HORMEL FOODS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In Thousands of Dollars, Except Per Share Amounts)

(Unaudited)

NOTE A

GENERAL

Basis of Presentation

The accompanying unaudited consolidated financial statements of Hormel Foods Corporation (the Company) have been prepared in accordance with generally accepted accounting principles for interim financial information, and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the interim period are not necessarily indicative of the results that may be expected for the full year. The Company has evaluated all subsequent events through September 4, 2009, which is the date that the accompanying unaudited financial statements are being issued. The balance sheet at October 26, 2008, has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. For further information, refer to the consolidated financial statements and footnotes included in the Company's Annual Report on Form 10-K for the fiscal year ended October 26, 2008.

Certain reclassifications of previously reported amounts have been made to conform to the current year presentation. The reclassifications had no impact on net earnings as previously reported.

Change in Accounting Principle

In the first quarter of fiscal 2009, the Company changed its method of accounting for shipping and handling expenses and reclassified them from selling, general and administrative to cost of products sold. This presentation is preferable because the inclusion of shipping and handling expenses in cost of products sold better reflects the cost of producing and distributing the Company's products. It also enhances the comparability of the financial statements with our industry peers. As required by U.S. generally accepted accounting principles, the change has been reflected in the Consolidated Statements of Operations through retrospective application of the change in accounting principle. The change resulted in a decrease in selling, general and administrative (and a corresponding increase in cost of products sold) for fiscal years 2008, 2007, and 2006 of \$459,818, \$411,726, and \$409,487, respectively. For the third quarter and nine months ended July 27, 2008, the reclassification totaled \$116,648 and \$338,663, respectively. The change did not impact net earnings or net earnings per share as previously reported.

Investments

The Company maintains a rabbi trust to fund certain supplemental executive retirement plans and deferred income plans, which is included in other assets on the Consolidated Statements of Financial Position. The securities held by the trust are classified as trading securities in accordance with Statement of Financial Accounting Standards (SFAS) No. 115, Accounting for Certain Investments in Debt and Equity Securities, and therefore, unrealized gains and losses associated with these investments are included in the Company's earnings. Gains related to securities still held by the trust were \$5,674 and \$11,522 for the quarter and nine months ended July 26, 2009, respectively, compared to losses of \$4,795 and \$8,604 for the quarter and nine months ended July 27, 2008. The Company has begun to transition the majority of this portfolio to more fixed return investments to reduce the exposure to volatility in equity markets going forward.

Table of Contents

Supplemental Cash Flow Information

Non-cash investment activities presented on the Consolidated Statements of Cash Flows generally consist of unrealized gains or losses on the Company's rabbi trust investments, amortization of affordable housing investments, and amortization of bond financing costs. Additionally, the Company had a \$2,400 investment write-off in the third quarter of fiscal 2008. The noted investments are included in other assets on the Consolidated Statements of Financial Position. Changes in the value of these investments are included in the Company's net earnings and are presented in the Consolidated Statements of Operations as either interest and investment income or interest expense, as appropriate.

Guarantees

The Company enters into various agreements guaranteeing specified obligations of affiliated parties. The Company's guarantees either terminate in one year or remain in place until such time as the Company revokes the agreement. The Company currently provides a revocable standby letter of credit for obligations of an affiliated party that may arise under worker compensation claims. This guarantee provided by the Company amounted to \$3,890 as of July 26, 2009, and is not reflected in the Company's Consolidated Statements of Financial Position.

The Company has also guaranteed a \$9,000 loan of an independent farm operator. The loan arose to provide financing to develop a hog growing operation on a tract of land in Arizona, and the term of the loan runs through November 2023. Approximately \$2,900 of the loan proceeds have been spent to date, with the remaining \$6,100 being held in an escrow account. The Company is obligated to make payments if the farm operator fails to do so, and the Company has made immaterial payments in fiscal 2008 and 2009. As there is no current intention to spend additional funds on this project, the Company estimates its maximum liability remaining under this guarantee to be approximately \$2,400 plus interest. The portion of the potential obligation currently held in escrow does not represent a risk to the Company and is therefore not reflected in the Company's Consolidated Statements of Financial Position.

New Accounting Pronouncements

In May 2009, the Financial Accounting Standards Board (FASB) issued SFAS No. 165, *Subsequent Events* (SFAS 165). The pronouncement sets forth the period after the balance sheet date during which management of a reporting entity shall evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, the circumstances under which an entity shall recognize events or transactions occurring after the balance sheet date in its financial statements, and the disclosures that an entity shall make about events or transactions that occurred after the balance sheet date. SFAS 165 did not result in a significant change from current practice, as it requires an entity to recognize in the financial statements the effects of all subsequent events that provide additional evidence about conditions that existed at the date of the balance sheet. Subsequent events that provide evidence about conditions that did not exist at the date of the balance sheet but arose after the balance sheet date but before financial statements are issued (or are available to be issued) are not recognized, but may require additional disclosure. Finally, SFAS 165 requires disclosure of the date through which subsequent events have been evaluated, and the basis for that date. SFAS 165 was effective for interim or annual financial periods ending after June 15, 2009, and therefore, the Company adopted SFAS 165 in the third quarter of fiscal 2009.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities* (SFAS 161). The pronouncement amends and expands the disclosure requirements previously required by SFAS No. 133, *Accounting for Derivative Instruments*

Edgar Filing: HORMEL FOODS CORP /DE/ - Form 10-Q

and Hedging Activities. This statement requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. SFAS 161 was effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. The Company adopted the provisions of SFAS 161 in the second quarter of fiscal 2009, and the required disclosures are provided in Note H Derivatives and Hedging. Adoption did not impact consolidated net earnings, cash flows, or financial position.

Table of Contents

In December 2007, the FASB issued SFAS No. 141 (revised 2007), *Business Combinations* (SFAS 141(R)). The pronouncement establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree, recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase, and determines what information to disclose to enable the users of the financial statements to evaluate the nature and financial effects of the business combination. SFAS 141(R) is effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. Generally, the effect of SFAS 141(R) will depend on future acquisitions. However, the accounting for any tax uncertainties will be subject to the provisions of SFAS 141(R). The Company will adopt SFAS 141(R) at the beginning of fiscal 2010, and is currently assessing the impact of adopting this accounting standard.

In December 2007, the FASB also issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements* an amendment of ARB No. 51 (SFAS 160). The pronouncement establishes accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. It also amends certain of Accounting Research Bulletin No. 51's consolidation procedures for consistency with the requirements of SFAS 141(R). SFAS 160 is effective for fiscal years beginning on or after December 15, 2008, and interim periods within those fiscal years. The Company will adopt SFAS 160 at the beginning of fiscal 2010, and is currently assessing the impact of adopting this accounting standard.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159). The pronouncement permits entities to choose to measure many financial instruments and certain other items at fair value, which provides the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently, without having to apply complex hedge accounting provisions. SFAS 159 was effective for fiscal years beginning after November 15, 2007, and therefore, the Company adopted SFAS 159 at the beginning of fiscal 2009. The adoption of SFAS 159 did not impact consolidated net earnings, cash flows, or financial position, as the Company did not elect the fair value option.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS 157). The pronouncement defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. SFAS 157 applies under other accounting pronouncements that require or permit fair value measurements, and does not require any new fair value measurements. SFAS 157 is effective for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. However, in February 2008, the FASB also issued FASB Staff Position FAS 157-2 (FSP 157-2), which delayed the effective date of SFAS 157 by one year for nonfinancial assets and liabilities measured at fair value that are recognized or disclosed on a nonrecurring basis (e.g. goodwill, intangible assets, and long-lived assets measured at fair value for impairment testing or nonfinancial assets and liabilities initially measured at fair value during a business combination). Therefore, the Company adopted SFAS 157 at the beginning of fiscal 2009 for its financial assets and liabilities. Adoption did not impact net earnings, cash flows, or financial position, but resulted in additional disclosures. (See further discussion in Note I *Fair Value Measurements*.) Subject to the deferral allowed by FSP 157-2, the Company will apply the provisions of SFAS 157 to its nonfinancial assets and liabilities in fiscal 2010, and is currently assessing the impact of this adoption.

In September 2006, the FASB also issued SFAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans* an amendment of FASB Statements No. 87, 88, 106, and 132(R). For fiscal years ending after December 15, 2008, the pronouncement requires plan sponsors to measure defined benefit plan assets and obligations as of the date of the plan sponsor's fiscal year end statement of financial position. The Company adopted these measurement date provisions at the beginning of fiscal 2009, and elected to use the 15 month alternative measurement approach as an August 1 measurement date had previously been used. The Company recognized an \$11,793 decrease in retained earnings, an \$8,416 increase in pension and post-retirement benefits, a \$1,459 decrease in accumulated other comprehensive loss, a \$1,006 decrease in pension assets, and a \$912 increase in deferred tax liabilities, upon adoption.

Table of Contents**NOTE B ACQUISITIONS**

On June 13, 2008, the Company purchased Boca Grande Foods, Inc. (Boca Grande) for a purchase price of \$23,483 cash, including related costs. Boca Grande manufactures, sells, and distributes liquid portion products, and operates a facility in Duluth, Georgia. This acquisition provides additional capacity, production capabilities, and customers for liquid portion products for Diamond Crystal Brands within the Specialty Foods segment.

Operating results for Boca Grande are included in the Company's Consolidated Statements of Operations from the date of acquisition. Pro forma results are not presented, as the acquisition is not material to the consolidated Company.

