Notes to Condensed Consolidated Financial Statements

All disclosures are pre-tax, unless otherwise noted.

1. Summary of Significant Accounting Policies

Nature of the Business

Tasty Baking Company (the “Company”) is a leading producer of sweet baked goods and one of the nation’s oldest and largest independent baking companies, in operation since 1914. It has two manufacturing facilities, one in Philadelphia, Pennsylvania and a second facility in Oxford, Pennsylvania.

Fiscal Year

The Company and its subsidiaries operate on a 52-53 week fiscal year, ending on the last Saturday of December. Fiscal year 2010 is a 52-week year. Fiscal year 2009 was a 52-week year.

Basis of Consolidation

The condensed consolidated financial statements include the accounts of the Company and its subsidiaries. All intercompany accounts and transactions have been eliminated.

The condensed consolidated financial statements included herein have been prepared by the Company pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles in the United States of America (“GAAP”) have been condensed or omitted pursuant to such rules and regulations. In the opinion of management, the accompanying unaudited condensed consolidated financial statements reflect all adjustments, consisting of only normal recurring items, which are necessary for a fair statement of the results of operations for the periods shown. The results of operations for such periods are not necessarily indicative of the results expected for the full year or for any future period.

Use of Estimates

The preparation of condensed consolidated financial statements in conformity with GAAP requires management to make estimates, judgments and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities. On an ongoing basis, the Company evaluates its estimates, including those related to customer sales, discounts and allowances, long-lived asset impairment, indefinite-lived asset impairment, pension plan assumptions, workers’ compensation expense and income taxes. Actual results may differ from these estimates.

Concentration of Credit

The Company encounters, in the normal course of business, exposure to concentrations of credit risk with respect to trade receivables. Ongoing credit evaluations of customers’ financial conditions are performed and, generally, no collateral is required. The Company maintains reserves for potential credit losses and such losses have not exceeded management’s expectations.

Revenue Recognition

Revenue is recognized when title and risk of loss pass, which is upon receipt of goods by the independent sales distributors, retailers or third party distributors. For route sales, the Company sells to independent sales distributors who, in turn, sell to retailers. Revenue for sales to independent sales distributors is recognized upon receipt of the product by the distributor. For sales made directly to a customer or a third party distributor, revenue is recognized upon receipt of the products by the retailer or third party distributor.

Sale of Routes

Sales distribution routes are primarily owned by independent sales distributors that purchase the exclusive right to sell and distribute Tastykake® products in defined geographic areas. When the Company sells routes to independent sales distributors, it recognizes a gain or loss on the sale. Routes sold by the Company are either existing routes that the Company has previously purchased from an independent sales distributor or newly established routes in new areas. Any gain or loss recorded by the Company is based on the difference between the sales price and the carrying value of the route. Any potential impairment of net carrying value is reserved as identified. The Company recognizes gains or losses on sales of routes when all material services or conditions related to the sale have been substantially performed or satisfied by the Company. In most cases, the Company will finance a portion of the purchase price with interest bearing notes, which are required to be repaid in full. Interest rates on the notes are based on Treasury or LIBOR yields plus a spread. The Company has no obligation to later repurchase a route but may choose to do so to facilitate a change in route ownership.

Sales distribution routes owned by the Company are considered to have an indefinite life and are reviewed for impairment at least annually or whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Any potential impairment is recognized when the fair value of the route is less than the net carrying value. As of September 25, 2010 and December 26, 2009, the net carrying value of sales distribution routes owned by the Company was \$2.0 million and \$2.1 million, respectively.

Cash and Cash Equivalents

The Company considers investments with an original maturity of three months or less on its acquisition date to be cash equivalents. Cash overdrafts are recorded within current liabilities. Cash flows associated with cash overdrafts are classified as financing activities.

Inventory Valuation

Inventories, which include material, labor and manufacturing overhead, are stated at the lower of cost or market, cost being determined using the first-in, first-out (“FIFO”) method. Inventory balances for raw materials, work in progress and finished goods are regularly analyzed and provisions for excess and obsolete inventory are recorded, as necessary, based on the forecast of product demand and production requirements.

Property and Depreciation

Property, plant and equipment are carried at cost. Depreciation is computed by the straight-line method over the following estimated useful lives of the assets.

Asset Category	Estimated Useful Life
B u i l d i n g s a n d improvements	26-39 years
Machinery and equipment	7-15 years
Vehicles	5-10 years
Capitalized hardware and software	5 years
Construction in progress	Not applicable

Spare parts are capitalized as part of machinery and equipment and are expensed as utilized or capitalized as part of the relevant fixed asset. Spare parts are valued using a moving average method and are reviewed for potential obsolescence on a regular basis. Reserves are established for all spare parts that are no longer usable and have no fair market value. During the second quarter of 2010, the Company disposed of \$1.3 million of excess and obsolete spare parts, for which the Company had previously provided a full reserve. During the third quarter of 2010, the Company recorded a charge of \$0.6 million related to the disposal of spare parts that had previously been expected to be relocated to the Company’s new bakery and distribution facility at the Navy Yard. As of September 25, 2010 and December 26, 2009, the Company had reserves for excess and obsolete spare parts of \$0.1 million and \$1.5 million, respectively.

Costs of major additions, replacements and betterments are capitalized, while maintenance and repairs, which do not improve or extend the life of the respective assets, are expensed as incurred. For significant projects, the Company capitalizes interest and labor costs associated with the construction and installation of plant and equipment and significant information technology development projects.

Long-lived assets are reviewed for impairment at least annually or whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. In instances where the carrying amount may not be recoverable, the review for potential impairment utilizes estimates and assumptions of future cash flows directly related to the asset. For assets where there is no plan for future use, the review for impairment includes estimates and

assumptions of the fair value of the asset, which is based on the best information available. These assets are recorded at the lower of their book value or fair value.

The Company settled its conditional asset retirement obligation related to the Hunting Park, Philadelphia manufacturing facility in connection with the sale of the property during the third quarter of 2010. Prior to the sale of the building the Company had recorded \$0.2 million of interest associated with the asset retirement obligation during fiscal 2010. As of September 25, 2010 the Company does not have any conditional asset retirement obligations. As of December 26, 2009, the Company's conditional asset retirement obligation totaled \$7.5 million.

Grants

The Company receives grants from various government agencies for employee training purposes. Expenses for the training are recognized in the condensed consolidated Statements of Operations at the time the training takes place. When the proper approvals are given and funds are received from the government agencies, the Company records an offset to the training expense already recognized.

In 2007, the Company received a \$0.6 million grant from the Department of Community and Economic Development of the Commonwealth of Pennsylvania (“DCED”). The opportunity grant has certain spending, job retention and nondiscrimination conditions with which the Company must comply. The Company accounted for this grant under the deferred income approach and will amortize the deferred income over the same period as the useful life of the asset acquired with the grant. The assets acquired with the grant were placed into service in the first quarter of 2010, and likewise the amortization of the grant also commenced in the first quarter of 2010.

Additionally, in conjunction with The Reinvestment Funds, Allegheny West Foundation and the DCED, the Company participates in Project Fresh Start (the “Project”). The Project is an entrepreneurial development program that provides an opportunity for qualified minority entrepreneurs to purchase independent sales distribution routes. The source of grant monies for this program is the DCED. The grants are used by minority applicants to partially fund their purchase of an independent sales distribution route.

Because the Project’s grant funds merely pass through the Company in its role as an intermediary, the Company records an offsetting asset and liability for the total amount of grants as they relate to the Project. There is no impact to the condensed consolidated Statements of Operations related to the establishment of, or subsequent change to, the asset and liability amounts.

