COLUMBIA SPORTSWEAR COMPANY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation:

The accompanying unaudited condensed consolidated financial statements have been prepared by the management of Columbia Sportswear Company (the Company) and in the opinion of management contain all adjustments, consisting only of normal recurring adjustments, necessary to present fairly the Company's financial position as of June 30, 2006, the results of operations for the three and six months ended June 30, 2006 and 2005 and cash flows for the six months ended June 30, 2006 and 2005. The results of operations for the three and six months ended June 30, 2006 are not necessarily indicative of the results to be expected for the full year.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America (generally accepted accounting principles) have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission. The Company, however, believes that the disclosures contained in this report comply with the requirements of Section 13(a) of the Securities Exchange Act of 1934 for a Quarterly Report on Form 10-Q and are adequate to make the information presented not misleading. These unaudited condensed consolidated financial statements should be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2005.

Use of estimates:

The preparation of condensed consolidated financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amounts of revenues and expenses during the reported period. Actual results could differ materially from these estimates and assumptions. Some of these more significant estimates relate to revenue recognition, allowance for doubtful accounts, inventory, product warranty, and income taxes.

Cash and cash equivalents:

Cash and cash equivalents are stated at cost and include investments with maturities of three months or less at the date of acquisition. Cash and cash equivalents were \$47,626,000 and \$101,091,000 at June 30, 2006 and December 31, 2005, respectively, primarily consisting of money market funds and certificates of deposit.

Short-term investments:

Short-term investments consist of variable rate demand notes and obligations and municipal auction rate notes that generally mature up to 30 years from the purchase date. Investments with maturities beyond one year may be classified as short-term based on their highly liquid nature and because such marketable securities represent the investment of cash that is available for current operations. All cash and short-term investments are classified as available-for-sale securities and are recorded at fair value with any unrealized gains and losses reported, net of tax, in other comprehensive income. Realized gains or losses are determined based on the specific identification method. The Company has no investments considered to be trading securities. The carrying value of available-for-sale securities approximates fair market value due to their short maturities.

Concentration of credit risk:

The Company had one customer that accounted for approximately 10.3% of accounts receivable outstanding at June 30, 2006.

Stock-based compensation:

Prior to the January 1, 2006 adoption of Statement of Financial Accounting Standards (SFAS) No. 123R, Share-Based Payment, the Company accounted for stock-based compensation using the intrinsic value method prescribed in Accounting Principles Board (APB) Opinion No. 25,

Edgar Filing: COLUMBIA SPORTSWEAR CO - Form 10-Q

Accounting for Stock Issued to Employees, and related interpretations. Accordingly, under APB Opinion No. 25, no compensation expense was recognized because the exercise price of the Company's employee stock options was equal to the market price of the underlying stock on the date of grant. The Company applied the disclosure provisions of SFAS No.

Table of Contents

123, Accounting for Stock Based Compensation, as amended by SFAS No. 148, Accounting for Stock Based Compensation Transition and Disclosure, as if the fair value method had been applied in measuring compensation expense.

Effective January 1, 2006, the Company adopted the fair value recognition provisions of SFAS No. 123R, under which compensation expense is recognized in the Condensed Consolidated Statement of Operations for the fair value of employee stock-based compensation. The Company has elected the modified-prospective transition method as permitted by SFAS No. 123R and accordingly, prior periods have not been restated to reflect the effect of SFAS No. 123R. The modified-prospective transition method requires that stock-based compensation expense recognized in the Condensed Consolidated Statement of Operations include (1) quarterly amortization of all stock-based compensation granted prior to, but not vested as of January 1, 2006, based on the grant date fair value estimated in accordance with the original provisions of SFAS No. 123 and (2) quarterly amortization of all stock-based payments granted subsequent to January 1, 2006, based on the grant date fair value estimated in accordance with the provisions of SFAS No. 123R. In addition, pursuant to SFAS No. 123R, the Company estimates forfeitures when calculating stock-based compensation expense, rather than accounting for forfeitures as incurred, which was the Company's previous method. Compensation expense is recognized over the requisite service (vesting) period using the straight-line attribution method.

As a result of adopting SFAS 123R effective January 1, 2006, net income for the three and six months ended June 30, 2006 was \$1,962,000 and \$4,210,000, respectively, lower than if the Company had continued to account for stock-based compensation under APB Opinion No. 25, as the Company did in the comparable period in 2005. The effect of recording stock-based compensation on basic and diluted earnings per share for the three months ended June 30, 2006 was a per share reduction of \$0.06 and \$0.05, respectively. The effect of recording stock-based compensation on basic and diluted earnings per share for the six months ended June 30, 2006 was a per share reduction of \$0.12 and \$0.11, respectively.

Prior to the adoption of SFAS No. 123R, the Company presented all benefits of tax deductions resulting from the exercise of stock-based compensation as operating cash flows in the Condensed Consolidated Statement of Cash Flows. SFAS No. 123R requires that benefits of tax deductions in excess of stock-based compensation recognized for those awards (excess tax benefits) be presented in the Condensed Consolidated Statement of Cash Flows as financing cash inflows, on a prospective basis. For the six months ended June 30, 2006, \$787,000 of excess tax benefits was reported as a financing cash inflow.

The following table shows total stock-based compensation expense included in the Condensed Consolidated Statement of Operations (in thousands):

	Three Months Ended	Six Months Ended
	June 30, 2006	June 30, 2006
Cost of sales	\$ 267	\$ 599
Selling, general, and administrative expense	2,708	5,781
Licensing	11	23
Pre-tax stock-based compensation expense	2,986	6,403
Income tax benefits	(1,024)	(2,193)
Total stock-based compensation expense, net of tax	\$ 1,962	\$ 4,210

No stock-based compensation costs were capitalized during the three and six month periods ended June 30, 2006.

The following table illustrates the effect on net income and earnings per share if the Company had applied the fair value recognition provisions of SFAS No. 123 to stock-based compensation in 2005 (in thousands, except per share amounts):

Three Months Ended	Six Months Ended
June 30, 2005 (1)	June 30, 2005 (1)

Edgar Filing: COLUMBIA SPORTSWEAR CO - Form 10-Q

Net income, as reported	\$	6,313	\$	27,650
Add: Stock-based employee compensation expense included in reported net income, net of tax				
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of tax		1,729		3,987
Pro forma net income	\$	4,584	\$	23,663
Earnings per share basic				
As reported	\$	0.16	\$	0.70

Pro forma		0.12		0.59

- (1) Disclosures for the three and six month periods ended June 30, 2006 are not presented because the amounts are recognized in the consolidated financial statements.

Table of Contents1997 Stock Incentive Plan

The Company's 1997 Stock Incentive Plan (the "Plan") provides for issuance of up to 7,400,000 shares of the Company's Common Stock, of which 1,725,900 shares were available for future grants under the Plan at June 30, 2006. The Plan allows for grants of incentive stock options, non-statutory stock options, restricted stock awards, restricted stock units and other stock-based awards. The Company uses newly issued shares to satisfy share-based payments.

Stock Options

Options to purchase the Company's common stock are granted at prices equal to or greater than the fair market value on the date of grant. Options granted prior to 2001 generally become exercisable ratably over a five-year period beginning from the date of grant and expire ten years from the date of grant. Options granted after 2000 generally vest and become exercisable over a period of four years (25 percent on the first anniversary date following the date of grant and monthly thereafter) and expire ten years from the date of the grant, with the exception of most options granted under the 2005 annual grant program. Generally, most options under the 2005 annual grant program cliff vest after one year and expire ten years from the date of grant.

The Company estimates the fair value of stock options using the Black-Scholes option-pricing model. Key input assumptions used to estimate the fair value of stock options include the exercise price of the award, the expected option term, the expected volatility of the Company's stock over the option's expected term, the risk-free interest rate over the option's expected term, and the Company's expected annual dividend yield. The expected option term represents the estimated time until exercise and is based on historical experience of similar awards, giving consideration to the contractual terms, vesting schedules and expected employee behavior. The expected stock price volatility is based on the historical volatility of the Company's stock over the most recent period equal to the expected term of the option, adjusted for activity that is not expected to occur in the future. The risk-free interest rate is based on the U.S. Treasury yield curve in effect at the time of grant for periods corresponding with the expected term of the option. The Company has never paid a dividend, and thus the dividend yield is 0.0%. Prospectively, the assumptions will be evaluated and revised as necessary to reflect changes in market conditions and the Company's experience. Estimates of fair value are not intended to predict actual future events or the value ultimately realized by people who receive equity awards.

The following table shows the weighted average assumptions for the three months ended June 30, 2006 and 2005:

	Options		ESPP	
	2006	2005 (Pro forma)	2006 (1)	2005 (Pro forma)
Expected term	5.82 years	5.62 years		0.25 years
Expected stock price volatility	38.49%	41.20%		26.00%
Risk-free interest rate	5.06%	3.88%		3.13%
Expected dividend yield	0%	0%		0%
Estimated average fair value per option granted	\$ 22.48	\$ 19.87		\$ 10.79

The following table shows the weighted average assumptions for the six months ended June 30, 2006 and 2005:

	Options		ESPP	
	2006	2005 (Pro forma)	2006 (1)	2005 (Pro forma)
Expected term	6.0 years	5.40 years		0.25 years
Expected stock price volatility	39.40%	41.80%		22.95%
Risk-free interest rate	4.90%	3.80%		2.96%
Expected dividend yield	0%	0%		0%
Estimated average fair value per option granted	\$ 22.88	\$ 20.19		\$ 10.91

(1) Offerings under the Company's Employee Stock Purchase Plan were suspended indefinitely effective July 1, 2005.

