## PART I

### ITEM 1. *BUSINESS*

#### General

AutoNation, Inc., through its subsidiaries, is the largest automotive retailer in the United States. As of December 31, 2008, we owned and operated 302 new vehicle franchises from 232 stores located in major metropolitan markets, predominantly in the Sunbelt region of the United States. Our stores, which we believe are some of the most recognizable and well-known in our key markets, sell 37 different brands of new vehicles. The core brands of vehicles that we sell, representing approximately 96% of the new vehicles that we sold in 2008, are manufactured by Toyota, Ford, Honda, Nissan, General Motors, Daimler, BMW, and Chrysler.

We offer a diversified range of automotive products and services, including new vehicles, used vehicles, parts and automotive services, and automotive finance and insurance products. We also arrange financing for vehicle purchases through third-party finance sources. We believe that the significant scale of our operations and the quality of our managerial talent allow us to achieve efficiencies in our key markets by, among other things, leveraging our market brands and advertising, improving asset management, implementing standardized processes, and increasing productivity across all of our stores.

We were incorporated in Delaware in 1991. For convenience, the terms AutoNation, Company, and we are used to refer collectively to AutoNation, Inc. and its subsidiaries, unless otherwise required by the context. Our dealership operations are conducted by our subsidiaries.

#### Operating Segments

As of December 31, 2008, we had three operating segments: Domestic, Import, and Premium Luxury. Our Domestic segment is comprised of retail automotive franchises that sell new vehicles manufactured by General Motors, Ford, and Chrysler. Our Import segment is comprised of retail automotive franchises that sell new vehicles manufactured primarily by Toyota, Honda, and Nissan. Our Premium Luxury segment is comprised of retail automotive franchises that sell new vehicles manufactured primarily by Mercedes, BMW, and Lexus. The franchises in each segment also sell used vehicles, parts and automotive services, and automotive finance and insurance products. For the year ended December 31, 2008, Domestic revenue represented 35% of total revenue, Import revenue represented 39% of total revenue, and Premium Luxury represented 26% of total revenue.

Our operating segment structure as of December 31, 2008 reflected changes we made during the third quarter of 2008. Prior to the third quarter of 2008, we had a single operating segment. During the third quarter of 2008, our Chief Executive Officer made changes to his management approach that divided our business into the three operating segments described above. This change in our operating segment structure had no effect on our previously reported consolidated results of operations, financial position, or cash flows. We have reclassified historical amounts to conform to our current segment presentation. For additional information regarding the change in our operating segment structure as well as financial information for our three operating segments, please refer to Note 21 of the Notes to Consolidated Financial Statements set forth in Part II, Item 8 of this Form 10-K.

Except to the extent that differences among operating segments are material to an understanding of our business taken as a whole, the description of our business in this report is presented on a consolidated basis.

**Business Strategy**

As a specialty retailer, our business model is focused on developing and maintaining satisfied relationships with our customers. The foundation of our business model is operational excellence. We pursue the following strategies to achieve our targeted level of operational excellence:

*Deliver a positive customer experience at our stores*

1

---

*Leverage our significant scale to improve our operating efficiency*

*Increase our productivity*

*Build a powerful brand in each of our local markets*

Our strategies are supported by our use of information technology. We use the Internet to develop and acquire customer leads and referrals, and we leverage information technology to enhance our customer relationships.

A key component of our long-term strategy is to maximize the return on investment generated by the use of cash flow that our business generates. We expect to use our cash flow to make capital investments in our current business, to complete dealership acquisitions, and to repurchase our debt and/or common stock. Our capital allocation decisions will be based on factors such as the expected rate of return on our investment, the market price of our common stock versus our view of its intrinsic value, the potential impact on our capital structure, our ability to complete dealership acquisitions that meet our return on investment target, and limitations set forth in our debt agreements. As part of our long-term strategy, we also intend to divest non-core stores in order to improve our portfolio of stores in furtherance of our brand portfolio strategy as described in the next paragraph and to generate sales proceeds that can be reinvested at a higher expected rate of return. In 2008, in light of the economic conditions, our liquidity and capital resource strategies were focused on generating cash and paying down debt to maintain compliance with the financial covenants in our debt agreements. See *Liquidity and Capital Resources* in Part II, Item 7 of this Form 10-K. We expect that in 2009 we will continue to use a substantial portion of our cash to pay down debt.

As part of our business strategy, our acquisition and divestiture program has been and is designed to improve our store brand portfolio by focusing our store mix more towards import and premium luxury brands. In 1999, approximately 60% of our new vehicle revenue was attributable to our domestic franchises, while approximately 40% was attributable to import and premium luxury franchises. In 2008, approximately 70% of our new vehicle revenue was generated by import and premium luxury franchises and approximately 30% was generated by domestic franchises. We are focused on improving our brand portfolio by selling underperforming stores, which are primarily domestic, and we expect that in 2009 we will continue to increase our mix of import and premium luxury stores. See *Market Challenges* in Part II, Item 7 of this Form 10-K for a discussion of the difficult conditions in the automotive retail market and the related impact on domestic manufacturers.

### ***Deliver a Positive Customer Experience***

Our goal is to deliver a positive customer experience at our stores. Our efforts to improve our customers' experience at our stores include the following practices and initiatives in key areas of our business:

***Improving Customer Service:*** The success of our stores depends in significant part on our ability to deliver positive experiences to our customers. We have developed and implemented standardized, customer-friendly sales and service processes, including a customer-friendly sales menu designed to provide clear disclosure of purchase or lease transaction terms. We believe these processes improve the sales and service experiences of our customers. We emphasize the importance of customer satisfaction to our key store personnel by basing a portion of their compensation on the quality of customer service they provide in connection with vehicle sales and service.

***Increasing Parts and Service Sales:*** Our goal is that our customers will use us for all of their vehicle service, maintenance, and collision needs. Our key initiatives for our parts and service business are focused on optimizing our processes, pricing, and promotion, thus improving customer retention. We have implemented

across all of our stores standardized service processes and marketing communications, which are designed to ensure that we offer our existing and potential customers the complete range of vehicle maintenance and repair services. Our processes and marketing communications are focused on increasing our customer-pay service, collision, and parts business. As a result of our significant scale, we believe we can communicate frequently and effectively with our

customers. We optimize our pricing to maintain a competitive offering for commonly performed vehicle services and repairs for like-brand vehicles within each of our markets.

***Increasing Finance, Insurance, and Other Aftermarket Product Sales:*** We continue to improve our finance and insurance business by using our standardized processes across our store network. Our customers are presented with the AutoNation Pledge, which provides clear disclosure relating to the finance and insurance sales process, and with a customer-friendly finance and insurance menu, which is designed to ensure that we offer our customers the complete range of finance, insurance, protection, and other aftermarket products in a transparent manner. We believe the combination of our pledge and our menu improves our customers' shopping experience for finance and insurance products at our stores. We offer our customers aftermarket products such as extended service contracts, maintenance programs, theft deterrent systems, and various insurance products. We continue to focus on optimizing the mix of finance sources available for our customers' convenience.

### ***Leverage Our Significant Scale***

We leverage our scale as the largest automotive retailer in the United States to further improve our cost structure by obtaining significant cost savings in our business. The following practices and initiatives reflect our commitment to leveraging our scale and managing cost:

***Managing New Vehicle Inventories:*** We manage our new vehicle inventories to optimize our stores' supply and mix of vehicle inventory. Through the use of our planning and tracking systems in markets where our stores have critical mass in a particular brand, we view new vehicle inventories at those same brand stores in the aggregate and coordinate vehicle ordering and inventories across those stores. We manage our new vehicle inventory to achieve specific days supply targets. We also target our new vehicle inventory purchasing to our core, or most popular, model packages. We are focused on maintaining appropriate inventory levels in order to minimize carrying costs. We believe our inventory management enables us to (1) respond to customer requests better than independent retailers in the markets where we have a critical mass in a particular brand, (2) minimize carrying costs by maintaining lower days supply, and (3) better plan and forecast inventory levels. See also *Inventory Management* in Part II, Item 7 of this Form 10-K.

***Increasing Used Vehicle Sales and Managing Used Vehicle Inventories:*** Each of our stores offers a variety of used vehicles. We believe that we have access to desirable used vehicle inventory and are in a position to realize the benefits of vehicle manufacturer-supported certified used vehicle programs, which we believe are improving consumers' attitudes toward used vehicles. Our used vehicle business strategy is focused on (1) utilizing our web-based vehicle inventory management system to leverage our local market inventory and optimize our supply, mix, and pricing, (2) managing our used vehicle inventory to enable us to offer our customers a wide selection of desirable lower-cost vehicles, which are often in high demand by consumers, and (3) leveraging our scale with comprehensive used vehicle marketing programs, such as market-wide promotional events and standardized approaches to advertising that we can implement more effectively than smaller retailers because of our size. We have deployed used vehicle specialists in each of our key markets to assist us in executing our strategy.

***Managing Costs:*** We actively manage our business and leverage our scale to reduce costs. We continue to focus on developing national vendor relationships to standardize our stores' approach to purchasing certain equipment, supplies, and services, and to improve our cost efficiencies. For example, we realize cost efficiencies with respect to advertising and facilities maintenance that are generally not available to smaller retailers. In 2008, we implemented a cost reduction plan in response to the ongoing market challenges. See *Market Challenges* in Part II, Item 7 of this Form 10-K.

### ***Increase Productivity***

The following are examples of key initiatives we have implemented to increase productivity:

***Managing Employee Productivity and Compensation:*** We continue to enhance standardized compensation guidelines and common element pay plans at our stores. These guidelines and pay plans take into account our sales volume, customer satisfaction, gross margin objectives, vehicle brand, and the size of the store. Our goals are to improve employee productivity, to reward and retain high-performing employees, and to ensure appropriate variability of our compensation expense.

***Using Information Technology:*** We are leveraging information technology to enhance our customer relationships and increase productivity. We use a web-based customer relationship management tool across all of our stores. We believe this tool enables us to promote and sell our vehicles and other products more effectively by allowing us to better understand our customer traffic flows and better manage our showroom sales processes and customer relationships. We have developed a company-wide customer database that contains information on our stores' existing and potential customers. We believe our customer database enables us to implement more effectively our vehicle sales and service marketing programs. We expect our customer database and other tools to empower us to implement our customer relationship strategy more effectively and improve our productivity.

***Training Employees:*** One of our key initiatives to improve our productivity is our customized comprehensive training program for key store employees. We believe that having well-trained personnel is an essential requirement for implementing standardized operating practices and policies across all of our stores. Our training program educates our key store employees about their respective job roles and responsibilities and our standardized processes in all of our areas of operation, including sales, finance and insurance, and parts and service. Our training program also emphasizes the importance of conducting our operations, including our finance and insurance sales operations, in accordance with applicable laws and regulations and our policies and ethical standards. As part of our training program, we conduct specialized training for certain of our store employees in areas such as finance and insurance, fixed operations, and sales. We also require all of our employees, from our senior management to our technicians, to participate in our Business Ethics Program, which includes web-based interactive training programs, live training workshops, written manuals, and videos on specific topics. We also run the AutoNation General Manager University to prepare our future general manager prospects to become well-rounded successful leaders of our stores. We expect our comprehensive training program to improve our productivity by ensuring that all of our employees consistently execute our business strategy and manage our daily operations in accordance with our common processes and policies, applicable laws and regulations, and our high standards of business ethics.

### ***Build Powerful Local-Market Brands***

In many of our key markets where we have significant presence, we are marketing our non-premium luxury stores under a local retail brand. We continue to position these local retail brands to communicate to customers the key features that we believe differentiate our stores in our branded markets from our competitors, such as the large inventory available for customers, our sales, service, and finance and insurance standardized processes, and the competitive pricing we offer for widely available services. We believe that by having our stores within each local market speak with one voice to the automobile-buying public, we can achieve marketing and advertising cost savings and efficiencies that generally are not available to many of our local competitors. We also believe that we can create strong retail brand awareness in our markets.

We have fifteen local brands in our key markets, including Maroone in South Florida; GO in Denver, Colorado; AutoWay in Tampa, Florida; Bankston in Dallas, Texas; Courtesy in Orlando, Florida; Desert in Las Vegas, Nevada; Team in Atlanta, Georgia; Mike Shad in Jacksonville, Florida; Dobbs in Memphis, Tennessee; Fox in Baltimore, Maryland; Mullinax in Cleveland, Ohio; Appleway in Spokane, Washington; Champion in South Texas; Power in Southern California and Arizona; and AutoWest in Northern California. The stores we operate under local retail brands as of December 31, 2008, accounted for approximately 68% of our total revenue during 2008.

## **Operations**

Each of our stores acquires new vehicles for retail sale either directly from the applicable automotive manufacturer or distributor or through dealer trades with other stores of the same franchise. Accordingly, we depend in large part on the automotive manufacturers and distributors to provide us with high-quality vehicles that customers desire and to supply us with such vehicles at suitable quantities and prices and at the right times. Our operations, particularly our sales of new vehicles, are impacted by the sales incentive programs conducted by the automotive manufacturers to spur consumer demand for their vehicles. These sales incentive programs are often not announced in advance and therefore can be difficult to plan for when ordering inventory. We generally acquire used vehicles from customer trade-ins, auctions, lease terminations, and other sources. We generally recondition used vehicles acquired for retail sale at our stores' service facilities and capitalize costs related thereto as used vehicle inventory. Used vehicles that we do not sell at our stores generally are sold at wholesale through auctions.

We offer a wide variety of financial products and services to our customers. We arrange for our customers to finance vehicles through installment loans or leases with third-party lenders, including the vehicle manufacturers' and distributors' captive finance subsidiaries, in exchange for a commission payable to us. Commissions that we receive may be subject to chargeback, in full or in part, if loans that we arrange default or are prepaid or upon other specified circumstances. However, our exposure to loss in connection with these financing arrangements generally is limited to the commissions that we receive. We do not directly finance our customers' vehicle leases or purchases.

We also offer our customers various vehicle protection products, including extended service contracts, maintenance programs, guaranteed auto protection (known as GAP, this protection covers the shortfall between a customer's loan balance and insurance payoff in the event of a casualty), tire and wheel protection, and theft protection products. The vehicle protection products that our stores currently offer to customers are underwritten and administered by independent third parties, including the vehicle manufacturers' and distributors' captive finance subsidiaries. We primarily sell the products on a straight commission basis; however, we also participate in future underwriting profit for certain products pursuant to retrospective commission arrangements. Commissions that we receive from these third-party providers may be subject to chargebacks, in full or in part, if products that we sell, such as extended service contracts, are cancelled.

Our stores also provide a wide range of vehicle maintenance, repair, paint, and collision repair services, including warranty work that can be performed only at franchised dealerships and customer-pay service work.

## **Sales and Marketing**

We retailed approximately 440,000 new and used vehicles through our stores in 2008. We sell a broad range of well-known vehicle brands within each of our markets.

Our marketing efforts focus on mass marketing and targeted marketing in our local markets and are designed to build our business with a broad base of repeat, referral, and new customers. We engage in marketing and advertising primarily through newspapers, radio, television, direct mail, and outdoor billboards in our local markets. As we have consolidated our operations in certain of our key markets under one local retail brand, we have been able to focus our efforts on building consumer awareness of the selected local retail brand rather than on the individual legacy names under which many of our stores operated prior to their acquisition by us. We also continue to develop newspaper, television, and radio advertising campaigns that we can modify for use in multiple local markets. We realize cost efficiencies with respect to advertising expenses that are not generally available to smaller retailers due to our ability to obtain efficiencies in developing advertising campaigns and our ability to gain volume discounts and other concessions as we increase our presence within our key markets and operate our non-premium luxury stores under a single retail brand name in our local markets.

We also have been able to use our significant scale to market our stores and vehicle inventory via the Internet. According to industry analysts, the majority of new car buyers nationwide consult the Internet for new car information, which is resulting in better-informed customers and a more efficient sales process. As

part of our e-commerce marketing strategy, we are focused on (1) developing websites and an Internet sales process that appeal to on-line automobile shoppers, (2) obtaining high visibility on the Internet through Internet search engines, such as Google, through our own websites, and through strategic partnerships and alliances with e-commerce companies, and (3) developing and maintaining a cost structure that permits us to operate efficiently.

## **Agreements with Vehicle Manufacturers**

### ***Framework Agreements***

We have entered into framework agreements with most major vehicle manufacturers and distributors. These agreements, which are in addition to the franchise agreements described below, contain provisions relating to our management, operation, advertising and marketing, and acquisition and ownership structure of automotive stores franchised by such manufacturers. These agreements contain certain requirements pertaining to our operating performance (with respect to matters such as sales volume, sales effectiveness, and customer satisfaction), which, if we do not satisfy, adversely impact our ability to make further acquisitions of such manufacturers' stores or could result in us being compelled to take certain actions, such as divesting a significantly underperforming store, subject to applicable state franchise laws. Additionally, these agreements set limits (nationally, regionally, and in local markets) on the number of stores that we may acquire of the particular manufacturer and contain certain restrictions on our ability to name and brand our stores. Some of these framework agreements give the manufacturer or distributor the right to acquire at fair market value, or the right to compel us to sell, the automotive stores franchised by that manufacturer or distributor under specified circumstances in the event of a change in control of our company (generally including certain material changes in the composition of our Board of Directors during a specified time period, the acquisition of 20% or more of the voting stock of our Company by another vehicle manufacturer or distributor, or the acquisition of 50% or more of our voting stock by a person, entity, or group not affiliated with a vehicle manufacturer or distributor) or other extraordinary corporate transactions such as a merger or sale of all of our assets. In addition, we have granted certain manufacturers the right to acquire, at fair market value, our automotive dealerships franchised by that manufacturer in specified circumstances in the event of our default under the indenture for our floating rate senior unsecured notes due 2013 and 7% senior unsecured notes due 2014 (collectively referred to herein as the "senior unsecured notes") or the amended credit agreement for our revolving credit facility and term loan facility.

In January 2009, our Board of Directors authorized and approved letter agreements with certain automotive manufacturers in order to, among other things, eliminate any potential adverse consequences under our framework agreements with those manufacturers in the event that ESL Investments, Inc. and certain of its investment affiliates (together, "ESL") acquires 50% or more of our common stock. The letter agreements with American Honda Motor Co., Inc. ("Honda") and Toyota Motor Sales, U.S.A., Inc. ("Toyota") also contain governance-related and other provisions as described below. Also a party to both the Honda and Toyota Agreements is ESL, our largest shareholder. As of February 6, 2009, ESL beneficially owned approximately 45% of the outstanding shares of our common stock.

Under the terms of the Honda Agreement, Honda has agreed not to assert its right to purchase our Honda and Acura franchises and/or similar remedies under the manufacturer framework agreement between Honda and the Company in the event that ESL acquires 50% or more of our common stock. If ESL acquires more than 50% of our common stock, ESL has agreed to vote all shares in excess of 50% in the same proportion as all non-ESL-owned shares are voted. In addition, we have agreed to ensure that a majority of our Board is independent of both the Company and ESL under existing New York Stock Exchange ("NYSE") listing standards. Furthermore, the Honda Agreement provides that Honda's consent does not apply to a going private transaction under Rule 13e-3 of the Securities Exchange Act of 1934. The terms and conditions of the Honda Agreement will only apply at such time and for so long as ESL owns more than 50% of our common stock.

Under the terms of the Toyota Agreement, Toyota has agreed not to assert its right to purchase our Toyota and Lexus franchises and/or similar remedies under the manufacturer framework agreement between

Toyota and the Company in the event that ESL acquires 50% or more of our common stock. If ESL acquires more than 50% of our common stock, ESL has agreed to vote all shares in excess of 50% in the same proportion as all non-ESL-owned shares are voted. Furthermore, we have agreed that a majority of our Board will be independent from both the Company and from ESL under existing NYSE listing standards. We have also agreed not to merge, consolidate, or combine with any entity owned or controlled by ESL unless Toyota consents thereto. In addition, the Toyota Agreement provides that in the event that we appoint a Chief Operating Officer who, in the good faith judgment of our Board, does not have sufficient breadth and depth of experience, a relevant, successful automotive track record, and extensive successful automotive experience, ESL shall be required to divest its shares in excess of 50% within nine (9) months or its voting interest will be limited to 25%, and if ESL does not divest such shares within eighteen (18) months, it will lose all voting rights until it divests such shares. The terms and conditions of the Toyota Agreement will only apply at such time and for so long as ESL owns more than 50% of our common stock and will terminate on December 31, 2009 with respect to future stock acquisitions by ESL, provided that ESL may seek successive annual one-year extensions, and Toyota may not unreasonably withhold or delay its consent thereto.

In connection with the Toyota and Honda agreements described above, in January 2009, our Board authorized and approved a separate letter agreement between the Company and ESL in which ESL has agreed to vote shares of our common stock owned by ESL in excess of 45% in the same proportion as all non-ESL-owned shares are voted. The ESL Agreement expires on January 28, 2010, unless extended by mutual agreement of the parties.

We have also entered into separate letter agreements with certain other manufacturers that eliminate any potential adverse consequences under our framework agreements with those manufacturers in the event that ESL acquires 50% or more of our common stock. ESL is not a party to any of those agreements.

### ***Franchise Agreements***

We operate each of our new vehicle stores under a franchise agreement with a vehicle manufacturer or distributor. The franchise agreements grant the franchised automotive store a non-exclusive right to sell the manufacturer's or distributor's brand of vehicles and offer related parts and service within a specified market area. These franchise agreements grant our stores the right to use the relevant manufacturer's or distributor's trademarks in connection with their operations, and they also impose numerous operational requirements and restrictions relating to inventory levels, working capital levels, the sales process, marketing and branding, showroom and service facilities, signage, personnel, changes in management, and monthly financial reporting, among other things. The contractual terms of our stores franchise agreements provide for various durations, ranging from one year to no expiration date, and in certain cases manufacturers have undertaken to renew such franchises upon expiration so long as the store is in compliance with the terms of the agreement. We generally expect our franchise agreements to survive for the foreseeable future and, when the agreements do not have indefinite terms, anticipate routine renewals of the agreements without substantial cost or modification. Our stores franchise agreements provide for termination of the agreement by the manufacturer or non-renewal for a variety of causes (including performance deficiencies in such areas as sales volume, sales effectiveness, and customer satisfaction). However, in general, the states in which we operate have automotive dealership franchise laws that provide that, notwithstanding the terms of any franchise agreement, it is unlawful for a manufacturer to terminate or not renew a franchise unless "good cause" exists. It generally is difficult for a manufacturer to terminate, or not renew, a franchise under these laws, which were designed to protect dealers. In addition, in our experience and historically in the automotive retail industry, dealership franchise agreements are rarely involuntarily terminated or not renewed by the manufacturer. From time to time, certain manufacturers assert sales and customer satisfaction performance deficiencies under the terms of our framework and franchise agreements. We generally work with these manufacturers to address the asserted performance issues. For additional information, please refer to the risk factor captioned *We are subject to restrictions imposed by, and significant influence from, vehicle manufacturers that may adversely impact our business, financial condition, results of operations, cash flows, and prospects, including our ability to acquire additional stores* in the Risk Factors section of this document.