Marketing Costs

The Company expenses marketing costs, which include advertising and consumer promotions, as incurred or over the period in which future benefits are expected to be received. Marketing costs are included as a part of selling, general and administrative expense. Total marketing costs, including direct marketing and marketing overhead costs, totaled \$0.9 million and \$2.7 million, for the thirteen and thirty-nine weeks ended September 25, 2010, respectively. Total marketing costs, including direct marketing and marketing overhead costs, totaled \$0.9 million and \$2.8 million, for the thirteen and thirty-nine weeks ended September 26, 2009, respectively.

Computer Software Costs

The Company capitalizes certain costs, such as software coding, installation and testing that are incurred to purchase or create and implement internal use computer software. The majority of the Company’s capitalized software relates to the implementation of enterprise resource planning and handheld computer systems. The Company’s unamortized capitalized computer software costs totaled \$4.4 million and \$5.0 million as of September 25, 2010 and December 26, 2009, respectively. The Company recognized \$0.6 million and \$1.5 million of amortization expense related to its capitalized computer software costs for the thirteen and thirty-nine weeks ended September 25, 2010, respectively. The Company recognized \$0.7 million and \$1.9 million of amortization expense related to its capitalized computer software costs for the thirteen and thirty-nine weeks ended September 26, 2009, respectively.

Freight, Shipping and Handling Costs

Outbound freight, shipping and handling costs are included as a part of selling, general and administrative expense. Total outbound freight, shipping and handling costs totaled \$2.8 million and \$8.6 million, for the thirteen and thirty-nine weeks ended September 25, 2010 and \$2.6 million and \$8.2 million, for the thirteen and thirty-nine weeks ended September 26, 2009, respectively. Inbound freight, shipping and handling costs are capitalized with inventory and expensed with cost of sales.

Pension Plan

The Company's funding policy for the pension plan is to contribute amounts deductible for federal income tax purposes plus such additional amounts, if any, as the Company's actuarial consultants advise to be appropriate. In 1987 the Company elected to immediately recognize all gains and losses in excess of the pension corridor, which is equal to the greater of ten percent of the projected pension benefit obligation or ten percent of the market-related value of plan assets. The Company accrues normal periodic pension expense or income during the year based upon certain assumptions and estimates. These estimates and assumptions include discount rate, rate of return on plan assets, compensation increases, mortality and employee turnover. In addition, the rate of return on plan assets is directly related to changes in the equity and credit markets, which can be very volatile. The use of the above estimates and assumptions, market volatility and the Company's election to immediately recognize all gains and losses in excess of its pension corridor in the current year may cause the Company to experience significant changes in its pension expense or income from year to year. Expense or income that falls outside the corridor is recognized only in the fourth quarter of each year.

Accounting for Derivative Instruments

The Company has entered into variable-to-fixed interest rate swap contracts to fix the interest rates on a portion of its variable interest rate debt. These contracts are accounted for as cash flow hedges. Accordingly, these derivatives are marked to market and the resulting gains or losses are recorded in other comprehensive income as an offset to the related hedged asset or liability. The actual interest expense incurred, inclusive of the effect of the hedge in the current period, is recorded in the condensed consolidated Statements of Operations.

Treasury Stock

Treasury stock is stated at cost. Cost is determined by the FIFO method.

Accounting for Income Taxes

The Company accounts for income taxes under the asset and liability method. Deferred tax assets and liabilities are determined based on differences between financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates in effect when the differences are expected to be recovered or settled.

Net Income (Loss) Per Common Share

Net income (loss) per common share is presented as basic and diluted earnings per share. Net income (loss) per common share – basic represents the earnings for the period available to each share of common stock outstanding during the reporting period. Net income (loss) per common share – diluted represents the amount of earnings for the period available to each share of common stock outstanding during the reporting period and to each share that would have been outstanding assuming the issuance of common shares for all dilutive potential common shares outstanding during the reporting period. For the thirteen and thirty-nine weeks ended September 25, 2010 options to purchase common stock totaling 302,225 and 307,492 shares, respectively, were not included in the calculation of net income (loss) per common share – diluted since the exercise price per share exceeded the actual price per share during the periods presented. For the thirteen and thirty-nine weeks ended September 26, 2009 options to purchase common stock totaling 316,725 and 317,042 shares, respectively, were not included in the calculation of net income (loss) per common share – diluted since the exercise price per share exceeded the actual price per share during the periods presented.

	Thirteen Weeks Ended				Thirty-nine Weeks Ended			
	September 25, 2010		September 26, 2009		September 25, 2010		September 26, 2009	
	Income	Shares	Income	Shares	Income	Shares	Income	Shares
	(Loss)		(Loss)		(Loss)		(Loss)	
Net income (loss)	\$ (4,940)		\$ (531)		\$ (12,194)		\$ 1,743	
Less:								
Income attributable to participating securities	(19)		(19)		(55)		(83)	
Net income (loss) available for common shareholders	\$ (4,959)		\$ (550)		\$ (12,249)		\$ 1,660	
Net income (loss) per common share - basic	(0.61)	8,151	(0.07)	8,064	(1.50)	8,144	0.21	8,061
Net income (loss) per common share - diluted	(0.61)	8,151	(0.07)	8,064	(1.50)	8,144	0.21	8,061

The Company has determined that the calculation of net income (loss) per common share – basic includes all securities that are also required by the calculation of net income (loss) per common share – diluted for the respective periods presented.

Share-based Compensation

Share-based compensation expense recognized during the current period is based on the value of the portion of share-based payment awards that is ultimately expected to vest. The total amount of compensation expense for restricted stock is based on the closing market price of Tasty Baking Company shares on the date of grant. Forfeitures are required to be estimated at the time of grant in order to estimate the amount of share-based awards that will ultimately vest. The forfeiture rate is based on the Company's historical forfeiture experience. The Company calculated its historical pool of windfall tax benefits.

Recent Accounting Statements

In April 2010, the FASB issued ASU 2010-17, Revenue Recognition – Milestone Method (Topic 605): Milestone Method of Revenue Recognition (“ASU 2010-17”). ASU 2010-17 provides guidance on defining a milestone and determining when it may be appropriate to apply the milestone method of revenue recognition for research or development transactions. ASU 2010-17 is effective on a prospective basis for milestones achieved in fiscal years, and interim periods within those years, beginning on or after June 15, 2010, with early adoption permitted. The Company does not expect the adoption of this guidance to have an impact on its condensed consolidated financial statements.

In July, 2010 the FASB issued ASU 2010-20, Receivables (Topic 310): Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses (“ASU 2010-20”). ASU 2010-20 provides disclosure requirements for receivables and allowances for credit losses. The new disclosure requirements will be effective for reporting periods ending on or after December 15, 2010. Certain disclosures related to allowance and modification activities will be effective for reporting periods beginning on or after December 15, 2010. The Company does not expect the adoption of this guidance to have an impact on its condensed consolidated financial statements.

2. New Facilities

In May 2007, the Company announced that as part of its comprehensive operational review of strategic manufacturing alternatives, it entered into an agreement to relocate its Philadelphia operations to the Philadelphia Navy Yard. The term of the bakery lease provides for a 26-year lease term, with renewal options for two additional 10 year terms, for a 345,500 square foot bakery, warehouse and distribution center located on approximately 25 acres. Construction of the new bakery, warehouse and distribution center is complete and the Company has commenced production of all of its product lines at the facility in the Philadelphia Navy Yard. The term of the bakery lease commenced in October 2009, and provides for no rent payments in the first year of occupancy. Rental payments increase from \$3.5 million in the second year of occupancy to \$7.2 million in the final year of the lease. The Company also entered into a 16-year agreement for \$9.5 million in financing at a fixed rate of 8.54% to be used for leasehold improvements. This agreement provides for no payments in the first year of occupancy and then requires monthly payments totaling \$1.2 million annually over the remainder of the term. The Company accounts for both agreements as a single unit of account and as an operating lease and recognizes rental expense associated with this operating lease on a straight-line basis over 26 years.