Table of Contents

The following table summarizes stock option activity for the six months ended June 30, 2006:

	Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value (in thousands)
Options outstanding at December 31, 2005	2,310,093	\$ 39.07		
Granted	25,242	49.60		
Cancelled	(138,644)	48.10		
Exercised	(303,614)	30.27		
Options outstanding at June 30, 2006	1,893,077	\$ 39.97	6.81	\$ 14,437
Options exercisable at June 30, 2006	1,138,714	\$ 35.01	5.64	\$ 13,568

The aggregate intrinsic value in the table above represents pre-tax intrinsic value, based on the Company's closing stock price of \$45.26 on the last business day of the six month period ended June 30, 2006. Total stock option compensation expense for the six months ended June 30, 2006 was \$6,254,000 and is being amortized over the related vesting period using the straight-line attribution method. At June 30, 2006, unrecognized costs related to stock options totaled approximately \$9,222,000 (before any related tax benefit) and are expected to be recognized over a weighted average period of 1.07 years. The aggregate intrinsic value of stock options exercised was \$4,113,000 and \$977,000 for the three months ended June 30, 2006 and 2005, respectively. The aggregate intrinsic value of stock options exercised was \$6,222,000 and \$7,215,000 for the six months ended June 30, 2006 and 2005, respectively. The total cash received as a result of stock option exercises for the six months ended June 30, 2006 and 2005 was \$9,192,000 and \$6,009,000, respectively. In connection with these exercises, the tax benefit realized by the Company was \$1,987,000 and \$2,645,000 for the six months ended June 30, 2006 and 2005, respectively.

The following table provides additional disclosure about stock options outstanding at June 30, 2006:

Range of Exercise Prices	Options Outstanding			Options Exercisable		
	Number of Shares	Weighted Average Remaining Contractual Life (yrs)	Weighted Average Exercise Price	Number of Shares	Weighted Average Exercise Price	
\$ 6.45-31.35	379,188	3.45	\$ 19.80	378,832	\$ 19.80	
\$ 31.36-38.29	506,575	6.21	36.23	436,348	36.56	
\$ 38.30-47.27	516,353	8.75	45.93	90,356	44.38	
\$ 47.28-52.80	34,205	9.15	49.80	5,108	50.14	
\$ 52.81-58.08	456,756	7.92	53.36	228,070	53.28	
	1,893,077	6.81	\$ 39.97	1,138,714	\$ 35.01	

Restricted Stock Units

The Company granted 34,766 restricted stock units to certain key employees during the six months ended June 30, 2006. Restricted stock units generally vest over three years beginning one year from the date of grant. The restricted stock units are non-transferable until vested and unvested units are subject to forfeiture upon certain early termination events and also subject to accelerated vesting in certain circumstances. The fair value of restricted stock units is determined based on the number of units granted and the quoted price of the Company's common stock on the date of grant.

The following table summarizes the restricted stock unit activity for the six months ended June 30, 2006:

Edgar Filing: COLUMBIA SPORTSWEAR CO - Form 10-Q

	Number of Shares	Weighted Average Grant Date Fair Value Per Share
Restricted stock units outstanding at December 31, 2005		\$
Granted	34,766	52.68
Vested		
Forfeited		
Restricted stock units outstanding at June 30, 2006	34,766	\$ 52.68

Restricted stock unit compensation expense for the six months ended June 30, 2006 was \$149,000 and is being amortized over the vesting period using the straight-line attribution method. At June 30, 2006, unrecognized costs related to restricted stock units totaled approximately \$1,541,000 (before any related tax benefit) and are expected to be recognized over a weighted average period of 2.69 years. No restricted stock units vested in the six months ended June 30, 2006.

Table of Contents**1999 Employee Stock Purchase Plan**

On June 9, 1999, the Company's shareholders approved the 1999 Employee Stock Purchase Plan (ESPP). There are 750,000 shares of common stock authorized for issuance under the ESPP, which allows qualified employees of the Company to purchase shares on a quarterly basis up to fifteen percent of their respective compensation. The purchase price of the shares is equal to eighty five percent of the lesser of the closing price of the Company's common stock on the first or last trading day of the respective quarter. Effective July 1, 2005, the Company suspended offerings under the ESPP indefinitely. As of June 30, 2006, a total of 275,556 shares of common stock had been issued under the ESPP.

In connection with disqualifying dispositions related to Employee Stock Purchase Plan shares, the tax benefit realized by the Company for the six months ended June 30, 2006 and 2005 was \$23,000 and \$32,000, respectively.

Income Taxes:

The Company's tax returns are audited by various taxing authorities globally from time to time. Although the Company believes that adequate accruals have been provided for all years, any adjustment resulting from these audits could have a material effect on the Company's financial statements.

Product warranty:

Some of the Company's products carry limited warranty provisions for defects in quality and workmanship. A reserve is established at the time of sale to cover estimated warranty costs based on the Company's history of warranty repairs and replacements. A summary of accrued warranties and related activity for the three and six months ended June 30, 2006 and 2005 is as follows (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2006	2005	2006	2005
Balance at beginning of period	\$ 10,003	\$ 9,398	\$ 9,907	\$ 9,140
Charged to costs and expenses	1,083	718	2,319	2,260
Claims settled	(686)	(899)	(1,826)	(2,183)
Balance at end of period	\$ 10,400	\$ 9,217	\$ 10,400	\$ 9,217

Recent Accounting Pronouncements:

In July 2006, the Financial Accounting Standards Board (FASB) issued Financial Accounting Standards Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109. FIN 48 prescribes a recognition threshold and measurement attribute for financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006. The Company is evaluating the impact that the adoption of FIN 48 will have on its consolidated financial position and results of operations.

NOTE 2 - INVENTORIES

Inventories are carried at the lower of cost or market. Cost is determined using the first-in, first-out method. The Company periodically reviews its inventory for excess, close-out and slow moving items and makes provisions as necessary to properly reflect inventory value.

Inventories consist of the following (in thousands):

	June 30, 2006	December 31, 2005
Raw materials	\$ 2,052	\$ 2,643

Edgar Filing: COLUMBIA SPORTSWEAR CO - Form 10-Q

Work in process	27,962	8,288
Finished goods	242,234	174,939
	\$ 272,248	\$ 185,870

Table of Contents**NOTE 3 - INTANGIBLE ASSETS AND GOODWILL**

Intangible assets with indefinite useful lives are not amortized and are periodically evaluated for impairment. Intangible assets that are determined to have finite lives are amortized over their useful lives.

The following table summarizes the Company's identifiable intangible assets balance (in thousands):

	June 30, 2006		December 31, 2005	
	Carrying Amount	Accumulated Amortization	Carrying Amount	Accumulated Amortization
Intangible assets subject to amortization:				
Patents	\$ 2,000	\$ (304)	\$ 1,200	\$ (231)
Intangible assets not subject to amortization:				
Trademarks and trade names	\$ 46,871		\$ 22,071	
Goodwill	17,494		12,659	
	\$ 64,365		\$ 34,730	

Amortization expense for intangible assets subject to amortization is estimated to be \$151,000 in 2006 and \$156,000 in each of 2007, 2008, 2009 and 2010.

Other non-current assets totaled \$3,577,000 and \$3,063,000 at June 30, 2006 and December 31, 2005, respectively.

NOTE 4 - COMPREHENSIVE INCOME

Accumulated other comprehensive income (loss) reported on the Company's consolidated balance sheets consists of foreign currency translation adjustments, net of applicable taxes, and the unrealized gains and losses, net of applicable taxes, on derivative transactions. A summary of comprehensive income (loss), net of related tax effects, is as follows (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2006	2005	2006	2005
Net income	\$ 4,833	\$ 6,313	\$ 24,300	\$ 27,650
Other comprehensive income (loss):				
Unrealized derivative holding gains (losses) arising during period	(3,278)	70	(4,069)	2,089
Reclassification to net income of previously deferred losses on derivative transactions	955	1,374	1,424	2,734
Foreign currency translation adjustments	7,553	(11,501)	9,858	(18,984)
Other comprehensive income (loss)	5,230	(10,057)	7,213	(14,161)
Comprehensive income (loss)	\$ 10,063	\$ (3,744)	\$ 31,513	\$ 13,489

Accumulated other comprehensive income, net of related tax effects, consisted of the following (in thousands):

Foreign currency translation	Unrealized holding gains (losses) on derivative	Accumulated other comprehensive income
------------------------------	---	--

Edgar Filing: COLUMBIA SPORTSWEAR CO - Form 10-Q

	transactions		
Balance at December 31, 2005	\$ 24,497	\$ 465	\$ 24,962
Activity for the six months ended June 30, 2006	9,858	(2,645)	7,213
Balance at June 30, 2006	\$ 34,355	\$ (2,180)	\$ 32,175

NOTE 5 - EARNINGS PER SHARE

SFAS No. 128, Earnings per Share requires dual presentation of basic and diluted earnings per share (EPS). Basic EPS is based on the weighted average number of common shares outstanding. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock. For the calculation of diluted EPS, the basic weighted average number of shares is increased by the dilutive effect of stock option and restricted stock units determined using the treasury stock method. While the conceptual computation of EPS is not changed by SFAS No. 123R, the inclusion of stock-based compensation expense affects the mechanics of the calculation. Stock-based compensation expense is

Table of Contents

recognized under SFAS No. 123R only for awards that are expected to vest (determined by applying a pre-vesting forfeiture rate assumption), while all stock option or restricted stock units that have not been forfeited are included in diluted EPS. As such, the amount of stock-based compensation cost in the numerator includes a forfeiture rate assumption while the number of shares in the denominator does not.

A reconciliation of the common shares used in the denominator for computing basic and diluted EPS is as follows (in thousands, except per share amounts):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2006	2005	2006	2005
Weighted average common shares outstanding, used in computing basic earnings per share	36,555	38,956	36,712	39,546
Effect of dilutive stock options and restricted stock units	410	373	422	441
Weighted-average common shares outstanding, used in computing diluted earnings per share	36,965	39,329	37,134	39,987

Earnings per share of common stock:

Basic	\$ 0.13	\$ 0.16	\$ 0.66	\$ 0.70
Diluted	0.13	0.16	0.65	0.69

Options to purchase an additional 587,518 and 572,883 shares of common stock were outstanding for the three months ended June 30, 2006 and 2005, respectively, and 624,989 and 568,196 shares of common stock were outstanding for the six months ended June 30, 2006 and 2005, respectively, but these shares were excluded in the computation of diluted EPS because their effect would be anti-dilutive.

