RHOMBIC CORPORATION
(A Development Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS for the Quarters Ended Ended June 30, 2001 and 2000

The unaudited financial statements included herein were prepared from the records of the Company in accordance with Generally Accepted Accounting Principles. These financial statements reflect all adjustments which are, in the opinion of management, necessary to provide a fair statement of the results of operations and financial position for the interim periods. Such financial statements generally conform to the presentation reflected in the Company's Forms 10-KSB and 10-KSB filed with the Securities and Exchange Commission for the year ended December 31, 2000. The current interim period reported herein should be read in conjunction with the Company's Form 10-KSB subject to independent audit at the end of the year.

The results of operations for the three months ended September 30, 2001 are not necessarily indicative of the results that may be expected for the year ending December 31, 2001.

CONVERTIBLE DEBENTURE

On March 8, 2001, Rhombic signed a convertible debenture for \$2.5 million. The Holder funded \$200,000 on the debenture and converted the advances into 1,166,142 shares of the Company under the terms of the debenture. On July 20, 2001, the Company withdrew its registration statement for the shares issued and to be issued under the debenture because it was no longer applicable to the Company. A new registration statement was filed on October 2, 2001 which will register all shares that were sold under the debenture.

STOCKHOLDERS' EQUITY

During the third quarter of 2001, the Company issued 250,000 restricted common shares as payment in full for consulting services regarding financing for the company. The transaction had a deemed value of \$ 31,500.

The deemed value of the all shares issued was determined based upon the trading value of the Company's common stock at the time of the issuance of the stock.

SUBSEQUENT EVENTS

On November 5, 2001, the Company entered into a non-binding letter of intent with Famco Holding Company, LLC to reach a definitive agreement wherein Rhombic would acquire all the outstanding shares of six corporations for approximately 630,000,000 common shares of Rhombic, restricted pursuant to Rule 144, and resulting in a change of control. It is anticipated that the operating corporations will be acquired individually over a four to six month period after due diligence and audited financial statements are completed. The unaudited revenues from two of the operating companies last year approximated \$12 million with income before taxes of \$4.4 million. Other companies are in a research and development phase and will be sold to Rhombic upon completion of the development phase and a readiness to commence sales. Upon the satisfactory completion of due diligence, the directors of Rhombic will recommend the acquisitions to the shareholders with the specific terms.

7

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

PLAN OF OPERATION

The following discussion is intended to provide an analysis of the Company's financial condition and Plan of Operation and should be read in conjunction with the Company's financial statements and the notes thereto. The matters discussed in this section that are not historical or current facts, deal with potential future circumstances and developments. Such forward-looking statements include, but are not limited to, the development plans for the technologies of the Company, trends in the results of the Company's development, anticipated development plans, operating expenses and the Company's anticipated capital requirements and capital resources. The Company's actual results could differ materially from the results discussed in the forward-looking statements.

The Company has not generated revenue from operations during the first nine months of 2001 or since its inception. During the third quarter of 2001, the Company began the quarter with \$31,614 in cash. At November 1, 2001, the Company had a working capital deficit. The Company had approximately \$29,000 in cash and trade payables of approximately \$42,500 at that date.

During the third quarter of this year, the company sold 600,000 shares of its holdings in Rockford Technology Corporation for \$19,506 in cash and exchanged 900,000 shares of Rockford for services and the payment of existing payables. The Company disbursed approximately \$10,000 in cash for auditor reviews and legal fees regarding the registration statement, quarterly filing and business consulting, \$5,000 to a scientific consultant for an opinion on current patents and patents pending as well as \$35,000 for salaries, travel and overhead expenses.

Subsequent to September 30, 2001, the Company received approximately \$36,700 in cash from the sale of most of its marketable securities from which it dispersed \$20,646 for payables existing at September 30, 2001. The Company also satisfied payables at September 30, 2001 of \$22,000 by issuing common shares to the previous President.

In early July 2001, the Company terminated its investor relation representative and hired a scientific consultant to evaluate all of the patents and patent applications of the Company for relevance to potential commercial applications. The consultant first stated that all patents and provisional patents involving Field Enhanced Diffusion by Optical Activation (FEDOA) which covered diamond based fuel cells, diamond doping and the removal of impurities, listed inventors that are or were faculty members of the University of Missouri at Columbia. The University Administration asserts that all inventions created at the University by its faculty members are its intellectual property and not Rhombic's. The following opinions on Rhombic's provisional patents invented by faculty members at the University of Missouri are summarized as follows:

- Provisional patents for the System and Method for Diamond Based Fuel Cells give substantial evidence that the described process using FEDOA is too slow to be economically feasible.
- 2. Provisional patent applications covering the doping of natural and chemically vacuum deposited (CVD) diamond using FEDOA is too slow of a process to be economically feasible. Additional research into electrical applications of these provisional patents could be used with other doping processes to explore potential commercial applications.
- 3. Provisional patent applications for a System and Method for Removal of Imputities from materials such as semiconductors using FEDOA would require significantly more research to determine commercial value. Although the process appears to offer an increase yield of chips obtainable from wafers, the commercial viability is questionable because the FEDOA is very slow for commercial applications.

