**NOTE 1: BASIS OF CONSOLIDATION - CORPORATE CONTROL**

a. Basis of consolidation

The Company has consolidated its balance sheets at December 31, 2004 and June 30, 2004 and the statements of income and cash flows for the six-month periods ended December 31, 2004 and 2003 line by line with the financial statements of its controlled companies, following the procedure established in Technical Pronouncement No. 21 of the Argentine Federation of Professional Councils in Economic Sciences and approved by the Professional Council in Economic Sciences of the Autonomous City of Buenos Aires and by the National Securities Commission.

The consolidated financial statements for the six-month periods ended December 31, 2004 and 2003 have not been audited. The Company's management considers that they include all the necessary adjustments to fairly present the results for the periods referred to.

The consolidated results for the six-month periods ended December 31, 2004 and 2003 do not necessarily reflect proportionality the Company's consolidated results for the complete fiscal years.

All significant intercompany balances and transactions have been eliminated in consolidation.

The following table shows the data concerning the corporate control:

**Notes to the Unaudited Consolidated Financial Statements (Contd.)**

**NOTE 1:** (Continued)

- (1) In accordance with Technical Pronouncement No. 21 adopted by the Company during the year ended on June 30, 2004, the Company started to consolidate this subsidiary on a line-by-line basis, taking into account other indicators that must be analyzed to determine whether control exists. The financial statements presented in comparative form were restated accordingly.

b. Acquisition and consolidation of related companies

On September 29, 2004, Alto Palermo (APSA) entered into a purchase-sale agreement for the purchase of 49.9% of the capital stock of Perez Cuesta S.A.C.I. The operation was approved by the National Commission for the Defense of Competition on November 17, 2004. As a result of this acquisition, Alto Palermo S.A. (APSA) holds 68.8% of the capital stock of that company, the main activity of which is the operation of the Mendoza Plaza Shopping mall in the city of Mendoza.

Until the date of the above transaction, the Company held a 18.90% participation in the capital stock of Perez Cuesta S.A.C.I.

For purchase details, see note 26.

**NOTE 2: CONSIDERATION OF THE EFFECTS OF INFLATION**

The financial statements have been prepared in constant monetary units, reflecting the overall effects of inflation through August 31, 1995. From that date and until December 31, 2001 the government discontinued the restatement of the financial statements due to a period of monetary stability. From January 1, 2002 up to February 28, 2003 the effects of inflation were recognized due to the existence of an inflationary period. As from that date, the restatement of the financial statements was discontinued.

This criterion is not in line with current professional accounting standards, which establish that the financial statements must be restated through September 30, 2003. However, due to the low materiality of inflation rates during the period from March to September 2003, this deviation has not had a material effect on the consolidated financial statements taken as a whole.

**IRSA Inversiones y Representaciones Sociedad Anónima**

**and subsidiaries**

**Notes to the Unaudited Consolidated Financial Statements (Contd.)**

**NOTE 2:** (Continued)

The rate used for restatement of items is the domestic wholesale price index published by the National Institute of Statistics and Census.

Comparative information

Balance sheet items at June 30, 2004 shown in these unaudited consolidated financial statements for comparative purposes arise from the audited annual consolidated financial statements corresponding to the year then ended.

The balances at December 31, 2004 of the Statements of Income, Changes in Shareholders' Equity and Cash Flows are disclosed in comparative format with the previous financial year.

Certain amounts in the financial statements at June 30, 2004 and at December 31, 2003 were reclassified for disclosure on a comparative basis with those for the period ended December 31, 2004.

**NOTE 3:** **SIGNIFICANT ACCOUNTING POLICIES**

The financial statements of the subsidiaries mentioned in Note 1, have been prepared on a consistent basis with those applied by IRSA Inversiones y Representaciones Sociedad Anónima. Note 1 to the basic financial statements details the most significant accounting policies. Below are the most relevant accounting policies adopted by the subsidiaries, which are not included in that note.

a. Shares of Banco Hipotecario S.A.

Since June 30, 2004, as a consequence of the situation described in Note 16, the Company and Ritelco S.A. value the shares of Banco Hipotecario S.A. by the equity method of accounting.

b. Revenue recognition

The Company's revenues mainly stem from office rental, shopping center operations, development and sale of real estate, hotel operations and, to a lesser extent, from e-commerce activities.

See Note 4 for details on the Company's Operating business segments. As discussed in Note 1, the consolidated statements of income were prepared following the guidelines of Technical Resolution No. 21 of the F.A.C.P.C.E.

**and subsidiaries**

**Notes to the Unaudited Consolidated Financial Statements (Contd.)**

**NOTE 3:** (Continued)

b. (Continued)

Leases and services from shopping center operations

Leases with tenants are accounted for as operating leases. Tenants are generally charged a rent, which consists of the higher of (i) a monthly base rent (the Base Rent ) and (ii) a specified percentage of the tenant's monthly gross retail sales (the Percentage Rent ) (which generally ranges between 4% and 8% of tenant's gross sales).

Furthermore, pursuant to the rent escalation clause in most leases, a tenant's Base Rent generally increases between 4% and 7% each year during the term of the lease. Minimum rental income is recognized on a straight-line basis over the term of the lease. Certain lease agreements contain provisions, which provide for rents based on a percentage of sales or based on a percentage of sales volume above a specified threshold. The Company determines the compliance with specific targets and calculate the additional rent on a monthly basis as provided for in the contracts. Thus, these contingent rents are not recognized until the required thresholds are exceeded.

Generally, the Company's lease agreements vary from 36 to 120 months. Law No. 24,808 provides that tenants may rescind commercial lease agreements after the initial six months, upon not less than 60 days' written notice, subject to penalties which vary from one to one and a half months rent if the tenant rescinds during the first year of its lease, and one month of rent if the tenant rescinds after the first year of its lease. The Company also charges its tenants a monthly administration fee, prorated among the tenants according to their leases, which varies from shopping center to shopping center, relating to the administration and maintenance of the common area and the administration of contributions made by tenants to finance promotional efforts for the overall shopping centers operations.

Administration fees are recognized monthly when earned. In addition to rent, tenants are generally charged admission rights, that tenants may be required to pay upon entering into a lease and upon lease renewal. Admission right is normally paid in one lump sum or in a small number of monthly installments. Admission rights are recognized using the straight-line method over the life of the respective lease agreements. Furthermore, the lease agreements generally provide for the reimbursement of real estate taxes, insurance, advertising and certain common area maintenance costs. These additional rents and tenant reimbursements are accounted for on the accrual basis.

**NOTE 3:** (Continued)

b. (Continued)

Credit card operations

Revenues derived from credit card transactions consist of commissions and financing income. Commissions are recognized at the time the merchants' transactions are processed, while financing income is recognized when earned.

