Item 1. Schedule of Investments.

The Schedule of Investments is attached herewith.

Glossary

American Depositary Receipt (ADR): Represents shares of foreign companies traded in U.S. dollars on U.S. exchanges that are held by a bank or a trust. Foreign companies use ADRs in order to make it easier for Americans to buy their shares.

Basis Point (bp): One-hundredth of a percentage point (0.01%). Basis points are often used to measure changes in or differences between yields on fixed income securities, since these often change by very small amounts.

The Zweig Total Return Fund Composite Index: A composite index consisting of 62.5% Lehman Brothers Government Bond Index and 37.5% S&P 500(R) Index.

Consumer Price Index (CPI): Measures the change in consumer prices of goods and services, including housing, electricity, food, and transportation, as determined by a monthly survey of the U.S. Bureau of Labor Statistics. Also called the cost-of-living index.

Dow Jones Industrial Average/SM/: A price-weighted average of 30 blue chip stocks. The index is calculated on a total return basis with dividends reinvested.

Duration: A measure of a fixed income fund's sensitivity to interest rate changes. For example, if a fund's duration is 5 years, a 1% increase in interest rates would result in a 5% decline in the fund's price. Similarly, a 1% decline in interest rates would result in a 5% gain in the fund's price.

Federal funds rate: The interest rate charged on overnight loans of reserves by one financial institution to another in the United States. The federal funds rate is the most sensitive indicator of the direction of interest rates since it is set daily by the market.

Federal Reserve (the "Fed"): The central bank of the United States, responsible for controlling the money supply, interest rates and credit with the goal of keeping the U.S. economy and currency stable. Governed by a seven-member board, the system includes 12 regional Federal Reserve Banks, 25 branches and all national and state banks that are part of the system.

Gross domestic product (GDP): An important measure of the United States' economic performance, GDP is the total market value of all final goods and services produced in the U.S. during any quarter or year.

Inflation: Rise in the prices of goods and services resulting from increased spending relative to the supply of goods on the market.

Initial public offering (IPO): A company's first sale of stock to the public.

Lehman Brothers Government Bond Index: Measures U.S. Treasury and Agency securities with a remaining maturity of one year or more. The index is calculated on a total return basis.

NASDAQ Composite(R) Index: A market capitalization-weighted index of all issues

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-Q

listed in the NASDAQ (National Association Of Securities Dealers Automated Quotation System) Stock Market, except for closed-end funds, convertible debentures, exchange traded funds, preferred stocks, rights, warrants, units and other derivative securities. The index is calculated on a total return basis with dividends reinvested.

1

Glossary (continued)

S&P 500(R) Index: A market capitalization-weighted index of 500 of the largest U.S. companies. The index is calculated on a total return basis with dividends reinvested.

Short Interest: The total number of shares of a security that have been sold short by customers and securities firms that have not been repurchased to settle short positions in the market.

Indexes cited are unmanaged and not available for direct investment; therefore their performance does not reflect the expenses associated with the active management of an actual portfolio.

THE ZWEIG TOTAL RETURN FUND, INC.

NOTES TO SCHEDULES OF INVESTMENTS

March 31, 2007
(Unaudited)

NOTE 1 -- SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Zweig Total Return Fund, Inc. (the "Fund") in the preparation of the Schedule of Investments. The preparation of the Schedules of Investments in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the Schedules of Investments. Actual results could differ from those estimates.

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-Q

A. Security Valuation:

Equity securities are valued at the official closing price (typically last sale) on the exchange on which the securities are primarily traded, or if no closing price is available, at the last bid price.

Debt securities are valued on the basis of broker quotations or valuations provided by a pricing service, which utilizes information with respect to recent sales, market transactions in comparable securities, quotations from dealers, and various relationships between securities in determining value.

As required, some securities and other assets may be valued at fair value as determined in good faith by or under the direction of the Directors.