Since the inception of the Company's stock repurchase plan in April 2004, the Company's Board of Directors has authorized the repurchase of \$400,000,000 of the Company's common stock and the Company has repurchased 6,015,342 shares under this program at an aggregate purchase price of approximately \$284,317,000. The repurchase program does not obligate the Company to acquire any specific number of shares or to acquire shares over any specified period of time.

NOTE 6 - SEGMENT INFORMATION

The Company operates in one industry segment: the design, production, marketing and selling of active outdoor apparel, including outerwear, sportswear, footwear, related accessories and equipment.

Table of Contents

The geographic distribution of the Company's net sales, income before income tax, and identifiable assets are summarized in the tables below (in thousands). In addition to the geographic distribution of net sales, the Company's net sales by major product line are also summarized below. Inter-geographic net sales, which are recorded at a negotiated mark-up and eliminated in consolidation, are not material.

NOTE 7 - FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

As part of the Company's risk management programs, the Company uses a variety of financial instruments, including foreign currency option and forward exchange contracts. The Company does not hold or issue derivative financial instruments for trading purposes.

The Company hedges against the currency risk associated with firmly committed and anticipated transactions for the next twelve months denominated in European euros, Canadian dollars and Japanese yen.

The Company accounts for these instruments as cash flow hedges. In accordance with SFAS No. 133, Accounting for Derivative Instruments and Hedging Activity, as amended, such financial instruments are marked to market with the offset to accumulated other comprehensive income and subsequently recognized as a component of cost of goods sold when the underlying transaction is recognized. Hedge effectiveness is determined by evaluating whether gains and losses on hedges will offset gains and losses on the underlying exposures. Hedge ineffectiveness was not material during the six months ended June 30, 2006 and 2005.

Table of Contents**NOTE 8 - ACQUISITIONS**

On January 26, 2006, the Company acquired substantially all of the assets of Montrail, Inc. (Montrail) for cash consideration of \$15,000,000 plus the assumption of certain liabilities. The Montrail® brand is recognized as a premium outdoor footwear brand with a reputation for delivering technical, high performance trail running, hiking, and climbing footwear for outdoor enthusiasts. The acquisition was accounted for under the purchase method of accounting and the results of operations of Montrail have been recorded in the Company's consolidated financial statements beginning on January 26, 2006. The cost of the acquisition was allocated on the basis of the estimated fair value of the assets acquired and the liabilities assumed. The fair values of assets and liabilities acquired are presented below (in thousands):

Cash	\$ 23
Accounts receivable	1,778
Inventory	6,878
Prepays and other assets	112
Property, plant and equipment	597
Intangible assets	12,235
Total assets acquired	21,623
Accounts payable and accrued liabilities	790
Note payable	5,833
Total liabilities assumed	6,623
Net assets acquired	\$ 15,000

Intangible assets acquired from Montrail consisted of \$10,000,000 related to trademarks, \$935,000 for goodwill, \$800,000 related to patents and \$500,000 related to order backlog. The \$11,300,000 of purchase price allocated to the trademark, patents and order backlog was determined by management, based in part on a third party appraisal using established valuation techniques. Patents are subject to amortization over 17 years from the date filed with the U.S. Patent and Trademark Office. At the time of the acquisition, the remaining useful lives of these patents ranged from 11 to 16 years and the weighted average useful life was 11.4 years. The goodwill and trademarks are not subject to amortization because these assets are deemed to have indefinite useful lives. The order backlog was amortized over the period for which the orders were shipped. At June 30, 2006, the order backlog was fully amortized.

On March 31, 2006, the Company acquired a group of Pacific Trail, Inc. (Pacific Trail) trademarks and goodwill for \$20,400,000. The acquisition was the result of the March 29, 2006 auction in bankruptcy court of specified assets of Pacific Trail and London Fog Group, Inc. On June 30, 2006, the Company sold Pacific Trail's Dockers brand licenses for \$1,700,000. Intangible assets acquired from Pacific Trail consisted of \$14,800,000 for the trademarks and \$3,900,000 for goodwill. The \$14,800,000 of purchase price allocated to the trademarks was determined by management, based in part on a third party appraisal using established valuation techniques. The trademarks and goodwill are not subject to amortization because these assets are deemed to have indefinite useful lives. These intangible assets will be reviewed for impairment in accordance with SFAS No. 142.

Table of Contents

Item 2 *MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS*

This quarterly report contains forward-looking statements. Forward-looking statements include any statements related to our expectations regarding future results, performance or conditions, including any statements regarding anticipated sales growth across markets, distribution channels, and product categories, access to and the cost of raw materials and factory capacity, and financing and working capital requirements and resources.

These forward-looking statements, and others we make from time to time, are subject to a number of risks and uncertainties. Many factors could cause actual results to differ materially from those projected in forward-looking statements, including the risks described in Part II, Item 1(A) of this quarterly report. Forward-looking statements may change after the date they are made without notice to you.

You should read the following discussion in conjunction with our Consolidated Financial Statements and Accompanying Notes. All references to quarters relate to the quarter ended June 30 of the particular year.

Overview

Since our initial public offering in 1998, our net sales have steadily increased from \$427.3 million in 1998 to \$1,155.8 million in 2005. This equates to a compound annual growth rate of 15.3%. Our long-term goal is to capitalize on global market opportunities for each of our key product categories. We are committed to our growth strategies of enhancing the retail productivity of our customers, leveraging our brands in international markets, further developing our product categories, selectively broadening our retail distribution channels and expanding the global awareness of our brands through license agreements. We believe that our sourcing and distribution infrastructure and our proven design and product development team position us well for future long-term growth.

Highlights as of and for the quarter ended June 30, 2006 are as follows:

Net sales increased \$25.4 million, or 13.6%, to \$211.6 million from \$186.2 million for the comparable period in 2005. Excluding changes in currency exchange rates, net sales increased 13.5%. We attribute our sales growth to increased revenue in the United States and our Other International business, which include our direct business in Japan and Korea and our international distributor markets worldwide. From a product category perspective, we attribute our sales growth to increased sales of sportswear and footwear. We expect full year 2006 net sales to increase approximately 11.0% compared to full year 2005.

Gross profit decreased 100 basis points to 38.5% of net sales from 39.5% of net sales for the comparable period in 2005. We primarily attribute the decrease in gross profit to increased competition and our efforts to grow our market share, including a broadened product assortment and pricing changes. This was partially offset by a decrease in close-out product sales at improved margins. We expect full year 2006 gross profit to contract to approximately 41.8% from 43.6% in 2005.

Selling, general and administrative expenses (SG&A) increased to 36.4% of net sales from 35.5% of net sales for the comparable period in 2005. We primarily attribute this increase to additional personnel-related costs, including stock-based compensation of approximately \$2.7 million, partially offset by a decrease in selling expenses which was the result of lower marketing related expenses during the quarter. We expect full year 2006 SG&A expense, as a percentage of net sales, to remain relatively constant compared to 2005, excluding stock-based compensation expense of approximately \$10.5 million.

Net income decreased \$1.5 million to \$4.8 million, or \$0.13 per diluted share, from \$6.3 million, or \$0.16 per diluted share, for the comparable period in 2005. Our stock-based compensation expense was approximately \$0.05 per share. We expect full year 2006 diluted earnings per share of approximately \$3.22, including approximately \$0.20 per share of projected stock-based compensation, on 37.0 million weighted average shares.

During the quarter, we repurchased approximately 1.5 million shares at an aggregate purchase price of \$73.7 million. Through June 30, 2006, we have repurchased a total of 6.0 million shares at an aggregate purchase price of \$284.3 million of the \$400 million

Edgar Filing: COLUMBIA SPORTSWEAR CO - Form 10-Q

authorized since the inception of our stock repurchase plan in April 2004. Our repurchase program does not require us to acquire any specific number of shares or to acquire shares over any specified period of time.

The second quarter is our smallest revenue quarter of the year and changes in shipments in any one product category, channel, or geography may be excessively pronounced and may not necessarily be indicative of future results.

Table of Contents**Results of Operations**

Net income decreased \$1.5 million, or 23.8%, to \$4.8 million for the second quarter of 2006 from \$6.3 million for the comparable period in 2005. Diluted earnings per share decreased \$0.03 to \$0.13 for the second quarter of 2006 from \$0.16 for the comparable period in 2005.

The following table shows the percentage relationship to net sales of certain items in our consolidated statements of operations:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2006	2005	2006	2005
Net sales	100.0%	100.0%	100.0%	100.0%
Cost of sales	61.5	60.5	59.1	58.1
Gross profit	38.5	39.5	40.9	41.9
Selling, general and administrative expense	36.4	35.5	34.3	33.1
Net licensing income	(0.5)	(0.5)	(0.5)	(0.3)
Income from operations	2.6	4.5	7.1	9.1
Interest income, net	(0.9)	(0.7)	(0.8)	(0.7)
Income before income tax	3.5	5.2	7.9	9.8
Income tax expense	1.2	1.8	2.7	3.4
Net income	2.3%	3.4%	5.2%	6.4%

Quarter Ended June 30, 2006 Compared to Quarter Ended June 30, 2005

Net Sales: Consolidated net sales increased 13.6% to \$211.6 million for the second quarter of 2006 from \$186.2 million for the comparable period in 2005. Excluding changes in currency exchange rates, consolidated net sales increased 13.5%.