## **Regulations**

### ***Automotive and Other Laws and Regulations***

We operate in a highly regulated industry. A number of state and federal laws and regulations affect our business. In every state in which we operate, we must obtain various licenses in order to operate our businesses, including dealer, sales and finance, and insurance licenses issued by state regulatory authorities. Numerous laws and regulations govern our conduct of business, including those relating to our sales, operations, financing, insurance, advertising, and employment practices. These laws and regulations include state franchise laws and regulations, consumer protection laws, privacy laws, escheatment laws, anti-money laundering laws, and other extensive laws and regulations applicable to new and used motor vehicle dealers, as well as a variety of other laws and regulations. These laws also include federal and state wage-hour, anti-discrimination, and other employment practices laws.

Our financing activities with customers are subject to federal truth-in-lending, consumer leasing, and equal credit opportunity laws and regulations as well as state and local motor vehicle finance laws, leasing laws, installment finance laws, usury laws, and other installment sales and leasing laws and regulations, some of which regulate finance and other fees and charges that may be imposed or received in connection with motor vehicle retail installment sales and leasing. Claims arising out of actual or alleged violations of law may be asserted against us or our stores by individuals, a class of individuals, or governmental entities and may expose us to significant damages or other penalties, including revocation or suspension of our licenses to conduct store operations and fines.

Our operations are subject to the National Traffic and Motor Vehicle Safety Act, Federal Motor Vehicle Safety Standards promulgated by the United States Department of Transportation, and the rules and regulations of various state motor vehicle regulatory agencies. The imported automobiles we purchase are subject to United States customs duties and, in the ordinary course of our business we may, from time to time, be subject to claims for duties, penalties, liquidated damages, or other charges.

### ***Environmental, Health, and Safety Laws and Regulations***

Our operations involve the use, handling, storage, and contracting for recycling and/or disposal of materials such as motor oil and filters, transmission fluids, antifreeze, refrigerants, paints, thinners, batteries, cleaning products, lubricants, degreasing agents, tires, and fuel. Consequently, our business is subject to a complex variety of federal, state, and local requirements that regulate the environment and public health and safety.

Most of our stores utilize aboveground storage tanks, and to a lesser extent underground storage tanks, primarily for petroleum-based products. Storage tanks are subject to periodic testing, containment, upgrading, and removal under the Resource Conservation and Recovery Act and its state law counterparts. Clean-up or other remedial action may be necessary in the event of leaks or other discharges from storage tanks or other sources. In addition, water quality protection programs under the federal Water Pollution Control Act (commonly known as the Clean Water Act), the Safe Drinking Water Act, and comparable state and local programs govern certain discharges from some of our operations. Similarly, certain air emissions from operations, such as auto body painting, may be subject to the federal Clean Air Act and related state and local laws. Certain health and safety standards promulgated by the Occupational Safety and Health Administration of the United States Department of Labor and related state agencies also apply.

Some of our stores are parties to proceedings under the Comprehensive Environmental Response, Compensation, and Liability Act, or CERCLA, typically in connection with materials that were sent to former recycling, treatment, and/or disposal facilities owned and operated by independent businesses. The remediation or clean-up of facilities where the release of a regulated hazardous substance occurred is required under CERCLA and other laws.

We incur significant costs to comply with applicable environmental, health, and safety laws and regulations in the ordinary course of our business. We do not anticipate, however, that the costs of such compliance will have a material adverse effect on our business, results of operations, cash flows, or financial

condition, although such outcome is possible given the nature of our operations and the extensive environmental, public health, and safety regulatory framework. We do not have any material known environmental commitments or contingencies.

### **Competition**

We operate in a highly competitive industry. We believe that the principal competitive factors in the automotive retailing business are location, service, price, and selection. Each of our markets includes a large number of well-capitalized competitors that have extensive automobile store managerial experience and strong retail locations and facilities. According to CNW Marketing Research, Inc., as of December 2008, the automotive retail industry is served by approximately 19,000 franchised automotive dealerships and approximately 39,000 independent used vehicle dealers. We face competition from several other public companies that operate numerous automotive retail stores on a national or regional basis and from private market buyers and sellers of used vehicles. We are subject to competition from dealers that sell the same brands of new vehicles that we sell and from dealers that sell other brands of new vehicles that we do not represent in a particular market. Our new vehicle store competitors have franchise agreements with the various vehicle manufacturers and, as such, generally have access to new vehicles on the same terms as us. Additionally, we compete with other dealers for qualified employees, particularly for general managers and sales and service personnel.

In general, the vehicle manufacturers have designated marketing and sales areas within which only one dealer of a given vehicle brand may operate. Under most of our framework agreements with the vehicle manufacturers, our ability to acquire multiple dealers of a given brand within a particular market is limited. We are also restricted by various state franchise laws from relocating our stores or establishing new stores of a particular brand within any area that is served by another dealer of the same brand, and we generally need the manufacturer to approve the relocation or grant a new franchise in order to relocate or establish a store. However, to the extent that a market has multiple dealers of a particular brand, as most of our key markets do with respect to most vehicle brands we sell, we are subject to significant intra-brand competition.

We also are subject to competition from independent automobile service shops and service center chains. We believe that the principal competitive factors in the service and repair industry are price, location, the use of factory-approved replacement parts, expertise with the particular vehicle lines, and customer service. In addition to competition for vehicle sales and service, we face competition from a broad range of financial institutions in our finance and insurance and aftermarket products businesses. We believe the principal competitive factors in these businesses are product selection, convenience, price, contract terms, and the ability to finance vehicle protection and aftermarket products.

### **Insurance and Bonding**

Our business exposes us to the risk of liabilities arising out of our operations. For example, liabilities may arise out of claims of employees, customers, or other third parties for personal injury or property damage occurring in the course of our operations. We could also be subject to fines and civil and criminal penalties in connection with alleged violations of federal and state laws or regulatory requirements.

The automotive retailing business is also subject to substantial risk of property loss due to the significant concentration of property values at store locations. In our case in particular, our operations are concentrated in states and regions in which natural disasters and severe weather events (such as hurricanes, earthquakes, fires, landslides, and hail storms) may subject us to substantial risk of property loss and operational disruption. Under self-insurance programs, we retain various levels of aggregate loss limits, per claim deductibles, and claims-handling expenses as part of our various insurance programs, including property and casualty, workers' compensation, and employee medical benefits. Costs in excess of this retained risk per claim may be insured under various contracts with

third-party insurance carriers. We estimate the ultimate costs of these retained insurance risks based on actuarial evaluation and historical claims experience, adjusted for current trends and changes in claims-handling procedures. The level of risk we retain may change in the future as insurance market conditions or other factors affecting the economics of our insurance purchasing change. Although we

have, subject to certain limitations and exclusions, substantial insurance, we cannot assure you that we will not be exposed to uninsured or underinsured losses that could have a material adverse effect on our business, financial condition, results of operations, or cash flows.

Provisions for retained losses and deductibles are made by charges to expense based upon periodic evaluations of the estimated ultimate liabilities on reported and unreported claims. The insurance companies that underwrite our insurance require that we secure certain of our obligations for deductible reimbursements with collateral. Our collateral requirements are set by the insurance companies and, to date, have been satisfied by posting surety bonds, letters of credit, and/or cash deposits. Our collateral requirements may change from time to time based on, among other things, our claims experience.

### **Employees**

As of December 31, 2008, we employed approximately 20,000 full-time employees, approximately 121 of whom were covered by collective bargaining agreements. We believe that we have good relations with our employees.

### **Seasonality**

Our operations generally experience higher volumes of vehicle sales and service in the second and third quarters of each year due in part to consumer buying trends and the introduction of new vehicle models. Also, demand for vehicles and light trucks is generally lower during the winter months than in other seasons, particularly in regions of the United States where stores may be subject to adverse winter conditions. Accordingly, we expect our revenue and operating results generally to be lower in the first and fourth quarters as compared to the second and third quarters. However, revenue may be impacted significantly from quarter to quarter by actual or threatened severe weather events and other factors unrelated to weather conditions, such as changing economic conditions and vehicle manufacturer incentive programs.

### **Trademarks**

We own a number of registered service marks and trademarks, including, among other marks, AutoNation<sup>®</sup> and AutoNation<sup>®</sup>. Pursuant to agreements with vehicle manufacturers, we have the right to use and display manufacturers trademarks, logos, and designs at our stores and in our advertising and promotional materials, subject to certain restrictions. We also have licenses pursuant to various agreements with third parties authorizing the use and display of the marks and/or logos of such third parties, subject to certain restrictions. The current registrations of our service marks and trademarks in the United States and foreign countries are effective for varying periods of time, which we may renew periodically, provided that we comply with all applicable laws.

### **Executive Officers of AutoNation**

We provide below information regarding each of our executive officers.

<b>Name</b>	<b>Age</b>	<b>Position</b>
Mike Jackson	60	Chairman of the Board and Chief Executive Officer
Michael E. Maroone	55	Director, President and Chief Operating Officer
Michael J. Short	47	Executive Vice President and Chief Financial Officer
Jonathan P. Ferrando	43	Executive Vice President, General Counsel and Secretary
Kevin P. Westfall	53	Senior Vice President, Sales

**Mike Jackson** has served as our Chairman of the Board since January 2003, and as our Chief Executive Officer and Director since September 1999. From October 1998 until September 1999, Mr. Jackson served as Chief Executive Officer of Mercedes-Benz USA, LLC, a North American operating unit of DaimlerChrysler AG, a multinational automotive manufacturing company. From April 1997 until September 1999, Mr. Jackson also served as President of Mercedes-Benz USA. From July 1990 until March 1997, Mr. Jackson served in various capacities at Mercedes-Benz USA, including as Executive Vice President immediately prior to his

appointment as President of Mercedes-Benz USA. Mr. Jackson was also the managing partner from March 1979 to July 1990 of Euro Motorcars of Bethesda, Maryland, a regional group that owned and operated eleven automotive dealership franchises, including Mercedes-Benz and other brands of automobiles.

**Michael E. Maroone** has served as a director since July 2005 and as our President and Chief Operating Officer since August 1999. Following our acquisition of the Maroone Automotive Group in January 1997, Mr. Maroone served as President of our New Vehicle Dealer Division. In January 1998, Mr. Maroone was named President of our Automotive Retail Group with responsibility for our new and used vehicle operations. Prior to joining AutoNation, Mr. Maroone was President and Chief Executive Officer of the Maroone Automotive Group, one of the country's largest privately-held automotive retail groups prior to its acquisition by us.

**Michael J. Short** has served as our Executive Vice President and Chief Financial Officer since January 2007. From 2000 to January 2007, Mr. Short served as Executive Vice President and Chief Financial Officer of Universal City Development Partners, Ltd. (dba Universal Orlando) ( Universal Orlando ). From 2005 until January 2007, he also served as Treasurer and Chief Financial Officer of Universal City Florida Holding Co. I, the limited partner of Universal Orlando, and Universal City Florida Holding Co. II, the general partner of Universal Orlando. From 1991 to 2000, Mr. Short held various finance positions at Universal Orlando, Joseph E. Seagram & Sons, Inc., and IBM Corporation. Prior to that, he was a helicopter pilot and tactics instructor for the United States Navy, based out of Norfolk, Virginia.

**Jonathan P. Ferrando** has served as our Executive Vice President, General Counsel and Secretary since March 2005. Prior thereto, he served as Senior Vice President, General Counsel and Secretary from January 2000 until March 2005. In September 2004, Mr. Ferrando assumed responsibility for our human resources and labor relations functions in addition to his role as General Counsel. Mr. Ferrando joined our Company in July 1996 and served in various capacities within our Company, including as Senior Vice President and General Counsel of our Automotive Retail Group from March 1998 until January 2000. Prior to joining our company, Mr. Ferrando was a corporate attorney with Skadden, Arps, Slate, Meagher & Flom from 1991 until 1996.

**Kevin P. Westfall** has served as our Senior Vice President, Sales since October 2005. He served as our Senior Vice President, Finance and Insurance and Fixed Operations from May 2003 until September 2005. From 2001 until May 2003, Mr. Westfall served as our Senior Vice President, Finance and Insurance. Previously, he served as President of our former wholly-owned captive finance company, AutoNation Financial Services, from 1997 through 2001. He is also the former President of BMW Financial Services for North America.

## **SEC Filings and Certifications**

Our web site is located at [www.autonation.com](http://www.autonation.com), and our Investor Relations web site is located at [corp.autonation.com/investors](http://corp.autonation.com/investors). The information on or accessible through our web sites is not incorporated by reference in this Annual Report on Form 10-K. Our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to reports filed or furnished pursuant to Sections 13(a) and 15(d) of the Securities Exchange Act of 1934, as amended, are available, free of charge, on our Investor Relations web site as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission (the SEC).

The Company has filed the certifications required under Section 302 of the Sarbanes-Oxley Act of 2002 as exhibits to this Annual Report on Form 10-K. On June 5, 2008, the Company submitted to the New York Stock Exchange (the NYSE) the annual CEO certification as required under applicable rules of the NYSE.

## **ITEM 1A. RISK FACTORS**

Our business, financial condition, results of operations, cash flows, and prospects, and the prevailing market price and performance of our common stock, may be adversely affected by a number of factors, including the matters discussed below. Certain statements and information set forth in this Annual Report on Form 10-K, as well as other written or oral statements made from time to time by us or by our authorized

officers on our behalf, constitute forward-looking statements within the meaning of the Federal Private Securities Litigation Reform Act of 1995. Words such as anticipates, believes, estimates, expects, intends, may, plans, projects, will, would, and similar expressions are intended to identify such forward-looking statements. We intend for our forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and we set forth this statement in order to comply with such safe harbor provisions. You should note that our forward-looking statements speak only as of the date of this Annual Report on Form 10-K or when made and we undertake no duty or obligation to update or revise our forward-looking statements, whether as a result of new information, future events, or otherwise. Although we believe that the expectations, plans, intentions, and projections reflected in our forward-looking statements are reasonable, such statements are subject to known and unknown risks, uncertainties, and other factors that may cause our actual results, performance, or achievements to be materially different from any future results, performance, or achievements expressed or implied by the forward-looking statements. The risks, uncertainties, and other factors that our stockholders and prospective investors should consider include, but are not limited to, the following:

***The automotive retailing industry is sensitive to changing economic conditions and various other factors. Our business and results of operations are substantially dependent on new vehicle sales levels in the United States and in our particular geographic markets and the level of gross profit margins that we can achieve on our sales of new vehicles, all of which are very difficult to predict.***

We believe that many factors affect sales of new vehicles and automotive retailers' gross profit margins in the United States and in our particular geographic markets, including the economy, fuel prices, credit availability, interest rates, consumer confidence, the level of personal discretionary spending, unemployment rates, the state of housing markets, auto emission and fuel economy standards, the rate of inflation, the level of manufacturers' production capacity, manufacturer incentives (and consumers' reaction to such offers), intense industry competition, the prospects of war, other international conflicts or terrorist attacks, severe weather events, product quality, affordability and innovation, the number of consumers whose vehicle leases are expiring, and the length of consumer loans on existing vehicles. Changes in interest rates can significantly impact industry new vehicle sales and vehicle affordability due to the direct relationship between interest rates and monthly loan payments, a critical factor for many vehicle buyers, and the impact interest rates have on customers' borrowing capacity and disposable income. Sales of certain new vehicles, particularly larger trucks and sports utility vehicles that historically have provided us with higher gross margins, are sensitive to fuel prices and the level of construction activity. In 2008, new vehicle sales were impacted by unfavorable economic conditions in the United States, including the continued turbulence in the credit and housing markets, and experienced a significant decline. See the risk factor *Our results of operations and financial condition have been and could continue to be adversely affected by the conditions in the credit markets and the declining economic conditions in the United States* below. Additionally, in 2008, volatility in fuel prices impacted consumer preferences and caused dramatic swings in consumer demand for various vehicle models, which led to supply and demand imbalances.

In the fourth quarter of 2008, the seasonally adjusted annual rate of new vehicle sales in the United States was 10.3 million. In comparison, full-year U.S. industry new vehicle sales were 13.2 million in 2008 and 16.1 million in 2007. We expect that the U.S. automotive retail market will remain challenging in 2009. Our new vehicle sales may differ from industry sales due to particular economic conditions and other factors in the geographic markets in which we operate. Economic conditions and the other factors described above may also materially adversely impact our sales of used vehicles, parts and automotive repair and maintenance services, and automotive finance and insurance products.

***Our results of operations and financial condition have been and could continue to be adversely affected by the conditions in the credit markets and the declining economic conditions in the United States.***

The recent turmoil in the credit markets has resulted in tighter credit conditions and has adversely impacted our business. In the automotive finance market, tight credit conditions have resulted in a decrease in the availability of automotive loans and leases and more stringent lending restrictions. Additionally, the

declining economic conditions in the United States have adversely impacted demand for new and used vehicles. As a result, our new and used vehicle sales and margins have been adversely impacted. If the unfavorable economic conditions continue and the availability of automotive loans and leases remains limited, we anticipate that our vehicle sales and margins will continue to be adversely impacted. In addition, we obtain a significant amount of financing for our customers through the captive finance companies of automotive manufacturers, including the domestic manufacturers whose finance companies have been adversely affected by the conditions in the credit markets. In the fourth quarter of 2008, the availability of automotive loans and leases through certain of these companies declined significantly, forcing us to seek alternate financing sources. To the extent that we are unable to obtain financing for our customers through these companies, our sales of vehicles, particularly domestic, could continue to be adversely affected.

We also rely on floorplan financing to purchase new vehicle inventory, primarily through the manufacturer-related captive finance companies. Certain of these companies have altered their floorplan programs to our detriment, providing additional restrictions on lending and increasing interest rates. To the extent that these companies cannot or are unwilling to provide floorplan financing on customary terms, we would need to seek floorplan financing from other lenders. Any inability to obtain floorplan financing on customary terms, or the termination of our floorplan financing agreements by our floorplan lenders, in which case we could be required to repay our floorplan financing on demand, could materially adversely affect our results of operations, financial condition, and cash flows.

***Our revolving credit facility, term loan facility, mortgage facility, and the indenture relating to our senior unsecured notes contain certain financial ratios and other restrictions on our ability to conduct our business.***

The indenture relating to our senior unsecured notes and the amended credit agreement relating to our revolving credit facility and term loan facility contain numerous financial and operating covenants that limit the discretion of our management with respect to various business matters. These covenants place significant restrictions on, among other things, our ability to incur additional indebtedness, to create liens or other encumbrances, to make certain payments (including dividends and repurchases of our shares) and investments, and to sell or otherwise dispose of assets and merge or consolidate with other entities. A failure by us to comply with the obligations contained in our amended credit agreement or the indenture relating to our senior unsecured notes could result in an event of default under our amended credit agreement or the indenture, which could permit acceleration of the related debt and acceleration of debt under other instruments that may contain cross-acceleration or cross-default provisions. If any debt is accelerated, our liquid assets may not be sufficient to repay in full such indebtedness and our other indebtedness. In addition, we have granted certain manufacturers the right to acquire, at fair market value, our automotive stores franchised by that manufacturer in specified circumstances in the event of our default under the indenture for our senior unsecured notes or the amended credit agreement for our revolving credit facility and term loan facility.

Under our amended credit agreement, we are required to remain in compliance with a maximum consolidated leverage ratio and a maximum capitalization ratio. See *Liquidity and Capital Resources Restrictions and Covenants* in Part II, Item 7 of this Form 10-K. The decline in our earnings has adversely impacted our consolidated leverage ratio. Recent impairment charges associated with goodwill and franchise rights have adversely impacted our capitalization ratio. See *Liquidity and Capital Resources Restrictions and Covenants* in Part II, Item 7 of this Form 10-K. If our earnings continue to decline or if we are required to record additional charges in the future, we may be unable to comply with the financial ratios required by our amended credit agreement. In such case, we would seek an amendment or waiver of our amended credit agreement or consider other options, such as raising capital through an equity issuance to pay down debt, which could be dilutive to stockholders. There can be no assurance that our lenders would agree to an amendment or waiver of our amended credit agreement. In the event we obtain an amendment or waiver of our amended credit agreement, we would likely incur additional fees and higher interest expense.

***Our substantial indebtedness could adversely affect our financial condition and operations and prevent us from fulfilling our debt service obligations.***

As of December 31, 2008, we had approximately \$1.3 billion of total indebtedness (including amounts outstanding under our mortgage facility and capital leases but excluding floorplan financing), and our subsidiaries also had \$1.9 billion of floorplan financing. Our substantial indebtedness could have important consequences. For example:

We may have difficulty satisfying our debt service obligations and, if we fail to comply with these requirements, an event of default could result;

We may be required to dedicate a substantial portion of our cash flow from operations to required payments on indebtedness, thereby reducing the availability of cash flow for working capital, capital expenditures, acquisitions, and other general corporate activities;

Covenants relating to our indebtedness may limit our ability to obtain financing for working capital, capital expenditures, acquisitions, and other general corporate activities;

Covenants relating to our indebtedness may limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate;

We may be more vulnerable to the impact of economic downturns and adverse developments in our business;

We may be placed at a competitive disadvantage against any less leveraged competitors;

Our variable interest rate debt will fluctuate with changing market conditions and, accordingly, our interest expense will increase if interest rates rise; and

Future share repurchases are subject to limitations contained in the indenture relating to our senior unsecured notes.

The occurrence of any one of these events could have a material adverse effect on our business, financial condition, results of operations, prospects, and ability to satisfy our debt service obligations.

