Notwithstanding the foregoing, in no event will the conversion rate per \$1,000 principal amount of 2021 Notes exceed 3.9597, subject to adjustment in the same manner as the conversion rate as set forth under Description of Notes Conversion Rights Conversion Rate Adjustments in the Preliminary Prospectus Supplement.

**Net Proceeds:**

The Issuer estimates that the net proceeds from the offering of the 2019 Notes and the 2021 Notes will be approximately \$1,968.9 million (or \$2,264.4 million if the underwriters' options to purchase additional 2019 Notes and 2021 Notes are exercised in full), after deducting underwriting discounts and commissions and estimated offering expenses payable by the Issuer.

The Issuer intends to use approximately \$186.3 million of the net proceeds from the offering to pay the cost of the convertible note hedge transactions entered into in connection with the offering (after such cost is partially offset by the proceeds to the Issuer from the warrant transactions described in Description of Convertible Note Hedge and Warrant Transactions in the Preliminary Prospectus Supplement). The Issuer intends to use the remaining net proceeds to accelerate the growth of its business in the U.S. and internationally, for the development and production of the Gen III mass market vehicle, the development of the Tesla Gigafactory and other general corporate purposes.

If the underwriters exercise their options to purchase additional 2019 Notes or 2021 Notes, the Issuer may sell additional warrants and use a portion of the net proceeds from the sale of the additional 2019 Notes or 2021 Notes, together with the proceeds from the additional warrants, to enter into additional convertible note hedge transactions and for general corporate purposes.

**Convertible Note Hedge  
Transactions and Warrant  
Transactions:**

In connection with the pricing of the 2019 Notes and the 2021 Notes, the Issuer has entered into privately negotiated convertible note hedge transactions with one or more of the underwriters or their respective affiliates or other financial institutions ( hedge counterparties ). The convertible note hedge transactions will cover, subject to customary anti-dilution adjustments, the number of shares of Common Stock that will

initially underlie the 2019 Notes and the 2021 Notes. The Issuer also has entered into warrant transactions with the hedge counterparties relating to the same number of shares of Common Stock, with a strike price of \$512.6562, with respect to the warrants relating to the 2019 Notes and a strike price of \$560.6388, with respect to the warrants relating to the 2021 Notes, in each case subject to customary anti-dilution adjustments.

The convertible note hedge transactions are expected to reduce potential dilution to Common Stock and/or offset potential cash payments the Issuer is required to make in excess of the principal amount upon any conversion of 2019 Notes and the 2021 Notes. However, the warrant transactions could separately have a dilutive effect to the extent that the market price per share of Common Stock exceeds the applicable strike price of the warrants on the applicable expiration dates.

If the underwriters exercise their option to purchase additional 2019 Notes or 2021 Notes, the Issuer may enter into additional convertible note hedge and warrant transactions.
