Disclosure of 2003 Earnings

Banco Bradesco reported Net Income of R\$ 2.3 billion in 2003 (equivalent to earnings per 1,000 stocks of R\$ 1.45) compared to net income of R\$ 2 billion registered in the same period of 2002, corresponding to an increase of 14%.

The Company's Net Income in 2003 grew sequentially each quarter, beginning with R\$ 508 million in the 1st Quarter, going to R\$ 519 million in the 2nd, R\$ 564 million in the 3rd, and closing the year with net income of R\$ 715 million in the 4th Quarter.

As part of the Company's strategy to add value to stockholders, it was paid (or provisioned) R\$ 1,347 billion this year in interests on own capital, equivalent to 61.5% of the period adjusted net income (52.3% after deduction of Withholding Income Tax), R\$ 347 million in the fourth quarter alone.

According to Mr. Márcio Artur Laurelli Cypriano, Bradesco's CEO, the year of 2003 (Bradesco's 60th anniversary) was marked by strong organic growth, great effort on the incorporation of acquired institutions branches, and the conclusion of the client segmentation strategy with the creation of Bradesco Prime.

The segments presented, this year, the following positioning:

### Bradesco Corporate:

Focus Companies with annual sales of R\$ 180 million or more

In 2003 the Bradesco Corporate consolidated its segmentation process started in 1999, incorporating the Capital Markets and Structured Finance Areas, as well as reached its internationalization with a presence in the European, Latin American and Asian markets through the Euro and Asian Desks. This area has over 200 employees, managing the relationship with over 1,200 Economic Groups. According to a research conducted by the University of São Paulo, the Market considers Bradesco Corporate the most used banking structure (78% of the largest companies maintain a relationship or business with Bradesco) focused, in the opinion of these companies' professionals, on having a close partnership relation with clients.

### Bradesco Empresas:

Focus Companies with annual sales ranging from R\$ 15 million to R\$ 180 million

This area began in 2002, currently comprised by 66 units placed in strategic locations all over Brazil, Bradesco Corporate makes available a large number of products and exclusive services to its clients, besides offering exclusive customer services through its 400 Relationship Managers, who manage a portfolio of 25 to 30 Economic Groups each.

### Bradesco Private:

Focus Individuals with investments over R\$ 1 million

Private Banking manages relationships with high net worth clients providing them with asset management services, besides offering support for tax, legal and estate planning issues. This team has over 40 relationship managers, who coordinate the sale of a complete line of products and services for selected clients on a national basis. During 2003, in addition to organic growth of the client base and assets under management, this area incorporated the Private Banking clients of Banco Mercantil de São Paulo and BBV.

### Bradesco Prime:

Focus Individuals with minimum monthly income of R\$ 4 thousand, or investments of R\$ 50 thousand

This area was created in May 2003, and currently has over 140 independent branches, distributed among the main Brazilian strategic locations. These branches have an exclusive design to offer total privacy for their clients. More than 700 Relationship Managers are highly trained to offer financial advice, searching for the best solutions for their clients' needs. Bradesco Prime offers special products and services to its clients, such as specific investment funds, on-line investment consultation through the Internet, credit operations with special rates and terms, and personalized Credit/Debit Cards.

## Edgar Filing: BANK BRADESCO - Form 6-K

### Bradesco Retail:

Focus Individual with monthly income below R\$ 4 thousand and Companies with annual sales under R\$ 15 million.

With the incorporation of Banco Mercantil de São Paulo network in May and BBV Banco in September, Bradesco's Branch Network now has over 2,600 branches and over 1,800 corporate site branches. Looking to our 13 million clients, the Bank created the Regional Manager position in 2003. The major clients of this segment receive exclusive treatment as part of Conta Gerenciada (Managed Account) product.

### Finasa:

Focus Consumer Finance

2003 was the year of strategic consolidation of all Banco Finasa's consumer financing lines, which soon will be Bradesco main vehicle in this segment. The acquisition of Banco Zogbi, last November, complements Finasa's product portfolio, besides bringing the expertise of high-qualified professionals in personal financing and consumer goods financing markets.

### Banco Postal ( Postal Bank ):

Focus Relationship with individuals through the Post Office Network

Partnership established at the end of 2001, which started to be implemented in the beginning of 2002, providing the inclusion of thousands of individuals in the banking industry. Over 1,100 municipalities not serviced before, now have access to Postal Bank, including Bradesco's products and services. Over 835 accounts opened in 2003 in the Postal Bank, were responsible for 56% of total 1.5 million new accounts opened in the Bank.

