KEY TRONIC CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. BASIS OF PRESENTATION

The condensed consolidated financial statements included herein have been prepared by Key Tronic Corporation and subsidiaries (the Company) pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). The financial statements reflect all normal and recurring adjustments which, in the opinion of management, are necessary for a fair presentation of the financial position, results of operations and cash flows for the interim periods presented. The preparation of financial statements in accordance with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the reported amounts of revenues and expenses during the reporting period. Significant estimates include the allowance for doubtful receivables, the provision for obsolete and nonsaleable inventories, the valuation allowances on deferred tax assets, valuation of goodwill, impairment of long-lived assets, medical self-insurance liability, long-term incentive compensation accrual and the provision for warranty costs. Actual results could differ from those estimates. The results of operations for the periods presented are not necessarily indicative of the results to be expected for the full year. The accompanying unaudited consolidated financial statements should be read in conjunction with the financial statements and notes included in the Company's Annual Report on Form 10-K for the fiscal year ended June 28, 2008.

The Company's reporting period is a 52/53 week fiscal year ending on the Saturday closest to June 30. The quarters ended March 28, 2009 and March 29, 2008 were 13 week periods.

2. INVENTORIES

The components of inventories consist of the following (in thousands):

	March 28, 2009	June 28, 2008
Finished goods	\$ 9,854	\$ 8,774
Work-in-process	4,275	3,521
Raw materials and supplies	24,227	25,632
	\$ 38,356	\$ 37,927

3. REVOLVING LOAN

In 2001, the Company entered into a financing agreement with CIT Group/Business Credit, Inc. (CIT) which provides a revolving credit facility up to \$25 million. The revolving loan is secured by the assets of the Company. The interest rate provisions allow for a variable rate based on either the JP Morgan Chase prime rate or LIBOR rate on specific short term tranches. The agreement specifies four alternative levels of margin to be added to the LIBOR rate depending on the Company's fixed charge ratio. Interest rates on the balances on outstanding contracts ranged from 2.85% to 3.25% as of March 28, 2009, compared to 4.38% to 6.71% as of March 29, 2008. The decrease in rates for the third quarter of fiscal year 2009 as compared to third quarter of fiscal year 2008 is related to decreases in published prime and LIBOR rates.

The agreement and subsequent amendments contain a financial covenant that relates to a minimum fixed charge ratio. The Company is in compliance with its loan covenant. The revolving loan matures August 22, 2009. As of March 28, 2009, based on the Company's collateral, approximately \$9.9 million was available to draw from the revolving line of credit.

Due to the fact that the agreement matures in less than a year, the Company is required to classify the revolving loan balance as a current liability. However, the Company anticipates it will renew the revolving loan agreement with CIT or sign a new loan agreement with another

Edgar Filing: KEY TRONIC CORP - Form 10-Q

lender prior to August 22, 2009. The terms and conditions of the new revolving loan agreement could be significantly different from the current agreement.

Table of Contents**4. INCOME TAXES**

The Company had domestic income tax loss carryforwards of approximately \$42.9 million at June 28, 2008. In accordance with Statement of Financial Accounting Standards (SFAS) No. 109, *Accounting for Income Taxes*, a valuation allowance is required if it is more likely than not that some or all of the deferred tax assets will not be realized in the future. In accordance with SFAS No. 109, management assessed the Company's recent operating levels and the sources of future taxable income to estimate a valuation allowance. Management has determined that the valuation allowance of \$11.1 million is appropriate as of March 28, 2009. Therefore, the Company increased the valuation allowance which had the effect of offsetting the domestic tax provision for the quarter ended March 28, 2009. The Company's judgments regarding future use of deferred tax assets may change due to changes in market conditions, changes in tax laws or other factors. If assumptions and estimates change in the future the valuation allowance will be adjusted accordingly and any increase or decrease will result in an additional income tax expense or benefit.

In addition to its domestic operations, the Company has subsidiaries in Mexico and China. The Company is currently applying certain tax credits to offset the income tax liabilities of its Mexican subsidiaries. As of January 1, 2008, the Company became subject to a Mexican business flat tax called Impuesto Empresarial a Tasa Unica (IETU). The effect of IETU and an associated presidential decree on fiscal year 2009 has been included in the effective tax rate for the nine months ended March 28, 2009 and was approximately \$196,000. The Company continues to pay income tax in China which totaled approximately \$21,000 for the nine months ended March 29, 2008. Accordingly, the income tax provisions for the third quarter of fiscal years 2009 and 2008 are primarily attributable to the taxable earnings of the Company's foreign subsidiaries.

Financial Accounting Standards Board Interpretation No. (FIN) 48 requires the Company to recognize in its financial statements uncertainties in tax positions taken that may not be sustained upon examination by the taxing authorities. If interest or penalties are assessed, the Company would recognize these charges as income tax expense. Upon adoption of FIN 48 and subsequently, the Company determined that no adjustments were necessary in implementing FIN 48. Unrecognized tax benefits are not anticipated to increase or decrease over the next 12 months.

5. EARNINGS PER SHARE (EPS)

Basic EPS is computed by dividing net income (the numerator) by the weighted-average number of common shares outstanding (the denominator) during the period. Diluted EPS is computed by dividing net income by the weighted-average number of common shares and common share equivalents outstanding during the period. Basic and diluted EPS are as follows:

	Third Quarters Ended (in thousands, except per share information)	
	March 28, 2009	March 29, 2008
Net income	\$ 262	\$ 1,167
Weighted average shares outstanding	10,066	10,024
Basic earnings per share	\$ 0.03	\$ 0.12
Diluted shares outstanding	10,066	10,207
Diluted earnings per share	\$ 0.03	\$ 0.11

	Nine Months Ended (in thousands, except per share information)	
	March 28, 2009	March 29, 2008
Net income	\$ 776	\$ 2,986
Weighted average shares outstanding	\$ 10,057	9,988
Basic earnings per share	\$ 0.08	\$ 0.30
Diluted shares outstanding	10,075	\$ 10,293
Diluted earnings per share	\$ 0.08	\$ 0.29

Table of Contents

There were approximately 973,000 and 702,000 antidilutive stock options not included in the diluted shares outstanding for the third quarters ended March 28, 2009 and March 29, 2008, respectively. There were approximately 930,000 and 670,000 antidilutive stock options not included in the diluted shares outstanding for the nine months ended March 28, 2009 and March 29, 2008, respectively. These were not included as the exercise prices exceeded the average market price during each of the respective periods.

6. COMMITMENTS AND CONTINGENCIES

Purchase Commitments

The Company had no material firm commitments to contractors and suppliers for capital expenditures at March 28, 2009.

Leases

The Company leases certain facilities, equipment, and automobiles under non-cancelable lease agreements. These agreements expire on various dates over the next five years.

Warranties

The Company provides warranties on certain product sales. Allowances for estimated warranty costs are recorded during the period of sale. The determination of such allowances requires the Company to make estimates of product return rates and expected costs to repair or to replace the products under warranty. The Company currently establishes warranty reserves based on historical warranty costs for each product line combined with liability estimates based on the prior twelve months' sales activities. If actual return rates and/or repair and replacement costs differ significantly from management's estimates, adjustments to recognize additional cost of sales may be required in future periods. The Company's warranty reserve was \$30,000 and \$167,000 as of March 28, 2009 and June 28, 2008, respectively.

7. GOODWILL

In accordance with SFAS No. 142, *Goodwill and Other Intangible Assets*, the Company recorded goodwill in the amount of \$765,000, which related to the acquisition of Honeywell's manufacturing facilities in Juarez, Mexico in fiscal year 1994. In accordance with SFAS No. 142, goodwill is not amortized, but must be analyzed for impairment at least annually. The Company's goodwill impairment analysis was performed at the end of the second quarter each year using the two-step method.

As of December 27, 2008, the Company completed its annual impairment test. The Company performed the first step of its goodwill impairment test and determined that the book value of the Company exceeded its fair value based on the quoted market price of the Company's stock as of December 26, 2008. The result of the first step indicated that goodwill was impaired and therefore, the Company performed the second step of the goodwill analysis in accordance with SFAS No. 142. The second step analyzes any excess or implied fair value of goodwill upon allocating the fair value of the Company to all its assets and liabilities other than goodwill and then comparing the residual amount, if any, to the book value of the goodwill. There was no residual amount of goodwill to allocate upon completing this step. As the deteriorating global economy adversely affected the Company's common stock price, the Company concluded that 100% of the goodwill was impaired due to the significant and sustained decline in the Company's market capitalization to below the book value. The Company recorded an impairment charge of approximately \$765,000 for the quarter ended December 27, 2008. As of March 28, 2009, there was no goodwill recorded in the Company's Consolidated Balance Sheet.

8. FAIR VALUE MEASUREMENTS

The Company has adopted SFAS No. 157, *Fair Value Measurements*, which defines fair value, establishes a framework for assets and liabilities being measured and reported at fair value and expands disclosures about fair value measurements. There was not a material impact on the Company's quarterly financial statements as the result of adopting this new standard. There are three levels of fair value hierarchy inputs used to value assets and liabilities which include: Level 1 inputs are quoted market prices for identical assets or liabilities; Level 2 inputs other than quoted market prices included in Level 1 that are observable for the asset or liability, either directly or indirectly; and Level 3 inputs are unobservable inputs for the asset or liability.

Table of Contents

The following table summarizes the Company's financial assets and liabilities (only those required to be measured at fair value on a recurring basis) at fair value as of March 28, 2009 (in thousands):

	Level 1	Level 2	Level 3	Total
Liabilities:				
Foreign currency forward contracts	\$	\$ 290	\$	\$ 290

The Company currently has forward contracts to lock in known future cash outflows for expenses denominated in the Mexican peso. These contracts are measured on a recurring basis based on the foreign currency spot rates and forward rates quoted by banks or foreign currency dealers. These contracts are marked to market using level 2 input criteria every period with the unrealized gain or loss reported as a component of shareholders' equity in accumulated other comprehensive loss.

9. DERIVATIVE FINANCIAL INSTRUMENTS

In accordance with SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities - an amendment to SFAS No. 133*, the Company has expanded the quarterly and annual disclosures on its derivative instruments and hedging activities. The Company has entered into foreign currency forward contracts and those contracts are accounted for as cash flow hedges under SFAS No. 133. The effective portion of the gain or loss on the derivative is reported as a component of accumulated other comprehensive (loss) income (OCI) and is reclassified into earnings in the same period which the underlying hedged transaction affects earnings. The derivative's effectiveness represents the change in fair value of the hedge that offsets the change in fair value of the hedged item.

The Company transacts business in Mexico and is subject to the risk of foreign currency exchange rate fluctuations. The Company enters into foreign currency forward contracts to manage the foreign currency fluctuations for Mexican peso denominated payroll, utility, tax, and accounts payable expenses. The foreign currency forward contracts have terms that are matched to the underlying transactions being hedged. As a result they are expected to fully offset the hedged risk and no ineffectiveness has been recorded.

As of March 28, 2009, the Company had outstanding foreign currency forward contracts of \$11.8 million. The Company does not enter into derivative instruments for trading or speculative purposes. The Company's counterparty to the foreign currency forward contracts is a major banking institution. The institution does not require collateral for the contracts and the Company believes that the risk of the counterparty failing to meet their contractual obligation is remote.

The following table summarizes the fair value of derivative instruments in the Consolidated Balance Sheets as of March 28, 2009 (in thousands):

	Balance Sheet Location	March 28, 2009 Fair Value	June 28, 2008 Fair Value
Derivatives Designated as Hedging Instruments Under SFAS No. 133			
Foreign currency forward contracts	Other liabilities	\$ 290	\$

The following table summarizes the gain (loss) of derivative instruments on the Consolidated Statement of Operations for the three months ended March 28, 2009 (in thousands):

	OCI Balance as of December 27, 2008	Effective Portion Recorded In OCI	Effective Portion Reclassified From OCI Into Earnings	OCI Balance as of March 28, 2009
Derivatives Designated as Hedging Instruments under SFAS No. 133				
Settled foreign currency forward contracts	\$ 49	\$ 128	\$ (177)	\$
Unsettled foreign currency forward contracts	64	226		290
Total	\$ 113	\$ 354	\$ (177)	\$ 290

Table of Contents

10. NEW ACCOUNTING PRONOUNCEMENTS

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities*. SFAS No. 161 changes the disclosure requirements for derivative instruments and hedging activities. The Company will be required to provide enhanced disclosures about how and why derivative instruments are used, how derivative instruments and related hedged items are accounted for under SFAS No. 133, *Accounting for Derivative Instruments and Certain Hedging Activities*, and its related interpretations, and how derivative instruments and related hedged items affect the Company's financial position, financial performance, and cash flows. This statement is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. The Company adopted SFAS No. 161 as of March 28, 2009.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
FORWARD-LOOKING STATEMENTS

References in this report to the Company, Key Tronic, we, our, or us mean Key Tronic Corporation together with its subsidiaries, except where the context otherwise requires.

This Quarterly Report contains forward-looking statements in addition to historical information. Forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those reflected in the forward-looking statements. Risks and uncertainties that might cause such differences include, but are not limited to those outlined in Management's Discussion and Analysis of Financial Condition and Results of Operations Risks and Uncertainties that May Affect Future Results. Readers are cautioned not to place undue reliance on forward-looking statements, which reflect management's opinions only as of the date hereof. The Company undertakes no obligation to update forward-looking statements to reflect developments or information obtained after the date hereof and disclaims any obligation to do so. Readers should carefully review the risk factors described in periodic reports the Company files from time to time with the Securities and Exchange Commission, including Year-end Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K.

OVERVIEW

Key Tronic Corporation (dba: KeyTronicEMS Co.), was organized in 1969 as a Washington corporation that manufactured computer keyboards in the Spokane, Washington area. Our goal was to become the world's largest manufacturer of input devices for terminals, word processors and personal computers. The ability to design, build and deliver a quality product led to a reputation in the industry that allowed us to become a leading independent manufacturer of keyboards for computers in the United States. Our fully integrated design, tooling and automated manufacturing capabilities enabled us to rapidly respond to customers' needs for keyboards in production quantities worldwide. We supported our sales growth through the development and purchase of international manufacturing facilities. As the computer keyboard market matured with increasing competition from other international providers, we determined that our business could no longer solely rely on keyboard sales.

After assessing market conditions and our strengths and capabilities in 1999, we shifted focus from keyboard manufacturing to contract manufacturing of a wide range of products. Our new strategy was based on our original core strengths of innovative design and engineering expertise in electronics, mechanical engineering and precision plastics combined with high-quality, low cost production and assembly on a global basis. These strengths have made our company a strong competitor in the electronic manufacturing services (EMS) market. As we fully transitioned into an EMS provider, our new customer base became comprised of world-class customers in a wide range of industries.

The EMS industry has experienced growth over the past several years as more original equipment manufacturers (OEMs) seek to outsource manufacturing and this trend is expected to continue in the future. This expansion of the EMS industry has allowed us to continue to expand our customer base and the industries that we serve. We currently offer our customers the following services: integrated electronic and mechanical engineering; precision plastic molding; assembly, component selection, sourcing and procurement; worldwide logistics; and new product testing and production all at competitive pricing due to our global footprint.

We believe that we are well positioned in the EMS industry to continue the expansion of our customer base and achieve long term growth. Our core strengths continue to support our growth and our customers' needs. We operate manufacturing facilities in the United States, Mexico and China. This global production capability provides our customers with the benefits of improved supply-chain management, reduced inventory, lower labor costs, lower transportation costs and reduced product fulfillment time.

The EMS industry is growing and is intensely competitive. We have less than 1% of the potential global market and our revenue can fluctuate significantly due to reliance on a concentrated base of customers. We are planning for new customer growth in the coming quarters by securing new programs, increasing our worldwide manufacturing capacity and continuing to improve our manufacturing processes. Ongoing challenges that we face include the following: continuing to win new programs from new and existing customers, balancing production capacity and key personnel in each of our manufacturing locations, improving operating efficiencies, controlling costs while developing competitive pricing strategies, and successfully transitioning new program wins to full production.

Table of Contents

Net income for the third quarter of fiscal year 2009 was \$0.3 million compared to \$1.2 million for the third quarter of fiscal year 2008. The results for the third quarter of fiscal year 2009 included charges of approximately \$533,000 for increased reserves on a doubtful foreign receivable and approximately \$228,000 for severance charges related to cost reduction efforts. Net income was \$0.8 million and \$3.0 million for the first nine months of fiscal year 2009 and 2008, respectively. The decrease for the first nine months of fiscal year 2009 compared to the first nine months of fiscal year 2008 was related to lower sales for the first nine months of fiscal year 2009 as compared to fiscal year 2008. Additionally, the results for the first nine months of fiscal year 2009 included charges of \$765,000 for goodwill impairment, approximately \$533,000 for increase reserves on a doubtful foreign receivable and approximately \$228,000 for severance charges related to cost reduction efforts. Net income for the first nine months of fiscal year 2008 included a gain on the sale of real estate of \$951,000.

Sales for the third quarter of fiscal year 2009 decreased 14% to \$44.2 million compared to \$51.5 million for the same period of fiscal year 2008. This decrease in sales reflects the expected lower demand from established customers due to the unfavorable global economic situation. New customers, as of the beginning of fiscal year 2008, contributed sales of approximately \$14.3 million for the quarter ended March 28, 2009, compared to \$6.8 million for the quarter ended March 29, 2008. Sales for the first nine months of fiscal 2009 were \$139.5 million or a decrease of 5% from \$146.8 million during the same period of the prior year. The sales to our new customers have partially offset the anticipated decline in demand from some of our existing customers. Sales in the fourth quarter of fiscal year 2009 are expected to be in the range of \$40 million to \$43 million.

We are expecting lower demand as the global economic situation is creating uncertainty and slowdowns in orders and reductions in forecasts from a number of our established customers. While we have maintained our existing customer base, we continue to see slowdowns in orders among these programs. Although the revenue growth from many of our new programs has also been slowed due to the recession, all of these new programs continue to move forward. New program sales are now expected to grow at a slower rate than previously anticipated; however, our flexible business model allows us to take immediate steps to reduce direct labor costs in our manufacturing facilities. Future results will depend on actual levels of customers' orders and the timing of the start up of production of new product programs. We believe that we are well positioned in the EMS industry to continue expansion of our customer base and continue long-term growth.

Gross profit as a percentage of sales for the third quarter of fiscal year 2009 was 7.5% compared to 8.2% for the third quarter of fiscal year 2008. The decrease in gross profit as a percentage of net sales was the result of lower fixed cost absorption due to sales decreasing and charges related to cost reduction efforts. Additionally, the higher net sales to customers for the third quarter ended March 29, 2008 allowed us to drive higher utilization of our manufacturing facilities. Gross profit was 7.6% for the first nine months of fiscal year 2009 compared to 7.4% for the first nine months of fiscal year 2008. The slight increase in gross profit as a percentage of sales for the first nine months of fiscal year 2009 as compared to the same periods of fiscal year 2008 was due to reduced labor related costs, improving production efficiencies and lower operating expenses as the result of favorable exchange rates. Additionally, the level of gross margin is impacted by facility utilization, product mix, timing of the start up of new programs, pricing within the electronics industry and material costs, which can fluctuate significantly from quarter to quarter.

We maintain a strong balance sheet with a current ratio of 1.95 and a long-term debt to equity ratio of 0.01. Our revolving loan in the amount of \$10.9 million with CIT matures August 22, 2009 and has been reclassified from a long-term liability to a current liability. As a result, the current ratio and long-term debt to equity ratio are lower when compared to previous years. However, we anticipate that we will renew the revolving loan or enter into a new revolving loan agreement by the maturity date. Total cash provided by operations was \$108,000 for the quarter ended March 28, 2009. We maintain sufficient liquidity for our expected future operations and had approximately \$9.9 million available from our revolving line of credit based on eligible collateral at March 28, 2009. We believe that internally generated funds, our borrowing capacity, and leases on equipment should provide adequate capital for planned growth over the long term.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Revenue Recognition

We recognize revenue when products are shipped and the sales revenue becomes realizable. Securities and Exchange Commission (SEC) Staff Accounting Bulletin (SAB) 104, *Revenue Recognition*, states that revenue generally is realized or realizable and earned when all of the following criteria are met:

Persuasive evidence of an arrangement exists.

Table of Contents

Delivery has occurred or services have been rendered.

The seller's price to the buyer is fixed or determinable.

Collectibility is reasonably assured.

We believe that we meet the above criteria for the following reasons:

Customer purchase orders confirming the price, shipping terms, and payment terms are required prior to shipment. The terms of our sales are generally FOB shipping point, meaning that the customer takes ownership of the goods and assumes the risk of loss when the goods leave our premises.

The seller's price to the buyer is fixed or determinable as noted, we require a customer purchase order, which confirms the price, shipping and payment terms.

Collectibility is reasonably assured the credit terms for customers are pre-established based on a review of the customers perceived ability to pay so that collection of the account can be reasonably assured.

Inactive, Obsolete and Surplus Inventory Reserve

We reserve for inventories that we deem inactive, obsolete or surplus. This reserve is calculated based upon the demand for the products that we produce. Demand is determined by expected sales or customer forecasts. If expected sales do not materialize, then we would have inventory in excess of our reserves and would have to charge the excess against future earnings. In the case where we have purchased material based upon a customer's forecast, we are usually covered by lead-time assurance agreements with each customer. These contracts state that the financial liability for material purchased within agreed upon lead-time and based upon the customer's forecasts, lies with the customer. If we purchase material outside the lead-time assurance agreement and the customer's forecasts do not materialize or if we have no lead-time assurance agreement for a specific program, we would have the financial liability and may have to charge inactive, obsolete or surplus inventory against earnings.

Allowance for Doubtful Accounts

We value our accounts receivable net of an allowance for doubtful accounts of \$657,000 and \$110,000 at March 28, 2009 and June 28, 2008, respectively. This allowance is based on estimates of the portion of accounts receivable that may not be collected in the future. The estimates used are based primarily on specific identification of potentially uncollectible accounts. Such accounts are identified using publicly available information in conjunction with evaluations of current payment activity. However, if any of our customers were to develop unexpected and immediate financial problems that would prevent payment of open invoices, we could incur additional and possibly material expenses that would negatively impact earnings.

Accrued Warranty

An accrual is made for expected warranty costs, with the related expense recognized in cost of goods sold. We review the adequacy of this accrual quarterly based on historical analysis and anticipated product returns and rework costs. As we have made the transition from manufacturing primarily keyboards to primarily EMS products, our exposure to warranty claims has declined significantly. Our warranty period for keyboards is generally longer than that for EMS products. We only warrant materials and workmanship on EMS products, and we do not warrant design defects for EMS customers.

Income Taxes

We had domestic tax loss carryforwards of approximately \$42.9 million and other future deductible temporary differences and tax credit carryforwards at June 28, 2008. In accordance with SFAS No. 109, we assess the sources of future taxable income, based on management's

Edgar Filing: KEY TRONIC CORP - Form 10-Q

estimates, which may be available to recognize the deductible differences that comprise deferred tax assets. A valuation allowance against deferred tax assets is required if it is more likely than not that some or all of the deferred tax assets will not be realized. We have determined that a valuation allowance of \$11.1 million on the total deferred tax asset is appropriate as of March 28, 2009. Our judgments regarding future use of deferred tax assets may change due to changes in market conditions, changes in tax laws or other factors. If our assumptions and estimates change in the future, the valuation allowance will be adjusted accordingly and any increase or decrease will result in an additional income tax expense or benefit.

Goodwill

In accordance with SFAS No. 142, *Goodwill and Other Intangible Assets*, we recorded goodwill in the amount of \$765,000, which related to the acquisition of Honeywell's manufacturing facilities in Juarez, Mexico in fiscal year 1994. In accordance with SFAS No. 142, goodwill is not amortized, but must be analyzed for impairment at least annually. Our goodwill impairment analysis was performed at the end of the second quarter each year using the two-step method.

Table of Contents

As of December 27, 2008, we completed our annual impairment test. We performed the first step of our goodwill impairment test and determined that our book value exceeded our fair value based on the quoted market price of our stock as of December 26, 2008. The result of the first step indicated that goodwill was impaired and therefore, we performed the second step of the goodwill analysis in accordance with SFAS No. 142. The second step analyzes any excess or implied fair value of goodwill upon allocating our fair value to all our assets and liabilities other than goodwill and then comparing the residual amount, if any, to the book value of the goodwill. There was no residual amount of goodwill to allocate upon completing this step. As the deteriorating global economy adversely affected our common stock price, we concluded that 100% of the goodwill was impaired due to the significant and sustained decline in our market capitalization to below the book value. We recorded an impairment charge of approximately \$765,000 for the quarter ended December 27, 2008. As of March 28, 2009 there was no goodwill recorded in our Consolidated Balance Sheet.

Derivatives

We have adopted SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities* an amendment to SFAS No. 133. In accordance with these standards all material derivative instruments are recorded on the balance sheet at their respective fair values. Generally, if a derivative instrument is specifically designated as a cash flow hedge, the change in the fair value of the derivative is recorded in other comprehensive income to the extent the derivative is effective, and recognized in the statement of operations when the hedged item affects earnings. As of March 28, 2009, we had forward contracts to lock in known future cash outflows for payroll, utility, tax and accounts payable expenses denominated in the Mexican peso. As of March 28, 2009, the fair value of these contracts was a liability of approximately \$290,000 which was included in other current liabilities and recorded as an unrealized loss in accumulated other comprehensive loss.

RESULTS OF OPERATIONS

The financial information and discussion below should be read in conjunction with the Consolidated Financial Statements and Notes. The following table presents the percentage relationship to net sales of certain items in the Consolidated Statements of Earnings for the periods indicated.

	Third Quarter Ended		Nine Months Ended	
	March 28, 2009	March 29, 2008	March 28, 2009	March 29, 2008
Net sales	100.0%	100.0%	100.0%	100.0%
Cost of sales	92.5	91.8	92.4	92.6
Gross profit	7.5	8.2	7.6	7.4
Operating expenses				
Research, development and engineering	1.2	1.3	1.3	1.4
Selling, general and administrative	5.3	4.0	4.7	4.0
Goodwill impairment	0.0	0.0	0.5	0.0
Gain on sale of real estate	0.0	0.0	0.0	(0.6)
Operating income	1.0	2.9	1.1	2.6
Interest expense	0.3	0.5	0.4	0.5
Income before income taxes	0.7	2.4	0.7	2.1
Income tax provision	0.1	0.1	0.1	0.1
Net income	0.6%	2.3%	0.6%	2.0%

Sales

Sales for the third quarter of fiscal year 2009 decreased 14% to \$44.2 million compared to \$51.5 million for the same period of fiscal year 2008. This decrease in sales reflects the expected lower demand from established customers due to the unfavorable global economic situation. New customers, as of the beginning of fiscal year 2008, contributed sales of approximately \$14.3 million for the quarter ended March 28, 2009, compared to \$6.8 million for the quarter ended March 29, 2008. Sales for the first nine months of fiscal 2009 were \$139.5 million or a decrease of 5% from \$146.8 million during the same period of the prior year. The sales to our established customers and these new customers have offset

Edgar Filing: KEY TRONIC CORP - Form 10-Q

the anticipated decline in demand from some of our existing customers. Sales in the fourth quarter of fiscal year 2009 are expected to be in the range of \$40 million to \$43 million.

Table of Contents

We are expecting lower demand as the global economic situation is creating uncertainty and slowdowns in orders and reductions in forecasts from a number of our established customers. While we have maintained our existing customer base, we continue to see slowdowns in orders among these programs. Although the revenue growth from many of our new programs has also been slowed due to the recession, all of these new programs continue to move forward. New program sales are now expected to grow at a slower rate than previously anticipated; however, our flexible business model allows us to take immediate steps to reduce direct labor costs in our manufacturing facilities. Future results will depend on actual levels of customers' orders and the timing of the start up of production of new product programs. We believe that we are well positioned in the EMS industry to continue expansion of our customer base and continue long-term growth.

The following customers represented 10 percent or more of total net sales during the nine months ended March 28, 2009 and March 29, 2008, respectively: Lexmark International, Inc. (14.8%, 16.7%), International Gaming Technology, Inc. (14.0%, 17.5%) and Zebra Technologies Corporation (less than 10% for March 28, 2009, 16.7%). It is anticipated that new customer program wins will dilute the concentration of revenue of our top customers in the future.

Sales to our largest customers may vary significantly from quarter to quarter depending on the size and timing of customer program commencement, forecasts, delays, design modifications, and transitions. We remain dependent on continued sales to our significant customers and most contracts with customers are not firm long-term purchase commitments. Only a short window of approximately three to six months of total demand information is provided to us by our customers. We seek to maintain flexibility in production capacity by employing skilled temporary and short-term labor and by utilizing short-term leases on equipment and manufacturing facilities. In addition, our capacity and core competencies for printed circuit board assemblies (PCBAs), precision molding, tool making, assembly, and engineering can be applied to a wide variety of products.

Gross Profit

Gross profit as a percentage of sales for the third quarter of fiscal year 2009 was 7.5% compared to 8.2% for the third quarter of fiscal year 2008. The decrease in gross profit as a percentage of net sales was the result of lower fixed cost absorption due to sales decreasing and charges related to cost reduction efforts. Additionally, the higher net sales to customers for the third quarter ended March 29, 2008 allowed us to drive higher utilization of our manufacturing facilities. Gross profit was 7.6% for the first nine months of fiscal year 2009 compared to 7.4% for the first nine months of fiscal year 2008. The slight increase in gross profit as a percentage of sales for the first nine months of fiscal year 2009 as compared to the same periods of fiscal year 2008 was due to reduced labor related costs, improving production efficiencies and lower operating expenses as the result of favorable exchange rates. Additionally, the level of gross margin is impacted by facility utilization, product mix, timing of the start up of new programs, pricing within the electronics industry and material costs, which can fluctuate significantly from quarter to quarter.

Included in gross profit are charges related to changes in the allowance for obsolete inventory. Specifically, we had provisions for obsolete inventory of \$248,000 and \$149,000 for the first nine months of fiscal year 2009 and 2008, respectively. We adjust the allowance for estimated obsolescence as necessary in an amount equal to the difference between the cost of inventory and estimated market value based on assumptions of future demand and market conditions. The reserves are established for inventory that we have determined customers are not contractually responsible for and for inventory that we believe customers will be unable to purchase.

Operating Expenses

Total operating expenses were \$2.9 million in the third quarter of fiscal year 2009 and \$2.8 million in the third quarter of fiscal year 2008. The difference was mainly attributable to an increase in selling, general and administrative (SG&A) expenses. Operating expenses as a percentage of sales increased to 6.5% in the third quarter of fiscal year 2009 from 5.3% in the third quarter of fiscal year 2008.

Operating expenses for the first nine months of fiscal year 2009 were \$9.0 million compared to \$6.9 million in the first nine months of fiscal year 2008. Operating expenses as a percentage of sales increased to 6.5% in the first nine months of fiscal year 2009 from 4.8% in the first nine months of fiscal year 2008. The increase in total operating expenses during the first nine months of fiscal year 2009 when compared to the same period of fiscal year 2008, was mainly due to increases in SG&A expenses, the goodwill impairment charge of \$765,000 and the gain realized on the sale of real estate realized in the prior year of \$951,000.

Table of Contents

Total SG&A expenses were \$2.3 million and \$2.1 million during the third quarters of fiscal years 2009 and 2008, respectively. The difference was mainly attributable to higher charges for doubtful receivables and severance costs offset by decreased expenses due to cost reduction efforts and favorable exchange rates. SG&A expenses for the first nine months of fiscal year 2009 were \$6.5 million compared to \$5.9 million in the first nine months of fiscal year 2008. Higher SG&A expenses in the first nine months of fiscal 2009 compared to the same period of fiscal 2008 were attributable to foreign exchange losses on Mexican peso denominated financial assets, the addition of a sales representative and severance charges related to cost reduction efforts. Additionally, for the first nine months of fiscal year 2009 compared to fiscal year 2008 there was a charge of \$608,000 and \$64,000, respectively, to provide for doubtful collection of receivables.

Total research, development, and engineering (RD&E) expenses were \$533,000 and \$679,000 during the third quarters of fiscal years 2009 and 2008, respectively. RD&E expenses were \$1.8 million and \$2.0 million in the first nine months of fiscal 2009 and 2008, respectively. Lower RD&E expenses in the third quarter and first nine months of fiscal year 2009 compared to the same periods of fiscal year 2008 were the result of cost reduction efforts.

Interest

Interest expense decreased to \$131,000 in the third quarter of fiscal year 2009 from \$254,000 in the third quarter of fiscal year 2008. For the first nine months of fiscal years 2009 and 2008, interest expense amounted to \$493,000 and \$764,000, respectively. The decreases in interest expense in the third quarter and first nine months of fiscal year 2009 compared to the same periods of fiscal year 2008 are due to a decrease in the average outstanding revolving credit facility balance and a decrease in variable interest rates.

Income Taxes

We had domestic tax loss carryforwards of approximately \$42.9 million and other future deductible temporary differences and tax credit carryforwards at June 28, 2008. In accordance with SFAS No. 109, we assess the sources of future taxable income, which may be available to recognize the deductible differences that comprise deferred tax assets. A valuation allowance against deferred tax assets is required if it is more likely than not that some or all of the deferred tax assets will not be realized. We have determined that a valuation allowance of \$11.1 million on the total deferred tax asset is appropriate as of March 28, 2009. Our judgments regarding future use of deferred tax assets may change due to changes in market conditions, changes in tax laws or other factors. If our assumptions and estimates change in the future the valuation allowance will be adjusted accordingly and any resulting increase or decrease will result in an additional income tax expense or benefit.

In addition to our domestic operations, we have subsidiaries in Mexico and China. We are currently applying certain tax credits to offset the income tax liabilities of our Mexican subsidiaries. As of January 1, 2008, we became subject to a Mexican business flat tax called Impuesto Empresarial a Tasa Unica (IETU). The effect of IETU and an associated presidential decree on fiscal year 2009 has been included in the effective tax rate for the nine months ended March 28, 2009 and was approximately \$196,000. We continue to pay income tax in China which totaled approximately \$21,000 for the nine months ended March 29, 2008. Accordingly, the income tax provisions for the third quarter of fiscal years 2009 and 2008 are primarily attributable to the taxable earnings of our foreign subsidiaries.

Backlog

On March 28, 2009, we had an order backlog of approximately \$29.7 million. This compares with a backlog of approximately \$53.1 million on March 29, 2008. The change in backlog at March 28, 2009, when compared to March 28, 2008, was due to the decline in demand from our existing customers as the result of the unfavorable global economic situation. Order backlog consists of purchase orders received for products expected to be shipped within the next 12 months, although shipment dates are subject to change due to design modifications or changes in other customer requirements. Order backlog should not be considered an accurate measure of future sales.

CAPITAL RESOURCES AND LIQUIDITY

Operating Cash Flow

Cash provided by operating activities was \$108,000 during the nine months ended March 28, 2009 compared to \$1.0 million used in operating activities during the same period of the prior fiscal year. The increase in cash provided by operating activities during the first nine months of fiscal year 2009 when compared to the same period of the prior fiscal year is due to a decrease in trade receivables of \$6.8 million and a decrease in other assets of \$411,000. Cash provided by operating activities was offset by the decrease in accounts payable of \$8.4 million and accrued compensation and vacation expense of \$1.7 million. The cash provided by trade receivables increased as the result of higher collections for the quarter ended March 28, 2009 compared with the quarter ended March 29, 2008 and taking early pay discounts from suppliers. The decrease in accounts payable during the first nine

Table of Contents

months of fiscal 2009 was due to a decrease in inventory received compared to inventory received in the quarter ended March 29, 2008. Accounts payable fluctuates with changes in inventory levels and negotiated supplier terms. We purchase inventory based on customer forecasts and orders, and when those forecasts and orders change the amount of inventory may also fluctuate.

Investing Cash Flow

During the first nine months of fiscal year 2009, we spent \$256,000 for capital additions compared to \$920,000 in the same period of the previous fiscal year. Our capital expenditures primarily consist of purchases of manufacturing equipment to support our production facilities. We also use leases to acquire equipment. Operating leases are often utilized when technical obsolescence and funding requirement advantages outweigh the benefits of equipment ownership. Capital expenditures and periodic lease payments are expected to be financed with internally generated funds.

Financing Cash Flow

Our primary financing activity during the first nine months of fiscal years 2009 and 2008 was borrowing and repayment under our revolving credit facility. Our financing agreement provides a revolving credit facility of up to \$25 million. The range of interest rates on the balances on outstanding contracts was 2.85 % to 3.25 % on March 28, 2009. The credit facility matures on August 22, 2009. However, we fully anticipate renewing the revolving loan agreement with CIT or signing a new loan agreement with another lender prior to August 22, 2009. As of March 28, 2009, we were in compliance with our loan covenant, and based on eligible collateral, approximately \$9.9 million was available for drawdown from the revolving line of credit.

Our cash requirements are affected by the level of current operations and new EMS programs. We believe that projected cash from operations, funds available under the existing and anticipated new revolving credit facility and leasing capabilities will be sufficient to meet our working and fixed capital requirements for the foreseeable future.

Restricted cash includes amounts in our bank account that must be used to pay down our revolving line of credit. These amounts fluctuate daily based on collections.

RISKS AND UNCERTAINTIES THAT MAY AFFECT FUTURE RESULTS

*The following risks and uncertainties could affect our actual results and could cause results to differ materially from past results or those contemplated by our forward-looking statements. When used herein, the words *expects*, *believes*, *anticipates* and similar expressions are intended to identify forward-looking statements.*

Potential Fluctuations in Quarterly Results

Our quarterly operating results have varied in the past and may vary in the future due to a variety of factors, including adverse changes in the U.S. and global economic conditions, volatility in overall demand for our customers' products, success of customers' programs, timing of new programs, new product introductions or technological advances by us, our customers and our competitors and changes in pricing policies by us, our customers, our suppliers and our competitors. Our customer base is diverse in the markets they serve, however, decreases in demand, particularly from customers that supply the banking and gambling industries, could affect future quarterly results. Additionally, our customers could be impacted by the illiquidity of the credit markets which could directly impact our operating results.

Component procurement, production schedules, personnel and other resource requirements are based on estimates of customer requirements. Occasionally, our customers may request accelerated production that can stress resources and reduce operating margins. In addition, because many of our operating expenses are relatively fixed, a reduction in customer demand can harm our gross profit and operating results. The products which we manufacture for our customers have relatively short product lifecycles. Therefore, our business, operating results and financial condition are dependent in significant way on our ability to obtain orders from new customers and new product programs from existing customers.

Operating results can also fluctuate if changes are made to significant estimates and assumptions. Significant estimates and assumptions include the allowance for doubtful receivables, provision for obsolete and non-saleable inventory, the valuation allowance on deferred tax assets, valuation of goodwill, impairment of long-lived assets, long-term incentive compensation accrual, and the provision for warranty costs.

Table of Contents

Economic Conditions

Recently there have been adverse conditions and uncertainty in the global economy as the result of unstable global financial and credit markets, inflation, and recession. These unfavorable economic conditions and the weakness of the credit market could affect the demand for our customers' products. If the current global economic conditions continue some of our customers could continue to reduce orders and change forecasts which could adversely affect our sales in future periods. Additionally, the financial strength of our customers and suppliers and their ability to obtain and rely on credit financing may affect their ability to fulfill their obligations to us and have an adverse affect on our financial results.

Credit Markets

The current illiquidity and financial instability in the credit markets could adversely impact our lender, CIT, and potentially limit our ability to borrow under our current revolving credit facility. Additionally, as we pursue renewing or replacing our revolving credit facility, the illiquidity and uncertainty in the credit markets could adversely impact our ability to renew or obtain such financing. Our inability to obtain such financing before our current credit facility matures could adversely affect our business.

Competition

The EMS industry is intensely competitive. Competitors may offer customers lower prices on certain high volume programs. This could result in price reductions, reduced margins and loss of market share, all of which would materially and adversely affect our business, operating results and financial condition. If we were unable to provide comparable or better manufacturing services at a lower cost than our competitors, it could cause sales to decline. In addition, competitors can copy our non-proprietary designs after we have invested in development of products for customers, thereby enabling such competitors to offer lower prices on such products due to savings in development costs.

Concentration of Major Customers

At present, our customer base is highly concentrated and could become more or less concentrated. Our largest EMS customer accounted for 18% of net sales in fiscal year 2008. This same customer accounted for 17% of sales in 2007 and 18% in 2006. For the fiscal years ended 2008, 2007, and 2006, the five largest customers accounted for 68%, 73% and 71% of total sales, respectively. There can be no assurance that our principal customers will continue to purchase products from us at current levels, specifically with the global economic environment. Moreover, we typically do not enter into long-term volume purchase contracts with our customers, and our customers have certain rights to extend or delay the shipment of their orders. We, however, require that our customers contractually agree to buy back inventory purchased within specified lead times to build their products if not used.

The loss of one or more of our major customers, or the reduction, delay or cancellation of orders from such customers, due to economic conditions or other forces, could materially and adversely affect our business, operating results and financial condition. Specifically, some of our major customers provide products to the banking and gambling industries which have been adversely affected by the unfavorable economic conditions. The contraction in demand from our customers in these industries could continue to impact our customer orders and continue to have a negative impact on our operations over the next several fiscal quarters.

Dependence on Suppliers

We are dependent on many suppliers, including sole source suppliers, to provide key components and raw materials used in manufacturing customers' products. Delays in deliveries from suppliers or the inability to obtain sufficient quantities of components and raw materials could cause delays or reductions in shipment of products to our customers which could adversely affect our operating results and damage customer relationships.

Foreign Manufacturing Operations

Most of the products manufactured by us are produced at our facilities located in Mexico and China. Accordingly, our operations are subject to a variety of risks and factors unique to international operations including foreign economic and political risk; civil unrest; import and export duties; currency fluctuations; and value added taxes; import and export regulation changes; and the burden and cost of compliance with foreign laws.

Dependence on Key Personnel

Edgar Filing: KEY TRONIC CORP - Form 10-Q

Our future success depends in large part on the continued service of our key technical, marketing and management personnel and on our ability to continue to attract and retain qualified employees. The competition for such personnel is intense and there can be no assurance that we will be successful in attracting and retaining such personnel. The loss of key employees could have a material adverse effect on our business, operating results and financial condition.

Table of Contents

Technological Change and New Product Risk

The markets for our customers' products is characterized by rapidly changing technology, evolving industry standards, frequent new product introductions and relatively short product life cycles. The introduction of products embodying new technologies or the emergence of new industry standards can render existing products obsolete or unmarketable. Our success will depend upon our customers' ability to enhance existing products and to develop and introduce, on a timely and cost-effective basis, new products that keep pace with technological developments and emerging industry standards and address evolving and increasingly sophisticated customer requirements. Failure of our customers to do so could substantially harm our customers' competitive positions. There can be no assurance that our customers will be successful in identifying, developing and marketing products that respond to technological change, emerging industry standards or evolving customer requirements.

Interest Rate Risk

We are exposed to interest rate risk under our revolving credit facility with interest rates based on various levels of margin added to published prime rate and LIBOR rates depending on the calculation of certain financial covenants.

Compliance with Current and Future Environmental Regulation

We are subject to a variety of domestic and foreign environmental regulations relating to the use, storage, and disposal of materials used in our manufacturing processes. If we fail to comply with any present or future regulations, we could be subject to future liabilities or the suspension of current manufacturing operations. In addition, such regulations could restrict our ability to expand our operations or could require us to acquire costly equipment, substitute materials, or incur other significant expenses to comply with government regulations.

Foreign Currency Fluctuations

A significant portion of our operations are in foreign locations. As a result, transactions occur in currencies other than the U.S. dollar. Exchange rate fluctuations among other currencies used by us could directly or indirectly affect our financial results. Future currency fluctuations are dependent upon a number of factors and cannot be easily predicted. We currently use Mexican peso forward contracts to hedge foreign currency fluctuations for a portion of our Mexican peso denominated expenses. However, unexpected expenses could occur from future fluctuations in exchange rates.

Dilution and Stock Price Volatility

As of March 28, 2009, there were outstanding options for the purchase of 973,077 shares of our common stock (Common Stock), all of which were vested and exercisable. Holders of the Common Stock will suffer immediate and substantial dilution to the extent outstanding options to purchase the Common Stock are exercised. Our stock price may be subject to wide fluctuations and possible rapid increases or declines over a short time period. These fluctuations may be due to factors specific to us such as variations in quarterly operating results or changes in earnings estimates, or to factors relating to the EMS industry or to the securities markets in general, which, in recent years, have experienced significant price fluctuations. These fluctuations often have been unrelated to the operating performance of the specific companies whose stocks are traded.

Disclosure and Internal Controls

Management does not expect that our disclosure controls and internal controls and procedures will prevent all errors or fraud. A control system is designed to give reasonable, and not absolute, assurance that the objectives of the control system are met. In addition, any control system reflects resource constraints and the benefits of controls must be considered relative to their costs. Inherent limitations of a control system may include: judgments in decision making may be faulty, breakdowns can occur simply because of error or mistake and controls can be circumvented by collusion or management override. Because of inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and may not be detected.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Interest Rate Risk

Edgar Filing: KEY TRONIC CORP - Form 10-Q

We are subject to the risk of fluctuating interest rates in the normal course of business. Our major market risk relates to our secured debt. Our revolving credit facility is secured by substantially all of our assets. The interest rates applicable to our revolving credit facility fluctuate with the JP Morgan Chase Bank prime rate and LIBOR rates. There was outstanding \$10.9 million in borrowings under our revolving credit facility as of March 28, 2009.

Foreign Currency Exchange Risk

A significant portion of our operations are in foreign locations. As a result, transactions occur in currencies other than the U.S. dollar. Exchange rate fluctuations among other currencies used by us would directly or indirectly affect our financial results. We currently use Mexican peso forward contracts to hedge foreign currency fluctuations for a portion of our Mexican peso denominated expenses. There was outstanding \$11.8 million of foreign currency forward contracts as of March 28, 2009. The fair value of these contracts was \$290,000 and was recorded in other liabilities in the Consolidated Balance Sheet as of March 28, 2009. However, unexpected expenses could occur from future fluctuations in exchange rates.

Item 4. Controls and Procedures Evaluation of Disclosure Controls and Procedures

It is the responsibility of our management to establish, maintain, and monitor disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports filed or submitted under the Securities Exchange Act of 1934 are recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission rules and forms. Additionally, these disclosure controls include controls and procedures that are designed to accumulate and communicate the information required to be disclosed to our company's Chief Executive Officer and Chief Financial Officer, allowing for timely decisions regarding required disclosures. As of the end of the period covered by this report, our management carried out an evaluation, under the supervision and with the participation of the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Exchange Act Rule 13a-15(f). Based on our assessment, we believe that as of March 28, 2009, the Company's disclosure controls and procedures are effective based on that criteria.

Changes in Internal Control over Financial Reporting

There have been no significant changes in our internal controls over financial reporting during our third quarter ended March 28, 2009 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)).