Reconciliation of Net Sales Changes to Net Sales Changes Excluding Changes in Currency Exchange Rates

Net sales from year to year are affected by changes in selling price and unit volume as well as changes in currency exchange rates where we have sales in foreign locations. Our net sales changes excluding the effect of changes in currency exchange rates, as well as our net sales changes calculated in accordance with accounting principles generally accepted in the United States of America (GAAP), are shown below. We disclose changes in sales excluding changes in currency exchange rates because we use the measure to understand sales growth excluding any effect of foreign currency exchange rate changes. In addition, we evaluate and compensate our foreign personnel in part based on our results of operations excluding currency exchange rate changes for their respective regions.

	Quarter ended June 30, 2006	
	Amount (millions)	% Change
Consolidated:		
Net sales increase (GAAP)	\$ 25.4	13.6%
Decrease due to currency exchange rate changes	(0.2)	(0.1)
Net sales increase excluding changes in currency exchange rates	\$ 25.2	13.5%
United States:		
Net sales increase (GAAP)	\$ 8.6	7.8%

Edgar Filing: COLUMBIA SPORTSWEAR CO - Form 10-Q

Europe:

Net sales increase (GAAP)	\$ 3.7	14.6%
Increase due to currency exchange rate changes	0.7	2.7

Net sales increase excluding changes in currency exchange rates	\$ 4.4	17.3%
---	--------	-------

Canada:

Net sales increase (GAAP)	\$ 2.8	28.9%
Decrease due to currency exchange rate changes	(1.1)	(11.4)

Net sales increase excluding changes in currency exchange rates	\$ 1.7	17.5%
---	--------	-------

Other International:

Net sales increase (GAAP)	\$ 10.3	25.2%
Increase due to currency exchange rate changes	0.2	0.5

Net sales increase excluding changes in currency exchange rates	\$ 10.5	25.7%
---	---------	-------

Table of Contents

The increase in net sales was led by our Other International business, followed by our United States, Europe and Canada businesses. We partially attribute sales growth to an overall increase in the average sales price of our products in the second quarter of 2006 compared to the second quarter of 2005. The increase in average sales prices was the result of a decrease in discounted close-out sales compared to the second quarter of 2005 and, to a lesser degree, shifts in product mix. Our sales growth is also attributable to an increase in the volume of units sold in each of our major geographic regions except Japan. By product category, consolidated unit sales volume increased for equipment and footwear, while unit sales volume decreased for accessories, outerwear and sportswear.

Net sales from outerwear increased \$3.2 million, or 8.0%, to \$43.2 million for the second quarter of 2006 from \$40.0 million for the comparable period in 2005. We primarily attribute the increase in outerwear sales to an increase in sales in our Other International business and, to a lesser degree, an increase in sales in Europe and Canada. The sales growth that we realized in Other International was largely due to increased sales to our international distributors, which we attribute to increased sales by our distributors in their respective markets as well as a shift in the timing of shipments to the second quarter from the third quarter. Cooler weather had a favorable effect on outerwear sales in Europe. Net sales from outerwear in the United States decreased in the second quarter due primarily to a shift in timing of shipments to the third quarter.

Net sales from sportswear increased \$9.8 million, or 9.6 %, to \$112.2 million for the second quarter of 2006 from \$102.4 million for the comparable period in 2005. Sportswear sales increased in each of our major geographic regions led by Europe, followed by Other International, Canada and the United States. We attribute sportswear sales growth to an increase in shipments of woven and knitted tops and pants.

Net sales from footwear increased \$8.9 million, or 25.9%, to \$43.2 million for the second quarter of 2006 from \$34.3 million for the comparable period in 2005. We attribute most of our footwear sales growth to an increase in sales in the United States, which we partially attribute to footwear sales generated from the Montrail brand that we acquired in the first quarter of 2006 as well as increased sales of excess cold weather footwear through our discount channels. Internationally, sales of footwear increased in Other International, while Europe and Canada footwear sales decreased.

Net sales from accessories decreased \$0.8 million, or 11.8%, to \$6.0 million for the second quarter of 2006 from \$6.8 million for the comparable period in 2005. Accessories sales decreased in all major geographic regions, except in the United States.

Net sales from equipment increased \$4.3 million, or 159.3%, to \$7.0 million for the second quarter of 2006 from \$2.7 million for the comparable period in 2005. Equipment sales growth was led by the United States, followed by Other International, Europe and Canada. We predominantly attribute our sales growth to sales of Columbia® brand bags and packs, which were previously designed and sold by a licensee. We began selling Columbia brand equipment in 2006 after the expiration of our license agreement.

Net sales in the United States increased \$8.6 million, or 7.8%, to \$118.9 million for the second quarter of 2006 from \$110.3 million for the comparable period in 2005. This increase was largely due to increased sales to department stores and sports specialty distribution channels, partially offset by decreased sales to outdoor stores. The increase was also the result of an increase in sales of footwear due to an increase in close-out sales of excess cold weather footwear as well as incremental sales of Montrail branded product. Equipment, sportswear and accessories sales also increased, while sales of outerwear decreased. The decrease in outerwear sales was primarily due to a shift in timing of fall 2006 shipments from the second quarter of 2006 to the third quarter 2006.

Net sales in Europe increased \$3.7 million, or 14.6%, to \$29.1 million for the second quarter of 2006 from \$25.4 million for the comparable period in 2005. Excluding changes in currency exchange rates, Europe's net sales increased 17.3%. We attribute our sales growth to increased sales in several of our key European markets including France, United Kingdom, Spain and Italy, partially offset by continued economic weakness in Germany. We also partially attribute our Europe sales growth to increased sales resulting from the acquisition of our distributor in Switzerland, Tecnisport SA, in July of 2005. Net sales growth was led by sportswear, followed by outerwear and equipment, partially offset by decreased sales of footwear and accessories.

Table of Contents

Net sales in Canada increased \$2.8 million, or 28.9%, to \$12.5 million for the second quarter of 2006 from \$9.7 million for the comparable period in 2005. Excluding changes in currency exchange rates, Canada's net sales increased 17.5%. The significant increase in Canada's net sales is largely related to a shift in the timing of shipments into the second quarter from the first and third quarters. Net sales growth was led by sportswear, followed by outerwear and equipment, offset by decreased sales of footwear and accessories. Sportswear and outerwear sales growth was largely the result of the shift in the timing of shipments, whereas the decrease in footwear sales was the result of a shift in the timing of close-out sales to the third quarter.

Net sales from Other International, which includes our direct business in Japan and Korea and our international distributor markets worldwide, increased \$10.3 million, or 25.2%, to \$51.1 million for the second quarter of 2006 from \$40.8 million for the comparable period in 2005. Excluding changes in currency exchange rates, Other International sales increased 25.7%. Sales growth for Other International was led by our international distributors, followed by our Korean and Japanese businesses. Net sales growth was led by outerwear, followed by footwear, sportswear and equipment, partially offset by decreased sales of accessories.

Gross Profit: Gross profit, as a percentage of net sales, decreased to 38.5% for the second quarter of 2006 from 39.5% for the comparable period in 2005. We attribute the decrease in gross profit to increased competition and our efforts to grow our market share, including a broadened product assortment and pricing changes. This was partially offset by a decrease in close-out product sales at improved margins. Other factors that adversely affected our gross profit include the effect of recording the Montrail inventory at fair value in purchase accounting, costs associated with certain international promotional campaigns, stock-based compensation expense and a greater mix of international distributor shipments at lower margins.

The most significant factor that adversely affected our second quarter gross profit was increased competition in the United States and, to a lesser degree, in certain international markets. We anticipate this increased competition will continue to exert pressure on our gross profit for the remainder of 2006.

Recording the Montrail inventory at fair value in purchase accounting had an unfavorable effect on our gross profit of approximately 20 basis points. The remaining mark-to-market inventory valuation adjustments will continue to unfavorably affect our gross profit in 2006.

Our gross profits may not be comparable to those of other companies in our industry because some include all of the costs related to their distribution network in cost of sales. We, like others, have chosen to include these expenses as a component of selling, general and administrative expense.

Selling, General and Administrative Expense: Selling, general and administrative expense (SG&A) includes all costs associated with our design, merchandising, marketing, distribution and corporate functions including related depreciation and amortization.

SG&A expense increased \$11.0 million, or 16.6%, to \$77.1 million for the second quarter of 2006 from \$66.1 million for the comparable period in 2005. Selling expenses decreased \$1.9 million, or 10.4%, while general and administrative expenses increased \$12.9 million, or 27.0%. As a percentage of net sales, SG&A increased to 36.4% of net sales for the second quarter of 2006 from 35.5% of net sales for the comparable period in 2005.

Selling expenses, primarily including commissions and advertising, decreased to 7.8% of net sales for the second quarter of 2006 from 9.8% of net sales for the comparable period in 2005. We attribute the decrease in selling expenses to lower marketing related expenses.

The increase in general and administrative expenses primarily resulted from an increase in personnel related costs. We attribute the increase in personnel costs to stock-based compensation expense of \$2.7 million, one-time compensation related charges, additional Europe sales, merchandising and administrative personnel hired to execute strategic growth initiatives and additional United States personnel hired after the second quarter of 2005. Depreciation and amortization included in SG&A totaled \$5.6 million for both the second quarter of 2006 and 2005.

Net Licensing Income: As our licensees have become more established in the marketplace, our licensing arrangements have produced highly profitable income for the Company. We derive net licensing income from income that we earn through licensing our trademarks across a range of categories that complement our current product offerings.

For the second quarter of 2006, we recognized licensing income from sixteen licensees. Products distributed by our licensees included socks, packs, leather outerwear, eyewear, watches, camping gear, home furnishings, bicycles, insulated products and other accessories.

Table of Contents

Net licensing income increased \$0.2 million, or 22.2 %, to \$1.1 million for the second quarter of 2006 from \$0.9 million for the comparable period in 2005. The largest component of licensing income was Columbia licensed camping gear, followed by socks, insulated products, bicycles and eyewear.

