Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

Marcio Araujo de Lacerda
Chairman of the Board of Directors

Before the items on the agenda of this meeting were put to debate and the vote, the representative of the stockholder Southern Electric Brasil Participações Ltda. stated that the changes in the Bylaws made by the Extraordinary General Meeting of Stockholders of October 25, 1999, and also the subsequent meetings, were approved only by virtue of the suspension of the Stockholders Agreement, by decision of the Courts, and were thus provisional and precarious.

He stated that hence the acts and operations practiced or submitted to approval by the management bodies of Cemig, supported by the said changes in the Bylaws made under the protection of the Court decision in force today, may, at any moment, be reviewed and withdrawn from the world of legal existence.

On this question, the representative of the stockholder State of Minas Gerais reminded the meeting that the decision which annulled the Stockholders Agreement signed between the State of Minas Gerais and Southern Electric Brasil Participações Ltda. no longer has an interim or provisional character.

It is, he said, a decision on the merit and it is thus a case not of suspension but of annulment.

He added that there is already in existence a decision on the merit that annuls the Stockholders Agreement confirmed by the Appeal Court of the State of Minas Gerais.

He further explained that the decisions of these Meetings can only take into account what exists in reality and at the present moment, and that it would be irresponsible not to vote on matters, in expectation of Court decisions, since, in reality, the said Stockholders Agreement, by force of Court judgment, cannot produce any effect and the decisions taken are taken within strict compliance with the Court decision.

Finally, he noted that the Extraordinary and Special Appeals brought by Southern were not admitted by the Vice-chairman of the Minas Gerais Appeal Court, and that the Higher Appeal Court refused the interlocutory and special appeals brought by Southern, thus underlining and reinforcing the legal situation already stated by the Minas Gerais Appeal Court, that is to say, the inefficacy of the Stockholders Agreement subject of the action.

Once again taking the floor, the representative of Southern Electric Brasil Participações Ltda. stated that the Interlocutory Appeal brought against the dispatch denying the Extraordinary Appeal is awaiting judgment in proceedings in the Federal Supreme Court.

Then, the Chairman, in accordance with item 1 of the agenda, placed in debate the Report of Management and the Financial Statements for the year ended December 31, 2007, and the respective complementary documents, explaining that they have been widely disclosed in the press, since they were placed at the disposal of stockholders by a notice published in the newspapers *Minas Gerais*, the official journal of the powers of the state, *O Tempo* and *Gazeta Mercantil*, on March 11, 12 and 13 of this year, and published in the same publications on April 8 of this year.

The Chairman then put to the vote the Report of Management and the Financial Statements for the year ended December 31, 2006, and the respective complementary documents, and they were approved, with the persons legally impeded abstaining. The fund Citibank NA also abstained.

Continuing the proceedings, the Chairman requested the Secretary to read the proposal by the Board of Directors, which deals with items 2, 3 and 6 to 13 of the agenda, and also the Opinions of the Audit Board thereon, the contents of which documents are as follows:

**PROPOSAL BY THE BOARD OF DIRECTORS TO THE

We have started 2008 with our best foot forward. These results show that Cemig is growing intensely and continuously in all its businesses generation, transmission, distribution or electricity sales and trading. And this growth is helped by our policy of growing via acquisitions, which has already produced one happy result: acquisition, through EATE (the Amazon Electricity Transmission Company, acquired by Cemig in 2006), of Lumitrans and STC, which both operate in the state of Santa Catarina. We have also signed the largest energy supply contract ever noticed in Brazil, with the Votorantim Group, for a total of R\$ 10.5 billion, which is a clear indication of our skill and speed in operating profitably in an increasingly dynamic and competitive sector, positioning Cemig as a National Energy Supplier to the most important industrial players in Brazil. In generation, we have signed various contracts for feasibility studies for new power sources exceeding 2,000 MW, which give Cemig the vanguard position in expansion of the electricity system, while at the same time seeking to put these enterprises into operation with alternative, clean energy primarily from hydroelectric and wind sources which is a real concept for a company that has been selected for the Dow Jones Sustainability Index eight times running. What it means is that we continue to do our homework, growing in a balanced fashion in all sectors, with focus on operational excellence, mitigating risks, and taking advantage of all the possible synergies that an integrated company, and a company on the scale of Cemig, can offer .