Hotel operations

The Company recognizes revenues from its rooms, catering, and restaurant facilities as earned on the close of each business day.

c. Intangible assets, net

Intangible assets are carried at cost adjusted for inflation as mentioned in Note 2, less accumulated amortization. Included in the Intangible Assets caption are the following:

Trademarks

Trademarks include the expenses and fees related to their registration.

Pre-operating expenses

This item reflects expenses generated by the opening of new shopping malls. Those expenses are amortized by the straight-line method in periods ranging from 2 to 3 years for each shopping mall, beginning as from the date of inauguration.

Property development expenses

## Edgar Filing: IRSA INVESTMENTS & REPRESENTATIONS INC - Form 6-K

Expenses incurred in relation to the selling of development properties, including advertising, commissions and other expenses, are charged to the results for the period in which the corresponding income is accrued, based on the percentage of completion method.

d. Goodwill

Negative goodwill represents the market value of net assets of the subsidiaries at the percentage participation acquired in excess of acquisition cost. Negative goodwill has been restated following the guidelines mentioned in Note 1.4. to the basic financial statements and amortization has been calculated by the straight-line method based on an estimated useful life of 20 years, considering the weighted-average of the remaining useful life of identifiable assets acquired subject to depreciation.

**IRSA Inversiones y Representaciones Sociedad Anónima**

**and subsidiaries**

**Notes to the Unaudited Consolidated Financial Statements (Contd.)**

**NOTE 3:** (Continued)

d. (Continued)

Additionally, also included was the goodwill from the controlled company APSA, originating from the purchase of shares of Tarshop S.A. and Fibesa S.A., which is amortized through the straight-line method over a period of not more than 10 years.

Amortization has been classified under Amortization of goodwill in the Statements of Income.

**NOTA 4: SEGMENT INFORMATION**

The Company has determined that its reportable segments are those that are based on the Company's method of internal reporting. Accordingly, the Company has five reportable segments. These segments are Development and sale of properties, Office and other non-shopping center rental properties, Shopping centers, Hotel operations, and Others. As discussed in Note 1, the consolidated statements of income were prepared following the guidelines of Technical Resolution No. 21 of the F.A.C.P.C.E.

Puerto Retiro S.A.: extension of the bankruptcy

On April 18, 2000, Puerto Retiro S.A. (indirect subsidiary of Palermo Invest S.A.) was notified of a filing made by the National Government, through the Ministry of Defense, to extend the petition in bankruptcy of Inversora Dársena Norte S.A. (Indarsa) to Puerto Retiro S.A.. Concurrently with the complaint, at the request of plaintiff, the bankruptcy court granted an order restraining the ability of Puerto Retiro S.A. to sell or dispose in any manner the real estate property near Puerto Madero denominated *Planta 1* which was acquired from Tandanor S.A. ( Tandanor ) in June 1993.

Indarsa had purchased 90% of the capital stock of Tandanor, a formerly state owned company privatized in 1991, engaged in the shipyard industry.

Indarsa did not comply with the payment of the outstanding price for the purchase of the stock of Tandanor, and therefore the Ministry of Defense requested the bankruptcy of Indarsa. Since the only asset of Indarsa were the shareholdings in Tandanor, the Ministry of Defense is pursuing to extend the bankruptcy to Puerto Retiro S.A.. Puerto Retiro S.A. answered the claim and appealed the preventive measures ordered. This appeal was overruled on December 14, 2000. The legal process has practically concluded its stages to allow the production of evidence. The next step will be the allegations and the issuing of a ruling in the original jurisdiction.

Puerto Retiro S.A. believes, pursuant to the advice of its legal advisors, that the plaintiff's claim shall be rejected by the courts.

**NOTE 15: TARSHOP CREDIT CARD RECEIVABLE SECURITIZACION**

The Company has ongoing revolving period securitization programs through which Tarshop, a majority-owned subsidiary of APSA, transfers a portion of its customer credit card receivable balances to a master trust (the Trust) that issues certificates to public and private investors. To the extent the certificates are sold to third parties, the receivables transferred qualify as sales for financial statement purposes and are removed from the company balance sheet. The remaining receivables in the Trust which have not been sold to third parties are reflected on the company balance sheet as a retained interest in transferred credit card receivables. Under these programs, the company acts as the servicer on the accounts and receives a fee for its services.

Under the securitization programs, the Trust may issue two types of certificates representing undivided interests in the Trust - Títulos de Deuda Fiduciaria ( TDF ) and Certificados de Participación ( CP ), which represent debt, and equity certificates, respectively. Interest and principal services are paid periodically to the TDF holders throughout the life of the security. CPs are subordinated securities which entitle the CP holders to share pro rata in the cash flows of the securitized credit card receivables, after principal and interest on the TDFs and other fees and expenses have been paid. During the revolving period no payments are made to TDF and CP holders. Principal collections of the underlying financial assets are used by the Trust to acquire additional credit card receivables throughout the revolving period.

Once the revolving period ends, a period of liquidation occurs during which: (i) no further assets are purchased and (ii) all cash collections are used to fulfill the TDF service requirements and (iii) the remaining proceeds are used to fulfill the CPs service requirements.

**NOTE 20: DERIVATIVE INSTRUMENTS**

**Interest rate swaps**

Alto Palermo S.A. (APSA) uses certain financial instruments to reduce its global financing costs. Furthermore, the Company has not used the financial instruments to hedge future operations or commitments.

At December 31, 2004 and 2003, APSA held only one derivative financial instrument outstanding, an interest swap valued at its estimated settlement cost. Differences generated by application of the mentioned valuation criteria were recognized in the results for the period.

In order to minimize its financing costs, APSA entered into an interest rate swap agreement to effectively convert a portion of its peso-denominated fixed-rate debt to peso-denominated floating rate debt. At March 31, 2001 the Company had an interest rate swap agreement outstanding with an aggregate notional amount of Ps. 85.0 million with maturity in April 2005. This swap agreement initially allowed APSA to reduce the net cost of its debt. However, subsequent to June 30, 2001, APSA modified the swap agreement due to an increase in interest rates as a result of the economic situation. Under the terms of the revised agreement, APSA converted its peso-denominated fixed rate debt to U.S. dollar-denominated floating rate debt for a notional amount of US\$ 69.1 million with maturity in April 2005. As of December 31, 2004 the interest rate swap had an estimated settlement cost (fair value) of US\$ 45.24 million liability. Any difference payable or receivable is accrued and recorded as an adjustment to disbursements for interest in the Statement of Income. During periods ended December 31, 2004 and 2003, APSA recognized gains of Ps. 4.9 million and of Ps. 9.4 million, respectively.

The inherent risk to Alto Palermo S.A. from the swap agreement is limited to the cost of replacing that contract at current market rates. Alto Palermo S.A. considers that such cost would increase in the event of a continuing devaluation of the peso.