8

4. Provisional patent applications for Carbon Crystal Growth Using Electric Emission Enhanced Showerhead Hot Filament Chemical Vapor Deposition offers an improved process for the CVD process, but the applications and inventors do not have enough data to determine commercial viability.

The conclusion of the consultant and the company was not to continue the patent process of the above listed provisional patent applications because of (1) the limited economic viability due primarily to the process speed of FEDOA; (2) the high costs of patent counsel and the direct costs to obtain domestic and foreign patents; and (3) the potential exposure to royalty payments to the University of Missouri with corresponding costs of defending ownership of the patents.

The consultant also evaluated Rhombic's intellectual property that was

unaffected by potential claims from the University of Missouri. His opinions are as follows:

- 1. Provisional patent for the Method and System for Manufacturing Disperse Composite Materials is of great economic value if the process is fully developed for the numerous applications that are being proposed now by industry or that will emerge shortly.
- 2. Provisional patent for a Method of Contact Diffusion into Diamond and Other Crystalline Structures and Products using its thermal diffusion method is commercially viable.

The consultant recommended proceeding with a development plan for commercial applications involving the Manufacturing of Disperse Composite Materials. He also recommended to proceed with Contact Diffusion into Diamond if reasonable arrangements could be made to secure a license to receive the processed diamond material necessary to complete the process.

Upon the recommendations of the consultant, the company met with its patent attorneys and determined that the application deadlines to extend the patents pending on the Manufacturing of Disperse Composite Materials had expired. As a result, the President met with the inventors of the patents and determined a commitment of \$500,000 to \$1,000,000 in capital would be needed to begin a development program for any commercial applications that would provide specific patent coverage for any process developed. Due to existing financing problems that the Company was facing, Rhombic's President recommended a merger with a private research and development company that had capital and scientists. Unfortunately, Rhombic never received enough information from the company to evaluate a merger and Rhombic's President subsequently resigned.

The Company does not have any employees and uses consultants for matters pertaining to coordinating technology development and administration. The Company may hire employees during the next twelve months depending upon its success in developing prototype applications for sale and financing more development.

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, and Section 21E of the Exchange Act of 1934. Although the Company believes that the expectations reflected in the forward-looking statements and the assumptions upon which the forward-looking statements are based are reasonable, it can give no assurance that such expectations and assumptions will prove to be correct.

9

PART II -- OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

There are no legal proceedings against the Company and the Company is unaware of any proceedings contemplated against it.

ITEM 2. CHANGES IN SECURITIES

The following information is given with respect to all unregistered securities sold or issued by Rhombic in the period covered by this report:

(1) On August 9, 2001 25,000 restricted common shares were issued to a consultant regarding financing for the Company. The deemed value of the shares issued was \$4,500\$ which was determined based upon the trading value of the Company's common stock at the time of the issuance of the stock and the agreement. These shares were issued by the Company pursuant to the exemption

found in Section 4(2) of the Securities Act of 1933.

(2) On September 13, 2001, the Company issued 175,000 restricted common shares of its common stock to two financial consultants regarding financing for the Company and 50,000 restricted common shares to a scientific consultant. The deemed value of the shares issued was \$27,000 which was determined based upon the trading value of the Company's common stock at the time of the issuance of the stock and the agreement. These shares were issued by the Company pursuant to the exemption found in Section 4(2) of the Securities Act of 1933.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not applicable.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

Not applicable.

ITEM 5. OTHER INFORMATION

On November 5, 2001, the Company entered into a non-binding letter of intent with Famco Holding Company, LLC to reach a definitive agreement wherein Rhombic would acquire all the outstanding shares of six corporations for approximately 630,000,000 common shares of Rhombic, restricted pursuant to Rule 144, and resulting in a change of control. It is anticipated that the operating corporations will be acquired individually over a four to six month period after due diligence and audited financial statements are completed. The unaudited revenues from two of the operating companies last year approximated \$12 million with income before taxes of \$4.4 million. Other companies are in a research and development phase and will be sold to Rhombic upon completion of the development phase and a readiness to commence sales. Upon the satisfactory completion of due diligence, the directors of Rhombic will recommend the acquisitions to the shareholders with the specific terms.

ITEM 6. EXHIBITS AND REPORTS ON FORM $8\!-\!K$

(a) Exhibits

None

(b) Reports on Form 8-K

During the quarter ended September 30, 2001, the Company did not file a Form 8-K. Subsequent to the end of the quarter, the Company filed one Form 8-K report. The report was filed on October 12, 2001 and is incorporated herein by reference. The report disclosed the resignation of Roger Duffield as the President and a director of the Company.

10

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