Luiz Fernando Rolla, Cemig's Chief Officer for Finance, Investor Relations and Control of Holdings, comments as follows:

In first quarter 2008 our company presented the largest cash flow in the electricity sector, based on consistent, robust operation and results which arise from our fundamentals, which include our incessant quest to add value and profitability to our operations. Our Ebitda in 1Q08 is R\$ 1.1 billion, with Ebitda margin of almost 40%, showing the effects of our policy of reduction and control of operational costs, and maintaining high levels of operational efficiency. These new levels of cash flow are in line with the estimated figures in our guidance, and in the Long Term Strategic Plan, and reflect the correctness of our strategy of growth via acquisitions and new projects, within the process of consolidation in the sector. The 2008 tariff review process, which reduced the tariff of our distribution company, was already expected and included in our projections, and will have a moderated impact on our cash flow, since the Cemig Group is made up of almost 40 companies, 7 consortia and manages a portfolio of operations that have synergy and are increasingly profitable. However, we are prepared to act in a decisive manner to adapt the distribution operation to the regulatory framework, focusing on costs reduction and processes reviews, leading to higher operational standards. Our economic and financial indicators are ever stronger, and we are willing and able to participate, in a profitable and rewarding manner, in all the opportunities that the electricity sector has to offer during 2008, whether for acquisitions or new projects, through strategic partnerships. Our investment policy and the principles contained inside the Long Term Strategic Plan, with a incessant pursuit of operational efficiency have succeeded in generating value and returns to our stockholders, in a way that is sustainable while continuing to grow. This release gives the main highlights of our first quarter of 2008:

Gross revenue from supply of electricity

Gross revenue from supply of electricity in 1Q08 was R\$ 3,577,677, 17.89% more than the revenue of R\$ 3,034,879 in 1Q07.

This increase was basically due to the following factors:

Tariff adjustment in Cemig Distribuição, with average impact on consumer tariffs of 5.16%, from April 8, 2007 (full effect in 2008).

5.73% increase in volume of energy invoiced to final consumers (this excludes Cemig's own internal consumption).

Increase in the average tariff for sales of electricity by Cemig Geração e Transmissão, resulting from the scarcity of electricity offered in 1Q08.

Recognition of non-recurring revenue relating to financial items of previous years which were included in the tariff, resulting in the constitution of regulatory assets in the gross amount of R\$ 67,194.

Cemig Group: sales in 1Q08 (%)

Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

Cemig's total gross volume of supply of electricity in 1Q08 was 13,878 GWh, 3% less than in 1Q07.

This mainly reflects wholesale supply 26% lower, at 2,722 GWh, in 1Q08 than in 1Q07 (3,697 GWh). Excluding wholesale supply, growth in volume of electricity sold was 6%, led by increases in volume sold to rural users (+18%), industrial consumers (+7%) and commercial consumers (+6%).

Our stake in the Rio Minas Energia (RME), the controlling stockholder of Light, accounted for 11% (1,508 GWh) of our retail sales volume. Cemig GT provided the largest percentage of our total sales volume, contributing 54%, or 7,473 GWh.

Final consumers

Following the seasonal pattern, the total sales volume in GWh was slightly lower than in the fourth quarter, at 11,154 GWh compared to 11,645 GWh in 4Q07. This reduction was a little more than the comparison in previous years, due to weather factors: our concession areas including both Minas Gerais and Rio de Janeiro (RME) had a very mild summer.

GWh invoiced to final consumers

The charts above show the continuous growth in our volume of GWh invoiced to final consumers with total sales volume in 1Q08 nearly 6% higher than in 1Q07, in spite of the items mentioned above.

