employees in our U.K. and Canadian operations. The following table provides a reconciliation of changes in the projected benefit obligation, the fair value of plan assets and the funded status of our foreign defined benefit pension plans with the amounts recognized on our balance sheets:

	At September 30,	
	2006	2005
	(in millions)	
Benefit obligation at beginning of year	\$ 81.9	\$ 69.2
Service cost	1.5	1.3
Interest cost	4.4	4.1
Employee contributions	0.8	0.9
Foreign currency exchange rate changes	5.4	(1.8)
Actuarial losses	4.9	10.4
Benefits paid	(1.5)	(2.2)
Benefit obligation at end of year	\$ 97.4	\$ 81.9
Fair value of plan assets at beginning of year	\$ 53.7	\$ 43.5
Actual return on plan assets	5.4	10.6
Foreign currency exchange rate changes	3.6	(1.2)
Employer contributions	3.9	2.1
Employee contributions	0.8	0.9
Benefits paid	(1.5)	(2.2)
Fair value of plan assets at end of year	\$ 65.9	\$ 53.7
Plan assets less than projected benefit obligation	\$ (31.5)	\$ (28.2)
Unrecognized net actuarial losses	42.2	38.3
	\$ 10.7	\$ 10.1
Accrued benefits	\$ (23.3)	\$ (21.5)
Accumulated other comprehensive expense	34.0	31.6
	\$ 10.7	\$ 10.1

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 6 Pension and Retirement Plans (Continued)**

The components of net periodic expense for our foreign defined benefit pension plans are presented below:

	For the Fiscal Years Ended September 30,		
	2006	2005	2004
	(in millions)		
Service cost	\$ 1.5	\$ 1.3	\$ 1.1
Interest cost	4.3	4.1	3.2
Expected return on plan assets	(4.0)	(4.2)	(3.8)
Net actuarial loss	2.1	1.0	0.4
Net periodic expense:			
Defined benefit plans	3.9	2.2	0.9
Defined contribution plans	0.3	0.3	0.3
	\$ 4.2	\$ 2.5	\$ 1.2

Assumptions

The weighted-average assumptions used to determine the benefit obligation for our foreign defined benefit plans are as follows:

	At September 30,		
	2006	2005	2004
Discount rate	5.00%	5.25%	5.75%
Rate of compensation increases	3.25%	3.00%	3.25%

The weighted-average assumptions used to determine the net periodic pension expense for our foreign defined benefit pension plans are as follows:

	For the Fiscal Years Ended September 30,		
	2006	2005	2004
Discount rate	5.00%	5.25%	5.75%
Rate of compensation increases	3.25%	3.00%	3.25%

Expected rate of return on assets	7.75%	7.75%	7.50%
-----------------------------------	-------	-------	-------

The expected rate of return on assets is based on several factors. Such factors include current and expected target asset allocation, the historical experience of returns provided by plan assets, the evaluation of market conditions and interest rates, tolerance for risk within plan guidelines and cash requirements for benefit payments. Our actuaries and we analyze the foregoing factors as well as the advice of our pension investment advisor to develop the return on assets assumption.

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 6 Pension and Retirement Plans (Continued)***Plan Assets*

Our foreign defined benefit pension plans' weighted-average asset allocations by asset category are as follows:

	At September 30,	
	2006	2005
Equity securities	\$ 50.0	\$ 42.4
Debt securities	15.9	10.8
Other		0.5
	\$ 65.9	\$ 53.7

The plan's asset allocation strategy was determined with regard to the actuarial characteristics of the plan, in particular the strength of the funding position and the liability profile. It was based on the assumption that equity securities would outperform debt securities over the longer term. The trustees considered written advice from their investment advisers when choosing the plan's asset allocation strategy.

Expected Contributions and Benefit Payments

We expect to contribute \$4.0 million to our foreign defined benefit pension plans in 2007. Based on our assumptions discussed above, we expect to make the following estimated future benefit payments under the plan as follows (in millions):

2007	\$ 1.2
2008	1.3
2009	1.3
2010	1.4
2011	1.4
2012 - 2016	7.8
	\$ 14.4

We recorded an increase of our minimum pension liability for our foreign plans in accordance with SFAS No. 87, totaling \$2.4 million in 2006 and an additional minimum pension liability of \$0.1 million (\$0.4 million net of taxes and foreign currency translation) in 2005 upon completion of our annual pension valuations. The adjustment to the minimum pension liability was included in accumulated other comprehensive loss as a direct charge to shareholders equity, net of related tax effect.

Note 7 Income Taxes

Earnings from continuing operations, before income taxes, consists of the following:

	For the Fiscal Years Ended September 30,		
	2006	2005	2004
	(in millions)		
United States	\$ 67.3	\$ 47.0	\$ 49.0
Foreign	13.6	21.0	29.2
	\$ 80.9	\$ 68.0	\$ 78.2

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 7 Income Taxes (Continued)**

The provision (benefit) for income taxes attributable to our earnings (loss) from continuing operations before income taxes consists of the following:

	For the Fiscal Years Ended September 30,		
	2006	2005	2004
	(in millions)		
Current:			
Federal	\$ 22.7	\$ (7.1)	\$ 10.8
State	2.2	2.5	1.6
Foreign	(6.8)	9.9	15.4
Deferred	19.0	4.7	2.1
	\$ 37.1	\$ 10.0	\$ 29.9

The tax provision for 2006 includes the recognition of a valuation allowance against U.K. deferred taxes in the amount of \$15.9 million due to continuing pretax losses in our U.K. operations. The provision for 2006 also includes the reversal of \$14.0 million of reserves against Italian income tax refunds. We received \$7.9 million in refunds and \$1.6 million in interest from the Italian government in the first quarter of fiscal 2007.