During April 2009, the Company relocated its corporate headquarters to 36,000 square feet of leased office space in the Philadelphia Navy Yard. The office lease term, which commenced in April 2009, will end at the same time as the new bakery lease. The office lease provides for no rent payments during the first six months of occupancy. Annual rental payments increase from approximately \$0.9 million after the first six months of occupancy to approximately \$1.6 million in the final year of the lease. The Company recognizes rental expense associated with the operating lease on a straight-line basis over the term of the agreement.

In connection with these agreements, the Company provided a \$1.1 million letter of credit, which increased to \$8.1 million in the beginning of 2009. The outstanding amount of the letter of credit will be reduced starting in 2026 and will be eliminated by the end of the lease term. As of September 25, 2010 and December 26, 2009, the outstanding letter of credit under this arrangement totaled \$8.1 million.

In addition to the facility leases, the Company purchased high-tech, modern baking equipment. The equipment is designed to increase product development flexibility and efficiency, while maintaining existing taste and quality standards. The investment for this project, in addition to any costs associated with the agreements described above, is

approximately \$78.0. In September 2007, the Company closed on a multi-bank credit facility and low-interest development loans provided in part by the Commonwealth of Pennsylvania and the Philadelphia Industrial Development Corporation (“PIDC”) to finance this investment and refinance the Company’s existing revolving credit facilities, as well as to provide for financial flexibility in running the ongoing operations and working capital needs.

In September 2010, the Company completed the sale of its former manufacturing and distribution facilities located in Hunting Park, Philadelphia. The Company received net cash proceeds of \$5.6 million, and settled its conditional asset retirement obligation totaling \$7.7 million in exchange for the properties. The net book value of the assets sold was approximately \$13.3 million.

3. Restructure

As part of the relocation of its Hunting Park, Philadelphia operations, the Company eliminated approximately 215 positions. While the Company achieved much of this result through normal attrition and the reduction of contract labor, the Company incurred obligations related to postemployment benefits associated with restructuring. Amounts associated with the initial recognition of the restructuring liability and subsequent changes to the estimated liability are recorded in other (income) expense, net in the condensed consolidated Statements of Operations. The Company expects the majority of payments to be paid in 2010 in connection with the restructuring program.

As of September 25, 2010, the Company had not incurred any material obligations related to one-time termination benefits, contract termination costs or other associated costs.

The Company has recognized an additional liability totaling \$1.7 million during the thirty-nine weeks ended September 25, 2010 associated with a net increase to the estimated postemployment costs incurred with the restructuring of its Philadelphia operations and a realignment of its corporate workforce and sales organization. The following table provides a roll forward of the estimated future obligations related to postemployment benefits associated with the Company's restructuring activities from December 26, 2009 to September 25, 2010 (in thousands):

Restructure reserve, December 26, 2009	\$1,078
Additions	1,719
Payments	(1,984)
Restructure reserve, September 25, 2010	\$813

4. Inventories

Inventories are classified as follows (in thousands):

	September 25, 2010	December 26, 2009
Finished goods	\$ 3,989	\$ 1,939
Work in progress	65	116
Raw materials and supplies	6,015	4,712
	\$ 10,069	\$ 6,767

The inventory balance has been reduced by reserves for obsolete and slow-moving inventories of \$15 thousand and \$42 thousand as of September 25, 2010 and December 26, 2009, respectively.

5. Credit Facilities

In September 2007, the Company entered into a 5 year, \$100.0 million secured credit facility with 4 banks (the "Bank Credit Facility"), consisting of a \$55.0 million fixed asset line of credit, a \$35.0 million working capital revolver and a \$10.0 million low-interest loan from the agent bank with the Commonwealth of Pennsylvania. The Bank Credit Facility is secured by a blanket lien on the Company's assets and contains various non-financial and financial

covenants, which were amended, among other items, effective June 25, 2010 to provide for additional flexibility in the operations of the business and to avoid an instance of non-compliance with respect to the maximum operating leverage ratio. The Bank Credit facility, as amended, includes a fixed charge coverage covenant, a maximum operating leverage covenant, a minimum liquidity ratio covenant, a minimum Unadjusted EBITDA covenant, and in certain instances, restrictions on the payments of dividends. For purposes of the Company's operating leverage ratio, which is the ratio of debt to Bank EBITDA, Bank EBITDA is defined as consolidated net income excluding option proceeds and extraordinary gains and losses, plus income tax expense, interest expense, depreciation and amortization, non-cash pension charges subject to certain limitations and any other allowable non-cash gains to or non-cash charges against net income (including a non-cash charge against net income in connection with stock-based compensation), less any non-cash pension gains, in each case to the extent deducted in determining net income. For purposes of this definition of Bank EBITDA, transition costs, restructure charges and any other allowable gains or losses that result from the execution of the strategic manufacturing initiative at the Philadelphia Navy Yard project are excluded. For purpose of the minimum Unadjusted EBITDA covenant, Unadjusted EBITDA is defined as operating profit plus depreciation and amortization.

Interest rates for the fixed asset line of credit and working capital revolver are indexed to LIBOR and include a spread above that index ranging from 125 to 450 basis points. This spread above LIBOR is currently at 450 basis points and is expected to range between 400 and 450 basis points through the first quarter of 2012. The fixed asset line of credit and the working capital revolver include commitment fees ranging from 20 to 50 basis points based upon the Company's ratio of debt to Bank EBITDA. The \$10.0 million low-interest loan bears interest at a fixed rate of 5.5% per annum. As of September 25, 2010 and December 26, 2009, the outstanding balances under the Bank Credit Facility were \$79.6 million and \$67.3 million, respectively.

In September 2007, the Company entered into a 10 year, \$12.0 million secured credit agreement with the PIDC Local Development Corporation ("PIDC Credit Facility"). This credit facility bears interest at a blended fixed rate of 4.5% per annum, participates in the blanket lien on the Company's assets and contains customary representations and warranties as well as customary affirmative and negative covenants essentially similar to those in the Bank Credit Facility, as amended. As of September 25, 2010 and December 26, 2009, the outstanding balance under the PIDC Credit Facility was \$12.0 million.

In September 2007, the Company entered into a 10 year, \$5.0 million Machinery and Equipment Loan Fund secured loan with the Commonwealth of Pennsylvania ("MELF Loan 1"). This loan bears interest at a fixed rate of 5.0% per annum and contains customary representations and warranties as well as customary affirmative and negative covenants similar to those in the Bank Credit Facility, as amended. In September 2008, the Company entered into a second 10 year, \$5.0 million Machinery and Equipment Loan Fund secured loan with the Commonwealth of Pennsylvania ("MELF Loan 2"). The terms and conditions of MELF Loan 2 are substantially the same as MELF Loan 1. As of September 25, 2010 and December 26, 2009, the aggregate outstanding balance under the MELF Loan 1 and MELF Loan 2 was \$10.0 million.

As of September 25, 2010 and December 26, 2009, the Company was in compliance with the various non-financial and financial covenants associated with the Bank Credit Facility, the PIDC Credit Facility, the MELF Loan 1 and the MELF Loan 2.

In September 2007, the Company entered into an agreement which governs the shared collateral positions under the Bank Credit Facility, the PIDC Credit Facility, the MELF Loan 1 and the MELF Loan 2 (the "Intercreditor Agreement"), and establishes the priorities and procedures that each lender has in enforcing the terms and conditions of each of their respective agreements. The Intercreditor Agreement permits the group of banks and their agent bank in the Bank Credit Facility to have the initial responsibility to enforce the terms and conditions of the various credit agreements, subject to certain specific limitations, and allows such bank group to negotiate amendments and waivers on behalf of all lenders, subject to the approval of each lender.

The Company has used and expects to continue to utilize proceeds from the Bank Credit Facility, the PIDC Credit Facility, the MELF Loan 1 and the MELF Loan 2 to finance the Company's move of its corporate headquarters and manufacturing and distribution facilities to new facilities at the Philadelphia Navy Yard, along with working capital needs.