Interest (Income) Expense, Net: Interest income was \$2.0 million for the second quarter of 2006 compared to \$1.7 million for the comparable period in 2005. We attribute the increase in interest income to a higher interest rate environment compared to the same period in 2005. Interest expense was \$0.1 million for the second quarter of 2006 compared to \$0.4 million for the comparable period in 2005. We primarily attribute the decrease in interest expense to a lower debt level in the second quarter of 2006 compared to the same period in 2005.

Income Tax Expense: Our provision for income taxes decreased to \$2.5 million for the second quarter of 2006 from \$3.3 million for the comparable period in 2005 because of our lower income for the second quarter of 2006 compared to the same period in 2005. Our effective income tax rate was 34.5% for both the second quarter of 2006 and 2005.

Six Months Ended June 30, 2006 Compared to Six Months Ended June 30, 2005

Net Sales: Consolidated net sales increased 9.2% to \$471.8 million for the six months ended June 30, 2006 from \$431.9 million for the comparable period in 2005. Excluding changes in currency exchange rates, consolidated net sales increased 10.2%. We attribute most of our sales growth to an increase in shipments of sportswear predominantly in the United States. Footwear and outerwear sales also increased substantially for the period.

Reconciliation of Net Sales Changes to Net Sales Changes Excluding Changes in Currency Exchange Rates

	Six months ended June 30, 2006	
	Amount (millions)	% Change
Consolidated:		
Net sales increase (GAAP)	\$ 39.9	9.2%
Increase due to currency exchange rate changes	4.2	1.0
Net sales increase excluding changes in currency exchange rates	\$ 44.1	10.2%
United States:		
Net sales increase (GAAP)	\$ 16.7	6.8%
Europe:		
Net sales increase (GAAP)	\$ 5.0	7.1%
Increase due to currency exchange rate changes	5.8	7.9
Net sales increase excluding changes in currency exchange rates	\$ 10.8	15.0%
Canada:		
Net sales increase (GAAP)	\$ 3.3	9.3%
Decrease due to currency exchange rate changes	(3.0)	(8.5)
Net sales increase excluding changes in currency exchange rates	\$ 0.3	0.8%
Other International:		
Net sales increase (GAAP)	\$ 14.8	19.0%
Increase due to currency exchange rate changes	1.5	2.0
Net sales increase excluding changes in currency exchange rates	\$ 16.3	21.0%

Edgar Filing: COLUMBIA SPORTSWEAR CO - Form 10-Q

Increased net sales were realized in each major geographic region in which we operate, led by the United States and followed by Other International, Europe and Canada. Increased net sales were led by sportswear, followed by footwear, outerwear and equipment. Sales of accessories decreased.

Table of Contents

Net sales from outerwear increased \$7.2 million, or 7.9%, to \$98.4 million from \$91.2 million for the comparable period in 2005. The increase in net sales of outerwear was primarily the result of increased shipments from our Other International and Europe businesses. Canada outerwear sales also increased, while sales of outerwear in the United States decreased. Net sales from outerwear in the United States decreased in the first half due to a shift in timing from the second quarter to the third quarter. Internationally, outerwear sales growth was partially driven by cooler weather as well as improved styling and technical design.

Net sales from sportswear increased \$19.4 million, or 8.3%, to \$254.0 million from \$234.6 million for the comparable period in 2005. Sportswear sales growth was led by the United States, followed by Other International, Canada and Europe. The increase in sportswear sales resulted primarily from increased shipments in the United States. Sportswear sales growth was attributable to increased shipments of woven and knitted tops and pants.

Net sales from footwear increased \$9.8 million, or 11.7%, to \$93.9 million from \$84.1 million for the comparable period in 2005. The increase was led by the United States, followed by Other International. Canada and Europe footwear sales decreased. The footwear sales growth primarily resulted from sales generated from the Montrail brand, which we acquired in the first quarter of 2006, as well as increased sales of excess cold weather footwear through our discount channels.

Net sales from accessories decreased \$2.6 million, or 16.4%, to \$13.3 million from \$15.9 million for the comparable period in 2005. The sales decrease for accessories was led by Other International, followed by the United States, Europe and Canada.

Net sales from equipment increased \$6.1 million, or 100.0%, to \$12.2 million from \$6.1 million for the comparable period in 2005. Equipment sales growth was led by the United States, followed by Other International, Europe and Canada. We attribute our sales growth to sales of Columbia brand bags and packs, which were previously designed and sold by a licensee.

Net sales in the United States increased \$16.7 million, or 6.8%, to \$263.3 million from \$246.6 million for the comparable period in 2005. The increase was largely due to increased sales to department stores and sports specialty distribution channels partially offset by decreased sales to outdoor stores. By product category, sales growth was the result of increased shipments of sportswear, footwear and equipment. Outerwear and accessories sales decreased.

Net sales in Europe increased \$5.1 million, or 7.1%, to \$77.1 million from \$72.0 million for the comparable period in 2005. Excluding changes in currency exchange rates, Europe's net sales increased 15.0%. Sales growth was led by outerwear, followed by sportswear and equipment, while sales of footwear and accessories decreased.

Net sales in Canada increased \$3.3 million, or 9.3%, to \$38.9 million from \$35.6 million for the comparable period in 2005. Excluding changes in currency exchange rates, Canada's net sales increased 0.8%. Net sales growth was led by sportswear, followed by outerwear and equipment, while sales of footwear and accessories decreased.

Net sales from Other International increased \$14.8 million, or 19.0%, to \$92.5 million from \$77.7 million for the comparable period in 2005. Excluding changes in currency exchange rates, other international sales increased 21.0%. Net sales growth was led by outerwear, followed by sportswear, footwear and equipment, while sales of accessories decreased.

Gross Profit: Gross profit, as a percentage of net sales, decreased to 40.9% for the six months ended June 30, 2006, from 41.9% for the comparable period in 2005. We primarily attribute the decrease in gross profit to increased competition and our efforts to grow our market share, including a broadened product assortment and pricing changes. This was partially offset by a decrease in close-out product sales at improved margins. Other factors that adversely impacted our gross profit included the effect of recording the Montrail inventory at fair value in purchase accounting, costs associated with certain international promotional campaigns, stock-based compensation expense and a greater mix of international distributor shipments at lower margins.

The most significant factor that adversely affected our second quarter gross profit was increased competition in the United States and, to a lesser degree, in certain international markets. We anticipate this increased competition will continue to exert pressure on our gross profits for the remainder of 2006.

Recording the Montrail inventory at fair value in purchase accounting had an unfavorable effect on our gross profit of approximately 20 basis points. The remaining mark-to-market inventory valuation adjustments will continue to unfavorably affect our gross profit in 2006.

Selling, General and Administrative Expense: SG&A expense increased \$19.0 million, or 13.3 %, to \$161.9 million for the six months ended June 30, 2006 from \$142.9 million for the comparable period in 2005. Selling expenses decreased \$2.3 million, or 5.2%, while general and

Edgar Filing: COLUMBIA SPORTSWEAR CO - Form 10-Q

administrative expenses increased \$21.3 million, or 21.6%. As a percentage of net sales, SG&A increased to 34.3% of net sales for the six months ended June 30, 2006, from 33.1% of net sales for the comparable period in 2005.

Table of Contents

Selling expense, including commissions and advertising, decreased to 8.9% of net sales for the six months ended June 30, 2006 from 10.2% for the comparable period in 2005. We attribute the decrease in selling expenses to lower marketing related expenses.

The increase in general and administrative expenses primarily resulted from an increase in personnel related costs. We attribute the increase in personnel costs to stock-based compensation expense of \$5.8 million, one-time compensation related charges, additional Europe sales, merchandising and administrative personnel hired to execute strategic growth initiatives and additional United States personnel hired after the second quarter of 2005. Depreciation and amortization totaled \$11.4 million for the six month period ended June 30, 2006 compared to \$11.2 million for the comparable period in 2005.

Net Licensing Income: For the second quarter of 2006, we recognized licensing income from sixteen licensees. Products distributed by our licensees included socks, packs, leather outerwear, eyewear, watches, camping gear, home furnishings, bicycles, insulated products and other accessories.

Net licensing income increased to \$2.1 million for the six months ended June 30, 2006 from \$1.6 million for the comparable period in 2005. The largest component of licensing income was Columbia licensed camping gear, followed by socks, bicycles, insulated products and eyewear.

Interest (Income) Expense, Net: Interest income increased to \$4.2 million for the six months ended June 30, 2006 from \$3.4 million for the comparable period in 2005. The increase in interest income was due to a higher interest rate environment compared to the same period in 2005, partially offset by the reduction in cash and short-term investments used for share repurchases during the six months ended June 30, 2006. Interest expense decreased to \$0.4 million for the six months ended June 30, 2006, from \$0.7 million for the comparable period in 2005. We attribute the decrease in interest expense to a lower debt level, coupled with higher capitalized interest related to distribution related capital projects.

Income Tax Expense: The provision for income taxes decreased to \$12.8 million for the six months ended June 30, 2006, from \$14.6 million for the comparable period in 2005 due to lower taxable income. The overall effective tax rate remained constant at 34.5%.

Seasonality of Business

Our business is affected by the general seasonal trends common to the outdoor apparel industry, with sales and profits highest in the third calendar quarter. Our products are marketed on a seasonal basis, with product sales mix weighted substantially toward the fall season. Results of operations in any period should not be considered indicative of the results to be expected for any future period. Sales of our products are subject to substantial cyclical fluctuation and to the impact of unseasonable weather conditions. Sales tend to decline in periods of recession or uncertainty regarding future economic prospects that affect consumer spending, particularly on discretionary items. This seasonality and any related fluctuation in consumer demand could have a material adverse effect on our results of operations, cash flows and financial position.