***We are dependent upon the success and continued financial viability of the vehicle manufacturers and distributors with which we hold franchises.***

The success of our stores is dependent on vehicle manufacturers in several key respects. First, we rely exclusively on the various vehicle manufacturers for our new vehicle inventory. Our ability to sell new vehicles is dependent on a vehicle manufacturer's ability to produce and allocate to our stores an attractive, high-quality, and desirable product mix at the right time in order to satisfy customer demand. Second, manufacturers generally support their franchisees by providing direct financial assistance in various areas, including, among others, floorplan assistance and advertising assistance. Third, manufacturers provide product warranties and, in some cases, service contracts, to customers. Our stores perform warranty and service contract work for vehicles under manufacturer product warranties and service contracts, and direct bill the manufacturer as opposed to invoicing the store customer. At any particular time, we have significant receivables from manufacturers for warranty and service work performed for customers. In addition, we rely on manufacturers to varying extents for original equipment manufactured replacement parts, training, product brochures and point of sale materials, and other items for our stores.

The core brands of vehicles that we sell are manufactured by Toyota, Ford, Honda, Nissan, General Motors, Daimler, BMW, and Chrysler. In 2008, our Ford, General Motors, and Chrysler stores represented 13%, 12%, and 5% of our new vehicle revenue, respectively. We are subject to a concentration of risk in the event of financial distress, including potential bankruptcy, of a major vehicle manufacturer such as Ford, General Motors, or Chrysler. In the event of such a bankruptcy, among other things, (i) the manufacturer could attempt to terminate our floorplan financing or all or certain of our franchises, in which case we may not receive adequate compensation for our franchises, (ii) consumer demand for their products could be materially adversely affected, (iii) we may be unable to obtain financing for our new vehicle inventory, or to arrange

financing for our customers for their vehicle purchases and leases, through the manufacturer's captive finance subsidiary, in which case we would be required to seek financing with alternate finance sources, which may be difficult to obtain on similar terms, if at all, and (iv) we may be unable to collect some or all of our significant receivables that are due from such manufacturers and we may be subject to preference claims relating to payments made by manufacturers prior to bankruptcy. Additionally, these events may result in us being required to incur impairment charges with respect to the inventory, fixed assets, and intangible assets related to certain franchises, which could adversely impact our results of operations, financial condition, and our ability to remain in compliance with the financial ratios contained in our debt agreements.

Vehicle manufacturers may be adversely impacted by economic downturns or recessions, significant declines in the sales of their new vehicles, increases in interest rates, declines in their credit ratings, labor strikes or similar disruptions (including within their major suppliers), supply shortages or rising raw material costs, rising employee benefit costs, adverse publicity that may reduce consumer demand for their products (including due to bankruptcy), product defects, vehicle recall campaigns, litigation, poor product mix or unappealing vehicle design, governmental laws and regulations, or other adverse events. In 2008, vehicle manufacturers, in particular domestic manufacturers, were adversely impacted by the unfavorable economic conditions in the United States. See "Market Challenges" in Part II, Item 7 of this Form 10-K.

Additionally, vehicle manufacturers are subject to federally mandated corporate average fuel economy standards, which will increase substantially as a result of legislation passed in 2007. California and other states, in an effort to reduce greenhouse gases, have enacted, or proposed to enact, automotive emissions standards through legislation or regulations that, pending an expected waiver from the federal government, could significantly increase fuel economy requirements in those states. Significant increases in fuel economy requirements or automotive emissions standards could materially adversely affect the ability of the manufacturers to produce and our ability to sell vehicles in demand by consumers at affordable prices, particularly larger vehicles, which represent a significant portion of our business. These and other risks could materially adversely affect any manufacturer and impact its ability to profitably design, market, produce, or distribute new vehicles, which in turn could materially adversely affect our ability to obtain or finance our desired new vehicle inventories, our ability to take advantage of manufacturer financial assistance programs, our ability to collect in full or on a timely basis our manufacturer warranty and other receivables, and/or our ability to obtain other goods and services provided by the impacted manufacturer. Our business, results of operations, financial condition, shareholders' equity, cash flows, and prospects could be materially adversely affected as a result of any event that has a material adverse effect on the vehicle manufacturers or distributors who are our primary franchisors.

***Goodwill and other intangible assets comprise a significant portion of our total assets. We must test our intangible assets for impairment at least annually, which could result in a material, non-cash write-down of goodwill or franchise rights and could have a material adverse impact on our results of operations and shareholders' equity.***

Goodwill and indefinite-lived intangibles are subject to impairment assessments at least annually (or more frequently when events or circumstances indicate that an impairment may have occurred) by applying a fair-value based test. Our principal intangible assets are goodwill and our rights under our franchise agreements with vehicle manufacturers. During 2008, we recorded non-cash impairment charges of \$1.76 billion (\$1.46 billion after-tax) associated with goodwill and franchise rights. We may be required to incur additional impairment charges in the future. Additional impairment losses could have an adverse impact on our ability to satisfy the financial ratios or other covenants under our debt agreements and could have a material adverse impact on our results of operations and shareholders' equity.

***Our new vehicle sales are impacted by the consumer incentive and marketing programs of vehicle manufacturers.***

Most vehicle manufacturers from time to time have established various incentive and marketing programs designed to spur consumer demand for their vehicles. In addition, certain manufacturers offer extended product warranties or free service programs to consumers. From time to time, manufacturers modify and

discontinue these dealer assistance and consumer incentive and marketing programs, which could have a significant adverse effect on our new vehicle and aftermarket product sales, results of operations, and cash flows.

***Natural disasters and adverse weather events can disrupt our business.***

Our stores are concentrated in states and regions in the United States, including primarily Florida, Texas, and California, in which actual or threatened natural disasters and severe weather events (such as hurricanes, earthquakes, fires, landslides, and hail storms) may disrupt our store operations, which may adversely impact our business, results of operations, financial condition, and cash flows. In addition to business interruption, the automotive retailing business is subject to substantial risk of property loss due to the significant concentration of property values at store locations. Although we have, subject to certain deductibles, limitations, and exclusions, substantial insurance, we cannot assure you that we will not be exposed to uninsured or underinsured losses that could have a material adverse effect on our business, financial condition, results of operations, or cash flows.

***We are subject to restrictions imposed by and significant influence from vehicle manufacturers that may adversely impact our business, financial condition, results of operations, cash flows, and prospects, including our ability to acquire additional stores.***

Vehicle manufacturers and distributors with whom we hold franchises have significant influence over the operations of our stores. The terms and conditions of our framework, franchise, and related agreements and the manufacturers interests and objectives may, in certain circumstances, conflict with our interests and objectives. For example, manufacturers can set performance standards with respect to sales volume, sales effectiveness, and customer satisfaction, and can influence our ability to acquire additional stores, the naming and marketing of our stores, the operations of our e-commerce sites, our selection of store management, the condition of our store facilities, product stocking and advertising spending levels, and the level at which we capitalize our stores. Manufacturers may also have certain rights to restrict our ability to provide guaranties of our operating companies, pledges of the capital stock of our subsidiaries, and liens on our assets, which could adversely impact our ability to obtain financing for our business and operations on favorable terms or at desired levels. From time to time, we are precluded under agreements with certain manufacturers from acquiring additional franchises, or subject to other adverse actions, to the extent we are not meeting certain performance criteria at our existing stores (with respect to matters such as sales volume, sales effectiveness, and customer satisfaction) until our performance improves in accordance with the agreements, subject to applicable state franchise laws.

Manufacturers also have the right to establish new franchises or relocate existing franchises, subject to applicable state franchise laws. The establishment or relocation of franchises in our markets could have a material adverse effect on the financial condition, results of operations, cash flows, and prospects of our stores in the market in which the franchise action is taken.

Our framework, franchise, and related agreements also grant the manufacturer the right to terminate or compel us to sell our franchise for a variety of reasons (including uncured performance deficiencies, any unapproved change of ownership or management, or any unapproved transfer of franchise rights or impairment of financial standing or failure to meet capital requirements), subject to applicable state franchise laws. From time to time, certain major manufacturers assert sales and customer satisfaction performance deficiencies under the terms of our framework and franchise agreements. Additionally, our framework agreements contain restrictions regarding a change in control, which may be outside of our control. See *Agreements with Vehicle Manufacturers* in Part I, Item 1 of this Form 10-K. While we believe that we will be able to renew all of our franchise agreements, we cannot guarantee that all of our franchise agreements will be renewed or that the terms of the renewals will be favorable to us. We cannot assure you that our stores will be able to comply with manufacturers sales, customer satisfaction performance, and other requirements in the future, which may affect our ability to acquire new stores or renew our franchise agreements, or

subject us to other adverse actions, including termination or compelled sale of a franchise, any of which could have a material adverse effect on our financial condition, results of operations, cash flows, and prospects. Furthermore, we rely on the

protection of state franchise laws in the states in which we operate and if those laws are repealed or weakened, our framework, franchise, and related agreements may become more susceptible to termination, non-renewal, or renegotiation.

In addition, we have granted certain manufacturers the right to acquire, at fair market value, our automotive dealerships franchised by that manufacturer in specified circumstances in the event of our default under the indenture for our senior unsecured notes or the amended credit agreement for our revolving credit facility and term loan facility.

***We are subject to numerous legal and administrative proceedings, which, if the outcomes are adverse to us, could materially adversely affect our business, results of operations, financial condition, cash flows, and prospects.***

We are involved and will continue to be involved in numerous legal proceedings arising out of the conduct of our business, including litigation with customers, employment-related lawsuits, class actions, purported class actions, and actions brought by governmental authorities. We do not believe that the ultimate resolution of these matters will have a material adverse effect on our business, results of operations, financial condition, or cash flows. However, the results of these matters cannot be predicted with certainty, and an unfavorable resolution of one or more of these matters could have a material adverse effect on our business, results of operations, financial condition, cash flow, and prospects.

***Our operations, including, without limitation, our sales of finance and insurance and vehicle protection products, are subject to extensive governmental laws and regulations. If we are found to be in violation of or subject to liabilities under any of these laws or regulations, or if new laws or regulations are enacted that adversely affect our operations, our business, operating results, and prospects could suffer.***

The automotive retailing industry, including our facilities and operations, is subject to a wide range of federal, state, and local laws and regulations, such as those relating to motor vehicle sales, retail installment sales, leasing, sales of finance, insurance, and vehicle protection products, licensing, consumer protection, consumer privacy, escheatment, money laundering, environmental, vehicle emissions and fuel economy, health and safety, wage-hour, anti-discrimination, and other employment practices. With respect to motor vehicle sales, retail installment sales, leasing, and the sale of finance, insurance, and vehicle protection products at our stores, we are subject to various laws and regulations, the violation of which could subject us to consumer class action or other lawsuits or governmental investigations and adverse publicity, in addition to administrative, civil, or criminal sanctions. The violation of other laws and regulations to which we are subject also can result in administrative, civil, or criminal sanctions against us, which may include a cease and desist order against the subject operations or even revocation or suspension of our license to operate the subject business, as well as significant fines and penalties. We currently devote significant resources to comply with applicable federal, state, and local regulation of health, safety, environmental, zoning, and land use regulations, and we may need to spend additional time, effort, and money to keep our operations and existing or acquired facilities in compliance therewith. In addition, we may be subject to broad liabilities arising out of contamination at our currently and formerly owned or operated facilities, at locations to which hazardous substances were transported from such facilities, and at such locations related to entities formerly affiliated with us. Although for some such liabilities we believe we are entitled to indemnification from other entities, we cannot assure you that such entities will view their obligations as we do or will be able to satisfy them. Failure to comply with applicable laws and regulations may have an adverse effect on our business, results of operations, financial condition, cash flows, and prospects.

The enactment of new laws and regulations that materially impair or restrict our sales, finance and insurance, or other operations could have a material adverse effect on our business, results of operations, financial condition, cash flows, and prospects. We expect that new laws and regulations, particularly at the federal level, in the labor, employment, environmental, and consumer protection areas will be enacted, which could significantly increase our costs.

***We are subject to interest rate risk in connection with our floorplan payable, revolving credit facility, term loan facility, and floating rate senior unsecured notes that could have a material adverse effect on our profitability.***

Most of our debt, including our floorplan payable, is subject to variable interest rates. Our variable interest rate debt will fluctuate with changing market conditions and, accordingly, our interest expense will increase if interest rates rise. In addition, our net inventory carrying cost (new vehicle floorplan interest expense net of floorplan assistance that we receive from automotive manufacturers) may increase due to changes in interest rates, inventory levels, and manufacturer assistance. We cannot assure you that a significant increase in interest rates would not have a material adverse effect on our business, financial condition, results of operations, or cash flows.

***Our largest stockholder, as a result of its voting ownership, may have the ability to exert substantial influence over actions to be taken or approved by our stockholders.***

As of February 6, 2009, ESL Investments, Inc. and certain of its investment affiliates (together, "ESL") beneficially owned approximately 45% of the outstanding shares of our common stock. As a result, ESL may have the ability to exert substantial influence over actions to be taken or approved by our stockholders, including the election of directors and any transactions involving a change of control. William C. Crowley, one of our directors, is the President and Chief Operating Officer of ESL Investments, Inc. In the future, ESL may acquire or sell shares of common stock and thereby increase or decrease its ownership stake in us.

In January 2009, our Board of Directors authorized and approved letter agreements with certain automotive manufacturers in order to, among other things, eliminate any potential adverse consequences under our framework agreements with those manufacturers in the event that ESL acquires 50% or more of our common stock. Certain of those letter agreements also contain governance-related and other provisions. In addition, our Board authorized and approved a separate letter agreement between the Company and ESL (the "ESL Agreement") in which ESL has agreed to vote shares of our common stock owned by ESL in excess of 45% in the same proportion as all non-ESL-owned shares are voted. The ESL Agreement expires on January 28, 2010, unless extended by mutual agreement of the parties. For additional information regarding these letter agreements, see "Agreements with Vehicle Manufacturers" in Part I, Item 1 of this Form 10-K.

#### **ITEM 1B. UNRESOLVED STAFF COMMENTS**

None.

#### **ITEM 2. PROPERTIES**

We lease our current corporate headquarters facility in Fort Lauderdale, Florida. In October 2008, we executed a lease for 105,000 square feet at a new location in Fort Lauderdale, Florida, for our corporate headquarters pursuant to a lease expiring on December 31, 2020. We expect to move to the new location in mid-2009. As of February 2009, we also own or lease numerous facilities relating to our operations under each of our operating segments. These facilities are located in the following 15 states: Alabama, Arizona, California, Colorado, Florida, Georgia, Illinois, Maryland, Minnesota, Nevada, Ohio, Tennessee, Texas, Virginia, and Washington. These facilities consist primarily of automobile showrooms, display lots, service facilities, collision repair centers, supply facilities, automobile storage lots, parking lots, and offices. We believe that our facilities are sufficient for our current needs and are in good condition in all material respects.

#### **ITEM 3. LEGAL PROCEEDINGS**

We are involved and will continue to be involved in numerous legal proceedings arising out of the conduct of our business, including litigation with customers, employment-related lawsuits, class actions, purported class actions, and actions brought by governmental authorities. We do not believe that the ultimate resolution of these matters will have a material adverse effect on our business, results of operations, financial condition, or cash flows. However, the results of these matters cannot be predicted with certainty, and an

unfavorable resolution of one or more of these matters could have a material adverse effect on our business, results of operations, financial condition, cash flow, and prospects.

**ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS**

No matters were submitted to a vote of our stockholders during the fourth quarter of the fiscal year ended December 31, 2008.

## PART II

### ITEM 5. *MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES*

#### Market Information, Holders, and Dividends

Our common stock is traded on the New York Stock Exchange under the symbol AN. The following table sets forth the high and low sales prices of our common stock for the periods indicated.

	<b>High</b>	<b>Low</b>
<b>2008</b>		
Fourth Quarter	\$ 11.70	\$ 3.97
Third Quarter	\$ 19.59	\$ 7.30
Second Quarter	\$ 17.40	\$ 10.00
First Quarter	\$ 16.63	\$ 11.72
<b>2007</b>		
Fourth Quarter	\$ 18.62	\$ 14.65
Third Quarter	\$ 22.72	\$ 17.03
Second Quarter	\$ 22.86	\$ 20.21
First Quarter	\$ 23.19	\$ 20.65

As of February 9, 2009, there were approximately 2,352 holders of record of our common stock. A substantially greater number of holders of our common stock are street name or beneficial holders, whose shares are held of record by banks, brokers, and other financial institutions.

We have not declared or paid any cash dividends on our common stock during our two most recent fiscal years. We do not anticipate paying cash dividends in the foreseeable future. The indenture for our senior unsecured notes restricts our ability to declare and pay cash dividends. See Liquidity and Capital Resources Restrictions and Covenants in Part II, Item 7 of this Form 10-K.

#### Issuer Purchases of Equity Securities

On October 23, 2007, our Board of Directors approved a share repurchase program (the Share Repurchase Program), which authorized AutoNation to repurchase up to \$250 million in shares of our common stock. The Share Repurchase Program does not have an expiration date. During the fourth quarter of 2008, we did not repurchase any shares of our common stock. As of December 31, 2008, up to \$142.7 million in shares may yet be repurchased under the Share Repurchase Program.

#### Stock Performance Graph

The following graph and table compare the cumulative total stockholder return on our common stock from December 31, 2003 through December 31, 2008 with the performance of: (i) the Standard & Poor's (S&P) 500 Index, (ii) the S&P Specialty Stores Index, the industry index that we used in our Form 10-K for the year ended December 31, 2007, and (iii) the Dow Jones U.S. Specialty Retailers Index. We believe that using the Dow Jones

U.S. Specialty Retailers Index, which is broader than the S&P Specialty Stores Index, provides a more meaningful comparison of our stock performance to investors, and we intend to use that index in future filings with the SEC. We have included the S&P Specialty Stores Index in the graph below in accordance with SEC rules.

As of December 31, 2008, the S&P Specialty Stores Index consisted of Office Depot, Inc., Staples, Inc., and Tiffany & Co., and the Dow Jones U.S. Specialty Retailers Index consisted of the following companies:

99¢ Only Stores	Dollar Tree, Inc.	RadioShack Corporation
Advance Auto Parts, Inc.	GameStop Corp. Class A	RealNetworks, Inc.
AutoNation, Inc.	Group 1 Automotive, Inc.	Sally Beauty Holdings, Inc.
AutoZone, Inc.	Netflix, Inc.	Staples, Inc.
Barnes & Noble, Inc.	O Reilly Automotive, Inc.	Tiffany & Co.
Bed Bath & Beyond Inc.	Office Depot, Inc.	Tractor Supply Company
Best Buy Co., Inc.	OfficeMax Incorporated	Williams-Sonoma, Inc.
CarMax, Inc.	The Pep Boys Manny, Moe & Jack	Zale Corporation
Dick's Sporting Goods, Inc.	PetSmart, Inc.	

We have created these comparisons using data supplied by Research Data Group, Inc. The comparisons reflected in the graph and table are not intended to forecast the future performance of our stock and may not be indicative of future performance. The graph and table assume that \$100 was invested on December 31, 2003 in each of our common stock, the S&P 500 Index, the S&P Specialty Stores Index, and the Dow Jones U.S. Specialty Retailers Index and that any dividends were reinvested.

***Comparison of Five-Year Cumulative Return for AutoNation, Inc., the S&P 500 Index, the S&P Specialty Stores Index, and the Dow Jones U.S. Specialty Retailers Index***

	12/03	12/04	12/05	12/06	12/07	12/08
AutoNation Inc.	100.00	104.57	118.29	116.06	85.25	53.78
S&P 500	100.00	110.88	116.33	134.70	142.10	89.53
S&P Specialty Stores	100.00	105.20	124.25	151.04	110.87	70.30
Dow Jones U.S. Specialty Retailers	100.00	111.63	119.28	131.03	122.89	81.81

**ITEM 6. SELECTED FINANCIAL DATA**

You should read the following Selected Financial Data in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations, our Consolidated Financial Statements and Notes thereto, and other financial information included elsewhere in this Form 10-K.

(In millions, except per share data)	As of and for the Years Ended December 31,				
	2008	2007	2006	2005	2004
Revenue	\$ 14,131.9	\$ 17,346.5	\$ 18,218.5	\$ 17,820.8	\$ 17,421.1
Income (loss) from continuing operations before income taxes (1)	\$ (1,422.7)	\$ 460.4	\$ 538.1	\$ 609.1	\$ 579.3
Net income (loss) (1)	\$ (1,243.1)	\$ 278.7	\$ 316.9	\$ 496.5	\$ 433.6
Basic earnings (loss) per share:					
Continuing operations	\$ (6.89)	\$ 1.46	\$ 1.46	\$ 1.47	\$ 1.42
Discontinued operations	\$ (0.10)	\$ (0.05)	\$ (0.05)	\$ 0.42	\$ 0.21
Net income (loss)	\$ (6.99)	\$ 1.41	\$ 1.41	\$ 1.89	\$ 1.63
Weighted average common shares outstanding	177.8	198.3	225.2	262.7	266.7
Diluted earnings (loss) per share:					
Continuing operations	\$ (6.89)	\$ 1.44	\$ 1.43	\$ 1.44	\$ 1.39
Discontinued operations	\$ (0.10)	\$ (0.05)	\$ (0.05)	\$ 0.41	\$ 0.20
Net income (loss)	\$ (6.99)	\$ 1.39	\$ 1.38	\$ 1.85	\$ 1.59
Weighted average common shares outstanding	177.8	200.0	229.3	268.0	272.5
Total assets	\$ 6,014.1	\$ 8,479.6	\$ 8,601.4	\$ 8,824.5	\$ 8,698.9
Long-term debt, net of current maturities	\$ 1,225.6	\$ 1,751.9	\$ 1,557.9	\$ 484.4	\$ 797.7
Shareholders' equity	\$ 2,198.1	\$ 3,473.5	\$ 3,712.7	\$ 4,669.5	\$ 4,263.1

(1) During 2008, we recorded impairment charges of \$1.76 billion (\$1.46 billion after-tax) associated with goodwill and franchise rights. See Note 5 of the Notes to Consolidated Financial Statements for more information.

