INCORPORATION BY REFERENCE

Sappi Limited's report for the second quarter ended March 2004, furnished by the Registrant under this Form 6-K is incorporated by reference into the Registration Statement on Form S-8 of the Registrant (File No. 333-11304) and the Section 10(a) Prospectus dated April 3, 2001 relating to the offer and

Edgar Filing: SAPPI LTD - Form 6-K

sale of the Registrant's shares to Participants under The Sappi Limited Share Incentive Scheme. This Form 6-K includes a conformed version of the earnings announcement sent by the Registrant to its shareholders. This conformed version was prepared solely for purposes of supplementing the Registrant's Registration Statement on Form S-8 (File No. 333-11304) and the Section 10(a) Prospectus dated April 3, 2001.

FORWARD-LOOKING STATEMENTS

In order to utilize the "Safe Harbor" provisions of the United States Private Securities Litigation Reform Act of 1995 (the "Reform Act"), Sappi Limited (the "Company") is providing the following cautionary statement. Except for historical information contained herein, statements contained in this Report on Form 6-K may constitute "forward-looking statements" within the meaning of the Reform Act. The words "believe", "anticipate", "expect", "intend", "estimate", "plan", "assume", "positioned", "will", "may", "should", "risk" and other similar expressions which are predictions of or indicate future events and future trends which do not relate to historical matters identify forward-looking statements. In addition, this Report on Form 6-K may include forward-looking statements relating to the Company's potential exposure to various types of market risks, such as interest rate risk, foreign exchange rate risk and commodity price risk. Reliance should not be placed on forward-looking statements because they involve known and unknown risks, uncertainties and other factors which are in some cases beyond the control of the Company, together with its subsidiaries (the "Group"), and may cause the actual results, performance or achievements of the Group to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements (and from past results, performance or achievements). Certain factors that may cause such differences include but are not limited to: the highly cyclical nature of the pulp and paper industry; pulp and paper production, production capacity and pricing levels in North America, Europe, Asia and southern Africa; any major disruption in production at the Group's key facilities; changes in environmental, tax and other laws and regulations; adverse changes in the markets for the Group's products; any delays, unexpected costs or other problems experienced with any business acquired or to be acquired; consequences of the Group's leverage; adverse changes in the South African political situation and economy or the effect of governmental efforts to address present or future economic or social problems; and the impact of future investments, acquisitions and dispositions (including the financing of investments and acquisitions) and any delays, unexpected costs or other problems experienced in connection with dispositions. These and other risks, uncertainties and factors are discussed in the Company's Annual Report on Form 20-F and other filings with and submissions to the Securities and Exchange Commission, including this Report on Form 6-K. Shareholders and prospective investors are cautioned not to place undue reliance on these forward-looking statements. These forward-looking statements are made as of the date of the submission of this Report on Form 6-K and are not intended to give any assurance as to future results. The Company undertakes no obligation to publicly update or revise any of these forward-looking statements, whether to reflect new information or future events or circumstances or otherwise.

2004 second quarter 1

COMMENT

The underlying performance for the quarter improved compared to the prior quarter as a result of a better performance from our European fine paper and South African forest products businesses and a reduction in the losses from our North American business.

In North America, commercial printers are starting to show clear signs of a turnaround in demand for paper, reflecting improvements in the US economy. This pick-up in consumption was only evident towards the end of the quarter and did not have a major impact on demand statistics. Shipments of coated fine paper from US producers were up 3% on the same quarter last year while net imports fell sharply. Magazine advertising pages were 2% below the equivalent

Edgar Filing: SAPPI LTD - Form 6-K

quarter last year. Demand for coated fine paper in Western Europe continued to show healthy improvement with apparent consumption for the quarter 6% above the equivalent quarter last year and total shipments by European manufacturers were up 8% on the prior year.

Prices in both major markets remained at cyclical lows in the quarter. Tightening supply conditions only presented the opportunity to announce price increases for implementation after the end of the reporting period.

Against this background, Sappi's earnings and headline earnings per share were 10 US cents compared to 25 US cents a year earlier and a loss in the December quarter, after charges related to a machine closure and additional maintenance shut costs.

We maintain our focus on costs, which were generally well managed in local currency terms in the quarter. Costs of wood and energy remain high in North America. Selling, General and Administrative costs fell from the prior quarter but were US\$24 million higher than last year primarily due to currency (US\$10 million) and the US\$10 million credit relating to retirement costs reported last year. The favourable impact of applying the Agriculture Accounting Standard - AC137 (IAS41) in the quarter compared to applying our previous accounting policy was US\$7 million after tax.

Net finance costs at US\$26 million were US\$2 million below the December quarter.

Taxation for the quarter was at an effective rate of 23%, which is higher than the expected rate for the full year.

2 2004 second quarter

CASH FLOW

Cash generated by operations increased strongly compared to the December quarter to US\$184 million, a similar level to last year.

Working capital increased by US\$31 million mainly as a result of higher inventories.

Capital expenditure for the quarter was US\$84 million, similar to the first quarter and approximately 82% of depreciation.

The annual dividend payment of US\$66 million was paid in January 2004 and a pension funding payment of US\$19 million was also made in the quarter.

2004 second quarter 3

OPERATING REVIEW FOR THE QUARTER

SAPPI FINE PAPER

Edgar Filing: SAPPI LTD - Form 6-K

	Quarter ended March 2004 US\$ million	Quarter ended March 2003 US\$ million	ch
Sales	967	904	
Operating profit	10	72	(
Operating profit to sales (%)	1.0	8.0	

Sappi Fine Paper volumes and average prices in Dollar terms both increased; however, low prices in local currencies and increases in pulp, wood and energy costs continue to squeeze our margins.

Demand in Europe and South Africa remains good and we are seeing signs of a pick up, in domestic volumes, in North America.

EUROPE

	Quarter ended March 2004 US\$ million	Quarter ended March 2003 US\$ million	% change (US\$)	% cha (Eu
Sales	556	503	10.5	(
Operating profit	27	42	(35.7)	(4
Operating profit to sales (%)	4.9	8.3	-	

Our sales volume has continued to grow and was 3% higher than the equivalent quarter last year and 4% above the December quarter. Domestic European sales volumes increased 6% on the prior quarter but export volumes to the US which are included in Sappi Fine Paper Europe's total volumes have declined.

Prices in European and overseas markets fell early in the quarter but stabilised in March. Average prices realised in Euros were 9% below a year earlier and slightly down on the December quarter.

During the quarter, we announced a price increase of 5% to 7% for coated fine paper which should become effective in the June quarter.

4 2004 second quarter

Edgar Filing: SAPPI LTD - Form 6-K

NORTH AMERICA

	Quarter ended March 2004 US\$ million	Quarter ended March 2003 US\$ million	% change
Sales	339	338	0.3
Operating profit	(20)	20	-
Operating profit to Sales (%)	(5.9)	5.9	-

Although our North American business improved on the prior quarter, it still reported an operating loss in the quarter under review.

Volumes sold were higher than the equivalent quarter last year representing some gain in share. Volumes were up 7% from the December quarter.

Prices remained at approximately the same low level as in the December quarter. As a result of improving operating rates and order backlogs, we have announced a price increase of US\$50 per ton on certain coated fine paper sheets and an increase of US\$60 per ton on coated fine paper web products which becomes effective in June.

Costs of wood and energy continue to impact profitability and remain at high levels. These costs were US\$9 million above the same quarter last year and US\$3 million higher than the prior quarter.

SOUTH AFRICA

	Quarter ended March 2004 US\$ million	Quarter ended March 2003 US\$ million	% change (US\$)	% change (Rand)
Sales	72	63	14.3	(6.3)
Operating profit	3	10	(70.0)	(75.0)
Operating profit to Sales (%)	4.2	15.9	-	-

2004 second quarter 5

The performance of our South African fine paper business was affected by low prices resulting from increased competition and the strong Rand. There are some signs that growing demand in Asia will absorb greater volumes and therefore reduce import pressure.

Edgar Filing: SAPPI LTD - Form 6-K

SAPPI FOREST PRODUCTS

	Quarter ended March 2004 US\$ million	Quarter ended March 2003 US\$ million	% change (US\$)	% change (Rands)
Sales	218	191	14.1	(7.0)
Operating profit	48	33	45.5	18.5
Operating profit to Sales (%)	22.0	17.3	-	-

Demand for our pulp and packaging paper was firm during the quarter. Our paper exports were lower as a result of the strong Rand and newsprint sales were lower as customers adjusted inventories.

Demand for dissolving pulp produced by our Saiccor mill remains strong. Saiccor has a world-class cost position and is taking a number of steps to increase capacity through de-bottlenecking projects. The first step, which is already underway, will increase output by 20,000 tons based on the current product mix. Further plans are being investigated to add an additional 30,000 tons of capacity.

Pulp prices have continued to increase with average NBSK prices for the quarter up US\$ 35 per ton on the previous quarter and have partly offset the impact of the strong Rand on our pricing.

6 2004 second quarter

OUTLOOK

We are seeing signs of a turnaround in profitability for coated fine paper.

Advertising spending in Europe is growing, as is apparent consumption of coated fine paper, which bodes well for the price increases currently being introduced.

Imports of coated fine paper to the US from Asia and Europe have declined partly as a result of improved demand in those regions and partly as a result of less attractive price realisations. US domestic shipments have strengthened and order backlogs are increasing. The combination of these factors and signs of improved printer activity will support the announced price increases. However, these coated paper price increases in North America are not expected to have a major impact on our results until the fourth fiscal quarter.

Pulp prices continue to strengthen, which will support the performance of our Forest Products business.

We will have to absorb the costs of two major maintenance shuts next quarter at our Cloquet and Ngodwana mills. In addition to this, we face continued

Edgar Filing: SAPPI LTD - Form 6-K

pressure from rising energy costs globally and high wood costs in North America.

Overall, market developments are encouraging and with rising price trends, we expect to see further improvement in our earnings in our third quarter compared to the second quarter.

