Comments of Management

Commenting on the results, Shaiké Orbach, President and CEO, said, “We are pleased to report another quarter of strong positive momentum marked by near-record revenues and profits together with exciting new deals for both established and new product lines.

“During the quarter, we announced three major wins that illustrate our growing momentum. In co-operation with a Fortune-100 industry giant, we achieved a breakthrough with our new SETAC Server-To-Appliance-Converter product line, selling SETAC-based solutions to a Tier-1 security leader in a deal that will generate \$3 million for us in its first production year. In parallel, we have announced two important wins with our established networking server adapter product line: one with a data center-class WAN Optimization leader, and the other with a Japanese server manufacturer, an existing customer that has introduced us to another of its divisions.”

Mr. Orbach continued, “As such, we are now benefiting from two independent growth avenues. First, we continue to expand our server adapter business through the addition of new customers, the sale of more products to existing customers, the penetration of new divisions of existing customers, and the securing of design wins into customers’ new solutions. In parallel, we are more confident than ever about the potential of our SETAC business, which is developing more rapidly and successfully than we originally projected.”

Mr. Orbach concluded, “We are therefore extremely optimistic as we look to the future. With markets that need our solutions, strong traction in our established business and growing acceptance of our new product lines, we feel well-positioned to generate continued growth. The path that we are following has already begun building our business to the next level, and we look forward to reporting continued progress over the short and the long term.”
