LHC GROUP, INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. Organization

LHC Group, Inc. (the Company) is one of the largest providers of home nursing services in the United States providing quality cost effective health care services to patients within the comfort and privacy of their home or place of residence. The Company provides home-based services, primarily through home nursing agencies and hospices and facility-based services, primarily through long-term acute care hospitals and outpatient rehabilitation clinics. As of the date of this report, the Company, through its wholly and majority-owned subsidiaries, equity joint ventures and controlled affiliates, operated in Louisiana, Alabama, Arkansas, Mississippi, Texas, Virginia, West Virginia, Kentucky, Florida, Georgia, Tennessee, Ohio, Missouri and North Carolina. During the nine months ending September 30, 2008, the Company acquired 25 home health agencies and three hospices and initiated operations at 9 home health agencies and one hospice.

Unaudited Interim Financial Information

The unaudited condensed consolidated balance sheet as of September 30, 2008, the related condensed consolidated statements of income for the three and nine months ended September 30, 2008 and 2007, condensed consolidated statements of cash flows for the nine months ended September 30, 2008 and 2007 and related notes (collectively, these statements are referred to herein as the interim financial information) have been prepared by the Company. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation in accordance with U.S. generally accepted accounting principles (US GAAP) have been included. Operating results for the three and nine months ended September 30, 2008 are not necessarily indicative of the results that may be expected for the year ending December 31, 2008.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with US GAAP have been condensed or omitted from the interim financial information presented. This report should be read in conjunction with the Company's consolidated financial statements and related notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2007 as filed with the Securities and Exchange Commission on March 17, 2008, which includes information and disclosures not included herein.

2. Significant Accounting Policies

Use of Estimates

The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported revenue and expenses during the reporting period. Actual results could differ from those estimates.

Critical Accounting Policies

The most critical accounting policies relate to the principles of consolidation, revenue recognition and accounts receivable and allowances for uncollectible accounts.

Principles of Consolidation

The consolidated financial statements include all subsidiaries and entities controlled by the Company. Control is generally defined by the Company as ownership of a majority of the voting interest of an entity. The consolidated financial statements include entities in which the Company receives a majority of the entities' expected residual returns, absorbs a majority of the entities' expected losses, or both, as a result of ownership, contractual or other financial interests in the entity.

Table of Contents

All significant inter-company accounts and transactions have been eliminated in consolidation. Business combinations, which are accounted for as purchases, have been included in the consolidated financial statements from the respective dates of acquisition.

The following describes the Company's consolidation policy with respect to its various ventures excluding wholly-owned subsidiaries.

Equity Joint Ventures

The Company's joint ventures are structured as limited liability companies in which the Company typically owns a majority equity interest ranging from 51 to 99 percent. Each member of all but one of the Company's equity joint ventures participates in profits and losses in proportion to their equity interests; the Company has one joint venture partner whose participation in losses is limited. The Company consolidates these entities as the Company receives a majority of the entities' expected residual returns, absorbs a majority of the entities' expected losses and generally has voting control over the entity.

License Leasing Arrangements

The Company, through wholly-owned subsidiaries, leases home health licenses necessary to operate certain of its home nursing agencies. As with wholly-owned subsidiaries, the Company owns 100 percent of the equity of these entities and consolidates them based on such ownership as well as the Company's right to receive a majority of the entities' expected residual returns and the Company's obligation to absorb a majority of the entities' expected losses.

Management Services

The Company has various management services agreements under which the Company manages certain operations of agencies and facilities. The Company does not consolidate these agencies or facilities because the Company does not have an ownership interest and does not have a right to receive a majority of the agencies' or facilities' expected residual returns or an obligation to absorb a majority of the agencies' or facilities' expected losses.

The following table summarizes the percentage of net service revenue earned by type of ownership or relationship the Company had with the operating entity:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2008	2007	2008	2007
Wholly-owned subsidiaries	48.5%	45.5%	48.2%	45.9%
Equity joint ventures	47.2	42.2	47.8	41.8
License leasing arrangements	2.0	10.4	2.0	10.0
Management services	2.3	1.9	2.0	2.3
	100.0%	100.0%	100.0%	100.0%

Revenue Recognition

The Company reports net service revenue at the estimated net realizable amount due from Medicare, Medicaid, commercial insurance, managed care payors, patients and others for services rendered. Under Medicare, the Company's home nursing patients are classified into a group referred to as a home health resource group prior to the receipt of services. Based on the home health resource group, the Company is entitled to receive a prospective Medicare payment for delivering care over a 60-day period referred to as an episode. Medicare adjusts these prospective payments based on a variety of factors, such as low utilization, patient transfers and the level of services provided. In calculating the Company's reported net service revenue from home nursing services, the Company adjusts the prospective Medicare payments by an estimate of the adjustments. The adjustments are calculated using a historical average of prior adjustments. For home nursing services, the Company recognizes revenue based on the number of days elapsed during the episode of care within the reporting period.

Table of Contents

Revenue is recognized as services are provided for the Company's long-term acute care hospitals. Under Medicare, patients in the Company's long-term acute care facilities are classified into long-term diagnosis-related groups. Medicare provides a fixed payment, based on the group classification, which is subject to adjustments due to factors such as short stays. The net service revenue for the period is reduced for the prospective payment amounts by an estimate of the adjustments. The Company calculates the adjustment based on a historical average of prior adjustments for claims paid.

Medicare pays the Company a per diem payment for hospice services. The Company receives one of four predetermined daily or hourly rates based upon the level of care the Company provided. The Company records net service revenue from hospice services based on the daily or hourly rate. The Company recognizes revenue for hospice as services are provided.

Under Medicare, the Company is reimbursed for rehabilitation services based on a fee schedule for services provided, which is adjusted based on the geographical area in which the facility is located. The Company recognizes revenue as the services are provided.

The Company's Medicaid reimbursement is based on a predetermined fee schedule applied to each service provided. Therefore, revenue is recognized for Medicaid services as services are provided based on the fee schedule. The Company's managed care payors reimburse the Company in a manner similar to either Medicare or Medicaid. Accordingly, the Company recognizes revenue from managed care payors in the same manner as the Company recognizes revenue from Medicare or Medicaid.

The Company records management services revenue as services are provided in accordance with the various management services agreements to which the Company is a party. As described in the agreements, the Company provides billing, management and other consulting services suited to and designed for the efficient operation of the applicable home nursing agency or inpatient rehabilitation facility. The Company is responsible for the costs associated with the locations and personnel required for the provision of the services. The Company is compensated based on a percentage of cash collections or is reimbursed for operating expenses and compensated based on a percentage of operating net income.

Net service revenue was comprised of the following:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2008	2007	2008	2007
Home-based services	86.1%	81.6%	84.4%	81.3%
Facility-based services	13.9	18.4	15.6	18.7
	100.0%	100.0%	100.0%	100.0%

The following table sets forth the percentage of net service revenue earned by category of payor:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2008	2007	2008	2007
Payor:				
Medicare	83.2%	82.0%	82.9%	82.0%
Medicaid	4.3	5.0	4.9	5.6
Other	12.5	13.0	12.2	12.4
	100.0%	100.0%	100.0%	100.0%

Home-Based Services

Home Nursing Services. The Company receives a standard prospective Medicare payment for delivering care. The base payment, established through federal legislation, is a flat rate that is adjusted upward or downward based upon differences in the expected resource needs of individual patients as indicated by clinical severity, functional

Table of Contents

severity and service utilization. The magnitude of the adjustment is determined by each patient's categorization into one of 153 payment groups, known as home health resource groups, and the costliness of care for patients in each group relative to the average patient. The Company's payment is also adjusted for differences in local prices using the geographic wage index. The Company performs payment variance analyses to verify that the models used in projecting total net service revenue accurately reflect the payments to be received.

Medicare rates are subject to change. Due to the length of the Company's episodes of care, a situation may arise where Medicare rate changes affect a prior period's net service revenue. In the event that Medicare rates experience change, the net effect of that change will be reflected in the current reporting period. Because such a change would affect claims in progress at the effective date of the change, the financial impact would generally not be material to the current reporting period.

Final payments from Medicare may reflect one of four retroactive adjustments to ensure the adequacy and effectiveness of the total reimbursement: (a) an outlier payment if the patient's care was unusually costly; (b) a low utilization adjustment if the number of visits was fewer than five; (c) a partial payment if the patient transferred to another provider before completing the episode; or (d) a payment adjustment based upon the level of therapy services required in the population base. The Company estimates the effect of these payment adjustments based on historical experience and records this estimate during the period the services are rendered.

Hospice Services. The Company's Medicare hospice reimbursement is based on a prospective payment system, which is updated annually. Hospice payments are subject to two caps. One cap relates to individual programs receiving more than 20 percent of their total Medicare reimbursement from inpatient care services. The second cap relates to individual programs receiving reimbursements in excess of a cap amount, calculated by multiplying the number of beneficiaries during the period by a statutory amount that is indexed for inflation. The determination for each cap is made annually based on the 12-month period ending on October 31 of each year. This limit is computed on a program-by-program basis. None of the Company's hospices exceeded either cap during the nine months ended September 30, 2008 or 2007.

Facility-Based Services

Long-Term Acute Care Services. The Company is reimbursed by Medicare for services provided under the long-term acute care hospital prospective payment system, which was implemented on October 1, 2002. Each patient is assigned a long-term care diagnosis-related group. The Company is paid a predetermined fixed amount applicable to that particular group. The payment is intended to reflect the average cost of treating a Medicare patient classified in that particular long-term care diagnosis-related group. For selected patients, the amount may be further adjusted based on length of stay and facility-specific costs, as well as instances where a patient is discharged and subsequently readmitted, among other factors. Similar to other Medicare prospective payment systems, the rate is also adjusted for geographic wage differences. Revenue from patients covered by private insurance is recognized in accordance with the terms of the individual contracts.

Outpatient Therapy Services. Outpatient therapy services are reimbursed based on a fee schedule, subject to annual limitations. Outpatient therapy providers receive a fixed fee for each procedure performed, adjusted for geographical area in which the facility is located. The Company recognizes revenue as the services are provided. There are also annual Medicare beneficiary caps that limit Medicare coverage for outpatient therapy services.

Accounts Receivable and Allowances for Uncollectible Accounts

The Company reports accounts receivable net of estimated allowances for uncollectible accounts and adjustments. Accounts receivable are uncollateralized and primarily consist of amounts due from third-party payors and patients. To provide for accounts receivable that could become uncollectible in the future, the Company establishes an allowance for uncollectible accounts to reduce the carrying amount of such receivables to their estimated net realizable value. The credit risk for other concentrations of receivables is limited due to the significance of Medicare as the primary payor. The Company does not believe that there are any other significant concentrations of receivables from any particular payor that would subject it to significant credit risk in the collection of accounts receivable.

Table of Contents

The amount of the provision for bad debts is based upon the Company's assessment of historical and expected net collections, business and economic conditions and trends in government reimbursement. Uncollectible accounts are written off when the Company has determined the account will not be collected.

A portion of the estimated Medicare prospective payment system reimbursement from each submitted home nursing episode is received in the form of a request for accelerated payment (RAP). The Company submits a RAP for 60 percent of the estimated reimbursement for the initial episode at the start of care. The full amount of the episode is billed after the episode has been completed. The RAP received for that particular episode is deducted from the final payment. If a final bill is not submitted within the greater of 120 days from the start of the episode, or 60 days from the date the RAP was paid, any RAPs received for that episode will be recouped by Medicare from other Medicare claims in process for that particular provider. The RAP and final claim must then be re-submitted. For subsequent episodes of care contiguous with the first episode for a particular patient, the Company submits a RAP for 50 percent instead of 60 percent of the estimated reimbursement. The remaining 50 percent reimbursement is requested upon completion of the episode. The Company has earned net service revenue in excess of billings rendered to Medicare. Only a nominal portion of the amounts due to the Medicare program represent cash collected in advance of providing services.

Medicare reimbursement is a prospectively set amount that can be determined at the time services are rendered. Medicaid reimbursement is based on a predetermined fee schedule applied to each individual service provided by the Company. The Company's managed care contracts are structured similar to either the Medicare or Medicaid payment methodologies. Because of the payor mix, the Company is able to calculate the actual amount due at the patient level and adjust the gross charges to the actual amount expected to be received for services at the time of billing. Therefore, an estimated contractual allowance is not needed at the time the Company reports net service revenue for each reporting period.

Other Significant Accounting Policies**Earnings Per Share**

Basic per share information is computed by dividing the relevant amounts from the Consolidated Statements of Income by the weighted-average number of shares outstanding during the period. Diluted per share information is computed by dividing the relevant amounts from the Consolidated Statements of Income by the weighted-average number of shares outstanding plus dilutive potential shares.

The following table sets forth shares used in the computation of basic and diluted per share information:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Weighted average number of shares outstanding for basic per share calculation	17,881,228	17,766,612	17,843,869	17,756,537
Effect of dilutive potential shares:				
Options	6,256	4,799	5,111	6,895
Restricted stock	88,821	22,661	118,508	59,805
Adjusted weighted average shares for diluted per share calculation	17,976,305	17,794,072	17,967,488	17,823,237

Minority Interest Subject to Exchange Contracts

One of the Company's joint venture agreements allows the minority interest holders to put their minority interest to the Company. The put option allows the minority interest holder to exchange their minority interest for cash

Table of Contents

based on the joint venture's earnings before interest, taxes, depreciation and amortization (EBITDA) for the prior fiscal year and the Company's stock price. During the first quarter of 2008, certain minority interest holders redeemed their interest in the joint venture, resulting in a cash payment of approximately \$89,000. In connection with the partial redemption of certain minority interests, the Company decreased minority interests by approximately \$84,000 and increased retained earnings by the same amount, representing the fair value at December 31, 2007 of the shares converted during the first quarter of 2008. Simultaneously, the Company recorded goodwill of \$89,000 to represent the value of the minority interests redeemed. The Company recorded a mark to market expense of \$48,000 for the nine months ended September 30, 2008, to mark the liability to redemption value at the end of the quarter. As of September 30, 2008, only one minority interest holder has not converted his interest to cash.

Immaterial Correction of an Error

In accordance with the guidance of Staff Accounting Bulletin No. 108, the interim financial information reflects the immaterial correction of an error in the Company's prior period financial information. Excess tax benefits from the vesting of restricted stock is included in financing activities rather than operating activities as previously shown on the Condensed Consolidated Statement of Cash Flows for the nine months ended September 30, 2007.

Recently Issued Accounting Pronouncements

In December 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 141 (Revised 2007), *Business Combinations* (SFAS 141R). Under SFAS 141R, an acquiring entity will be required to recognize all assets acquired and liabilities assumed in a transaction at fair value on the acquisition-date, with limited exceptions. SFAS 141R changes the accounting treatment and disclosure requirements for certain items in a business combination. For instance, acquisition-related costs, with the exception of debt or equity issuance costs are to be recognized as an expense in the period that the costs are incurred and the services are received. Currently, these costs are included as part of the purchase price and allocated to the assets acquired. SFAS 141R applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning after December 15, 2008. Early adoption is prohibited. The Company expects SFAS 141R will have an effect on accounting for business combinations once adopted but the effect is dependent upon acquisitions subsequent to adoption.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements - An Amendment of ARB No. 51* (SFAS 160). SFAS 160 establishes new accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. SFAS 160 is effective for fiscal years beginning on or after December 15, 2008. Management has not yet completed its evaluation of the potential effect of the adoption of SFAS 160 on the Company's consolidated financial position, results of operations and cash flows.

Adoption of New Accounting Standards

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS 157), which defines fair value, establishes a framework for measuring fair value in US GAAP and expands disclosures about fair value measurements. SFAS 157 does not require any new fair value measurements but rather eliminates inconsistencies in guidance found in various prior accounting pronouncements. In February 2008, the FASB issued FASB Staff Position No. 157-2, which deferred the effective date for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis, until fiscal years beginning after November 15, 2008, and interim periods within those fiscal years. These nonfinancial items include assets and liabilities such as reporting units measured at fair value in goodwill impairment tests and nonfinancial assets acquired and liabilities assumed in a business combination. The Company adopted SFAS 157 for financial assets and liabilities recognized at fair value on recurring bases effective January 1, 2008. The partial adoption of SFAS 157 for financial assets and liabilities did not have a material effect on the Company's consolidated financial position, results of operations or cash flows.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159). Under SFAS 159, companies may elect to measure certain financial instruments and certain other items at fair value. The standard requires that unrealized gains and losses on items for which the fair

Table of Contents

value option has been elected be reported in operations. SFAS 159 was effective for the Company beginning in the first quarter of 2008. The Company has not elected to fair value any eligible items throughout 2008. Therefore, the adoption of SFAS 159 did not affect the Company's consolidated financial position, results of operations or cash flows.

3. Acquisitions

The following acquisitions were completed during the first nine months of 2008 pursuant to the Company's strategy of becoming the leading provider of post-acute health care services in the United States. The purchase price of each acquisition was determined based on the Company's analysis of comparable acquisitions and the target market's potential cash flows. Goodwill generated from the acquisitions was recognized based on the expected contributions of each acquisition to the overall corporate strategy.

2008 Acquisitions

During the nine months ended September 30, 2008, the Company acquired the existing operations of eight entities operating a total of 19 agencies and a majority ownership in six entities operating a total of nine agencies. The total purchase price for the acquisitions was \$36.7 million, including \$1.6 million of acquisition-related costs. Goodwill of \$31.9 million was assigned to the home-based services segment related to the acquisitions, of which \$7.2 million is not deductible for income tax purposes. The Company also acquired an additional ownership interest in one of its majority-owned hospitals for \$1.0 million, paid by issuing 51,736 shares of its common stock. Goodwill of \$1.0 million related to this acquisition, which is nondeductible for income tax purposes, was assigned to the facility-based services segment.

The allocation of the purchase price for certain acquisitions during the nine months ended September 30, 2008 has not been finalized and is subject to change upon completion of final valuation.

On September 30, 2008, the Company paid \$2.8 million in cash for an acquisition, which was completed on October 1, 2008. The \$2.8 million cash payment is recorded as advance payments on acquisitions in the balance sheet as of September 30, 2008.

In conjunction with certain minority interest holders redeeming their interest in one of the Company's joint ventures, \$89,000 of goodwill, which is not deductible for income tax purposes, was recognized in the facility-based services segment. See Footnote 2 for further detail.

The changes in recorded goodwill by segment for the nine months ended September 30, 2008 were as follows:

	Nine Months Ended September 30, 2008 (in thousands)
Home-based services segment:	
Balance at December 31, 2007	\$ 57,884
Goodwill acquired during the period from acquisitions	31,806
Balance at September 30, 2008	\$ 89,690
Facility-based services segment:	
Balance at December 31, 2007	\$ 4,343
Goodwill acquired during the period from redemption of minority interest	1,123
Balance at September 30, 2008	\$ 5,466

There were no dispositions during the nine months ended September 30, 2008.

The above transactions were considered to be immaterial individually and in the aggregate. Accordingly, no supplemental pro forma information is required.

Table of Contents**4. Credit Arrangements****Long-Term Debt**

Long-term debt consisted of the following:

	September 30, 2008	December 31, 2007
	(in thousands)	
Notes payable:		
Due in monthly installments of \$28,056 through February 2015 at LIBOR plus 1.90% (4.38% at September 30, 2008) plus a balloon payment of \$930,000	\$ 4,853	\$
Due in monthly installments of \$12,500 through November 2009 at 5.78%	157	260
Due in yearly installments of \$50,000 through August 2010 at 6.25%	100	150
Due in monthly installments of \$20,565 through October 2015 at LIBOR plus 2.25% (6.71% at December 31, 2007)		2,870
	5,110	3,280
Less current portion of long-term debt	531	433
	\$ 4,579	\$ 2,847

In February 2008, the Company entered into a loan agreement with Capital One, National Association (Capital One) for a term note in the amount of \$5.1 million for the purchase of a 1999 Cessna 560 aircraft. The aircraft is collateral for the term note, which is payable in 83 monthly installments of principal plus interest commencing on March 6, 2008 followed by one balloon installment on February 6, 2015 of \$930,000. The term note bears interest at the LIBOR Rate (adjusted monthly) plus the Applicable Margin of 1.9 percent.

On February 28, 2008, the Company paid its prior promissory note with Bancorp Equipment Finance, Inc. in full. The note was collateralized by the Company's previous aircraft, which was sold in February 2008 for \$3.1 million. The sale resulted in a gain of \$315,000.

Certain of the Company's loan agreements contain restrictive covenants, including limitations on indebtedness and the maintenance of certain financial ratios. At September 30, 2008 and December 31, 2007, the Company was in compliance with all covenants.

Credit Facilities

On February 20, 2008, the Company entered into a new credit facility agreement with Capital One (New Credit Facility), which was amended on March 6, 2008 to include an additional lender, First Tennessee Bank, N.A., to increase the line of credit from \$25 million to \$37.5 million and to amend the Eurodollar Margin for each Eurodollar Loan (as those terms are defined in the New Credit Facility) issued under the New Credit Facility. The Credit Agreement was amended and restated on June 12, 2008 to add Branch Banking and Trust Company as a Lender and to increase the maximum aggregate principal amount of the line of credit from \$37.5 million to \$75.0 million. The New Credit Facility is unsecured, has a term of two years and a letter of credit sublimit of \$2.5 million. The annual facility fee is 0.125 percent of the total availability. The interest rate for borrowings under the New Credit Agreement is a function of the prime rate (Base Rate) or the Eurodollar rate (Eurodollar), as elected by the Company, plus the applicable margin based on the Leverage Ratio as defined in the New Credit Facility. No amounts were outstanding on this facility as of September 30, 2008.

On February 20, 2008, the Company terminated its credit facility agreement with C.F. Blackburn, LLC successor by assignment to Residential Funding Company, LLC, f/k/a Residential Funding Corporation (Former Credit Facility). No amounts were outstanding under this facility at December 31, 2007. The Former Credit Facility was due to expire on April 15, 2010.

Table of Contents**5. Stockholders Equity****Issuance of Common Stock**

As discussed in Footnote 3, the Company issued 51,736 shares of common stock to purchase an additional ownership percentage in one of its majority-owned hospitals. The stock was valued as of May 14, 2008, the effective date of the acquisition.

Share Based Compensation

On January 20, 2005, the board of directors and stockholders of the Company approved the 2005 Long Term Incentive Plan (the Incentive Plan). The Incentive Plan provides for 1,000,000 shares of common stock that may be issued or transferred pursuant to awards made under the plan. A variety of discretionary awards for employees, officers, directors and consultants are authorized under the Incentive Plan, including incentive or non-qualified statutory stock options and restricted stock. All awards must be evidenced by a written award certificate which will include the provisions specified by the compensation committee of the board of directors. The compensation committee will determine the exercise price for non-statutory stock options. The exercise price for any option cannot be less than the fair market value of our common stock as of the date of grant.

Also on January 20, 2005, the 2005 Director Compensation Plan was adopted. The shares issued under our 2005 Director Compensation Plan are issued from the 1,000,000 shares reserved for issuance under our Incentive Plan.

Stock Options

As of September 30, 2008, 19,000 options were issued and exercisable. During the nine months ended September 30, 2008 and 2007, no options were forfeited and no options were granted. There were no options exercised during the nine months ended September 30, 2008. During the nine months ended September 30, 2007, 2,000 options were exercised.

Nonvested Stock

During the nine months ended September 30, 2008, 16,100 nonvested shares of stock were granted to our independent directors under the 2005 Director Compensation Plan. All of these shares vest one year from the grant date. During the nine months ended September 30, 2008, 148,095 nonvested shares were granted to employees pursuant to the 2005 Long-Term Incentive Plan. All of these shares vest over a five year period. The fair value of nonvested shares is determined based on the closing trading price of the Company's shares on the grant date. The weighted average grant date fair value of nonvested shares granted during the nine months ended September 30, 2008 was \$18.57.

The following table represents the nonvested stock activity for the nine months ended September 30, 2008:

	Number of Shares	Weighted average grant date fair value
Nonvested shares outstanding at December 31, 2007	218,832	\$24.83
Granted	164,195	\$18.57
Vested	(40,159)	\$26.16
Forfeited	(21,997)	\$21.97
Nonvested shares outstanding at September 30, 2008	320,871	\$22.42

As of September 30, 2008, there was \$9.1 million of total unrecognized compensation cost related to nonvested shares granted. That cost is expected to be recognized over the weighted average period of 3.7 years. The total fair value of shares vested in the nine months ended September 30, 2008 and 2007 was \$1.0 million and \$430,000,

Table of Contents

respectively. The Company records compensation expense related to nonvested share awards at the grant date for shares that are awarded fully vested, and over the vesting term on a straight line basis for shares that vest over time. The Company has recorded \$1.4 million and \$758,000 of compensation expense related to nonvested stock grants in the nine months ended September 30, 2008 and 2007, respectively.

Employee Stock Purchase Plan

The Company has a plan whereby eligible employees may purchase the Company's common stock at 95 percent of the market price on the last day of the calendar quarter. There are 250,000 shares reserved for the plan. The Company issued 5,690 shares of common stock under the plan at a per share price of \$23.73 during the three months ended March 31, 2008, 7,370 shares at a per share price of \$15.96 during the three months ended June 30, 2008 and 5,944 shares at a per share price of \$22.09 during the three months ended September 30, 2008. As of September 30, 2008 there were 207,007 shares available for future issuance.

6. Commitments and Contingencies**Contingencies**

The terms of several joint venture operating agreements provide buy/sell terms that would require the Company to either purchase or sell the existing membership interest in the joint venture upon receipt of the notice to exercise the provision. Both the Company and its joint venture partners have the right to exercise the buy/sell agreement. The party receiving the exercise notice has the right to purchase the interests held by the other party, sell its interests to the other party, or dissolve the partnership. The purchase price formula for the interests is set forth in the joint venture agreement and is generally based on a multiple of the earnings before income taxes and depreciation and amortization of the joint venture. The Company has not received notice from any joint venture partners of their intent to exercise the terms of the buy/sell agreement nor has the Company notified any joint venture partners of its intent to exercise the terms of the buy/sell agreement.

The Company is involved in various legal proceedings arising in the ordinary course of business. Although the results of litigation cannot be predicted with certainty, management believes the outcome of pending litigation will not have a material adverse effect, after considering the effect of the Company's insurance coverage, on the Company's consolidated financial statements.

Compliance

The laws and regulations governing the Company's operations, along with the terms of participation in various government programs, regulate how the Company does business, the services offered and its interactions with patients and the public. These laws and regulations and their interpretations, are subject to frequent change. Changes in existing laws or regulations, or their interpretations, or the enactment of new laws or regulations could materially and adversely affect the Company's operations and financial condition.

The Company is subject to various routine and non-routine governmental reviews, audits and investigations. In recent years, federal and state civil and criminal enforcement agencies have heightened and coordinated their oversight efforts related to the health care industry, including with respect to referral practices, cost reporting, billing practices, joint ventures and other financial relationships among health care providers. Violation of the laws governing the Company's operations, or changes in the interpretation of those laws, could result in the imposition of fines, civil or criminal penalties, termination of the Company's rights to participate in federal and state-sponsored programs and suspension or revocation of the Company's licenses.

If the Company's long-term acute care hospitals fail to meet or maintain the standards for Medicare certification as long-term acute care hospitals, such as average minimum length of patient stay, they will receive payments under the prospective payment system applicable to general acute care hospitals rather than payment under the system applicable to long-term acute care hospitals. Payments at rates applicable to general acute care hospitals would likely result in the Company receiving less Medicare reimbursement than currently received for patient services. Moreover, all but one of the Company's long-term acute care hospitals are subject to additional Medicare criteria because they operate as separate hospitals located in space leased from, and located in, a general acute care hospital,

Table of Contents

known as a host hospital. This is known as a "hospital within a hospital" model. These additional criteria include requirements concerning financial and operational separateness from the host hospital.

The Company anticipates there may be changes to the standard episode-of-care payment from Medicare in the future. Due to the uncertainty of the revised payment amount, the Company cannot estimate the effect that changes in the payment rate, if any, will have on its future financial statements.

The Company believes that it is in material compliance with all applicable laws and regulations and is not aware of any pending or threatened investigations involving allegations of potential wrongdoing. While no such regulatory inquiries have been made, compliance with such laws and regulations can be subject to future government review and interpretation as well as significant regulatory action, including fines, penalties and exclusion from the Medicare program.

7. Segment Information

The Company's segments consist of home-based services and facility-based services. Home-based services include home nursing services and hospice services. Facility-based services include long-term acute care services and outpatient therapy services. The accounting policies of the segments are the same as those described in the summary of significant accounting policies.

	Three Months Ended September 30, 2008

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**CAUTIONARY NOTICE REGARDING FORWARD-LOOKING STATEMENTS**

This Management's Discussion and Analysis of Financial Condition and Results of Operations contain forward-looking statements. Forward-looking statements relate to expectations, beliefs, future plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts or that necessarily depend upon future events. The words may, will, should, could, would, expect, plan, intend, anticipate, estimate, project, predict, potential or other similar expressions are intended to identify forward-looking statements. Specifically, this report contains, among others, forward-looking statements about:

our expectations regarding financial condition or results of operations for periods after September 30, 2008;

our critical accounting policies;

our business strategies and our ability to grow our business;

our participation in the Medicare and Medicaid programs;

the reimbursement levels of Medicare and other third-party payors;

the prompt receipt of payments from Medicare and other third-party payors;

Table of Contents

our future sources of and needs for liquidity and capital resources;

the value of our investments;

the effect of any changes in market rates on our operations and cash flows;

our ability to obtain financing;

our ability to make payments as they become due;

the outcomes of various routine and non-routine governmental reviews, audits and investigations;

our expansion strategy, the successful integration of recent acquisitions and, if necessary, the ability to relocate or restructure our current facilities;

the value of our proprietary technology;

the impact of legal proceedings;

our insurance coverage;

the costs of medical supplies;

our competitors and our competitive advantages;

the price of our stock;

our compliance with environmental, health and safety laws and regulations;

our compliance with health care laws and regulations;

our compliance with Securities and Exchange Commission laws and regulations and Sarbanes-Oxley requirements;

the impact of federal and state government regulation on our business; and

the impact of changes in our future interpretations of fraud, anti-kickbacks or other laws.

The forward-looking statements contained in this report reflect our current views about future events and are based on assumptions and are subject to known and unknown risks and uncertainties. Many important factors could cause actual results or achievements to differ materially from any future results or achievements expressed in or implied by our forward-looking statements. Many of the factors that will determine future events or achievements are beyond our ability to control or predict. Important factors that could cause actual results or achievements to differ materially from the results or achievements reflected in our forward-looking statements include, among other things, the factors discussed in the Part II, Item 1A Risk Factors, included in this report and in other of our filings with the SEC, including our annual report on Form 10-K for the year ended December 31, 2007. This report should be read in conjunction with that annual report on Form 10-K, and all our other filings, including quarterly reports on Form 10-Q and current reports on Form 8-K, made with the SEC through the date of this report.

You should read this report, the information incorporated by reference into this report and the documents filed as exhibits to this report completely and with the understanding that our actual future results or achievements may be

materially different from what we expect or anticipate.

The forward-looking statements contained in this report reflect our views and assumptions only as of the date this report is signed. Except as required by law, we assume no responsibility for updating any forward-looking statements.

Table of Contents

We qualify all of our forward-looking statements by these cautionary statements. In addition, with respect to all of our forward-looking statements, we claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995.

Unless the context otherwise requires, we, us, our, and the Company refer to LHC Group, Inc. and its consolidated subsidiaries.

Overview

We provide post-acute health care services, through our home nursing agencies, hospices, long-term acute care hospitals (LTACHs) and an outpatient rehabilitation clinic. Our founders began operations in 1994 with one home nursing agency in Palmetto, Louisiana. Since then, we have grown to 206 service providers in Louisiana, Mississippi, Alabama, Texas, Arkansas, Virginia, West Virginia, Kentucky, Florida, Tennessee, Georgia, Ohio and Missouri as of September 30, 2008.

Segments

We operate in two segments for financial reporting purposes: home-based services and facility-based services. During the three months ended September 30, 2008 and 2007, home-based services accounted for 86.1% and 81.6%, respectively, of our net service revenue and 84.4% and 81.3% for the nine months ended September 30, 2008 and 2007, respectively. The remaining net service revenue balance relates to our facility-based services segment.

Through our home-based services segment we offer a wide range of services, including skilled nursing, private duty nursing, medically-oriented social services, hospice care and physical, occupational and speech therapy. As of September 30, 2008, we owned and operated 172 home nursing locations, 13 hospices, two private duty agencies and two diabetes self management companies. We also manage the operations of four locations in which we have no ownership interest. Of our 193 home-based services locations, 110 are wholly-owned by us, 71 are majority-owned or controlled by us through joint ventures, eight are license lease arrangements and we manage the operations of the remaining four locations. We intend to increase the number of home nursing agencies that we operate through continued acquisitions and development throughout the United States. As we acquire and develop home nursing agencies, we anticipate the percentage of our net service revenue and operating income derived from our home-based services segment will increase.

We provide facility-based services principally through our LTACHs and an outpatient rehabilitation clinic. As of September 30, 2008, we owned and operated four LTACHS with seven locations, of which all but one are located within host hospitals. We also owned and operated one outpatient rehabilitation clinic, two medical equipment locations, a health club and a pharmacy. Of these twelve facility-based services locations, six are wholly-owned by us and six are majority-owned through joint ventures. We also manage the operations of one inpatient rehabilitation facility in which we have no ownership interest. Due to our emphasis on expansion through the acquisition and development of home nursing agencies, we anticipate that the percentage of our net service revenue and operating income derived from our facility-based services will decline.

Recent Developments

Medicare

Home-Based Services. The base payment rate for Medicare home nursing in 2008 is \$2,270 per a 60-day episode. Since the inception of the prospective payment system in October 2000, the base episode rate payment has varied due to both the impact of annual market basket based increases and Medicare-related legislation. Home health payment rates are updated annually by either the full home health market basket percentage, or by the home health market basket percentage as adjusted by Congress. The Centers for Medicare & Medicaid Services (CMS) establish the home health market basket index, which measures inflation in the prices of an appropriate mix of goods and services included in home health services.

Table of Contents

In August 2007, CMS released a final rule, updating and making major refinements to the Medicare home health prospective payment system for 2008 (the Final Rule). The Final Rule, including any amendments thereto, was effective on January 1, 2008. CMS instituted these changes to the home health payment system to account for reported increases over the past several years in the home health case-mix, which CMS believes have been caused by changes in home health agencies (HHA) coding practices and documentation not by the treatment of resource-intense patients. CMS thus designed the new case-mix model to better predict the resource-intensity required by home health beneficiaries over the 60-day episode of care, which would, in turn, improve the accuracy of Medicare reimbursement to HHAs. To effectuate the improvements, the new model does the following: (1) enables more precise coding for co-morbidities and the differing health characteristics of longer-stay patients; (2) accounts more accurately for the effect of rehabilitation services on resource use; and (3) lessens the risk of overutilization of therapy services by replacing the single threshold (10 visits per episode) with three thresholds (at 6, 14 and 20 visits), as well as a graduated bonus system based on severity between each threshold.

Also, to address the increases in case-mix that CMS views as unrelated to home health patients clinical conditions, the Final Rule implemented a reduction in the national standardized 60-day episode payment rate for four years. A 2.75 percent reduction began in 2008 and will continue for three years, with a 2.71 percent reduction in the fourth year. Also, in the Final Rule, CMS finalized the market basket increase of 3.0 percent, a 0.1 percent increase from the proposed rule. When the market basket update is viewed in conjunction with (1) the 2.75 percent reduction in home health payment rates for 2008; (2) the implementation of the new case-mix adjustment system; (3) the changes in the wage index; and (4) the other changes made in the Final Rule CMS predicts a 0.8 percent increase in payments for urban HHAs and a 1.77 percent decrease in payments for rural HHAs. Collectively, the changes in the Final Rule (not including the case-mix or wage index adjustments) decrease the national 60-day episode payment rate for HHAs from the 2007 level of \$2,339 to \$2,270 in 2008.

In July 2008, the U.S. Senate passed H.R. 6331 (The Medicare Improvement for Patients and Providers Act of 2008) which preserved the 2009 market basket inflation updates for Medicare home health care and hospice providers. The market basket increase for home health care and hospice providers is currently estimated to be 3.0 percent for 2009. The Medicare Improvement for Patients and Providers Act of 2008 did not include a rural add-on for home health providers in 2009.

Medicare hospice payment rates for fiscal year 2009 will receive a 2.5 percent increase. The increase in the hospice payment is the result of a 3.6 percent increase in the hospital market basket indicator cost, offset by a 1.1 percent decrease in payments to hospices as CMS phases out a transitional adjustment used in calculating the hospice wage index. The hospice cap amount for 2008 is \$22,386.

Facility-Based Services. LTACHs are primarily engaged in the hospital treatment of medically complex patients requiring long inpatient stays. In doing so, they utilize a physician directed multi-disciplinary team of health care practitioners. Patients are assessed before admission for appropriateness and, if admitted, an individualized goal oriented treatment plan is developed with re-assessments occurring at least weekly.

Until 2002, LTACHs were paid by Medicare on a reasonable cost basis. Since that time, LTACHs are paid under a prospective payment system called MS-LTC-DRGs which, rather than cost, pays based on the resources typically utilized to care for patients with the same diagnoses. The standard Medicare rate per discharge for fiscal year 2009 is \$39,114.36. Payments are increased or decreased from the standard rate to account for age, co-morbidities, complications, and procedures.

Beginning in 2004, LTACHs that are co-located with another hospital have special payment limitations if certain percentage thresholds of Medicare patients are admitted from the co-located hospital. Six of our LTACH locations are co-located.

On December 29, 2007, the Medicare, Medicaid, and SCHIP Extension Act (MMSEA) became effective. Under MMSEA, the percentage threshold for each of our co-located facilities was increased to 75 percent. Consequently, beginning with our next cost reporting year, September 1, 2008, there will be no reduction in

Table of Contents

Medicare reimbursement unless more than 75 percent of Medicare patients are admitted from the co-located hospital. As none of our locations have ever admitted more than 60 percent of its Medicare patients from a co-located hospital, the MMSEA percentage threshold increase should have a positive impact on the Company.

In addition to the percentage threshold increase, MMSEA created a three year moratorium, absent qualification for narrow exceptions, on new LTACHs and satellite facilities of LTACHs, as well as a prohibition on bed increases in existing facilities. Accordingly, competition among LTACH providers during the moratorium should be limited. MMSEA also provided for a three year delay in a scheduled 3.75 percent payment reduction in the LTACH Standard Rate, as well as a delay in reduction in payments for very short stay patients.

MMSEA also imposed new criteria on providers in order to be paid as an LTACH. In addition to being required to maintain an average length of stay for Medicare patients in excess of 25 days, all LTACHs must now be primarily engaged in providing inpatient services by or under the supervision of a physician to Medicare beneficiaries whose medically complex condition require a long stay. Also, LTACHs must now document in the Medicaid record a patient review process that screens patients prior to admission for appropriateness; validates within 48 hours of admission that patients meet admission criteria for long term care hospitals; regularly evaluates patients throughout their stay for continuation of LTACH care; and assesses the available discharge options when patients no longer meet continued stay criteria. In addition, the LTACH must have active physician involvement with patients during their treatment through an organized medical staff, physician directed treatment with physician on-site availability on a daily basis to review patient progress. Consulting physicians must be on call and capable of being at the patient's side within a moderate amount of time.

MMSEA also requires the Secretary of Health and Human Services to conduct a study and report to Congress within 18 months on the establishment of a new LTACH payment system based on the establishment of LTACH facility and patient criteria for purposes of determining medical necessity, appropriateness of admission and continued stay.

Finally, MMSEA also established expanded medical necessity review by fiscal intermediaries and Medicare administrative contractors. The reviews are retroactive to October 1, 2007, and must guarantee that at least 75 percent of overpayments to LTACHs for medically unnecessary services are recovered.

Under Medicare, the Company is reimbursed for rehabilitation services based on a fee schedule for services provided adjusted by the geographical area in which the facility is located. On February 1, 2006, Congress passed the Deficit Reduction Act of 2005, which implemented, among other things, an annual \$1,740 Medicare Part B outpatient therapy cap that was effective on January 1, 2006. CMS subsequently increased the therapy cap to \$1,780 on January 1, 2007, and to \$1,810 on January 1, 2008. The legislation also required CMS to implement a broad process for reviewing medically necessary therapy claims, creating an exception to the cap. The exception process, which was set to expire on January 1, 2007, was included in the Tax Relief and Health Care Act of 2006 and continued to function as an exception to the Medicare Part B outpatient therapy cap until January 1, 2008. The MMSEA further extended the Medicare Part B outpatient therapy cap until June 30, 2008. H.R. 6331 extended the therapy cap exception for outpatient rehabilitation clinics to December 31, 2009.

Office of Inspector General

The Office of Inspector General (OIG) has a responsibility to report both to the Secretary of the Department of Health and Human Services and to Congress any program and management problems related to programs such as Medicare. The OIG's duties are carried out through a nationwide network of audits, investigations and inspections. Each year, the OIG outlines areas it intends to study relating to a wide range of providers. In its fiscal year 2008 workplans, the OIG indicated its intent to study topics relating to, among others, home health, hospice, long-term care hospitals and certain outpatient rehabilitation services. No estimate can be made at this time regarding the impact, if any, of the OIG's findings.

Table of Contents**Results of Operations****Accounts Receivable and Allowance for Uncollectible Accounts**

At September 30, 2008, the Company's allowance for uncollectible accounts, as a percentage of patient accounts receivable, was approximately 16.2%, or \$10.8 million, compared to 11.3% at December 31, 2007.

The following table sets forth as of September 30, 2008, the aging of accounts receivable (based on the billing date) and the total allowance for uncollectible accounts expressed as a percentage of the related aged accounts receivable:

Payor	0-30	31-60	61-90	91-120	121-150	151-180	181-240	241+	Total
(in thousands)									
Medicare	\$ 31,335	\$ 2,101	\$ 1,900	\$ 1,187	\$ 1,904	\$ 2,325	\$ 1,051	\$ 4,711	\$ 46,514
Medicaid	2,100	324	694	625	550	934	482	3,010	8,719
Other	3,845	505	897	677	1,060	1,227	158	3,095	11,464
Total	\$ 37,280	\$ 2,930	\$ 3,491	\$ 2,489	\$ 3,514	\$ 4,486	\$ 1,691	\$ 10,816	\$ 66,697
Allowance as a percentage of receivable	4.6%	4.9%	7.6%	11.9%	8.6%	18.5%	26.4%	62.9%	16.2%

For home-based services, we calculate the allowance for uncollectible accounts as a percentage of total patient receivables. The percentage changes depending on the payor and increases as the patient receivables age. For facility-based services, we calculate the allowance for uncollectible accounts based on a claim by claim review. As a result, the allowance percentages presented in the table above vary between the aging categories because of the mix of claims in each category.

The following table sets forth as of December 31, 2007, the aging of accounts receivable (based on the billing date) and the total allowance for uncollectible accounts expressed as a percentage of the related aged accounts receivable:

Payor	0-30	31-60	61-90	91-120	121-150	151-180	181-240	241+	Total
(in thousands)									
Medicare	\$ 20,326	\$ 4,904	\$ 4,678	\$ 3,751	\$ 2,915	\$ 3,722	\$ 861	\$ 3,629	\$ 44,786

Total	\$ 30,846	\$ 8,814	\$ 7,937	\$ 5,603	\$ 5,024	\$ 5,875	\$ 2,221	\$ 12,666	\$ 78,986
Allowance as a percentage of receivable	4.6%	5.1%	5.4%	4.7%	6.2%	11.7%	23.9%	38.3%	11.3%

Consolidated Net Service Revenues:

Consolidated net service revenues for the three months ended September 30, 2008 was \$98.2 million, an increase of \$20.7 million, or 26.7%, from \$77.5 million for the three months ended September 30, 2007. For the three months ended September 30, 2008, home-based services accounted for 86.1% of revenue and facility-based services accounted for 13.9% of revenue compared with 81.6% and 18.4%, respectively, for the comparable quarter last year.

Consolidated net service revenues for the nine months ended September 30, 2008 was \$271.8 million, an increase of \$55.0 million, or 25.4%, from \$216.8 million for the nine months ended September 30, 2007. For the nine months ended September 30, 2008, home-based services accounted for 84.4% of revenue and facility-based services accounted for 15.6% of revenue compared with 81.3% and 18.7%, respectively, for the comparable period in the prior year.

Home-Based Services. Net service revenue for home-based services for the three months ended September 30, 2008 was \$84.5 million, an increase of \$21.3 million, or 33.7%, from \$63.2 million for the three months ended September 30, 2007. Total admissions increased 24.2% to 13,925 during the current period, versus 11,216 for the

Table of Contents

same period in 2007. Average home-based patient census for the three months ended September 30, 2008, increased 28.9% to 21,733 patients as compared with 16,862 patients for the three months ended September 30, 2007.

Net service revenue for home-based services for the nine months ended September 30, 2008 was \$229.3 million, an increase of \$53.0 million, or 30.1%, from \$176.3 million for the nine months ended September 30, 2007. Total admissions increased 24.3% to 40,604 during the current period, versus 32,656 for the same period in 2007. Average home-based patient census for the nine months ended September 30, 2008, increased 25.8% to 20,386 patients as compared to 16,208 patients for the nine months ended September 30, 2007.

As detailed in the table below, the increase in revenue is explained by organic growth, our internal acquisition growth, as defined below, and the growth from our acquisitions during the three and nine months ended September 30, 2008.

Organic Growth

Organic growth includes growth on same store locations (those owned for greater than 12 months) and growth from de novo locations. We calculate organic growth by dividing organic growth generated in a period by total revenue generated in the same period of the prior year. Revenue from acquired agencies contributes to organic growth beginning with the thirteenth month after acquisition. During the first 12 months after an acquisition, we are able to grow the acquired agencies revenue. This growth is called internal acquisition growth (IAG). Internal growth, or the combination of IAG and organic growth, provides a more complete measure of the Company s actual growth between two periods.

The following table details the Company s revenue growth and percentages for organic and total growth:

Three Months Ended September 30, 2008 (in thousands except census and episode data)

	Same Store(1)	De Novo(2)	Organic(3)	Organic Growth %	Internal Growth (4)	Internal Growth %	Acquired(5)	Total Growth	Total Growth %
Revenue	\$68,943	\$2,138	\$71,081	12.4%	\$73,826	16.8%	\$13,433	\$84,514	33.7%
Revenue Medicare	\$58,110	\$1,841	\$59,951	16.8%	\$62,177	21.1%	\$11,272	\$71,223	38.7%
Average Census	18,164	641	18,805	11.5%	19,071	13.1%	2,928	21,733	28.9%
Average Medicare Census	14,713	529	15,242	19.4%	15,517	21.5%	2,568	17,810	39.5%
Episodes	25,414	678	26,092	27.3%	27,010	31.7%	3,611	29,703	44.9%

(1) Same store location that has been in service with the Company for greater than 12 months.

(2) De Novo internally developed location that has been in service with the

Company for
12 months or
less.

- (3) Organic combination of same store and de novo.
- (4) Internal organic plus IAG.
- (5) Acquired purchased location that has been in service with the Company for 12 months or less.

Nine Months Ended September 30, 2008 (in thousands except census and episode data)

	Same Store(1)	De Novo(2)	Organic(3)	Organic Growth %	Internal Growth (4)	Internal Growth %	Acquired(5)	Total Growth	Total Growth %
Revenue	\$197,966	\$4,413	\$202,379	14.8%	\$206,474	17.1%	\$26,917	\$229,296	30.1%

Table of Contents

- (1) Same store location that has been in service with the Company for greater than 12 months.
- (2) De Novo internally developed location that has been in service with the Company for 12 months or less.
- (3) Organic combination of same store and de novo.
- (4) Internal Growth organic plus IAG.
- (5) Acquired purchased location that has been in service with the Company for 12 months or less.

Facility-Based Services. Net service revenue for facility-based services for the three months ended September 30, 2008, decreased \$0.6 million, or 4.2%, to \$13.7 million compared to \$14.3 million for the three months ended September 30, 2007. The decrease in revenue related to a 2.4% decrease in patient days to 10,930 in the three months ended September 30, 2008 from 11,202 in the three months ended September 30, 2007. The decrease in revenue due to the decrease in patient days was partially offset by a small increase in acuity as of September 30, 2008.

Net service revenue for facility-based services for the nine months ended September 30, 2008, increased \$2.0 million, or 4.9%, to \$42.5 million compared to \$40.5 million for the nine months ended September 30, 2007. Patient days remained consistent at 34,262 in the nine months ended September 30, 2008, compared to 34,329 in the nine months ended September 30, 2007. The higher acuity of patients contributed to the growth in net service revenue for the nine months ended September 30, 2008.

Cost of Service Revenue

Cost of service revenue for the three months ended September 30, 2008, was \$48.0 million, an increase of \$8.0 million, or 20.0%, from \$40.0 million for the three months ended September 30, 2007. Cost of service revenue

represented approximately 48.9% and 51.6% of our net service revenue for the three months ended September 30, 2008 and 2007, respectively.

Cost of service revenue for the nine months ended September 30, 2008, was \$135.4 million, an increase of \$24.7 million, or 22.3%, from \$110.7 million for the nine months ended September 30, 2007. Cost of service revenue represented approximately 49.8% and 51.1% of net service revenue for the nine months ended September 30, 2008 and 2007, respectively.

Home-Based Services. Cost of home-based service revenue for the three months ended September 30, 2008 was \$39.9 million, an increase of \$8.8 million, or 28.3%, from \$31.1 million for the three months ended September 30, 2007. For the nine months ended September 30, 2008, cost of home-based service revenue was \$110.7 million, an increase of \$25.8 million, or 30.4%, from \$84.9 million for the comparable period in the prior year. The following table summarizes cost of service revenue (amounts in thousands).

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Salaries, wages and benefits	\$ 33,917	\$ 26,794	\$ 94,682	\$ 72,780
Transportation	2,961	2,096	8,033	6,072
Supplies and services	3,038	2,245	8,023	6,022
Total	\$ 39,916	\$ 31,135	\$ 110,738	\$ 84,874

Percentage of Home-Based net service revenue	47.2%	49.3%	48.3%	48.1%
--	-------	-------	-------	-------

The decrease in cost of service revenue as a percentage of net service revenue is due to the decrease in salaries, wages and benefits as a percentage of net service revenue during the three months ended September 30, 2008. The three months ended September 30, 2007 included a charge of \$560,000, net of taxes, related to the severance and consulting agreement entered into with the Company's former Chief Financial Officer.

Facility-Based Services. Cost of facility-based service revenue for the three months ended September 30, 2008 was \$8.1 million, a decrease of \$0.7 million, or 8.0%, from \$8.8 million for the three months ended September 30, 2007. Cost of facility-based service revenue for the nine months ended September 30, 2008 was \$24.7 million, a

Table of Contents

decrease of \$1.1 million, or 4.3%, from \$25.8 million for the nine months ended September 30, 2007. The following table summarizes our cost of service revenue (amounts in thousands).

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Salaries, wages and benefits	\$ 5,265	\$ 5,637	\$ 15,902	\$ 16,049
Transportation	48	96	222	236
Supplies and services	2,748	3,111	8,570	9,517
Total	\$ 8,061	\$ 8,844	\$ 24,694	\$ 25,802

Percentage of Facility-Based net service revenue	59.0%	61.9%	58.2%	63.7%
--	-------	-------	-------	-------

The decrease in supplies and services as a percentage of net service revenue attributed to a majority of the decrease in cost of facility-based service revenue as a percentage of net service revenue during the three months ended September 30, 2008 compared to the three months ended September 30, 2007. Patient days and occupancy decreased during the three months ended September 30, 2008 compared to the three months ended September 30, 2007, causing a decrease in supplies and services expense.

The decrease in cost of facility-based service revenue as a percentage of net service revenue for the nine months ended September 30, 2008, relates to the increase in revenue for patient acuity during the nine months ended September 30, 2008 compared to the same period in the prior year.

Provision for Bad Debts

Provision for bad debts for the three months ended September 30, 2008 was \$3.2 million, an increase of \$1.0 million, from \$2.2 million for the three months ended September 30, 2007. For the three months ended September 30, 2008, the provision for bad debts was approximately 3.2% of net service revenue compared to 2.9% for the same period in 2007.

Provision for bad debts for the nine months ended September 30, 2008 was \$10.5 million, an increase of \$4.4 million, from \$6.1 million for the nine months ended September 30, 2007. For the nine months ended September 30, 2008, the provision for bad debts was approximately 3.9% of net service revenue compared to 2.8% for the same period in 2007.

The increase in the provision for bad debts as a percentage of net service revenue for both the three and nine months ended September 30, 2008 compared to the same periods in the prior year relates to collection difficulties primarily on commercial claims.

General and Administrative Expenses

Our general and administrative expenses consist primarily of the following expenses incurred by our home office and administrative field personnel:

Home office:

salaries and related benefits;

insurance;

costs associated with advertising and other marketing activities; and

rent and utilities;

Supplies and services:

accounting, legal and other professional services; and

office supplies;
Depreciation; and

Other:
advertising and marketing expenses;

Table of Contents

recruitment;

field office rent; and

taxes.

General and administrative expenses for the three months ended September 30, 2008 were \$30.7 million, an increase of \$6.2 million or 25.3%, compared to \$24.5 million for the three months ended September 30, 2007. General and administrative expenses as a percent of net service revenue remained consistent at 31.3% and 31.6% for the three months ended September 30, 2008 and 2007, respectively.

General and administrative expenses for the nine months ended September 30, 2008 were \$86.3 million, an increase of \$17.8 million or 26.1%, compared to \$68.5 million for the nine months ended September 30, 2007. General and administrative expenses as a percent of net service revenue remained relatively static, measuring approximately 31.8% and 31.6% for the nine months ended September 30, 2008 and 2007, respectively.

Home-Based Services. General and administrative expenses in the home-based services for the three months ended September 30, 2008 were \$27.7 million and \$20.7 million for the three months ended September 30, 2007. General and administrative expenses in the home-based services segment represented approximately 32.8% of our net service revenue for the three months ended September 30, 2008 and 2007.

General and administrative expenses in the home-based services for the nine months ended September 30, 2008 were \$75.9 million and \$56.7 million for the nine months ended September 30, 2007. General and administrative expenses in the home-based services segment represented approximately 33.1% and 32.2% of our net service revenue for the nine months ended September 30, 2008 and 2007, respectively. The increase in general and administrative expenses as a percent of net service revenue relates to \$3.1 million (1.3% of home-based net service revenue) of consulting services, primarily supporting our billing and collections of patient receivables.

Facility-Based Services. General and administrative expenses in the facility-based services for the three months ended September 30, 2008 were \$3.0 million and \$3.8 million for the three months ended September 30, 2007. General and administrative expenses in the facility-based services segment represented approximately 21.9% and 26.6% of our net service revenue for the three months ended September 30, 2008 and 2007, respectively. The decrease in general and administrative expenses as a percentage of net service revenue relates to the decrease in patient days and occupancy during the three months ended September 30, 2008 compared to the same period in prior year.

General and administrative expenses in the facility-based services for the nine months ended September 30, 2008 were \$10.4 million, a decrease of \$1.3 million, or 11.1%, from \$11.7 million for the nine months ended September 30, 2007. General and administrative expenses in the facility-based services segment represented approximately 24.4% and 29.0% of our net service revenue for the nine months ended September 30, 2008 and 2007, respectively. The decrease in general and administrative expenses as a percent of net service revenue is primarily due to increased revenue from increased patient acuity during the nine months ended September 30, 2008 compared to the same periods in the prior year.

Income Tax Expense

The effective tax rates for the three months ended September 30, 2008 and 2007 were 39.5% and 35.1%, respectively.

The effective tax rates for the nine months ended September 30, 2008 and 2007 were 38.6% and 36.7%, respectively.

The increase in the effective tax rate relates primarily to the absence of the Work Opportunity Tax Credits in the current year and increased state income taxes as a result of our growth and expansion into new states.

Minority Interest

Table of Contents

Minority interest expense increased \$1.6 million to \$3.0 million for the three months ended September 30, 2008 from \$1.4 million for the three months ended September 30, 2007. The increase relates to an increase in joint ventures throughout 2007 and 2008 and an increase in the income from operations related to our joint ventures.

Minority interest expense increased \$3.4 million to \$7.7 million for the nine months ended September 30, 2008 from \$4.3 million for the nine months ended September 30, 2007. Approximately \$2.0 million of the increase relates to the minority interest on equity joint ventures entered into after September 30, 2007. The remaining \$1.0 million relates to increased income from operations related to our joint ventures.

Discontinued Operations

In the second quarter of 2007, the Company placed its critical access hospital into discontinued operations. The sale of the hospital was completed on July 1, 2007.

Discontinued operations for the three months ended September 30, 2008 did not generate revenue. Net service revenue for the three months ended September 30, 2007 was \$1.1 million. Costs, expenses and minority interest were \$6,000 and \$1.5 million for the three months ended September 30, 2008 and 2007, respectively. For the three months ended September 30, 2008, the loss from discontinued operations after tax was \$3,000 as compared to a loss from discontinued operations of \$246,000 for the same period in 2007.

Net service revenue from discontinued operations for the nine months ended September 30, 2008 and 2007 was \$52,000 and \$3.2 million, respectively. Costs, expenses and minority interest were \$333,000 and \$4.5 million, respectively, for the nine months ended September 30, 2008 and 2007. For the nine months ended September 30, 2008, the loss from discontinued operations after tax was \$171,000 as compared to a loss from discontinued operations of \$843,000 for the same period in 2007.

Liquidity and Capital Resources

Impact of Current Credit and Capital Markets

The credit and capital markets are undergoing significant volatility. Many financial institutions have liquidity concerns, prompting government intervention. Our exposure to the credit crisis includes the availability of funds under our revolving credit facility and the availability of capital in the event that funds under the credit facility are not available to us. Amounts drawn under our revolving credit facility are primarily used to fund acquisitions. During the nine months ended September 30, 2008, we drew and repaid \$32.8 million under our revolving credit facility. These funds provided short term financing on acquisitions and were repaid using operating cash flows. At September 30, 2008, the entire \$75 million was available to us under the revolving credit facility. We intend to continue to financing acquisitions with operating cash flows and, as necessary, draws under the revolving credit facility. Although at the time we do not believe the availability of funds under our revolving credit facility to be at risk, in the event that funds are not available under the revolving credit facility, we would reduce our acquisition activity and fund all growth out of operating cash flows.

Liquidity

Our principal source of liquidity for operating activities is the collection of our accounts receivable, most of which are collected from governmental and third party commercial payors. Our reported cash flows from operating activities are affected by various external and internal factors, including the following:

Operating Results Our net income has a significant effect on our operating cash flows. Any significant increase or decrease in our net income could have a material effect on our operating cash flows.

Receipt of payments from CMS Operating cash flows are dependent upon our collections from CMS. Process lags within the CMS system affect our operating cash flows.

Start-Up Costs Following the completion of an acquisition, we generally incur substantial start-up costs in order to implement our business strategy. There is generally a delay between our expenditure of these start-up costs and the increase in net service revenue, and subsequent cash collections, which adversely affects our cash flows from operating activities.

Timing of Payroll Our employees are paid bi-weekly on Fridays; therefore, operating cash flows decline in reporting periods that end on a Friday. Conversely, for those reporting periods ending on a day other than Friday, our cash flows are higher because we have not yet paid our payroll.

Medical Insurance Plan Funding We are self-funded for medical insurance purposes. Any significant changes in the amount of insurance claims submitted could have a direct effect on our operating cash flows.

Medical Supplies The cost of medical supplies is a significant expense associated with our business. Any increase in the cost of medical supplies, or in the use of medical supplies by our patients, could have a material effect on our operating cash flows.

Table of Contents

The following table summarizes changes in cash (amounts in thousands):

	Nine Months Ended September 30,	
	2008	2007
Cash provided by operating activities	\$ 59,434	\$ 14,955
Cash used in investing activities	(44,818)	(25,010)
Cash used in financing activities	(4,620)	(3,963)
Change in cash	9,996	(14,018)
Cash and cash equivalents at beginning of period	1,155	26,877
Cash and cash equivalents at end of period	\$ 11,151	\$ 12,859

Operating cash flows increased \$44.5 million during the nine months ended September 30, 2008. Cash provided by collections on accounts receivables increased \$18.6 million. The increase also relates to an increase in accounts payable and accrued expenses as well as an increase in non-cash charges during the nine months ended September 30, 2008 compared to the same period in the prior year.

Investing cash outflows increased \$19.8 million during the nine months ended September 30, 2008. During the nine month period ending September 30, 2008, we paid approximately \$40.0 million for acquisitions compared to \$22.4 million for the same period ending 2007. The remaining increase is primarily due to the net effect of acquiring the Company's current aircraft for \$5.1 million offset by proceeds from selling the previous aircraft of \$3.1 million.

Financing cash outflows increased \$0.7 million during the nine months ended September 30, 2008, primarily related to the financing arrangements on the purchase of the Company's aircraft discussed above. In February 2008 we entered into a new loan agreement with Capital One for \$5.1 million and paid off our December 31, 2007 outstanding loan with a balance of \$2.9 million.

Days sales outstanding, or DSO, at September 30, 2008, was 52 days compared to 69 days at September 30, 2007. When adjusted for acquisitions and unbilled accounts receivables, DSO at September 30, 2008 was 49 days. The adjustment takes into account \$3.8 million of unbilled receivables that the Company is delayed in billing due to the lag time in receiving the change of ownership after acquisitions. For the comparable period in 2007, adjusted DSO was 64 days, taking into account \$4.1 million in unbilled accounts receivable.

At September 30, 2008, we had working capital of \$44.4 million compared to \$61.0 million at December 31, 2007, a decrease of \$16.6 million, or 27.2%. The decrease in working capital relates to a decrease in patient accounts receivable of \$14.2 million as of September 30, 2008 compared to December 31, 2007 and the investing of funds generated into acquisitions of agencies. Current liabilities increased \$15.3 million, primarily accounts payable, accrued liabilities and accrued salaries, wages and benefits and income taxes payable at September 30, 2008 compared to December 31, 2007; the increase is primarily due to the timing of paying those liabilities.

Indebtedness

Our total long-term indebtedness was \$5.2 million at September 30, 2008 and \$3.4 million at December 31, 2007, including the current portions of \$608,000 and \$521,000, respectively.

On February 20, 2008, the Company entered into a new credit facility agreement with Capital One (New Credit Facility), which was amended on March 6, 2008 to include an additional lender, First Tennessee Bank, N.A., to increase the line of credit from \$25 million to \$37.5 million and to amend the Eurodollar Margin for each Eurodollar Loan (as those terms are defined in the New Credit Facility) issued under the New Credit Facility. The Credit Agreement was amended and restated on June 12, 2008 to add Branch Banking and Trust Company as a Lender and to increase the maximum aggregate principal amount of the line of credit from \$37.5 million to \$75.0 million. The New Credit Facility is unsecured, has a term of two years and a letter of credit sublimit of \$2.5 million. The annual facility fee is 0.125 percent of the total availability. The interest rate for borrowings under the New Credit Agreement is a function of the prime rate (Base Rate) or the Eurodollar rate (Eurodollar), as elected by the Company, plus the applicable margin based on the Leverage Ratio as defined in the New Credit Facility. No amounts were outstanding

on this facility as of September 30, 2008.

Table of Contents

The interest rate for borrowings under the New Credit Agreement is a function of the prime rate (Base Rate) or the Eurodollar rate (Eurodollar), as elected by the Company, plus the applicable margin as set forth below:

Leverage Ratio	Eurodollar Margin	Base Rate Margin
<1.00:1.00	1.75%	(0.25)%
≥1.00:1.00<1.50:1.00	2.00%	0%
≥1.50:1.00<2.00:1.00	2.25%	0%
≥2.00:1.00	2.50%	0%

Our New Credit Facility contains customary affirmative, negative and financial covenants. For example, we are restricted in incurring additional debt, disposing of assets, making investments, allowing fundamental changes to our business or organization, and making certain payments in respect of stock or other ownership interests, such as dividends and stock repurchases. Under the New Credit Facility we are also required to meet certain financial covenants with respect to fixed charge coverage, leverage, working capital and liabilities to tangible net worth ratios. At September 30, 2008 and December 31, 2007, the Company was in compliance with all covenants.

Our New Credit Facility also contains customary events of default. These include bankruptcy and other insolvency events, cross-defaults to other debt agreements, a change in control involving us or any subsidiary guarantor, and the failure to comply with certain covenants.

On February 20, 2008, the Company terminated its credit facility agreement with C.F. Blackburn, LLC successor by assignment to Residential Funding Company, LLC, f/k/a Residential Funding Corporation (Former Credit Facility). No amounts were outstanding under this facility at December 31, 2007. The Former Credit Facility was due to expire on April 15, 2010.

On February 28, 2008, the Company paid its promissory note with Bancorp Equipment Finance, Inc. in full. The note was collateralized by the Company's previous aircraft, which was sold in February 2008 for \$3.1 million. The sale resulted in a gain of \$315,000.

In February 2008, the Company entered into a loan agreement with Capital One, National Association (Capital One) for a term note in the amount of \$5.1 million for the purchase of a 1999 Cessna 560 aircraft. The aircraft is collateral for the term note, which is payable in 83 monthly installments of principal plus interest commencing on March 6, 2008 followed by one balloon installment on February 6, 2015 of \$930,000. The term note bears interest at the LIBOR Rate (adjusted monthly) plus the Applicable Margin of 1.9 percent.

Contingencies

For a discussion of contingencies, see Item 1, Notes to Consolidated Financial Statements Note 6 Commitments and Contingencies of this Form 10-Q.

Off-Balance Sheet Arrangements

We do not currently have any off-balance sheet arrangements with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. In addition, we do not engage in trading activities involving non-exchange traded contracts. As such, we are not materially exposed to any financing, liquidity, market or credit risk that could arise if we had engaged in these relationships.

Critical Accounting Policies

Table of Contents

For a discussion of critical accounting policies, see Item 1, Notes to Consolidated Financial Statements Note 2 Significant Accounting Policies of this Form 10-Q.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

As of September 30, 2008, we had cash of \$11.7 million. Cash in excess of requirements is deposited in highly liquid money market instruments with maturities of less than 90 days. Because of the short maturities of these instruments, a sudden change in market interest rates would not be expected to have a material impact on the fair value of the portfolio. We would not expect our operating results or cash flows to be materially affected by the effect of a sudden change in market interest rates on our portfolio. At times, cash in banks is in excess of the FDIC insurance limit. The Company has not experienced any loss as a result of those deposits and does not expect any in the future.

Our exposure to market risk relates to changes in interest rates for borrowings under the New Credit Facility we entered into in February 2008. The New Credit Facility is a revolving credit facility and as such the Company borrows, repays and re-borrows amounts as needed, changing the average daily balance outstanding under the facility. A hypothetical 100 basis point increase in interest rates on the average daily amounts outstanding under the New Credit Facility would have increased interest expense \$2,000 for the three months ended September 30, 2008.

ITEM 4. CONTROLS AND PROCEDURES**Evaluation of Disclosure Controls and Procedures**

The Company maintains disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the Exchange Act)) that are designed to provide reasonable assurance that information required to be disclosed in the Company's reports filed under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Such information is also accumulated and communicated to management, including the Company's Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. Management of the Company, under the supervision and with the participation of the Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures as of the end of the period covered by this report. As reported in the Company's Form 10-K for the year ended December 31, 2007, management identified a material weakness in the Company's internal control over financial reporting related to the process of estimating the allowance for uncollectible accounts. The Company's process for determining the allowance for uncollectible accounts focused primarily on evaluating the appropriate percentage of gross revenues to record during a particular period. However, as of December 31, 2007, the Company did not have a process or controls in place that enabled management to appropriately evaluate, document and review the adequacy of the allowance for uncollectible accounts as of a particular period end. As a result, the Company recorded adjustments to increase the allowance for doubtful accounts by \$3.9 million in the fourth quarter of 2007.

Because of this material weakness, management concluded that the Company did not maintain effective internal control over financial reporting as of December 31, 2007. During the first quarter of 2008, management implemented two primary measures to address the material weakness. First, the Company enhanced the controls and processes for calculating the allowance for uncollectible accounts. The enhancements include estimating and documenting the collectability of receivables at the end of a period based on the aging categories and timely review of the documentation by senior management and our outside consultants, Simione Consultants (Simione). Second, the Company engaged outside consultants, Simione, to oversee the Company's billing and collection efforts with regards to commercial, managed care, and non Private Fee-For-Service Medicare Advantage plan payors beginning in February 2008. Simione's oversight has improved collection efforts and provided an additional evaluation of the collectability of the accounts. This valuation and measurement of the estimated allowance for doubtful accounts was applied consistently throughout 2008.

Table of Contents

Although the Company's remediation efforts with respect to the above referenced material weakness are substantially completed, management will not be able to affirmatively conclude that the internal controls over financial reporting implemented to remediate the material weakness are operating effectively until such controls are effectively operational for a period of time and are successfully tested. As of September 30, 2008, the Company's Chief Executive Officer and Chief Financial Officer concluded that because additional testing is required to determine if the material weakness described in the Company's annual report on Form 10-K for the year ended December 31, 2007 has been fully remedied, the Company did not maintain effective internal control over financial reporting as of the end of the period covered by this report.

Changes in Internal Controls

Except for the controls implemented to address the material weakness identified in the Company's report on Form 10-K for the year ended December 31, 2007, there have been no changes in the Company's internal control over financial reporting (as defined in Exchange Act Rule 13a-15(f)) that occurred during the nine months ended September 30, 2008, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

We are involved in litigation and proceedings in the ordinary course of business. We do not believe that the outcome of any of the matters in which we are currently involved, individually or in the aggregate, will have a material adverse effect upon our business, financial condition, or results of operations.

ITEM 1A. RISK FACTORS.

The adverse changes in the capital and credit markets may negatively affect our ability to access financing and without such financing we may be unable to achieve our objectives for strategic acquisitions and internal growth.

The disruption of the global financial and credit markets and the related instability in the global financial system may have an effect on our long term liquidity and financial conditions. While we have been able to achieve our current acquisition strategy without borrowing on our Credit Facility, the need may arise to obtain additional funding. We do not believe our availability of funds under our Credit Facility is at risk; however, we continue to monitor our lenders. If the availability under our current Credit Facility decreases we may need to consider adjusting our growth strategy.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

None

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

None

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.