6. Derivative Instruments

In order to hedge a portion of the Company's exposure to changes in interest rates on debt incurred under its Bank Credit Facility, the Company entered into variable-to-fixed interest rate swap contracts to fix the interest rates on a portion of its variable interest rate debt. These contracts are accounted for as cash flow hedges. Accordingly, these derivatives are marked to market and the resulting gains or losses are recorded in other comprehensive income as an offset to the related hedged asset or liability. The actual interest expense incurred, inclusive of the effect of the hedge

in the current period, is recorded in the condensed consolidated Statements of Operations.

In January 2008, the Company entered into an \$8.5 million notional value interest rate swap contract that increased to \$35.0 million in April 2010 with a fixed LIBOR rate of 3.835% that expires on September 5, 2012. As of September 25, 2010, the notional value of the swap was \$35.0 million. This interest rate swap does not hedge any portion of the credit spread to which the underlying debt is subject. The cumulative change in the fair market value of the interest rate swap is reflected as a liability totaling \$2.5 million and \$2.1 million as of September 25, 2010 and December 26, 2009, respectively.

- 12 -

In May 2008, the Company entered into an \$8.0 million notional value interest rate swap with a fixed LIBOR rate of 2.97% that expires on May 1, 2011. This interest rate swap does not hedge any portion of the credit spread to which the underlying debt is subject. The cumulative change in the fair market value of the interest rate swap is reflected as a liability totaling \$0.1 million and \$0.3 million as of September 25, 2010 and December 26, 2009, respectively.

As part of the construction of its new manufacturing facility, the Company entered into firm commitments to acquire machinery and equipment denominated in a foreign currency. In order to hedge the exposure resulting from changes in foreign currency rates, the Company entered into foreign currency forward contracts denominated in Australian Dollars (“AUD”). These contracts were accounted for as foreign currency fair value hedges. Accordingly, the changes in fair value of both the firm commitments and the derivative instruments were recorded in the condensed consolidated Statements of Operations, with the corresponding asset and liability recorded on the balance sheets.

As of September 25, 2010, all of the Company’s foreign currency forward contracts have been settled. As of December 26, 2009, the notional principle of outstanding foreign currency forward contracts designated as hedges was 1.4 million AUD (\$1.2 million USD).

The following table provides the location and amounts of gains and losses associated with the Company’s derivative instruments (in thousands):

Income Statement Location		Thirteen Weeks Ended		Thirty-nine Weeks Ended	
		September 25, 2010	September 26, 2009	September 25, 2010	September 26, 2009
Cash Flow Hedges					
Interest Rate Swaps					
Net loss recognized in accumulated other comprehensive income		\$ (32)	\$ (383)	\$ (295)	\$ (173)
Net loss reclassified from accumulated other comprehensive income to interest expense	Interest expense	(346)	(163)	(1,021)	(369)
Fair Value Hedges					
Foreign currency forward contracts					
Net gain recognized in other income, net	Other (income) expense, net	-	84	7	687

Amounts are reclassified from accumulated other comprehensive income to interest expense for the interest rate swaps on the scheduled maturity dates defined by the agreements.

Foreign currency fair value hedges are entered into against foreign currency fluctuations of firm commitments. Amounts recognized in other (income) expense, net associated with these fair value hedges are fully offset by foreign currency fluctuations of the firm commitments also recognized in other (income) expense, net.

Derivative instruments are reflected in the condensed consolidated Balance Sheets as follows (in thousands):

Balance Sheet Location	September 25, 2010	December 26, 2009
------------------------	--------------------	-------------------

Hedging derivative instruments

Interest rate swaps	Other non-current liabilities	\$	(2,498)	\$	(2,342)
Interest rate swaps	Other current liabilities		(139)		-	
Foreign currency hedges	Prepayments and other		-			133	

Counterparties to the foreign currency forward contracts and interest rate swaps are primarily major banking institutions with credit ratings of investment grade or better and no collateral is required. There are no significant risk concentrations. The Company believes the risk of incurring losses on derivative contracts related to credit risk is remote.

7. Fair Value Measurements

The Company discloses certain fair value measurements based on a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value as follows:

- Level 1 Observable inputs such as quoted prices in active markets for identical assets or liabilities;
 1.
 Level 2 Inputs, other than quoted prices included within Level 1, that are observable either directly or indirectly;
 2. and
 Level 3 Unobservable inputs in which there is little or no market data, which require the reporting entity to develop
 3. its own assumptions.

The following table presents assets (liabilities) measured at fair value on a recurring basis as of September 25, 2010 (in thousands):

Description	Balance as of September 25, 2010	Fair Value Measurement at Reporting Date Using Quoted Prices in Active Markets		
		for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Financial instruments owned:				
Interest rate swaps	\$ (2,637)	\$ —	\$ (2,637)	\$ —
Total financial instruments owned	\$ (2,637)	\$ —	\$ (2,637)	\$ —

The following table presents assets (liabilities) measured at fair value on a recurring basis at December 26, 2009 (in thousands):

Description	Balance as of December 26, 2009	Fair Value Measurement at Reporting Date Using Quoted Prices in Active Markets		
		for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Financial instruments owned:				
Interest rate swaps	\$ (2,342)	\$ —	\$ (2,342)	\$ —
Foreign currency hedges	133	—	133	—
Total financial instruments owned	\$ (2,209)	\$ —	\$ (2,209)	\$ —

As of September 25, 2010 and December 26, 2009, the carrying values of cash and cash equivalents, accounts receivable, accounts payable and other current liabilities are representative of fair value due to the short-term nature of

the instruments. The Company's carrying value of long-term debt approximates fair value.

The Company also has non-financial assets and liabilities that are measured at fair value on a nonrecurring basis. These include long-lived assets, asset retirement obligations and sales distribution routes owned by the Company. These items are recognized at fair value when they are considered to be other than temporarily impaired.

8. Defined Benefit Retirement Plans

The Company maintains a partially funded frozen noncontributory Defined Benefit ("DB") Retirement Plan (the "DB Plan"). Benefits under this DB Plan generally are based on eligible employees' years of service and compensation during the years preceding retirement. The Company also maintains a DB Supplemental Executive Retirement Plan ("SERP") for key employees designated by the Board of Directors (the "Board"); however, there are no current employees earning benefits under this plan. The Company also maintains an unfunded frozen Retirement Plan for Directors (the "Director Plan") and participants are credited for service under the Plan solely for vesting purposes. The benefit amount is the annual cash retainer in the year of retirement, but not less than \$16 thousand for Directors serving on December 31, 1993.

The Company also maintains a Deferred Stock Unit Plan (the "DSU Plan"). The DSU Plan provides that for each fiscal quarter, the Company will credit DSUs to the Director's account equivalent in value to \$4 thousand on the last day of such quarter, provided that he or she is a Director on the last day of such quarter. Beginning in the third quarter of 2010, the Directors elected to suspend the quarterly DSU grants for the second half of 2010. No new quarterly grants will be credited to the Directors' accounts for the second half of 2010; however the dividend reinvestment provisions of the DSU Plan were not impacted. Directors will be entitled to be paid in shares upon termination of Board service provided the Director has at least five years of continuous service on the Board. The shares may be paid out in a lump sum or at the Director's election, over a period of five years.

Edgar Filing: TASTY BAKING CO - Form 10-Q

The components of the DB Plan, DB SERP, and DB Director Plan's costs are summarized as follows (in thousands):

	Thirteen Weeks Ended		Thirty-nine Weeks Ended	
	September 25, 2010	September 26, 2009	September 25, 2010	September 26, 2009
Service cost	\$ -	\$ -	\$ -	\$ -
Interest cost on projected benefit obligations	1,156	1,254	3,469	3,773
Expected return on plan assets	(1,092)	(955)	(3,276)	(2,866)
Amortization of prior service cost	-	1	-	(7)
Actuarial loss recognition	15	9	45	35
Net amount recorded in income	\$ 79	\$ 309	\$ 238	\$ 935

The Company made cash contributions totaling \$2.3 million to the frozen DB Plan for the thirty-nine weeks ended September 25, 2010, in accordance with the Pension Protection Act of 2006. During 2010, the Company will make aggregate minimum required cash contributions to the DB Plan totaling \$3.0 million.