**Options contracts to purchase metals**

During the current half-year, Ritelco S.A. entered into future contracts for the purchase of silver. In accordance with its risk administration policies, Ritelco S.A. enters into future metal contracts for speculative purposes.

**NOTE 24: PROVISION FOR UNEXPIRED CLAIMS AGAINST LLAO LLAO HOLDING S.A.**

The company Llao Llao Holding S.A. (in the process of dissolution due to merger with IRSA Inversiones y Representaciones S.A.), predecessor of Llao Llao Resorts S.A. in the operation of the hotel complex Hotel Llao Llao, which was awarded by Resolution No. 1/91 issued by the National Parks Administration, was sued in 1997 by that Administration to obtain collection of the unpaid balance of the additional sale price, in Argentine external debt securities amounting to US\$ 2,870,000. A ruling of the court of original jurisdiction sustained the claim. That ruling was appealed, and the Court of Appeals confirmed the judgment of the court of original jurisdiction, demanding payment from the company of the mentioned amount in Argentine external debt securities available at the date of the ruling, plus interest accrued through payment, and compensatory and punitive interest and lawyers' fees.

On March 2, 2004, the Company made a deposit of Ps. 7,191 in Banco de la Ciudad de Buenos Aires in favor of the National Parks Administration and a transfer of Argentine external debt securities class FRB - FRB L+13/16 2005 for a total nominal value of US\$ 4,127,000, equivalent to Ps. 1,964. The total amount settled on that date was Ps. 9,156.

The intervening court served notice to the plaintiff of payment made, and on June 30, 2004 the plaintiff presented a writing rejecting that payment, considering it partial settlement of the debt arising from the firm judgement filed in the records of the case, and requested the setting up of a time deposit with the funds paid, automatically renewable every thirty days, until final payment of the total debt.

The Court resolved the matter by considering notice to have been served; as regards the amount due, the plaintiff must conform the claim to current regulations. Until final resolution of the matter, Banco de la Ciudad de Buenos Aires was instructed to appropriate the funds to a renewable time deposit.

As a result of this situation, Management decided to increase the provision for unexpired claims to Ps. 4,643.

**NOTE 1: SIGNIFICANT ACCOUNTING POLICIES**

Below are the most relevant accounting standards used by the Company to prepare these unaudited financial statements:

1.1. Preparation and presentation of financial statements

These unaudited financial statements are stated in Argentine pesos and were prepared in accordance with disclosure and valuation criteria contained in the Technical Pronouncements issued by the Argentine Federation of Professional Councils in Economic Sciences, approved with certain amendments by the Professional Council in Economic Sciences of the Autonomous City of Buenos Aires, in accordance with the resolutions issued by the National Securities Commission.

The unaudited financial statements corresponding to the six-month periods ended December 31, 2004 and 2003 have not been audited. The Company's Management estimates that all the necessary adjustments have been made to reasonably present the results of each period.

The results for the six-month periods ended December 31, 2004 and 2003 do not necessarily reflect proportionately the Company's results for the complete financial years.

1.2. Issuance of new technical pronouncement

On February 19, 2003, the Professional Council in Economic Sciences of the Autonomous City of Buenos Aires approved Technical Pronouncement No. 21: Equity Method Value consolidation of financial statements information to disclose on related parties through Resolution M.D. No. 5/2003. This Technical Pronouncement and the modifications it amendments there to, became effective to the Company for the fiscal year ended June 30, 2004. Furthermore, the National Securities Commission has adopted that standard, making certain changes and establishing that it is applicable to fiscal years commenced as from April 1, 2004, admitting early application.

**IRSA Inversiones y Representaciones Sociedad Anónima**

**Notes to the unaudited financial statements (Continued)**

**NOTE 1:** (Continued)

1.3. Use of estimations

The preparation of the unaudited financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities as of the date of the financial statements, and the reported amounts of revenues and expenses for the period. Estimates are used when accounting for allowance for doubtful accounts, depreciation, amortization, impairment of long-lived assets, income taxes and contingencies. Future actual results could differ from the estimates and assumptions prepared at the date of these unaudited financial statements.

1.4. Recognition of the effects of inflation

The financial statements have been prepared in constant monetary units, reflecting the overall effects of inflation through August 31, 1995. From that date and until December 31, 2001 the Company discontinued the restatement of the financial statements due to a period of monetary stability. From January 1, 2002 up to February 28, 2003 the effects of inflation were recognized due to the existence of an inflationary period. As from that date, the restatement of the financial statements was discontinued.

This criterion is not in line with current professional accounting standards, which establish that the financial statements must be restated through September 30, 2003. However, due to the low materiality of inflation rates during the period from March to September 2003, this deviation has not had a material effect on the financial statements taken as a whole.

The rate used for restatement of items in these unaudited financial statements is the domestic wholesale price index published by the National Institute of Statistics and Census.

1.5. Comparative information

Balance sheet items at June 30, 2004 shown in these financial statements for comparative purposes arise from the audited annual financial statements corresponding to the year then ended.

Balances at December 31, 2004 shown in the Statement of Income, Changes in Shareholders' Equity and Cash flows are shown on a comparative basis with those for the same period of the previous year.

**IRSA Inversiones y Representaciones Sociedad Anónima**

**Notes to the Unaudited Financial Statements (Continued)**

**NOTE 1:** (Continued)

1.6. Valuation criteria

a. Cash and banks

Cash on hand has been valued at face value.

b. Foreign currency assets and liabilities

Foreign currency assets and liabilities were valued at period-end exchange rates.

Operations denominated in foreign currency are converted into pesos at the rates of exchange in effect at the date of settlement of the operation. Operations in foreign currency are shown in the Statement of Income under Financial results, net.

In accordance with Decree 214/02, certain assets and liabilities denominated in US dollars or other foreign currencies existing at January 6, 2002 were converted into pesos at the parity of Ps. 1 per US\$ 1 and adjusted through application of the reference stabilization index (CER).

c. Short-term investments

Time deposits have been valued at placement value plus financial results accrued based on the internal rate of return determined at that moment.

Short-term investments in debt securities, and mutual funds were valued at their net realization value.

d. Trade receivables and accounts payable

Trade receivables and accounts payable have been valued at the price applicable to spot operations at the time of the transaction plus interest and implicit financial components accrued at the internal rate of return determined at that moment.

e. Financial receivables and payables

Edgar Filing: IRSA INVESTMENTS & REPRESENTATIONS INC - Form 6-K

Financial receivables and payables have been valued at the amount deposited and collected, respectively, net of operating costs, plus financial results accrued based on the internal rate of return estimated at that time.