The components of deferred income tax assets and liabilities are as follows:

	At September 30,	
	2006	2005
	(in millions)	
Deferred tax assets:		
Accruals and allowances	\$ 33.4	\$ 41.5
Post-employment benefits	6.1	7.7
Property, plant and equipment		3.0
Inventory	2.7	3.0
Other	0.9	1.6
Foreign tax credits	17.9	18.8
Expected benefit from disposal plans & capital loss carryforwards	120.6	119.0
Gross deferred tax assets	181.6	194.6
Valuation allowance	(133.0)	(133.5)

Total deferred tax assets	48.6	61.1
Deferred tax liabilities:		
Net pension assets	45.6	34.2
Property, plant and equipment	0.3	
Deductible goodwill	5.4	4.6
Total deferred tax liabilities	51.3	38.8
Net deferred tax assets (liabilities)	\$ (2.7)	\$ 22.3

We have established valuation allowances principally related to deferred tax assets resulting from the losses recognized in connection with disposals announced in 2001, foreign losses (ordinary) and U.S. foreign tax credits reflecting the uncertainty of the future realization of these assets. At September 30, 2006 and 2005,

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 7 Income Taxes (Continued)**

we had approximately \$204.4 million and \$200.1 million, respectively, in capital loss carryforwards in the U.S. for which, tax effected, we have recorded valuation allowances of \$75.6 million and \$74.0 million on September 30, 2006 and 2005, respectively. These capital loss carryforwards expire on September 30, 2007. We incurred a capital loss of \$0.5 million in connection with the sale of a majority interest in Rexair for which, tax effected, we have recorded a valuation reserve of \$0.2 million at September 30, 2006 and 2005. This capital loss carryforward will expire in 2010. We recorded a deferred tax asset of \$22.7 million in connection with the sale of Eljer in 2005. A full valuation allowance of \$22.7 million was established against this asset since it relates to a future capital loss. We have foreign tax credit carryforwards for which we established full valuation allowances of \$17.9 million and \$18.8 million on September 30, 2006 and 2005, respectively. A substantial portion of these foreign tax credits will expire in 2011 and 2013. We recognized state loss carryforwards of \$391.0 million and \$361.0 million as of September 30, 2006 and 2005, respectively. These state losses result in tax benefits of \$14.6 and \$13.6 million at September 30, 2006 and September 30, 2005, respectively, for which we have established valuation allowances of \$11.4 and \$11.5 million on September 30, 2006 and 2005, respectively. We have U.K. loss carryforwards for which we have established full valuation allowance of \$4.3 million and 6.3 million, on September 30, 2006 and 2005 respectively. We recognized Brazilian loss carryforwards of \$5.1 million on September 30, 2006 for which, tax effected, we have recorded a valuation allowances of \$0.9 million. We had Alternative Minimum Tax credit carryforwards of \$1.6 million and \$1.7 million at September 30, 2006 and 2005, respectively. These credits have no expiration date.

We recorded a \$5.9 million tax benefit in fiscal 2005 as a result of a Federal tax audit of our consolidated tax returns for the fiscal years 1998 through 2002. The benefit resulted from agreed upon computational adjustments. We filed an appeal with the IRS in September 2005 regarding various issues related to this audit that we could not reach agreement on. This appeal is still in process and we have not yet reached a final settlement on the issues. We have recorded reserves that are adequate to cover any assessment if our appeals are rejected. Several states and various other countries have examinations either in the planning stages or currently underway. A \$2.9 million tax benefit was recognized in 2005 upon the completion of a Federal tax audit of one of our subsidiaries. We recorded interest income of \$2.5 million in fiscal 2004 as a result of the settlement of a previous IRS audit.

The number of years with open tax audits varies depending on the tax jurisdiction. A number of years may elapse before a particular matter is audited and finally resolved. While it is often difficult to predict the final outcome or the timing of resolution of any particular tax matter, we believe that our financial statements reflect the probable outcome of known tax contingencies.

The deferred tax balances have been classified in the balance sheets as follows:

	At September 30,	
	2006	2005
	(in millions)	
Current assets	\$ 25.6	\$ 27.9
Current liabilities		

Net current assets	25.6	27.9
Non-current assets	23.0	33.2
Non-current liabilities	(51.3)	(38.8)
Net non-current liabilities	(28.3)	(5.6)
Net deferred tax assets (liabilities)	\$ (2.7)	\$ 22.3

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 7 Income Taxes (Continued)**

Our effective tax rate is based on expected income, statutory tax rates and tax planning opportunities available to us in the various jurisdictions in which we operate. The tax rate is sensitive to the jurisdiction where the income is earned since different jurisdictions will have different statutory tax rates. Significant judgment is required in determining our effective tax rate and in evaluation of our tax provisions. Despite our belief that our tax return positions are fully supportable, we estimate tax exposures and establish accruals when in our judgment we believe that certain positions are likely to be challenged and that we may not succeed. We adjust these reserves in light of changing facts and circumstances, such as the progress of a tax audit.

The following is a reconciliation of income taxes at the federal statutory rate of 35% to the provision for (benefit from) income taxes attributable to continuing operations:

	For the Fiscal Years Ended September 30,		
	2006	2005	2004
	(in millions)		
Federal tax provision computed at the statutory rate	\$ 28.3	\$ 23.8	\$ 27.4
Foreign income tax differential	3.2	2.3	0.5
State income taxes (net of federal benefit)	2.0	2.1	1.7
Rexair disposition	(0.2)	(8.6)	
Resolution of tax contingencies		(8.8)	
Other non-deductible items	0.1	0.2	0.4
Changes in valuation allowances	1.0	(0.6)	0.6
U.K. deferred tax reserve	15.9		
Italian tax refunds	(14.0)		
Other, net	0.8	(0.4)	(0.7)
	\$ 37.1	\$ 10.0	\$ 29.9

Income taxes paid during 2006, 2005 and 2004 were \$25.9 million, \$13.9 million and \$16.9 million, respectively.