9. Defined Contribution Retirement Plans

The Company maintains the Tasty Baking Company 401(k) and Company Funded Retirement Plan (the "DC Retirement Plan") which has two separate benefits. The first benefit in the DC Retirement Plan is a funded Defined Contribution Retirement Plan (the "DC Plan"), which is offered in lieu of the benefits previously provided in the now frozen DB Plan. Under the DC Plan, the Company makes weekly cash contributions into individual accounts for all eligible employees. These contributions are based on employees' point values which are the sum of age and years of service as of January 1 each year. All employees receive contributions that range from 2.0% to 5.0% of covered compensation relative to their point totals. Employees at March 27, 2005 who had 20 years of service or 10 years of service and 60 points received an additional "grandfathered" contribution between 1.5% and 3.5% of salary. The "grandfathered" contribution percentage is paid weekly with the regular contribution until those covered employees retire or separate from the Company. These "grandfathered" contributions are being made to compensate older employees for the shorter earnings period that their accounts will have to appreciate in value relative to their normal retirement dates.

The second benefit in the DC Retirement Plan is a 401(k) Plan ("401(k) Plan"). Under the 401(k) Plan, all participants receive a discretionary Company match of their elective deferrals. Historically, the Company matching contribution has been 50% of their elective deferrals that do not exceed 4.0% of their covered compensation as defined in the 401(k) Plan.

The Company also maintains an unfunded defined contribution SERP ("DC SERP") for one eligible active employee. The total DC SERP liability as of September 25, 2010 and December 26, 2009, was \$1.9 million and \$1.7 million, respectively.

Components of the Company's defined contribution retirement plans amounts charged to income are summarized as follows (in thousands):

Thirteen Weeks Ended

Thirty-nine Weeks Ended

Edgar Filing: TASTY BAKING CO - Form 10-Q

	September 25, 2010	September 26, 2009	September 25, 2010	September 26, 2009
DC Plan expense	\$ 391	\$ 446	\$ 1,285	\$ 1,320
DC SERP expense	77	72	232	216
401(k) matching contribution	168	-	527	351
Net defined contribution retirement plan amount charged to income	\$ 636	\$ 518	\$ 2,044	\$ 1,887

- 15 -

10. Postretirement Benefits Other than Pensions

Life insurance for individuals retiring before January 1, 2006 was capped at \$20 thousand of coverage. Incumbent retirees who purchase coverage in excess of \$20 thousand and all new retirees after January 1, 2006 pay age based rates for their life insurance benefit for which the Company incurs no liability. In June 2009, the Company made a decision to cease providing life insurance benefits for its retirees and terminated the plan.

Components of net periodic postretirement benefit cost (benefit) are summarized as follows (in thousands):

	Thirteen Weeks Ended		Thirty-nine Weeks Ended	
	September 25, 2010	September 26, 2009	September 25, 2010	September 26, 2009
Service cost	\$ -	\$ -	\$ -	\$ -
Interest cost	-	1	-	86
Amortization of unrecognized prior service cost	-	-	-	(398)
Curtailment benefit	-	-	-	(3,717)
Total net postretirement benefit	\$ -	\$ 1	\$ -	\$ (4,029)

There were no payments made in connection with the terminated other postretirement plans in 2010. Payments made in connection with the other postretirement plans totaled \$0.3 million for the thirty-nine weeks ended September 26, 2009.

11. Income Taxes

The Company's effective tax rate was 40.5% and 41.5% for the thirteen weeks ended September 25, 2010 and September 26, 2009, respectively, and 39.8% and 28.7% for the thirty-nine weeks ended September 25, 2010 and September 26, 2009. The Company's effective tax rate differs from the composite federal and state statutory tax rate due to certain expenses which are not deductible for income tax purposes and non-recurring discrete items.

The Company evaluates the net realizable value of its deferred tax assets, including tax loss carryforwards, each reporting period, considering all objective evidence. The Company's assessment that deferred tax assets will be realized is based on estimates of future taxable income generated from various sources including the expected efficiencies and savings of the Navy Yard facility and increased profitability due to cost reductions. If the current estimates of future taxable income are reduced or not realized, the assessment regarding the realization of deferred tax assets in certain jurisdictions could change.

12. Accumulated Other Comprehensive Income (Loss)

Total comprehensive income (loss), net of taxes, is comprised as follows (in thousands):

	Thirteen Weeks Ended		Thirty-nine Weeks Ended	
	September 25, 2010	September 26, 2009	September 25, 2010	September 26, 2009

Edgar Filing: TASTY BAKING CO - Form 10-Q

Net income (loss)	\$ (4,940)	\$ (531)	\$ (12,194)	\$ 1,743
Other comprehensive income (loss)				
Change in defined benefit retirement plan	9	74	1,074	(420)
Change in other postretirement benefits	-	-	-	(1,001)
Change in unrealized loss on derivative instruments designated as cash flow hedges	(19)	(230)	(147)	(85)
Total other comprehensive income (loss)	(10)	(156)	927	(1,506)
Total comprehensive income (loss)	\$ (4,950)	\$ (687)	\$ (11,267)	\$ 237

- 16 -

The following table summarizes the components of accumulated other comprehensive income (loss), net of tax (in thousands):

	September 25, 2010	December 26, 2009
Defined benefit retirement plan	\$ (3,839)	\$ (4,913)
Unrealized loss on derivative instruments designated as cash flow hedges	(1,582)	(1,435)
Total accumulated other comprehensive loss	\$ (5,421)	\$ (6,348)

- 17 -

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation

All disclosures are pre-tax, unless otherwise noted.

Results of Operations

For the Thirteen Weeks ended September 25, 2010 and September 26, 2009

Overview

Net loss for the third quarter of 2010 was \$4.9 million, or \$0.61 per fully-diluted share, as compared to a net loss of \$0.5 million, or \$0.07 per fully-diluted share, in the third quarter of 2009. Earnings for the third quarter of 2010 included \$4.4 million, pre-tax, of additional expenses related to transition and to optimization of the manufacturing and distribution facility at the Navy Yard. The third quarter of 2010 also included \$0.7 million in postemployment costs associated with the restructuring of the Company's Philadelphia operations and realignment of its corporate workforce. On a pre-tax basis, results for the third quarter of 2009 included accelerated depreciation of \$1.3 million and a \$0.7 million reduction in postemployment costs associated with the transition to the Company's new manufacturing facility at the Philadelphia Navy Yard.

Sales

Gross sales in the third quarter of 2010 decreased \$5.8 million, or 7.9%, versus the comparable period in 2009. The reduction in gross sales was driven by a 7.4% decline in total volumes, primarily driven by lower sales to direct customers, third party distributors, and moderately lower sales in the Company's Route territories, caused in large part by production limitations at the Philadelphia Navy Yard facility, which negatively impacted gross sales by \$4.0 million. Total net sales declined 7.4% in the third quarter of 2010 compared to the prior year period driven by the decline in volume and production limitations, partially offset by higher net sales realization resulting from lower promotional costs.

Cost of Sales

Total cost of sales, excluding depreciation, rose 4.2%, or \$1.2 million, despite a unit volume decline of 7.4% in the third quarter of 2010 as compared to the same period a year ago. The increase in cost of sales was driven by the impact of the \$4.4 million in transition related costs, \$3.5 million of which were classified as a component of cost of sales. Also driving the increase was a \$1.8 million increase in the cost of key ingredients and packaging, as well as \$1.5 million in rental expense associated with the Philadelphia Navy Yard facilities, \$1.4 million of which was non-cash. Partially offsetting these increases was a \$2.2 million decline in other fixed manufacturing costs as compared to the same period a year ago resulting from lower utility and employee costs, combined with the impact of lower sales volumes and beneficial sales mix.