**IRSA Inversiones y Representaciones Sociedad Anónima**

**Notes to the unaudited financial statements (Continued)**

**NOTE 1:** (Continued)

1.6. (Contd.)

f. Other receivables and payables

Sundry current assets and liabilities have been valued at face value plus the financial results accrued at the closing of the corresponding period.

Sundry receivables and payables (Asset tax, deposits in guarantee, and accounts receivable in trust) were valued based on the best estimate of the amount receivable and payable, respectively, discounted at the interest rate applicable to freely available savings accounts published by the Argentine Central Bank in effect at the time of incorporation to assets and liabilities, respectively.

As established by the regulations of the National Securities Commission and as mentioned above, deferred tax assets and liabilities have not been discounted. This criterion is not in accordance with current accounting standards in effect in the Autonomous City of Buenos Aires, which require that those balances be discounted. The effect resulting from this difference has not had a material impact on the financial statements.

Credits in kind:

The units relating to the building called Edificios Cruceros have been valued according to the accounting measuring standards corresponding to inventories receivable and it has been disclosed under the current portion of other receivables.

Liabilities in kind:

The Company records a liability in kind corresponding to an obligation to deliver units to be built in relation to the San Martín de Tours property. This liability was valued at the higher of amounts received or the estimated cost of building of the units plus additional costs to transfer the assets to the creditor, and is shown as a current liability under Mortgages payable .

1.6. (Contd.)

g. Balances corresponding to financial transactions and sundry receivables and payables with related parties

Receivables and payables with related parties generated by financial transactions and other sundry transactions were valued in accordance with the terms agreed by the parties.

h. Inventory

A property is classified as available for sale upon determination by the Board of Directors that the property is to be marketed for sale in the normal course of business over the next several years.

Residential, office and other non-retail properties completed or under construction are stated at cost, adjusted for inflation as mentioned in Note 1.4., or estimated net realizable value, whichever is lower. Costs include land and land improvements, direct construction costs, construction overhead costs, interest on indebtedness and real estate taxes. Selling costs are deferred and charged to expense in the period in which the related revenue is earned, as determined under the percentage-of-completion method. Total contract costs are charged to expense in the period in which the related revenue is earned, as determined under the percentage-of-completion method. During the period ended December 31, 2004 interest costs of the property called San Martín de Tours were capitalized for \$ 171. Previously in the financial period ended June 30, 2004 there have been no capitalizations of this item.

Properties held for sale are classified as current or non-current based on the estimated date of sale and the time at which the related receivable is expected to be collected by the Company.

At December 31, 2004, the Company maintains allowances for impairment of certain inventories, totaling Ps. 233 (identified as, Minetti D, Torres Jardín, Sarmiento 517 and parking lots in Dock 13).

The accounting value of inventories, net of allowances set up, does not exceed their estimated recoverable value.

i. Long-term investments

Investments in debt securities:

## Edgar Filing: IRSA INVESTMENTS & REPRESENTATIONS INC - Form 6-K

Investments in debt securities were valued based on the best estimate of the discounted amount receivable applying the corresponding internal rate of return estimated at the time of incorporation to assets, as the Company will hold them to maturity. The value thus obtained does not exceed the respective estimated recoverable value at the end of the period.

1.6.i. (Contd.)

Investments in shares of subsidiaries and related companies:

The long-term investments in subsidiaries and related companies detailed in Exhibit C have been valued by using the equity method of accounting based on the financial statements at December 31, 2004 issued by them. The accounting standards used by the subsidiaries to prepare their financial statements are the same as those used by the Company. The accounting standards used by the related companies to prepare their financial statements are those currently in effect.

This item also includes the lower or higher value paid for the purchase of shares in subsidiaries and related companies which exceeds or is below the market value of the assets acquired, and goodwill related to the subsidiary Alto Palermo S.A. and Banco Hipotecario S.A.

As a result of the purchase of shares and the exercise of the options mentioned in Note 16 to the consolidated financial statements, the Company has reevaluated the accounting criterion to be used for valuation of its participation in Banco Hipotecario S.A. and subsidiaries (Banco de Crédito y Securitización S.A.), originally recognized at net realization value and restated acquisition cost, respectively. Taking into account the current participation of the Company in these entities, the exercise of significant influence on their decisions and the intention to maintain the participation as a long-term investment, the Company has valued its investment in these companies by the equity method of accounting. In accordance with the regulations of the BCRA and the contracts signed as a result of Banco Hipotecario S.A.'s financial debt restructuring process, there are certain restrictions on the distribution of profits by Banco Hipotecario S.A. to the Company.

Certificates of participation in IRSA I financial trust:

The Class D certificates of participation in IRSA I financial trust have been valued at the amount resulting from apportioning the participation certificate holding to the trust assets.

1.6.i. (Contd.)

Undeveloped parcels of lands:

The Company acquires undeveloped land in order to provide an adequate and well-located supply for its residential and office building operations. The Company's strategy for land acquisition and development is dictated by specific market conditions where the Company conducts its operations.

Land held for development and sale and improvements are stated at cost adjusted for inflation mentioned in Note 1.4., or estimated net realizable value, whichever is lower. Land and land improvements are transferred to inventories when construction commences.

At December 31, 2004 the Company maintains allowances for impairment of certain parcels of undeveloped land totaling Ps. 8,253 (identified as Padilla, Torres Jardín IV, Constitución 1111).

The values thus obtained, net of the allowances recorded, do not exceed their respective estimated recoverable values at the end of period.

j. Fixed assets

Fixed assets, net comprise primarily of rental properties and other property and equipment held for use by the Company.

Fixed assets value, net of allowances set up, does not exceed estimated recoverable value at the end of the period.

Rental properties

Rental properties are carried at cost, adjusted for inflation as mentioned in Note 1.4., less accumulated depreciation and allowance for impairment at the end of the period. Costs incurred for the acquisition of the properties are capitalized. Accumulated depreciation is computed under the straight-line method over the estimated useful lives of the assets, which generally are estimated to be 50 years for buildings. Expenditures for ordinary maintenance and repairs are charged to results in the period incurred. Significant renovations and improvements, which improve or extend the useful life of the asset are capitalized and depreciated over its estimated remaining useful life. At the time depreciable assets are retired or otherwise disposed of, the cost and the accumulated depreciation of the assets are eliminated from the accounts and the resulting gain or loss is disclosed in the statement of income.

The Company capitalizes interest on long-term construction projects. No interest costs were capitalized during the reported periods.

1.6.j. (Contd.)

At December 31, 2004 the company maintains allowances for impairment of certain rental property, totaling Ps. 9,313 (identified as Avda. Madero 1020, Reconquista 823, Avda. Madero 942 Sarmiento 517, Suipacha 664, Av. de Mayo 595, Constitución 1111, Libertador 602, Rivadavia 2768, Libertador 498, and Costeros Dique IV).