Note 8 Employee Benefit Plans***Retirement Savings Plans***

We have one 401(k) retirement savings plan that allows eligible employees to contribute up to 60% of their salaries, commissions and bonuses, up to \$14,000 annually, to the plan on a pretax basis in accordance with the provisions of Section 401(k) of the Internal Revenue Code. Matching contributions of common stock or cash that are made into the plan are equivalent to 50% of the first 6% of an employee's contributions. During 2006, 2005 and 2004, \$1.3 million, \$1.3 million and \$1.4 million, respectively, was recognized as compensation expense under these programs.

Accounting for Stock-based Compensation

We maintain incentive stock plans that provide for grants of stock options and restricted stock awards to our directors, officers and key employees. The stock plans are described more fully below.

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 8 Employee Benefit Plans (Continued)***Adoption of New Accounting Guidance and Transition*

Prior to October 2, 2005, we accounted for these plans under the recognition and measurement provisions of APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and related Interpretations, (APB 25) as permitted by FASB Statement No. 123, *Accounting for Stock-Based Compensation* (SFAS No. 123). No compensation cost was recognized in the Statement of Operations prior to October 2, 2005 related to stock option grants as they all had an exercise price equal to the market value of the underlying common stock on the date of grant. The restricted stock awards granted under those plans were measured at fair value, which was determined as the closing market value of the stock on the date of the grant, and amortized over the vesting period in tranches consistent with our previous accounting policy of recognizing expense for awards with graded vesting under the expense attribution method described in FASB Interpretation No. 28, *Accounting for Stock Appreciation Rights and other Variable Stock Option or Award Plans* (FIN 28).

Effective October 2, 2005, we adopted the fair value recognition provisions of FASB Statement No. 123R, *Share-Based Payment*, and related interpretations (SFAS No. 123R) using the modified prospective transition method. Under that method, compensation cost recognized in the first quarter of 2006 includes (a) compensation cost for all share-based payments granted prior to, but not yet vested as of, October 2, 2005 based on the grant date fair value estimated in accordance with the original provisions of SFAS No. 123 and (b) compensation cost for all share-based payments granted on or subsequent to October 2, 2005, based on the grant-date fair value estimated in accordance with the provisions of SFAS No. 123R. Compensation cost related to stock awards granted prior to, but not vested as of, October 2, 2005 continues to be amortized using the expense attribution method described in FIN 28, while compensation cost associated with stock awards granted on or after October 2, 2005 is being recognized on a straight-line basis over the requisite service period for the entire award in accordance with the provisions of SFAS No. 123R. Results for the prior periods have not been restated.

Prior to the adoption of SFAS No. 123R, we recognized compensation cost over the explicit service period for restricted stock awards subject to acceleration of vesting upon retirement. This policy has changed upon the adoption of SFAS No. 123R. For awards granted prior to the adoption of SFAS No. 123R, we continue to recognize compensation cost over the explicit service period and will accelerate any remaining unrecognized compensation cost when an employee actually retires. For awards granted or modified after the adoption of SFAS No. 123R and subject to acceleration of vesting upon retirement, compensation cost is recognized over a service period ending no later than the date the employee first becomes eligible for retirement. Had we recognized any remaining unrecognized compensation cost at the point when an employee became eligible for retirement, compensation cost would have decreased in fiscal 2006 by approximately \$1.5 million and increased by approximately \$0.1 million and \$1.5 million for fiscals 2005 and 2004, respectively.

Prior to the adoption of SFAS No. 123R, we presented the tax benefit of deductions arising from the exercise of stock options as operating cash flows in the Condensed Consolidated Statement of Cash Flows. SFAS No. 123R requires that we classify the cash flows resulting from the tax benefit that arises when the tax deductions exceed the compensation cost recognized for those options (excess tax benefits) as financing cash flows. The excess tax benefits, which were less than \$0.2 million for fiscal 2006, would have been classified as an operating cash inflow if we had not adopted SFAS No. 123R.

Pro Forma Information Under SFAS No. 123 for Periods Prior to Fiscal 2006

The table below illustrates the effect on net earnings and earnings per share if the Company had applied the fair value recognition provisions of SFAS No. 123 to options granted under the Company's stock option plans in all periods presented (amounts are in millions, except shares and per share amounts):

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 8 Employee Benefit Plans (Continued)**

	Year Ended September 30,	
	2005	2004
Net (loss) earnings, as reported	\$ (5.6)	\$ 28.4
Stock-based employee compensation expense, net of tax	2.5	2.2
Total stock-based employee compensation expense determined under the fair value method, net of tax	(3.1)	(3.0)
Pro forma net (loss) earnings	\$ (6.2)	\$ 27.6
(Loss) earnings per share:		
Basic as reported	\$ (0.07)	\$ 0.38
Basic pro forma	(0.08)	0.37
Diluted as reported	\$ (0.07)	\$ 0.37
Diluted pro forma	(0.08)	0.36

The pro forma information above was determined using the Black-Scholes-Merton (BSM) option-pricing formula based on the following assumptions:

	Year Ended September 30,	
	2005	2004
Expected term (in years)	4.0	4.0
Risk-free interest rate	3.41%	2.97%
Expected volatility	63%	66%
Expected dividend yield	0%	0%

We estimated the expected term and expected volatility of the stock options based upon historical data of our share-based compensation plans. The weighted-average fair value of options granted during fiscals 2005 and 2004 was \$4.63 and \$5.73, respectively. Forfeitures of share-based compensation were recognized as they occurred.