Depreciation

Depreciation decreased \$0.8 million to \$2.7 million in the third quarter of 2010 from \$3.5 million in the third quarter of 2009. Included in depreciation for the third quarter of 2009 is approximately \$1.3 million of depreciation related to changes in the useful lives of certain assets at the Company's Philadelphia operations which were not relocated to the Philadelphia Navy Yard facility, partially offset by an increase in capital additions during 2010.

Gross Profit

Gross profit declined \$3.6 million in the third quarter of 2010 as compared to the third quarter of 2009. This decline was driven by the increase in cost of sales and the impact of lower sales volumes, partially offset by a \$0.8 million decrease in depreciation.

Selling, General and Administrative Expenses

Selling, general and administrative expense increased \$0.7 million in the third quarter of 2010 versus the comparable period in 2009. This increase was primarily due to the expenses incurred in connection with the transition to and optimization of the production facility at the Philadelphia Navy Yard.

Interest Expense

Interest expense increased by \$1.1 million to \$1.8 million in the third quarter of 2010 from \$0.7 million in the third quarter of 2009, due to increased borrowings related to expenditures for the Company's Philadelphia Navy Yard manufacturing facility and lower capitalized interest on the capital investment associated with the Philadelphia Navy Yard manufacturing facility. The Company is exposed to market risk relative to its interest expense as certain of its notes payable and long-term debt have floating interest rates that vary with the conditions of the credit market.

Other (Income) Expense, Net

Other expense, net, totaled \$1.2 million in the third quarter of 2010 compared to other income, net of \$0.9 million in the third quarter of 2009. The change in the third quarter of 2010 was primarily driven by a \$0.6 million charge on the disposal of spare parts that were previously expected to be relocated to the Navy Yard facility combined with \$0.7 million in costs related to an increase in the estimated postemployment costs incurred in connection with the restructuring of the Company's Philadelphia operations and corporate workforce. Other income, net for the third quarter of 2009 included \$0.7 million of income related to a revision to the Company's restructuring estimate.

Taxes

The effective income tax rate for state and federal taxes was 40.5% and 41.5% for the thirteen weeks ended September 25, 2010 and September 26, 2009, respectively.

For the Thirty-nine Weeks ended September 25, 2010 and September 26, 2009

Overview

Net loss for the thirty-nine weeks ended September 25, 2010 was \$12.2 million, or \$1.50 per fully-diluted share, as compared to net income of \$1.7 million, or \$0.21 per fully-diluted share, for the comparable period in 2009. Earnings for the thirty-nine weeks ended September 25, 2010 were negatively impacted by the reduction in gross sales resulting from production and distribution limitations due to the impact of a first quarter 2010 oven fire at the Hunting Park manufacturing facility, severe winter weather conditions and initial production transition issues at the Navy Yard manufacturing facility. Also, earnings were negatively impacted by \$12.5 million in pre-tax costs associated with the production transition issues and optimization issues at the Philadelphia Navy Yard facility, most of which are not expected to fully recur after the fourth quarter of 2010. Net loss for the thirty-nine weeks ended September 25, 2010 and September 26, 2009 also included \$4.1 million and \$3.9 million, respectively, of incremental pre-tax depreciation resulting from the change in estimated useful lives of certain assets at the Company's Hunting Park manufacturing facility in the second quarter of 2007.

Sales

Gross sales for the thirty-nine weeks ended September 25, 2010 decreased \$15.1 million, or 6.6%, versus the comparable period in 2009. The reduction in gross sales was driven by a 5.9% decline in total volumes, driven by lower sales in all major channels of the Company's business. Production and distribution limitations, stemming from a first quarter 2010 oven fire at the Hunting Park manufacturing facility, severe winter weather conditions, and production transition and optimization issues at the Philadelphia Navy Yard facility negatively impacted gross sales for the thirty-nine weeks ended September 25, 2010 by \$8.5 million. Total net sales declined 7.1% for the thirty-nine weeks ended September 25, 2010 compared to the prior year period driven by the decline in sales volumes as well as lower net sales realization from higher promotional costs.

Cost of Sales

Total cost of sales, excluding depreciation, rose 7.1%, or \$6.1 million, despite a unit volume decline of 5.9% for the thirty-nine weeks ended September 25, 2010 as compared to the same period a year ago. The increase in cost of sales was driven by the impact of \$12.5 million in transition and optimization related costs, \$10.5 million of which were classified as a component of cost of sales with the remainder classified as a component of selling, general and administrative costs and other expense, and the \$2.2 million benefit recorded in the second quarter of 2009 in connection with the Company's termination of its postretirement life insurance plan. Also driving the increase was an increase in the cost of key ingredients and packaging as well as \$4.5 million in rental expense associated with the Philadelphia Navy Yard facilities, for the thirty-nine weeks ended September 25, 2010 as compared to the prior year period. Partially offsetting these increases were \$1.8 million of lower direct labor costs, \$6.5 million of lower other fixed manufacturing costs, combined with the impact of lower sales volumes and beneficial sales mix.

Depreciation

Depreciation increased \$1.2 million to \$11.2 million for the thirty-nine weeks ended September 25, 2010 from \$10.0 million in the comparable period in 2009. The increase in depreciation is primarily related to an increase in capital additions during 2010. Included in the thirty-nine weeks of 2010 and 2009 is approximately \$4.1 million and \$3.9 million, respectively, of depreciation related to changes in the useful lives of certain assets at the Company's Hunting Park manufacturing facility which were not relocated to the Philadelphia Navy Yard facility.

- 19 -

Gross Profit

Gross profit declined \$17.0 million for the thirty-nine weeks ended September 25, 2010 as compared to the same period in 2009. This decline was driven by the changes in cost of sales, as well as the impact of lower sales volumes and \$1.2 million in higher depreciation compared to the same period last year.

Selling, General and Administrative Expenses

Selling, general and administrative expense increased 1.4% or \$0.5 million in the thirty-nine weeks ended September 25, 2010 versus the comparable period in 2009. The increase was due to approximately \$1.4 million in expenses incurred in connection with the optimization of the production facility at the Philadelphia Navy Yard during 2010 and a \$1.5 million benefit the Company recorded in the second quarter of 2009 related to the termination of the Company's postretirement life insurance plan that did not recur in 2010. These increases were partially offset by approximately \$1.8 million in lower compensation costs, resulting primarily from the \$1.1 million reversal of the Company's 2009 bonus accrual in the second quarter of 2010.

Interest Expense

Interest expense increased by \$2.8 million to \$4.7 million for the thirty-nine weeks ended September 25, 2010 from \$1.9 million for the comparable period in 2009, primarily due to increased borrowings related to expenditures for the Company's Philadelphia Navy Yard manufacturing facility. The Company is exposed to market risk relative to its interest expense as certain of its notes payable and long-term debt have floating interest rates that vary with the conditions of the credit market.

Other (Income) Expense, Net

Other expense, net, totaled \$1.1 million for the thirty-nine weeks ended September 25, 2010 compared to other income, net of \$1.3 million for the comparable period of 2009. The increase in other expense, net for the thirty-nine weeks ended September 25, 2010 was primarily driven by a charge of \$1.8 million related to an increase in the estimated postemployment costs primarily incurred with the restructuring of the Company's Philadelphia operations combined with a \$0.6 million charge on the disposal of spare parts that were previously expected to be relocated to the Navy Yard facility which was partially offset by a gain on the sale of fixed assets and spare parts totaling \$0.7 million. Other income, net for the third quarter of 2009 included \$0.7 million of income related to a revision to the Company's restructuring estimate.