NOTE C STOCK-BASED COMPENSATION

The Company has stock incentive plans for employees and non-employee directors, including stock options and nonvested shares. The Company's policy is to grant options with the exercise price equal to the market price of the common stock on the date of grant. Ordinary options vest over periods ranging from six months to four years and expire ten years after the grant date. The Company recognizes stock-based compensation expense ratably over the shorter of the requisite service period or vesting period. The fair value of stock-based compensation granted to retirement-eligible individuals is expensed at the time of grant.

A reconciliation of the number of options outstanding and exercisable (in thousands) as of July 26, 2009, and changes during the nine months then ended, are as follows:

	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at October 26, 2008	10,735	\$ 31.04		
Granted	1,312	26.80		
Exercised	(199)	18.06		
Forfeitures	(73)	37.45		
Outstanding at July 26, 2009	11,775	\$ 30.75	5.9 years	\$ 71,425
Exercisable at July 26, 2009	7,330	\$ 28.33	4.6 years	\$ 58,575

The weighted-average grant date fair value of stock options granted, and the total intrinsic value of options exercised during the third quarter and first nine months of fiscal years 2009 and 2008, are as follows:

Three Months Ended		Nine Months Ended	
July 26, 2009	July 27, 2008	July 26, 2009	July 27, 2008

Edgar Filing: HORMEL FOODS CORP /DE/ - Form 10-Q

Weighted-average grant date fair value		N/A		N/A	\$	5.86	\$	10.38
Intrinsic value of exercised options	\$	1,046	\$	1,915	\$	2,604	\$	26,521

The fair value of each ordinary option award is calculated on the date of grant using the Black-Scholes valuation model utilizing the following weighted-average assumptions. No options were granted in the three month periods ended July 26, 2009, or July 27, 2008.

	Nine Months Ended	
	July 26, 2009	July 27, 2008
Risk-Free Interest Rate	3.2%	4.0%
Dividend Yield	2.5%	1.8%
Stock Price Volatility	22.0%	21.0%
Expected Option Life	8 years	8 years

Table of Contents

As part of the annual valuation process, the Company reassesses the appropriateness of the inputs used in the valuation models. The Company establishes the risk-free interest rate using stripped U.S. Treasury yields as of the grant date where the remaining term is approximately the expected life of the option. The dividend yield is set based on the Company's targeted dividend yield. The expected volatility assumption is set based primarily on historical volatility. As a reasonableness test, implied volatility from exchange traded options is also examined to validate the volatility range obtained from the historical analysis. The expected life assumption is set based on an analysis of past exercise behavior by option holders. In performing the valuations for ordinary option grants, the Company has not stratified option holders as exercise behavior has historically been consistent across all employee groups.

The Company's nonvested shares vest after five years or upon retirement. A reconciliation of the nonvested shares (in thousands) as of July 26, 2009, and changes during the nine months then ended, is as follows:

	Shares		Weighted-Average Grant-Date Fair Value
Nonvested at October 26, 2008	77	\$	35.72
Granted	28		30.39
Vested	(8)		26.97
Nonvested at July 26, 2009	97	\$	34.90

No nonvested shares were granted or vested in the three month periods ended July 26, 2009, or July 27, 2008. The weighted-average grant date fair value of nonvested shares granted, the total fair value of nonvested shares granted, and the fair value of shares that have vested during first nine months of fiscal years 2009 and 2008, are as follows:

	Nine Months Ended	
	July 26, 2009	July 27, 2008
Weighted-average grant date fair value	\$ 30.39	\$ 38.97
Fair value of nonvested shares granted	\$ 836	\$ 974
Fair value of shares vested	\$ 204	\$ 43

Stock-based compensation expense, along with the related income tax benefit, for the third quarter and first nine months of fiscal years 2009 and 2008 are presented in the table below.

	Three Months Ended		Nine Months Ended	
	July 26, 2009	July 27, 2008	July 26, 2009	July 27, 2008
Stock-based compensation expense recognized	\$ 2,416	\$ 2,827	\$ 9,832	\$ 12,405
Income tax benefit recognized	(929)	(1,079)	(3,781)	(4,737)
After-tax stock-based compensation expense	\$ 1,487	\$ 1,748	\$ 6,051	\$ 7,668

At July 26, 2009, there was \$16,626 of total unrecognized compensation expense from stock-based compensation arrangements granted under the plans. This compensation is expected to be recognized over a weighted-average period of approximately 2.4 years. During the quarter and nine months ended July 26, 2009, cash received from stock option exercises was \$476 and \$1,935, compared to \$255 and \$10,994 for the quarter and nine months ended July 27, 2008. The total tax benefit to be realized for tax deductions from these option exercises for the quarter and nine

Edgar Filing: HORMEL FOODS CORP /DE/ - Form 10-Q

months ended July 26, 2009, was \$403 and \$1,002, respectively, compared to \$731 and \$10,128 in the comparable periods in fiscal 2008. The amounts reported for tax deductions for option exercises in the quarter and nine months ended July 26, 2009 include \$397 and \$987, respectively, of excess tax benefits compared to \$644 and \$9,747, respectively, of excess tax benefits in the comparable periods last year, which are included in Other under financing activities on the Consolidated Statements of Cash Flows (with an offsetting amount in other operating activities).

Shares issued for option exercises and nonvested shares may be either authorized but unissued shares, or shares of treasury stock acquired in the open market or otherwise.

Table of Contents**NOTE D GOODWILL AND INTANGIBLE ASSETS**

The changes in the carrying amount of goodwill for the three and nine month periods ended July 26, 2009, are presented in the tables below. Additions and adjustments during fiscal 2009 primarily relate to the Boca Grande acquisition.

	Grocery Products	Refrigerated Foods	JOTS	Specialty Foods	All Other	Total
Balance as of April 26, 2009	\$ 123,316	\$ 85,539	\$ 203,214	\$ 206,962	\$ 674	\$ 619,705
Goodwill acquired				249		249
Purchase adjustments				(183)		(183)
Balance as of July 26, 2009	\$ 123,316	\$ 85,539	\$ 203,214	\$ 207,028	\$ 674	\$ 619,771

	Grocery Products	Refrigerated Foods	JOTS	Specialty Foods	All Other	Total
Balance as of October 26, 2008	\$ 123,316	\$ 85,537	\$ 203,214	\$ 206,584	\$ 674	\$ 619,325
Goodwill acquired		2		304		306
Purchase adjustments				140		140
Balance as of July 26, 2009	\$ 123,316	\$ 85,539	\$ 203,214	\$ 207,028	\$ 674	\$ 619,771

The gross carrying amount and accumulated amortization for definite-lived intangible assets are presented below.

	July 26, 2009		October 26, 2008	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Proprietary software & technology	\$ 23,800	\$ (10,744)	\$ 24,200	\$ (8,986)
Customer lists/relationships	19,678	(7,229)	21,078	(6,936)
Formulas & recipes	17,104	(9,328)	20,604	(11,405)
Non-compete covenants	7,020	(4,818)	20,120	(16,734)
Distribution network	4,120	(2,436)	4,120	(2,127)
Other intangibles	7,230	(3,308)	8,630	(3,829)
Total	\$ 78,952	\$ (37,863)	\$ 98,752	\$ (50,017)

Amortization expense was \$2,563 and \$7,735 for the three and nine months ended July 26, 2009, respectively, compared to \$2,740 and \$8,888 for the three and nine months ended July 27, 2008.

Estimated annual amortization expense for the five fiscal years after October 26, 2008, is as follows:

2009	\$	10,299
2010		9,199
2011		7,681
2012		7,124

2013 6,071

The carrying amounts for indefinite-lived intangible assets are presented in the table below.

	July 26, 2009		October 26, 2008	
Brands/tradenames/trademarks	\$	94,410	\$	94,500
Other intangibles		7,984		7,984
Total	\$	102,394	\$	102,484

Table of Contents**NOTE E EARNINGS PER SHARE DATA**

The following table sets forth the denominator for the computation of basic and diluted earnings per share:

	Three Months Ended		Nine Months Ended	
	July 26, 2009	July 27, 2008	July 26, 2009	July 27, 2008
Basic weighted-average shares outstanding	134,255	135,391	134,301	135,583
Dilutive potential common shares	1,465	1,664	1,118	1,864
Diluted weighted-average shares outstanding	135,720	137,055	135,419	137,447

NOTE F COMPREHENSIVE INCOME

Components of comprehensive income, net of taxes, are:

	Three Months Ended		Nine Months Ended	
	July 26, 2009	July 27, 2008	July 26, 2009	July 27, 2008
Net earnings	\$ 77,169	\$ 51,947	\$ 238,937	\$ 217,689
Other comprehensive income (loss):				
Deferred (loss) gain on hedging	(4,455)	9,377	(14,860)	43,097
Reclassification adjustment into net earnings	8,522	(11,003)	23,495	(16,069)
Foreign currency translation	1,440	(2,039)	(1,848)	3,013
Pension and post-retirement benefits	4,303	2,161	1,817	6,449
Other comprehensive income (loss)	9,810	(1,504)	8,604	36,490
Total comprehensive income	\$ 86,979	\$ 50,443	\$ 247,541	\$ 254,179

The components of accumulated other comprehensive loss, net of tax, are as follows :

	July 26, 2009	October 26, 2008
Foreign currency translation	\$ 3,227	\$ 5,075
Pension & other benefits	(74,332)	(77,608)
Deferred loss on hedging	(32,016)	(40,651)
Accumulated other comprehensive loss	\$ (103,121)	\$ (113,184)

NOTE G **INVENTORIES**

Principal components of inventories are:

	July 26, 2009		October 26, 2008
Finished products	\$ 408,566	\$	431,095
Raw materials and work-in-process	200,130		215,353
Materials and supplies	135,971		138,094
Total	\$ 744,667	\$	784,542

Table of Contents**NOTE H DERIVATIVES AND HEDGING**

The Company uses hedging programs to manage price risk associated with commodity purchases. These programs utilize futures contracts and swaps to manage the Company's exposure to price fluctuations in the commodities markets. The Company has determined its hedge programs to be highly effective in offsetting the changes in fair value or cash flows generated by the items hedged.

Cash Flow Hedges: The Company utilizes corn and soybean meal futures to offset the price fluctuation in the Company's future direct grain purchases, and has entered into various swaps to hedge the purchases of grain and natural gas at certain plant locations. The financial instruments are designated and accounted for as cash flow hedges, and the Company measures the effectiveness of the hedges on a regular basis. Effective gains or losses related to these cash flow hedges are reported in accumulated other comprehensive loss and reclassified into earnings, through cost of products sold, in the period or periods in which the hedged transactions affect earnings. Any gains or losses related to hedge ineffectiveness are recognized in the current period cost of products sold. The Company typically does not hedge its grain exposure beyond 24 months and its natural gas exposure beyond 36 months. As of July 26, 2009, the Company had the following outstanding commodity futures contracts and swaps that were entered into to hedge forecasted purchases:

Commodity	Volume
Corn	17.2 million bushels
Soybean Meal	157,600 tons
Natural Gas	5.4 million MMBTU s

As of July 26, 2009, the Company has included in accumulated other comprehensive loss, hedging losses of \$50,048 (before tax) relating to its positions. The Company expects to recognize the majority of these losses over the next 12 months.

Fair Value Hedges: The Company utilizes futures to minimize the price risk assumed when forward priced contracts are offered to the Company's commodity suppliers. The intent of the program is to make the forward priced commodities cost nearly the same as cash market purchases at the date of delivery. The futures contracts are designated and accounted for as fair value hedges, and the Company measures the effectiveness of the hedges on a regular basis. Changes in the fair value of the futures contracts, along with the gain or loss on the hedged purchase commitment, are marked-to-market through earnings and are recorded on the Consolidated Statement of Financial Position as a current asset and liability, respectively. Effective gains or losses related to these fair value hedges are recognized through cost of products sold in the period or periods in which the hedged transactions affect earnings. Any gains or losses related to hedge ineffectiveness are recognized in the current period cost of products sold. As of July 26, 2009, the Company had the following outstanding commodity futures contracts designated as fair value hedges:

Commodity	Volume
Corn	8.0 million bushels
Soybean Meal	1,900 tons
Lean Hogs	564,800 cwt

Other Derivatives: During fiscal 2009, the Company has held certain futures contract positions as part of a merchandising program and to manage the Company's exposure to fluctuations in foreign currencies. The Company has not applied hedge accounting to these positions. All foreign exchange contracts were closed as of the end of the third quarter. As of July 26, 2009, the Company had the following outstanding

Edgar Filing: HORMEL FOODS CORP /DE/ - Form 10-Q

commodity futures contracts related to its merchandising program:

Commodity	Volume
Pork Bellies	3,600 cwt
Lean Hogs	9,600 cwt

Table of Contents

Fair Values: The fair values of the Company's derivative instruments as of July 26, 2009, were as follows:

	July 26, 2009	Fair Value (1)
Location on Consolidated Statement of Financial Position		
Asset Derivatives:		
Derivatives Designated as Hedges:		
Commodity contracts	Prepaid expenses and other current assets	\$ 24,521
Derivatives Not Designated as Hedges:		
Commodity contracts	Prepaid expenses and other current assets	(3,595)
Total Asset Derivatives	\$	20,926
Liability Derivatives:		
Derivatives Designated as Hedges:		
Commodity contracts	Accounts payable	\$ 24,899
Total Liability Derivatives	\$	24,899

(1) Amounts represent the gross fair value of derivative assets and liabilities. In accordance with FASB Staff Position FIN No. 39-1, the Company nets its derivative assets and liabilities, including cash collateral, when a master netting arrangement exists between the Company and the counterparty to the derivative contract. See Note I - Fair Value Measurements for a discussion of the net amounts as reported in the Consolidated Statement of Financial Position.

Derivative Gains and Losses: Gains or losses (before tax) related to the Company's derivative instruments for the quarter ended July 26, 2009, were as follows:

	Gain/(Loss) Recognized in Accumulated Other Comprehensive Loss (AOCL) (Effective Portion) (1)	Location on Consolidated Statement of Operations	Gain/(Loss) Reclassified from AOCL into Earnings (Effective Portion) (1)	Gain/(Loss) Recognized in Earnings (Ineffective Portion) (2) (4)
Cash Flow Hedges:				
Commodity contracts	\$ (5,341)	Cost of products sold	\$ (13,831)	\$ 1,363
Fair Value Hedges:				
Commodity contracts		Cost of products sold	\$ 11,333	\$ (118)
Derivatives Not Designated as Hedges:				
		Location on Consolidated Statement of Operations	Gain/(Loss) Recognized in Earnings	

Edgar Filing: HORMEL FOODS CORP /DE/ - Form 10-Q

Commodity contracts	Cost of products sold	\$	(154)
Foreign exchange contracts	Interest and investment income (loss)	\$	(141)

Table of Contents

Gains or losses (before tax) related to the Company's derivative instruments for the nine months ended July 26, 2009, were as follows:

	Gain/(Loss) Recognized in Accumulated Other Comprehensive Loss (AOCL) (Effective Portion) (1)	Location on Consolidated Statement of Operations	Gain/(Loss) Reclassified from AOCL into Earnings (Effective Portion) (1)	Gain/(Loss) Recognized in Earnings (Ineffective Portion) (2) (4)
Cash Flow Hedges:				
Commodity contracts	\$ (22,205)	Cost of products sold	\$ (38,131)	\$ 810
Fair Value Hedges:				
Commodity contracts		Cost of products sold	\$ 48,949	\$ (2,386)
Derivatives Not Designated as Hedges:				
Commodity contracts		Cost of products sold	\$ 239	
Foreign exchange contracts		Interest and investment income (loss)	\$ (141)	

(1) Amounts represent gains or losses in AOCL before tax. See Note F Comprehensive Income for the after tax impact of these gains or losses on net earnings.

(2) There were no gains or losses excluded from the assessment of hedge effectiveness during the quarter or nine months.

(3) Gains on commodity contracts designated as fair value hedges were offset by a corresponding loss on the underlying hedged purchase commitment.

(4) There were no gains or losses resulting from the discontinuance of cash flow hedges during the quarter or nine months.

(5) There were no gains or losses recognized as a result of a hedged firm commitment no longer qualifying as a fair value hedge during the quarter or nine months.

NOTE I FAIR VALUE MEASUREMENTS

Effective at the beginning of fiscal 2009, the Company adopted the provisions of SFAS 157 for its financial assets and liabilities carried at fair value on a recurring basis in the consolidated financial statements. As discussed in Note A, the FASB allowed deferral of the effective date of

Edgar Filing: HORMEL FOODS CORP /DE/ - Form 10-Q

SFAS 157 for one year for nonfinancial assets and liabilities measured at fair value that are recognized or disclosed on a nonrecurring basis. SFAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements.

SFAS 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). SFAS 157 also establishes a fair value hierarchy which requires assets and liabilities measured at fair value to be categorized into one of three levels based on the inputs used in the valuation. Assets and liabilities are classified in their entirety based on the lowest level of input significant to the fair value measurement. The three levels are defined as follows:

Level 1: Observable inputs based on quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Observable inputs, other than those included in Level 1, based on quoted prices for similar assets and liabilities in active markets, or quoted prices for identical assets and liabilities in inactive markets.

Level 3: Unobservable inputs that reflect an entity's own assumptions about what inputs a market participant would use in pricing the asset or liability based on the best information available in the circumstances.

Table of Contents

The Company's financial assets and liabilities that are measured at fair value on a recurring basis as of July 26, 2009, and their level within the fair value hierarchy, are presented in the table below.

	Fair Value Measurements at July 26, 2009			
	Fair Value at July 26, 2009	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets at Fair Value:				
Cash equivalents (1)	\$ 211,218	\$ 211,218	\$	\$
Trading securities (2)	100,053	64,503	35,550	
Commodity derivatives (3)	6,860	6,860		
Total Assets at Fair Value	\$ 318,131	\$ 282,581	\$ 35,550	\$
Liabilities at Fair Value:				
Commodity derivatives (3)	\$ 24,899	\$	\$ 24,899	\$
Deferred compensation (2)	35,811	9,880	25,931	
Total Liabilities at Fair Value	\$ 60,710	\$ 9,880	\$ 50,830	\$

The following methods and assumptions were used to estimate the fair value of the financial assets and liabilities above:

- (1) The Company's cash equivalents consist of money market funds rated AAA. As these investments have a maturity date of three months or less, the carrying value approximates fair value.
- (2) The Company holds trading securities as part of a rabbi trust to fund certain supplemental executive retirement plans and deferred income plans. The rabbi trust is included in other assets on the Consolidated Statements of Financial Position and is valued based on the underlying fair value of each fund held by the trust. A portion of the funds held related to the supplemental executive retirement plans have been invested in fixed income funds managed by a third party. The declared rate on these funds is set based on a formula using the yield of the general account investment portfolio that supports the fund, adjusted for expenses and other charges. The rate is guaranteed for one year at issue, and may be reset annually on the policy anniversary, subject to a guaranteed minimum rate. As the value is based on adjusted market rates, and the fixed rate is only reset on an annual basis, these funds are classified as Level 2. The remaining funds held are also managed by a third party, and include equity securities, money market accounts, bond funds, or other portfolios for which there is an active quoted market. Therefore these securities are classified as Level 1. The related deferred compensation liabilities are included in other long term liabilities on the Consolidated Statements of Financial Position and are valued based on the underlying investment selections held in each participant's account. Investment options generally mirror those funds held by the rabbi trust, for which there is an active quoted market. Therefore these investment balances are classified as Level 1. The Company also offers a fixed rate investment option to participants. The rate earned on these investments is adjusted annually based on a specified percentage of the United States Internal Revenue Service (I.R.S.) Applicable Federal Rates in effect and therefore these balances are classified as Level 2.
- (3) The Company's commodity derivatives represent futures contracts and swaps used in its hedging programs to offset price fluctuations associated with purchases of corn, soybean meal, and natural gas, and to minimize the price risk assumed when forward priced contracts are offered to the Company's commodity suppliers. The Company's futures contracts for corn and soybean meal are traded on the Chicago Board of Trade (CBOT), while futures contracts for lean hogs and bellies are traded on the Chicago Mercantile Exchange. These are active markets with quoted prices available and therefore the futures contracts are classified as Level 1. The Company's corn and soybean meal swaps settle based on quoted prices from the CBOT, while natural gas swaps are settled based on quoted prices from the New York Mercantile Exchange. As the swaps settle based on quoted market prices, but are not held directly with the exchange, the swaps are classified as Level 2. All derivatives are reviewed for potential credit risk and risk of nonperformance. In accordance with FASB Staff Position FIN No. 39-1, the Company

Table of Contents

nets its derivative assets and liabilities, including cash collateral, when a master netting arrangement exists between the Company and the counterparty to the derivative contract. The net balance for each arrangement is included in prepaid expenses and other current assets or accounts payable, as appropriate, in the Consolidated Statements of Financial Position. As of July 26, 2009, the Company had recognized the right to reclaim cash collateral of \$42,445 from, and the obligation to return cash collateral of \$56,511 to, various counterparties.

The Company's financial assets and liabilities also include accounts receivable, accounts payable, and short-term debt, for which carrying value approximates fair value due to the short periods to maturity for those instruments. The Company does not carry its long-term debt at fair value in its Consolidated Statements of Financial Position. Based on borrowing rates available to the Company for long-term financing with similar terms and average maturities, the fair value of long-term debt, utilizing discounted cash flows, was \$383,029 as of July 26, 2009, and \$357,654 as of October 26, 2008.

NOTE J PENSION AND OTHER POST-RETIREMENT BENEFITS

Net periodic benefit cost for pension and other post-retirement benefit plans consists of the following:

	Pension Benefits			
	Three Months Ended		Nine Months Ended	
	July 26, 2009	July 27, 2008	July 26, 2009	July 27, 2008
Service cost	\$ 4,530	\$ 4,852	\$ 13,563	\$ 14,867
Interest cost	11,788	10,956	35,405	33,287
Expected return on plan assets	(13,074)	(13,994)	(39,222)	(42,344)
Amortization of prior service cost	(154)	(37)	(451)	(113)
Recognized actuarial loss	1,291	1,345	3,965	3,978
Settlement charge	2,569		6,788	
Net periodic cost	\$ 6,950	\$ 3,122	\$ 20,048	\$ 9,675

	Post-retirement Benefits			
	Three Months Ended		Nine Months Ended	
	July 26, 2009	July 27, 2008	July 26, 2009	July 27, 2008
Service cost	\$ 553	\$ 683	\$ 1,657	\$ 2,047
Interest cost	5,583	5,649	16,749	16,948
Amortization of prior service cost	1,376	1,454	4,129	4,362
Recognized actuarial (gain) loss	(210)	736	(630)	2,208
Net periodic cost	\$ 7,302	\$ 8,522	\$ 21,905	\$ 25,565

Charges of \$4,219 and \$2,569 were recognized in the first and third quarter of fiscal 2009, respectively, for settlements on non-qualified pension plans resulting from executive retirements. The Company made contributions totaling \$55,000 in the third quarter of fiscal 2009 to fund its pension plans, and is currently evaluating an additional discretionary contribution.

NOTE K INCOME TAXES

Edgar Filing: HORMEL FOODS CORP /DE/ - Form 10-Q

The Company adopted the provisions of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109 (FIN 48) at the beginning of fiscal 2008, on October 29, 2007. The amount of unrecognized tax benefits, including interest and penalties, at July 26, 2009, recorded in other long-term liabilities was \$41,321, of which \$26,952 would impact the Company's effective tax rate if recognized. The Company includes accrued interest and penalties related to uncertain tax positions in income tax expense, with \$988 and \$1,988 included in expense in the third quarter and first nine months of fiscal 2009, respectively. The amount of accrued interest and penalties at July 26, 2009, associated with unrecognized tax benefits was \$10,833.

Table of Contents

The Company is regularly audited by federal and state taxing authorities. During fiscal year 2007, the I.R.S. concluded its examination of the Company's consolidated federal income tax returns for the fiscal years through 2005. The Company is currently under examination by the I.R.S. for the fiscal years 2006 and 2007. The Company is in various stages of audit by several state taxing authorities on a variety of fiscal years, as far back as 1996. While it is reasonably possible that one or more of these audits may be completed within the next 12 months and that the related unrecognized tax benefits may change, based on the status of the examinations it is not possible to reasonably estimate the effect of any amount of such change to previously recorded uncertain tax positions.

NOTE L SEGMENT REPORTING

The Company develops, processes, and distributes a wide array of food products in a variety of markets. Under the criteria set forth by SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information, the Company reports its results in the following five segments: Grocery Products, Refrigerated Foods, Jennie-O Turkey Store, Specialty Foods, and All Other.

The Grocery Products segment consists primarily of the processing, marketing, and sale of shelf-stable food products sold predominantly in the retail market.

The Refrigerated Foods segment includes the Hormel Refrigerated, Farmer John, Burke Corporation, and Dan's Prize operating segments. This segment consists primarily of the processing, marketing, and sale of branded and unbranded pork and beef products for retail, foodservice, and fresh product customers. Results for the Hormel Refrigerated operating segment include the Precept Foods business, which offers a variety of case-ready beef and pork products to retail customers. Precept Foods, LLC, is a 51 percent owned joint venture between Hormel Foods Corporation and Cargill Meat Solutions Corporation, a wholly-owned subsidiary of Cargill, Incorporated.

The Jennie-O Turkey Store segment consists primarily of the processing, marketing, and sale of branded and unbranded turkey products for retail, foodservice, and fresh product customers.

The Specialty Foods segment includes the Diamond Crystal Brands, Century Foods International, and Hormel Specialty Products operating segments. This segment consists of the packaging and sale of various sugar and sugar substitute products, salt and pepper products, liquid portion products, dessert mixes, ready-to-drink products, gelatin products, and private label canned meats to retail and foodservice customers. This segment also includes the processing, marketing, and sale of nutritional food products and supplements to hospitals, nursing homes, and other marketers of nutritional products.

The All Other segment includes the Hormel Foods International operating segment, which manufactures, markets, and sells Company products internationally. This segment also includes various miscellaneous corporate sales.

Intersegment sales are recorded at prices that approximate cost and are eliminated in the Consolidated Statements of Operations. Equity in earnings of affiliates is included in segment operating profit; however, the Company does not allocate investment income, interest expense, and interest income to its segments when measuring performance. The Company also retains various other income and unallocated expenses at

corporate. These items are included below as net interest and investment income and general corporate expense when reconciling to earnings before income taxes.

Table of Contents

Sales and operating profits for each of the Company's business segments and reconciliation to earnings before income taxes are set forth below. The Company is an integrated enterprise, characterized by substantial intersegment cooperation, cost allocations, and sharing of assets. Therefore, the Company does not represent that these segments, if operated independently, would report the operating profit and other financial information shown below.

	Three Months Ended		Nine Months Ended	
	July 26, 2009	July 27, 2008	July 26, 2009	July 27, 2008
Sales to Unaffiliated Customers				
Grocery Products	\$ 209,012	\$ 222,922	\$ 692,639	\$ 683,801
Refrigerated Foods	847,578	890,978	2,579,064	2,580,259
Jennie-O Turkey Store	295,381	310,532	890,165	893,870
Specialty Foods	167,203	192,001	519,679	563,322
All Other	55,266	61,709	177,022	172,139
Total	\$ 1,574,440	\$ 1,678,142	\$ 4,858,569	\$ 4,893,391

CRITICAL ACCOUNTING POLICIES

There have been no material changes in the Company's Critical Accounting Policies, as disclosed in its Annual Report on Form 10-K for the year ended October 26, 2008.

RESULTS OF OPERATIONS

Overview

The Company is a processor of branded and unbranded food products for retail, foodservice, and fresh product customers. It operates in five segments as described in Note L in the Notes to Consolidated Financial Statements in this Form 10-Q.

The Company earned \$0.57 per diluted share in the third quarter of fiscal 2009, an increase of 50.0 percent compared to \$0.38 per diluted share in the third quarter of fiscal 2008. Significant factors impacting the quarter were:

- Refrigerated Foods profit increased, reflecting significantly reduced input costs for its value-added businesses.
- Jennie-O Turkey Store continued to report increased profits, driven primarily by lower feed costs due to the planned reduction of turkey production and a reduced cost per ton during the quarter.
- Grocery Products profit results were positively impacted by continued strength in sales of core canned items.
- Specialty Foods results declined due to continued weak sales by its Century Foods International operating segment.
- Net interest and investment income showed notable improvement due to gains on the Company's rabbi trust investments.