Valuation and Expense Information under SFAS No. 123R

The adoption of SFAS No. 123R had a negligible impact on our earnings before income taxes and net earnings for fiscal 2006. Accordingly, the adoption of SFAS No. 123R did not have an effect on earnings per share for the year ended 2006. We recorded compensation costs of \$5.3 million, \$4.4 million and \$3.8 million for fiscals 2006, 2005 and 2004, respectively. We recognized a tax benefit for share-based compensation arrangements of \$1.8 million for fiscal 2006 and \$1.3 million and \$0.8 million for fiscals 2005 and 2004, respectively.

As required by SFAS No. 123R, we now estimate forfeitures of employee stock options and recognize compensation cost only for those awards expected to vest. Forfeiture rates are determined for three groups of employees – directors, senior management and all other employees – based on historical experience. Estimated forfeitures are now adjusted to actual forfeiture experience as needed. The cumulative effect of adopting SFAS No. 123R of \$0.2 million, which represents estimated forfeitures for restricted stock awards outstanding at the date of adoption, was not material and therefore has been recorded as a reduction of our stock-based compensation costs in SG&A expense rather than displayed separately as a cumulative change in accounting principle in the Consolidated Statement of Operations.

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 8 Employee Benefit Plans (Continued)**

In connection with the adoption of SFAS No. 123R, we estimate the fair value of each stock option on the date of grant using the BSM option-pricing formula and amortize that value to expense over the option's vesting period using the straight-line attribution approach. The following are the weighted-average assumptions used to value grants for the year ended September 30, 2006.

	September 30, 2006
Expected term (in years)	5.6
Risk-free interest rate	4.28%
Expected volatility	72%
Expected dividend yield	0%

Expected Term: The expected term represents the period over which the share-based awards are expected to be outstanding. It has been determined using the shortcut method described in Staff Accounting Bulletin Topic 14.D.2, which is based on a calculation to arrive at the midpoint between the vesting date and the end of the contractual term.

Risk-Free Interest Rate: We based the risk-free interest rate used in our assumptions on the implied yield currently available on U.S. Treasury zero-coupon issues with a remaining term equivalent to the stock option award's expected term.

Expected Volatility: The volatility factor used in our assumptions is based on the historical price of our stock over the most recent period commensurate with the expected term of the stock option award.

Expected Dividend Yield: We do not intend to pay dividends on our common stock for the foreseeable future. Accordingly, we use a dividend yield of zero in our assumptions.

Incentive Stock Plans

We maintain incentive stock plans that provide for the grants of stock options and restricted stock awards to our directors, officers and key employees. As of September 30, 2006, there were 2,007,620 shares of common stock reserved for issuance under our stock plans. We intend to issue shares from treasury stock. Under these stock plans, stock options must be granted at an option price equal to the closing market value of the stock on the date of the grant. Options granted under these plans, prior to October 2, 2005, become exercisable over four years in equal annual installments after the date of grant, with the exception of directors' options which cliff vest after six months, provided that the individual is continuously employed by our company. Options granted during 2006 become exercisable over three years in equal annual installments after the date of grant, with the exception of directors' options which cliff vest after six months, provided that the individual is continuously employed by our company. All options granted expire ten years from the date of grant. We had authorization under our stock plans to grant 3,225,948 additional stock awards at September 30, 2006. At September 30, 2006 and 2005, respectively, we had 903,058 and 1,012,204 restricted shares of our common stock (restricted stock awards) outstanding. Restricted stock awards granted in fiscal

2006 vest ratably over three years.

Restricted stock awards granted in fiscal 2005 either vest in annual increments over four years or at the end of three years. Restricted stock awards issued in prior years either vest in equal annual increments over four years or vest over seven years (either in thirds on the third year, fifth year and seventh year or solely at the end of the seventh year). In 2006 and 2005, we granted 484,571 and 726,053 restricted stock awards, respectively. The weighted-average fair value of restricted stock awards granted during 2006 was \$8.27 per share. During 2005, the weighted-average fair value of restricted stock awards granted was \$9.19.

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 8 Employee Benefit Plans (Continued)**

A summary of option activity under our stock plans as of September 30, 2006 and the changes during fiscal 2006 is presented below (amounts are in millions, except shares and per share amounts):

Options	Number of Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (years)	Aggregate Intrinsic Value
Outstanding at September 30, 2005	1,266,032	\$ 5.37		
Granted	53,250	8.31		
Exercised	(269,650)	5.99		
Forfeited	(119,000)	7.36		
Outstanding at September 30, 2006	930,632	\$ 5.11	5.8	\$ 4.6
Vested or expected to vest at September 30, 2006	889,271	\$ 5.10	5.8	4.4
Exercisable at September 30, 2006	738,507	\$ 4.81	5.4	\$ 3.9

The weighted-average fair values of stock options granted during 2006 were \$5.41. The total intrinsic value of stock options exercised was \$0.9 million during the year ended September 30, 2006 and was approximately \$1.4 million during the year ended September 30, 2005. As of September 30, 2006, there was \$0.4 million of total unrecognized compensation cost related to the stock options granted under our stock plans. That cost is expected to be recognized over a weighted-average period of 1.6 years.

A summary of the status of our restricted stock awards as of September 30, 2006 and changes during the year is presented below:

	Number of Shares	Weighted-Average Fair Value at Grant Date
Nonvested at September 30, 2005	1,012,204	\$ 9.41
Granted	484,571	8.27
Vested	(500,402)	9.59
Forfeited	(93,315)	9.17

Nonvested at September 30, 2006	903,058	\$	8.72
---------------------------------	---------	----	------

As of September 30, 2006, there was \$3.4 million of total unrecognized compensation cost related to restricted stock awards granted under our stock plans. That cost is expected to be recognized over a weighted-average period of 2.1 years. The total fair value of restricted stock awards vested during fiscals 2006 and 2005, based on the closing price on the vesting date, was \$4.8 million and \$3.5 million, respectively. David H. Clarke retired as Chief Executive Officer of the Company on August 31, 2006 and as Chairman and member of the Board of Directors effective September 30, 2006. We recorded \$2.6 million related to his separation agreement in fiscal 2006, of which approximately \$1.2 million related to stock-based compensation awards and the remainder was cash charges. In connection with his retirement, the Company accelerated the remaining unrecognized compensation expense of approximately \$0.6 million for 244,115 unvested shares which were subject to acceleration of vesting upon his retirement. Additionally, the Company modified the vesting terms for 75,000 shares of unvested restricted stock and recorded \$0.6 million in connection with this modification.