See the Notes to Consolidated Financial Statements for discussion of Shareholders' Equity (Note 9), Income Taxes (Note 11), Earnings (Loss) Per Share (Note 12), Discontinued Operations (Note 13), and Acquisitions (Note 15), and the effect on comparability of year-to-year data. See Part I, Item 5 of this Form 10-K for a discussion of our dividend policy.

**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following discussion should be read in conjunction with Part I, including matters set forth in the Risk Factors section of this Form 10-K, and our Consolidated Financial Statements and notes thereto included in Part II, Item 8 of this Form 10-K.

Certain reclassifications of amounts previously reported have been made to the accompanying Consolidated Financial Statements in order to maintain consistency and comparability between periods presented.

Except to the extent that differences among operating segments are material to an understanding of our business taken as a whole, we present the discussion in Management's Discussion and Analysis of Financial Condition and Results of Operations on a consolidated basis.

**Overview**

AutoNation, Inc., through its subsidiaries, is the largest automotive retailer in the United States. As of December 31, 2008, we owned and operated 302 new vehicle franchises from 232 stores located in major metropolitan markets, predominantly in the Sunbelt region of the United States. Our stores, which we believe include some of the most recognizable and well known in our key markets, sell 37 different brands of new vehicles. The core brands of vehicles that we sell, representing approximately 96% of the new vehicles that we sold in 2008, are manufactured by Toyota, Ford, Honda, Nissan, General Motors, Daimler, BMW, and Chrysler.

We offer a diversified range of automotive products and services, including new vehicles, used vehicles, parts and automotive repair and maintenance services, and automotive finance and insurance products. We also arrange financing for vehicle purchases through third-party finance sources. We believe that the significant scale of our operations and the quality of our managerial talent allow us to achieve efficiencies in our key markets by, among other things, leveraging our market brands and advertising, improving asset management, implementing standardized processes, and increasing productivity across all of our stores.

As of December 31, 2008, we had three operating segments: Domestic, Import, and Premium Luxury. Our Domestic segment is comprised of retail automotive franchises that sell new vehicles manufactured by General Motors, Ford, and Chrysler. Our Import segment is comprised of retail automotive franchises that sell new vehicles manufactured primarily by Toyota, Honda, and Nissan. Our Premium Luxury segment is comprised of retail automotive franchises that sell new vehicles manufactured primarily by Mercedes, BMW, and Lexus. The franchises in each segment also sell used vehicles, parts and automotive repair and maintenance services, and automotive finance and insurance products. See Segment Results below and Note 21 of the Notes to Consolidated Financial Statements for additional information regarding our operating segments.

For the year ended December 31, 2008, new vehicle sales account for approximately 55% of our total revenue, but approximately 22% of our total gross margin. Our parts and service and finance and insurance operations, while comprising approximately 21% of total revenue, contribute approximately 65% of our gross margin.

We had a net loss from continuing operations of \$1.2 billion and diluted loss per share of \$6.89 in 2008, as compared to net income from continuing operations of \$288.7 million and diluted earnings per share of \$1.44 in 2007. The 2008 results were impacted by a non-cash goodwill impairment charge of \$1.61 billion (\$1.37 billion after-tax), non-cash franchise impairments of \$146.5 million (\$90.8 million after-tax), a favorable tax adjustment of approximately \$35 million, and a gain on senior note repurchases of \$51.3 million (\$31.5 million after-tax). See further discussion of these items in Note 5, 7, and 11 of the Notes to Consolidated Financial Statements. The 2007 results included

favorable tax adjustments of \$12.0 million.

## Market Challenges

Our results of operations for 2008 reflected a challenging and volatile automotive retail market impacted by the unfavorable economic conditions in the United States, including the continued turbulence in the credit and housing markets. Volatility in fuel prices impacted consumer preferences and caused dramatic swings in consumer demand for various vehicle models, which led to supply and demand imbalances. Additionally, tight credit conditions limited the ability of some of our customers to purchase vehicles as well as finance and insurance products. In the fourth quarter of 2008, the seasonally adjusted annual rate ( SAAR ) of new vehicle sales in the United States was 10.3 million. In comparison, full-year U.S. industry new vehicle sales were 13.2 million in 2008 and 16.1 million in 2007. Industry analysts expect that the 2009 SAAR will be in the range of 11 million new vehicle units with weakness in the first half of the year. Based on these expectations, we believe that we will be able to manage within all financial covenants in our debt agreements. See [Liquidity and Capital Resources](#) [Restrictions and Covenants](#) below.

While the domestic manufacturers have underperformed relative to their import and premium luxury competitors over the past several years, the performance gap widened in 2008, due in part to the unfavorable economic conditions in the United States, which disproportionately impacted the domestic manufacturers. Recent government assistance has been provided to certain domestic manufacturers, but the future viability of some or all of the domestic manufacturers may be dependent on additional government assistance. The bankruptcy of one or more of the domestic manufacturers could have a material adverse effect on us. For example, the manufacturers could attempt to terminate our floorplan financing and all or certain of our domestic franchises, we may be unable to collect accounts receivable from the manufacturers, and we may be required to incur impairment charges with respect to the inventory, fixed assets, and intangible assets related to our domestic franchises. At December 31, 2008, we had approximately \$49.3 million in accounts receivable, \$768.1 million of inventory, \$721.8 million of fixed assets, and \$178.3 million of goodwill and other intangible assets related to our domestic franchises. Additionally, there are uncertainties surrounding the potential impact of a domestic manufacturer bankruptcy, such as the impact on warranties provided to vehicle purchasers and the availability of parts and services needed to maintain and repair vehicles. As a result, the impact of such a bankruptcy on our financial condition and results of operations is not determinable at this time. See the risk factor *We are dependent upon the success and continued financial viability of the vehicle manufacturers and distributors with which we hold franchises* in Part I, Item 1A of this Form 10-K.

As part of our continuing response to the ongoing market challenges, in July 2008, we announced a cost reduction plan with a targeted annualized run-rate savings of approximately \$100 million. In the fourth quarter of 2008, in response to the turmoil in the credit markets and the related impact on the automotive retail market, we expanded our cost reduction plan and implemented additional actions that enabled us to reduce our annualized costs by an additional \$100 million. Accordingly, at December 31, 2008, we had reduced our costs by approximately \$200 million on an annualized run-rate basis.

## Inventory Management

Our new and used vehicle inventories are stated at the lower of cost or market in our consolidated balance sheets.

We have generally not experienced losses on the sale of new vehicle inventory, in part due to incentives provided by manufacturers to promote sales of new vehicles and our inventory management practices. We reduced our new vehicle inventory to 54,074 units at December 31, 2008, from 60,832 units at December 31, 2007. Although we focus on managing our inventory levels in accordance with consumer demand, we believe we must maintain a minimum level of inventory at our lower volume stores that is representative of the full line of vehicles offered by manufacturers. This may result in a higher days supply of inventory than would otherwise result if we were in a better economic environment. However, given our inventory management practices (such as managing our inventory purchases based on our sales forecasts and sharing inventory among stores within a local market), we do not believe the current

business climate is likely to result in material impairment charges related to new vehicle inventory (subject to the risks noted in Market Challenges

above). We continue to monitor our new vehicle inventory levels closely based on current economic conditions and will adjust them as appropriate.

In general, used vehicles that are not sold on a retail basis are liquidated at wholesale auctions. We record estimated losses on used vehicle inventory expected to be liquidated at wholesale auctions at a loss. Our used vehicle inventory balance was net of cumulative write-downs of \$1.7 million at December 31, 2008, and \$2.0 million at December 31, 2007.

Parts, accessories, and other inventory are carried at the lower of acquisition cost (first-in, first-out method) or market. We estimate the amount of potential obsolete inventory based upon past experience and market trends. Our parts, accessories, and other inventory balance was net of cumulative write-downs of \$6.3 million at December 31, 2008, and \$5.8 million at December 31, 2007.

### **Critical Accounting Policies and Estimates**

We prepare our Consolidated Financial Statements in conformity with accounting principles generally accepted in the United States, which require us to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reporting period. We evaluate our estimates on an ongoing basis and we base our estimates on historical experience and various other assumptions we believe to be reasonable. Actual outcomes could differ materially from those estimates in a manner that could have a material effect on our Consolidated Financial Statements. Set forth below are the policies and estimates that we have identified as critical to our business operations and an understanding of our results of operations, based on the high degree of judgment or complexity in their application.

#### ***Goodwill and Other Intangible Assets***

Goodwill and franchise rights assets are tested for impairment annually or more frequently when events or circumstances indicate that impairment may have occurred. As discussed in Note 5 of the Notes to Consolidated Financial Statements, during 2008, we recorded \$1.61 billion (\$1.37 billion after-tax) of non-cash goodwill impairment charges and \$146.5 million (\$90.8 million after-tax) of non-cash impairment charges related to franchise rights intangible assets. Despite these impairment charges, as of December 31, 2008, we were in compliance with the requirements of all applicable financial covenants under our debt agreements, as further discussed below in *Liquidity and Capital Resources* *Restrictions and Covenants*.

As a result of the change in our operating segment structure described in Note 21 of the Notes to Consolidated Financial Statements, we were required to reassess the reporting units to which goodwill is assigned for goodwill impairment testing purposes. This reassessment resulted in a conclusion that our reporting units were comprised of three operating segments: Domestic, Import, and Premium Luxury.

We are required to complete interim tests for impairment of goodwill and other intangible assets when events occur or circumstances change between annual tests that indicate that the assets might be impaired. We continue to face a challenging automotive retail environment and an uncertain economic environment in general. As a result of these conditions, there can be no assurance that an additional material impairment charge will not occur in a future period. We will continue to monitor events in future periods to determine if additional asset impairment testing should be performed. If we are required to apply the second step of the goodwill impairment test to the goodwill in any of our three reporting units in future periods, we believe that we could incur another significant non-cash impairment charge related to goodwill, which could have a material adverse impact on our consolidated financial statements and on our ability to satisfy the financial ratios or other covenants under our debt and other agreements.

The goodwill impairment analysis is dependent on many variables used to determine fair value of the Company overall and the fair value of the Company's assets and liabilities. Please see Note 5 of the Notes to Consolidated Financial Statements for a description of the valuation methods and related estimates and assumptions used in our impairment testing. The complexity of the analysis does not permit a simplistic determination of the impact of changes in assumptions. We believe that the most significant impact of a

change in the assumptions used in determining our goodwill impairment as of September 30, 2008, would have related to the amount of impairment associated with our domestic reporting unit, and that a relatively small change in assumptions could have resulted in two potentially different outcomes: 1) if the assumptions used (primarily regarding expected future cash flows) were slightly more favorable, we would possibly not have impaired the goodwill associated with our domestic reporting unit, or 2) if the assumptions used had been slightly less favorable, it is possible we would have concluded that most, if not all, of the goodwill associated with the domestic reporting unit would have been impaired. This discussion is not intended to address all potential outcomes that could have resulted if different assumptions had been used in determining our goodwill impairment given the number of assumptions used in determining the impairment and the degree of sensitivity in the determination of the fair value of the Company and its assets and liabilities to changes in such assumptions. We would have been in compliance with the financial covenants in our debt agreements even if we had impaired all of the goodwill associated with our domestic reporting unit.

We estimate the fair value of franchise rights primarily using a discounted cash flow ( DCF ) model. The forecasted cash flows used in the DCF model contain inherent uncertainties, including significant estimates and assumptions related to growth rates, margins, working capital requirements, capital expenditures, and cost of capital, for which we utilize certain market participant-based assumptions, using third-party industry projections, economic projections, and other marketplace data we believe to be reasonable.

We are subject to financial statement risk to the extent that our franchise rights become impaired due to decreases in the fair value of the related underlying business. The risk of a franchise rights impairment loss may increase to the extent that a store's earnings or projected growth rates decline.

Our franchise rights, which related to 19 franchises and totaled \$173.9 million at December 31, 2008, are evaluated on a franchise-by-franchise basis. We recorded impairment charges of \$146.5 million during 2008 related to rights under certain franchise agreements. If the fair value of each of our franchise rights had been determined to be a hypothetical 10% lower as of the valuation date of September 30, 2008, the resulting incremental charge would have been less than \$17.4 million.

### ***Long-Lived Assets***

We estimate the depreciable lives of our property and equipment, including leasehold improvements, and review them for impairment when events or circumstances indicate that their carrying amounts may be impaired. We periodically evaluate the carrying value of assets held for sale to determine if, based on market conditions, the values of these assets should be adjusted. Although we believe our property and equipment and assets held for sale are appropriately valued, the assumptions and estimates used may change and we may be required to record impairment charges to reduce the value of these assets.

During 2008, we recorded \$7.2 million of non-cash impairment charges related to our property and equipment, including property held for sale, to reduce the value of these assets to fair market value. These charges are recorded as a component of Other Expenses (Income), Net in the Consolidated Income Statements.

### ***Chargeback Reserve***

Revenue on finance and insurance products represents commissions earned by us for: (i) loans and leases placed with financial institutions in connection with customer vehicle purchases financed and (ii) vehicle protection products sold. We primarily sell these products on a straight commission basis; however we also participate in future underwriting profit on certain extended service contracts pursuant to retrospective commission arrangements, which are recognized as earned.

We may be charged back for commissions related to financing, insurance, or vehicle protection products in the event of early termination of the contracts by customers ( chargebacks ). These commissions are recorded at the time of the sale of the vehicles, net of an estimated liability for chargebacks.

We estimate our liability for chargebacks on an individual product basis using our historical chargeback experience, based primarily on cancellation data we receive from third parties that sell and administer these

products. Our estimated liability for chargebacks totaled \$61.0 million at December 31, 2008, and \$62.5 million at December 31, 2007.

Chargebacks are influenced by increases or decreases in early termination rates resulting from cancellation of vehicle protection products, defaults, refinancings, payoffs before maturity, and other factors. While we consider these factors in the estimation of our chargeback liability, actual events may differ from our estimates, which could result in a change in our estimated liability for chargebacks. A 10% change in our estimated chargebacks would have changed our estimated liability for chargebacks at December 31, 2008, by approximately \$6.1 million.

See Finance and Insurance below and Note 20 of the Notes to Consolidated Finance Statements for further information regarding chargeback liabilities.

### ***Revenue Recognition***

Revenue consists of the sales of new and used vehicles, commissions from related finance and insurance products, sales of parts and services, and sales of other products. We recognize revenue in the period in which products are sold or services are provided. We recognize vehicle and finance and insurance revenue when a sales contract has been executed, the vehicle has been delivered, and payment has been received or financing has been arranged. Rebates, holdbacks, floorplan assistance, and certain other dealer credits received from manufacturers are recorded as a reduction of the cost of the vehicle and recognized into income upon the sale of the vehicle or when earned under a specific manufacturer program, whichever is later.

### ***Income Taxes***

Accounting for our income taxes requires significant judgment in the evaluation of our uncertain tax positions and in the calculation of our provision for income taxes. Effective January 1, 2007, we adopted Financial Accounting Standards Board ( FASB ) Financial Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No. 109* ( FIN 48 ). FIN 48 contains a two-step approach to recognizing and measuring uncertain tax positions. The first step is to evaluate available evidence to determine if it appears more likely than not that an uncertain tax position will be sustained on an audit by a taxing authority, based solely on the technical merits of the tax position. The second step is to measure the tax benefit as the largest amount that is more than 50% likely of being realized upon settling the uncertain tax position.

Although we believe we have adequately reserved for our uncertain tax positions, the ultimate outcome of these tax matters may differ from our expectations. We adjust our reserves in light of changing facts and circumstances, such as the completion of a tax audit, expiration of a statute of limitations, the refinement of an estimate, and interest accruals associated with uncertain tax positions until they are resolved. To the extent that the final tax outcome of these matters is different than the amounts recorded, such differences will impact the provision for income taxes in the period in which such determination is made. Our unrecognized tax benefits were reduced by approximately \$35 million (net of tax effect) as a result of the expiration of a statute of limitations in October 2008.

Our future effective tax rates could be affected by changes in our deferred tax assets or liabilities, the valuation of our uncertain tax positions, or by changes in tax laws, regulations, accounting principles, or interpretations thereof.

### ***Other***

Additionally, significant estimates have been made by us in the accompanying Consolidated Financial Statements including allowances for doubtful accounts, accruals related to self-insurance programs, certain legal proceedings, estimated losses from disposals of discontinued operations, and certain assumptions related to determining

stock-based compensation.

**Same Store Operating Data**

We have presented below our operating results on a same store basis to reflect our internal performance. The Same Store amounts presented below include the results of dealerships for the identical months in each period presented in the comparison, commencing with the first full month in which the dealership was owned by us. For example, the results for a dealership acquired in February 2007 would be included only in our same store comparison of 2008 to 2007, not in our same store comparison of 2007 to 2006. Results for a dealership that we classified as a discontinued operation in October 2008 would be removed entirely from our same store comparison of 2008 to 2007. Therefore, the amounts presented in the year 2007 column that is being compared to the 2008 column may differ from the amounts presented in the year 2007 column that is being compared to the year 2006 column.

Same store new vehicle revenue decreased \$2.3 billion or 23.0% during 2008, as compared to 2007, as a result of a decrease in same store unit volume of 21.1% and a decrease in same store revenue per vehicle retailed of 2.4%. These decreases were primarily due to the challenging automotive retail environment, particularly with respect to domestic vehicles. Results were adversely impacted by overall economic conditions, including reduced credit availability

offered to consumers, particularly in the second half of 2008, the discontinuation or limitation of certain manufacturer leasing programs, and a decline in consumer confidence. Additionally, volatility in fuel prices impacted consumer preference and caused dramatic swings in consumer demand for various vehicle models, which led to supply and demand imbalances. The significantly higher fuel prices during most of 2008 caused a shift in consumer demand toward more fuel-efficient vehicles. In addition, there was a shift in demand toward entry-level premium luxury vehicles as a result of the economic conditions and premium luxury manufacturer programs launching and promoting these types of vehicles during 2008. The average revenue per vehicle retailed declined due to the relatively lower selling prices of these vehicles. We expect that the automotive retail market will remain challenging and that adverse market conditions will continue into 2009.

Same store new vehicle revenue decreased \$877.3 million or 8.0% during 2007, as compared to 2006, primarily as a result of a challenging automotive retail environment, which resulted in decreased same store unit volume, particularly in California and Florida. We believe these results were driven in part by continued weakness in the housing market. These volume decreases were partially offset by an increase in same store average revenue per unit retailed, primarily as a result of the continued shift in our brand mix to premium luxury brands, as well as higher average prices for domestic vehicles.

Same store gross profit per new vehicle retailed decreased 9.3% during 2008, as compared to 2007. The decrease was driven largely by more stringent credit conditions in the automotive retail credit market and by the shift in demand to lower-priced premium luxury vehicles which have lower margins. Same store gross

profit per vehicle retailed decreased 1.9% during 2007, as compared to 2006, primarily as a result of a competitive retail environment resulting in pricing pressures across all brand product lines, partially offset by the shift in our sales mix to more premium luxury brands.

Our new vehicle inventories were \$1.6 billion or 84 days supply at December 31, 2008, as compared to new vehicle inventories of \$1.8 billion or 52 days supply at December 31, 2007. The increase in our new vehicle inventory days supply is primarily due to lower sales during 2008.

The following table details net new vehicle inventory carrying cost, consisting of new vehicle floorplan interest expense net of floorplan assistance earned (amounts received from manufacturers specifically to support store financing of new vehicle inventory). Floorplan assistance is accounted for as a component of new vehicle gross profit.

(\$ in millions)	Years Ended December 31,				Variance 2007 vs. 2006
	2008	2007	Variance 2008 vs. 2007	2006	
Floorplan assistance	\$ 70.0	\$ 97.2	\$ (27.2)	\$ 104.1	\$ (6.9)
Floorplan interest expense (new vehicles)	(83.7)	(128.5)	44.8	(132.0)	3.5
Net new vehicle inventory carrying cost	\$ (13.7)	\$ (31.3)	\$ 17.6	\$ (27.9)	\$ (3.4)

The net new vehicle inventory carrying cost (new vehicle floorplan interest expense net of floorplan assistance from manufacturers) decreased \$17.6 million in 2008, as compared to 2007, primarily as a result of a decrease in new vehicle floorplan interest expense due to lower floorplan interest rates, partially offset by a decrease in floorplan assistance due to lower new vehicle sales and a decrease in the floorplan assistance rate per unit.

The net new vehicle inventory carrying cost (new vehicle floorplan interest expense net of floorplan assistance from manufacturers) increased \$3.4 million in 2007, as compared to 2006, primarily as a result of a decrease in floorplan assistance due to lower new vehicle sales, partially offset by a decrease in floorplan interest expense due to lower new vehicle inventory levels.

Retail vehicle unit sales	180,304	201,134	(20,830)	(10.4)	205,490	219,271	(13,781)	(6.3)
Revenue per vehicle retailed	\$ 15,635	\$ 16,433	\$ (798)	(4.9)	\$ 16,387	\$ 16,107	\$ 280	1.7
Gross profit per vehicle retailed	\$ 1,579	\$ 1,745	\$ (166)	(9.5)	\$ 1,739	\$ 1,827	\$ (88)	(4.8)
Gross profit as a percentage of retail revenue	10.1%	10.6%			10.6%	11.3%		

Same store retail used vehicle revenue decreased \$486.1 million or 14.7% during 2008, as compared to 2007, primarily as a result of a reduction in revenue per vehicle retailed and a decrease in same store unit volume. The decrease in used vehicle sales volumes was driven by the challenging automotive retail environment, including the reduced credit availability offered to consumers, particularly in the second half of 2008, and a decline in consumer confidence. The decrease in used vehicle sales volumes was also driven in part by a decrease in trade-in volume associated with new vehicle sales, as well as a reduction in traffic into our stores resulting from the significant decline in consumer confidence during 2008. Additionally, volatility in fuel prices impacted consumer preference and caused dramatic swings in consumer demand for various vehicle models, which led to supply and demand imbalances. The changes in consumer preference in used vehicles created market volatility, which was unprecedented in the industry. We expect that the automotive retail market will remain challenging and that adverse market conditions will continue into 2009.