Liquidity and Capital Resources

Our primary ongoing funding requirements are to finance working capital and to continue to grow the business. At June 30, 2006, we had total cash equivalents of \$47.6 million compared to \$101.1 million at December 31, 2005. Net cash provided by operating activities was \$98.4 million for the six months ended June 30, 2006 and \$86.7 million for the comparable period in 2005. This change was primarily due to an increase in cash receipts for accounts receivable, partially offset by an increase in inventory and associated accounts payable resulting from anticipated fall season growth, acquired Montrail and Pacific Trail inventory and increased levels of core and replenishment inventory.

Our primary capital requirements are for working capital, investing activities associated with the expansion of our global operations and general corporate needs. Net cash used in investing activities was \$37.9 million for the six months ended June 30, 2006 compared to net cash provided by investing activities of \$79.7 million for the comparable period in 2005. For the 2006 period, net cash used in investing activities primarily consisted of \$33.7 million for the acquisitions of Montrail and Pacific Trail and \$37.2 million in capital expenditures related to the expansion of the distribution center in Cambrai, France and the upgrade of the distribution center in Portland, Oregon, offset by net sales of short-term investments of \$33.0 million. For the 2005 period, net cash provided by investing activities primarily consisted of net sales of short-term investments of \$92.2 million, offset by capital expenditures of \$12.5 million.

Cash used in financing activities was \$114.7 million for the six months ended June 30, 2006 compared to \$115.5 million for the comparable period in 2005. For the 2006 period, net cash used in financing activities primarily consisted of the repurchase of \$75.5 million of common stock, the net repayments of notes payable of \$46.7 million and of long-term debt of \$2.6 million, partially offset by proceeds from the sale of stock under employee stock plans of \$9.2 million. For the 2005 period, net cash used in financing

Table of Contents

activities primarily consisted of the repurchase of \$121.0 million of common stock and the repayment of long-term debt of \$1.6 million, partially offset by the proceeds from the sale of stock under employee stock plans of \$7.1 million.

To fund our domestic working capital requirements, we have unsecured revolving lines of credit with aggregate seasonal limits ranging from approximately \$50 million to \$125 million, of which \$25 million to \$100 million is committed. As of June 30, 2006, no balances were outstanding under these lines of credit. Internationally, our subsidiaries have local currency operating lines in place that we guarantee with a combined limit of approximately \$99.6 million at June 30, 2006, of which \$4.0 million is designated as a European customs guarantee. There were no balances outstanding under these lines of credit at June 30, 2006.

As we continue our investment in global infrastructure to support our growth, we anticipate that capital expenditures for 2006 will total approximately \$60.0 million, consisting of maintenance capital requirements and distribution and information technology projects. We expect to fund these capital expenditures with existing cash and cash provided by operations. If the need arises for additional expenditures, we may need to seek additional funding. Our ability to obtain additional credit facilities will depend on many factors, including prevailing market conditions, our financial condition, and our ability to negotiate favorable terms and conditions. There is no assurance that financing will be available on terms that are acceptable or favorable to us, if at all.

Our operations are affected by seasonal trends typical in the outdoor apparel industry, and have historically resulted in higher sales and profits in the third calendar quarter. This pattern has resulted primarily from the timing of shipments to wholesale customers for the fall outerwear season. We believe that our liquidity requirements for at least the next 12 months will be adequately covered by existing cash, cash provided by operations and existing short-term borrowing arrangements.

Off-Balance Sheet Arrangements

We maintain unsecured import lines of credit with a combined limit of approximately \$225.0 million at June 30, 2006, available for issuing documentary letters of credit. At June 30, 2006, we had letters of credit outstanding of \$50.5 million for inventory related purchases.

Critical Accounting Policies and Estimates

Management's discussion and analysis of our financial condition and results of operations are based on our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make various estimates and judgments that affect reported amounts of assets, liabilities, sales, cost of sales and expenses and related disclosure of contingent assets and liabilities. We believe that the estimates, assumptions and judgments involved in the accounting policies described below have the greatest potential impact on our financial statements, so we consider these to be our critical accounting policies and estimates. Because of the uncertainty inherent in these matters, actual results could differ from the estimates we use in applying the critical accounting policies. We base our ongoing estimates on historical experience and other various assumptions that we believe to be reasonable under the circumstances. Many of these critical accounting policies affect working capital account balances, including the policy for revenue recognition, the allowance for uncollectible accounts receivable, the provision for potential excess, close-out and slow moving inventory, product warranty and income taxes.

Management and our independent auditors regularly discuss with our audit committee each of our critical accounting estimates, the development and selection of these accounting estimates, and the disclosure about each estimate in Management's Discussion and Analysis of Financial Condition and Results of Operations. These discussions typically occur at our quarterly audit committee meetings and include the basis and methodology used in developing and selecting these estimates, the trends in and amounts of these estimates, specific matters affecting the amount of and changes in these estimates, and any other relevant matters related to these estimates, including significant issues concerning accounting principles and financial statement presentation.

Revenue Recognition

We record wholesale and licensed product revenues when title passes and the risks and rewards of ownership have passed to the customer, based on the terms of sale. Title generally passes upon shipment or upon receipt by the customer depending on the country of the sale and the agreement with the customer. Retail store revenues are recorded at the time of sale.

In some countries outside of the United States where title passes upon receipt by the customer, predominantly where we sell directly in Western Europe, precise information regarding the date of receipt by the customer is not readily available. In these cases, we estimate the date of receipt by the customer based on historical and expected delivery times by geographic location. We periodically test the accuracy of these estimates based on actual transactions. Delivery times vary by geographic location, generally from one to four days. To date, we have found these

estimates to be materially accurate.

Table of Contents

At the time of revenue recognition, we also provide for estimated sales returns and miscellaneous claims from customers as reductions to revenues. The estimates are based on historical rates of product returns and claims. However, actual returns and claims in any future period are inherently uncertain and thus may differ from the estimates. If actual or expected future returns and claims are significantly greater or lower than the reserves that we have established, we will record a reduction or increase to net revenues in the period in which we make such a determination. Over the three year period ended December 31, 2005, our actual annual sales returns and miscellaneous claims from customers have been less than two percent of net sales.

Allowance for Uncollectible Accounts Receivable

We make ongoing estimates of the uncollectibility of our accounts receivable and maintain an allowance for estimated losses resulting from the inability of our customers to make required payments. In determining the amount of the allowance, we consider our historical level of credit losses and we make judgments about the creditworthiness of customers based on ongoing credit evaluations. We analyze specific customer accounts, customer concentrations, credit insurance coverage, current economic trends, and changes in customer payment terms. Because we cannot predict future changes in the financial stability of our customers, actual future losses from uncollectible accounts may differ from our estimates. If the financial condition of our customers deteriorates, resulting in their inability to make payments, a larger allowance may be required. If we determine that a smaller or larger allowance is appropriate, we will record a credit or a charge to SG&A expense in the period in which we make such a determination.

Inventory Obsolescence and Product Warranty

We make ongoing estimates of potential future excess, close-out or slow moving inventory and product warranty costs. We identify our excess inventory, a component of which is planned, and evaluate our purchase commitments, sales forecasts, and historical experience, and make provisions as necessary to properly reflect inventory value at the lower of cost or estimated market value. When we evaluate our reserve for warranty costs, we consider our historical claim rates by season, product mix, current economic trends, and the historical cost to repair, replace, or refund the original sale. If we determine that a smaller or larger reserve is appropriate, we will record a credit or a charge to cost of sales in the period we make such a determination.

Income Taxes

We use the asset and liability method of accounting for income taxes. Under this method, we recognize income tax expense for the amount of taxes payable or refundable for the current year and for the amount of deferred tax liabilities and assets for the future tax consequences of events that have been recognized in our financial statements or tax returns. We make assumptions, judgments and estimates to determine our current provision for income taxes, our deferred tax assets and liabilities, and any valuation allowance to be recorded against a deferred tax asset. Our judgments, assumptions and estimates relative to the current provision for income tax take into account current tax laws, our interpretation of current tax laws and possible outcomes of current and future audits conducted by foreign and domestic tax authorities. Changes in tax law or our interpretation of tax laws and the resolution of current and future tax audits could significantly impact the amounts provided for income taxes in our consolidated financial statements. Our assumptions, judgments and estimates relative to the value of a deferred tax asset take into account predictions of the amount and category of future taxable income. Actual operating results and the underlying amount and category of income in future years could cause our current assumptions, judgments and estimates of recoverable net deferred taxes to be inaccurate. Any of the assumptions, judgments and estimates mentioned above could cause our actual income tax obligations to differ from our estimates, which could materially impact our financial position and results of operations.

On a quarterly basis, we estimate what our effective tax rate will be for the full fiscal year and record an appropriate quarterly income tax provision, in accordance with the anticipated effective rate. As the calendar year progresses, we periodically refine our estimate based on actual events and earnings by jurisdiction during the year. This ongoing estimation process can result in changes to our expected effective tax rate for the full calendar year. When this occurs, we adjust the income tax provision during the quarter in which the change in estimate occurs so that our year-to-date provision equals our expected annual effective tax rate.

Stock-Based Compensation

We account for stock-based compensation in accordance with Statement of Financial Accounting Standards (SFAS) No. 123(R), Share-Based Payment . We estimate stock-based compensation cost at the grant date based on the award s fair-value and we recognize the cost as expense over the requisite service period using the straight-line attribution method. Our estimation of stock-based compensation for stock options granted, utilizing the Black-Scholes option-pricing model, requires various highly subjective assumptions, including volatility and expected option life. Further, as required under SFAS No. 123R, we now estimate forfeitures for stock-based awards granted, which are not expected to vest. If any of these inputs or assumptions changes significantly, our stock-based compensation expense may differ materially in the future from the expense

recorded in the current period.

Table of Contents

Recent Accounting Pronouncements

In July 2006, the Financial Accounting Standards Board (FASB) issued Financial Accounting Standards Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109. FIN 48 prescribes a recognition threshold and measurement attribute for financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006. We are evaluating the impact that the adoption of FIN 48 will have on our consolidated financial position and results of operations.