Taxes

The effective income tax rate for state and federal taxes was 39.8% and 28.7% for the thirty-nine weeks ended September 25, 2010 and September 26, 2009, respectively. During the thirty-nine weeks ended September 26, 2009, the Company favorably settled a state tax matter that resulted in discrete tax benefits of approximately \$454 thousand which reduced the Company's effective tax rate for the periods presented.

Liquidity and Capital Resources

Current assets at September 25, 2010 were \$36.4 million compared to \$31.8 million at December 26, 2009, and current liabilities at September 25, 2010 were \$42.5 million compared to \$31.9 million at December 26, 2009. The increase in current assets was driven by an increase in accounts receivable of \$0.5 million and a \$0.9 million increase in prepayments, combined with a \$3.3 million increase in inventories resulting primarily from the timing of promotional activity as well as the process of optimizing new production lines. The \$10.7 million increase in current liabilities was due to an increase in notes payable of \$3.7 million and accounts payable of \$6.9 million resulting primarily from an increase in obligations related to the optimization of the Company's new manufacturing facility and working capital management efforts.

During the thirty-nine weeks ended September 25, 2010, the Company made payments of \$4.4 million on the long-term debt incurred in connection with the Company's new manufacturing and distribution facility and capital lease obligations related to computer and handheld equipment. In addition, during 2010 the Company is required, under the Pension Protection Act of 2006, to make cash contributions totaling \$3.0 million to its defined benefit pension plan. The Company has made cash contributions totaling \$2.3 million to the defined benefit pension plan during the thirty-nine weeks ended September 25, 2010.

- 20 -

In May 2007, the Company announced that as part of its comprehensive operational review of strategic manufacturing alternatives, it entered into an agreement to relocate its Philadelphia operations to the Philadelphia Navy Yard. The term of the bakery lease provides for a 26-year lease term, with renewal options for two additional 10 year terms, for a 345,500 square foot bakery, warehouse and distribution center located on approximately 25 acres. Construction of the new bakery, warehouse and distribution center is complete and the Company has commenced production of all of its product lines at the facility in the Philadelphia Navy Yard. The term of the bakery lease commenced in October 2009, and provides for no rent payments in the first year of occupancy. Rental payments increase from \$3.5 million in the second year of occupancy to \$7.2 million in the final year of the lease. The Company also entered into a 16-year agreement for \$9.5 million in financing at a fixed rate of 8.54% to be used for leasehold improvements. This agreement provides for no payments in the first year of occupancy and then requires monthly payments totaling \$1.2 million annually over the remainder of the term. The Company accounts for both agreements as a single unit of account and as an operating lease and recognizes rental expense associated with this operating lease on a straight-line basis over 26 years.

During April 2009, the Company relocated its corporate headquarters to 36,000 square feet of leased office space in the Philadelphia Navy Yard. The office lease term, which commenced in April 2009, will end at the same time as the new bakery lease. The office lease provides for no rent payments during the first six months of occupancy. Annual rental payments increase from approximately \$0.9 million after the first six months of occupancy to approximately \$1.6 million in the final year of the lease. The Company recognizes rental expense associated with the operating lease on a straight-line basis over the term of the agreement.

In connection with these agreements, the Company provided a \$1.1 million letter of credit, which increased to \$8.1 million in the beginning of 2009. The outstanding amount of the letter of credit will be reduced starting in 2026 and will be eliminated by the end of the lease term. As of September 25, 2010 and December 26, 2009, the outstanding letter of credit under this arrangement totaled \$8.1 million.

In addition to the facility leases, the Company purchased high-tech, modern baking equipment. The equipment is designed to increase product development flexibility and efficiency, while maintaining existing taste and quality standards. The investment for this project, in addition to any costs associated with the agreements described above, is approximately \$78.0. By the end of the fourth quarter of 2010, the Company expects to have reached the operational efficiency improvements necessary to achieve \$13 million in annual pre-tax cash savings, after taking into account the impact of the new leases, but before any debt service requirements resulting from the investment in the project. In September 2007, the Company closed on a multi-bank credit facility and low-interest development loans provided in part by the Commonwealth of Pennsylvania and the Philadelphia Industrial Development Corporation (“PIDC”) to finance this investment and refinance the Company’s existing revolving credit facilities, as well as to provide for financial flexibility in running the ongoing operations and working capital needs.

As of September 25, 2010 and December 26, 2009, the Company had a restructuring liability for postemployment obligations totaling \$0.8 million and \$1.1 million, respectively. The Company expects the majority of payments to be paid in 2010 in connection with the restructuring program.

As of September 25, 2010, the Company had not incurred any material obligations related to one-time termination benefits, contract termination costs or other associated costs.

Cash and Cash Equivalents

Historically, the Company has been able to generate sufficient amounts of cash from operations. Bank borrowings are used to supplement cash flow from operations during periods of cyclical shortages. The Company maintains a Bank Credit Facility, a PIDC Credit Facility, a MELF Loan 1 and a MELF Loan 2, as defined below, and utilizes certain

capital and operating leases.

Cash overdrafts are recorded within current liabilities. Cash flows associated with cash overdrafts are classified as financing activities.

- 21 -

In September 2007, the Company entered into a 5 year, \$100.0 million secured credit facility with 4 banks (the “Bank Credit Facility”), consisting of a \$55.0 million fixed asset line of credit, a \$35.0 million working capital revolver and a \$10.0 million low-interest loan from the agent bank with the Commonwealth of Pennsylvania. The Bank Credit Facility is secured by a blanket lien on the Company’s assets and contains various non-financial and financial covenants, which were amended, among other items, effective June 25, 2010 to provide for additional flexibility in the operations of the business and to avoid an instance of non-compliance with respect to the maximum operating leverage ratio. The Bank Credit facility, as amended, includes a fixed charge coverage covenant, a maximum operating leverage ratio covenant, a minimum liquidity ratio covenant, a minimum Unadjusted EBITDA covenant, and in certain instances, restrictions on the payments of dividends. For purposes of the Company’s operating leverage ratio, which is the ratio of debt to Bank EBITDA, Bank EBITDA is defined as consolidated net income excluding option proceeds and extraordinary gains and losses, plus income tax expense, interest expense, depreciation and amortization, non-cash pension charges subject to certain limitations and any other allowable non-cash gains to or non-cash charges against net income (including a non-cash charge against net income in connection with stock-based compensation), less any non-cash pension gains, in each case to the extent deducted in determining net income. For purposes of this definition of Bank EBITDA, transition costs, restructure charges and any other allowable gains or losses that result from the execution of the strategic manufacturing initiative at the Philadelphia Navy Yard project are excluded. For purpose of the minimum Unadjusted EBITDA covenant, Unadjusted EBITDA is defined as operating profit plus depreciation and amortization.

Interest rates for the fixed asset line of credit and working capital revolver are indexed to LIBOR and include a spread above that index ranging from 125 to 450 basis points. This spread above LIBOR is currently at 450 basis points and is expected to range between 400 and 450 basis points through the first quarter of 2012. The fixed asset line of credit and the working capital revolver include commitment fees ranging from 20 to 50 basis points based upon the Company’s ratio of debt to Bank EBITDA. The \$10.0 million low-interest loan bears interest at a fixed rate of 5.5% per annum. As of September 25, 2010 and December 26, 2009, the outstanding balances under the Bank Credit Facility were \$79.6 million and \$67.3 million, respectively.

In September 2007, the Company entered into a 10 year, \$12.0 million secured credit agreement with the PIDC Local Development Corporation (“PIDC Credit Facility”). This credit facility bears interest at a blended fixed rate of 4.5% per annum, participates in the blanket lien on the Company’s assets and contains customary representations and warranties as well as customary affirmative and negative covenants essentially similar to those in the Bank Credit Facility, as amended. As of September 25, 2010 and December 26, 2009, the outstanding balances under the PIDC Credit Facility were \$12.0 million.

