This report contains certain forward-looking statements within the meaning of the federal securities laws. These statements are not historical facts; rather, they are statements based on IF Bancorp, Inc.'s current expectations regarding its business strategies, intended results and future performance. Forward-looking statements are preceded by terms such as expects, believes, anticipates, intends and similar expressions.

Management's ability to predict results or the effect of future plans or strategies is inherently uncertain. Factors which could affect actual results include interest rate trends, the general economic climate in the market area in which IF Bancorp, Inc. operates, as well as nationwide, IF Bancorp, Inc.'s ability to control costs and expenses, competitive products and pricing, loan delinquency rates and changes in federal and state legislation and regulation. For further discussion of factors that may affect IF Bancorp Inc.'s financial condition and results of operations, see Item 1A. Risk Factors in this Annual Report on Form 10-K (Form 10-K). These factors should be considered in

evaluating the forward-looking statements and undue reliance should not be placed on such statements.

Table of Contents

PART I

ITEM 1. BUSINESS

General

IF Bancorp, Inc. (IF Bancorp or the Company) is a Maryland corporation formed in March 2011 to become the holding company for Iroquois Federal Savings and Loan Association (Iroquois Federal or the Association). On July 7, 2011, the Company completed its offering of common stock in connection with Iroquois Federal's mutual-to-stock conversion, selling 4,496,500 shares of common stock at \$10.00 per share, including 384,900 shares sold to Iroquois Federal's employee stock ownership plan with funds borrowed from IF Bancorp, and raising approximately \$45.0 million of gross proceeds. In addition, the Company issued 314,755 shares of its common stock to the Iroquois Federal Foundation.

The Company is primarily engaged in the business of directing, planning, and coordinating the business activities of Iroquois Federal. The Company's most significant asset is its investment in Iroquois Federal. At June 30, 2015 and 2014, we had consolidated assets of \$563.7 million and \$551.3 million, consolidated deposits of \$415.5 million and \$404.6 million and consolidated equity of \$80.4 million and \$82.1 million, respectively.

Iroquois Federal is a federally chartered savings association headquartered in Watseka, Illinois. The Association's business consists primarily of taking deposits from the general public and investing those deposits, together with funds generated from operations and borrowings, in one- to four-family residential mortgage loans, multi-family mortgage loans, commercial real estate loans (including farm loans), home equity lines of credit, commercial business loans, consumer loans (consisting primarily of automobile loans), and, to a much lesser extent, construction loans and land development loans. We also invest in securities, which historically have consisted primarily of securities issued by the U.S. government, U.S. government agencies and U.S. government-sponsored enterprises, as well as mortgage-backed securities issued or guaranteed by U.S. government-sponsored enterprises. To a lesser extent, we also invest in municipal obligations.

We offer a variety of deposit accounts, including statement savings accounts, certificates of deposit, money market accounts, commercial and regular checking accounts, individual retirement accounts and health savings accounts.

In addition to our traditional banking products and services, we offer a full line of property and casualty insurance products through Iroquois Federal's wholly-owned subsidiary, L.C.I. Service Corporation, an insurance agency with offices in Watseka and Danville, Illinois. We also offer annuities, mutual funds, individual and group retirement plans, life, disability and health insurance, individual securities, managed accounts and other financial services at all of our locations through Iroquois Financial, a division of Iroquois Federal. Raymond James Financial Services, Inc. serves as the broker-dealer for Iroquois Financial.

We are dedicated to offering alternative banking delivery systems, including ATMs, online banking, ACH payroll, remote capture and telephone banking delivery systems. We have recently added text message options to our mobile banking solutions and introduced mobile aps for the iPhone, iPad, Android and Android Tablet.

Available Information

IF Bancorp is a public company, and files interim, quarterly and annual reports with the Securities and Exchange Commission. These respective reports are on file and a matter of public record with the Securities and Exchange

Edgar Filing: IF Bancorp, Inc. - Form 10-K

Commission and may be read and copied at the Securities and Exchange Commission's Public Reference Room at 100 F Street, NE, Washington, DC 20549. The public may obtain information on the operation of the Public Reference Room by calling the Securities and Exchange Commission at 1-800-SEC-0330. The Securities and Exchange Commission maintains an Internet site that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC (<http://www.sec.gov>).