Software obtained or developed for internal use

The Company capitalizes certain costs associated with the development of computer software for internal use. Costs capitalized during the period ended December 31, 2004 and the year ended June 30, 2004 were not material.

These costs are being amortized on a straight-line basis over a period of 3 years.

Other properties and equipment

Other property and equipment properties are carried at cost, adjusted for inflation as mentioned in Note 1.4., less accumulated depreciation. Accumulated depreciation is computed under the straight-line method over the estimated useful lives of the assets, as specified below:

<u>Asset</u>	<u>Estimated useful life (years)</u>
Leasehold improvements	On contract basis
Furniture and fixtures	5
Computer equipment	3
Vehicles	5

The cost of maintenance and repairs is charged to expense as incurred. The cost of significant renewals and improvements are added to the carrying amount of the respective assets. When assets are retired or otherwise disposed of, the cost and related accumulated depreciation are removed from the accounts.

k. Deferred financing cost

Expenses incurred in connection with the issuance of debt and proceeds of loans have been deferred and are being amortized using the interest method over the life of the related issuances. In the case of redemption of this notes, the related expenses are amortized using the proportional

method.

Amortization has been recorded under Financial Results in the statements of income.

l. Customer advances

Customer advances represent payments received in advance in connection with the sale and rent of properties.

m. Income tax

The Company has recognized the charge for income tax by the deferred tax liability method, recognizing timing differences between measurements of accounting and tax assets and liabilities (See Note 12).

To determine deferred assets and liabilities, the tax rate expected to be in effect at the time of reversal or use has been applied to timing differences identified and tax loss carryforwards, considering the legal regulations approved at the date of issuance of these unaudited financial statements.

Since it is unlikely that future taxable income will fully absorb tax loss carryforwards, the Company has recorded an impairment on a portion of that credit.

n. Asset Tax

The Company calculates Asset tax by applying the current 1% rate on computable assets at the end of the period. This tax complements income tax. The Company's tax obligation in each year will coincide with the higher of the two taxes. However, if Asset tax exceeds income tax in a given year, that amount in excess will be computable as payment on account of income tax arising in any of the following ten years.

At December 31, 2004, the Company has estimated the asset tax, recognizing under Other receivables (non-current) the amount estimated to be offset as payment on account of income tax in future years in accordance with current regulations, and expensing the remaining balance.

o. Allowances and Provisions

Allowance for doubtful accounts: the Company provides for losses relating to mortgage, lease and other accounts receivable. The allowance for losses is recognized when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the terms of the agreements. The allowance is determined on a one-by-one basis considering the present value of expected future cash flows. While management uses the information available to make evaluations, future adjustments to the allowance may be necessary if future economic conditions differ substantially from the assumptions used in making the evaluations. Management has considered all events and/or transactions that are subject to reasonable and normal methods of estimations, and the unaudited financial statements reflect that consideration.

For impairment of assets: the Company regularly evaluates its non-current assets for recoverability. The Company considers that an impairment loss is recorded whenever the recoverable value is lower than book value. Impairment losses must be expensed against the result for the period. The recoverable value is mainly calculated using independent appraisals or projections of future cash flows. At the end of each year the Company estimated the recoverable value of its non-current assets, recording a charge due to impairment or reversing the provision.

For lawsuits: the Company has certain contingent liabilities with respect to existing or potential claims, lawsuits and other proceedings, including those involving labor and other matters. The Company accrues liabilities when it is probable that future costs will be incurred and such costs can be reasonably estimated. Such accruals are based on developments to date, the Company's estimates of the outcomes of these matters and the Company's lawyers' experience in contesting, litigating and settling other matters.

As the scope of the liabilities becomes better defined, there may be changes in the estimates of future costs, which could have a material effect on the Company's future results of operations and financial condition or liquidity.

At the date of issuance of these unaudited financial statements, Management understands that there are no elements to foresee potential contingencies having a negative impact on these unaudited financial statements.

p. Shareholders equity accounts

Movements in shareholders equity accounts have been restated following the guidelines detailed in Note 1.4. until February 28, 2003. Subsequent movements are stated in the currency of the month to which they correspond.

The Common stock account was stated at historical nominal value. The difference between value stated in constant currency, following the guidelines detailed in Note 1.4., and historical nominal value is shown under Inflation adjustment of common stock forming part of the shareholders equity.

q. Results for the period

The results for the period are shown as follows:

Income accounts are shown in currency of the month to which they correspond.

Charges for assets consumed (fixed asset depreciation, intangible asset amortization and cost of sales) were determined based on the values recorded for such assets.

Results from investments in controlled and affiliated companies was calculated under the equity method, by applying the percentage of the Company s equity interest to the results of such companies, with the adjustments for application of Technical Pronouncement 21.

r. Advertising expenses

The Company generally charges the advertising and publicity expenses to results when they are incurred. Advertising and promotion expenses were approximately Ps. 151 and Ps. 148 for the periods ended December 31, 2004 and 2003, respectively.

s. Pension information

## Edgar Filing: IRSA INVESTMENTS & REPRESENTATIONS INC - Form 6-K

The Company does not maintain any pension plans. Argentine laws provide for pension benefits to be paid to retired employees from government pension plans and/or privately managed funds plan to which employees may elect to contribute.

t. Derivative financial instruments

In the past the Company used certain financial instruments to administer the risk related to its net investments in foreign activities and also as a complement to reduce its net financial costs. At present, the Company does not record operations with derivatives.

u. Revenue recognition

u.1. Sales of properties

The Company records revenue from the sale of properties classified as inventory when all of the following criteria are met:

the sale has been consummated;

there is sufficient evidence to demonstrate the buyer's ability and commitment to pay for the property;

the Company's receivable is not subject to future subordination; and

the Company has transferred the property to the buyer.

The Company uses the percentage-of-completion method of accounting with respect to sales of development properties under construction effected under fixed-price contracts. Under this method, revenue is recognized based on the ratio of costs incurred to total estimated costs applied to the total contract price. The Company does not commence revenue and cost recognition until such time as the decision to proceed with the project is made and construction activities have begun. The percentage-of-completion method of accounting requires the Company's management to prepare budgeted costs in connection with sales of properties/units. All changes to estimated costs of completion are incorporated into revised estimates during the contract period.

u.2. Leases

Revenues from leases are recognized on a straight line bases over the life of the related lease contracts.

v. Cash and cash equivalents

The Company considers all highly liquid investments with original maturities of three months or less, consisting primarily in mutual funds, as cash equivalents.

w. Monetary assets and liabilities

Monetary assets and liabilities are stated at their face value plus or minus the related financial gain or loss.