Revenue from wholesale sales of electricity

Supply to other concession holders

Revenues from energy sold to other concession holders and bilateral contracts totaled R\$ 296,789 in 1Q08, compared to R\$ 218,251 in 1Q07 an increase of 35.98%. This was basically due to the increase in the price of electricity, since volume traded was 26.37% lower (2,722,220 MWh in 1Q08, compared to 3,697,304 MWh in 1Q07). As a result of the reduced availability of electricity in the first quarter of 2008, which was a result of the lower rainfall, the price of electricity in the wholesale market increased significantly, to as much as R\$ 569.59/MWh in January 2008. The average wholesale tariff was R\$ 59.03/MWh in the first quarter of 2007, but R\$ 109.02/MWh in the first quarter of 2008 84.69% higher.

Revenue from use of the grid

Revenue from use of the grid, at R\$ 481,592, was 1.18% lower in 1Q08 than in 1Q07 (R\$ 475,991), mainly reflecting revenue 2.05% lower year-on-year from the TUSD (Tariff for Use of the Distribution System) in Cemig Distribuição and Light, at R\$ 309,353 (vs. R\$ 315,829 in 1Q07). This revenue comes from charges to free consumers for transport of energy sold by other agents in the electricity sector. The reduction primarily reflects the amount consolidated from RME, which at R\$ 31,601 was R\$ 5,486 lower than in 1Q07 (R\$ 37,087).

Also part of this balance is revenue from use of the basic grid, of R\$ 155,616 in 1Q08, 14.12% higher than in 1Q07 (R\$ 136,367); and the revenue of the connection system totaling R\$ 16,623 in 1Q08, 30.1% less than in 1Q07 (R\$ 23,795). Please see Explanatory Note 24 to the Consolidated Quarterly Information.

Ebitda

Cemig's Ebitda in 1Q08 was R\$ 1,087,550, vs. R\$ 888,746 in 1Q07, or 22.37% higher year-on-year. Adjusted for non-recurring items, Ebitda was 17.73% higher year-on-year.

As part of the tariff review of Cemig Distribuição, Aneel included in the tariff to be applied as from April 8, 2008 certain financial items relating to previous business years which resulted in the recognition of regulatory assets and liabilities which will be received and/or discounted in the tariff to be received from consumers in the period April 8, 2008 to April 7, 2009. The impact on Ebitda of this non-recurring recognition of the financial items was R\$ 58,134, as shown in this table:

(*) The non-recurring adjustments correspond to the company's interpretation of events which it deems to be extraordinary, not related to current operations.

In the last 5 years our cash flow has increased by almost 127%, making it possible for us to go forward with our programs for investments and acquisitions within the process of consolidation of the Brazilian electricity sector.

Net profit

Cemig reported 1Q08 consolidated net profit of R\$ 490,280, compared to consolidated net profit of R\$ 406,632 million in 1Q07, an increase of 20.57%. This primarily reflects net operational revenue 18.74% higher, partly offset by operational costs and expenses 16.09% higher.

As show by the table below, the largest contribution to Cemig's result comes from Cemig Geração e Transmissão (Cemig Generation and Transmission) and Cemig Distribuição (Cemig Distribution):

R\$ million	1Q08	% of total

Contribution of each business

This table shows the contribution of each business to the overall results of the Cemig Group in 1Q08.

As can be seen the great majority of the portfolio of businesses, and almost 100% of the results, are in the electricity sector. Our operations are very well balanced, enabling us to dilute risks and maximize return of companies added to the portfolio, also taking advantage of synergy gains.

We are planning capital expenditure of R\$ 1.5 billion in 2008, 68.57% more than in 2007.

A large proportion of this investment is in Cemig Distribuição, through programs such as *Cresce Minas*, which will enable us to serve the demand and market that we expect and forecast for the coming years.

Non-controllable costs

The differences between the sums of non-controllable costs (also referred to as CVA) used as a reference in the calculation of the tariff adjustment and the disbursements actually made are offset in the subsequent tariff adjustments, and are registered in Current assets and Long term assets. Complying with the Aneel Chart of Accounts, some items are allocated as Deductions from operational revenue. Please refer to further information in Explanatory Note 2 and Note 8 to the Consolidated Quarterly Information.