Table of Contents

IF Bancorp's executive offices are located at 201 East Cherry Street, Watseka, Illinois 60970. Our telephone number at this address is (815) 432-2476, and our website address is www.iroquoisfed.com. Information on our website should not be considered a part of this Form 10-K.

Market Area

We conduct our operations from our five full-service banking offices located in the municipalities of Watseka, Danville, Clifton, Hoopston and Savoy, Illinois and our loan production and wealth management office in Osage Beach, Missouri. Our primary lending market includes the Illinois counties of Vermilion, Iroquois and Champaign, as well as the adjacent counties in Illinois and Indiana. Our loan production and wealth management office in Osage Beach, Missouri, serves the Missouri counties of Camden, Miller and Morgan.

In recent years Iroquois and Vermilion Counties, our traditional primary market areas, have experienced negative growth, reflecting in part, the economic downturn. However, Champaign County, where our new Savoy branch is located, has experienced population growth. Future business and growth opportunities will be influenced by economic and demographic characteristics of our primary market area and of east central Illinois. According to data from the U.S. Census Bureau, Iroquois County had an estimated population of 29,000 in July 2014, a decrease of 2.8% since April 2010, and Vermilion County had an estimated population of 80,000 in July 2014, a decrease of 2.3% since April 2010, while Champaign County had an estimated population of 207,000 in July 2014, an increase of 3.0% since April 2010. However, unemployment rates in our primary market have decreased significantly over the last year. According to the Illinois Department of Employment Security, unemployment, on a non-seasonally adjusted basis, between June 2014 and June 2015, increased from 6.1% to 6.2% in Iroquois County, and decreased from 9.3% to 8.4% in Vermilion County and from 7.0% to 5.7% in Champaign County.

The economy in our primary market is fairly diversified, with employment in services, wholesale/retail trade, and government serving as the basis of the Iroquois County, Vermilion County and Champaign County economies. Manufacturing jobs, which tend to be higher paying jobs, are also a large source of employment in Vermilion and Champaign Counties, while Iroquois County is heavily influenced by agriculture and agriculture related businesses. Hospitals and other health care providers, local schools and trucking/distribution businesses also serve as major sources of employment.

Our Osage Beach, Missouri loan production and wealth management office is located in the Lake of the Ozarks region and serves the Missouri counties of Camden, Miller and Morgan. Once known primarily as a resort area, this market is becoming an area of permanent residences and a growing retirement community, providing an excellent market for mortgage loans and our wealth management and financial services business.

Competition

We face intense competition in our market area both in making loans and attracting deposits. We also compete with commercial banks, credit unions, savings institutions, mortgage brokerage firms, finance companies, mutual funds, insurance companies and investment banking firms. Some of our competitors have greater name recognition and market presence that benefit them in attracting customers, and offer certain services that we do not or cannot provide.

Our deposit sources are primarily concentrated in the communities surrounding our banking offices located in Iroquois and Vermilion Counties, Illinois. As of June 30, 2014, the latest date for which FDIC data is available, we ranked first of 13 bank and thrift institutions with offices in Iroquois County with a 24.50% deposit market share. As of the same date, we ranked first of 16 bank and thrift institutions with offices in Vermilion County with a 17.61% deposit market share and we ranked 30th of 31 bank and thrift institutions with offices in Champaign County, with a 0.07% deposit

market share.

Table of Contents

Lending Activities

Our principal lending activity is the origination of one- to four-family residential mortgage loans, multi-family loans, commercial real estate loans (including farm loans), home equity loans and lines of credit, commercial business loans, consumer loans (consisting primarily of automobile loans), and, to a much lesser extent, construction loans and land development loans.

In addition to loans originated by Iroquois Federal, our loan portfolio includes loan purchases which are secured by single family homes located primarily in the Midwest. As of June 30, 2015 and 2014, the amount of such loans equaled \$11.5 million and \$13.7 million, respectively. See [Loan Originations, Purchases, Sales, Participations and Servicing](#).