Same store retail used vehicle revenue decreased \$164.3 million or 4.7% during 2007, as compared to 2006, primarily as a result of a decrease in same store unit volume, partially offset by an increase in same

store average revenue per unit retailed. Same store unit volume decreased as a result of a challenging retail environment, particularly in California and Florida. We also saw a decrease in used vehicle sales volumes in our domestic brand stores in our markets, driven in part by a decrease in trade-in volume associated with new vehicle sales. Same store revenue per vehicle retailed during 2007 increased 1.7% as compared to 2006, due to a shift in our sales mix toward premium luxury stores.

Same store gross profit per used vehicle retailed decreased 9.5% during 2008, as compared to 2007, due to more stringent credit conditions in the automotive retail credit market and increased pricing pressure as a result of a competitive retail environment. Additionally, significantly higher fuel costs during most of 2008 put increasing margin pressure on less fuel-efficient trucks and sport utility vehicles, particularly during the period of peak fuel prices.

Same store gross profit per vehicle retailed decreased 4.8% during 2007, as compared to 2006, primarily as a result of an increase in the average cost of our used vehicle inventory combined with the competitive retail market environment.

Used vehicle inventories were \$149.6 million or 30 days supply at December 31, 2008, compared to \$305.2 million or 44 days at December 31, 2007. We reduced our used vehicle inventories and days supply during 2008 to manage cash flow and to mitigate our exposure to the volatility of the used vehicle market by enabling us to react more quickly to consumer demand.

*Parts and Service*

(\$ in millions)	Years Ended December 31, 2008 vs. 2007				2007 vs. 2006		
	2008	2007	Variance	% Variance	2006	Variance	% Variance
			Favorable/ (Unfavorable)			Favorable/ (Unfavorable)	
<b>Reported:</b>							
Revenue	\$ 2,465.2	\$ 2,539.9	\$ (74.7)	(2.9)	\$ 2,476.9	\$ 63.0	2.5
Gross profit	\$ 1,071.8	\$ 1,108.8	\$ (37.0)	(3.3)	\$ 1,088.2	\$ 20.6	1.9
Gross profit as a percentage of revenue	43.5%	43.7%			43.9%		

	Years Ended December 31, 2008 vs. 2007				2007 vs. 2006			
	2008	2007	Variance	% Variance	2007	2006	Variance	% Variance
			Favorable/ (Unfavorable)				Favorable/ (Unfavorable)	
<b>Same Store:</b>								
Revenue	\$ 2,450.5	\$ 2,539.7	\$ (89.2)	(3.5)	\$ 2,563.9	\$ 2,532.5	\$ 31.4	1.2
Gross profit	\$ 1,062.8	\$ 1,106.4	\$ (43.6)	(3.9)	\$ 1,116.4	\$ 1,111.7	\$ 4.7	0.4
Gross profit as a percentage of revenue	43.4%	43.6%			43.5%	43.9%		

Parts and service revenue is primarily derived from vehicle repairs paid directly by the customers or via reimbursement from manufacturers and others under warranty programs.

Same store parts and service revenue decreased \$89.2 million or 3.5% during 2008, as compared to 2007, primarily due to a \$30.8 million decrease in revenues associated with the preparation of vehicles for sale, a \$20.9 million decrease in wholesale parts revenue, a \$20.7 million decrease in warranty revenue, an \$11.2 million decrease in revenues from service work outsourced to third-parties, and a \$5.8 million decrease in customer-paid revenues. Additionally, during 2008 we experienced a 1.1% decrease in parts and service revenues and a 1.3% decrease in gross profit related to volume imports and premium luxury vehicles, compared to a 6.3% decrease in revenues and a 7.5% decrease in gross profit related to parts and service for domestic vehicles.

The decrease in revenues associated with the preparation of vehicles for sale was primarily due to lower new and used vehicle unit sales volume. Wholesale parts sales decreased in 2008 due to the difficult market conditions. Warranty declines were driven in part by improved quality of vehicles manufactured in recent years, as well as changes to certain manufacturers' warranty and prepaid service programs and lower vehicle sales volume. Customer-paid business growth was constrained by economic pressures on consumer spending. We expect that the automotive retail market will remain challenging and that adverse market conditions will continue into 2009.

Same store parts and service revenue increased \$31.4 million or 1.2% during 2007, as compared to 2006, primarily due to a \$39.3 million increase in customer-paid revenue for parts and service, a \$19.1 million increase in wholesale parts revenue, and smaller increases in other parts and service revenues, such as service work outsourced to third-parties and retail parts sales. Partially offsetting these increases was a \$27.4 million decrease in warranty revenue and a \$7.7 million decrease in revenues associated with the preparation of vehicles for sales. Warranty declines were driven in part by improved quality of vehicles manufactured in recent years, as well as changes to certain manufacturers' warranty and prepaid service programs and lower vehicles sales volume. The improvements to customer-paid business are attributable to our service drive process, maintenance menu, and service marketing program, as well as our pricing models and training programs. Additionally, during 2007 we experienced a 3.4% increase in parts and service revenues and a 2.7% increase in gross profit related to volume imports and premium luxury vehicles, compared to a 1.1% decrease in revenues and a 2.4% decrease in gross profit related to parts and service for domestic vehicles.

**Finance and Insurance**

(\$ in millions, except per vehicle data)	Years Ended December 31, 2008 vs. 2007				2007 vs. 2006			
	2008	2007	Variance Favorable/ (Unfavorable)	% Variance	2006	Variance Favorable/ (Unfavorable)	% Variance	
<b>Reported:</b>								
Revenue and gross profit	\$ 482.6	\$ 584.3	\$ (101.7)	(17.4)	\$ 611.0	\$ (26.7)	(4.4)	
Gross profit per vehicle retailed	\$ 1,104	\$ 1,115	\$ (11)	(1.0)	\$ 1,075	\$ 40	3.7	

	Years Ended December 31, 2008 vs. 2007				2007 vs. 2006			
	2008	2007	Variance Favorable/ (Unfavorable)	% Variance	2007	2006	Variance Favorable/ (Unfavorable)	% Variance
<b>Same Store:</b>								
Revenue and gross profit	\$ 479.7	\$ 584.3	\$ (104.6)	(17.9)	\$ 596.5	\$ 624.6	\$ (28.1)	(4.5)
Gross profit per vehicle retailed	\$ 1,103	\$ 1,115	\$ (12)	(1.1)	\$ 1,119	\$ 1,073	\$ 46	4.3

Same store finance and insurance revenue and gross profit decreased \$104.6 million or 17.9% during 2008, as compared to 2007, primarily due to lower new and used sales volumes. We expect that the automotive retail market will remain challenging and that adverse market conditions will continue into 2009.

Same store finance and insurance revenue and gross profit per vehicle retailed decreased 1.1% during 2008, as compared to 2007, due primarily to the current unfavorable economic conditions in the United States, including increased tightening in the automotive retail credit market, partially offset by an increase in finance and insurance products sold per customer.

Finance and insurance revenue and gross profit during 2008 was negatively impacted by an increase in the rate of chargebacks as a percentage of finance and insurance revenue and gross profit. See Critical Accounting Estimates above and Note 20 of the Notes to Consolidated Financial Statements for a discussion regarding chargeback liabilities.

Same store finance and insurance revenue and gross profit decreased \$28.1 million or 4.5% during 2007, as compared to 2006, due to lower new and used sales volumes partially offset by an increase in finance and insurance revenue and gross profit per vehicle retailed. Increased same store finance and insurance revenue and gross profit per vehicle retailed was driven by an increase in finance and insurance products sold per customer and our continued emphasis on training and certification of store associates, particularly in third and fourth quartile stores, and on maximizing our preferred lender relationships. Same store finance and insurance revenue and gross profit per vehicle retailed was impacted by a decrease in retrospective commissions received on extended service contracts of \$1.4 million in 2007.

## Segment Results

As discussed in Note 21 of the Notes to Consolidated Financial Statements, we made changes to our management approach that divided our business into three operating segments: (1) Domestic, (2) Import, and (3) Premium Luxury. This realignment had no effect on our previously reported consolidated results of operations, financial position, or cash flows. In connection with this change, we have reclassified historical amounts to conform to our current segment presentation.

Our Domestic segment is comprised of retail automotive franchises that sell new vehicles manufactured by General Motors, Ford, and Chrysler. Our Import segment is comprised of retail automotive franchises that sell new vehicles manufactured primarily by Toyota, Honda, and Nissan. Our Premium Luxury segment is comprised of retail automotive franchises that sell new vehicles manufactured primarily by Mercedes, BMW, and Lexus. The franchises in each segment also sell used vehicles, parts and automotive services, and automotive finance and insurance products.

Corporate and other is comprised of our other businesses, including collision centers, E-commerce activities, and auction operations, as well as unallocated corporate overhead expenses.

In the following table of financial data, total Segment Income (Loss) of the operating segments is reconciled to consolidated operating income (loss).

(\$ in millions)	Years Ended December 31,				Variance		
	2008	2007	Variance Favorable/ (Unfavorable)	% Variance	2006	Variance Favorable/ (Unfavorable)	% Variance
<b>Revenue</b>

Operating income (loss)	\$ (1,294.8)	\$ 701.4	\$ (1,996.2)		\$ 782.9	\$ (81.5)	

\* Segment income (loss) is defined as operating income (loss) less floorplan interest expense

Retail new vehicle unit sales:							
Domestic	80,153	113,549	(33,396)	(29.4)	137,062	(23,513.0)	(17.2)
Import	135,464	161,232	(25,768)	(16.0)	169,922	(8,690.0)	(5.1)
Premium Luxury	40,226	48,068	(7,842)	(16.3)	47,954	114.0	0.2
	255,843	322,849	(67,006)	(20.8)	354,938	(32,089)	(9.0)

**Domestic**

The Domestic segment operating results included the following:

(\$ in millions)	Years Ended December 31,				Variance		
	2008	2007	Variance Favorable/ (Unfavorable)	% Variance	2006	Variance Favorable/ (Unfavorable)	% Variance
Revenue	\$ 4,927.2	\$ 6,562.9	\$ (1,635.7)	(24.9)	\$ 7,310.3	\$ (747.4)	(10.2)
Segment income	\$ 107.1	\$ 204.5	\$ (97.4)	(47.6)	\$ 225.1	\$ (20.6)	(9.2)
Retail new vehicle unit sales	80,153	113,549	(33,396)	(29.4)	137,062	(23,513)	(17.2)

Domestic revenue decreased \$1.6 billion or 24.9% during 2008, as compared to 2007, primarily due to lower vehicle sales. The decrease in volume was more pronounced in the Domestic segment, as compared to the Import and Premium Luxury segments. As a result, the decline in revenues in the Domestic segment was much greater than the decline in the revenues of our other segments. Our Domestic stores derive a greater proportion of their revenue and earnings from sales of trucks and sport-utility vehicles, and, as a result of significantly higher fuel prices during most of 2008, particularly in the third quarter, demand shifted away from those types of vehicles to smaller, more fuel-efficient cars. Additionally, a reduction in the availability of favorable customer financing from the finance captives of domestic manufacturers, including the discontinuation or limitation of certain lease programs for domestic vehicles, contributed to the decline in sales volume from our Domestic stores. The decline in Domestic parts and service business was also greater in comparison to Import and Premium Luxury due to the improved quality of domestic vehicles, fewer units in operation, and lower domestic vehicle sales volume.

Domestic segment income decreased \$97.4 million or 47.6% during 2008, as compared to 2007, primarily due to decreased revenues and increased pricing pressure as a result of the competitive retail environment. Additionally, the disproportionate decline in revenues in the Domestic segment as compared to our other segments resulted in a much more significant deleveraging of the Domestic segment's cost structure, as costs and expenses could not be reduced in proportion to the reduction in revenues.

Domestic revenue decreased \$747.4 million or 10.2% during 2007, as compared to 2006, primarily due to lower vehicle sales. Domestic segment income decreased \$20.6 million or 9.2% during 2007, as compared to 2006, primarily due to decreased revenues and increased pricing pressure as a result of the competitive retail environment.

**Import**

The Import segment operating results included the following:

	Years Ended December 31,				Variance		
	2008	2007	Variance Favorable/ (Unfavorable)	% Variance	2006	Variance Favorable/ (Unfavorable)	% Variance

## (\$ in millions)

Revenue	\$ 5,449.9	\$ 6,397.9	\$ (948.0)	(14.8)	\$ 6,577.3	\$ (179.4)	(2.7)
Segment income	\$ 187.9	\$ 250.0	\$ (62.1)	(24.8)	\$ 252.5	\$ (2.5)	(1.0)
Retail new vehicle unit sales	135,464	161,232	(25,768)	(16.0)	169,922	(8,690)	(5.1)

Import revenue decreased \$948.0 million or 14.8% during 2008, as compared to 2007, primarily due to lower vehicle sales. Sales volume decreases in the Import segment were partially mitigated by the shift in demand toward more fuel-efficient vehicles, from which our Import stores derive a greater proportion of their business, as compared to our Domestic and Premium Luxury stores. Import segment income decreased \$62.1 million or 24.8% during 2008, as compared to 2007, due to decreased revenues and increased pricing pressure as a result of the competitive retail environment.

Import revenue decreased \$179.4 million or 2.7% during 2007, as compared to 2006, primarily due to lower vehicle sales. Import segment income decreased \$2.5 million or 1.0% during 2007, as compared to 2006, due to decreased revenues and increased pricing pressure as a result of the competitive retail environment.

### Premium Luxury

The Premium Luxury segment operating results included the following:

	Years Ended December 31,						
	2008	2007	Variance Favorable/ (Unfavorable)	% Variance	2006	Variance Favorable/ (Unfavorable)	% Variance
(\$ in millions)							
Revenue	\$ 3,645.2	\$ 4,272.8	\$ (627.6)	(14.7)	\$ 4,173.5	\$ 99.3	2.4
Segment income	\$ 184.2	\$ 226.2	\$ (42.0)	(18.6)	\$ 231.0	\$ (4.8)	(2.1)
Retail new vehicle unit sales	40,226	48,068	(7,842)	(16.3)	47,954	114	0.2

Premium Luxury revenue decreased \$627.6 million or 14.7% during 2008, as compared to 2007, primarily due to lower vehicle sales and a decrease in revenue per vehicle retailed. The results for our Premium Luxury segment were adversely affected by a shift in consumer demand toward lower-priced premium luxury vehicles. This shift in demand was caused by the difficult economic conditions, as well as several premium luxury manufacturers launching and promoting lower-priced vehicles during 2008. Premium Luxury segment income decreased \$42.0 million or 18.6% during 2008, as compared to 2007, primarily due to margin compression as a result of the shift in consumer demand toward lower-priced premium luxury vehicles.

Premium Luxury revenue increased \$99.3 million or 2.4% during 2007, as compared to 2006, primarily due to higher vehicle sales and an increase in revenue per vehicle retailed. Premium Luxury segment income decreased \$4.8 million or 2.1% during 2007, as compared to 2006, primarily due to margin compression.

## **Operating Expenses**

### ***Selling, General, and Administrative Expenses***

During 2008, selling, general, and administrative expenses decreased \$186.0 million or 9.3%. As a percentage of total gross profit, selling, general, and administrative expenses increased to 76.2% in 2008 from 71.6% in 2007 resulting from deleveraging of our cost structure due to the decline in vehicles sales, partially offset by our cost savings initiatives discussed in *Market Challenges* above. Selling, general, and administrative expenses decreased in 2008, as compared to 2007, due to a \$120.7 million decrease in compensation expense and a \$44.6 million decrease in gross advertising expenditures, partially offset by a \$5.1 million decrease in advertising reimbursements from manufacturers.

During 2007, selling, general, and administrative expenses decreased \$58.1 million or 2.8%. As a percentage of total gross profit, selling, general, and administrative expenses increased to 71.6% in 2007 from 70.5% in 2006 resulting from deleveraging of our cost structure due to the decline in vehicles sales. Selling, general, and administrative expenses decreased in 2007, as compared to 2006, due to a \$54.2 million decrease in compensation expense and a \$7.3 million decrease in gross advertising expenditures, partially offset by a \$3.3 million decrease in advertising reimbursements from manufacturers.

Compensation expense for 2008 includes a \$5.3 million non-cash stock compensation expense adjustment as discussed in Note 10 of the Notes to Consolidated Financial Statements.

### **Non-Operating Income (Expenses)**

#### ***Floorplan Interest Expense***

Floorplan interest expense was \$87.4 million in 2008, \$129.0 million in 2007, and \$132.5 million in 2006. The decrease in 2008, as compared to 2007, is primarily the result of lower short-term LIBOR interest rates, partially offset by higher average vehicle floorplan balances and the additional floorplan interest expense incurred in connection with the floorplan credit agreements we entered into during the second quarter of 2008 to finance a portion of our used vehicle inventory. The decrease in 2007, as compared to 2006, is primarily the result of lower inventory levels, partially offset by higher short-term LIBOR interest rates during 2007.

#### ***Other Interest Expense***

Other interest expense was incurred primarily on borrowings under our term loan facility, mortgage facility, revolving credit facility, and outstanding senior unsecured notes. Other interest expense was \$89.4 million in 2008, \$114.1 million in 2007, and \$90.8 million in 2006.

The decrease in other interest expense of \$24.7 million in 2008, as compared to 2007, was primarily due to a \$14.4 million decrease in interest expense resulting from lower interest rates on our term loan facility, a \$7.9 million decrease in interest expense related to the repurchase of our floating rate and 7% senior unsecured notes of \$232.9 million, and a \$6.0 million decrease in interest expense resulting from lower levels of debt outstanding during the year associated with our revolving credit facility and 9% senior unsecured notes. These decreases were partially offset by a \$4.5 million increase in interest expense related to higher levels of debt outstanding during the year associated with our mortgage facility.

The increase in other interest expense of \$23.3 million in 2007, as compared to 2006, was primarily due to a \$21.8 million increase in interest expense related to the \$1.15 billion of additional debt incurred in connection with

our April 2006 equity tender offer and a \$6.2 million increase in interest expense related to our revolving credit facility, primarily as a result of increased borrowings in 2007. Partially offsetting these increases was an \$8.7 million reduction in interest expense resulting from the repurchase of our 9% senior unsecured notes and repayments of mortgage facilities. Additionally, during 2007 we incurred \$2.6 million of expenses in connection with the modifications to our term loan, revolving credit facilities, and our mortgage facility.

***Other Interest Expense Senior Note Repurchases***

In April 2006, we repurchased \$309.4 million aggregate principal amount of our 9% senior unsecured notes for an aggregate total consideration of \$339.8 million pursuant to our debt tender offer and consent solicitation. Approximately \$34.5 million of tender premium and other financing costs related to our debt tender offer was expensed as Other Interest Expense Senior Note Repurchases in the accompanying Consolidated Income Statements.

***Gain on Senior Note Repurchases***

During 2008, we repurchased \$105.5 million aggregate principal amount of our floating rate senior unsecured notes due April 15, 2013, and \$127.4 million aggregate principal amount of our 7% senior unsecured notes due April 15, 2014. We recorded a gain of \$51.3 million in connection with these repurchases, net of the write-off of related unamortized debt issuance costs, which is recorded in Gain on Senior Note Repurchases in the accompanying Consolidated Income Statements.

We also committed to repurchase an additional \$11.1 million aggregate principal amount of our 7% senior unsecured notes for which settlement occurred subsequent to December 31, 2008. We have reclassified these amounts from long-term to current debt as of December 31, 2008. We will record a gain in the first quarter of 2009 of \$3.0 million on the repurchase of these notes, net of the write-off of related unamortized debt issuance costs.

***Provision for Income Taxes***

Our effective income tax rate was 13.9% in 2008, 37.3% in 2007, and 38.9% in 2006. The tax rate for 2008 reflects the fact that a significant portion of the impairment charges taken in 2008 was not deductible for income tax purposes. Income taxes are provided based upon our anticipated underlying annual blended federal and state income tax rates, adjusted, as necessary, for any other tax matters occurring during the period. As we operate in various states, our effective tax rate is also dependent upon our geographic revenue mix. We expect our underlying tax rate to be approximately 40% on an ongoing basis, excluding the impact of any potential tax adjustments in the future.

As of December 31, 2008, we had unrecognized tax benefits recorded in accordance with FIN 48. See Note 11 of the Notes to Consolidated Financial Statements for additional discussion.

Our unrecognized tax benefits were reduced by approximately \$35 million (net of tax effect) as a result of the expiration of a statute of limitations in October 2008. We do not expect that our unrecognized tax benefits will significantly increase or decrease during the twelve months beginning January 1, 2009.

During 2007, we recorded net income tax benefits in our provision for income taxes of \$12.0 million related to the resolution of certain tax matters, changes in certain state tax laws, and other adjustments.

During 2006, we made estimated state tax and federal tax payments totaling \$278.3 million, including approximately \$100 million related to provisions for the third and fourth quarter of 2005, payment for which had been deferred as allowed for filers impacted by hurricanes in 2005.

***Discontinued Operations***

Discontinued operations are related to stores that were sold or terminated, that we have entered into an agreement to sell or terminate, or for which we otherwise deem a proposed sales transaction or termination to be probable, with no material changes expected. We had a loss from discontinued operations totaling \$17.7 million in 2008, \$10.0 million in 2007, and \$12.1 million in 2006, net of income taxes. Certain amounts reflected in the accompanying Consolidated

Financial Statements for the years ended December 31, 2008, 2007, and 2006, have been adjusted to classify the results of these stores as discontinued operations.

## **Liquidity and Capital Resources**

We believe that our cash and cash equivalents, funds generated through future operations, and availability of borrowings under our secured floorplan facilities and revolving credit facility will be sufficient to service our debt and fund our working capital requirements, pay our tax obligations and commitments and contingencies, and meet any seasonal operating requirements for the foreseeable future. For information regarding compliance with our covenants, refer to the discussion under the heading **Restrictions and Covenants** below.

At December 31, 2008, we had \$111.0 million of unrestricted cash and cash equivalents. In the ordinary course of business, we are required to post performance and surety bonds, letters of credit, and/or cash deposits as financial guarantees of our performance. At December 31, 2008, surety bonds, letters of credit, and cash deposits totaled \$110.2 million, including \$72.4 million in letters of credit. We do not currently provide cash collateral for outstanding letters of credit.

See the table at the beginning of Note 7 of the Notes to Consolidated Financial Statements for the amounts of our notes payable and long-term debt as of December 31, 2008 and 2007.