- According to Note 11, these tally with the convertible negotiable obligations to stock (CNB) for a total amount of US\$ 100 million which as of the current date amounts to US\$ 86.2 million, net of issue expenses.
- Corresponds to unsecured loan for a total of US\$ 51 million, which falls due on 20 November 2009, with the principal being amortized in 20 quarterly installments with a two-year grace period. US\$ 35 million of the principal accrue interest at the LIBO rate over three months plus 200 basis points, and US\$ 16 million accrue interest at a fixed rate that is progressively increased. On July 25, 2003 the Company redeemed the mentioned US\$ 16 million for US\$ 10.9 million. In addition, on March 17, 2004, the Company redeemed US\$ 12 million for a total amount of US\$ 8.6 million. Consequently, at December 31, 2004, principal (net of interest to be accrued at a market rate of 8% p.a.) amounts to US\$ 20.3 million.

**NOTE 11: CONVERTIBLE NEGOTIABLE OBLIGATIONS**

On March 8, 2002, the Ordinary and Extraordinary Meeting of Shareholders resolved:

- a) Approving the issuance of Negotiable Obligations Convertible into Ordinary Shares of the company ( ONC ) for up to a face value of US\$100,000,000 (one hundred million pesos), for a term of 5 (five) years, at a fixed interest rate of 6% to 12% per annum, payable half-periodly in arrears.
- b) Approving a subscription option for the ONC holders to subscribe ordinary shares of the company at 1 (one) share per Ps.1 (one peso) of ONC face value, paying in cash Ps.1(pesos one) as subscription price, during 15 (fifteen) days after the conversion term has expired, including the corresponding capital increase.
- c) Suppressing the preferential subscription and accretion rights, or reducing the term to exercise the preference, as provided by section 12 of the Negotiable Obligations Law and other applicable regulations.
- d) Amending article nine (9) of the bylaws to partially adapt its contents to the market circumstances arising from the amendment approved, by replacing 1) the 20% percentage referred to in the amendment to the bylaws, by the percentage indicated in Decree 677/01, i.e., 35%; and 2) eliminating the negotiable obligations or other convertible debt securities, as well as the warrants, from the calculation mentioned in Article Nine of the Bylaws.

The public offering and listing of the above-mentioned negotiable obligations was approved by Resolution No. 14316 of the National Securities Commission dated September 24, 2002 and the Buenos Aires Stock Exchange, authorizing the issuance for up to US\$ 100,000,000 of securities consisting of negotiable obligations convertible for ordinary shares, bearing interest at an annual rate of 8% and falling due in 2007 and which, at the time of their conversion, provide the right to options to subscribe 100,000,000 ordinary shares. Furthermore, the conversion price and the price of Warrants have been set as follows:

- a) The conversion price is 0.5571 shares (5.5713 GDS), while the price of the Warrant is 0.6686 shares (6.6856 GDS).
- b) The holder is entitled to exchange each Negotiable Obligation issued by IRSA for 1.7949 shares (0.1795 GDS) and has an option to purchase the same number of shares at the exercise price set for the Warrant.

As a result of the distribution of 4,587,285 treasury stock, the Company has adjusted the conversion price of its Convertible Negotiable Bonds in accordance with the terms of the issue. Thus, the conversion price of the Negotiable Bonds fell from US\$ 0.5571 to US\$ 0.54505 and the price of execution of the warrants dropped from US\$ 0.6686 to US\$ 0.6541. Said adjustment came into force on 20 December 2002.

**6. Brief comment on the outlook for the coming year.**

See attached.

**Comments on operations for the quarter ended December 31, 2004**

Calendar year 2004 ended with satisfactory activity levels. As a result of the proactive policies aimed at encouraging consumption and investment, including a more relaxed fiscal policy in the second half of the year, an expansive monetary policy with low interest rates and high currency exchange rates, the decline in private savings and reduction in net capital outflows, the GDP increased 2.9% in the third quarter as compared to the previous quarter, accumulating an annual unseasonal growth of 12.1% and an 8.3% increase per annum as compared to the same period of the previous year.

Growth was strongly driven by domestic demand, which contributed 11.4 points to the year-on-year GDP expansion, while external demand reduced it by 1.9 points.

Consumption, mainly from the private sector, experienced a strong annual increase of 8.8%, even exceeding GDP growth. In particular, in 2004 shopping center sales grew by 23.6% as compared to the previous year.

Investment also continued its upward trend with an annual increase of 33.1%, although it rose at a slower pace (4% in the average in the last two quarters, compared to an average of 11% in the previous five quarters) and is still at low levels. The quality of investments improved, however, as development capital (investments in machinery and equipment) exceeded replacement capital. The construction industry recorded a significant growth, mainly in high-scale real estate projects and investments for the opening of new shopping centers, hypermarkets and large stores. The hotel industry also had a sound performance hand in hand with the increase in tourism.

The consumer confidence rate (CCR), that measures the consumers' mood regarding short and medium term purchase decisions and therefore the trend of macroeconomic indicators in the next quarters, grew 9.2% in January as compared to the previous month, reaching 56.8 points, and featuring a cumulative increase of 21.7% as compared to the value as of August 2004, the month preceding that in which internal confidence started to give clear signs of recovery. This indicator ratifies the sustained upward trend in consumption, that translates into our business results.

The rate of confidence in the Government has recovered for the third consecutive month, reverting the downward trend of February and August 2004, although it still remains below the average levels of the Kirchner administration.

Unemployment declined as a consequence of the increase in activity and labor cost reduction resulting from the devaluation. The demand for jobs exceeded supply, resulting in a decrease in the unemployment rate from 14.8% in the second quarter to 13.2% in the third quarter, and a 3.1% decline as compared to the previous year.

Although the sovereign debt swap has already started, uncertainly still exists on the market regarding its final outcome.

2004 is expected to close with an average growth of around 8.7%. According to private sources, in 2005 a deceleration in the growth rate is expected to occur, motivated by the narrowing of the output gap and macroeconomic uncertainty, with an estimate in the whereabouts of 6.5/7% per annum<sup>1</sup>.

## Edgar Filing: IRSA INVESTMENTS & REPRESENTATIONS INC - Form 6-K

In this context, net results for the six-month period ended December 31, 2004 showed a Ps. 56.8 million profit as compared to a Ps. 32.4 million loss recorded in the same period of fiscal year 2004. This income may be explained as follows:

---

<sup>1</sup> Source: Estudio Broda y Asoc.

Revenues increased by 49.3% or Ps. 61.1 million, from Ps. 124.1 million as of December 31, 2003 to Ps. 185.2 million as of December 31, 2004, reflecting (i) an increase of Ps. 35.2 million in the shopping center segment; (ii) an increase of Ps. 14.1 million in sales and developments due to the exchange of a lot in Dique III (iii) an increase of Ps. 10.2 million in the hotel segment and (IV) an increase of Ps.1.7 million in offices and other.