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 9 Capital Stock***Common Stock*

In March 2001, our Board of Directors indefinitely suspended the quarterly payment of dividends on our common stock.

Stockholder Rights Plan

We adopted a Stockholder Rights Plan (the Rights Plan) effective October 15, 1998. Under the Rights Plan, each of our stockholders on the date of record were issued one right (the Right) to acquire one-hundredth of a share of our Series A Junior Preferred Stock (Preferred Stock), having a market value of two times the exercise price for the Rights, for each outstanding share of Jacuzzi Brands, Inc. common stock they own.

Initially, the Rights trade with our common stock and are not exercisable. The Rights will separate from the Common Stock and only become exercisable when a single person or company acquires or makes an offer to acquire 15% or more of our outstanding common stock, unless otherwise agreed by our Board of Directors. Upon exercise of the Right, the economic and voting terms of the Preferred Stock acquired by the stockholders will be equivalent to those possessed when they held shares of our Common Stock.

The Rights will expire on October 15, 2008 or 90 days following the date the Rights become exercisable, whichever is earlier. The Board of Directors has agreed to permit Southeastern Asset Management, Inc. and its managed funds to purchase up to 24.0% of the outstanding voting securities without causing the Rights to separate and become exercisable, and we have entered into a standstill agreement with Southeastern Asset Management containing limitations and restrictions on the voting and transfer of shares of common stock acquired in excess of 15%.

Note 10 Commitments and Contingencies*Operating Leases*

The table below shows our future minimum lease payments due under non-cancelable leases as of September 30, 2006. Certain of these leases contain stated escalation clauses while others contain renewal options. These minimum lease payments (presented in millions) have not been reduced by minimum sublease rental income; however, they include facility leases that were accrued as restructuring costs (see **Note 4**).

2007	\$ 12.7
2008	9.8
2009	7.9
2010	6.9
2011	5.7
Thereafter	8.6
	\$ 51.6

Rent expense, including equipment rental, was approximately \$16.3 million, \$15.4 million and \$15.6 million in 2006, 2005 and 2004, respectively.

Environmental Regulation

We are subject to numerous foreign, federal, state and local laws and regulations concerning such matters as zoning, health and safety and protection of the environment. Laws and regulations protecting the

Table of Contents

JACUZZI BRANDS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 10 Commitments and Contingencies (Continued)

environment may in certain circumstances impose strict liability, rendering a person liable for environmental damage without regard to negligence or fault on the part of such person. In addition, from time to time, we may receive notices of violation or may be denied applications for environmental licenses or permits because the practices of the operating unit are not consistent with regulations or ordinances.

Our subsidiaries have made capital and maintenance expenditures over time to comply with these laws and regulations. While the amount of expenditures in future years will depend on legal and technological developments which cannot be predicted at this time, these expenditures may progressively increase if regulations become more stringent. In addition, while future costs for compliance cannot be predicted with precision, no information currently available reasonably suggests that these expenditures will have a material adverse effect on our financial condition, results of operations or cash flows.

We are investigating and remediating contamination at a number of present and former operating sites under the Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA or Superfund), the Federal Resource Conservation and Recovery Act or comparable state statutes or agreements with third parties. These proceedings are in various stages ranging from initial investigations to active settlement negotiations to the cleanup of sites. We have been named as a potentially responsible party at a number of Superfund sites under CERCLA or comparable state statutes. Under these statutes, responsibility for the entire cost of cleanup of a contaminated site can be imposed upon any current or former site owner or operator, or upon any party who sent waste to the site, regardless of the lawfulness of the original activities that led to the contamination. No information currently available reasonably suggests that projected expenditures associated with any of these proceedings or any remediation of these sites will have a material adverse effect on our financial condition, results of operations or cash flows.

As of September 30, 2006, we had accrued approximately \$8.1 million (\$0.6 million accrued as current liabilities and \$7.5 million as non-current liabilities), including \$5.8 million for discontinued operations, for environmental liabilities. These amounts have not been discounted. In conjunction with some of these liabilities, we have deposited \$10.2 million in escrow accounts pursuant to the terms of past disposal agreements. We accrue an amount for each case when the likelihood of an unfavorable outcome is probable and the amount of loss associated with such unfavorable outcome is reasonably estimable. We believe that the range of liability for these matters would only increase by \$0.1 million if it included cases where the likelihood of an unfavorable outcome is only reasonably possible. During the third quarter of 2006, we entered into a settlement agreement with Ames True Temper, Inc. regarding our environmental liabilities. We surrendered the cash that was deposited in escrow for these matters and paid \$2.5 million in return for our release from all pending claims and any future environmental liabilities associated with Ames True Temper, Inc.

We cannot predict whether future developments in laws and regulations concerning environmental protection or unanticipated enforcement actions will require material capital expenditures or otherwise affect our financial condition, results of operations or cash flows in a materially adverse manner, or whether our businesses will be successful in meeting future demands of regulatory agencies in a manner which will not have a material adverse effect on our financial condition, results of operations or cash flows.

Litigation

We and our subsidiaries are parties to legal proceedings that we believe to be either ordinary, routine litigation incidental to the business of present and former operations or immaterial to our financial condition, results of operations or cash flows.