### ***Senior Unsecured Notes and Amended Credit Agreement***

In April 2006, we sold \$300.0 million of floating rate senior unsecured notes due April 15, 2013, and \$300.0 million of 7% senior unsecured notes due April 15, 2014, in each case at par. The floating rate senior unsecured notes bear interest at a rate equal to three-month LIBOR plus 2.0% per annum, adjusted quarterly, and may be redeemed by us currently at 103% of principal, on or after April 15, 2009, at 102% of principal, on or after April 15, 2010, at 101% of principal, and on or after April 15, 2011, at 100% of principal. The 7% senior unsecured notes may be redeemed by us on or after April 15, 2009, at 105.25% of principal, on or after April 15, 2010, at 103.5% of principal, on or after April 15, 2011, at 101.75% of principal, and on or after April 15, 2012, at 100% of principal.

In April 2006, we also completed the first amendment to our credit agreement to provide: (1) a \$675.0 million revolving credit facility that provided for various interest rates on borrowings generally at LIBOR plus 0.80%, and (2) a \$600.0 million term loan facility bearing interest at a rate equal to LIBOR plus 1.25%. In December 2006, the borrowing capacity of the revolving credit facility was increased to \$700.0 million under the amended credit agreement.

The proceeds of the senior unsecured notes and term loan facility, together with cash on hand and borrowings of \$80.0 million under the amended revolving credit facility, were used to: (1) purchase 50 million shares of our common stock at \$23 per share for an aggregate purchase price of \$1.15 billion pursuant to our equity tender offer, (2) purchase \$309.4 million aggregate principal of our 9% senior unsecured notes for an aggregate total consideration of \$339.8 million pursuant to our debt tender offer and consent solicitation, and (3) pay related financing costs. Approximately \$34.5 million of tender premium and other financing costs related to our debt tender offer was expensed during 2006.

In July 2007, we completed a second amendment of the credit agreement. Under the terms of the second amendment, the interest rate on the term loan facility decreased from LIBOR plus 1.25% to LIBOR plus 0.875% and the interest rate on the revolving credit facility decreased from LIBOR plus 0.80% to LIBOR plus 0.725%. Additionally, the credit agreement termination date was extended from July 14, 2010, to July 18, 2012, and certain other terms and conditions were modified as a result of this amendment. We incurred \$1.6 million of expenses in connection with this modification during 2007, which are included as a component of Other Interest Expense in the accompanying Consolidated Income Statements.

We have a letter of credit sublimit as part of our revolving credit facility. The amount available to be borrowed under the revolving credit facility is reduced on a dollar-for-dollar basis by the cumulative amount of any outstanding letters of credit, which was \$72.4 million at December 31, 2008.

We had no borrowings outstanding under the revolving credit facility at December 31, 2008, leaving \$627.6 million of borrowing capacity at December 31, 2008. As of December 31, 2008, this borrowing

capacity was limited under the maximum consolidated leverage ratio contained in our amended credit agreement to approximately \$301 million.

During 2008, we repurchased \$105.5 million aggregate principal amount of our floating rate senior unsecured notes due April 15, 2013, for an aggregate total consideration of \$79.8 million. We also repurchased \$127.4 million aggregate principal amount of our 7% senior unsecured notes due April 15, 2014, for an aggregate total consideration of \$102.3 million. We recorded a gain of \$51.3 million in connection with these repurchases, net of the write-off of related unamortized debt issuance costs. This gain is classified as Gain on Senior Note Repurchases in the accompanying Consolidated Income Statements. At December 31, 2008, we had outstanding \$194.5 million of floating rate senior unsecured notes due April 15, 2013, and \$172.6 million of 7% senior unsecured notes due April 15, 2014, in each case at par.

We also committed to repurchase an additional \$11.1 million aggregate principal amount of our 7% senior unsecured notes for which settlement occurred subsequent to December 31, 2008. We have reclassified these amounts from long-term to current debt as of December 31, 2008. We will record a gain in the first quarter of 2009 of \$3.0 million on the repurchase of these notes, net of the write-off of related unamortized debt issuance costs.

The credit spread charged for the revolving credit facility and term loan facility is impacted by our senior unsecured credit ratings from Standard & Poor's (BB+, with negative outlook) and Moody's (Ba2, with negative outlook). For instance, under the current terms of our amended credit agreement, a one-notch downgrade of our senior unsecured credit rating by either Standard & Poor's or Moody's would result in a 25 basis point increase in the credit spread under our term loan facility, a 20 basis point increase in the credit spread under our revolving credit facility, and a 5 basis point increase in the facility fee applicable to our revolving credit facility. Credit ratings could be lowered if new vehicle demand worsens significantly, threatening our earnings and cash flow, or if we increase our financial leverage through acquisitions or share repurchases. The outlook could be revised back to stable if market demand returns in the near term or if we demonstrate our ability to maintain reasonable profitability, cash flow, and leverage measures despite the ongoing revenue pressures.

We may from time to time repurchase additional senior unsecured notes in open market purchases or privately negotiated transactions. Additionally, we may in the future prepay our term loan facility or other debt. The decision to repurchase senior unsecured notes or to prepay our term loan facility or other debt will be based on prevailing market conditions, our liquidity requirements, contractual restrictions, and other factors.

#### ***Other Debt***

On August 1, 2008, we repaid \$14.1 million of 9% senior unsecured notes that matured on that date.

At December 31, 2008, we had \$233.3 million outstanding under a mortgage facility with an automotive manufacturer's captive finance subsidiary. The mortgage facility was refinanced under a new facility in November 2007 to provide a fixed interest rate (5.864%) and provide financing secured by 10-year mortgages on certain of our store properties. In connection with this refinancing, in 2007 we received net proceeds of approximately \$126.4 million and recorded \$1.0 million of expenses, which are included as a component of Other Interest Expense in the accompanying Consolidated Income Statements. Prior to this refinancing, the facility utilized short-term LIBOR-based interest rates, which averaged 6.54% for 2007.

Vehicle floorplan payable-trade totaled \$1.5 billion at December 31, 2008, and \$1.7 billion at December 31, 2007. Vehicle floorplan payable-trade reflects amounts borrowed to finance the purchase of specific vehicle inventories with manufacturers' captive finance subsidiaries. Vehicle floorplan payable-non-trade totaled \$453.5 million at December 31, 2008, and \$440.9 million at December 31, 2007, and represents amounts borrowed to finance the

purchase of specific new and, to a lesser extent, used vehicle inventories with non-trade lenders. All the floorplan facilities are at one-month LIBOR-based rates of interest.

Floorplan facilities are due on demand, but in the case of new vehicle inventories, are generally paid within several business days after the related vehicles are sold. Our manufacturer agreements generally require that the manufacturer have the ability to draft against the new floorplan facilities so the lender directly funds

the manufacturer for the purchase of new vehicle inventory. Floorplan facilities are primarily collateralized by vehicle inventories and related receivables.

### *Share Repurchases and Dividends*

The following table sets forth information regarding our share repurchases over the past three years:

<b>Year Ended December 31:</b>	<b>Shares Repurchased</b>	<b>Aggregate Purchase Price</b>
2008	3.8	\$ 54.1
2007	33.2	\$ 645.7
2006	61.2	\$ 1,380.6

As of December 31, 2008, \$142.7 million remained available for share repurchases under the existing repurchase program approved by our Board of Directors. Future share repurchases are subject to limitations contained in the indenture relating to our floating rate and 7% senior unsecured notes.

The decision to repurchase shares in the future will be based on such factors as the market price of our common stock versus our view of its intrinsic value, the potential impact on our capital structure (including compliance with the financial ratios in our debt agreements), and the expected return on competing uses of capital such as dealership acquisitions, capital investments in our current businesses, or repurchases of our debt. In 2008, in light of the economic conditions, our liquidity and capital resource strategies were focused on generating cash and paying down debt to remain in compliance with the financial covenants in our debt agreements. We expect that in 2009 we will continue to use a substantial portion of our cash to pay down debt. See also *Restrictions and Covenants* below.

We have not declared or paid any cash dividends on our common stock during our two most recent fiscal years. We do not anticipate paying cash dividends for the foreseeable future. The indenture for our floating rate and 7% senior unsecured notes restricts our ability to declare cash dividends. See *Restrictions and Covenants* below.

### *Restrictions and Covenants*

Our amended credit agreement, the indenture for our floating rate and 7% senior unsecured notes, our vehicle floorplan payable facilities, and our mortgage facility contain numerous customary financial and operating covenants that place significant restrictions on us, including our ability to incur additional indebtedness or prepay existing indebtedness, to declare cash dividends, to create liens or other encumbrances, to sell (or otherwise dispose of) assets, and to merge or consolidate with other entities.

For example, under the amended credit agreement, we are required to remain in compliance with a maximum consolidated leverage ratio, as defined (3.0 times through September 30, 2009, after which it will revert to 2.75 times). In March 2008, we amended our credit agreement to provide that non-cash impairment losses associated with goodwill and intangible assets as well as certain other non-cash charges would be excluded from the computation of the maximum consolidated leverage ratio. We are also required to remain in compliance with a maximum capitalization ratio (65%), as defined.

In addition, the indenture for the floating rate and 7% senior unsecured notes contains a debt incurrence restriction based on a minimum fixed charge coverage ratio (2:1), and the mortgage facility contains covenants regarding maximum cash flow leverage and minimum interest coverage.

The indenture for our floating rate and 7% senior unsecured notes restricts our ability to make payments in connection with share repurchases, dividends, debt retirement, investments, and similar matters to a cumulative aggregate amount that is limited to \$500.0 million plus 50% of our cumulative consolidated net income (as defined in the indenture) since April 1, 2006, the net proceeds of stock option exercises, and certain other items, subject to certain exceptions and conditions set forth in the indenture.

Our failure to comply with the covenants contained in our debt agreements could permit acceleration of all of our indebtedness. Our debt agreements have cross-default provisions that trigger a default in the event of an uncured default under other material indebtedness of AutoNation.

During 2008, we recorded impairment charges of \$1.76 billion (\$1.46 billion after-tax) associated with goodwill and franchise rights. See Note 5 of the Notes to Consolidated Financial Statements. Despite these impairment charges, as of December 31, 2008, we were in compliance with the requirements of all applicable financial covenants under our debt agreements. As of December 31, 2008, under our amended credit agreement, our consolidated leverage ratio was approximately 2.45 to 1, as defined in our credit agreement. Our capitalization ratio was adversely impacted by the impairment charges, and as of December 31, 2008, this ratio was approximately 59.7%, as defined in our credit agreement. Both the consolidated leverage ratio and the capitalization ratio limit our ability to incur additional non-vehicle debt. The capitalization ratio also limits our ability to incur additional floorplan indebtedness.

Our liquidity and capital resource strategies are currently focused on generating cash and paying down debt to remain in compliance with the financial covenants in our debt agreements. To the extent that in the future we believe that we will be unable to comply with the covenants in our amended credit agreement, we will seek an amendment or waiver of our amended credit agreement, which could increase the cost of our debt. We may also consider other options, such as raising capital through an equity issuance to pay down debt, which could be dilutive to stockholders. See the risk factor *Our revolving credit facility, term loan facility, mortgage facility, and the indenture relating to our senior unsecured notes contain certain financial ratios and other restrictions on our ability to conduct our business* in Part I, Item 1A, of this Form 10-K.

In the event of a downgrade in our credit ratings, none of the covenants described above would be impacted. In addition, availability under the amended credit agreement described above would not be impacted should a downgrade in the senior unsecured debt credit ratings occur. Certain covenants in the indenture for the floating rate and 7% senior unsecured notes would be eliminated with an upgrade of our senior unsecured notes to investment grade by either Standard & Poor's or Moody's.

### ***Cash Flows***

Cash and cash equivalents increased by \$78.0 million during 2008, and decreased by \$19.7 million during 2007 and \$197.5 million during 2006. The major components of these changes are discussed below.

### ***Cash Flows from Operating Activities***

Net cash provided by operating activities during 2008 was \$685.4 million, as compared to \$207.2 million in 2007, and \$299.5 million in 2006.

Net cash provided by operating activities during 2008 was primarily affected by a change in the classification of borrowings from a floorplan lender, and a reduction in earnings, as further discussed below.

Net cash provided by operating activities during 2008 was affected by a change in the classification of borrowings from a floorplan lender, in connection with the sale of a majority stake in General Motors Acceptance Corporation (GMAC) by General Motors (GM), which was GM's wholly-owned captive finance subsidiary prior to this transaction. As a result of this sale, which occurred on November 30, 2006, we have classified new borrowings from GMAC subsequent to this transaction as vehicle floorplan non-trade, with related changes reflected as financing cash flows. Accordingly, net floorplan borrowings from GMAC subsequent to this transaction are reflected as cash provided by financing activities, while repayments in 2007 of amounts due to GMAC prior to this transaction (totaling \$305.8 million during 2007) are reflected as cash used by operating activities. During 2008, all borrowings and repayments related to GMAC were reflected as financing activities, since the repayment of amounts due to GMAC prior to this transaction were completed during 2007. After considering the effect of this reclassification, net cash provided by operating activities during 2008, compared to 2007, was impacted by an increase in cash provided by changes in working capital, partially offset by a reduction in earnings.

Net cash provided by operating activities during 2007, as compared to 2006, was also impacted by the GMAC reclassification. Net floorplan borrowings from GMAC totaled \$231.5 million during 2007 and were reflected as cash provided by financing activities, while repayments in 2007 of amounts due to GMAC prior to this transaction continued to be reflected as cash used by operating activities. Partially offsetting the GMAC

reclassification was a \$130.4 million reduction in tax payments during 2007, as compared to 2006. A portion of this reduction pertains to estimated federal tax payments totaling approximately \$100 million that we made in 2006, related to estimated taxes for the third and fourth quarter of 2005, payment for which had been deferred as allowed for filers affected by hurricanes in 2005. The reduction in cash provided by operating activities also reflects lower earnings in 2007, as compared to 2006. Additionally, cash provided by operating activities was favorably impacted in 2006 by a \$34.5 million adjustment to net income to reflect tender premium and other financing costs related to our April 2006 debt tender offer as a financing activity.

### ***Cash Flows from Investing Activities***

Cash flows from investing activities consist primarily of cash used in capital additions, activity from business acquisitions, property dispositions, purchases and sales of investments, and other transactions as further described below.

Capital expenditures, including property operating lease buy-outs, were \$117.4 million during 2008, as compared to \$159.7 million in 2007, and \$175.0 million in 2006. We will make facility and infrastructure upgrades and improvements from time to time as we identify projects that are required to maintain our current business or that we expect to provide us with acceptable rates of return. We project that 2009 full year capital expenditures will be approximately \$90 million to \$95 million. Excluding acquisition-related spending, land purchased for future sites, and lease buy-outs, and net of related asset sales, we expect full year 2009 capital expenditures will be approximately \$75 million to \$80 million.

Property operating lease buy-outs were \$20.4 million during 2008, as compared to \$2.3 million in 2007, and \$5.9 million in 2006. We continue to analyze certain higher cost operating leases and evaluate alternatives in order to lower the effective financing costs.

Proceeds from the sale of property and equipment including the disposal of property held for sale were \$3.3 million in 2008, \$12.3 million in 2007, and \$7.8 million in 2006. These amounts are primarily from the sales of stores and other properties held for sale. Cash received from business divestitures, net of cash relinquished, totaled \$49.6 million in 2008, \$55.1 million in 2007, and \$24.0 million in 2006.

Total cash used in business acquisitions, net of cash acquired, was \$32.2 million in 2008, \$6.7 million in 2007, and \$166.7 million in 2006. During 2008, we acquired three automotive retail franchises and other related assets as compared to ten in 2007 and five in 2006. Cash used in business acquisitions included deferred purchase price for certain prior year automotive retail acquisitions of \$0.2 million in 2006. See discussion in Note 15 of the Notes to Consolidated Financial Statements.

### ***Cash Flows from Financing Activities***

Net cash flows from financing activities primarily include treasury stock purchases, stock option exercises, debt activity, and changes in vehicle floorplan payable-non-trade.

We repurchased 3.8 million shares of our common stock for an aggregate purchase price of \$54.1 million during 2008 (average purchase price per share of \$14.37). We repurchased 33.2 million shares of our common stock for an aggregate purchase price of \$645.7 million during 2007 (average purchase price per share of \$19.43), including repurchases for which settlement occurred subsequent to December 31, 2007.

During 2008, proceeds from the exercise of stock options were \$1.0 million (average exercise price per share of \$10.71), as compared to \$96.6 million in 2007 (average exercise price per share of \$14.12), and \$75.7 million in 2006

(average exercise price per share of \$13.24).

During 2008, we repurchased \$105.5 million aggregate principal amount of our floating rate senior unsecured notes for an aggregate total consideration of \$79.8 million (including \$0.8 million of accrued interest) and \$127.4 million aggregate principal amount of our 7% senior unsecured notes for an aggregate total consideration of \$102.3 million (including \$2.5 million of accrued interest).

We repaid \$14.1 million of our 9% senior unsecured notes that matured on August 1, 2008.

We repaid \$6.4 million during 2008, \$4.0 million in 2007, and \$37.7 million in 2006 of amounts outstanding under our mortgage facilities.

During 2008, we borrowed \$531.0 million and repaid \$791.0 million outstanding under our revolving credit facility, for net repayments of \$260.0 million. During 2007, we borrowed \$1.32 billion and repaid \$1.26 billion outstanding under our revolving credit facility, for net borrowings of \$65.0 million. During 2006, we borrowed \$1.04 billion and repaid \$844.0 million outstanding under our revolving credit facility, for net borrowings of \$195.0 million.

Cash flows from financing activities include changes in vehicle floorplan payable-non-trade (vehicle floorplan payables with lenders other than the automotive manufacturers captive finance subsidiaries for that franchise) totaling net proceeds of \$3.3 million during 2008, net proceeds of \$211.5 million during 2007, and net proceeds of \$84.7 million during 2006. As discussed above, the repayment of \$305.8 million of amounts due to GMAC prior to the sale by GM of a majority interest in GMAC were reflected as cash used by operating activities during 2007, while all repayments to GMAC were reflected as cash used by financing activities during 2008. Proceeds received and repayments made under the floorplan credit agreements we entered into during the second quarter of 2008 to finance a portion of our used vehicle inventory were reflected as cash provided by (used in) financing activities during 2008.

In April 2006, we sold \$300.0 million of floating rate senior unsecured notes due April 15, 2013, and \$300.0 million of 7% senior unsecured notes due April 15, 2014, in each case at par. In connection with the issuance of the April 2006 senior unsecured notes, we amended our existing credit agreement to provide: (1) a \$675.0 million revolving credit facility for which we had no borrowings outstanding as of December 31, 2008, and (2) a \$600.0 million term loan facility. In December 2006, the borrowing capacity of the revolving credit facility increased to \$700.0 million under the amended credit agreement.

The proceeds of the senior unsecured notes issued in April 2006 and term loan facility, together with cash on hand and borrowings of \$80.0 million under the amended revolving credit facility, were used to: (1) purchase 50 million shares of our common stock at \$23 per share for an aggregate purchase price of \$1.15 billion pursuant to our equity tender offer, (2) purchase \$309.4 million aggregate principal of our 9% senior unsecured notes for an aggregate total consideration of \$339.8 million (\$334.2 million of principal and tender premium and \$5.6 million of accrued interest) pursuant to our debt tender offer and consent solicitation, and (3) pay related financing costs. During 2006, we expensed \$34.5 million of tender premium (\$24.8 million) and other deferred financing costs (\$9.7 million) related to our debt tender offer.

As discussed above, in April 2006, we purchased 50 million shares of our common stock at \$23 per share for an aggregate purchase price of \$1.15 billion pursuant to our equity tender offer. We repurchased an additional 11.2 million shares of our common stock for a purchase price of \$228.9 million during 2006, for a total of 61.2 million shares repurchased for an aggregate purchase price of \$1.38 billion in 2006.

**Contractual Payment Obligations**

The following table summarizes our payment obligations under certain contracts at December 31, 2008:

(In millions)	Total	Payments Due by Period			More Than 5 Years
		Less Than One Year	1 - 3 Years	3 - 5 Years	
Vehicle floorplan payable (Note 3)*	\$ 1,927.9	\$ 1,927.9	\$	\$	\$
Notes payable and long-term debt (Note 7)*	1,258.9	33.3	50.8	812.1	362.7
Interest payments**	177.8	26.4	50.7	48.7	52.0
Operating lease commitments (Note 8)***	569.3	51.9	93.8	85.8	337.8
Acquisition purchase price commitments	17.5	4.4			13.1
FIN 48 unrecognized tax benefits, net (Note 11)*	9.3		5.4	0.6	3.3
Purchase obligations	168.5	45.5	54.8	47.4	20.8
Total	\$ 4,129.2	\$ 2,089.4	\$ 255.5	\$ 994.6	\$ 789.7

\* See Notes to Consolidated Financial Statements.

\*\* Primarily represents scheduled interest payments on fixed rate senior unsecured notes and mortgage facilities. Estimates of future interest payments for vehicle floorplan payables and other variable rate debt are excluded.

\*\*\* Amounts for operating lease commitments do not include certain operating expenses such as maintenance, insurance, and real estate taxes. In 2008, these charges totaled approximately \$48 million. See Note 8 of the Notes to Consolidated Financial Statements.

In the ordinary course of business, we are required to post performance and surety bonds, letters of credit, and/or cash deposits as financial guarantees of our performance. At December 31, 2008, surety bonds, letters of credit, and cash deposits totaled \$110.2 million, including \$72.4 million letters of credit. We do not currently provide cash collateral for outstanding letters of credit. We have negotiated a letter of credit sub-limit as part of our revolving credit facility. The amount available to be borrowed under this revolving credit facility is reduced on a dollar-for-dollar basis by the cumulative amount of any outstanding letters of credit.

As further discussed in Note 11 of the Notes to Consolidated Financial Statements there are various tax matters where the ultimate resolution may result in us owing additional tax payments.

**Off Balance Sheet Arrangements**

As of December 31, 2008, we did not have any significant off-balance-sheet arrangements, as defined in Item 303(a)(4)(ii) of SEC Regulation S-K.

