From the Chairman

Fellow Shareholders:

Over the past year the Company continued to struggle under the heavy burden of past debts, obligations, and litigation. There were insufficient resources to alleviate those problems. Management's main focus was to raise funding to restore existing wells to production and to start the development drilling program on its existing properties.

During 2010 and early 2011, the Company did manage to restore the Delhi Field to production and began the upgrading of the field's water injection system and other infrastructure. There is still work to be done; but, the shortage of funding has caused the project to slow. The Marion Field continues to produce; but, in November 2010, a Nitrogen Rejection Unit was installed to allow the sales gas to be sold into the interstate pipeline in accordance to specifications. Current production for Delhi is 20-25 barrels of oil per day. Marion is producing at 500 MCFD. Equivalent production for the entire Company is 104 – 108 BOEPD. We now enjoy excellent oil prices while natural gas prices are languishing.

The Business Plan for the Company remains the same:

- Ø Stage One – Acquire and Maintain Producing Properties (Completed)
- Ø Stage Two – Place All Wells on the Properties on Production (Completed)
- Ø Stage Three – Conduct Development Drilling on All Prospective Acreage
- Ø Stage Four – Make and Fund Large Acquisitions for Growth

We are now attempting to raise the funds to complete Stage Three of the Plan to exploit the numerous Proved Developed Non-Producing, Proved Undeveloped, and Probable Projects. The economic climate has made fundraising very difficult; and, despite the efforts of Management, there is no certainty that sufficient funds will be raised to execute the Plan.

The Balance Sheet continues to suffer; but, Management has been able to show improvement. The Company lost \$2.34/share in 2008 and \$1.13/share in 2009. In 2010, the loss was \$.33/share. Management firmly believes that given proper funding, positive performance could be attained.

In the past, you gave Management the authority to enter into any number of possibilities to protect the shareholders and hopefully insure the survival of the Company. These measures included, but are not limited to: Merger, Sale of Substantially All of the Company's Assets, etc. Other possibilities are, by statute, at the discretion of the Board of Directors. None of these options have yet been exercised.

The situation is dire and continued survival is uncertain. The New Management Team inherited many unknown Contingent Liabilities, to include, but not limited to: improper assignment of overriding royalty interests against existing contract covenants, failure to pay payroll taxes to the government, outstanding accounts payable and liens on wells, improper use of suspended royalty funds, etc. Management is working to resolve these issues. A vote FOR Management's proposals supports your current management team and will increase the likelihood of success. We encourage all Shareholders to keep abreast of the Company's activities by watching our web page. Postings of significant events will appear as they occur.

Management requests your support for the future of the Company by voting FOR all of the Agenda Items proposed in the Proxy Materials.

Sincerely,

Robert D. Johnson, CEO