Table of Contents

Item 3 *QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK*

There has not been any material change in the market risk disclosure contained in our Annual Report on Form 10-K for the year ended December 31, 2005.

Item 4 *CONTROLS AND PROCEDURES*

Our management has evaluated, under the supervision and with the participation of our chief executive officer and chief financial officer, the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report pursuant to Rule 13a-15(b) under the Securities Exchange Act of 1934 (the Exchange Act). Based on that evaluation, our chief executive officer and chief financial officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures are effective in ensuring that information required to be disclosed in our Exchange Act reports is (1) recorded, processed, summarized and reported in a timely manner, and (2) accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

There has been no change in our internal control over financial reporting that occurred during our fiscal quarter ended June 30, 2006 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1A RISK FACTORS

We May be Adversely Affected by Weather Conditions

Our business is adversely affected by unseasonable weather conditions. Sales of our outerwear and cold weather footwear are dependent in part on the weather and may decline in years in which weather conditions do not favor the use of these products. For example, in fall 2004, unseasonably warm weather in the United States caused customers to delay, and in some cases reduce or cancel, orders for our outerwear, which had an adverse effect on our net sales and profitability. Periods of unseasonably warm weather in the fall or winter or unseasonably cold or wet weather in the spring could have a material adverse effect on our results of operations and financial condition.

We May be Adversely Affected by an Economic Downturn or Economic Uncertainty

Sales of our products are subject to substantial cyclical fluctuation. Consumer demand for our products may not reach our growth targets, or may decline, when there is an economic downturn or economic uncertainty in our key markets, particularly markets in North America and Europe. Weakness in the Japanese economy, for example, has limited growth opportunities in recent years, and a slower economy in the United States in 2002 and 2003 created additional uncertainties for our customers and our business. In addition, continued volatility in the global oil markets has resulted in rising fuel prices, which many shipping companies are passing on to their customers. Our shipping costs have continued to increase over the past several years, and we expect these increases to continue. Because we price our products to our customers in advance, we may not be able to pass these increased costs on to our customers. Rising oil prices and interest rates may also adversely affect consumer demand. Our sensitivity to economic cycles and any related fluctuation in consumer demand and rising shipping costs could have a material adverse effect on our results of operations and financial condition.

Our International Operations Involve Many Risks

We are subject to the risks generally associated with doing business abroad. These risks include foreign laws and regulations, foreign consumer preferences, political unrest, disruptions or delays in shipments and changes in economic conditions in countries in which we manufacture or sell products. In addition, disease outbreaks, terrorist acts and U.S. military operations have increased the risks of doing business abroad. These factors, among others, could affect our ability to sell products in international markets, our ability to manufacture products or procure materials, and our cost of doing business. If any of these or other factors make the conduct of business in a particular country undesirable or impractical, our business could be materially and adversely affected. In addition, many of our imported products are subject to duties, tariffs or quotas that affect the cost and quantity of various types of goods imported into the United States or into our other sales markets. For example, the European Commission recently proposed additional duties on certain leather footwear imported into Europe from Vietnam and China. These duties, which may be significant, could significantly affect the sale of our footwear in Europe. Any country in which our products are produced or sold may eliminate, adjust or impose new quotas, duties, tariffs, antidumping penalties or other charges or restrictions, any of which could have a material adverse effect on our results of operations and financial condition.

We May be Adversely Affected by the Financial Health of Retailers

We extend credit to our customers based on an assessment of a customer's financial circumstances, generally without requiring collateral. To assist in the scheduling of production and the shipping of seasonal products, we offer customers discounts for placing pre-season orders and extended payment terms for taking delivery before the peak shipping season. These extended payment terms increase our exposure to the risk of uncollectible receivables. In addition, we face increased risk of order reduction or cancellation when dealing with financially ailing retailers or retailers struggling with economic uncertainty. Some of our significant customers have experienced financial difficulties in the past, which in turn have had an adverse effect on our business, and we believe that retailers are being more cautious than usual with orders as a result of weakness in the retail economy. A slowing economy in our key markets could have an adverse effect on the financial health of our customers, which could in turn have a material adverse effect on our results of operations and financial condition.

We Operate in Very Competitive Markets

The markets for outerwear, sportswear, rugged footwear, tents and sleeping bags are highly competitive, as are the markets for our licensed products. In each of our geographic markets, we face significant competition from global and regional branded apparel and footwear companies. In many instances, retailers who are our customers pose our most significant competitive threat by marketing

Table of Contents

apparel, footwear and equipment under their own labels. We also compete with other companies for the production capacity of independent manufacturers that produce our products and for import quota capacity. Many of our competitors are significantly larger and have substantially greater financial, distribution, marketing and other resources and have achieved greater recognition for their products than we have. Increased competition could result in reductions in display areas in retail locations, reductions in sales, or reductions in our profit margins, any of which could have a material adverse effect on our results of operations and financial condition.

We May be Adversely Affected by Retailer Consolidation

When retailers combine their operations through mergers, acquisitions, or other transactions, their consolidated order volume may decrease while their bargaining power and the competitive threat they pose by marketing products under their own label may increase. Some of our significant customers have consolidated their operations in the past, which in turn has had a negative impact on our business. We expect retailer consolidation to continue, which could have a material adverse effect on our results of operations and financial condition.

We Face Risks Associated with Consumer Preferences and Fashion Trends

Changes in consumer preferences or consumer interest in outdoor activities could have a material adverse effect on our business. In addition, although we believe that our products have not been significantly affected by past fashion trends, changes in fashion trends could have a greater impact as we expand our offerings to include more product categories in more geographic areas. We also face risks because our business requires us to anticipate consumer preferences. Our decisions about product designs often are made far in advance of consumer acceptance. Although we try to manage our inventory risk through early order commitments by retailers, we must generally place production orders with manufacturers before we have received all of a season's orders, and orders may be cancelled by retailers before shipment. If we fail to anticipate accurately and respond to consumer preferences, we could experience lower sales, excess inventories and lower profit margins, any of which could have a material adverse effect on our results of operations and financial condition.

Our Success Depends on Our Use of Proprietary Rights

Our registered and common law trademarks have significant value and are important to our ability to create and sustain demand for our products. We also place significant value on our trade dress, the overall appearance and image of our products. From time to time, we discover products that are counterfeit reproductions of our products or design knock offs, or that otherwise infringe on our proprietary rights. Counterfeiting activities typically increase as brand recognition increases, especially in markets outside the United States. If we are unsuccessful in challenging a party's products on the basis of trademark or design infringement, continued sales of these products could adversely affect our sales and our brand and result in the shift of consumer preference away from our products. The actions we take to establish and protect trademarks and other proprietary rights may not be adequate to prevent imitation of our products by others or to prevent others from seeking to block sales of our products as violations of proprietary rights. Additionally, in markets outside of the United States, it may be more difficult for us to establish our proprietary rights and to successfully challenge use of those rights by other parties. Actions or decisions in the management of our intellectual property portfolio may affect the strength of the brand, which may in turn have a material adverse effect on our results of operations and financial condition.

Although we have not been materially inhibited from selling products in connection with trademark and trade dress disputes, as we extend our brand into new product categories and new product lines and expand the geographic scope of our marketing, we could become subject to litigation based on allegations of the infringement of intellectual property rights of third parties. Future litigation also may be necessary to defend us against such claims or to enforce and protect our intellectual property rights. Any intellectual property litigation could be costly and could divert management's attention from the operation of our business. Adverse determinations in any litigation could result in the loss of our proprietary rights, subject us to significant liabilities or require us to seek licenses from third parties, which may not be available on commercially reasonable terms, if at all. This could have a material adverse effect on our results of operations and financial condition.

Our Success Depends on Our Distribution Facilities

Our ability to meet customer expectations, manage inventory, complete sales and achieve objectives for operating efficiencies depends on the proper operation of our existing distribution facilities, the development or expansion of additional distribution capabilities and the timely performance of services by third parties (including those involved in shipping product to and from our distribution facilities). In the United States, we rely primarily on our distribution centers in Portland, Oregon and Robards, Kentucky; in Canada, we rely primarily on our distribution center in Strathroy, Ontario; and in Europe we rely primarily on our distribution center in Cambrai, France.

Table of Contents

The implementation and performance of our Kentucky distribution facility is subject to many risks generally associated with transition and startup activities, including the risk that the new distribution facility may not successfully handle distribution activities and the risk that the transition may be disruptive to our business. Our distribution facilities in the United States and France are highly automated, which means that their operations are complicated and may be subject to a number of risks related to computer viruses, the proper operation of software and hardware, electronic or power interruptions, or other system failures. Risks associated with upgrading or expanding these facilities may significantly disrupt our operations.

Our distribution facilities could also be interrupted by disasters, such as earthquakes (which are known to occur in the Northwestern United States) or fires. We maintain business interruption insurance, but it may not adequately protect us from the adverse effect that could be caused by significant disruptions in our distribution facilities.

Our Success Depends on Our Information Systems

Our business is increasingly reliant on information technology. Information systems are used in all stages of our production cycle, from design to distribution, and are used as a method of communication between employees, our subsidiaries overseas, as well as our customers. We also rely on our information systems to allocate resources and forecast operating results. System failures or service interruptions may occur as the result of a number of factors, including computer viruses, hacking or other unlawful activities by third parties, disasters, or failure to properly protect, repair or maintain systems. Any interruption of critical business information systems may have a material adverse effect on our results of operations and financial condition.

Our Success Depends on Our Growth Strategies

We face many challenges in implementing our growth strategies. For example, our expansion into international markets involves countries where we have little sales or distribution experience and where our brand is not yet widely known. Expanding our product categories involves, among other things, gaining experience with new products, gaining consumer acceptance, and establishing and protecting intellectual property rights. Increasing sales to department stores, and improving the sales productivity of our customers, will each depend on various factors, including strength of our brand name, competitive conditions, our ability to manage increased sales and future expansion, the availability of desirable locations and the negotiation of terms with retailers. Future terms with customers may be less favorable to us than those under which we now operate. Large retailers in particular increasingly seek to transfer various costs of business to their vendors, such as the cost of lost profits from product price markdowns.

To implement our business strategy, we must manage growth effectively. We need to continue to change various aspects of our business, to maintain and enhance our information systems and operations to respond to increased demand and to attract, retain and manage qualified personnel. Growth could place an increasing strain on management, financial, product design, marketing, distribution and other resources, and we could experience operating difficulties. For example, in recent years, we have undertaken a number of new initiatives that require significant management attention and corporate resources, including the development or expansion of distribution facilities on two continents, the acquisition, rejuvenation and expansion of the Sorel® brand, and the acquisition, integration and expansion of Mountain Hardwear, Inc. This growth involves many risks and uncertainties that, if not managed effectively, could have a material adverse effect on our results of operations and financial condition.

We May be Adversely Affected by Currency Exchange Rate Fluctuations

We generally purchase products in U.S. dollars. However, the cost of these products sourced overseas may be affected by changes in the value of the relevant currencies. Price increases caused by currency exchange rate fluctuations could make our products less competitive or have an adverse effect on our margins. Our international revenues and expenses generally are derived from sales and operations in foreign currencies, and these revenues and expenses could be materially affected by currency fluctuations, including amounts recorded in foreign currencies and translated into U.S. dollars for consolidated financial reporting. Currency exchange rate fluctuations could also disrupt the business of the independent manufacturers that produce our products by making their purchases of raw materials more expensive and more difficult to finance. Foreign currency fluctuations could have a material adverse effect on our results of operations and financial condition.

We May be Adversely Affected by Labor Disruptions

Our business depends on our ability to source and distribute products in a timely manner. Labor disputes at factories, shipping ports, transportation carriers, or distribution centers create significant risks for our business, particularly if these disputes result in work slowdowns, lockouts, strikes, or other disruptions during our peak manufacturing and importing seasons, and could have a material adverse effect on our business, potentially resulting in cancelled orders by customers, unanticipated inventory accumulation, and reduced revenues and earnings.

Table of Contents

We Depend on Independent Manufacturers

Our products are produced by independent manufacturers worldwide. We do not operate or own any production facilities. Although we enter into a number of purchase order commitments each season, we do not have long-term contracts with some manufacturers. We therefore face risks that manufacturing operations will fail to perform as expected or that our competitors will gain production or quota capacities that we need for our business. If a manufacturer fails to ship orders in a timely manner or to meet our standards, we could miss delivery deadlines, which could result in cancellation of orders, refusal to accept deliveries or a reduction in purchase prices, any of which could have a material adverse effect on our business.

Reliance on independent manufacturers also creates quality control risks. A failure in our quality control program could result in diminished product quality, which may have a material adverse effect on our results of operations and financial condition.

In an effort to ensure that our independent manufacturers operate with safe, ethical and humane working conditions, we regularly monitor factories and we enforce our requirements that each manufacturer agree to comply with our *Standards of Manufacturing Practices* and applicable laws and regulations, but we do not control these vendors or their labor practices. If a manufacturer violates labor or other laws, or engages in practices that are not generally accepted as ethical in our key markets, it could have a material adverse effect on our results of operations and financial condition.

We Depend on Key Suppliers

Some of the materials that we use may be available, in the short-term, from only one source or a very limited number of sources. For example, some specialty fabrics are manufactured to our specification by one source or a few sources. From time to time, we have experienced difficulty satisfying our raw material and finished goods requirements. Although we believe that we could identify and qualify additional factories to produce these materials, the unavailability of some existing manufacturers for supply of these materials could have a material adverse effect on our results of operations and financial condition.

Our Advance Purchases of Products May Result in Excess Inventories

To minimize our purchasing costs, the time necessary to fill customer orders and the risk of non-delivery, we place orders for our products with manufacturers prior to receiving all of our customers' orders and maintain an inventory of various products that we anticipate will be in greater demand. We may not be able to sell the products we have ordered from manufacturers or that we have in our inventory. Customers are allowed to cancel an order prior to shipment with sufficient notice. Inventory levels in excess of customer demand may result in inventory write-downs and the sale of excess inventory at discounted prices, which could have a material adverse effect on our results of operations and financial condition.

We Depend on Key Personnel

Our future success will depend in part on the continued service of key personnel, particularly Timothy Boyle, our President and Chief Executive Officer, and Gertrude Boyle, our Chairman and widely recognized advertising spokesperson. Our future success will also depend on our ability to attract and retain key managers, designers, sales people and others. We face intense competition for these individuals worldwide, and there is a significant concentration of well-funded apparel and footwear competitors in and around Portland, Oregon (including NIKE, Inc. and adidas-Salomon AG). We may not be able to attract or retain these employees, which could have a material adverse effect on our results of operations and financial condition.

Our Business Is Affected by Seasonality

Our results of operations have fluctuated and are likely to fluctuate significantly from period to period. Our products are marketed on a seasonal basis, with a product sales mix now weighted substantially toward the fall season. Our results of operations for the quarter ended September 30 in the past have been much stronger than the results for the other quarters. This seasonality, along with other factors that are beyond our control, including general economic conditions, changes in consumer preferences, weather conditions, availability of import quotas and currency exchange rate fluctuations, could adversely affect our business and cause our results of operations to fluctuate. Our operating margins are also sensitive to a number of factors that are beyond our control, including shifts in product sales mix, geographic sales trends, and currency exchange rate fluctuations, all of which we expect to continue as we expand our product offerings and geographic penetration. Results of operations in any period should not be considered indicative of the results to be expected for any future period.

Table of Contents***We Face Risks of Product Liability and Warranty Claims***

Our products are used in outdoor activities, sometimes in severe conditions. Although we have not experienced any significant expense as the result of product recalls or product liability claims, recalls or these types of claims could occur in the future and have a material adverse effect on our business. Some of our products carry limited warranties for defects in quality and workmanship. We maintain a warranty reserve for future warranty claims, but the actual costs of servicing future warranty claims could exceed the reserve and have a material adverse effect on our results of operations and financial condition.

Our Common Stock Price May Be Volatile

The price of our common stock has fluctuated substantially since our initial public offering. Our common stock is traded on the NASDAQ Global Market, which has experienced and is likely to continue to experience significant price and volume fluctuations that could adversely affect the market price of our common stock without regard to our operating performance. We also believe factors such as fluctuations in financial results, variances from financial market expectations, changes in earnings estimates by analysts, or announcements by us or competitors may cause the market price of the common stock to fluctuate, perhaps substantially.

Insiders Control a Majority of Our Common Stock and Could Sell Shares

Three shareholders—Timothy Boyle, Gertrude Boyle and Sarah Bany—beneficially own a majority of our common stock. As a result, if acting together, they can effectively control matters requiring shareholder approval without the cooperation of other shareholders. Shares held by these three insiders are available for resale, subject to the requirements of, and the rules under, the Securities Act of 1933. The sale or prospect of the sale of a substantial number of these shares could have an adverse effect on the market price of our common stock.

Item 2 UNREGISTERED SALES OF SECURITIES AND USE OF PROCEEDS**Issuer Purchases of Equity Securities**

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽¹⁾	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
April 1, 2006 to April 30, 2006				\$ 189,424,000
May 1, 2006 to May 31, 2006	1,082,557	\$ 49.64	1,082,557	135,682,000
June 1, 2006 to June 30, 2006	429,666	46.55	429,666	115,683,000
Total	1,512,223	\$ 48.76	1,512,223	\$ 115,683,000

⁽¹⁾ Since the inception of our stock repurchase plan in April 2004, our Board of Directors has authorized the repurchase of \$400,000,000 of our common stock and we have repurchased 6,015,342 shares under this program at an aggregate purchase price of approximately \$284,317,000. The repurchase program does not obligate us to acquire any specific number of shares or to acquire shares over any specified period of time.

Table of Contents**Item 4 SUBMISSIONS OF MATTERS TO A VOTE OF SECURITY HOLDERS**

The Company's Annual Meeting of Shareholders was held on May 18, 2006. The following matters were submitted to a vote of shareholders, with the results as follows:

1. Election of nine directors to serve until the next annual meeting and until their respective successors are elected and qualified:

	For	Withheld
Gertrude Boyle	35,307,836	188,337
Timothy P. Boyle	35,337,732	158,441
Sarah A. Bany	35,322,659	173,514
Murrey R. Albers	35,334,475	161,698
Stephen E. Babson	35,266,654	229,519
Andy D. Bryant	35,306,763	189,410
Edward S. George	35,306,194	189,979
Walter T. Klenz	35,322,747	173,426
John W. Stanton	35,294,864	201,309

2. Ratification of the selection of Deloitte & Touche LLP as the Company's independent outside auditor for the fiscal year ending December 31, 2006:

For	Against	Abstentions	Broker Non-Votes
35,142,208	174,429	179,536	

Item 6 EXHIBITS

(a) Exhibits

- 3.1 Third Restated Articles of Incorporation (incorporated by reference to Exhibit 3.1 to the Company's Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2000)
- 3.2 2000 Restated Bylaws (incorporated by reference to Exhibit 3.2 to the Company's Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2000)
- 4.1 See Article II of Exhibit 3.1 and Article I of Exhibit 3.2
- 31.1 Rule 13a-14(a) Certification of Timothy P. Boyle, President and Chief Executive Officer
- 31.2 Rule 13a-14(a) Certification of Bryan L. Timm, Vice President and Chief Financial Officer
- 32.1 Section 1350 Certification of Timothy P. Boyle, President and Chief Executive Officer
- 32.2 Section 1350 Certification of Bryan L. Timm, Vice President and Chief Financial Officer