### **Seasonality**

Our operations generally experience higher volumes of vehicle sales and service in the second and third quarters of each year due in part to consumer buying trends and the introduction of new vehicle models. Also, demand for vehicles and light trucks is generally lower during the winter months than in other seasons, particularly in regions of the United States where stores may be subject to adverse winter conditions. Accordingly, we expect our revenue and operating results generally to be lower in our first and fourth quarters as compared to our second and third quarters. However, revenue may be impacted significantly from quarter to quarter by actual or threatened severe weather events and by other factors unrelated to weather conditions, such as changing economic conditions and automotive manufacturer incentive programs.

### **New Accounting Pronouncements**

See Note 1 of the Notes to our Consolidated Financial Statements.

## Forward-Looking Statements

Our business, financial condition, results of operations, cash flows, and prospects, and the prevailing market price and performance of our common stock, may be adversely affected by a number of factors, including the matters discussed below. Certain statements and information set forth in this Annual Report on Form 10-K, as well as other written or oral statements made from time to time by us or by our authorized officers on our behalf, constitute forward-looking statements within the meaning of the Federal Private Securities Litigation Reform Act of 1995. Words such as anticipates, believes, estimates, expects, intends, may, plans, seeks, projects, will, would, and intended to identify such forward-looking statements. We intend for our forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and we set forth this statement in order to comply with such safe harbor provisions. You should note that our forward-looking statements speak only as of the date of this Annual Report on Form 10-K or when made and we undertake no duty or obligation to update or revise our forward-looking statements, whether as a result of new information, future events, or otherwise. Although we believe that the expectations, plans, intentions, and projections reflected in our forward-looking statements are reasonable, such statements are subject to known and unknown risks, uncertainties, and other factors that may cause our actual results, performance, or achievements to be materially different from any future results, performance, or achievements expressed or implied by the forward-looking statements. The risks, uncertainties, and other factors that our stockholders and prospective investors should consider include, but are not limited to, the following:

The automotive retailing industry is sensitive to changing economic conditions and various other factors. Our business and results of operations are substantially dependent on new vehicle sales levels in the United States and in our particular geographic markets and the level of gross profit margins that we can achieve on our sales of new vehicles, all of which are very difficult to predict.

Our results of operations and financial condition have been and could continue to be adversely affected by the conditions in the credit markets and the declining economic conditions in the United States.

Our revolving credit facility, term loan facility, mortgage facility, and the indenture relating to our senior unsecured notes contain certain financial ratios and other restrictions on our ability to conduct our business.

Our substantial indebtedness could adversely affect our financial condition and operations and prevent us from fulfilling our debt service obligations.

We are dependent upon the success and continued financial viability of the vehicle manufacturers and distributors with which we hold franchises.

Goodwill and other intangible assets comprise a significant portion of our total assets. We must test our intangible assets for impairment at least annually, which could result in a material, non-cash write-down of goodwill or franchise rights and could have a material adverse impact on our results of operations and shareholders' equity.

Our new vehicle sales are impacted by the consumer incentive and marketing programs of vehicle manufacturers.

Natural disasters and adverse weather events can disrupt our business.

We are subject to restrictions imposed by and significant influence from vehicle manufacturers that may adversely impact our business, financial condition, results of operations, cash flows, and prospects, including

our ability to acquire additional stores.

We are subject to numerous legal and administrative proceedings, which, if the outcomes are adverse to us, could materially adversely affect our business, results of operations, financial condition, cash flows, and prospects.

Our operations, including, without limitation, our sales of finance and insurance and vehicle protection products, are subject to extensive governmental laws and regulations. If we are found to be in violation

of or subject to liabilities under any of these laws or regulations, or if new laws or regulations are enacted that adversely affect our operations, our business, operating results, and prospects could suffer.

We are subject to interest rate risk in connection with our floorplan payable, revolving credit facility, term loan facility, and floating rate senior unsecured notes that could have a material adverse effect on our profitability.

Our largest stockholder, as a result of its voting ownership, may have the ability to exert substantial influence over actions to be taken or approved by our stockholders.

**ITEM 7A. *QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK***

Our primary market risk exposure is increasing LIBOR-based interest rates. Interest rate derivatives may be used to hedge a portion of our variable rate debt when appropriate based on market conditions. At December 31, 2008, our fixed rate debt, primarily consisting of amounts outstanding under senior unsecured notes and mortgages, totaled \$465.1 million and had a fair value of \$377.8 million. At December 31, 2007, our fixed rate debt, primarily consisting of amounts outstanding under senior unsecured notes and mortgages, totaled \$595.2 million and had a fair value of \$578.9 million.

**Interest Rate Risk**

We had \$1.9 billion of variable rate vehicle floorplan payables at December 31, 2008, and \$2.1 billion at December 31, 2007. Based on these amounts, a 100 basis point change in interest rates would result in an approximate change of \$19.3 million in 2008 and \$21.2 million in 2007 to our annual floorplan interest expense. Our exposure to changes in interest rates with respect to total vehicle floorplan payable is partially mitigated by manufacturers floorplan assistance, which in some cases is based on variable interest rates.

We had \$0.8 billion of other variable rate debt outstanding at December 31, 2008, and \$1.2 billion at December 31, 2007. Based on the amounts outstanding at year-end, a 100 basis point change in interest rates would result in an approximate change to interest expense of \$7.9 million in 2008 and \$11.8 million in 2007.

**Report of Independent Registered Public Accounting Firm**

The Board of Directors and Shareholders  
AutoNation, Inc.:

We have audited the accompanying consolidated financial statements of AutoNation, Inc. and subsidiaries as listed in the Index at Item 8. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of AutoNation, Inc. and subsidiaries as of December 31, 2008 and 2007, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2008, in conformity with U.S. generally accepted accounting principles.

As discussed in Note 11 to the consolidated financial statements, effective January 1, 2007, the Company adopted Financial Accounting Standards Board Interpretation No. 48, Accounting for Uncertainty in Income Taxes and an Interpretation of FASB Statement No. 109.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), AutoNation, Inc.'s internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 16, 2009 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

**Report of Independent Registered Public Accounting Firm**

The Board of Directors and Shareholders  
AutoNation, Inc.:

We have audited AutoNation, Inc. and subsidiaries (the Company) internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). AutoNation, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting, appearing under Item 9A. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements of the Company as listed in the Index at Item 8, and our report dated February 16, 2009 expressed an unqualified opinion on those consolidated financial statements.

**AUTONATION, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**(All tables in millions, except per share data)**

**1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

***Organization and Business***

AutoNation, Inc., through its subsidiaries, is the largest automotive retailer in the United States. As of December 31, 2008, we owned and operated 302 new vehicle franchises from 232 stores located in major metropolitan markets, predominantly in the Sunbelt region of the United States. We offer a diversified range of automotive products and services, including new vehicles, used vehicles, parts and automotive repair and maintenance services, and automotive finance and insurance products. We also arrange financing for vehicle purchases through third-party finance sources. For convenience, the terms AutoNation, Company, and we are used to refer collectively to AutoNation, Inc. and its subsidiaries, unless otherwise required by the context. Our dealership operations are conducted by our subsidiaries.

***Basis of Presentation***

The accompanying Consolidated Financial Statements include the accounts of AutoNation, Inc. and its subsidiaries. All of our automotive dealership subsidiaries are indirectly wholly owned by the parent company, AutoNation, Inc. All significant intercompany accounts and transactions have been eliminated in the consolidation.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. In preparing these financial statements, management has made its best estimates and judgments of certain amounts included in the financial statements, giving due consideration to materiality. We base our estimates and judgments on historical experience and other assumptions that we believe are reasonable. However, application of these accounting policies involves the exercise of judgment and use of assumptions as to future uncertainties and, as a result, actual results could differ materially from these estimates. We periodically evaluate estimates and assumptions used in the preparation of the financial statements and make changes on a prospective basis when adjustments are necessary. Significant estimates made by AutoNation in the accompanying Consolidated Financial Statements include certain assumptions related to goodwill, intangible, and long-lived assets, allowances for doubtful accounts, accruals for chargebacks against revenue recognized from the sale of finance and insurance products, accruals related to self-insurance programs, certain legal proceedings, estimated tax liabilities, estimated losses from disposals of discontinued operations, and certain assumptions related to stock-based compensation.

Certain reclassifications of amounts previously reported have been made to the accompanying Consolidated Financial Statements in order to maintain consistency and comparability between periods presented.

In addition, we changed our operating segment structure in the third quarter of 2008. See Note 21 of the Notes to Consolidated Financial Statements for more information.

***Cash and Cash Equivalents***

We consider all highly liquid investments with a maturity of three months or less as of the date of purchase to be cash equivalents unless the investments are legally or contractually restricted for more than three months.

**AUTONATION, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

***Inventory***

Inventory consists primarily of new and used vehicles held for sale, valued at the lower of cost or market using the specific identification method. Cost includes acquisition, reconditioning, dealer installed accessories, and transportation expenses. Parts and accessories are valued at the lower of cost (first-in, first-out) or market.

***Investments***

Investments in marketable securities are included in Other Assets in the accompanying Consolidated Balance Sheets and relate to our self-insurance programs. Restricted investments, included in Other Assets, consist primarily of marketable corporate and government debt securities. Marketable securities include investments in debt and equity securities and are primarily classified as available-for-sale. Investments in debt securities include investment grade corporate bonds, government securities, and other instruments with maturities ranging from 2009 to 2036. Marketable securities are stated at fair value with unrealized gains and losses included in Accumulated Other Comprehensive Income (Loss) in our Consolidated Balance Sheets. Other-than-temporary declines in investment values are recorded as a component of Other Expenses (Income), Net in the Consolidated Income Statements. Fair value is estimated based on quoted market prices.

***Property and Equipment, net***

Property and equipment are recorded at cost less accumulated depreciation. Expenditures for major additions and improvements are capitalized, while minor replacements, maintenance, and repairs are charged to expense as incurred. When property is retired or otherwise disposed of, the cost and accumulated depreciation are removed from the accounts and any resulting gain or loss is reflected in Other Expenses (Income), Net in the Consolidated Income Statements.

Depreciation is provided over the estimated useful lives of the assets involved using the straight-line method. Leasehold improvements are amortized over the estimated useful life of the asset or the respective lease term used in determining lease classification, whichever is shorter. The estimated useful lives are: five to forty years for buildings and improvements and three to ten years for furniture, fixtures, and equipment.

We continually evaluate property and equipment, including leasehold improvements, to determine whether events and circumstances have occurred that may warrant revision of the estimated useful life or whether the remaining balance should be evaluated for possible impairment. We use an estimate of the related undiscounted cash flows over the remaining life of the property and equipment in assessing whether an asset has been impaired. We measure impairment losses based upon the amount by which the carrying amount of the asset exceeds the fair value. Fair values generally are estimated using prices for similar assets and/or discounted cash flows.

During 2008, we recorded \$7.2 million of non-cash impairment charges related to our property and equipment, including property held for sale, to reduce the carrying value of these assets to fair market value. These charges are recorded as a component of Other Expenses (Income), Net in the Consolidated Income Statements.

We identify property and equipment as held for sale when they meet the criteria of Statement of Financial Accounting Standards ( SFAS ) No. 144, *Accounting for Impairment or Disposal of Long-Lived Assets*. We reclassify held for sale

assets to Other Current Assets and cease recording depreciation. Property held for sale is reported in the Corporate and other category of our segment information in Note 21 of the Notes to Consolidated Financial Statements. We had property held for sale of \$39.5 million at December 31, 2008, and \$10.9 million at December 31, 2007.

***Goodwill and Other Intangible Assets, net***

We account for acquisitions using the purchase method of accounting. Goodwill consists of the cost of acquired businesses in excess of the fair value of the net assets acquired. Additionally, other intangible assets are

**AUTONATION, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

separately recognized if the benefit of the intangible asset is obtained through contractual or other legal rights, or if the intangible asset can be sold, transferred, licensed, rented, or exchanged, regardless of our intent to do so.

Our principal identifiable intangible assets are rights under franchise agreements with vehicle manufacturers. We generally expect our franchise agreements to survive for the foreseeable future and, when the agreements do not have indefinite terms, anticipate routine renewals of the agreements without substantial cost. The contractual terms of our franchise agreements provide for various durations, ranging from one year to no expiration date, and in certain cases, manufacturers have undertaken to renew such franchises upon expiration so long as the dealership is in compliance with the terms of the agreement. However, in general, the states in which we operate have automotive dealership franchise laws that provide that, notwithstanding the terms of any franchise agreement, it is unlawful for a manufacturer to terminate or not renew a franchise unless good cause exists. It is generally difficult for a manufacturer to terminate, or not renew, a franchise under these franchise laws, which were designed to protect dealers. In addition, in our experience and historically in the automotive retail industry, dealership franchise agreements are rarely involuntarily terminated or not renewed by the manufacturer. Accordingly, we believe that our franchise agreements will contribute to cash flows for the foreseeable future and have indefinite lives. Other intangibles are amortized using a straight-line method over their useful lives, generally ranging from three to sixteen years.

Goodwill and franchise rights assets are tested for impairment annually or more frequently when events or circumstances indicate that impairment may have occurred. During 2008, we changed our annual impairment test date from June 30 to April 30, as this date provides additional time to complete the impairment testing and report the results of those tests in our June 30 Quarterly Report on Form 10-Q.

During 2008, we recorded impairment charges of \$1.76 billion (\$1.46 billion after-tax) associated with goodwill and franchise rights. See Note 5 of the Notes to Consolidated Financial Statements for more information.

***Other Assets***

Other assets consist of various items, including, among other items, service loaner and rental vehicle inventory, net, investments in marketable securities, the cash surrender value of corporate-owned life insurance held in a Rabbi Trust for deferred compensation plan participants, notes receivable, restricted assets, and debt issuance costs. Debt issuance costs are amortized to Other Interest Expense in the accompanying Consolidated Income Statements using the effective interest method through maturity.

***Other Current Liabilities***

Other current liabilities consist of various items payable within one year including, among other items, accruals for payroll and benefits, sales taxes, finance and insurance chargeback liabilities, deferred revenue, accrued expenses, and customer deposits. Other current liabilities also include other tax accruals, totaling \$2.0 million at December 31, 2008, and \$72.2 million at December 31, 2007. See Note 11 of the Notes to Consolidated Financial Statements for additional discussion of income taxes.

***Employee Savings Plan***

We offer a 401(k) plan to all of our employees and provided a matching contribution to certain employees that participated of \$4.5 million in 2008, \$5.1 million in 2007, and \$5.3 million in 2006.

In 2005, we established a deferred compensation plan (the Plan ) to provide certain employees with the opportunity to accumulate assets for retirement on a tax-deferred basis commencing in 2006. Participants in the Plan are allowed to defer a portion of their compensation and are 100% vested in their respective deferrals and earnings. Participants may choose from a variety of investment options, which determine their earnings credits. We provided a matching contribution to participants in the Plan of \$2.3 million in 2008, \$2.6 million

**AUTONATION, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

in 2007, and \$2.5 million in 2006. We may also make discretionary contributions. Matching contributions vest over two years from the effective date of the employer's matching contribution, and discretionary contributions vest three years after the effective date of the discretionary contribution. Certain participants in the Plan are not eligible for matching contributions to our 401(k) plan. The balances due to participants in the Plan were \$22.1 million as of December 31, 2008, and \$23.2 million as of December 31, 2007, and are included in Other Liabilities in the accompanying Consolidated Balance Sheets.

Effective January 1, 2009, we suspended matching contributions on both the 401(k) plan and the deferred compensation plan in light of the current economic conditions.

***Stock-Based Compensation***

Stock options granted under all plans are non-qualified. Upon exercise, shares of common stock are issued from our treasury stock. Generally, employee stock options granted in 2008 and prior years have a term of 10 years from the date of grant and vest in increments of 25% per year over a four-year period on the anniversary of the grant date. Stock options granted to non-employee directors have a term of 10 years from the date of grant and vest immediately upon grant.

We use the Black-Scholes valuation model to determine compensation expense and amortize compensation expense over the requisite service period of the grants on a straight-line basis.

***Derivative Financial Instruments***

We recognize all derivative instruments on the balance sheet at fair value. The related gains or losses on these transactions are deferred in stockholders' equity as a component of Accumulated Other Comprehensive Income (Loss). These deferred gains and losses are recognized in income or expense in the period in which the related items being hedged are recognized in expense. However, to the extent that the change in value of a derivative contract does not perfectly offset the change in the value of the items being hedged, that ineffective portion is immediately recognized in income. We recognize gains or losses when the underlying transaction settles.

During 2006, we had \$800.0 million of interest rate hedge instruments (cash flow hedges) mature, consisting of \$200.0 million in swaps, which effectively locked in a LIBOR-based rate of 3.0%, and \$600.0 million in collars that capped floating rates to a maximum LIBOR-based rate no greater than 2.4%. We held no derivative contracts as of December 31, 2008 and 2007.

***Revenue Recognition***

Revenue consists of the sales of new and used vehicles, commissions from related finance and insurance products, sales of parts and services, and sales of other products. We recognize revenue (which excludes sales taxes) in the period in which products are sold or services are provided. We also provide automotive services, such as customer-paid repairs and maintenance, as well as repairs and maintenance under manufacturer warranties and extended service contracts. We recognize revenue for these services as they are provided. We recognize vehicle and finance and insurance revenue when a sales contract has been executed, the vehicle has been delivered, and payment has been received or financing has been arranged. Rebates, holdbacks, floorplan assistance, and certain other dealer

credits received directly from manufacturers are recorded as a reduction of the cost of the vehicle and recognized into income upon the sale of the vehicle or when earned under a specific manufacturer program, whichever is later.

Revenue on finance and insurance products represents commissions earned by us for: (i) loans and leases placed with financial institutions in connection with customer vehicle purchases financed and (ii) vehicle protection products sold.

We sell and receive a commission, which is recognized upon sale, on the following types of products: extended service contracts, maintenance programs, guaranteed auto protection (known as GAP, this

**AUTONATION, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

protection covers the shortfall between a customer's loan balance and insurance payoff in the event of a casualty), tire and wheel protection, and theft protection products. The products we offer include products that are sold and administered by independent third parties, including the vehicle manufacturers' captive finance subsidiaries. Pursuant to our arrangements with these third-party providers, we primarily sell the products on a straight commission basis; however, we may sell the product, recognize commission, and participate in future profit pursuant to retrospective commission arrangements, which are recognized as earned. Certain commissions earned from the sales of finance, insurance, and other protection products are subject to chargebacks should the contracts be terminated prior to their expirations. An estimated liability for chargebacks against revenue recognized from sales of finance and insurance products is recorded in the period in which the related revenue is recognized. Our estimated liability for chargebacks is based primarily on our historical chargeback experience, and is influenced by increases or decreases in early termination rates resulting from cancellation of vehicle protection products, defaults, refinancings and payoffs before maturity, and other factors. Chargeback liabilities were \$61.0 million at December 31, 2008, and \$62.5 million at December 31, 2007. See Note 20 of the Notes to Consolidated Financial Statements for a discussion regarding chargeback liabilities.

***Insurance***

Under our self-insurance programs, we retain various levels of aggregate loss limits, per claim deductibles, and claims-handling expenses as part of our various insurance programs, including property and casualty, employee medical benefits, automobile, and workers' compensation. Costs in excess of this retained risk per claim may be insured under various contracts with third party insurance carriers. We review our claim and loss history on a periodic basis to assist in assessing our future liability. The ultimate costs of these retained insurance risks are estimated by management and by third-party actuarial evaluation of historical claims experience, adjusted for current trends and changes in claims-handling procedures.

***Advertising***

We expense the cost of advertising as incurred or when such advertising initially takes place, net of earned manufacturer credits and other discounts. Manufacturer advertising credits are earned in accordance with the respective manufacturers' programs, which is typically after we have incurred the corresponding advertising expenses. Advertising expense, net of allowances, was \$167.0 million in 2008, \$206.6 million in 2007, and \$210.5 million in 2006. Advertising allowances from manufacturers were \$22.1 million in 2008, \$27.2 million in 2007, and \$30.5 million in 2006.

***Income Taxes***

We file a consolidated federal income tax return. Deferred income taxes have been provided for temporary differences between the recognition of revenue and expenses for financial and income tax reporting purposes and between the tax basis of assets and liabilities and their reported amounts in the financial statements.

***Earnings (Loss) Per Share***

Basic earnings (loss) per share are computed by dividing net income (loss) by the weighted-average number of common shares outstanding during the period. Diluted earnings (loss) per share are computed by dividing net income

(loss) by the weighted average number of common shares outstanding adjusted for the dilutive effective of stock options, restricted stock, and other dilutive securities.

**AUTONATION, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

*New Accounting Pronouncements*

In December 2007, the Financial Accounting Standards Board ( FASB ) issued SFAS No. 141 (revised 2007), *Business Combinations* ( SFAS No. 141R ). SFAS No. 141R is a revision to SFAS No. 141 and includes substantial changes to the acquisition method used to account for business combinations (formerly the purchase accounting method), including broadening the definition of a business, as well as revisions to accounting methods for contingent consideration and other contingencies related to the acquired business, accounting for transaction costs, and accounting for adjustments to provisional amounts recorded in connection with acquisitions. SFAS No. 141R retains the fundamental requirement of SFAS No. 141 that the acquisition method of accounting be used for all business combinations and for an acquirer to be identified for each business combination. SFAS No. 141R will be applied prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. We do not anticipate that the adoption of SFAS No. 141R will have a material impact on our consolidated financial statements, absent any material business combinations.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115* ( SFAS No. 159 ). SFAS No. 159 permits entities to choose to measure certain financial assets and liabilities at fair value. Unrealized gains and losses, arising subsequent to adoption, are reported in earnings. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. We adopted SFAS No. 159 effective January 1, 2008, and have elected not to measure any of our current eligible financial assets or liabilities at fair value upon adoption.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* ( SFAS No. 157 ). SFAS No. 157 defines fair value and applies to other accounting pronouncements that require or permit fair value measurements and expands disclosures about fair value measurements. SFAS No. 157 was effective for financial assets and liabilities in fiscal years beginning after November 15, 2007. In February 2008, the FASB amended SFAS No. 157 by issuing FASB Staff Position ( FSP ) FAS 157-1, *Application of FASB Statement No. 157 to FASB Statement No. 13 and Other Accounting Pronouncements That Address Fair Value Measurements for Purposes of Lease Classification or Measurement under Statement 13*, which states that SFAS No. 157 does not address fair value measurements for purposes of lease classification or measurement. FSP FAS 157-1 does not apply to assets acquired and liabilities assumed in a business combination that are required to be measured at fair value under SFAS No. 141 or SFAS No. 141R, regardless of whether those assets and liabilities are related to leases. In February 2008, the FASB also issued FSP FAS 157-2, *Effective Date of FASB Statement No. 157*, which delayed the effective date of SFAS No. 157 to fiscal years beginning after November 15, 2008, for nonfinancial assets and liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis. In October 2008, the FASB also issued FSP FAS 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active*, which clarifies the application of SFAS No. 157 in a market that is not active.