Certain of our subsidiaries are defendants or plaintiffs in lawsuits that have arisen in the normal course of business. While certain of these matters involve substantial amounts, it is management's opinion, based on the

Table of Contents

JACUZZI BRANDS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 10 Commitments and Contingencies (Continued)

advice of counsel, that the ultimate resolution of such litigation and environmental matters will not have a material adverse effect on our financial condition, results of operations or cash flows.

We are aware of four purported class action lawsuits related to the merger filed against the Company, each of the Company's directors and various other defendants, as the case may be, including Apollo, Parent, Merger Subsidiary and George M. Sherman (the non-executive Chairman of Rexnord Corporation, a portfolio company affiliated with Apollo), in the Court of Chancery in the State of Delaware in and for New Castle County. The lawsuits *Usheroff v. Jacuzzi Brands, Inc., et al.*, C.A. No. 2473-N (filed Oct. 13, 2006), *Ryan v. Victor, et al.*, C.A. No. 2477-N (filed Oct. 13, 2006), *Rubenstein v. Marini, et al.*, C.A. No. 2485-N (filed Oct. 20, 2006) and *Worcester Retirement System v. Jacuzzi Brands, Inc., et al.*, C.A. No. 2531-N (filed Nov. 8, 2006) generally allege, among other things, that the merger consideration to be paid to the Company's stockholders in the merger is unfair and grossly inadequate. In addition, the complaints allege that the Company's directors violated their fiduciary duties by, among other things, failing to take all reasonable steps to assure the maximization of stockholder value, including the exploration of strategic alternatives that will return greater or equivalent short-term value to the Company's stockholders. Certain of the complaints further allege that the preliminary proxy statement on Form 14A filed by the Company on November 2, 2006 is materially misleading and omits material facts. The complaints each seek, among other relief, certification of the lawsuit as a class action, a declaration that the merger is unfair, unjust and inequitable to the Company's stockholders, an injunction preventing completion of the merger at a price that is not fair and equitable, compensatory damages to the class, attorneys' fees and expenses, along with such other relief as the court might find just and proper. In addition, the complaint filed by Worcester Retirement System seeks expedited discovery and preliminary injunction proceedings. We believe that these lawsuits are without merit and plan to defend them vigorously. However, even if these lawsuits are determined to be without merit, they may potentially delay or, if the delay is substantial enough to prevent the consummation of the merger by February 15, 2007, potentially prevent the consummation of the merger. Additional lawsuits pertaining to the merger could be filed in the future.

In June 1998, we acquired Zurn which operates as one of our wholly-owned subsidiaries. At the time of the acquisition, Zurn had itself owned various subsidiaries. Zurn, along with many other unrelated companies, is a co-defendant in numerous asbestos related lawsuits pending in the U.S. Plaintiffs' claims primarily allege personal injuries allegedly caused by exposure to asbestos used primarily in industrial boilers formerly manufactured by a segment of Zurn that has been accounted for as a discontinued operation. Zurn did not manufacture asbestos or asbestos components. Instead, Zurn purchased it from suppliers.

Federal legislation has been proposed that would remove asbestos claims from the current tort system and place them in a trust fund system. This trust would be funded by the insurers and defendant companies. There can be no assurance as to when or if this or any other legislation will be passed and become law or what, if any, the financial impact it could have on Zurn.

New claims filed against Zurn decreased year-over-year. During 2006, approximately 6,400 new asbestos claims were filed against Zurn versus 10,400 in 2005. As of September 30, 2006, the number of asbestos claims pending against Zurn was approximately 46,200 compared to 69,900 as of October 2, 2004. The pending claims against Zurn as of September 30, 2006 were included in approximately 4,900 lawsuits, in which Zurn and an average of 80 other companies are named as defendants, and which cumulatively allege damages of approximately \$11.2 billion against all defendants. The claims are handled pursuant to a defense strategy funded by Zurn's insurers. Defense costs

currently do not erode the coverage amounts in the insurance policies, although a few policies that will be accessed in the future may count defense costs toward aggregate limits.

Table of Contents

JACUZZI BRANDS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 10 Commitments and Contingencies (Continued)

During 2006 and as of the end of such period, approximately 16,300 claims were paid and/or pending payment and approximately 24,600 claims were dismissed and/or pending dismissal. During 2005 and as of the end of such period, approximately 17,000 claims were paid and/or pending payment and approximately 13,600 claims were dismissed and/or pending dismissal. Since Zurn received its first asbestos claim in the 1980s, Zurn has paid or dismissed or agreed to settle or dismiss approximately 146,000 asbestos claims including dismissals or agreements to dismiss of approximately 48,900 of such claims through the end of 2006 compared to 115,900 and 23,900 claims, respectively, through the end of 2005.

Zurn uses an independent economic consulting firm with substantial experience in asbestos liability valuations to assist in the estimation of Zurn's potential asbestos liability. At September 30, 2006, that firm estimated that Zurn's potential liability for asbestos claims pending against it and for claims estimated to be filed through 2016 is approximately \$136 million, of which Zurn expects to pay approximately \$102 million through 2016 on such claims, with the balance of the estimated liability being paid in subsequent years. As discussed below in more detail, Zurn expects all such payments to be paid by its carriers.

This asbestos liability estimate was based on the current and anticipated number of future asbestos claims, the timing and amounts of asbestos payments, the status of ongoing litigation and the potential impact of defense strategies and settlement initiatives. However, there are inherent uncertainties involved in estimating the number of future asbestos claims, future settlement costs, and the effectiveness of Zurn's defense strategies and settlement initiatives. In addition, Zurn's current estimate could be affected due to changes in law and other factors beyond its control. As a result, Zurn's actual liability could differ from Zurn's estimate described herein. Zurn's current estimate of its asbestos liability of \$136 million for claims filed through 2016 assumes that (i) its continuous vigorous defense strategy will remain effective; (ii) new asbestos claims filed annually against it will decline modestly through 2016; (iii) the values by disease will remain consistent with past experience; and (iv) its insurers will continue to pay defense costs without eroding the coverage amounts of its insurance policies. While Zurn believes there is evidence, in its claims settlements experience, for such an impact of a successful defense strategy, if the defense strategy ultimately is not successful to the extent assumed by Zurn, the severity and frequency of asbestos claims could increase substantially above Zurn's estimates. Further, while Zurn's current asbestos liability is based on an estimate of claims through 2016, such liability may continue beyond 2016, and such liability could be substantial.