Certain foreign common stocks may be fair valued in cases where closing prices are not readily available or are deemed not reflective of readily available market prices. For example, significant events (such as movement in the U.S. securities market, or other regional and local developments) may occur between the time that foreign markets close (where the security is principally traded) and the time that the Fund calculates its net asset value (generally, the close of the NYSE) that may impact the value of securities traded in these foreign markets. In these cases, information from an external vendor may be utilized to adjust closing market prices of certain foreign common stocks to reflect their fair value. Because the frequency of significant events is not predictable, fair valuation of certain foreign common stocks may occur on a frequent basis.

Short-term investments having a remaining maturity of 60 days or less are valued at amortized cost, which approximates market.

In September 2006, Statement of Financial Accounting Standards No. 157, "Fair Value Measurements" ("SFAS 157"), was issued and is effective for fiscal years beginning after November 15, 2007. SFAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. Management is currently evaluating the impact the adoption of SFAS 157 will have on the Funds' financial statement disclosures.

B. Security Transactions and Related Income:

Security transactions are recorded on the trade date. Dividend income is recorded on the ex-dividend date, or in the case of certain foreign securities, as soon as the Fund is notified. Interest income is recorded on the accrual basis. The Fund amortizes premiums and accretes discounts using the effective interest method. Realized gains and losses are determined on the identified cost basis.

7

C. Foreign Currency Translation:

Foreign securities and other assets and liabilities are valued using the foreign currency exchange rate effective at the end of the reporting period. Cost of investments is translated at the currency exchange rate effective at the trade date.

D. Foreign Security Country Determination:

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-Q

A combination of the following criteria is used to assign the countries of risk listed in the Schedule of Investments: country of incorporation, actual building address, primary exchange on which the security is traded and country in which the greatest percentage of company revenue is generated.

E. Security Lending:

The Fund may loan securities to qualified brokers through an agreement with State Street Bank and Trust (the "Custodian"). Under the terms of the agreement, the Fund receives collateral with a market value not less than 102% for domestic securities and 105% for foreign securities of the market value of loaned securities. Collateral may consist of cash, securities issued or guaranteed by the U.S. Government or its agencies and the sovereign debt of foreign countries. Cash collateral is invested in a short-term money market fund. Dividends earned on the collateral and premiums paid by the borrower are recorded as income by the Fund net of fees and rebates charged by the Custodian for its services in connection with this securities lending program. Lending portfolio securities involves a risk of delay in the recovery of the loaned securities or in the foreclosure on collateral.

NOTE 2 -- CREDIT RISK AND ASSET CONCENTRATIONS

In countries with limited or developing markets, investments may present greater risks than in more developed markets and the prices of such investments may be volatile. The consequences of political, social or economic changes in these markets may have disruptive effects on the market prices of these investments and the income they generate, as well as the Fund's ability to repatriate such amounts.

The Fund may invest a high percentage of its assets in specific sectors of the market in its pursuit of a greater investment return. Fluctuations in these sectors of concentration may have a greater impact on the Fund, positive or negative, than if the Fund did not concentrate its investments in such sectors.

NOTE 3 -- INDEMNIFICATIONS

Under the Fund's organizational documents, its directors and officers are indemnified against certain liabilities arising out of the performance of their duties to the Fund. In addition, the Fund enters into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

NOTE 4 -- SUBSEQUENT EVENT

On April 19, 2007, the Fund announced that its registration statement for its rights offering has been declared effective by the U.S. Securities and Exchange Commission. The Fund will issue to shareholders non-transferable rights entitling them to acquire one share of common stock for each five shares held, up to an aggregate of 18,720,000 shares of common stock of the Fund. The Fund may increase the number of shares of common stock subject to subscription by up to 25% of the shares, or up to an additional 4,680,000 shares of common stock, for an aggregate total of 23,400,000 shares. Shareholders of record will receive one right for each outstanding share owned on the record date, April 23, 2007. If a record date shareholder's total ownership is fewer than five shares, such shareholder may subscribe for one share.