The increase in revenues favorably impacted on our operating income, which stood at Ps. 59.3 million as of December 31, 2004 compared to Ps. 24.5 million as of December 31, 2003, representing a 142.4% increase. Operating income over total revenues stood at 32% in this semester compared to 20% in the same period of the previous year.

Financial results recorded a loss of Ps. 9.7 million compared to a gain of Ps. 34.0 million in the previous semester. The difference is mainly explained by the lower results from financial transactions, which decreased from Ps. 74.3 million in the first half of fiscal year 2004 to Ps. 18.9 million in this fiscal year. It should be noted that during the six-month period ended December 31, 2003, the company valued its interest in Banco Hipotecario at the share s market value, which had showed a significant increase during that quarter.

Finally, results for this semester have been boosted by higher income from our subsidiaries, which recovered from a loss of Ps. 8.9 million as of December 31, 2003 to an income of Ps. 49.5 million in this fiscal year. This increase is mainly explained by the income generated by our holding in Banco Hipotecario S.A. which has been recorded according to its proportional equity value in this fiscal year whereas in the previous year it was recorded at market value and therefore any appreciation was included in financial results.

Second quarter of fiscal year 2005 highlights, including significant operations occurred after the end of the period.

**II. Shopping Centers - Alto Palermo S.A ( APSA ).**

## Edgar Filing: IRSA INVESTMENTS & REPRESENTATIONS INC - Form 6-K

The following information relates to data extracted from the balance sheet of Alto Palermo S.A. (APSA), the company that operates our shopping centers, in which we had a 60.7% interest as of December 31, 2004.

APSA's net income for the six-month period was Ps. 10.8 million, Ps. 10.7 million higher than the Ps. 0.1 million income recorded in the same period of the previous year. This increase mainly reflects its higher operating income, which rose 97.6% to Ps. 42.4 million as of December 31, 2004 from Ps. 21.4 million as of December 31, 2003.

Total revenues as of December 31, 2004 were Ps. 103.6 million, 51.4% higher than the Ps. 68.4 million recorded in the same period of the previous year. This increase mainly reflects the excellent sales momentum of our shopping centers, which allows us to adjust renewed leases and increase basic rental charges to our lessees. In

addition, during the last quarter the company started to record revenues from the operation of Alto Rosario and Mendoza Plaza Shopping, which amounted to Ps. 3.9 million. As concerns Mendoza Plaza Shopping, the company started to consolidate its revenues as from October 1, 2004.

Revenues from our subsidiary Tarjeta Shopping also increased significantly to Ps. 25.6 million in this semester as compared to Ps. 12.8 million as of December 31, 2003.

Gross profit for the period achieved a significant increase of 83.5%, from Ps. 34.5 million in the first half of fiscal year 2004 to Ps. 63.2 million during the first half of fiscal year 2005.

The semester ended December 31, 2004 was a milestone in the company's history, as the efforts made during the past years were consolidated and the aftermath of the Argentine crisis was fully overcome. After several years of postponements we opened another shopping center, Alto Rosario, that was fully developed by the company, and consummated the acquisition of a further one, Mendoza Plaza Shopping, increasing to 9 the number of shopping centers managed by us and expanding our gross leaseable area and number of stores by 51,439 sq.m. and 281, respectively.

Our tenants' sales have continued to grow to record levels, reaching Ps. 860 million in the six-month period ended December 31, 2004, 32% higher than those recorded in the same period of the previous year.

The business success of our tenants continues to increase demand for space at our shopping centers. In this way, we have reached an occupancy rate of 98.5%, even surpassing pre-crisis figures. The evolution of this variable not only shows an improvement in our business, but also the excellent quality of our shopping centers portfolio.

The current bonanza in the retail sector allows us to enter into new lease agreements under better conditions. We thus increased the goodwill charge (also known as key money) required for the renewal or execution of new agreements at our shopping centers and obtained higher profits from the variable component of our revenues.

#### Tarjeta Shopping

Tarshop S.A. is a credit card company in which APSA holds an 80% interest.

The favorable context and successful performance of our credit card business unit caused Tarshop S.A. to record an income of Ps. 2.6 million for the first half of fiscal year 2005, a 78.7% increase compared to an income of Ps. 1.4 million recorded in the same period of the previous year.

Net revenues had a significant increase of 99.8%, from Ps. 12.8 million during the first half of fiscal year 2004 to Ps. 25.6 million during this semester. In addition, operating results increased 128.2% to Ps. 3.5 million.

### Increase in interest in Mendoza Plaza Shopping

On September 29, 2004, APSA entered into an agreement for the purchase of 49.9% of the capital stock of Perez Cuesta S.A.C.I., a company mainly engaged in the operation of the Mendoza Plaza Shopping center in the City of Mendoza. The purchase price was US\$ 5.3 million. US\$ 1.77 million were paid on December 2 and the balance will be paid in two equal installments of US\$ 1.77 million, due on September 29, 2005 and 2006.

Through this purchase APSA's equity interest increased to 68.8%.

The transaction was approved by the Antitrust Authorities on November 17, 2004. On December 2, 2004 the final purchase agreement was executed and the capital stock was transferred, and the company's name was changed to Mendoza Plaza Shopping S.A.

The shopping center has 37,090 square meters of gross leaseable area, 144 retail stores, sales per square meter of US\$ 150 and an occupancy rate of 97%.

At present APSA is holding negotiations with the creditors of Mendoza Plaza Shopping S.A. in order to obtain the refinancing or discharge of its financial indebtedness. Simultaneously with the purchase of the shares, Alto Palermo granted to Banco de Chile an option for the sale of the claim held by this bank against Mendoza Plaza Shopping S.A. for an amount of US\$ 8.5 million. Banco de Chile may exercise the option as from March 31, 2005. In addition, Alto Palermo executed an option for the purchase of the loan that Mendoza Plaza owes to HSBC Bank Argentina S.A. for an amount of Ps. 7.2 million. Upon its execution APSA paid a Ps. 0.7 million premium that will be regarded as forming part of the purchase price in case it exercises the option. APSA may exercise the option for a term of 30 days as from March 1, 2005.

In addition, a sales option was granted to Inversiones Falabella Argentina S.A. whereby the latter has an irrevocable right to sell its shares in Mendoza Plaza Shopping S.A. (31.2%) to APSA at a price of US\$ 3.0 million. The term for exercising the option expires in October 2008.

**III. Sales and Developments**

For the six-month period ended December 31, 2004, the sales and developments segment recorded revenues of Ps. 27.5 million, compared to Ps. 13.4 million in the same period of the previous year. The higher revenues in the sales and development segment mainly reflect the swap executed in connection with the lot in Dique 3, which generated revenues of Ps. 23.6 million.