Our adoption of the provisions of SFAS No. 157 on January 1, 2008, with respect to financial assets and liabilities measured at fair value, did not have a material impact on our fair value measurements or our financial statements for the year ended December 31, 2008. In accordance with FSP FAS 157-2, we are currently evaluating the potential impact of applying the provisions of SFAS No. 157 to our nonfinancial assets and liabilities beginning in 2009, including (but not limited to) the valuation of our reporting units for the purpose of assessing goodwill impairment, the valuation of our franchise rights when assessing franchise impairments, the valuation of property and equipment when assessing long-lived asset impairment, and the valuation of assets acquired and liabilities assumed in business

combinations.

**AUTONATION, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****2. RECEIVABLES, NET**

The components of receivables, net of allowance for doubtful accounts, at December 31 are as follows:

	<b>2008</b>	<b>2007</b>
Trade receivables	\$ 98.1	\$ 118.3
Manufacturer receivables	110.0	137.4
Other	23.8	54.3
	231.9	310.0
Less: Allowances	(6.2)	(6.4)
	225.7	303.6
Contracts-in-transit and vehicle receivables	149.2	377.4
Income tax refundable (See Note 11)	12.5	21.9
Receivables, net	\$ 387.4	\$ 702.9

Contracts-in-transit and vehicle receivables represent receivables from financial institutions for the portion of the vehicle sales price financed by our customers.

**3. INVENTORY AND VEHICLE FLOORPLAN PAYABLE**

The components of inventory at December 31 are as follows:

	<b>2008</b>	<b>2007</b>
New vehicles	\$ 1,591.9	\$ 1,806.1
Used vehicles	149.6	305.2
Parts, accessories, and other	134.5	146.8
	\$ 1,876.0	\$ 2,258.1

The components of vehicle floorplan payables at December 31 are as follows:

	<b>2008</b>	<b>2007</b>
Vehicle floorplan payable - trade	\$ 1,474.4	\$ 1,682.1

Vehicle floorplan payable	non-trade	453.5	440.9
		\$ 1,927.9	\$ 2,123.0

Vehicle floorplan payable-trade reflects amounts borrowed to finance the purchase of specific new vehicle inventories with the corresponding manufacturers' captive finance subsidiaries ( "trade lenders" ). Vehicle floorplan payable-non-trade represents amounts borrowed to finance the purchase of specific new and, to a lesser extent, used vehicle inventories with non-trade lenders. Changes in vehicle floorplan payable-trade are reported as operating cash flows and changes in vehicle floorplan payable non-trade are reported as financing cash flows in the accompanying Consolidated Statements of Cash Flows.

During 2008, we entered into separate floorplan credit agreements with various lenders to provide a total of \$230.0 million to finance a portion of our used vehicle inventory, of which \$105.0 million was outstanding at December 31, 2008.

Floorplan facilities are due on demand, but in the case of new vehicle inventories, are generally paid within several business days after the related vehicles are sold. Our manufacturer agreements generally require that the manufacturer have the ability to draft against the new floorplan facilities so the lender directly funds

**AUTONATION, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

the manufacturer for the purchase of new vehicle inventory. Floorplan facilities are primarily collateralized by vehicle inventories and related receivables.

Our vehicle floorplan facilities, which utilize LIBOR-based interest rates, averaged 3.9% during 2008 and 6.3% during 2007. At December 31, 2008, aggregate capacity under the floorplan credit facilities to finance vehicles was approximately \$2.8 billion, of which \$1.9 billion total was outstanding.

**4. PROPERTY AND EQUIPMENT, NET**

A summary of property and equipment, net, at December 31 is as follows:

	<b>2008</b>	<b>2007</b>
Land	\$ 892.8	\$ 882.1
Buildings and improvements	1,201.4	1,171.2
Furniture, fixtures, and equipment	515.6	494.6
	2,609.8	2,547.9
Less: accumulated depreciation and amortization	(672.8)	(592.9)
	\$ 1,937.0	\$ 1,955.0

**5. GOODWILL AND OTHER INTANGIBLE ASSETS, NET**

Goodwill and other intangible assets, net, at December 31 consist of the following:

	<b>2008</b>	<b>2007</b>
Goodwill	\$ 1,149.1	\$ 3,002.9
Less: accumulated amortization		(265.8)
Goodwill, net	\$ 1,149.1	\$ 2,737.1
Franchise rights indefinite-lived	\$ 173.9	\$ 313.0
Other intangibles	7.6	7.9
	181.5	320.9
Less: accumulated amortization	(3.8)	(4.4)
Other intangible assets, net	\$ 177.7	\$ 316.5

***Goodwill***

Goodwill is tested for impairment annually or more frequently when events or circumstances indicate that the carrying value of a reporting unit more likely than not exceeds its fair value. During 2008, we changed our annual goodwill impairment testing date from June 30 to April 30, as this date provides additional time to complete the impairment testing and report the results of those tests in our June 30 Quarterly Report on Form 10-Q. No goodwill impairment charges resulted from the April 30 goodwill impairment test.

During the third quarter of 2008, as a result of the continuing challenging automotive retail environment and the decline in our stock price, we determined that the carrying value of our single reporting unit more likely than not exceeded its fair value, as contemplated by paragraph 28 of SFAS No. 142, *Goodwill and Other Intangible Assets*. Due to this change in circumstances, we were required to conduct an interim test of our single reporting unit s goodwill.

The test for goodwill impairment, as defined by SFAS No. 142 is a two-step approach. The first step of the goodwill impairment test requires a determination of whether or not the fair value of a reporting unit is

**AUTONATION, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

less than its carrying value. If so, the second step is required, which involves an analysis reflecting the allocation of the fair value determined in the first step (as if it was the purchase price in a business combination). This process may result in the determination of a new amount of goodwill. If the calculated fair value of the goodwill resulting from this allocation is lower than the carrying value of the goodwill in the reporting unit, the difference is reflected as a non-cash impairment loss. The purpose of the second step is only to determine the amount of goodwill that should be recorded on the balance sheet. The recorded amounts of other items on the balance sheet are not adjusted.

We estimate the fair value of our single reporting unit using market and income valuation approaches. The market valuation approach estimates our enterprise value, which is comprised of our market capitalization and our debt. The income valuation approach estimates our enterprise value using a net present value model, which discounts projected free cash flows (DCF) of our business at a computed weighted average cost of capital as the discount rate. We also consider a control premium that represents the estimated amount an investor would pay for our equity securities to obtain a controlling interest.

The requirements of the goodwill impairment testing process are such that, in our situation, if the first step of the impairment testing process indicates that the fair value of the reporting unit is below its carrying value (even by a relatively small amount), the requirements of the second step of the test result in a significant decrease in the amount of goodwill recorded on the balance sheet.

This is due to the fact that, prior to our adoption on July 1, 2001, of SFAS No. 141, *Business Combinations*, and in accordance with applicable accounting standards, we did not separately identify franchise rights associated with the acquisition of dealerships as separate intangible assets. In performing the second step, we are required by SFAS No. 142 to assign value to any previously unrecognized identifiable intangible assets (including such franchise rights, which are substantial) even though such amounts are not separately identified on our Consolidated Balance Sheet.

In the third quarter of 2008, as a result of completing the first step of this interim goodwill impairment test, we determined that the carrying value of our single reporting unit exceeded its fair value, which required us to perform the second step of the goodwill impairment test. Due to the fact that we were required to allocate significant value to our franchise rights assets for the purpose of conducting the second step of the impairment testing, but were not permitted to record the franchise rights assets on the balance sheet, the remaining fair value that was allocated to goodwill was significantly reduced. In effect, we were required by the second step of the impairment testing under SFAS No. 142 to reduce our goodwill by the amount of our unrecognized franchise rights assets, which are substantial (in addition to other adjustments to goodwill resulting from the impairment testing).

The second step of the goodwill impairment test indicated that goodwill was impaired and we recorded an estimated non-cash goodwill impairment charge of \$1.47 billion (\$1.25 billion after-tax).

Additionally, as discussed in Note 21 of the Notes to Consolidated Financial Statements, we revised our operating segment structure during the quarter ended September 30, 2008, and now have Domestic, Import, and Premium Luxury segments. In connection with this revision to our operating segment structure, we were also required to identify the appropriate reporting units for purposes of testing goodwill for impairment under the revised operating segment structure. SFAS No. 142 defines a reporting unit as an operating segment or one level below an operating segment (referred to as a component), and also states that two or more components of an operating segment shall be

aggregated and deemed a single reporting unit if the components have similar economic characteristics. We determined that our stores in each of our three operating segments are components, which were then aggregated into three reporting units based on similarities in long-term financial performance expectations, customers, and operating environments of the stores within each segment, among other factors. Accordingly, our segments are also considered our reporting units for the purpose of goodwill impairment testing and we allocated our remaining goodwill (after the aforementioned \$1.47 billion non-cash

**AUTONATION, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

goodwill impairment charge) to our three reporting units based on the relative fair values of those reporting units on the date of this change, determined using a net present value model. Since the resulting carrying value of the Domestic reporting unit exceeded its estimated fair value, we were also required to perform the second step of the goodwill impairment test on the goodwill allocated to the Domestic reporting unit. We recorded an additional non-cash goodwill impairment charge of \$140.0 million (\$119.0 million after-tax) to write-off a portion of the goodwill assigned to the Domestic reporting unit.

We finalized the non-cash goodwill impairment amounts for our single reporting unit and our three new reporting units during the fourth quarter of 2008, and no adjustment was required based on the finalized valuation. The aggregate non-cash goodwill impairment charge resulting from the aforementioned single reporting unit impairment test and the non-cash impairment charge related specifically to our Domestic reporting unit totaled \$1.61 billion (\$1.37 billion after-tax), all of which is classified as Goodwill Impairment in the accompanying Consolidated Income Statement.

Goodwill allocated to our reporting units and changes in the carrying amount of goodwill for the year ended December 31, 2008, were as follows:

	<b>Domestic</b>	<b>Import</b>	<b>Premium Luxury</b>	<b>Corporate and other</b>	<b>Consolidated</b>
Goodwill at January 1, 2008	\$	\$	\$	\$ 2,737.1	2,737.1
Acquisitions and other adjustments through September 30, 2008				21.5	21.5
Impairment Single reporting unit				(1,470.0)	(1,470.0)
Allocations as of September 30, 2008	311.7	506.1	470.0	(1,287.8)	
Impairment Domestic	(140.0)				(140.0)
Acquisitions and other adjustments	1.3			(0.8)	0.5
Goodwill at December 31, 2008	\$ 173.0	\$ 506.1	\$ 470.0	\$	\$ 1,149.1

***Intangible Assets***

Our principal identifiable intangible assets are individual store rights under franchise agreements with vehicle manufacturers, which have indefinite lives and are tested at least annually for impairment. We completed our annual impairment test for these intangibles with indefinite lives as of April 30, 2008, as well as interim impairment tests for certain rights under franchise agreements where events or changes in circumstances indicated their carrying amounts may exceed fair value. The impairment test for intangibles with indefinite lives requires the comparison of estimated fair value to its carrying value by store. Fair values of rights under franchise agreements are estimated by discounting expected future cash flows of the store.

As a result of the continuing challenging automotive retail environment, we also tested our rights under franchise agreements for impairment during the third quarter of 2008, prior to testing goodwill for impairment, as noted above.

We recorded non-cash impairment charges of \$20.3 million related to rights under certain Domestic stores franchise agreements, \$16.2 million related to rights under certain Import stores franchise agreements, and \$104.9 million related to rights under certain Premium Luxury stores franchise agreements, for a total of \$141.4 million (\$87.7 million after-tax). These impairment charges were recorded to reduce the carrying value of those stores franchise agreements to estimated fair value. Subsequent to these non-cash franchise rights impairment charges, we had \$173.9 million of franchise rights recorded on our balance sheet as of December 31, 2008, of which \$5.3 million was related to Domestic stores, \$34.1 million was related to Import stores, and \$134.5 million was related to Premium Luxury stores.

During the six months ended June 30, 2008, we recorded \$5.1 million (\$3.0 million after-tax) of non-cash impairment charges related to rights under certain Import stores franchise agreements to reduce the carrying

**AUTONATION, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

value of those stores' franchise agreements to estimated fair value. During 2007, we recorded \$2.2 million (\$1.4 million after-tax) of non-cash impairment charges related to rights under an Import store's franchise agreement to reduce the carrying value of that store's franchise agreement to estimated fair value.

The decline in the fair value of rights under these stores' franchise agreements reflects the underperformance relative to expectations of these stores since our acquisition of them, as well as our expectations for the stores' future prospects. These factors resulted in a reduction in forecasted cash flows and growth rates used to estimate fair value. These non-cash impairment charges are classified as Franchise Rights Impairment in the accompanying Consolidated Income Statements.

**6. INSURANCE**

At December 31, 2008 and 2007, current insurance accruals were included in Other Current Liabilities in the Consolidated Balance Sheets and long-term insurance accruals were included in Other Liabilities in the Consolidated Balance Sheets as follows:

	<b>2008</b>	<b>2007</b>
Insurance accruals - current portion	\$ 36.8	\$ 39.4
Insurance accruals - long-term portion	40.3	48.2
Total insurance accruals	\$ 77.1	\$ 87.6

**7. NOTES PAYABLE AND LONG-TERM DEBT**

Notes payable and long-term debt at December 31 are as follows:

	<b>2008</b>	<b>2007</b>
Floating rate senior unsecured notes, due 2013	\$ 194.5	\$ 300.0
7% senior unsecured notes, due 2014	172.6	300.0
Term loan facility, due 2012	600.0	600.0
Revolving credit facility, due 2012		260.0
9% senior unsecured notes, due 2008		14.1
Mortgage facility, due 2017	233.3	239.7
Other debt, due from 2010 to 2025	58.5	62.0
	1,258.9	1,775.8
Less: current maturities	(33.3)	(23.9)
Long-term debt, net of current maturities	\$ 1,225.6	\$ 1,751.9

***Senior Unsecured Notes and Amended Credit Agreement***

In April 2006, we sold \$300.0 million of floating rate senior unsecured notes due April 15, 2013, and \$300.0 million of 7% senior unsecured notes due April 15, 2014, in each case at par. The floating rate senior unsecured notes bear interest at a rate equal to three-month LIBOR plus 2.0% per annum, adjusted quarterly, and may be redeemed by us currently at 103% of principal, on or after April 15, 2009, at 102% of principal, on or after April 15, 2010, at 101% of principal, and on or after April 15, 2011, at 100% of principal. The 7% senior unsecured notes may be redeemed by us on or after April 15, 2009, at 105.25% of principal, on or after April 15, 2010, at 103.5% of principal, on or after April 15, 2011, at 101.75% of principal, and on or after April 15, 2012, at 100% of principal.

**AUTONATION, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In April 2006, we also completed the first amendment to our credit agreement to provide: (1) a \$675.0 million revolving credit facility that provided for various interest rates on borrowings generally at LIBOR plus 0.80%, and (2) a \$600.0 million term loan facility bearing interest at a rate equal to LIBOR plus 1.25%. In December 2006, the borrowing capacity of the revolving credit facility was increased to \$700.0 million under the amended credit agreement.

The proceeds of the senior unsecured notes and term loan facility, together with cash on hand and borrowings of \$80.0 million under the amended revolving credit facility, were used to: (1) purchase 50 million shares of our common stock at \$23 per share for an aggregate purchase price of \$1.15 billion pursuant to our equity tender offer, (2) purchase \$309.4 million aggregate principal of our 9% senior unsecured notes for an aggregate total consideration of \$339.8 million pursuant to our debt tender offer and consent solicitation, and (3) pay related financing costs. Approximately \$34.5 million of tender premium and other financing costs related to our debt tender offer was expensed during 2006.

In July 2007, we completed a second amendment of the credit agreement. Under the terms of the second amendment, the interest rate on the term loan facility decreased from LIBOR plus 1.25% to LIBOR plus 0.875% and the interest rate on the revolving credit facility decreased from LIBOR plus 0.80% to LIBOR plus 0.725%. Additionally, the credit agreement termination date was extended from July 14, 2010, to July 18, 2012, and certain other terms and conditions were modified as a result of this amendment. We incurred \$1.6 million of expenses in connection with this modification during 2007, which are included as a component of Other Interest Expense in the accompanying Consolidated Income Statements.

We have a letter of credit sublimit as part of our revolving credit facility. The amount available to be borrowed under the revolving credit facility is reduced on a dollar-for-dollar basis by the cumulative amount of any outstanding letters of credit, which was \$72.4 million at December 31, 2008.

We had no borrowings outstanding under the revolving credit facility at December 31, 2008, leaving \$627.6 million of borrowing capacity at December 31, 2008. As of December 31, 2008, this borrowing capacity was limited under the maximum consolidated leverage ratio contained in our amended credit agreement to approximately \$301 million.

During 2008, we repurchased \$105.5 million aggregate principal amount of our floating rate senior unsecured notes due April 15, 2013, for an aggregate total consideration of \$79.8 million. We also repurchased \$127.4 million aggregate principal amount of our 7% senior unsecured notes due April 15, 2014, for an aggregate total consideration of \$102.3 million.

We recorded a gain of \$51.3 million in connection with these repurchases, net of the write-off of related unamortized debt issuance costs. This gain is classified as Gain on Senior Note Repurchases in the accompanying Consolidated Income Statements. At December 31, 2008, we had outstanding \$194.5 million of floating rate senior unsecured notes due April 15, 2013, and \$172.6 million of 7% senior unsecured notes due April 15, 2014, in each case at par.

We also committed to repurchase an additional \$11.1 million aggregate principal amount of our 7% senior unsecured notes for which settlement occurred subsequent to December 31, 2008. We have reclassified these amounts from long-term to current debt as of December 31, 2008. We will record a gain in the first quarter of 2009 of \$3.0 million on the repurchase of these notes, net of the write-off of related unamortized debt issuance costs.

The credit spread charged for the revolving credit facility and term loan facility is impacted by our senior unsecured credit ratings from Standard & Poor's (BB+, with negative outlook) and Moody's (Ba2, with negative outlook). For instance, under the current terms of our amended credit agreement, a one-notch downgrade of our senior unsecured credit rating by either Standard & Poor's or Moody's would result in a 25 basis point increase in the credit spread under our term loan facility, a 20 basis point increase in the credit

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

spread under our revolving credit facility, and a 5 basis point increase in the facility fee applicable to our revolving credit facility.

Our senior unsecured notes and borrowings under the credit agreement are guaranteed by substantially all of our subsidiaries. Within the meaning of Regulation S-X, Rule 3-10, AutoNation, Inc. (the parent company) has no independent assets or operations, the guarantees of its subsidiaries are full and unconditional and joint and several, and any subsidiaries other than the guarantor subsidiaries are minor.

***Other Debt***

On August 1, 2008, we repaid \$14.1 million of 9% senior unsecured notes that matured on that date.

At December 31, 2008, we had \$233.3 million outstanding under a mortgage facility with an automotive manufacturer's captive finance subsidiary. The mortgage facility was refinanced under a new facility in November 2007 to provide a fixed interest rate (5.864%) and provide financing secured by 10-year mortgages on certain of our store properties. In connection with this refinancing, in 2007 we received net proceeds of approximately \$126.4 million and recorded \$1.0 million of expenses, which are included as a component of Other Interest Expense in the accompanying Consolidated Income Statements. Prior to this refinancing, the facility utilized LIBOR-based interest rates, which averaged 6.54% for 2007. Repayment of the mortgage facility is subject to a prepayment penalty.

During 2000, we entered into a sale-leaseback transaction involving our corporate headquarters facility that resulted in net proceeds of approximately \$52.1 million. This transaction was accounted for as a financing lease, wherein the property remains on the books and continues to be depreciated. The gain on this transaction has been deferred and will be recognized at the end of the lease term, including renewals. The remaining obligation related to this transaction of \$38.1 million at December 31, 2008, and \$40.4 million at December 31, 2007, is included in Other Debt in the above table.

***Restrictions and Covenants***

Our amended credit agreement, the indenture for our floating rate and 7% senior unsecured notes, our vehicle floorplan payable facilities, and our mortgage facility contain numerous customary financial and operating covenants that place significant restrictions on us, including our ability to incur additional indebtedness or prepay existing indebtedness, to declare cash dividends, to create liens or other encumbrances, to sell (or otherwise dispose of) assets, and to merge or consolidate with other entities.

For example, under the amended credit agreement, we are required to remain in compliance with a maximum consolidated leverage ratio, as defined (3.0 times through September 30, 2009, after which it will revert to 2.75 times). In March 2008, we amended our credit agreement to provide that non-cash impairment losses associated with goodwill and intangible assets as well as certain other non-cash charges would be excluded from the computation of the maximum consolidated leverage ratio. We are also required to remain in compliance with a maximum capitalization ratio (65%), as defined.

In addition, the indenture for the floating rate and 7% senior unsecured notes contains a debt incurrence restriction based on a minimum fixed charge coverage ratio (2:1), and the mortgage facility contains covenants regarding

maximum cash flow leverage and minimum interest coverage.

Our failure to comply with the covenants contained in our debt agreements could permit acceleration of all of our indebtedness. Our debt agreements have cross-default provisions that trigger a default in the event of an uncured default under other material indebtedness of AutoNation.

In the event of a downgrade in our senior unsecured credit ratings, none of the covenants described above would be impacted. In addition, availability under the amended credit agreement described above would not be impacted should a downgrade in the senior unsecured debt credit ratings occur. Certain covenants in the

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

indenture for the floating rate and 7% senior unsecured notes would be eliminated with an upgrade of our senior unsecured credit ratings to investment grade by either Standard & Poor's or Moody's.

At December 31, 2008, aggregate maturities of notes payable and long-term debt, excluding vehicle floorplan payable, were as follows:
