| Notes to Portfolio of Investments (unaudited)(concluded)  |
| January 31, 2014  |
| (a) Security Valuation:   |
| The Fund values its securities at current market value or fair value consistent with regulatory requirements. Fair value is defined in the Funds valuation policies and procedures as the price that could be received to sell an asset or paid to transfer a liability in an orderly transaction between willing market participants at the measurement date.  |
| Equity securities that are traded on an exchange are valued at the last quoted sale price on the principal exchange on which the security is traded at the Valuation Time subject to application, when appropriate, of the valuation factors described in the paragraph below. The Valuation Time is as of the close of regular trading on the NewYork Stock Exchange (usually 4:00 p.m. Eastern Time). In the absence of a sale price, the security is valued at the mean of the bid/ask price quoted at the close on the principal exchange on which the security is traded. Securities traded on NASDAQ are valued at the NASDAQ official closing price. Closed-end funds and exchange-traded funds ( ETFs ) are valued at the market price of the security at the Valuation Time. A security using any of these pricing methodologies is determined to be a Level 1 investment. |
| Foreign equity securities that are traded on foreign exchanges that close prior to the Valuation Time are valued by applying valuation factors to the last sale price or the mean price as noted above. Valuation factors are provided by an independent pricing service provider. These valuation factors are used when pricing the Fund s portfolio holdings to estimate market movements between the time foreign markets close and the time   |

Foreign equity securities that are traded on foreign exchanges that close prior to the Valuation Time are valued by applying valuation factors to the last sale price or the mean price as noted above. Valuation factors are provided by an independent pricing service provider. These valuation factors are used when pricing the Fund s portfolio holdings to estimate market movements between the time foreign markets close and the time the Fund values such foreign securities. These valuation factors are based on inputs such as depositary receipts, indices, futures, sector indices/ETFs, exchange rates, and local exchange opening and closing prices of each security. When prices with the application of valuation factors are utilized, the value assigned to the foreign securities may not be the same as quoted or published prices of the securities on their primary markets. A security that applies a valuation factor is determined to be a Level 2 investment because the exchange-traded price has been adjusted. Valuation factors are not utilized if the independent pricing service provider is unable to provide a valuation factor or if the valuation falls below a predetermined threshold; in such case, the security is determined to be a Level 1 investment.

In the event that a security s market quotation is not readily available or is deemed unreliable (for reasons other than because the foreign exchange on which they trade closed prior to the Valuation Time), the security is valued at fair value as determined by the Fund s Pricing Committee (which is appointed by the Board of Directors), taking into account the relevant factors and surrounding circumstances using valuation policies and procedures approved by the Board. A security that has been fair valued by the Pricing Committee may be classified as Level 2 or 3 depending on the nature of the inputs.

The Fund also invests in venture capital private placement securities, which represented 1.9% of the net assets of the Fund as of January 31, 2013. The capital private placement securities are deemed to be restricted securities. In the absence of readily ascertainable market values these securities are valued at fair value as determined in good faith by, or under the direction of the Board, under procedures established by the Board. The Fund s estimate of fair value assumes a willing buyer and a willing seller neither of whom are acting under the compulsion to buy or sell.

Although these securities may be resold in privately negotiated transactions, the price realized on such sales could differ from the price originally paid by the Fund or the current carrying values, and the difference could be material. These securities are categorized as Level 3 investment. Level 3 investments have significant unobservable inputs, as they trade infrequently. In determining the fair value of these investments, management uses the market approach which includes as the primary input the capital balance reported; however, adjustments to the reported capital balance may be made based on various factors, including, but not limited to, the attributes of the interest held, including the rights and obligations, and any restrictions or illiquidity of such interests, and the fair value of these venture capital investments.

In accordance with the authoritative guidance on fair value measurements and disclosures under GAAP, the Fund discloses the fair value of its investments using a three level hierarchy that classifies the inputs to valuation techniques used to measure the fair value. The hierarchy assigns Level 1 measurements to valuations based upon unadjusted quoted prices in active markets for identical assets, Level 2 measurements to valuations based upon other significant observable input, including adjusted quoted prices in active markets for identical assets and Level 3 measurements to valuations based upon unobservable inputs that are significant to the valuation. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability, which are based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity s own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized below:

| Level 1 | quoted prices in active markets for identical investments;  |
|---------|---|
| Level 2 | other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc); or |
| Level 3 | significant unobservable inputs (including the Fund s own assumptions in determining the fair value of investments).                          |

A financial instrument s level within the fair value hierarchy is based upon the lowest level of any input that is significant to the fair value measurement

Aberdeen Emerging Markets Smaller Company Opportunities Fund, Inc.

Notes to Portfolio of Investments (unaudited) (continued)

January 31, 2014

The following is a summary of the inputs used as of January 31, 2014 in valuing the Fund s investments carried at fair value. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. Refer to the Portfolio of Investments for a detailed breakout of the security types:

| Investments, at value                    | Level 1          | Level 2       | Level 3      |      | Balance as of 01/31/2014 |

Amounts listed as  $\ \ -\ \$  are \$0 or round to \$0.

For movements between the levels within the fair value hierarchy, the Fund has adopted a policy of recognizing transfers at the end of each period. As described above, certain foreign securities are valued utilizing valuation provided by an independent pricing service to reflect any significant market movements between the time the Fund values such foreign securities and the earlier closing of foreign markets. For some securities, the pricing service is unable to provide a valuation factor, the utilization of these procedures results in transfers between Level 1 and Level 2. For the period ended January 31, 2014, the securities issued by Castrol India Limited, City Lodge Hotels Limited, SP Septia Bhd and Godrej Consumer Products Limited in the amounts of \$1,366,435, \$2,273,260, \$1,431,508 and \$2,458,646 respectively transferred from Level 1 to Level 2 because there was a valuation factor applied at January 31, 2014. For the period ended January 31, 2014, the securities issued by Petra Foods Limited, PT Bank Permata Tbk, Fraser & Neave Holdings Bhd, Oriental Holdings Bhd and The Ramco Cement Ltd. in the amounts of \$2,913,272, \$1,578,870, \$660,511, \$1,499,826 and \$1,497,590 respectively, transferred from Level 2 to Level 1 because there was not a valuation factor applied at January 31, 2014. For the period ended January 31, 2014, there have been no significant changes to the fair valuation methodologies.

Aberdeen Emerging Markets Smaller Company Opportunities Fund, Inc.

Notes to Portfolio of Investments (unaudited) (continued)

January 31, 2014

The significant unobservable inputs used in the fair value measurement of the Fund s venture capital holdings are audited financial statements, expenses incurred from the partnership, interim financial statements, capital calls, and distributions. These unobservable inputs are used by taking the most recent quarterly valuation statements and adjusting the value using the unobservable inputs mentioned above. Significant increases (decreases) in any of those inputs in isolation would result in a significantly lower (higher) fair value measurement.

|                 | Fair Value      |                           |                               |                |

The Fund may incur certain costs in connection with the disposition of the above securities.

#### (b) Short-Term Investment:

The Fund sweeps available cash into a short-term time deposit available through Brown Brothers Harriman & Co. (BBH & Co.), the Fund s custodian. The short-term time deposit is a variable rate account classified as a short-term investment.

### (c) Foreign Currency Translation:

Foreign securities, currencies, and other assets and liabilities denominated in foreign currencies are translated into U.S. Dollars at the exchange rate of said currencies against the U.S. Dollar, as of the Valuation Time, as provided by an independent pricing service approved by the Board.

Foreign currency amounts are translated into U.S. Dollars on the following basis:

- (I) market value of investment securities, other assets and liabilities at the rate of exchange at the Valuation Time; and
- (II) purchases and sales of investment securities, income and expenses at the relevant rates of exchange prevailing on the respective dates of such transactions.

The Fund does not isolate that portion of gains and losses on investments in equity securities which is due to changes in the foreign exchange rates from that which is due to changes in market prices of equity securities. Accordingly, realized and unrealized foreign currency gains and losses with respect to such securities are included in the reported net realized and unrealized gains and losses on investment transactions balances.

| Aberdeen Emerging Markets Smaller Company Opportunities Fund, Inc.   |
|--|
| Notes to Portfolio of Investments (unaudited)(concluded)   |
| January 31, 2014   |
| The Fund reports certain foreign currency related transactions and foreign taxes withheld on security transactions as components of realized gains for financial reporting purposes, whereas such foreign currency related transactions are treated as ordinary income for U.S. federal income tax purposes.   |
| Net unrealized currency gains or losses from valuing foreign currency denominated assets and liabilities at period end exchange rates are reflected as a component of net unrealized appreciation/depreciation in value of investments, and translation of other assets and liabilities denominated in foreign currencies.   |
| Net realized foreign exchange gains or losses represent foreign exchange gains and losses from transactions in foreign currencies and forward foreign currency contracts, exchange gains or losses realized between the trade date and settlement date on security transactions, and the difference between the amounts of interest and dividends recorded on the Fund s books and the U.S. dollar equivalent of the amounts actually received.  |
| Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of domestic origin, including unanticipated movements in the value of the foreign currency relative to the U.S. Dollar. When the U.S. Dollar rises in value against foreign currency, the Fund s investments denominated in that currency will lose value because its currency is worth fewer U.S. Dollars; the opposite effect occurs if the U.S. Dollar falls in relative value. |
| d) Security Transactions and Investment Income:  |
| Security transactions are recorded on the trade date. Realized and unrealized gains/(losses) from security and currency transactions are calculated on the identified cost basis. Dividend income is recorded on the ex-dividend date except for certain dividends on foreign securities, which are recorded as soon as the Fund is informed after the ex-dividend date. Interest income and expenses are recorded on an accrual basis.  |
| (e) Distributions:   |
| On an annual basis, the Fund intends to distribute its net realized canital gains, if any, by way of a final distribution to be declared during the  |

calendar quarter ending December 31. Dividends and distributions to shareholders are recorded on the ex-dividend date.

Dividends and distributions to shareholders are determined in accordance with federal income tax regulations, which may differ from GAAP. These differences are primarily due to differing treatments for foreign currencies.

# (f) Federal Income Tax Cost:

At January 31, 2014, the identified cost for federal income tax purposes, as well as the gross unrealized appreciation from investments for those securities having an excess of value over cost, gross unrealized depreciation from investments for those securities having an excess of cost over value and the net unrealized depreciation from investments were \$167,265,858, \$5,392,042, \$(39,761,021) and \$(34,368,979), respectively.

Other information regarding the Fund is available in the Fund s most recent Report to Shareholders. This information is also available on the website of the Securities and Exchange Commission at www.sec.gov.