In September 2007, the Company entered into a 10 year, \$5.0 million Machinery and Equipment Loan Fund secured loan with the Commonwealth of Pennsylvania (“MELF Loan 1”). This loan bears interest at a fixed rate of 5.0% per annum and contains customary representations and warranties as well as customary affirmative and negative covenants similar to those in the Bank Credit Facility, as amended. In September 2008, the Company entered into a second 10 year, \$5.0 million Machinery and Equipment Loan Fund secured loan with the Commonwealth of Pennsylvania (“MELF Loan 2”). The terms and conditions of MELF Loan 2 are substantially the same as MELF Loan 1. As of September 25, 2010 and December 26, 2009, the aggregate outstanding balance under the MELF Loan 1 and MELF Loan 2 was \$10.0 million.

As of September 25, 2010 and December 26, 2009, the Company was in compliance with the various non-financial and financial covenants associated with the Bank Credit Facility, the PIDC Credit Facility, the MELF Loan 1 and the MELF Loan 2.

Certain of our covenants become more restrictive over the term of the agreement. Our most restrictive covenants, maximum operating leverage ratio, defined as the ratio of debt to Bank EBITDA, and minimum Unadjusted EBITDA,

have the following requirements for the next year as follows:

	Maximum Operating Leverage Ratio
Fiscal 2010 Third Quarter	6.00 to 1.0
Fiscal 2010 Fourth Quarter	5.50 to 1.0
Fiscal 2011 First Quarter	5.00 to 1.0
Fiscal 2011 Second Quarter	4.75 to 1.0
Fiscal 2011 Third Quarter	4.75 to 1.0

	Minimum Unadjusted EBITDA
6 months ended December 25, 2010	\$ 3,000,000
9 months ended March 26, 2011	\$ 7,000,000
12 months ended June 25, 2011	\$ 12,000,000

As of September 25, 2010 the maximum operating leverage ratio was approximately 5.8 to 1.0.

In September 2007, the Company entered into an agreement which governs the shared collateral positions under the Bank Credit Facility, the PIDC Credit Facility, the MELF Loan 1 and the MELF Loan 2 (the “Intercreditor Agreement”), and establishes the priorities and procedures that each lender has in enforcing the terms and conditions of each of their respective agreements. The Intercreditor Agreement permits the group of banks and their agent bank in the Bank Credit Facility to have the initial responsibility to enforce the terms and conditions of the various credit agreements, subject to certain specific limitations, and allows such bank group to negotiate amendments and waivers on behalf of all lenders, subject to the approval of each lender.

The Company has used and expects to continue to utilize proceeds from the Bank Credit Facility, the PIDC Credit Facility, the MELF Loan 1 and the MELF Loan 2 to finance the Company’s move of its corporate and manufacturing and distribution facilities to new facilities at the Philadelphia Navy Yard, along with working capital needs.

Net cash used for operating activities for the thirty-nine weeks ended September 25, 2010 was \$7.6 million, primarily attributed to the combined effect of the net loss for the quarter as well as the year over year changes in the Company’s inventories, accounts receivable and prepayments and other.

Net cash used for investing activities for the thirty-nine weeks ended September 25, 2010 was \$5.4 million which included \$12.0 million of capital expenditures primarily related to investments in the Company’s new manufacturing and distribution facility partially offset by \$5.6 million of net cash proceeds from the sale of its former manufacturing and distribution facilities located in Hunting Park, Philadelphia.

Net cash from financing activities for the thirty-nine weeks ended September 25, 2010 totaled \$13.0 million, driven by an increase in long-term debt primarily due to investments in the Company’s new manufacturing and distribution facility.

The Company currently anticipates that cash flow from operations, along with the continued availability under the Bank Credit Facility, as described above, will provide sufficient cash to meet the short-term and long-term operating, capital expenditure and financing requirements of the Company.

New Accounting Pronouncements

Refer to Note 1 of the Notes to condensed consolidated financial statements, included herein, for a discussion of new accounting pronouncements.

Critical Accounting Policies and Estimates

Management’s Discussion and Analysis of Financial Condition and Results of Operations is based on the condensed consolidated financial statements and accompanying notes that have been prepared in conformity with GAAP. The preparation of such condensed consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting

period. Actual results could differ from those estimates.

Included in the Company's Annual Report on Form 10-K for fiscal 2009 ("2009 Form 10-K") are the significant accounting policies of the Company, which are described in Note 1 to the consolidated financial statements, and the critical accounting estimates, which are described in the Management's Discussion and Analysis of Financial Condition and Results of Operations in the 2009 Form 10-K. Information concerning the Company's implementation and impact of new accounting standards is included in Note 1 of the condensed consolidated financial statements included herein. Otherwise, there were no changes in the Company's critical accounting policies and estimates in the third quarter of 2010 which had a material impact on the Company's financial condition, change in financial condition, liquidity or results of operations.

- 23 -

Forward-Looking Statements

Statements contained in this Quarterly Report on Form 10-Q, including but not limited to those under the heading "Management's Discussion and Analysis," contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, and are subject to the safe harbor created by that Act. Such forward-looking statements are based upon assumptions by management, as of the date of this Report, including assumptions about risks and uncertainties faced by the Company. These forward-looking statements can be identified by the use of words such as "anticipate," "believe," "could," "estimate," "expect," "intend," "may," "plan," "predict," "project," "should," "would," "is likely to," or "is expected to" and other similar terms. They may include comments about relocating operations and the funding thereof, legal proceedings, competition within the baking industry, concentration of customers, commodity prices, consumer preferences, long-term receivables, inability to develop brand recognition in the Company's expanded markets, production and inventory concerns, employee productivity, availability of capital, fluctuation in interest rates, pension expense and related assumptions, changes in long-term corporate bond rates or asset returns that could affect the pension corridor expense or income, governmental regulations, protection of the Company's intellectual property and trade secrets and other statements contained herein that are not historical facts.

Because such forward-looking statements involve risks and uncertainties, various factors could cause actual results to differ materially from those expressed or implied by such forward-looking statements, including, but not limited to, changes in general economic or business conditions nationally and in the Company's primary markets, the availability of capital upon terms acceptable to the Company, the availability and pricing of raw materials, the level of demand for the Company's products, possible work stoppages associated with the collective bargaining process, the outcome of legal proceedings to which the Company is or may become a party, the actions of competitors within the packaged food industry, changes in consumer tastes or eating habits, the success of business strategies implemented by the Company to meet future challenges, the rules of business interruption and an adverse impact on financial results while optimizing production of the new facility, the costs and availability of capital to fund improvements or new facilities and equipment, the retention of key employees, and the ability to develop and market in a timely and efficient manner new products which are accepted by consumers. If any of our assumptions prove incorrect or should unanticipated circumstances arise, our actual results could differ materially from those anticipated by such forward-looking statements. The differences could be caused by a number of factors or combination of factors, including, but not limited to, those factors described in the Company's 2009 Form 10-K, "Item 1A, Risk Factors." There can be no assurance that the new manufacturing facility described herein will be successful or that projected cost savings will be achieved. The Company undertakes no obligation to publicly revise or update such forward-looking statements, except as required by law. Readers are advised, however, to consult any further public disclosures by the Company (such as in the Company's filings with the SEC or in Company press releases) on related subjects.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Not required for smaller reporting companies.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Company's reports filed or submitted pursuant to the Securities Exchange Act of 1934, as amended (the "Exchange Act"), is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without

limitation, controls and procedures designed to ensure at a reasonable assurance level that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Management of the Company, including the Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of the Company's disclosure controls and procedures (as defined in the Exchange Act Rule 13a-15(e)) as of September 25, 2010. Based upon the evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of September 25, 2010.

- 24 -

(b) Changes in Internal Control over Financial Reporting

During the thirteen weeks ended September 25, 2010, there have been no changes in the Company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
