NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

These financial statements have been prepared by Apache Corporation (Apache or the Company) without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). They reflect all adjustments that are, in the opinion of management, necessary for a fair statement of the results for the interim periods, on a basis consistent with the annual audited financial statements. All such adjustments are of a normal recurring nature. Certain information, accounting policies and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States (U.S. GAAP) have been omitted pursuant to such rules and regulations, although the Company believes that the disclosures are adequate to make the information presented not misleading. This Quarterly Report on Form 10-Q should be read along with Apache s Annual Report on Form 10-K for the fiscal year ended December 31, 2012, which contains a summary of the Company s significant accounting policies and other disclosures. Additionally, the Company s financial statements for prior periods may include reclassifications that were made to conform to the current-period presentation.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

As of March 31, 2013, Apache s significant accounting policies are consistent with those discussed in Note 1 Summary of Significant Accounting Policies of its consolidated financial statements contained in Apache s Annual Report on Form 10-K for the fiscal year ended December 31, 2012.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates with regard to these financial statements include the fair value determination of acquired assets and liabilities, the estimate of proved oil and gas reserves and related present value estimates of future net cash flows therefrom, assessing asset retirement obligations, and the estimate of income taxes. Actual results could differ from those estimates.

Oil and Gas Property

The Company follows the full-cost method of accounting for its oil and gas property. Under this method of accounting, all costs incurred for both successful and unsuccessful exploration and development activities, including salaries, benefits and other internal costs directly identified with these activities, and oil and gas property acquisitions are capitalized. The net book value of oil and gas properties, less related deferred income taxes, may not exceed a calculated ceiling. The ceiling limitation is the estimated after-tax future net cash flows from proved oil and gas reserves, discounted at 10 percent per annum and adjusted for designated cash flow hedges. Estimated future net cash flows are calculated using end-of-period costs and an unweighted arithmetic average of commodity prices in effect on the first day of each of the previous 12 months, held flat for the life of the production, except where prices are defined by contractual arrangements.

Any excess of the net book value of proved oil and gas properties, less related deferred income taxes, over the ceiling is charged to expense and reflected as Additional depreciation, depletion and amortization (DD&A) in the accompanying statement of consolidated operations. Such limitations are imposed separately on a country-by-country basis and are tested quarterly. For a discussion of the calculation of estimated future net cash flows, please refer to Note 14 Supplemental Oil and Gas Disclosures in Apache s Annual Report on Form 10-K for its 2012 fiscal year. For the three months ended March 31, 2013, the Company recorded a \$65 million (\$42 million net of tax) non-cash write-down of the carrying value of the Company s Argentinian proved oil and gas properties. For the three months ended March 31, 2012, the Company recorded a \$521 million (\$390 million net of tax) non-cash write-down of the carrying value of the Company s Canadian proved oil and gas properties.

New Pronouncements Issued But Not Yet Adopted

In February 2013, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2013-04, which increases disclosures for certain liability arrangements. The guidance requires an entity that is joint and severally liable to measure the obligation as the sum of the amount the entity has agreed with co-obligors to pay and any additional amount it expects to pay on behalf of one or more co-obligors. Required disclosures include a description of the nature of the arrangement, how the liability arose, the relationship with co-obligors and the terms and conditions of the arrangement. ASU No. 2013-04 is effective for annual and interim reporting periods beginning after December 15, 2013. The Company is currently evaluating the impact of adopting this amendment on its consolidated financial statements; however, any changes will be applied retrospectively to all prior periods presented.

2. ACQUISITIONS AND DIVESTITURES

2013 Activity

Kitimat LNG Project

In February 2013, Apache completed a transaction with Chevron Canada Limited (Chevron Canada) to build and operate the Kitimat LNG project and develop shale gas resources at the Liard and Horn River basins in British Columbia. Chevron Canada and Apache Canada are now each a 50-percent owner of the Kitimat LNG plant, the Pacific Trail Pipelines Limited Partnership (PTP), and 644,000 gross undeveloped acres in the Horn River and Liard basins. As part of the transaction, Apache Canada increased its ownership in the LNG plant and PTP pipeline from 40-percent, sold portions of its existing interests in Horn River and Liard, and purchased additional interests in Horn River. Chevron Canada will operate the LNG plant and pipeline while Apache Canada will continue to operate the upstream assets. Apache s net proceeds from the transaction were \$405 million.

2012 Activity

Cordillera Energy Partners III, LLC

On April 30, 2012, Apache completed the acquisition of Cordillera Energy Partners III, LLC (Cordillera), a privately-held exploration and production company, in a stock and cash transaction. Cordillera s properties included approximately 312,000 net acres in the Granite Wash, Tonkawa, Cleveland, and Marmaton plays in western Oklahoma and the Texas Panhandle.

Apache issued 6,272,667 shares of common stock and paid approximately \$2.7 billion of cash to the sellers as consideration for the transaction. The transaction was accounted for using the acquisition method of accounting, which requires, among other things, that assets acquired and liabilities assumed be recognized at their fair values as of the acquisition date. The following table summarizes the final estimates of the assets acquired and liabilities assumed in the acquisition.

	(In r	nillions)
Current assets	\$	39
Proved properties		1,040
Unproved properties		2,299
Gathering, transmission, and processing facilities		1
Goodwill ⁽¹⁾		173
Deferred tax asset		64
Total assets acquired	\$	3,616
Current liabilities		88
Deferred income tax liabilities		237
Other long-term obligations		5
Total liabilities assumed	\$	330
Net assets acquired	\$	3,286

On January 31, 2012, a subsidiary of Apache Energy Limited completed the acquisition of a 49-percent interest in Yara Pilbara Holdings Pty Limited (YPHPL, formerly Burrup Holdings Limited) for \$439 million, including working capital adjustments. The transaction was funded with debt. YPHPL is the owner of an ammonia plant on the Burrup Peninsula of Western Australia. Apache has supplied gas to the plant since operations commenced in 2006. Yara Australia Pty Ltd (Yara) owns the remaining 51 percent of YPHPL and operates the plant. The investment

Goodwill was the excess of the consideration transferred over the net assets recognized and represents the future economic benefits arising from assets acquired that could not be individually identified and separately recognized. Goodwill is not deductible for tax purposes.

Yara Pilbara Holdings Pty Limited

in YPHPL is accounted for under the equity method of accounting, with the balance recorded as a component of Deferred charges and other in Apache's consolidated balance sheet and results of operations recorded as a component of Other under Revenues and Other in the Company's statement of consolidated operations.

3. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

Objectives and Strategies

The Company is exposed to fluctuations in crude oil and natural gas prices on the majority of its worldwide production. Apache manages the variability in its cash flows by occasionally entering into derivative transactions on a portion of its crude oil and natural gas production. The Company utilizes various types of derivative financial instruments, including swaps and options, to manage fluctuations in cash flows resulting from changes in commodity prices.

Counterparty Risk

The use of derivative instruments exposes the Company to counterparty credit risk, or the risk that a counterparty will be unable to meet its commitments. To reduce the concentration of exposure to any individual counterparty, Apache utilizes a diversified group of investment-grade rated counterparties, primarily financial institutions, for its derivative transactions. As of March 31, 2013, Apache had derivative positions with 16 counterparties. The Company monitors counterparty creditworthiness on an ongoing basis; however, it cannot predict sudden changes in counterparties creditworthiness. In addition, even if such changes are not sudden, the Company may be limited in its ability to mitigate an increase in counterparty credit risk. Should one of these counterparties not perform, Apache may not realize the benefit of some of its derivative instruments resulting from lower commodity prices.

The Company executes commodity derivative transactions under master agreements that have netting provisions that provide for offsetting payables against receivables. In general, if a party to a derivative transaction incurs a material deterioration in its credit ratings, as defined in the applicable agreement, the other party has the right to demand the posting of collateral, demand a transfer, or terminate the arrangement.

Derivative Instruments

As of March 31, 2013, Apache had the following open crude oil derivative positions:

	Fixed-Price Swaps			Collars		
Production		Weighted Average		Weighted Average	Weighted Average	
Period	Mbbls	Fixed Price(1)	Mbbls	Floor Price (1)	Ceiling Price(1)	
2013	1,212	74.90	4,216	82.99	111.81	
2013 (2)	34,370	98.97				
2014 (3)	76	74.50				

- Crude oil prices represent a weighted average of several contracts entered into on a per-barrel basis. Crude oil contracts are primarily settled against NYMEX WTI Cushing Index and Platts Dated Brent. Approximately 50 percent of 2013 contracts are settled against Dated Brent.
- (2) For 2013, these fixed-price swaps have not been designated as cash flow hedges, and changes in fair value are reflected directly in earnings. All other derivative positions have been designated as cash flow hedges.
- Subsequent to March 31, 2013, Apache entered into additional crude oil derivatives not designated as cash flow hedges totaling 9,673 thousand barrels (Mbbls) for 2014 with a weighted average fixed price of \$94.76.

As of March 31, 2013, Apache had the following open natural gas derivative positions which have all been designated as cash flow hedges:

	Fixed-Price Swaps					Collars			
Production	MMBtu		eighted verage	MMBtu		eighted verage		ighted erage	
Period	(in 000 s)	Fixed	d Price ⁽¹⁾	(in 000 s)	Floor	Price (1)	Ceilin	g Price (1)	
2013 (2)	7,575	\$	6.73	4,575	\$	5.35	\$	6.67	
2014	1,295	\$	6.72		\$		\$		

- ⁽¹⁾ U.S. natural gas prices represent a weighted average of several contracts entered into on a per-million British thermal units (MMBtu) basis and are settled against NYMEX Henry Hub.
- Subsequent to March 31, 2013, Apache entered into additional natural gas derivatives not designated as cash flow hedges totaling 12,840 thousand MMBtu for 2013 with a weighted average fixed price of \$4.34.

In the first quarter of 2013 Apache Canada Ltd entered into physical sales contracts to deliver 50,000 gigajoule per day of natural gas from April 2013 through October 2013 and an additional 50,000 gigajoule per day from May 2013 through December 2013. Fixed prices over the term of the sales contracts averaged C\$3.42. These sales contracts were entered in the normal course of business and will be recognized in oil and gas revenues on an accrual basis.

Fair Value Measurements

Apache s commodity derivative instruments consist of variable-to-fixed price commodity swaps and options. The fair values of the Company s derivatives are not actively quoted in the open market. The Company uses a market approach to estimate the fair values of its derivative instruments, utilizing commodity futures price strips for the underlying commodities provided by a reputable third party.

The following table presents the Company s derivative assets and liabilities measured at fair value on a recurring basis:

	Quoted	Significant Other Inputs (Level 2)	Significant Unobservable Inputs (Level 3) millions)	Total Fair Value	Net	$tting^{(1)}$	rrying nount
March 31, 2013							
Assets:							
Derivatives designated as cash flow hedges	\$	\$ 29	\$	\$ 29	\$	(12)	\$ 17
Liabilities:							
Derivatives designated as cash flow hedges		36		36			
Derivatives not designated as cash flow hedges		127		127			
Total Derivative liabilities	\$	\$ 163	\$	\$ 163	\$	(12)	\$ 151
December 31, 2012							
Assets:							
Derivatives designated as cash flow hedges	\$	\$ 48	\$	\$ 48	\$	(15)	\$ 33
Liabilities:							
Derivatives designated as cash flow hedges		51		51			
Derivatives not designated as cash flow hedges		80		80			
Total Derivative liabilities	\$	\$ 131	\$	\$ 131	\$	(15)	\$ 116

⁽¹⁾ The derivative fair values are based on analysis of each contract on a gross basis, excluding the impact of netting agreements with counterparties.

Derivative Assets and Liabilities Recorded in the Consolidated Balance Sheet

The Company accounts for derivative instruments and hedging activity in accordance with Accounting Standards Codification (ASC) Topic 815, Derivatives and Hedging, and all derivative instruments are reflected as either assets or liabilities at fair value in the consolidated balance sheet. These fair values are recorded by netting asset and liability positions where counterparty master netting arrangements contain provisions for net settlement. The carrying value of the Company s derivative assets and liabilities and their locations on the consolidated balance sheet are as follows:

	March 31, 2013	, December 2012			
	(In	(In millions)			
Current Assets: Derivative instruments	\$ 16	\$	31		
Other Assets: Deferred charges and other	1		2		

Edgar Filing: APACHE CORP - Form 10-Q

Total Assets	\$ 17	\$ 33
Current Liabilities: Derivative instruments	\$ 151	\$ 116
Total Liabilities	\$ 151	\$ 116

Derivative Activity Recorded in the Statement of Consolidated Operations

The following table summarizes the effect of derivative instruments on the Company s statement of consolidated operations:

	Gain (Loss) on Derivatives Recognized in Income Oil and Gas Production Revenues	For	the Quar March	ided
	Recognized in Income	2	2013 (In mill)12
Gain (loss) on cash flow hedges reclassified				
from accumulated other comprehensive loss	Oil and Gas Production Revenues	\$	(9)	\$ 41
Gain (loss) for ineffectiveness on cash flow hedges	Revenues and Other: Other	\$		\$ (1)
Gain (loss) on derivatives not designated as				
cash flow hedges	Revenues and Other: Other	\$	(100)	\$

Derivative Activity in Accumulated Other Comprehensive Income (Loss)

A reconciliation of the components of accumulated other comprehensive income (loss) in the statement of consolidated shareholders—equity related to Apache—s cash flow hedges is presented in the table below. Derivative activity represents all of the reclassifications out of accumulated other comprehensive income (loss) to income for the periods presented.

	For t	For the Quarter Ended March 31,					
	20:	13	20	12			
	Before	re After Before		After			
	tax	tax	tax	tax			
		(In m	illions)				
Unrealized gain (loss) on derivatives at beginning of period	\$ (10)	\$ (6)	\$ 145	\$ 114			
Realized amounts reclassified into earnings	9	6	(41)	(34)			
Net change in derivative fair value	(11)	(8)	(29)	1			
Ineffectiveness reclassified into earnings			1				
·							
Unrealized gain (loss) on derivatives at end of period	\$ (12)	\$ (8)	\$ 76	\$ 81			

Gains and losses on existing hedges will be realized in future earnings through mid-2014, in the same period as the related sales of natural gas and crude oil production occur. Included in accumulated other comprehensive loss as of March 31, 2013, is a net loss of approximately \$13 million (\$8 million after tax) that applies to the next 12 months; however, estimated and actual amounts are likely to vary materially as a result of changes in market conditions.

4. OTHER CURRENT LIABILITIES

Total Other current liabilities	\$ 2,723	\$	2,860		

5. ASSET RETIREMENT OBLIGATION

The following table describes changes to the Company s asset retirement obligation (ARO) liability for the three-month period ended March 31, 2013:

	(In r	nillions)
Asset retirement obligation at December 31, 2012	\$	4,578
Liabilities incurred		132
Liabilities acquired		53
Liabilities settled		(163)
Accretion expense		65
Asset retirement obligation at March 31, 2013		4,665
Less current portion		(468)
Asset retirement obligation, long-term	\$	4,197

6. DEBT AND FINANCING COSTS

The following table presents the carrying amounts and estimated fair values of the Company s outstanding debt:

	March	31, 2013	Decembe	r 31, 2012
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
		(In m	illions)	
Uncommitted credit lines	\$ 94	\$ 94	\$ 91	\$ 91
Commercial paper	619	619	489	489
Notes and debentures	11,766	12,888	11,765	13,340
Total Debt	\$ 12,479	\$ 13,601	\$ 12,345	\$ 13,920

The Company s debt is recorded at the carrying amount, net of unamortized discount, on its consolidated balance sheet. The carrying amount of the Company s commercial paper and uncommitted credit facilities and overdraft lines approximates fair value because the interest rates are variable and reflective of market rates. Apache uses a market approach to determine the fair value of its notes and debentures using estimates

provided by an independent investment financial data services firm (a Level 2 fair value measurement).

As of March 31, 2013 and December 31, 2012, current debt included \$500 million 5.25-percent notes and \$400 million 6.00-percent notes due within the next 12 months. Additionally, current debt included \$94 million and \$91 million borrowed on uncommitted credit facilities and overdraft lines as of March 31, 2013 and December 31, 2012, respectively.

As of March 31, 2013, the Company had unsecured committed revolving credit facilities totaling \$3.3 billion, of which \$1.0 billion matures in August 2016 and \$2.3 billion matures in June 2017. The facilities consist of a \$1.7 billion facility and \$1.0 billion facility for the U.S., a \$300 million facility for Australia, and a \$300 million facility for Canada. As of March 31, 2013, available borrowing capacity under the Company s credit facilities was \$2.7 billion. The Company s committed credit facilities are used to support Apache s commercial paper program.

The Company has available a \$3.0 billion commercial paper program, which generally enables Apache to borrow funds for up to 270 days at competitive interest rates. The commercial paper program is fully supported by available borrowing capacity under our committed credit facilities. As of March 31, 2013, the Company had \$619 million in commercial paper outstanding, compared with \$489 million as of December 31, 2012.

Financing Costs, Net

	-	arter Ended ch 31,
	2013	2012
	(In m	illions)
Interest expense	\$ 148	\$ 108
Amortization of deferred loan costs	2	1
Capitalized interest	(93)	(66)
Interest income	(4)	(3)
Financing costs, net	\$ 53	\$ 40

7. INCOME TAXES

The Company estimates its annual effective income tax rate in recording its quarterly provision for income taxes in the various jurisdictions in which the Company operates. Statutory tax rate changes and other significant or unusual items are recognized as discrete items in the quarter in which they occur. Accordingly, the Company recorded the income tax impact of a \$65 million and \$521 million non-cash write-down of its Argentinian and Canadian proved oil and gas properties, respectively, as a discrete item in the first quarter of 2013 and 2012.

Additionally, the Company recorded an increase in the valuation allowances in Argentina and Canada during the first quarter of 2013 totaling \$27 million and \$12 million, respectively, for deferred tax assets the Company does not expect to realize.

Apache and its subsidiaries are subject to U.S. federal income tax as well as income or capital taxes in various state and foreign jurisdictions. The Company s tax reserves are related to tax years that may be subject to examination by the relevant taxing authority. The Company is under audit with the Internal Revenue Service (IRS) for the 2009, 2010, and 2011 tax years. The Company is also under audit in various states and in most of the Company s foreign jurisdictions as part of its normal course of business.

8. COMMITMENTS AND CONTINGENCIES

Legal Matters

Apache is party to various legal actions arising in the ordinary course of business, including litigation and governmental and regulatory controls. The Company has an accrued liability of approximately \$14 million for all legal contingencies that are deemed to be probable of occurring and can be reasonably estimated. Apache s estimates are based on information known about the matters and its experience in contesting, litigating, and settling similar matters. Although actual amounts could differ from management s estimate, none of the actions are believed by management to involve future amounts that would be material to Apache s financial position, results of operations, or liquidity after consideration of recorded accruals. For material matters that Apache believes an unfavorable outcome is reasonably possible, the Company has disclosed the nature of the matter and a range of potential exposure, unless an estimate cannot be made at this time. It is management s opinion that the loss for any other litigation matters and claims that are reasonably possible to occur will not have a material adverse effect on the Company s financial position, results of operations, or liquidity.

Argentine Environmental Claims

As more fully described in Note 8 of the financial statements in Apache s Annual Report on Form 10-K for its 2012 fiscal year, in 2006 the Company acquired a subsidiary of Pioneer Natural Resources in Argentina (PNRA) that is involved in various administrative proceedings with environmental authorities in the Neuquén Province relating to permits for and discharges from operations in that province. In addition, PNRA was named in a suit initiated against oil companies operating in the Neuquén basin entitled *Asociación de Superficiarios de la Patagonia v. YPF S.A., et. al.*, originally filed on August 21, 2003, in the Argentine National Supreme Court of Justice relating to various environmental and remediation claims. The plaintiff in that case, known as ASSUPA, in 2012 asserted similar lawsuits and claims against numerous oil and gas producers relating to other geographic areas of Argentina, including claims against a Company subsidiary relating to the Austral Basin. While it is possible that one or more of the Company s subsidiaries may incur liabilities related to these claims, no reasonable prediction can be made as the Company s subsidiaries exposure related to these lawsuits is not currently determinable. No other material change in the status of these matters has occurred since the filing of Apache s Annual Report on Form 10-K for its 2012 fiscal year.

U.S. Royalty Litigation

As more fully described in Note 8 of the financial statements in Apache s Annual Report on Form 10-K for its 2012 fiscal year, on August 20, 2012, in *Foster v. Apache Corporation*, Civil Action No. CIV-10-0573-HE, in the United States District Court for the Western District of Oklahoma, the District Court denied plaintiff s motion for class certification. The plaintiff filed a motion for reconsideration, which was also denied, and has petitioned the United States Court of Appeals for the Tenth Circuit to accept an appeal of the District Court s ruling denying class certification. No other material change in the status of this matter has occurred since the filing of Apache s Annual Report on Form 10-K for its 2012 fiscal year.

Louisiana Restoration

As more fully described in Note 8 of the financial statements in Apache s Annual Report on Form 10-K for its 2012 fiscal year, numerous surface owners have filed claims or sent demand letters to various oil and gas companies, including Apache, claiming that, under either expressed or implied lease terms or Louisiana law, they are liable for damage measured by the cost of restoration of leased premises to their original condition as well as damages for contamination and cleanup. No material change in the status of these matters has occurred since the filing of Apache s Annual Report on Form 10-K for its 2012 fiscal year.

Hurricane-Related Litigation

As more fully described in Note 8 of the financial statements in Apache s Annual Report on Form 10-K for its 2012 fiscal year, on May 27, 2011, in the case styled *Comer et al. v. Murphy Oil USA, Inc. et al.*, Case No. 1:11-cv-220 HS0-JMR, in the United States District Court for the Southern District of Mississippi, the District Court granted defendants motion to dismiss plaintiffs claims, and plaintiffs have appealed the decision to the United States Court of Appeals for the Fifth Circuit. No other material change in the status of this matter has occurred since the filing of Apache s Annual Report on Form 10-K for its 2012 fiscal year.

Australia Gas Pipeline Force Majeure

As more fully described in Note 8 of the financial statements in Apache s Annual Report on Form 10-K for its 2012 fiscal year, in 2008 Company subsidiaries reported a pipeline explosion that interrupted deliveries of natural gas in Australia to customers under various long-term contracts. No material change in the status of these matters has occurred since the filing of Apache s most recent Annual Report on Form 10-K for its 2012 fiscal year except as follows:

In the case captioned *Alcoa of Australia Limited v. Apache Energy Limited, Apache Northwest Pty Ltd, Tap (Harriet) Pty Ltd, and Kufpec Australia Pty Ltd,* Civ. 1481 of 2011, in the Supreme Court of Western Australia, on June 20, 2012, the Supreme Court struck out Alcoa s claim that the liquidated damages provisions under two long-term contracts are unenforceable as a penalty and also struck out Alcoa s claim for damages for breach of statutory duty. The Company subsidiaries have filed an appeal in the Supreme Court of Western Australia Court of Appeal asking that Alcoa s remaining tort claim for economic loss be dismissed or, alternatively, struck out. The hearing on appeal took place on April 10, 2013, and the parties await the Court of Appeal s ruling.

In the case captioned *Burrup Fertilisers Pty Ltd v. Apache Corporation, Apache Energy Limited, and Apache Northwest Pty Ltd,* Cause No. 2009-79834, in the District Court of Harris County, Texas, on March 22, 2013, Burrup Fertilisers agreed to dismiss its Texas lawsuit based on Apache Corporation s motion to dismiss on the ground of *forum non conveniens*. Accordingly, the District Court entered an agreed order dismissing Burrup Fertilisers Texas lawsuit on the ground of *forum non conveniens*. By its terms, the order of dismissal does not prevent Burrup Fertilisers from re-filing its lawsuit in the civil courts of Western Australia.

As noted in Apache s most recent Annual Report on Form 10-K for its 2012 fiscal year, other customers have threatened to file suit challenging the declaration of force majeure under their contracts. At least one third party that is not a customer has also threatened to file suit. In the event it is determined that the pipeline explosion was not a force majeure, Company subsidiaries believe that liquidated damages should be the extent of the damages under long-term contracts with such provisions. Approximately 90 percent of the natural gas volumes sold by Company subsidiaries under long-term contracts have liquidated damages provisions. The Company s subsidiaries share of contractual liquidated damages under the long-term contracts with such provisions would not be expected to exceed \$50 million AUD exclusive of interest. This is a reduction from the previous estimate of \$200 million AUD. No assurance can be given that customers and/or third parties would not assert claims in excess of contractual liquidated damages, and exposure related to such claims is not currently determinable. While an adverse judgment against Company subsidiaries (and the Company, in the case of the Burrup Fertilisers lawsuit) is possible, the Company and Company subsidiaries do not believe any such claims would have merit and plan to vigorously pursue their defenses against any such claims.

Breton Lawsuit

As more fully described in Note 8 of the financial statements in Apache s Annual Report on Form 10-K for its 2012 fiscal year, on October 29, 2012, plaintiffs filed an amended complaint in *Breton Energy, L.L.C. et al. v. Mariner Energy Resources, Inc., et al.*, Case 4:11-cv-03561, in the United States District Court for the Southern District of Texas, Houston Division, seeking compensation from defendants for allegedly depriving plaintiffs of rights to hydrocarbons in a reservoir described by plaintiffs as a common reservoir in West Cameron Blocks 171 and 172 offshore Louisiana in the Gulf of Mexico. Defendants have filed a motion to dismiss, which is pending. No other material change in the status of this matter has occurred since the filing of Apache s Annual Report on Form 10-K for its 2012 fiscal year.

Escheat Audits

As more fully described in Note 8 of the financial statements in Apache s Annual Report on Form 10-K for its 2012 fiscal year, the State of Delaware, Department of Finance, Division of Revenue (Unclaimed Property), has notified numerous companies, including Apache Corporation, that the State intends to examine its books and records and those of its subsidiaries and related entities to determine compliance with the Delaware Escheat Laws. The review is ongoing, and no material change in the status of this matter has occurred since the filing of Apache s Annual Report on Form 10-K for its 2012 fiscal year.

Burrup-Related Gas Supply Lawsuits

As more fully described in Note 8 of the financial statements in Apache s Annual Report on Form 10-K for its 2012 fiscal year, on May 19, 2011, a lawsuit captioned *Pankaj Oswal et al. v. Apache Corporation*, Cause No. 2011-30302, in the District Court of Harris County, Texas, was filed in which plaintiffs assert claims against the Company under the Australian Trade Practices Act. Following a hearing on March 22, 2013, the District Court on April 5, 2013, granted Apache Corporation s motion to dismiss on the ground of *forum non conveniens* and entered an order dismissing the Texas lawsuit. No other material change in the status of this matter has occurred since the filing of Apache s Annual Report on Form 10-K for its 2012 fiscal year.

No material change in the status of the case captioned *Radhika Oswal v. Australia and New Zealand Banking Group Limited* (ANZ) *et al.*, No. SCI 2011 4653, in the Supreme Court of Victoria, has occurred since the filing of Apache s Annual Report on Form 10-K for its 2012 fiscal year.

Concerning the action filed by Tap (Harriet) Pty Ltd (Tap) against Burrup Fertilisers Pty Ltd et al., Civ. 2329 of 2009, in the Supreme Court of Western Australia, no material change in the status of this matter has occurred since the filing of Apache s Annual Report on Form 10-K for its 2012 fiscal year.

Environmental Matters

As of March 31, 2013, the Company had an undiscounted reserve for environmental remediation of approximately \$100 million. The Company is not aware of any environmental claims existing as of March 31, 2013, that have not been provided for or would otherwise have a material impact on its financial position, results of operations, or liquidity. There can be no assurance, however, that current regulatory requirements will not change or past non-compliance with environmental laws will not be discovered on the Company s properties.

As more fully described in Note 8 of the financial statements in Apache s Annual Report on Form 10-K for its 2012 fiscal year, on May 25, 2011, a panel of the Bureau of Ocean Energy Management (BOEMRE, as it was then known) published a report dated May 23, 2011, and titled OCS G-2580, Vermilion Block 380 Platform A, Incidents of Noncompliance. The report concerned the BOEMRE s investigation of a fire on the Vermillion 380 A platform located in the Gulf of Mexico. Apache currently operates the platform, however, at the time of the incident Mariner Energy was the operator. On April 17, 2013, the Office of Hearings and Appeals, Interior Board of Land Appeals of the United States Department of the Interior, No. IBLA 2012-183, affirmed certain Incidents of Noncompliance issued by the Bureau of Safety and Environmental Enforcement arising out of Mariner Energy s operation of the Vermilion 380 platform. The Company is considering its options, including but not limited to, whether to appeal this determination. Civil penalties have not yet been assessed. No other material change in the status of this matter has occurred since the filing of Apache s Annual Report on Form 10-K for its 2012 fiscal year.

9. CAPITAL STOCK

Net Income per Common Share

A reconciliation of the components of basic and diluted net income per common share for the quarters ended March 31, 2013 and 2012 is presented in the table below.

	For the Quarter 2013				r Ended March 31, 2012			
	Income	Shares (In mi		Share s, except	Income per share	Shares amounts)	Per	Share
Basic:								
Income attributable to common stock	\$ 698	392	\$	1.78	\$ 778	385	\$	2.02
Effect of Dilutive Securities:								
Mandatory Convertible Preferred Stock	19	14			19	12		
Stock options and other		2				2		
Diluted:								
Income attributable to common stock, including assumed conversions	\$717	408	\$	1.76	\$ 797	399	\$	2.00

The diluted earnings per share calculation excludes options and restricted stock units that were anti-dilutive totaling 5.7 million and 2.9 million for the quarters ending March 31, 2013 and 2012, respectively.

Common and Preferred Stock Dividends

For the quarters ended March 31, 2013 and March 31, 2012, Apache paid \$67 million and \$58 million, respectively, in dividends on its common stock.

For each of the quarters ended March 31, 2013 and March 31, 2012, Apache paid \$19 million in dividends on its Series D Preferred Stock.

During the first quarter of 2013, Apache s Board of Directors approved an 18-percent increase for the regular quarterly cash dividend on the Company s common stock to \$0.20 per share. This increase applies to the dividend on common stock payable on May 22, 2013, to stockholders of record on April 22, 2013.

10. BUSINESS SEGMENT INFORMATION

Apache is engaged in a single line of business. Both domestically and internationally, the Company explores for, develops, and produces natural gas, crude oil and natural gas liquids. At March 31, 2013, the Company had production in six countries: the United States, Canada, Egypt, Australia, the United Kingdom (U.K.) North Sea, and Argentina. Apache also pursues exploration interests in other countries that may, over time, result in reportable discoveries and development opportunities. Financial information for each country is presented below:

	_	ited ates	Can	ada	Eg	ypt	Au			rth Sea ions)	Ar	gentina		her ational	Total

Operating Income (Loss) consists of oil and gas production revenues less depreciation, depletion and amortization, asset retirement obligation accretion, lease operating expenses, gathering and transportation costs, and taxes other than income. Argentina s operating loss for the first quarter ended March 31, 2013, includes additional depletion of \$65 million to write-down the carrying value of oil and gas properties. Canada s operating loss for the first quarter ended March 31, 2012, includes additional depletion of \$521 million to write-down the carrying value of oil and gas properties.

11. SUPPLEMENTAL GUARANTOR INFORMATION

In December 1999, Apache Finance Canada Corporation (Apache Finance Canada) issued approximately \$300 million of publicly-traded notes due in 2029. In May 2003, Apache Finance Canada issued an additional \$350 million of publicly-traded notes due in 2015. Both are fully and unconditionally guaranteed by Apache. The following condensed consolidating financial statements are provided as an alternative to filing separate financial statements.

Apache Finance Canada has been fully consolidated in Apache s consolidated financial statements. As such, these condensed consolidating financial statements should be read in conjunction with the financial statements of Apache Corporation and subsidiaries and notes thereto, of which this note is an integral part.

ITEM 2 MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Apache Corporation, a Delaware corporation formed in 1954, is an independent energy company that explores for, develops and produces natural gas, crude oil, and natural gas liquids. We currently have exploration and production interests in six countries: the U.S., Canada, Egypt, Australia, the United Kingdom (U.K.) North Sea, and Argentina. Apache also pursues exploration interests in other countries that may over time result in reportable discoveries and development opportunities.

This discussion relates to Apache Corporation and its consolidated subsidiaries and should be read in conjunction with our consolidated financial statements and accompanying notes included under Part I, Item 1, Financial Statements of this Quarterly Report on Form 10-Q, as well as our consolidated financial statements, accompanying notes and Management s Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on Form 10-K for our 2012 fiscal year.

Financial Overview

Apache reported first-quarter 2013 earnings of \$698 million, or \$1.76 per diluted common share, compared with \$778 million, or \$2.00 per share, in the first quarter of 2012. Apache s adjusted earnings, which exclude certain items impacting the comparability of results, were \$806 million, or \$2.02 per diluted common share, down from \$1.2 billion, or \$3.00 per share, in the prior-year quarter. Adjusted earnings is not a financial measure prepared in accordance with accounting principles generally accepted in the U.S. (GAAP). For a description of adjusted earnings and a reconciliation of adjusted earnings to income attributable to common stock, the most directly comparable GAAP financial measure, please see Non-GAAP Measures in this Item 2.

Oil and gas production revenues totaled \$4.1 billion, down 7 percent from our record \$4.5 billion in the first quarter of 2012, reflecting decreases in crude oil and natural gas realizations of 9 percent and 3 percent, respectively, from the prior year. The deterioration of commodity prices was partially offset by a 2 percent increase in equivalent daily production to 782 thousand barrels of oil equivalent per day (Mboe/d), driven by our liquids-focused drilling program in North America. Liquids production for the quarter averaged 416 Mboe/d, an increase of 9 percent from 381 Mboe/d in the comparative 2012 quarter. Crude oil accounted for 86 percent of our liquids production and 95 percent of the related revenues, illustrating crude oil s significance in our liquids profile.

Net cash provided by operating activities (operating cash flows or cash flows) totaled \$2.6 billion for the first quarter of 2013, up 31 percent from the prior-year period despite the volatile commodity price environment. The increase primarily reflects the impact of changes in working capital during the periods, partially offset by lower earnings in 2013. With our active drilling program and large-scale development projects currently in progress, we continually monitor the capital resources available to us. Operating cash flows are the Company s primary source of liquidity, although we may also elect to utilize available committed borrowing capacity, access to both debt and equity capital markets, or proceeds from the occasional sale of nonstrategic assets for all other liquidity needs.

The Company has announced plans to divest approximately \$4 billion of assets by year-end 2013. We intend to use initial proceeds of \$2 billion to reduce debt and enhance financial flexibility. On May 9, 2013, the Company announced that it intends to use additional proceeds to repurchase approximately \$2 billion of Apache common shares under a 30 million share repurchase program authorized by the Company s Board of Directors. The Company may buy shares from time to time on the open market, in privately negotiated transactions, or a combination of both. No shares have been repurchased as of the date of this filing, and the timing and amounts of any purchases will be at the discretion of Apache s management and will depend on a variety of factors including the stock price, corporate and regulatory requirements, and other market and economic conditions. Repurchased shares will be available for general corporate purposes.

Operational Developments

Apache has a significant producing asset base as well as large undeveloped acreage positions that provide a platform for organic growth through sustainable lower-risk drilling opportunities, balanced by higher-risk, higher-reward exploration. We are also continuing to advance several longer-term, individually significant development projects, as more fully discussed in our 2012 Annual Report on Form 10-K. Notable operational developments include:

United States

In the first quarter, the Central region saw production increase for the fourth consecutive quarter as we continue to ramp up activity across our nearly two million gross acres. Production was up 129 percent relative to the prior-year quarter as we realized the benefits of our active oil and liquids-rich drilling program and full integration of production from our Cordillera acquisition. During the quarter we operated an average of 25 drilling rigs, drilling 78 gross wells with 96 percent success.

On May 8, 2013, Apache announced results from wells drilled in the Tonkawa and Granite Wash formations of the Anadarko basin. Flow rates from the Company s first six Granite Wash wells and first seven Tonkawa wells drilled and producing in 2013 averaged 1,495 barrels of oil equivalent per day (boe/d) and 662 boe/d, respectively, in the initial 30 days of production. These rates represent significant improvements over rates for wells drilled in the plays a year ago. The Tonkawa wells averaged over 70 percent liquids production, while the Granite Wash wells averaged over 50 percent.

Our active drilling program in the Permian region during the first quarter of 2013 resulted in production increases of 20 percent relative to the first quarter of 2012. Over 50 percent of the region s production is crude oil and 17 percent is natural gas liquids (NGL), representing 21 percent of Apache s total liquids production for the first quarter of 2013.

On March 20, 2013, Apache was the apparent high bidder on nine blocks on the continental shelf and five deepwater blocks in the Gulf of Mexico (GOM). In the shelf, the Company will hold a 100-percent working interest on two of the leases and a 75-percent working interest in the remaining seven. In the deepwater, where leases were acquired near existing industry discoveries, Apache will hold a 50-percent working interest in each lease.

First quarter 2013 U.S. production represents 44 percent of Apache s total worldwide production, a 20-percent increase over the 37-percent share the U.S. provided in the first quarter of 2012. The strength of the U.S. drilling program in the Permian and Anadarko Basins has accelerated Apache s U.S. production growth.

Australia

On March 28, 2013, Apache announced that an Australian subsidiary and its partners have signed long-term sales and purchase agreements with Chubu Electric Power Company, Inc. for liquefied natural gas (LNG) from the Chevron-operated Wheatstone project in Western Australia. The Wheatstone partners have agreed to supply 1 million metric tons per annum (mtpa) of LNG for up to 20 years. Through its 13-percent share in the Wheatstone project, an Apache subsidiary will supply 0.13 mtpa from natural gas produced at the Julimar and Brunello fields.

Egypt

During the quarter, the Company reported that the Amoun NE-1X discovery on the Khalda Ridge complex tested at a combined rate of 3,186 barrels of oil per day (b/d) and condensate and 11 million cubic feet of gas per day (MMcf/d) from two zones in the Jurassic-aged upper and lower Safa formations. Several additional wells in the area are planned for 2013. The planned wells close proximity to production facilities is expected to expedite completion and startup of production.

Apache announced three new discoveries in the Western Desert during the quarter, extending the Company s production base to the northeast in the North Ras Qattara (NRQ) concession and to the southwest in the Siwa concession. The NRQ 3151-1X discovery well in the NRQ concession had the highest test-flow rate of the three discoveries at 1,625 b/d and 18.7 MMcf/d. This well established the deepest production to date in Egypt s Western Desert. Apache has a 70-percent operated interest in the North Ras Qattara concession and is planning for appraisal drilling later in 2013.

North Sea

On April 30, 2013, Apache announced that its first producing well, Tonto-1, in the Tonto oil field in the U.K. North Sea came on stream at an initial rate of 10.4 Mb/d. Tonto follows Maule and Bacchus as the third new oil field brought online by Apache in the Forties area within the last three years. Each of these three developments have qualified under the U.K. government small field allowance system, which provides economic incentives for operators to bring these discoveries into production.

Results of Operations

Oil and Gas Revenues

Oil and gas production revenues for the first quarter of 2013 totaled \$4.1 billion, a \$311 million decrease from the comparative 2012 quarter. Lower realized prices reduced first-quarter 2013 revenues by \$368 million, while higher production volumes increased revenues by \$57 million. The table below presents revenues by region and each region s percent contribution to total revenues for 2013 and 2012.

Total	28.78	(35%)	43.99

Reflects a per-barrel decrease of \$0.61 and \$2.03 from derivative hedging activities for the first quarter of 2013 and 2012, respectively.

Reflects a per-Mcf increase of \$0.05 and \$0.49 from derivative hedging activities for the first quarter of 2013 and 2012, respectively.

Crude oil revenues for the first quarter of 2013 totaled \$3.3 billion, a \$257 million decrease from the comparative 2012 quarter, despite increased volumes. A 9-percent decrease in average realized prices was the primary reason for the reduction. Crude oil accounted for 79 percent of oil and gas production revenues and 45 percent of worldwide production in the first quarter of 2013. Lower realized prices reduced first-quarter 2013 revenues by \$300 million compared to the prior-year quarter, while higher production volumes increased revenues by \$43 million.

Crude oil prices realized in the first quarter of 2013 averaged \$101.72 per barrel, compared with \$111.22 in the comparative prior-year quarter. International Dated Brent crudes and Heavy and Light Louisiana Sweet crudes from the Gulf Coast continue to be priced at a premium to WTI. We are realizing these premium prices on approximately 68 percent of our crude oil production. Our Egypt, Australia and North Sea regions, which comprise approximately 51 percent of our worldwide oil production, receive international Dated Brent pricing with first-quarter 2013 oil realizations averaging \$110.97 compared with first-quarter 2012 realizations of \$119.97. Our Gulf Coast regions, which comprise 17 percent of our worldwide oil production, had price realizations averaging \$111.42 per barrel, as compared to first-quarter 2012 realizations of \$113.63 per barrel.

⁽²⁾ Reflects a per-Mcf increase of \$0.05 and \$0.49 from derivative hedging activities for the first quarter of 2013 and 2012, respectively. Crude Oil Revenues

Worldwide production increased eight thousand five hundred barrels of oil per day from the first quarter of 2012 to 355.5 thousand barrels per day (Mb/d) in the first quarter of 2013, driven by increased U.S. production, partially offset by decreased international production. Central region production in the Anadarko Basin more than tripled compared to the prior-year period, reaching 20.5 Mb/d on production from properties added in the Cordillera acquisition and increased drilling activity. Production rose 11.4 Mb/d in the Permian region on increased drilling activity, primarily in the Deadwood, Spraberry, and Wolfcamp plays. Australia production decreased 10.4 Mb/d as a result of increased cyclone activity and natural decline from our Pyrenees and Van Gogh fields. Egypt gross production decreased 7 percent from the year-ago period on natural decline while net production was down 8 percent.

Natural Gas Revenues

Gas revenues for the first quarter of 2013 totaled \$735 million, down \$76 million from the first quarter of 2012. A 6-percent decrease in average production reduced natural gas revenues by \$54 million as compared to the prior-year quarter, while a 3-percent decline in average realized prices decreased revenues by \$22 million. Natural gas accounted for 18 percent of our oil and gas production revenues and 47 percent of our equivalent production during the first quarter of 2013.

Worldwide production decreased 136.2 MMcf/d between the periods on production declines in Canada and our international regions. Daily production in Canada was down 117.1 MMcf/d reflecting the impact of natural decline and lower gas-focused drilling and recompletion activity. Production in our Gulf of Mexico regions decreased 80.4 MMcf/d on natural decline, tempered by drilling and recompletion activity. Argentina production decreased 22.9 MMcf/d primarily on natural decline and transportation capacity limitations. North Sea production decreased 12.0 MMcf/d on natural decline of Beryl field assets. Egypt gross production increased 1 percent while net production decreased 3 percent, a product of the terms of our production sharing contracts. Australia production declined 9.9 MMcf/d on lower takes under our existing contractual arrangements, driven by maintenance turnarounds at Apache and offtaker s facilities. Central region production rose 111.2 MMcf/d on production from properties acquired in the Cordillera acquisition and increased drilling activity.

Operating Expenses

The table below presents a comparison of our expenses on an absolute dollar basis and a boe basis. Our discussion may reference expenses on a boe basis, on an absolute dollar basis or both, depending on their relevance.

	For	For the Quarter Ended March 31,		
	2013	2012	2013	2012
	(In mi	illions)	(Per	boe)
Depreciation, depletion and amortization:				
Oil and gas property and equipment				
Recurring	\$ 1,265	\$ 1,135	\$ 17.98	\$ 16.21
Additional	65	521	0.92	7.45
Other assets	105	84	1.49	1.20
Asset retirement obligation accretion	65	55	0.92	0.79
Lease operating costs	771	673	10.96	9.61
Gathering and transportation costs	74	77	1.06	1.10
Taxes other than income	242	257	3.43	3.67
General and administrative expense	116	128	1.65	1.82
Merger, acquisitions & transition		6		0.09
Financing costs, net	53	40	0.76	0.57
-				
Total	\$ 2,756	\$ 2,976	\$ 39.17	\$ 42.51

Depreciation, Depletion and Amortization (DD&A) The following table details the changes in recurring DD&A of oil and gas properties between the first quarters of 2013 and 2012:

	For the Quarter Ended March 31, (In millions)
2012 DD&A	\$ 1,135
Volume change	19
DD&A Rate change	111
-	
2013 DD&A	\$ 1,265

Oil and gas property recurring DD&A expense of \$1.3 billion in the first quarter of 2013 increased \$130 million compared to the prior-year quarter on an absolute dollar basis: \$111 million on additional costs and \$19 million from additional production. Our full-cost depletion rate

increased \$1.77 to \$17.98 per boe as costs to acquire, find, and develop reserves, which are significantly impacted by higher oil prices, exceeded our historical cost basis.

In addition, we recorded a \$65 million (\$42 million net of tax) non-cash write-down on the carrying value of our March 31, 2013, proved oil and gas property balances in Argentina. In 2012 we recorded a \$521 million (\$390 million net of tax) non-cash write-down on the carrying value of our March 31, 2012, proved oil and gas property balances in Canada. Under the full-cost method of accounting, the Company is required to review the carrying value of its proved oil and gas properties each quarter on a country-by-

country basis. Under these rules, capitalized costs of oil and gas properties, net of accumulated DD&A and deferred income taxes, may not exceed the present value of estimated future net cash flows from proved oil and gas reserves, net of related tax effects and discounted 10 percent per annum and adjusted for cash flow hedges. Estimated future net cash flows are calculated using end-of-period costs and an unweighted arithmetic average of commodity prices in effect on the first day of each of the previous 12 months, held flat for the life of the production, except where prices are defined by contractual arrangements. Additional write-downs in Argentina may occur given certain operational and economic conditions including our inability to extend existing concessions with economically viable terms.

Lease Operating Expenses (LOE) LOE increased \$98 million, or 15 percent, on an absolute dollar basis, for the quarter ended March 31, 2013, relative to the comparable period of 2012. On a per unit basis, LOE increased 14 percent to \$10.96 per boe for the first quarter of 2013, as compared to the same prior-year period. The following table identifies changes in Apache s LOE rate between the first quarter of 2013 and 2012.

For the Quarter Ended March 31,

	Per boe
2012 LOE	\$ 9.61
Repairs and maintenance	0.38
Workover costs	0.23
Labor and pumper costs	0.22
Non-operated property costs	0.08
Acquisitions ⁽¹⁾	(0.09)
Other	0.38
Other decreased production	0.15
2013 LOE	\$ 10.96

(1) Per-unit impact of acquisitions is shown net of associated production.

Gathering and Transportation Gathering and transportation costs totaled \$74 million in the first quarter of 2013, down \$3 million from the first quarter of 2012. On a per-unit basis, gathering and transportation costs of \$1.06 for the first quarter of 2013 were down 4 percent from the prior-year quarter. The following table presents gathering and transportation costs paid by Apache directly to third-party carriers for each of the periods presented:

	-	arter Ended ch 31,
	2013 (In n	2012 nillions)
Canada	\$ 40	\$ 44
U.S.	20	15
Egypt	9	10
North Sea	3	6
Argentina	2	2
Total Gathering and transportation	\$ 74	\$ 77

The U.S. costs for the first quarter of 2013 increased \$5 million as compared to the same prior-year period primarily as a result of increased production in the Central region from our acquisition of Cordillera. Canada s costs for the first quarter of 2013 decreased \$4 million as compared to the same prior-year period primarily from decreased activity in the region. North Sea costs for the first quarter of 2013 decreased \$3 million as compared to the prior-year period on fewer volumes transported from lower production and cost-sharing with partners in the Bacchus field, which commenced production in April 2012.

Taxes other than Income Taxes other than income totaled \$242 million for the first quarter of 2013, a decrease of \$15 million from the comparative prior-year period. The following table presents a comparison of these expenses:

		Quarter Ended arch 31,
	2013	2012
	(In	millions)
U.K. PRT	\$ 135	\$ 158
Severance taxes	52	55
Ad valorem taxes	33	28
Other	22	16
Total Taxes other than income	\$ 242	\$ 257

The North Sea Petroleum Revenue Tax (PRT) is assessed on qualifying fields in the U.K. North Sea. For the first quarter of 2013, U.K. PRT was \$23 million lower than the 2012 period based on a decrease in revenues as a result of lower production on qualifying fields during the first quarter. Ad valorem tax expense increased \$5 million on increased production from U.S. onshore fields.

General and Administrative Expenses General and administrative expenses (G&A) for the first quarter of 2013 decreased \$12 million from the comparable 2012 period on decreased corporate costs and business development activities.

Financing Costs, Net Financing costs incurred during the period comprised the following:

	-	For the Quarter Ended March 31,	
	2013	2012	
	(In a	nillions)	
Interest expense	\$ 148	\$ 108	
Amortization of deferred loan costs	2	1	
Capitalized interest	(93)	(66)	
Interest income	(4)	(3)	
	``		
Financing costs, net	\$ 53	\$ 40	

Net financing costs were up \$13 million in the first quarter of 2013 compared to the same 2012 period. The \$40 million increase in interest expense in the first quarter of 2013 is associated with \$5.0 billion of debt issued in 2012. The \$27 million increase in capitalized interest in the first quarter of 2013 is a direct result of higher unproved property balances from the Cordillera acquisition and U.S. leasing activities.

Provision for Income Taxes The Company estimates its annual effective income tax rate in recording its quarterly provision for income taxes in the various jurisdictions in which the Company operates. Statutory tax rate changes and other significant or unusual items are recognized as discrete items in the quarter in which they occur.

The 2013 first-quarter provision for income taxes was \$603 million, representing an effective income tax rate of 46 percent for the quarter compared to 49 percent during the 2012 period. The 2013 effective rate reflects the impact of valuation allowances in Canada and Argentina, and a \$65 million Argentinian non-cash oil and gas property write-down. The 2012 effective rate reflects the impact of a \$521 million Canadian non-cash oil and gas property write-down and foreign currency fluctuations on deferred taxes. Excluding these items, the first-quarter 2013 and 2012 effective rates would have both been 43 percent.

Capital Resources and Liquidity

Operating cash flows are the Company s primary source of liquidity. We may also elect to utilize available committed borrowing capacity, access to both debt and equity capital markets, or proceeds from the occasional sale of nonstrategic assets for all other liquidity and capital resource needs.

Apache s operating cash flows, both in the short-term and the long-term, are impacted by highly volatile oil and natural gas prices. Significant deterioration in commodity prices negatively impacts our revenues, earnings and cash flows, and potentially our liquidity if spending does not trend downward as well. Sales volumes and costs also impact cash flows; however, these historically have not been as volatile and have less impact than commodity prices in the short-term.

Apache s long-term operating cash flows are dependent on reserve replacement and the level of costs required for ongoing operations. Cash investments are required to fund activity necessary to offset the inherent declines in production and proven crude oil and natural gas reserves. Future success in maintaining and growing reserves and production is highly dependent on the success of our exploration and development activities and our ability to acquire additional reserves at reasonable costs.

We believe the liquidity and capital resource alternatives available to Apache, combined with internally generated cash flows, will be adequate to fund short-term and long-term operations, including our capital spending program, repayment of debt maturities, and any amount that may ultimately be paid in connection with contingencies. In addition, we have announced plans to divest approximately \$4 billion of assets in 2013. We intend to use initial proceeds of \$2 billion to reduce debt and enhance financial flexibility. On May 9, 2013, the Company announced that it intends to use additional proceeds to repurchase approximately \$2 billion of Apache common shares under a 30 million share repurchase program authorized by the Company s Board of Directors. The Company may buy shares from time to time on the open market, in privately negotiated transactions, or a combination of both. No shares have been repurchased as of the date of this filing, and the timing and amounts of any purchases will be at the discretion of Apache s management and will depend on a variety of factors including the stock price, corporate and regulatory requirements, and other market and economic conditions. Repurchased shares will be available for general corporate purposes.

For additional information, please see Part II, Item 1A, Risk Factors of this Form 10-Q and Part I, Items 1 and 2, Business and Properties, and Item 1A, Risk Factors Related to Our Business and Operations, in our Annual Report on Form 10-K for our 2012 fiscal year.

Sources and Uses of Cash

The following table presents the sources and uses of our cash and cash equivalents for the periods presented.

	For the Three Months Ended March 31,			
		2013 2012 (In millions)		
Sources of Cash and Cash Equivalents:		(222 22		
Net cash provided by operating activities	\$	2,621	\$	2,007
Proceeds from Kitimat LNG transaction, net		405

Acquisition of Yara Pilbara Holdings Pty Limited (YPHPL)				439
Acquisitions, other		148		200
Dividends		86		77
Other		47		36
		3,083		2,719
Decrease in cash and cash equivalents	\$	88	\$	(50)

Net Cash Provided by Operating Activities Cash flows are our primary source of capital and liquidity and are impacted, both in the short-term and the long-term, by volatile oil and natural gas prices. The factors in determining operating cash flow are largely the same as those that affect net earnings, with the exception of non-cash expenses such as DD&A, asset retirement obligation (ARO) accretion and deferred income tax expense, which affect earnings but do not affect cash flows.

Net cash provided by operating activities for the first three months of 2013 totaled \$2.6 billion, up \$614 million from the first three months of 2012. The increase primarily reflects changes in working capital during the period.

⁽¹⁾ The table presents capital expenditures on a cash basis; therefore, the amounts may differ from those discussed elsewhere in this document, which include accruals.

For a detailed discussion of commodity prices, production, and expenses, refer to the Results of Operations of this Item 2. For additional detail of changes in operating assets and liabilities, see the statement of consolidated cash flows in Item 1, Financial Statements of this Form 10-Q.

Kitimat Transaction In February 2013, Apache completed a transaction with Chevron Canada Limited (Chevron Canada) to build and operate the Kitimat LNG project and develop shale gas resources at the Liard and Horn River basins in British Columbia. Chevron Canada and Apache Canada are now each a 50-percent owner of the Kitimat LNG plant, the Pacific Trail Pipelines Limited Partnership (PTP), and 644,000 gross undeveloped acres in the Horn River and Liard basins. As part of the transaction, Apache Canada increased its ownership in the LNG plant and PTP pipeline from 40-percent, sold portions of its existing interests in Horn River and Liard, and purchased additional interests in Horn River. Chevron Canada will operate the LNG plant and pipeline while Apache Canada will continue to operate the upstream assets. Apache s net proceeds from the transaction were \$405 million.

Capital Expenditures We fund exploration and development (E&D) activities primarily through operating cash flows and budget capital expenditures based on projected cash flows. We routinely adjust our capital budget on a quarterly basis in response to changing market conditions and operating cash flow forecasts.

Historically, we have used a combination of operating cash flows, borrowings under lines of credit and the commercial paper program and, from time to time, issues of public debt or common stock to fund significant acquisitions.

The following table details capital expenditures for each country in which we do business:

		For the Three Months Ended March 31,		
	2013		2012	
	(.	In millions))	
E&D Costs:				
United States	\$ 1,26		794	
Canada	25	58	198	
North America	1,52	27	992	
Egypt	26	52	250	
Australia	22	25	78	
North Sea	17	7	196	
Argentina	3	33	84	
Other International		5	21	
International	70	02	629	
Worldwide E&D Costs	2,22	29	1,621	
Gathering Transmission and Processing Facilities (GTP):				
United States		.8	12	
Canada		80	44	
Egypt		.9	17	
Australia	18		172	
Argentina		2	4	
Total GTP Costs	24	19	249	
Asset Retirement Costs	13	34	109	
Capitalized Interest	ç	93	66	
Capital Expenditures, excluding acquisitions	2,70)5	2,045	
Acquisitions, including GTP	31		60	
Asset Retirement Costs - Acquired	5	53		
Total Capital Expenditures	\$ 3,06	58 \$	2,105	

Worldwide E&D expenditures for the first three months of 2013 totaled \$2.2 billion, or 38 percent above the first three months of 2012. E&D spending in North America, which was up 54 percent, totaled 69 percent of worldwide E&D spending. Expenditures in the U.S. increased 60 percent primarily on increased drilling activity in the Permian region, particularly in the Deadwood area, and in our Central region Anadarko basin where our active horizontal drilling program in the Granite Wash and Tonkawa plays continued to expand. E&D spending in Canada increased 30 percent from the prior year period as the region has continued to target oil and liquids-rich plays.

E&D expenditures outside of North America increased 12 percent when compared to the first three-months of 2012. Australian expenditures were up \$147 million as both exploration and development drilling continued with higher activity levels than the prior-year period. North Sea expenditures were down \$19 million driven by decreased Beryl field development activity, while Argentina expenditures were down \$51 million on decreased drilling activity.

We invested \$249 million in GTP in the first three months of 2013, consistent with prior year activity, with the majority related to activities associated with the Wheatstone project in Australia.

Equity Investment in YPHPL On January 31, 2012, a subsidiary of Apache Energy Limited completed the acquisition of a 49-percent interest in YPHPL (formerly Burrup Holdings Limited) for \$439 million, including working capital adjustments. The transaction was funded with debt. The investment in YPHPL is accounted for under the equity method of accounting, with the balance recorded as a component of Deferred charges and other in Apache's consolidated balance sheet and results of operations recorded as a component of Other under Revenues and Other in the Company's statement of consolidated operations.

Dividends For the three-month periods ended March 31, 2013 and 2012, the Company paid \$67 million and \$58 million, respectively, in dividends on its common stock. In each of the first three months of 2013 and 2012, the Company also paid \$19 million in dividends on its Series D Preferred Stock.

During the first quarter of 2013, Apache s Board of Directors approved an 18-percent increase for the regular quarterly cash dividend on the Company s common stock to \$0.20 per share. This increase applies to the dividend on common stock payable on May 22, 2013, to stockholders of record on April 22, 2013.

Liquidity

The following table presents a summary of our key financial indicators at the dates presented:

	,	,	
Cash and cash equivalents	\$ 248	\$ 160	
Total debt	12,479	12,345	
Shareholders equity	31,987	31,331	
Available committed borrowing capacity	2,681	2,811	
Floating-rate debt/total debt	6%	5%	
Percent of total debt-to-capitalization	28%	28%	

Cash and cash equivalents We had \$248 million in cash and cash equivalents as of March 31, 2013, compared to \$160 million at December 31, 2012. Approximately \$239 million of the cash was held by foreign subsidiaries, with the remaining \$9 million held by Apache Corporation and U.S. subsidiaries. The cash held by foreign subsidiaries is subject to additional U.S. income taxes if repatriated. Almost all of the cash is denominated in U.S. dollars and, at times, is invested in highly-liquid investment grade securities with maturities of three months or less at the time of purchase.

Debt As of March 31, 2013, outstanding debt, which consisted of notes, debentures, commercial paper, and uncommitted bank lines, totaled \$12.5 billion. Current debt includes \$500 million 5.25-percent notes due in April 2013 and \$400 million 6.00-percent notes due in September 2013 and \$94 million borrowed under uncommitted credit facilities and overdraft lines in the U.S., Canada, and Argentina. The notes due in April 2013 were repaid using our commercial paper program.

In April 2012 the Company issued \$400 million principal amount of senior unsecured 1.75-percent notes maturing April 15, 2017, \$1.1 billion principal amount of senior unsecured 3.25-percent notes maturing April 15, 2022, and \$1.5 billion principal amount of senior unsecured 4.75-percent notes maturing April 15, 2043. The notes are redeemable, as a whole or in part, at Apache s option, subject to a make-whole premium. We used the proceeds to fund the cash portion of the purchase price to acquire Cordillera, repay the \$400 million in aggregate principal amount of 6.25-percent notes that matured on April 15, 2012, and for general corporate purposes.

In December 2012 the Company issued \$1.2 billion principal amount of senior unsecured 2.625-percent notes maturing January 15, 2023, and \$800 million principal amount of senior unsecured 4.25-percent notes maturing January 15, 2044. The notes are redeemable, as a whole or in part, at Apache s option, subject to a make-whole premium. The Company used the proceeds to pay down commercial paper and for general corporate purposes.

Available committed borrowing capacity As of March 31, 2013, the Company had unsecured committed revolving syndicated bank credit facilities totaling \$3.3 billion, of which \$1.0 billion matures in August 2016 and \$2.3 billion matures in June 2017. The facilities consist of a \$1.7 billion facility and a \$1.0 billion facility in the U.S., a \$300 million facility in Australia, and a \$300 million facility in Canada. As of March 31, 2013, available borrowing capacity under the Company s credit facilities was \$2.7 billion. The Company s committed credit facilities are used to support Apache s commercial paper program.

The Company has available a \$3.0 billion commercial paper program, which generally enables Apache to borrow funds for up to 270 days at competitive interest rates. The commercial paper program is fully supported by available borrowing capacity under committed credit facilities. As of March 31, 2013, the Company had \$619 million in commercial paper outstanding, compared with \$489 million in commercial paper outstanding as of December 31, 2012.

The Company was in compliance with the terms of all credit facilities as of March 31, 2013.

Percent of total debt to-capitalization The Company s March 31, 2013 debt-to-capitalization ratio was 28 percent, unchanged from December 31, 2012.

Non-GAAP Measures

The Company makes reference to some measures in discussion of its financial and operating highlights that are not required by or presented in accordance with GAAP. Management uses these measures in assessing operating results and believes the presentation of these measures provides information useful in assessing the Company s financial condition and results of operations. These non-GAAP measures should not be considered as alternatives to GAAP measures and may be calculated differently from, and therefore may not be comparable to, similarly-titled measures used at other companies.

Adjusted Earnings

To assess the Company s operating trends and performance, management uses Adjusted Earnings, which is net income excluding certain items that management believes affect the comparability of operating results. Management believes this presentation may be useful to investors who follow the practice of some industry analysts who adjust reported company earnings for items that may obscure underlying fundamentals and trends. The reconciling items below are the types of items management excludes and believes are frequently excluded by analysts when evaluating the operating trends and comparability of the Company s results.

	For the Quarter Ended March 31,			
	:	2013	2	012
	(In ı	millions, ex	cept per sha	re data)
Income Attributable to Common Stock (GAAP)	\$	698	\$	778
Adjustments:				
Oil & gas property write-downs, net of tax ⁽¹⁾		42		390
Deferred tax adjustments		39		
Commodity derivative mark-to-market, net of tax ⁽²⁾		31		
Merger, acquisitions & transition, net of tax ⁽³⁾				3
Unrealized foreign currency fluctuation impact on deferred tax				
expense		(4)		7
Adjusted Earnings (Non-GAAP)	\$	806	\$	1,178
Net Income per Common Share Diluted (GAAP)	\$	1.76	\$	2.00
Adjustments:				
Oil & gas property write-downs, net of tax ⁽¹⁾		0.10		0.97
Deferred tax adjustments		0.10		
Commodity derivative mark-to-market, net of tax ⁽²⁾		0.07		
Merger, acquisitions & transition, net of tax ⁽³⁾				0.01
Unrealized foreign currency fluctuation impact on deferred tax				
expense		(0.01)		0.02
Adjusted Earnings Per Share Diluted (Non-GAAP)	\$	2.02	\$	3.00

A write-down of our Argentinian proved property balances of \$65 million pre-tax was recorded in the first quarter of 2013, for which a tax benefit of \$23 million was recognized. A write-down of our Canadian proved property balances of \$521 million pre-tax was recorded in the first quarter of 2012, for which a tax benefit of \$131 million was recognized. The tax effect was calculated utilizing the statutory rates in effect in each country.

⁽²⁾ Commodity derivative unrealized mark-to-market losses recorded in the first quarter of 2013, totaled \$48 million, for which a tax benefit of \$17 million was recognized.

⁽³⁾ Merger, acquisitions & transition costs recorded in the first quarter of 2012 totaled \$6 million pre-tax for which a tax benefit of \$3 million was recognized. The tax effect was calculated utilizing the statutory rates in effect in each country where costs were incurred.

ITEM 3 QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Commodity Risk

The Company s revenues, earnings, cash flow, capital investments and, ultimately, future rate of growth are highly dependent on the prices we receive for our crude oil, natural gas and NGLs, which have historically been very volatile because of unpredictable events such as economic growth or retraction, weather and political climate. Our average crude oil realizations decreased nine percent to \$101.72 per barrel in the first quarter of 2013 from \$111.22 per barrel in the comparable period of 2012. Our average natural gas price realizations declined 3 percent to \$3.72 per Mcf from \$3.82 per Mcf in the comparable period of 2012.

We periodically enter into derivative positions on a portion of our projected oil and natural gas production through a variety of financial and physical arrangements intended to manage fluctuations in cash flows resulting from changes in commodity prices. For the first quarter of 2013, financial derivatives on commodity prices covered approximately 2 percent of our natural gas production and approximately 41 percent of our crude oil production, compared with 13 percent and 15 percent, respectively, in the first quarter of 2012. Apache does not hold or issue derivative instruments for trading purposes.

On March 31, 2013, the Company had open natural gas derivatives in an asset position with a fair value of \$29 million. A 10-percent increase in natural gas prices would reduce the fair value by approximately \$5 million, while a 10-percent decrease in prices would increase the fair value by approximately \$5 million. The Company also had open oil derivatives in a liability position with a fair value of \$163 million. A 10-percent increase in oil prices would increase the liability by approximately \$389 million, while a 10-percent decrease in prices would move the derivatives to an asset position of \$214 million. These fair value changes assume volatility based on prevailing market parameters at March 31, 2013. See Note 3 Derivative Instruments and Hedging Activities of the Notes to Consolidated Financial Statements in Item 1 of this Form 10-Q for notional volumes and terms associated with the Company s derivative contracts.

Interest Rate Risk

The Company considers its interest rate risk exposure to be minimal as a result of fixing interest rates on approximately 94 percent of the Company s debt. At March 31, 2013, total debt included \$713 million of floating-rate debt. As a result, Apache s annual interest costs will fluctuate based on short-term interest rates on approximately 6 percent of our total debt outstanding at March 31, 2013. The impact on cash flow of a 10-percent change in the floating interest rate based on debt balances at March 31, 2013, would be approximately \$254,000 per quarter.

Foreign Currency Risk

The Company s cash flow stream relating to certain international operations is based on the U.S. dollar equivalent of cash flows measured in foreign currencies. In Australia, oil production is sold under U.S. dollar contracts, and gas production is sold under a combination of Australian dollar and U.S. dollar fixed-price contracts. Approximately half the costs incurred for Australian operations are paid in U.S. dollars. In Canada, oil and gas prices and costs, such as equipment rentals and services, are generally denominated in Canadian dollars but heavily influenced by U.S. markets. Our North Sea production is sold under U.S. dollar contracts, and the majority of costs incurred are paid in British pounds. In Egypt, all oil and gas production is sold under U.S. dollar contracts, and the majority of the costs incurred are denominated in U.S. dollars. Argentine revenues and expenditures are largely denominated in U.S. dollars but are converted into Argentine pesos at the time of payment. Revenue and disbursement transactions denominated in Australian dollars, Canadian dollars, British pounds, and Argentine pesos are converted to U.S. dollar equivalents based on average exchange rates during the period.

Foreign currency gains and losses also arise when monetary assets and monetary liabilities denominated in foreign currencies are translated at the end of each month. Currency gains and losses are included as either a component of Other under Revenues and Other or, as is the case when we re-measure our foreign tax liabilities, as a component of the Company s provision for income tax expense on the statement of consolidated operations. A 10-percent strengthening or weakening of the Australian dollar, Canadian dollar, British pound, and Argentine peso as of March 31, 2013, would result in a foreign currency net loss or gain, respectively, of approximately \$282 million.

Forward-Looking Statements and Risk

This report includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements other than statements of historical facts included or incorporated by reference in this report, including, without limitation, statements regarding our future financial position, business strategy, budgets, projected revenues, projected costs, and plans and objectives of management for future operations, are forward-looking statements. Such forward-looking statements are based on our examination of historical operating trends, the information that was used to prepare our estimate of proved reserves as of December 31, 2012, and other data in our possession or available from third parties. In addition, forward-looking statements generally can be identified by the use of forward-looking terminology such as may, will, could, expect, intend, project, estimate, anticipate, continue or similar terminology. Although we believe that the expectations reflected in such forward-looking statements are reasonable, we can give no assurance that such expectations will prove to have been correct. Important factors that could cause actual results to differ materially from our expectations include, but are not limited to, our assumptions about:

the market prices of oil, natural gas, NGLs and other products or services;
our commodity hedging arrangements;
the integration of acquisitions;
the supply and demand for oil, natural gas, NGLs and other products or services;
production and reserve levels;
drilling risks;
economic and competitive conditions;
the availability of capital resources;
capital expenditure and other contractual obligations;
currency exchange rates;
weather conditions;
inflation rates;
the availability of goods and services;

legislative or regulatory changes;
the impact on our operations due to the change in government in Egypt;
terrorism or cyber attacks;
occurrence of property acquisitions or divestitures;
the securities or capital markets and related risks such as general credit, liquidity, market, and interest-rate risks; and

other factors disclosed under Items 1 and 2 Business and Properties Estimated Proved Reserves and Future Net Cash Flows, Item 1A Risk Factors, Item 7 Management s Discussion and Analysis of Financial Condition and Results of Operations, Item 7A Quantitative and Qualitative Disclosures About Market Risk and elsewhere in our most recently filed Form 10-K, other risks and uncertainties in our first-quarter 2013 earnings release, other factors disclosed under Part II, Item 1A Risk Factors of this Form 10-Q, and other filings that we make with the Securities and Exchange Commission.

All subsequent written and oral forward-looking statements attributable to the Company, or persons acting on its behalf, are expressly qualified in their entirety by the cautionary statements. We assume no duty to update or revise our forward-looking statements based on changes in internal estimates or expectations or otherwise.

ITEM 4 CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

G. Steven Farris, the Company s Chairman and Chief Executive Officer, in his capacity as principal executive officer, and Thomas P. Chambers, the Company s Executive Vice President and Chief Financial Officer, in his capacity as principal financial officer, evaluated the effectiveness of our disclosure controls and procedures as of March 31, 2013, the end of the period covered by this report. Based on that evaluation and as of the date of that evaluation, these officers concluded that the Company s disclosure controls and procedures were effective, providing effective means to ensure that information we are required to disclose under applicable laws and regulations is recorded, processed, summarized and reported within the time periods specified in the SEC s rules and forms and communicated to our management, including our principal executive officer and principal financial officer, to allow timely decisions regarding required disclosure.

We periodically review the design and effectiveness of our disclosure controls, including compliance with various laws and regulations that apply to our operations both inside and outside the United States. We make modifications to improve the design and effectiveness of our disclosure controls, and may take other corrective action, if our reviews identify deficiencies or weaknesses in our controls.

Changes in Internal Control over Financial Reporting

There was no change in our internal controls over financial reporting during the period covered by this Quarterly Report on Form 10-Q that materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Please refer to both Part I, Item 3 of the Company s Annual Report on Form 10-K for the fiscal year ended December 31, 2012 (filed with the SEC on March 1, 2013) and Part I, Item 1 of this Quarterly Report on Form 10-Q for the fiscal quarter ended March 31, 2013 for a description of material legal proceedings.

ITEM 1A. RISK FACTORS

During the quarter ending March 31, 2013, there were no material changes from the risk factors as previously disclosed in the Company s Annual Report on Form 10-K for the year ended December 31, 2012.