As from March 2008 the company began to receive, in the tariff, the amounts posted in assets under Portion A . Hence the portion of the non-controllable costs which were actually received in the tariff is transferred to Operational expenses

Deductions from operational revenues

Deductions from operational revenues, at R\$ 1,448,478 in 1Q08, were 7.39% higher than in 1Q07 (R\$ 1,348,839). The principal changes in these expenses are as follows:

Fuel Consumption Account CCC

The deduction from revenue for the CCC was R\$ 77,225 in 1Q08, compared to R\$ 147,174 in 1Q07, an increase of 47.53%. This relates to the operational costs of thermal plants in the Brazilian interconnected and isolated systems, split pro-rata (by Aneel Resolution) among electricity concession holders. This is a non-controllable cost. The amount posted for electricity distribution services corresponds to the amount actually passed through to the tariff. For the amount posted in relation to electricity transmission services the company merely passes through the charge, since the CCC is charged to Free Consumers on the invoice for the use of the basic grid, and passed onto Eletrobrás.

Energy Development Account CDE

The deduction from revenue for the CDE was R\$ 97,387 in 1Q08, 2.46% higher than in 1Q07 (R\$ 95,049). The payments are specified by an Aneel Resolution. This is a non-controllable cost. The amount posted for electricity distribution services corresponds to the amount actually passed through to the tariff. For the amount posted in relation to electricity transmission services the company merely passes through the charge since the CCC is charged to free consumer on the invoice for the use of the grid and passed onto Eletrobrás.

RGR Global Reversion Reserve

The deduction from revenue for the RGR was R\$ 42,855 in 1Q08, 9.93% lower than in 1Q07 (R\$ 47,580). This basically reflects the accounting, in March 2007, of a complement to the expense for 2005, in the amount of R\$ 14,899, as homologated by Aneel.

The other deductions from revenue are for taxes calculated as a percentage of billing, and their variations thus substantially arise from the changes in revenue.

Operational costs and expenses (excluding financial revenue/expenses)

Operational costs and expenses (excluding net financial revenue (expenses)) totaled R\$ 1,887,800 in 1Q08, 16.09% more than in 1Q07 (R\$ 1,626,126). This is basically because purchase of electricity contributed an increase of R\$ 125,078 to the expense. For more information, please see Explanatory Note 27 to the Consolidated Quarterly Information.

The principal changes in expenses are:

Electricity purchased for resale

Expenses on electricity purchased for resale totaled R\$ 725,366 in 1Q08, 20.84% higher than in 1Q07 (R\$ 600,288). This is a non-controllable cost, with the expense recognized in the income statement corresponding to the value effectively passed through to the tariff. Further information is given in Explanatory Note 27 to the Consolidated Quarterly Information.

Personnel expenses

Personnel expenses totaled R\$ 284,363 in 1Q08, 18.77% higher than in 1Q07 (R\$ 239,421). This increase was basically due to the following factors:

Salary adjustment of 5.00% given to the employees of holding company, of Cemig Distribuição and Cemig Geração e Transmissão in November 2007.

Provision for the new Voluntary Dismissal Program (PDD), in the amount of R\$ 6,112, in 1Q08.

Lower transfer of costs from personnel expenses to works in progress (R\$ 19,194 in 1Q08, vs. R\$ 34,762 in 1Q07) due to less capital expenditure activity.

Further information on the composition of personnel expenses is given in Explanatory Note 27 to the Consolidated Quarterly Information.

Depreciation and amortization

The expense on depreciation and amortization was 12.73% higher, at R\$ 201,481, in 1Q08, than in 1Q07 (R\$ 178,726), basically reflecting the start up of new distribution networks and lines as a consequence of the investments in the Light For Everyone program.

Post-employment obligations

Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

Expenses on post-employment obligations totaled R\$ 61,668 in 1Q08, 101.77% higher than in 1Q07 (R\$ 30,563). These expenses basically represent interest on the actuarial liabilities of the Company, net of the expected return on pension plan assets, as estimated by an external actuary. The higher expense in 2008 basically reflects the adjustment in the actuarial assumptions in December 2007, in which the assumed interest rate was reduced, increasing the value of the actuarial obligations.

Operational provisions

Operational provisions in 1Q08 totaled R\$ 96,353, a reduction of 8.49% in relation to their total of R\$ 105,294 in 1Q07. This lower figure basically reflects the provision of R\$ 30,000 for administrative proceedings by Aneel, made in March 2007. For more information on this, please see Explanatory Notes 21 and 27 to the Quarterly Information.