Consolidated Results

Net earnings for the third quarter of fiscal 2009 increased 48.6 percent to \$77,169 from \$51,947 in the same quarter of 2008. Diluted earnings per share for the quarter increased 50.0 percent to \$0.57 from \$0.38 last year. Net earnings for the first nine months of 2009 increased 9.8

Edgar Filing: HORMEL FOODS CORP /DE/ - Form 10-Q

percent to \$238,937 from \$217,689 in 2008. Diluted earnings per share increased to \$1.76 from \$1.58 for the same period of the prior year.

Net sales for the third quarter of fiscal 2009 decreased 6.2 percent to \$1,574,440 versus \$1,678,142 in 2008. Tonnage decreased 3.7 percent to 1,094 million lbs. for the third quarter compared to 1,137 million lbs. in the same quarter of last year. Net sales for the first nine months of fiscal 2009 decreased 0.7 percent to \$4,858,569 from \$4,893,391 in the first nine months of fiscal 2008. Tonnage for the nine months decreased 2.4 percent to 3,384 million lbs. compared to 3,467 million lbs. in 2008. Declines reflect the continued impact of a weak economy, planned reductions in production for the Company's turkey operations in response to market conditions, and the discontinuance of sales of Carapelli olive oil and certain other product lines. Net sales for the nine months remain comparable to the prior year as strong demand for core product lines and the impact of earlier pricing initiatives have helped to mitigate the impact of the tonnage declines.

Gross profit for the third quarter and first nine months of fiscal 2009 was \$260,324 and \$794,677, respectively, compared to \$229,046 and \$785,689 for the same periods last year. Gross profit as a percentage of net sales for the third quarter and nine months increased to 16.5 and 16.4 percent in 2009, from 13.6 and 16.1 percent for the comparable quarter and nine months of fiscal 2008. The Refrigerated Foods segment benefited from significantly reduced input costs during the quarter compared to the prior year, as a rapid increase in primal

Table of Contents

values due to export demand during the third quarter of fiscal 2008 pressured margins in the segment's value-added businesses. The lower costs were able to offset the impact of continued weak cut-out margins in pork operations. Margin improvement also continued at Jennie-O Turkey Store during the third quarter driven by lower feed costs compared to the prior year, due to a planned reduction in turkey production and a decreased cost per ton. Significantly lower freight expense across most segments of the Company also improved the third quarter and nine month margin results.

Selling, general and administrative expenses for the third quarter and first nine months of fiscal 2009 were \$142,010 and \$424,381, respectively, compared to \$135,256 and \$419,567 last year. As a percentage of net sales, selling, general and administrative expenses for the third quarter and first nine months increased to 9.0 percent and 8.7 percent, respectively, compared to the prior year at 8.1 percent and 8.6 percent. Increased medical costs and higher pension expenses contributed to the increase for both the quarter and nine months, offsetting declines in travel and advertising expenses. Additional employee incentive plan costs also contributed to the increase for the third quarter. The Company expects overall selling, general and administrative expenses to be approximately 9.0 percent of net sales for the remainder of fiscal 2009.

Equity in earnings of affiliates was \$290 and \$964 for the third quarter and first nine months, respectively, compared to \$241 and \$3,431 last year. Equity for both the third quarter and nine months was negatively impacted by the dissolution of the Company's Carapelli USA, LLC joint venture in the second quarter of fiscal 2009. For the first nine months, results for the Company's other joint ventures have been mixed. Decreases compared to the prior year were primarily due to lower results from the Company's 40 percent owned Philippine joint venture, Purefoods-Hormel Company, and the Company's 49 percent owned joint venture, San Miguel Purefoods (Vietnam) Co. Ltd. These declines were partially offset by improved performance from the Company's 50 percent owned joint venture, Herdez Corporation. Minority interests in the Company's consolidated investments are also reflected in these figures, and remained comparable to the prior year.

The effective tax rate for the third quarter and first nine months of fiscal 2009 was 34.6 and 34.9 percent, respectively, compared to 35.2 and 36.1 percent for the comparable quarter and nine months of fiscal 2008. The lower rate for both the third quarter and first nine months of fiscal 2009 reflects more positive returns on the Company's rabbi trust in the current year, which are not taxable. The lower rate for the nine months is also due to an increase in interest reserves as a result of the adoption of FIN 48 and net unfavorable discrete items in the first quarter of fiscal 2008. The Company expects an effective tax rate of approximately 36.0 percent for the remainder of fiscal 2009.

Table of Contents**Segment Results**

Net sales and operating profits for each of the Company's segments are set forth below. The Company is an integrated enterprise, characterized by substantial intersegment cooperation, cost allocations, and sharing of assets. Therefore, the Company does not represent that these segments, if operated independently, would report the operating profit and other financial information shown below. Additional segment financial information can be found in Note L of the Notes to Consolidated Financial Statements in this Form 10-Q.

	July 26, 2009	Three Months Ended July 27, 2008	% Change	July 26, 2009	Nine Months Ended July 27, 2008	% Change

Grocery Products

The Grocery Products segment consists primarily of the processing, marketing, and sale of shelf-stable food products sold predominantly in the retail market.

Grocery Products net sales decreased 6.2 percent for the third quarter and increased 1.3 percent for the first nine months compared to the same fiscal 2008 periods. Tonnage decreased 7.6 percent for the third quarter and 1.0 percent for the first nine months compared to the prior year. Top-line results for both the quarter and nine months were negatively impacted by the discontinuance of sales of Carapelli olive oil in the third quarter, as well as the rationalization of certain other products lines. Excluding those items last year, sales for Grocery Products were essentially flat compared to fiscal 2008. Sales of the SPAM family of products and Hormel chili continued to be strong, with double-digit increases noted for both the third quarter and nine months. These product lines continue to offer a good value proposition to consumers. Sales of Herdez ethnic products were also strong during the third quarter. Sales of Hormel Compleats microwave meals declined during the quarter, reflecting competitive activity and the ongoing economic trend away from convenience items.

Segment profit for Grocery Products increased 11.3 percent for the third quarter and 8.1 percent for the nine months compared to the fiscal 2008. Lower pork input costs and the impact of pricing advances taken in prior periods benefited results for the quarter. This segment has also experienced significant reductions in freight expenses throughout fiscal 2009. Grocery Products continues to be challenged with increased input costs on certain product lines due to higher prices for beef and steel.

Table of Contents

Many of these same factors are expected to continue throughout the remainder of the fiscal year. Continued investments in promotional programs should provide some additional top-line improvement during the fourth quarter. Construction of the new production facility in Dubuque, Iowa also continues, which will provide additional capacity for canned and microwave tray items beginning in fiscal 2010.

Refrigerated Foods

The Refrigerated Foods segment includes the Hormel Refrigerated, Farmer John, Burke Corporation (Burke), and Dan's Prize operating segments. This segment consists primarily of the processing, marketing, and sale of branded and unbranded pork and beef products for retail, foodservice, and fresh product customers. Results for the Hormel Refrigerated operating segment include the Precept Foods business, which offers a variety of case-ready beef and pork products to retail customers. Precept Foods, LLC, is a 51 percent owned joint venture between Hormel Foods Corporation and Cargill Meat Solutions Corporation, a wholly-owned subsidiary of Cargill, Incorporated.

Net sales for the Refrigerated Foods segment decreased 4.9 percent for the third quarter and were flat for the first nine months of fiscal 2009, compared to the same periods of fiscal 2008. Tonnage decreased 0.9 percent and 1.7 percent for the third quarter and first nine months, respectively, compared to last year. The continued weak economy impacted sales results for this segment. Foodservice sales were particularly soft, and lower pricing on retail fresh pork items also contributed to the sales decline.

Segment profit for Refrigerated Foods increased 60.4 and 0.6 percent for the third quarter and first nine months of fiscal 2009, respectively, compared to the prior year. The Company processed 2,266,000 hogs during the third quarter, which decreased slightly from the prior year. Lower input costs and a more favorable product mix drove the increased profits compared to fiscal 2008. However, continued weak cut-out margins persisted into the third quarter, which generated additional pork operating losses and offset a portion of the gains realized in the value-added businesses. This segment has also benefited from significantly reduced freight expenses throughout fiscal 2009, as compared to the prior year.

The Meat Products business unit reported another strong quarter, with double-digit sales growth achieved for *Hormel Natural Choice* lunchmeats, *Hormel* party trays, *Hormel* retail pepperoni, and *DiLusso Deli Company* products. However, sales of *Hormel* refrigerated entrees and *Lloyd's* barbeque ribs showed some declines during the third quarter. The Foodservice business unit also continued to experience sales and tonnage declines, reflecting the ongoing decrease in travel and restaurant business due to economic conditions. The Company has been successful in pursuing other foodservice channels to offset a portion of those lost sales.

Farmer John continued to struggle with lower hog markets for the Company's live hog production facilities, which have generated sizable losses for both the third quarter and first nine months of 2009. However, this business continued to reduce expenses and expand its sales of value-added products, resulting in an overall improvement in profits compared to the prior year third quarter.

The outlook for this segment is mixed entering the fourth quarter. Continued lower input costs are expected to provide some additional benefit, and some improvement in cut-out values has occurred recently. However, weak export markets and softness in the foodservice sector are also expected to persist throughout the remainder of the fiscal year, which could negatively impact results.

Jennie-O Turkey Store

The Jennie-O Turkey Store (JOTS) segment consists primarily of the processing, marketing, and sale of branded and unbranded turkey products for retail, foodservice, and fresh product customers.

JOTS net sales decreased 4.9 percent for the third quarter and were flat for the first nine months versus the comparable periods of fiscal 2008. Tonnage decreased 2.2 percent for the third quarter and 1.8 percent for the first nine months, compared to fiscal 2008 results. Lower sales of retail commodity items, primarily whole birds, were a key driver of the decreased sales due to the timing of shipments and overall lower pricing compared to fiscal 2008. Planned volume reductions have also impacted sales and have driven inventory levels

Table of Contents

significantly lower than the prior year. Value-added net sales also declined in the third quarter, reflecting competitive pressures and changes in consumer behavior driven by economic conditions.

Segment profit for JOTS increased 97.1 percent for the third quarter and 13.3 percent for the first nine months of fiscal 2009 compared to the prior year. Lower feed expense, due to a planned reduction in turkey production and a decreased cost per ton compared to the prior year, was again the key driver of the improved profitability this quarter. Despite production cutbacks, the industry remains in an oversupply situation for breast meat and whole birds, causing commodity markets to remain at unusually low levels. The volume reductions at JOTS noted above have allowed the Company to avoid generating surplus breast meat, which would have been sold at a loss under these market conditions.

Following several consecutive quarters of growth in its value-added businesses, JOTS did report a decline in the third quarter. Gains on retail products, such as *Jennie-O Turkey Store* turkey burgers, were unable to offset decreased revenues for the foodservice and deli business units. The Company continues to focus on its value-added product lines and is pursuing options to restore growth in this area in upcoming quarters, including new media campaigns planned for the fourth quarter.

JOTS continues to focus on balancing inventories with value-added production demand. Export restrictions are a concern entering the fourth quarter. It is also likely that the industry oversupply of breast meat will keep commodity prices low during at least the remainder of fiscal 2009. Although feed costs are expected to be volatile in the fourth quarter, they should still be less than a year ago. The trend of weaker consumer demand is also a challenge, and may impact results for JOTS in the fourth quarter.

Specialty Foods

The Specialty Foods segment includes the Diamond Crystal Brands (DCB), Century Foods International (CFI), and Hormel Specialty Products (HSP) operating segments. This segment consists of the packaging and sale of various sugar and sugar substitute products, salt and pepper products, liquid portion products, dessert mixes, ready-to-drink products, gelatin products, and private label canned meats to retail and foodservice customers. This segment also includes the processing, marketing, and sale of nutritional food products and supplements to hospitals, nursing homes, and other marketers of nutritional products.

Specialty Foods has been challenged throughout fiscal 2009, as net sales decreased 12.9 percent for the third quarter and 7.7 percent for the first nine months, compared to the same periods of fiscal 2008. Tonnage decreased 13.2 percent for the quarter and 9.3 percent for the first nine months, compared to the prior year. The Boca Grande acquisition contributed an incremental \$3,277 of net sales and 4.0 million lbs. of tonnage to the third quarter results for this segment, and \$13,842 of net sales and 15.8 million lbs. of tonnage to the nine month results. Specialty Foods segment profit decreased 2.4 percent in the third quarter and 6.8 percent for the first nine months, compared to 2008 results.

Declines in both net sales and profits continued to be driven by reduced sales of nutritional powders and ready-to-drink products at CFI. The loss of business due to competitive issues and an overall slowdown with existing key customers have continued to negatively impact results compared to the prior year. Increased sales of nutritional products at DCB offset a portion of these declines. Sales and margins for private label luncheon meat, hash, and chili were also up at HSP during the quarter, offsetting a decline in contract packaging sales. Reduced freight and distribution expenses have also benefited this segment during fiscal 2009.

Entering the fourth quarter, sales of private label canned products are expected to remain strong. CFI continues to pursue new contract packaging opportunities, but results are still expected to trail the prior year. DCB will continue to face competitive pricing pressures on certain product lines, but a favorable product mix and lower freight expenses should provide some upside during the fourth quarter.

Table of Contents

All Other

The All Other segment includes the Hormel Foods International (HFI) operating segment, which manufactures, markets, and sells Company products internationally. This segment also includes various miscellaneous corporate sales.

All Other net sales decreased 10.4 percent for the quarter and increased 2.8 percent for the first nine months, as compared to fiscal 2008. HFI export sales of fresh pork declined compared to the fiscal 2008 third quarter, as the weak global economy and publicity regarding the H1N1 flu virus have impacted pork export markets. Segment profit decreased 19.4 and 13.2 percent for the third quarter and first nine months of fiscal 2009, respectively, compared to prior year results. Lower raw material costs provided some benefit for the quarter, but were unable to offset the impact of the weaker export markets and unfavorable currency exchange rates in key international markets. Although the Company's international joint ventures improved modestly in the third quarter, they continue to represent a significant decrease in profits for the first nine months, compared to fiscal 2008.

Unallocated Income and Expenses

The Company does not allocate investment income, interest expense, and interest income to its segments when measuring performance. The Company also retains various other income and unallocated expenses at corporate. These items are included in the segment table for the purpose of reconciling segment results to earnings before income taxes.

Net interest and investment income represented a net expense of \$553 and \$3,951 for the third quarter and first nine months of fiscal 2009, respectively, compared to a net expense of \$13,904 and \$28,738 for the comparable quarter and nine months of fiscal 2008. The decreased expense was primarily driven by improved investment returns on the Company's rabbi trust for supplemental executive retirement plans and deferred income plans, which increased \$10,469 and \$20,126 for the third quarter and first nine months, respectively, compared to fiscal 2008. Fiscal 2009 results also include a \$3,591 pretax gain recognized on the dissolution of the Company's Carapelli USA, LLC joint venture. Additionally, the Company recorded a \$2,400 investment write-off in the third quarter of fiscal 2008. Interest expense of \$6,963 and \$21,336 for the third quarter and first nine months of 2009, respectively, was comparable to prior year levels. The Company anticipates that interest expense will approximate \$29,000 for fiscal 2009.

General corporate expense for the third quarter and first nine months was \$9,974 and \$28,018, respectively, compared to \$2,907 and \$18,982 for the comparable periods of fiscal 2008. Increased expense for the third quarter and nine months reflects higher medical and pension related expenses, which are expected to continue in upcoming quarters. Additional employee incentive plan costs also contributed to the increase for the quarter.

Related Party Transactions

There has been no material change in the information regarding Related Party Transactions that was disclosed in the Company's Annual Report on Form 10-K for the year ended October 26, 2008.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

Cash and cash equivalents were \$295,100 at the end of the third quarter of fiscal year 2009 compared to \$109,987 at the end of the comparable fiscal 2008 period.

Cash provided by operating activities was \$327,124 in the first nine months of fiscal 2009 compared to \$183,431 in the same period of fiscal 2008. Increased earnings and favorable changes in working capital generated most of the increase, as significant decreases in inventory and accounts receivable balances during fiscal 2009 have more than offset decreases in accounts payable and accrued expense balances. These increases were partially offset by a contribution of \$55,000 to fund the Company's pension plans in the third quarter of fiscal 2009.

Cash used in investing activities decreased to \$60,240 in the first nine months of fiscal 2009 from \$124,229 in the comparable period of fiscal 2008. Decreased cash outflow related to acquisition activity was the primary driver of the decrease, due to the acquisition of Boca Grande in the third quarter of fiscal 2008 for \$23,255. Lower fixed asset expenditures during fiscal 2009 also contributed to the decrease, declining to \$71,029 for the first nine months of fiscal 2009 from \$96,293 in the comparable period of fiscal 2008. The Company currently estimates its fiscal 2009 fixed asset expenditures to be approximately \$100,000. The Company's investments in available-for-sale securities also resulted in a lower net cash outflow of approximately \$12,800 for the first nine months of fiscal 2009 compared to the prior year.

Cash used in financing activities was \$126,562 in the first nine months of fiscal 2009 compared to \$98,964 in the same period of fiscal 2008. The Company used \$13,876 for common stock repurchases in first nine months of fiscal 2009, compared to \$56,472 in the same period of the prior year. For additional information pertaining to the Company's share repurchase plans or programs, see Part II, Item 2 Unregistered Sales of Equity Securities and Use of Proceeds. Offsetting this decrease were increased net payments on short-term debt. Additionally, cash flows generated from the Company's stock option plan decreased approximately \$17,800 during the first nine months of fiscal 2009, as compared to the prior year.

Cash dividends paid to the Company's shareholders also continue to be a significant financing activity for the Company. Dividends paid in the first nine months of 2009 were \$75,880 compared to \$70,585 in the comparable period of fiscal 2008. For fiscal 2009, the annual dividend rate has been increased to \$0.76 per share, representing the 43rd consecutive annual dividend increase. The Company has paid dividends for 324 consecutive quarters and expects to continue doing so.

The Company is required, by certain covenants in its debt agreements, to maintain specified levels of financial ratios and balance sheet position. At the end of the third quarter of fiscal 2009, the Company was in compliance with all of these debt covenants.

Cash flow from operating activities provides the Company with its principal source of liquidity. The Company does not anticipate a significant risk to cash flow from this source in the foreseeable future because the Company operates in a relatively stable industry and has strong products across many product lines. However, due to the credit market conditions that began in the latter half of fiscal 2008, the Company has continued to manage its capital conservatively during fiscal 2009. Certain capital projects that were not time critical were delayed, and notable efforts have been made to improve working capital balances. The Company repaid its \$60,000 outstanding short-term line of credit balance subsequent to the end of the third quarter, and intends to renew its credit facility in fiscal 2010. The Company is also evaluating an additional discretionary contribution to its pension plans during the fourth quarter. Additional share repurchases also remain a strategic option that will be considered as

a use of free cash flows.

Contractual Obligations and Commercial Commitments

As discussed in Note K of the Notes to Consolidated Financial Statements, the Company adopted the provisions of FIN 48 at the beginning of fiscal 2008. The Company is unable to determine its exact contractual obligations by year related to this pronouncement, as the ultimate amount or timing of settlement of its reserves for income taxes cannot be reasonably estimated. The total liability for unrecognized tax benefits, including interest and penalties, at July 26, 2009, was \$41,321.

Table of Contents

There have been no other material changes to the information regarding the Company's future contractual financial obligations that was disclosed in the Company's Annual Report on Form 10-K for the year ended October 26, 2008.

Off-Balance Sheet Arrangements

The Company currently provides a revocable standby letter of credit for \$3,890 to guarantee obligations that may arise under workers compensation claims of an affiliated party. This potential obligation is not reflected in the Company's Consolidated Statements of Financial Position.

The Company has also guaranteed a \$9,000 loan of an independent farm operator, of which approximately \$2,900 of the loan proceeds have been spent to date with the remaining \$6,100 being held in an escrow account. The Company is obligated to make payments if the farm operator fails to do so, and the Company has made immaterial payments in fiscal 2008 and 2009. The portion of the potential obligation currently held in escrow does not represent a risk to the Company and is therefore not reflected in the Company's Consolidated Statements of Financial Position.

FORWARD-LOOKING STATEMENTS

This report contains forward-looking information within the meaning of the federal securities laws. The forward-looking information may include statements concerning the Company's outlook for the future as well as other statements of beliefs, future plans, strategies, or anticipated events and similar expressions concerning matters that are not historical facts.

The Private Securities Litigation Reform Act of 1995 (the Reform Act) provides a safe harbor for forward-looking statements to encourage companies to provide prospective information. The Company is filing this cautionary statement in connection with the Reform Act. When used in the Company's Annual Report to Stockholders, in filings by the Company with the Securities and Exchange Commission (the Commission), in the Company's press releases and in oral statements made by the Company's representatives, the words or phrases should result, believe, intend, plan, are expected to, targeted, will continue, will approximate, is anticipated, estimate, project, or similar expressions are intended forward-looking statements within the meaning of the Reform Act. Such statements are subject to certain risks and uncertainties that could cause actual results to differ materially from historical earnings and those anticipated or projected.

In connection with the safe harbor provisions of the Reform Act, the Company is identifying risk factors that could affect financial performance and cause the Company's actual results to differ materially from opinions or statements expressed with respect to future periods. The discussion of risk factors in Part II, Item 1A of this report on Form 10-Q contains certain cautionary statements regarding the Company's business, which should be considered by investors and others. Such risk factors should be considered in conjunction with any discussions of operations or results by the Company or its representatives, including any forward-looking discussion, as well as comments contained in press releases, presentations to securities analysts or investors, or other communications by the Company.

In making these statements, the Company is not undertaking, and specifically declines to undertake, any obligation to address or update each or any factor in future filings or communications regarding the Company's business or results, and is not undertaking to address how any of these

factors may have caused changes to discussions or information contained in previous filings or communications. Though the Company has attempted to list comprehensively these important cautionary risk factors, the Company wishes to caution investors and others that other factors may in the future prove to be important in affecting the Company's business or results of operations.

The Company cautions readers not to place undue reliance on forward-looking statements, which represent current views as of the date made. Forward-looking statements are inherently at risk to any changes in the national and worldwide economic environment, which could include, among other things, economic conditions, political developments, currency exchange rates, interest and inflation rates, accounting standards, taxes, and laws and regulations affecting the Company and its markets.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

(In Thousands of Dollars)

Hog Markets: The Company's earnings are affected by fluctuations in the live hog market. To minimize the impact on earnings, and to ensure a steady supply of quality hogs, the Company has entered into contracts with producers for the purchase of hogs at formula-based prices over periods up to 15 years. Purchased hogs under contract accounted for 92 percent and 91 percent of the total hogs purchased by the Company through the first nine months of fiscal 2009 and 2008, respectively. The majority of these contracts use market-based formulas based on hog futures, hog primal values, or industry reported hog markets. Under normal, long-term market conditions, changes in the cash hog market are offset by proportional changes in primal values. Therefore, a hypothetical 10 percent change in the cash hog market would have had an immaterial effect on the Company's results of operations.

Certain procurement contracts allow for future hog deliveries (firm commitments) to be forward priced. The Company generally hedges these firm commitments by using hog futures contracts. These futures contracts are designated and accounted for as fair value hedges. The change in the market value of such futures contracts is highly effective at offsetting changes in price movements of the hedged item, and the Company evaluates the effectiveness of the contracts on a regular basis. Changes in the fair value of the futures contracts, along with the gain or loss on the firm commitment, are marked-to-market through earnings and are recorded on the Consolidated Statement of Financial Position as a current asset and liability, respectively. The fair value of the Company's open futures contracts as of July 26, 2009, was \$2,708 compared to \$15,828 as of October 26, 2008.

The Company measures its market risk exposure on its hog futures contracts using a sensitivity analysis, which considers a hypothetical 10 percent change in market prices. A 10 percent increase in market prices would have negatively impacted the fair value of the Company's July 26, 2009, open contracts by \$3,435, which in turn would lower the Company's future cost of purchased hogs by a similar amount.

Turkey and Hog Production Costs: The Company raises or contracts for live turkeys and hogs to meet some of its raw material supply requirements. Production costs in raising turkeys and hogs are subject primarily to fluctuations in feed prices, and to a lesser extent, fuel costs. Under normal, long-term market conditions, changes in the cost to produce turkeys and hogs are offset by proportional changes in their respective markets.

To reduce the Company's exposure to changes in grain prices, the Company utilizes a hedge program to offset the fluctuation in the Company's future direct grain purchases. This program utilizes corn and soybean meal futures and swaps, and these contracts are accounted for under cash flow hedge accounting. The open contracts are reported at their fair value with an unrealized loss of \$28,186, before tax, on the Consolidated Statement of Financial Position as of July 26, 2009, compared to an unrealized loss of \$63,250, before tax, as of October 26, 2008.

The Company measures its market risk exposure on its grain futures contracts and swaps using a sensitivity analysis, which considers a hypothetical 10 percent change in the market prices for grain. A 10 percent decrease in the market price for grain would have negatively impacted the fair value of the Company's July 26, 2009, open grain contracts by \$10,705, which in turn would lower the Company's future cost on purchased grain by a similar amount.

Natural Gas: Production costs at the Company's plants and feed mills are also subject to fluctuations in fuel costs. To reduce the Company's exposure to changes in natural gas prices, the Company utilizes a hedge program to offset the fluctuation in the Company's future natural gas purchases. This program utilizes natural gas swaps, and these contracts are accounted for under cash flow hedge accounting. The open contracts are reported at their fair value with an unrealized loss of \$14,673, before tax, on the Consolidated Statement of Financial Position as of July 26, 2009, compared to an unrealized loss of \$10,229, before tax, as of October 26, 2008.

Table of Contents

The Company measures its market risk exposure on its natural gas contracts using a sensitivity analysis, which considers a hypothetical 10 percent change in the market prices for natural gas. A 10 percent decrease in the market price for natural gas would have negatively impacted the fair value of the Company's July 26, 2009, open natural gas contracts by \$3,057, which in turn would lower the Company's future cost on natural gas purchases by a similar amount.

Long-Term Debt: A principal market risk affecting the Company is the exposure to changes in interest rates on the Company's fixed-rate, long-term debt. Market risk for fixed-rate, long-term debt is estimated as the potential increase in fair value, resulting from a hypothetical 10 percent decrease in interest rates, and amounts to approximately \$1,308. The fair value of the Company's long-term debt was estimated using discounted future cash flows based on the Company's incremental borrowing rate for similar types of borrowing arrangements.

Investments: The Company holds trading securities as part of a rabbi trust to fund certain supplemental executive retirement plans and deferred income plans. The Company is subject to market risk due to fluctuations in the value of these investments, as unrealized gains and losses associated with these securities are included in the Company's net earnings on a mark-to-market basis. As of July 26, 2009, the balance of these securities totaled \$100,053. As losses on these securities are not tax deductible, a 10 percent decline in the value of these assets would have a direct negative impact to the Company's net earnings of approximately \$10,005, while a 10 percent increase in value would have a positive impact of the same amount.

International: While the Company does have international operations and operates in international markets, it considers its market risk in such activities to be immaterial.

Item 4. Controls and Procedures

(a) Disclosure Controls and Procedures.

As of the end of the period covered by this report (the Evaluation Date), the Company carried out an evaluation, under the supervision and with the participation of management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of its disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended (the Exchange Act)). In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. Based on that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that, as of the Evaluation Date, the Company's disclosure controls and procedures were effective to provide reasonable assurance that information the Company is required to disclose in reports it files or submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in Commission rules and forms, and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

(b) Internal Controls.

Edgar Filing: HORMEL FOODS CORP /DE/ - Form 10-Q

During the third quarter of fiscal year 2009, there has been no change in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

The Company is a party to various legal proceedings related to the on-going operation of its business. The resolution of any currently known matters is not expected to have a material effect on the Company's financial condition, results of operations, or liquidity.

Item 1A. Risk Factors

Deterioration of economic conditions could harm the Company's business.

The Company's business may be adversely affected by changes in national or global economic conditions, including inflation, interest rates, availability of capital markets, consumer spending rates, energy availability and costs (including fuel surcharges), and the effects of governmental initiatives to manage economic conditions.

The recent volatility in financial markets and the deterioration of national and global economic conditions could impact the Company's operations as follows:

- The financial stability of our customers and suppliers may be compromised, which could result in additional bad debts for the Company or non-performance by suppliers;
- The value of our investments in debt and equity securities may decline, including most significantly the Company's trading securities held as part of a rabbi trust to fund supplemental executive retirement plans and deferred income plans, and the Company's assets held in pension plans; and
- It may become more costly or difficult to obtain financing to fund operations or investment opportunities, or to refinance the Company's debt in the future.

The Company also utilizes hedging programs to reduce its exposure to various commodity market risks, which qualify for hedge accounting for financial reporting purposes. Volatile fluctuations in market conditions could cause these instruments to become ineffective, which could require any gains or losses associated with these instruments to be reported in the Company's earnings each period. These instruments may also limit the Company's ability to benefit from market gains if commodity prices become more favorable than those that have been secured under the Company's hedging programs.

Additionally, if a high pathogenic disease outbreak developed in the United States, it may negatively impact the national economy, demand for Company products, and/or the Company's workforce availability, and the Company's financial results could suffer. The Company has developed contingency plans to address infectious disease scenarios and the potential impact on its operations, and will continue to update these plans as necessary. There can be no assurance given, however, that these plans will be effective in eliminating the negative effects of any such diseases on the Company's operating results. Specifically in regard to the recent outbreak of the H1N1 virus, both the disease itself as well as adverse publicity associated with the inaccurate naming of the disease as swine flu could impact future operating results. Perceived risks of the virus may cause a reduced demand for pork or create additional import bans restricting distribution of the Company's products internationally.

Fluctuations in commodity prices of pork, poultry, and feed ingredients could harm the Company's earnings.

The Company's results of operations and financial condition are largely dependent upon the cost and supply of pork, poultry, and feed grains as well as the selling prices for many of our products, which are determined by constantly changing market forces of supply and demand.

The live hog industry has evolved to very large, vertically integrated, year-round confinement operations operating under long-term supply agreements. This has resulted in fewer hogs being available on the cash spot market. The decrease in the supply of live hogs on the cash spot market could diminish the utilization of harvest facilities and increase the cost of the raw materials they produce. Consequently, the Company uses long-term

Table of Contents

supply contracts to ensure a stable supply of raw materials while minimizing extreme fluctuations in costs over the long-term. This may result, in the short-term, in costs for live hogs that are higher than the cash spot market depending on the relationship of the cash spot market to contract prices. Market-based pricing on certain product lines, and lead time required to implement pricing adjustments, may prevent these cost increases from being recovered, and these higher costs could adversely affect our short-term financial results.

Jennie-O Turkey Store raises turkeys and also contracts with turkey growers to meet its raw material requirements for whole birds and processed turkey products. Additionally, the Company owns various hog raising facilities that supplement its supply of raw materials. Results in these operations are affected by the cost and supply of feed grains, which fluctuate due to climate conditions, production forecasts, and supply and demand conditions at local, regional, national, and worldwide levels. The Company attempts to manage some of its short-term exposure to fluctuations in feed prices by using futures contracts and pursuing pricing advances. However, these strategies may not be adequate to overcome sustained increases in market prices due to alternate uses for feed grains or other systemic changes in the industry.

Outbreaks of disease among livestock and poultry flocks could harm the Company's revenues and operating margins.

The Company is subject to risks associated with the outbreak of disease in pork and beef livestock, and poultry flocks, including Bovine Spongiform Encephalopathy (BSE), pneumo-virus, Porcine Circovirus 2 (PCV2), Porcine Reproduction & Respiratory Syndrome (PRRS), Foot-and-Mouth Disease (FMD), and Avian Influenza. The outbreak of disease could adversely affect the Company's supply of raw materials, increase the cost of production, and reduce operating margins. Additionally, the outbreak of disease may hinder the Company's ability to market and sell products both domestically and internationally. The Company has developed business continuity plans for various disease scenarios and will continue to update these plans as necessary. There can be no assurance given, however, that these plans will be effective in eliminating the negative effects of any such diseases on the Company's operating results.

Market demand for the Company's products may fluctuate due to competition from other producers.

The Company faces competition from producers of alternative meats and protein sources, including beef, chicken, and fish. The bases on which the Company competes include:

- price;
- product quality;
- brand identification;
- breadth of product line; and
- customer service.

Edgar Filing: HORMEL FOODS CORP /DE/ - Form 10-Q

Demand for the Company's products is also affected by competitors' promotional spending and the effectiveness of the Company's advertising and marketing programs. The Company may be unable to compete successfully on any or all of these bases in the future.

The Company's operations are subject to the general risks of the food industry.

The food products manufacturing industry is subject to the risks posed by:

- food spoilage or food contamination;
- evolving consumer preferences and nutritional and health-related concerns;
- federal, state, and local food processing controls;
- consumer product liability claims;
- product tampering; and
- the possible unavailability and/or expense of liability insurance.

If one or more of these risks were to materialize, the Company's revenues could decrease, costs of doing business could increase, and the Company's operating results could be adversely affected.

Table of Contents

The Company's operations are subject to the general risks associated with acquisitions.

The Company has made several acquisitions in recent years including, most recently, Burke and Boca Grande, and regularly reviews opportunities for strategic growth through acquisitions. Potential risks associated with acquisitions include the inability to integrate new operations successfully, the diversion of management's attention from other business concerns, the potential loss of key employees and customers of the acquired companies, the possible assumption of unknown liabilities, potential disputes with the sellers, and the inherent risks in entering markets or lines of business in which the Company has limited or no prior experience. Any or all of these risks could impact the Company's financial results and business reputation. In addition, acquisitions outside the United States may present unique challenges and increase the Company's exposure to the risks associated with foreign operations.

The Company's operations are subject to the general risks of litigation.

The Company is involved on an ongoing basis in litigation arising in the ordinary course of business. Trends in litigation may include class actions involving competitors, consumers, shareholders, or injured persons, and claims relating to patent infringement, labor, employment, or environmental matters. Litigation trends and the outcome of litigation cannot be predicted with certainty and adverse litigation trends and outcomes could adversely affect the Company's financial results.

Government regulation, present and future, exposes the Company to potential sanctions and compliance costs that could adversely affect the Company's business.

The Company's operations are subject to extensive regulation by the U.S. Department of Homeland Security, the U.S. Department of Agriculture, the U.S. Food and Drug Administration, federal and state taxing authorities, and other state and local authorities that oversee workforce immigration laws, tax regulations, food safety standards, and the processing, packaging, storage, distribution, advertising, and labeling of the Company's products. The Company's manufacturing facilities and products are subject to constant inspection by federal, state, and local authorities. Claims or enforcement proceedings could be brought against the Company in the future. Additionally, the Company is subject to new or modified laws, regulations, and accounting standards. The Company's failure or inability to comply with such requirements could subject the Company to civil remedies, including fines, injunctions, recalls, or seizures, as well as potential criminal sanctions.

The Company is subject to stringent environmental regulation and potentially subject to environmental litigation, proceedings, and investigations.

The Company's past and present business operations and ownership and operation of real property are subject to stringent federal, state, and local environmental laws and regulations pertaining to the discharge of materials into the environment, and the handling and disposition of wastes (including solid and hazardous wastes) or otherwise relating to protection of the environment. Compliance with these laws and regulations, and the ability to comply with any modifications to these laws and regulations, is material to the Company's business. New matters or sites may be identified in the future that will require additional investigation, assessment, or expenditures. In addition, some of the Company's facilities have been in operation for many years and, over time, the Company and other prior operators of these facilities may have generated and disposed of wastes that now may be considered hazardous. Future discovery of contamination of property underlying or in the vicinity of the Company's present or former properties or manufacturing facilities and/or waste disposal sites could require the Company to incur additional expenses. The

occurrence of any of these events, the implementation of new laws and regulations, or stricter interpretation of existing laws or regulations, could adversely affect the Company's financial results.

Table of Contents

The Company's foreign operations pose additional risks to the Company's business.

The Company operates its business and markets its products internationally. The Company's foreign operations are subject to the risks described above, as well as risks related to fluctuations in currency values, foreign currency exchange controls, compliance with foreign laws, and other economic or political uncertainties. International sales are subject to risks related to general economic conditions, imposition of tariffs, quotas, trade barriers and other restrictions, enforcement of remedies in foreign jurisdictions and compliance with applicable foreign laws, and other economic and political uncertainties. All of these risks could result in increased costs or decreased revenues, which could adversely affect the Company's financial results.

Deterioration of labor relations or increases in labor costs could harm the Company's business.

The Company has approximately 18,700 employees, of which approximately 6,300 are represented by labor unions, principally the United Food and Commercial Workers Union. A significant increase in labor costs or a deterioration of labor relations at any of the Company's facilities that results in work slowdowns or stoppages could harm the Company's financial results. There are no union contracts at the Company's facilities that are scheduled to expire during the remainder of the 2009 fiscal year.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**Issuer Purchases of Equity Securities in the Third Quarter of Fiscal 2009**

Period	Total Number of Shares Purchased(1)	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs(2)	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs(2)
April 27, 2009 – May 31, 2009	36,849	\$ 29.90	36,807	1,858,572
June 1, 2009 – June 28, 2009	0		0	1,858,572
June 29, 2009 – July 26, 2009	70,039	34.30	70,000	1,788,572
Total	106,888	\$ 32.78	106,807	

(1) The 81 shares repurchased during the quarter, other than through publicly announced plans or programs, represent purchases for the Company's employee awards program.

(2) On October 2, 2002, the Company announced that its Board of Directors had authorized the Company to repurchase up to 10,000,000 shares of common stock with no expiration date.