FORWARD-LOOKING STATEMENTS

Certain statements in this release that are neither reported financial results nor other historical information, are forward-looking statements, including but not limited to statements that are predictions of or indicate future earnings, savings, synergies, events, trends, plans or objectives. Undue reliance should not be placed on such statements because, by their nature, they are subject to known and unknown risks and uncertainties and can be affected by other factors, that could cause actual results and company plans and objectives to differ materially from those expressed or implied in the forward-looking statements (or from past results). Such risks, uncertainties and factors include, but are not limited to the highly cyclical nature of the pulp and paper industry (and the factors that contribute to such cyclicity, such as levels of demand, production capacity, production and pricing), adverse changes in the markets for the group's products, consequences of substantial leverage, changing regulatory requirements, unanticipated production disruptions, economic and political conditions in international markets, the impact of investments, acquisitions and dispositions (including related financing), any delays, unexpected costs or other problems experienced with integrating acquisitions and achieving expected savings and synergies and currency fluctuations. The company undertakes no obligation to publicly update or revise any of these forward-looking statements, whether to reflect new information or future events or circumstances or otherwise.

NOTES TO THE GROUP RESULTS

1. BASIS OF PREPARATION

Edgar Filing: SAPPI LTD - Form 6-K

The annual financial statements are prepared in conformity with South African Statements of Generally Accepted Accounting Practice (SA GAAP). These quarterly results have been prepared in compliance with AC 127 (Interim financial reporting) and are based on accounting policies which are consistent with those used in the annual financial statements. The same accounting policies have been followed as in the annual financial statements for September 2003, except for the new agriculture accounting standard - Agriculture - AC 137 (IAS 41) which became effective from the beginning of the current financial year.

The effect on equity for the above change is reflected in the Group statement of changes in shareholders' equity. The effect on net profit for the current quarter is an increase of US\$7 million, net of US\$3 million tax (December 2003 quarter: increase of US\$7 million, net of US\$3 million tax; March 2003 quarter: minimal impact) and an increase of US\$14 million, net of US\$6 million tax for the half-year end (March 2003: a decrease of US\$1 million, net of US\$1 million tax). Where appropriate, comparative figures have been restated.

The preliminary results for the quarter have been reviewed by the group's auditors, Deloitte & Touche. Their unqualified review report is available for inspection at the company's registered offices.

2. COMPARATIVE FIGURES

Comparative figures have been restated to take into account the effects of the new agriculture accounting standard which became effective from the beginning of the current financial year. The effect on operating profit is the inclusion of the fair value changes in the value of plantations and the expensing of the costs incurred to establish and maintain plantations (silviculture costs) and the amortisation of interest which had been previously capitalised. Net finance costs have increased. In terms of the new accounting standard, interest is no longer capitalised to the carrying value of plantations.

The effect on the cash flow statement is a reclassification of investments in plantations from cash utilised in investing activities to cash generated by operations. Net cash flows remain the same.

Operating profit has been restated to take into account the requirements of circular 3/2004 issued by the South African Institute of Chartered Accountants. Previously non-trading (profit) loss items were excluded from operating profit. The impact of the inclusion is an increase in operating profit of US\$1 million for the quarter and half-year ended March 2003.

In September 2003, cash and overdraft were restated to gross up amounts previously set-off. The March 2003 cash flow statement has been restated to take the effects of this into account.

SUPPLEMENTAL INFORMATION

ADDITIONAL INFORMATION

	REVIEWED QUARTER ENDED MARCH 2004 US\$ MILLION	Reviewed Quarter ended March 2003 US\$ million	RE HALF-YEAR MARCO US\$ M
1. NET PROFIT TO EBITDA * RECONCILIATION			
Net profit	23	58	
Net finance costs	26	32	
Taxation - current	10	17	
- deferred	(3)	1	
Depreciation	103	85	
Amortisation (including fellings)	14	1	
EBITDA *	173	194	

* Earnings before interest (net finance costs), tax, depreciation and amortisation.

In connection with the US Securities Exchange Commission ("SEC") rules relating to "Condition Non-GAAP Financial Measures", we have reconciled EBITDA to net profit rather than operating profit. We have recalculated EBITDA to exclude interest (net finance costs), taxes, depreciation and amortisation (including fellings). As a result our definition has been amended to retain other income/expenses (previous non-trading profit/loss) as part of EBITDA. The comparative information has been restated to reflect this amendment. The effect on EBITDA for the amended definition is an increase of US\$1m for the quarter ended March 2004. There was no impact on the current quarter and half-year ended March 2003.

We use EBITDA as an internal measure of performance and believe it is a useful and commonly used measure of financial performance in addition to operating profit and other profitability measures under GAAP. EBITDA is not a measure of performance under SA GAAP. EBITDA should not be construed as an alternative to operating profit as an indicator of the company's operations in accordance with GAAP. EBITDA is also presented to assist our shareholders and the investment community in interpreting our financial results. This financial measure is regularly used as a means of comparison of companies in the pulp and paper industry by removing certain differences between companies such as depreciation methods, financing structures and taxation regimes. Different companies and analysts may calculate EBITDA differently and making comparisons among companies on this basis should be done very carefully.