Zurn estimates that its available insurance to cover its potential asbestos liability as of September 30, 2006 is approximately \$286 million. Zurn estimated that its available insurance to cover its potential asbestos liability as of October 1, 2005 was approximately \$293 million. The decrease in the amount of available insurance reflects the payments made during 2006. Zurn believes, based on its experience in defending and dismissing such claims and the coverage available, that it has sufficient insurance to cover the pending and reasonably estimable future claims. This conclusion was reached after considering Zurn's experience in asbestos litigation, the insurance payments made to date by Zurn's insurance carriers, existing insurance policies, the industry ratings of the insurers and the advice of insurance coverage counsel with respect to applicable insurance coverage law relating to the terms and conditions of those policies. As of September 30, 2006 and October 1, 2005, Zurn recorded a receivable from its insurance carriers of \$136 million and \$153 million, respectively, which corresponds to the amount of Zurn's potential asbestos liability that is covered by available insurance and is probable of recovery. However, there is no assurance that \$286 million of insurance coverage will ultimately be available or that Zurn's asbestos liabilities will not ultimately exceed \$286 million. Factors that could cause a decrease in the amount of available coverage include changes in law

governing the policies, potential disputes with the carriers on the scope of coverage, and insolvencies of one or more of Zurn's carriers.

Principally as a result of the past insolvency of certain of Zurn's insurance carriers, coverage analysis reveals that certain gaps exist in Zurn's insurance coverage, but only if and after Zurn uses approximately

Table of Contents

JACUZZI BRANDS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 10 Commitments and Contingencies (Continued)

\$216 million of its remaining approximate \$286 million of insurance coverage. As noted above, the estimate of Zurn's potential liability for asbestos claims pending against it and for claims estimated to be filed through 2016 is \$136 million with the expected amount to be paid through 2016 being \$102 million. In order to use approximately \$261 million of the \$286 million of its insurance coverage from solvent carriers, Zurn estimates that it would need to satisfy approximately \$14 million of asbestos claims, with additional gaps of \$80 million layered within the final \$25 million of the \$286 million of coverage. We will pursue, if necessary, any available recoveries on our approximately \$148 million of coverage with insolvent carriers, which includes approximately \$83 million of coverage attributable to the gaps discussed above. These estimates are subject to the factors noted above.

After review of the foregoing with Zurn and its consultants, we believe that the resolution of Zurn's pending and reasonably estimable asbestos claims will not have a material adverse effect on Zurn's financial condition, results of operations or cash flows.

Note 11 Segment Information

The results of operations are reported in two business segments, consisting of the Bath Products segment and the Plumbing Products segment. Our Bath Products segment manufactures whirlpool baths, spas, showers, sanitary ware, including sinks and toilets, and bathtubs for the construction and remodeling markets. Our Plumbing Products segment manufactures professional grade drainage, water control, commercial brass and PEX piping products for the commercial and institutional construction, renovation and facilities maintenance markets. Prior periods include the Rexair segment, which was sold in 2005.

The financial information of our segments is regularly evaluated by the chief operating decision makers in determining resource allocation and assessing performance and is periodically reviewed by our Board of Directors. We evaluate the performance of each business segment based on its operating results and, other than general corporate expenses, allocate specific corporate overhead to each segment. The same accounting policies are used throughout the organization (see **Note 2**).

2005	4.5			4.9	9.4
2004	3.5			(0.6)	2.9
Assets					
At September 30, 2006	\$ 466.0	\$ 333.8	\$	\$ 453.9	\$ 1,253.7
At September 30, 2005	\$ 480.9	\$ 295.6	\$	\$ 513.0	\$ 1,289.5

(1) Fiscal 2006 include \$1.8 million of inventory write-downs and accelerated depreciation in cost of goods sold associated with the Bradford, U.K. consolidation.

Aside from the operating income (loss) amounts noted above, our income from continuing operations includes interest income and expense, other income and expense items and income taxes, none of which are included in our measurement of segment operating profit. Corporate includes pension income of \$5.2 million, \$7.2 million and \$10.3 million for 2006, 2005 and 2004, respectively. Corporate assets consist primarily of real property, assets held for sale, escrow deposits, cash and cash equivalents and other investments.

Our operations are principally located in North America and Europe and to a lesser extent, in other regions of the world. Our country of domicile is the U.S. Export sales represented 6%, 7% and 9% of total sales for 2006, 2005 and 2004, respectively. Principal international markets served include Europe, South America, Canada and Asia.

Continuing operations	\$ 0.16	\$ 0.09	\$ (0.01)	\$ 0.34	\$ 0.09	\$ 0.11	\$ 0.50	\$ 0.06
Net earnings (loss)	0.14	0.05	(0.05)	0.39	0.07	0.10	(0.28)	0.03
Earnings (loss) per diluted common share:								
Continuing operations	\$ 0.16	\$ 0.09	\$ (0.01)	\$ 0.33	\$ 0.09	\$ 0.11	\$ 0.50	\$ 0.06
Net earnings (loss)	0.14	0.05	(0.05)	0.38	0.07	0.10	(0.27)	0.03

Operating income in 2006 includes restructuring and other charges of \$1.6 million, \$1.6 million, \$1.3 million and \$2.7 million in the first, second, third and fourth quarters, respectively, associated primarily with the reorganization and restructuring of senior management in the Bath Products segment and corporate offices, staffing reductions in the U.K. and domestic bath business and other overhead reductions. Net earnings in the fourth quarter of 2006 include a \$14.0 million reversal of a tax reserve. Operating income in the third quarter of 2006 included \$2.9 million of expense related to the Company's retiree benefit liabilities for several key executives which should have been recorded during the period beginning with the Company's 1995 spin-off from Hanson plc to fiscal year end 2005. No single fiscal year was materially misstated. Earnings from continuing operations in the first quarter of 2006 include a \$9.3 million gain on collection of a note. The net loss in the third quarter of 2006 includes a non-cash charge of \$14.4 million related to the establishment of a reserve for the deferred tax assets of its U.K. operations.