Edificios Dique 3. In September 2004 we executed a swap and option agreement with DYPSA (Desarrollos y Proyectos Sociedad Anónima) in connection with lots 1c and 1e of Dique III in Puerto Madero to build under our sole responsibility two residential buildings of 37 and 40 floors. Under this agreement, lot 1c was exchanged for 28.50% of the total square meters to be built in the first tower, and a swap option was granted with respect to a second lot for 31.50% of the square meters to be built in the second tower. These transactions are secured by mortgages for US\$ 8.03 million and US\$ 10.8 million, respectively. The second transaction will be conditioned to meeting the deadlines set for the work schedule of the first tower. In November 2004, lot 1c was swapped, at a profit of Ps. 15.8 MM.

Pre-sale of Cruceros, Dique 2 and San Martín de Tours. Pre-sale of both projects is expected to start during this quarter.

El Encuentro, Benavídez. Infrastructure works are making progress. The rising prices of lots in the Northern area, especially in the vicinity of the project, anticipate the success of this venture.

Abril, Hudson, Province of Buenos Aires. All projected neighborhoods are being marketed and 94% of the lots have already been sold. There are 675 completed houses, 110 houses are under construction and 35 projects have been submitted.

Below is a detail of property being developed by IRSA as of December 31, 2004.

Income from the hotel segment recorded a significant increase, from Ps. 35.1 million in the second quarter of fiscal year 2004 to Ps. 45.3 million in the same period of this fiscal year.

This result reflected both the increase in occupancy rates and average prices. Rates also improved, with an average price per room of Ps. 314 in this period as compared to Ps. 265 in the previous period.

## V. Financial and other transactions

Increase of our interest in APSA. Taking advantage of the attractive prices and the boom and huge potential of the shopping center business, we decided to increase our interest in APSA. On November 30, 2004, we purchased from GSEM/AP Holdings LP, a subsidiary of Goldman Sachs, 3,061,450 Convertible Notes and 4,458,080 shares in APSA for a total of US\$ 15.3 million. Besides, in compliance with preexisting agreements with Parque Arauco S.A., our partner in this company, we sold to Parque Arauco S.A. 1,004,866 Convertible Notes and 1,463,284 shares in APSA at the same price as that paid to Goldman Sachs, for a total amount of US\$ 5.1 million.

As of December 31, 2004, after the sale to Parque Arauco, our interest in APSA was 60.7%.

Exercise of warrants and conversion of Convertible Bonds. On December 31, 2004, warrants issued by our company were exercised for a total of US\$ 0.9 million par value, resulting in the issue of 1.6 million shares. Total proceeds from this transaction were US\$ 1.1 million.

Also on that date, our debt was reduced by the conversion of Convertible Bonds of US\$ 0.9 million par value, representing 1.6 million shares.

As of December 31, 2004, the amount of outstanding Convertible Bonds and warrants was US\$ 86.2 million and US\$ 86.8 million, respectively, while the number of outstanding shares totaled 261.5 million of Ps. 1 par value each.

APSA - Distribution of dividends. On November 17, 2004 APSA made available to its shareholders the cash dividends approved at the General Ordinary and Extraordinary Shareholders' Meeting of Alto Palermo S.A. (APSA) held on October 22, 2004. The amount approved as dividends was Ps. 17.9 million, but as the company, in its capacity as income tax withholding agent, must make a 35% withholding as sole and final payment in accordance with the provisions of Section 69.1 of the Income Tax Law, amounting to a total of Ps. 3.2 million, the sum receivable by the shareholders was Ps. 14.7 million (Ps. 0.0188 per share of Ps. 0.1 par value). Net of withholdings, IRSA received PS. 8.3 million.

APSA - Financial Debt. On January 13, 2005, APSA fully retired its Ps. 120 million Notes due in January 2005, as scheduled.

With respect to its Ps. 85 million 14.875% Notes due in April 2005, the outstanding principal amount is Ps. 48.4 million.

Therefore, the amount of outstanding convertible bonds is US\$ 47,281,230 while the number of shares of stock is now 780,423,632 and the corporate stock capital amounts to 78,042,363.2.

VI. Brief comment on prospects for the next quarter

The opportunities tied to the forecasts of economic growth encourage us to continue developing important projects and planning future investments in all our business segments.

Stimulated by the dynamism of the ABC1, we are evaluating the development and operation of numerous projects. Regarding the shopping center segment, we plan to continue offering our wide variety of commercial proposals in accordance with our consumers' needs. We will continue to work in the Rosario Project with the aim of meeting the rest of the deadlines set. We will also keep on evaluating new investments in the Shopping Center business.

In connection with APSA's peso-denominated bond due on April 7, 2005, we are working in the implementation of a more suitable structure aimed at obtaining a much lower cost to the company, as this debt accrues interest at a rate of 14.875%. So far, the financial institutions have shown a well-disposed attitude towards the company.

**Limited Review Report**

To the Shareholders, President and Board of Directors of

**IRSA Inversiones y Representaciones Sociedad Anónima**

1. We have reviewed the balance sheet of IRSA Inversiones y Representaciones Sociedad Anónima at December 31, 2004, and the related statements of income, of changes in shareholders' equity and of cash flows for the six-month periods ended December 31, 2004 and 2003 and the complementary notes 1 to 12 and exhibits A, C, D, E, F, G, H and I. Furthermore, we have reviewed the consolidated financial statements of IRSA Inversiones y Representaciones Sociedad Anónima with its subsidiaries for the six-month periods ended December 31, 2004 and 2003, which are presented as supplementary information. These financial statements are the responsibility of the Company's management.
2. We conducted our review in accordance with standards established by Technical Resolution No. 7 of the Argentine Federation of Professional Councils of Economic Sciences for limited reviews of financial statements. A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.
3. As described in Note 1.6.i. to the financial statements, as a result of the Company's purchase of Banco Hipotecario S.A. and subsidiaries (BHSA) shares and the exercise of options (as further discussed in Note 16 to the consolidated financial statements), the Company changed its method of accounting for its investments in BHSA. Under the new accounting method, adopted as of June 30, 2004, the investments in BHSA are accounted for under the equity method of accounting. The independent auditors' report on the financial statements of BHSA as of December 31, 2004, dated February 9, 2005, includes an explanatory paragraph describing uncertainties which might affect BHSA. These uncertainties relate to the National government's fulfillment of its obligations with BHSA represented by securities and other financing, and further the corresponding recoverable value of these assets held by BHSA. As of December 31, 2004, the investments in BHSA account for approximately 13% of the total basic assets and 9% of the total consolidated assets of IRSA Inversiones y Representaciones Sociedad Anónima. The future outcome of the uncertainties described before could have an adverse effect in the valuation of these investments.

  - b) The comparative information included in the basic and consolidated balance sheets and the supplementary notes and exhibits to the attached financial statements arise from the Company's financial statements at June 30, 2004.