### Main Highlights

- Aiming to strengthen our presence in the Consumer Finance market, mainly through direct consumer credit and personal credit (consumer goods financing), Bradesco announced the purchase of Banco Zogbi, for R\$ 650 million, on November 6, 2003. This operation is awaiting legal ratification by the Brazilian Central Bank;
- In order to adjust controlling, minority and preferred stockholders' interests, the Bank has incorporated tag along rights into its bylaws whereby in the event of sale, common stocks held by minority stockholders are guaranteed to receive 100% of the price paid for stocks part of the controlling group, and the holders of preferred stocks will receive 80% of this base price. Following the same line of implementation of Corporate Governance best practices, a Code of Corporate Ethics was implemented – a synthesis of ethical principals practiced by the Bank since its foundation, in addition to the creation of an Audit Committee, a Compliance and Internal Control Committee and a Remuneration Committee. A Disclosure Committee was also implemented aiming to assure control, uniformity, quality and transparency in all information disclosed;
- Grouping of Bradesco's stocks, in the proportion of 10,000 (ten thousand) stocks for 1 (one), aiming to adjust the base price for stocks traded on the São Paulo Stock Exchange. Stocks will be traded now per unit, a more adequate level for both the national and international markets. The adjustment also reduces operating costs and increases the efficiency of stockholders registry system. Such grouping was legally ratified by the Brazilian Central Bank on January 6, 2004, and stockholders have until March 19, 2004, at their exclusive discretion, to adjust their positions, per share class, in groups of 10,000 through trading on the Exchange.

### Loans

Loan portfolio reached R\$ 54.3 billion this quarter, increasing 3.0% compared to the previous quarter. Such increase was anticipated in the Third Quarter Earnings Results Conference Call. For 2003, it posted portfolio growth of about 7%.

This quarter's portfolio growth occurred mainly in both Bradesco Corporate (Large Corporate Segment), which grew R\$ 1,428 billion, and individuals portfolio that increased R\$ 893 million. These movements were partially offset by a decrease of R\$ 761 million in the micro/small companies and medium companies segments.

Transactions rated from AA to C reached 91.2% of the portfolio, registering a positive performance when compared to the third quarter, when such indicator reached 90.4%.

On the other hand, PDD's total over the Abnormal Course Portfolio, rated from D to H, indicated an index of 154.2%, which is far above the 142.1% index registered in the third quarter.

### Revenues

## Edgar Filing: BANK BRADESCO - Form 6-K

Financial margin rose by 15.4% from R\$ 3.2 billion in the third quarter of 2003 to R\$ 3.6 billion in the fourth quarter, mainly due to a increase in average volume and to the impact of average interest rates amounting to R\$ 180 million, to gains with securities caused by market recovery and to gains resulted from treasury transactions, that were R\$ 93 million higher than last quarter, and to the positive income of R\$ 195 million resulted from Latasa's stocks sale.

Services revenues also performed well, increasing by 7.9% in the fourth quarter, increasing from R\$ 1.18 billion to R\$ 1.27 billion. Such increase is due to growth in the volume of transactions, expansion of client base and improvement in fee charges, highlighting revenues coming from Fund Management, Banking Accounts and Credit Cards.

### Expenses

Personnel expenses fell 2.6% in the fourth quarter due to the increase of wage levels, resulted from the banking industry collective labor agreement on the amount of R\$ 93 million, and the increase of labor provisions and indemnities on the amount of R\$ 33 million, against the R\$ 171 million referring to the collective labor agreement occurred in the third quarter, which includes the bonus (single payment) of R\$ 98 million.

Administrative expenses grew 7.7% in the quarter due, mostly, to an increase in publicity and advertising expenses, in products like Hiperfundo, Show do Milhão, among others.

### Funding

During the fourth quarter it was raised US\$ 750 million in external markets, being US\$ 500 million in subordinated debt with 10-year maturity.

Savings account deposits reached R\$ 22.1 billion in the fourth quarter, an increase of 5.9% in comparison to the third quarter, representing a market share of 19.2%.

Bradesco Asset Management (BRAM) increased its assets under management by R\$ 4.9 billion in the fourth quarter, ending the year with a balance of R\$ 81.5 billion provided by the increment in mutual funds investments and, more specifically, in Fixed Income and Multi-Market products. The Bank currently manages the Hiperfundo, whose total assets reach R\$1.4 billion, posting a car allotment per day for its holders.

According to the ranking promoted by ANBID (Brazilian Investment Bank Association), BRAM's market share increased from 13.1% in 2001, to 14.2% in 2002 and 15.1% in 2003.

### Insurance, Private Pension Plans and Saving Bonds

Bradesco Seguros Group reported Net Income of R\$ 613 million in 2003, R\$ 173 million in the 4th quarter.

It is important to highlight that technical provisions increased more than R\$ 1.9 billion in the fourth quarter, volume that is greater than the 18.5%-growth of premium, which reached the amount of R\$ 26.4 billion.

Premiums grew in health, automobile, P&C and life, due to the increase in the number of policyholders. Bradesco Saúde (Bradesco Health) continues to focus its efforts on corporate plans. In car insurance there was a general adjustment in premiums values, leading to an increase in the number of automobiles insured by the company. Additionally, Bradesco Life and Pension Plans increased its client base by more than 50,000 people, motivated by the VGBL and PGBL products sales.