Operating income in 2005 includes restructuring charges of \$1.5 million, \$0.7 million, \$1.4 million and \$5.8 million in the first, second, third and fourth quarters, respectively, associated primarily with the reorganization and restructuring of senior management in the Bath Products segment and corporate offices, staffing reductions in the U.K. and domestic bath business and other overhead reductions. Earnings from continuing operations in the third quarter of 2005 include a \$25.8 million gain on the sale of Rexair. The net loss in the third quarter of 2005 includes a loss of \$56.0 million related to disposals of discontinued operations. The fourth quarter of 2005 includes a \$2.5 million (including \$0.5 million of interest) provision for the settlement of taxes on property.

Note 13 Supplemental Joint Issuer and Guarantor Financial Information

The following represents the supplemental condensed consolidating financial statements of Jacuzzi Brands, Inc. (JBI), which is the issuer of our Senior Notes, the subsidiaries which are guarantors of the Senior Notes and our subsidiaries which are not guarantors of the Senior Notes as of September 30, 2005 and September 30, 2004 and for each of the three years in the period ended September 30, 2005. Certain of our existing and future domestic restricted subsidiaries guarantee the Senior Notes, jointly and severally, on a senior basis. The Senior Notes are secured by a first-priority lien on and security interest in substantially all of

Table of Contents**JACUZZI BRANDS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 13 Supplemental Joint Issuer and Guarantor Financial Information (Continued)**

our domestic real property, plant and equipment (referred to as Notes Collateral). The Senior Notes are also secured by a second-priority lien on and security interest in the Bank Collateral (see **Note 5**). Separate condensed consolidated financial statements of each guarantor are not presented, as we have determined that they would not be material to investors.

Item 9. *Changes in and Disagreements with Accountants on Accounting and Financial Disclosure*

None.

Item 9A. *Controls and Procedures*

We carried out an evaluation under the supervision and with the participation of our management, including the Chief Executive Officer and the Chief Financial Officer of the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Annual Report. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures, as defined in Exchange Act Rules 13a-15(c) and 15d-15(e) were effective as of the end of the period covered by this report. Our management necessarily applied its judgment in assessing the costs and benefits of such controls and procedures, which by their nature can provide only reasonable assurance regarding management's control objectives. There has been no change in our internal control over financial reporting during our fourth quarter, identified in connection with the evaluation referred to above, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Management's Report on Internal Control over Financial Reporting and the Attestation Report of the Registered Public Accounting Firm are included in **Item 8. Financial Statements and Supplementary Data** of this Annual Report on Form 10-K.

Item 9B. *Other Information*

None.

PART III

Item 10. *Directors and Executive Officers of the Registrant*

Information concerning our executive officers is set forth in **Item 1** of this Annual Report on Form 10-K under the caption "Executive Officers."

Information with respect to our directors is incorporated herein by reference to the information "Election of Directors" in our definitive proxy statement to be filed with the Commission pursuant to Regulation 14A of the Securities Exchange Act of 1934 in connection with the 2007 Annual Meeting of Stockholders to be held during the first calendar quarter of 2007 (the "Proxy Statement").

Information required by Item 401(h), 401(i) and 401(j) of Regulation S-K is incorporated herein by reference to the information under "Corporate Governance" "Organization of the Board and its Committees" in the Proxy Statement.

Information required by Item 405 of Regulation S-K is incorporated herein by reference to "Section 16(a) Beneficial Ownership Reporting Compliance" in the Proxy Statement.

Information required by Item 406 of Regulation S-K is incorporated herein by reference to the information under the caption "Corporate Governance" in this Annual Report on Form 10-K and the Proxy Statement.

Item 11. *Executive Compensation*

Information with respect to executive compensation is incorporated herein by reference to the information under the caption Executive Officer Compensation in the Proxy Statement.

Item 12. *Security Ownership of Certain Beneficial Owners and Management*

Information with respect to security ownership of certain beneficial owners and management is incorporated herein by reference to the information under the caption Ownership of Common Stock in the Proxy Statement.

Table of Contents

Item 13. *Certain Relationships and Related Transactions*

On July 28, 2006, we sold all of our shares of common stock of S&J to United Pacific Industries Limited (UPI) for a purchase price of approximately \$5.0 million. Brian C. Beazer, the Chairman of UPI, is one of our directors and holds approximately 24.56% of shares of UPI. David H. Clarke, our Chairman and Chief Executive Officer in July 2006, is a director of UPI and holds approximately 22.88% of the shares of UPI.

Item 14. *Principal Accounting Fees and Services*

Information with respect to principal accounting fees and services is incorporated herein by reference to the information under the caption Independent Registered Public Accounting Firm in the Proxy Statement.

PART IV

Item 15. *Exhibits and Financial Statement Schedules*

(a) *The following documents are filed as a part of this report:*

1. The financial statements listed in Item 8.

2. The financial statement schedule consists of the following:

II. Valuation and Qualifying Accounts This information is included in **Note 2** to our Consolidated Financial Statements.

3. The exhibits listed in the Index to Exhibits.

(b) *Exhibits*