Charges for Use of the Basic Transmission Grid

Charges for use of the transmission network were R\$ 191,534 in 1Q08, 5.58% less than in 1Q07 (R\$ 181,415).

These charges are payable by distribution and generation agents for use of the facilities and components of the basic grid, and are set by Aneel resolution. This is a non-controllable cost, with the deduction from revenue recorded corresponding to the value effectively passed through to the tariff.

Gas purchased for resale

The cost of gas purchased for resale was R\$ 53,420 in 1Q08, 77.92% higher than in 1Q07 (R\$ 30,024). This basically is due to a higher quantity of gas purchased, due to more operation by the thermal plants that are clients of Gasmig, in 1Q08.

Outsourced services

Expenses on outsourced services in 1Q08 were R\$ 144,752, 19.90% higher than in 1Q07 (R\$ 120,732). This primarily reflects increased spending on maintenance and conservation of electricity facilities, contracted labor and communication.

Financial revenues (expenses)

The company posted net financial expenses of R\$ 79,112 for 2008, which compares with net financial expenses of R\$ 66,906 in first quarter 2007. The main factors affecting net financial revenues (expenses) were:

Revenue from cash investments was 27.56% higher in 2008, due to a higher average balance of cash invested. This revenue was R\$ 53,863 in 1Q08, vs. R\$ 42,226 in 2007.

The revenue from arrears penalty payments on client electricity bills was R\$ 26,281 higher, at R\$ 50,708 in 1Q08, vs. R\$ 24,427 in 1Q07. A principal component in this difference was reflected in revenue of Cemig Distribuição in 1Q08 of R\$ 10,516, when certain large industrial

consumers paid accounts relating to previous year on which the value of the principal was considerably lower than the amount added as financial charges.

Revenue from monetary updating on the General Agreement for the Electricity Sector was 27.50% lower. The revenue was R\$ 45,206 in the first quarter of 2008, vs. R\$ 62,353 in 1Q 2007 reflecting the lower value of the regulatory assets in 2008, as part of the regulatory assets previously posted (RTE and Deferred Tariff Adjustment) were amortized.

Monetary updating and interest on the Deferred Tariff Adjustment was 24.79% lower, at R\$ 25,897, in 1Q08, than in 1Q07 (R\$ 34,433) again due to reduction of the principal value of the asset as a result of parts of it being received in electricity accounts. For further details please see Explanatory Note 11 to the Consolidated Quarterly Information.

Servicing on loans and financings 37.64% lower, in the amount of R\$ 83,922, mainly reflecting a lower CDI rate (the indexor for the contracts) in 1Q08 than in 1Q07.

Net loss of R\$ 7,820 on currency variations in 1Q08, compared to net gain of R\$ 29,475 in 1Q07, basically reflecting effects on foreign currency loans and financings. The FX loss in 2008 mainly reflects the variation in the Yen (which is indexor of some contracts of Cemig Geração e Transmissão): the Yen appreciated by 10.78% during the first quarter of 2008, but devalued by 3.10% during 1Q 2007. In contrast, the US Dollar devalued in both periods: by 1.25% in 1Q 2008, and by 4.10% in 1Q07 providing some reduction in the FX loss.

Net loss on financial instruments in 1Q08 of R\$ 5,00, compared to a net loss of R\$ 34,961 in the same period of 2007. This mainly arises from the variation in the US Dollar mentioned in the previous paragraph, since the Company entered swap transactions, for part of its debt in foreign currency, in which the indexor on contracts was swapped from foreign currency to CDI.

For a breakdown of financial revenues and expenses, see Explanatory Note 28 to the Consolidated Quarterly Information.

Income tax and Social Contribution

In 1Q08, Cemig posted expenses on income tax and Social Contribution of R\$ 276,097, representing 34.48% of the pre-tax profit of R\$ 800,855. In 1Q07, the company posted expenses on income tax and Social Contribution of R\$ 204,486, representing 32.11% of the pre-tax profit of R\$ 636,918. These effective rates are compared with the nominal rates in Note 10 to the Consolidated Quarterly Information.