Our loan portfolio also includes commercial loan participations which are secured by both real estate and other business assets, primarily within 100 miles of our primary lending market. As of June 30, 2015 and 2014, the amount of such loans equaled \$27.8 million and \$24.8 million, respectively. See [Loan Originations, Purchases, Sales, Participations and Servicing](#).

The Association's legal lending limit to any one borrower is 15% of unimpaired capital and surplus. On July 30, 2012 our bank received approval from the Comptroller of the Currency to participate in the Supplemental Lending Limits Program (SLLP). This program allows eligible savings associations to make additional residential real estate loans or extensions of credit to one borrower, small business loans or extensions of credit to one borrower, or small farm loans or extensions of credit to one borrower, in the lesser of the following two amounts: (1) 10% of its capital and surplus; or (2) the percentage of capital and surplus, in excess of 15%, that a state bank is permitted to lend under the state lending limit that is available for loans secured by one- to four-family residential real estate loans, small business loans, small farm loans or unsecured loans in the state where the main office of the savings association is located. For Iroquois Federal this additional limit (or supplemental limit(s)) for one- to four-family residential real estate, small business, or small farm loans is 10% of Iroquois Federal's capital and surplus. In addition, the total outstanding amount of the Association's loans or extensions of credit or parts of loans and extensions of credit made to all of its borrowers under the SLLP may not exceed 100% of the Association's capital and surplus. By Association policy, participation of any credit facilities in the SLLP is to be infrequent and all credit facilities are to be with prior Board approval.

We originate a substantial portion of our fixed-rate one- to four-family residential mortgage loans for sale to the Federal Home Loan Bank of Chicago with servicing retained. Total loans sold under this program equaled approximately \$73.8 million and \$74.0 million as of June 30, 2015 and 2014, respectively. See [One- to Four-Family Residential Real Estate Lending](#) below for more information regarding the origination of loans for sale to the Federal Home Loan Bank of Chicago.

Table of Contents

Loan Portfolio Composition. The following table sets forth the composition of our loan portfolio, including loans held for sale, by type of loan at the dates indicated. Amounts shown for one- to four-family loans include loans held for sale of approximately \$93,000, \$313,000, \$492,000, \$179,000 and \$0 at June 30, 2015, 2014, 2013, 2012 and 2011, respectively.

Table of Contents

One- to Four-Family Residential Mortgage Loans. At June 30, 2015, \$145.1 million, or 40.2% of our total loan portfolio, consisted of one- to four-family residential mortgage loans. We offer residential mortgage loans that conform to Fannie Mae and Freddie Mac underwriting standards (conforming loans) as well as non-conforming loans. We generally underwrite our one- to four-family residential mortgage loans based on the applicant's employment and credit history and the appraised value of the subject property. We also offer loans through various agency programs, such as the Mortgage Partnership Finance Program of the Federal Home Loan Bank of Chicago, which are originated for sale.

We currently offer fixed-rate conventional mortgage loans with terms of up to 30 years that are fully amortizing with monthly loan payments. We also offer adjustable-rate mortgage loans that generally provide an initial fixed interest rate of one to seven years and annual interest rate adjustments thereafter, that amortize over a period up to 30 years. We offer one- to four-family residential mortgage loans with loan-to-value ratios up to 102%. Private mortgage insurance or participation in a government sponsored program is required for all one- to four-family residential mortgage loans with loan-to-value ratios exceeding 90%. One- to four-family residential mortgage loans with loan-to-value ratios above 80%, but below 90%, require private mortgage insurance unless waived by management. At June 30, 2015, fixed-rate one- to four-family residential mortgage loans totaled \$50.0 million, or 34.5% of our one- to four-family residential mortgage loans, and adjustable-rate one- to four-family residential mortgage loans totaled \$95.0 million, or 65.5% of our one- to four-family residential mortgage loans.

Our one- to four-family residential mortgage loans are generally conforming loans. We generally originate both fixed- and adjustable-rate mortgage loans in amounts up to the maximum conforming loan limits as established by the Federal Housing Finance Agency for Fannie Mae and Freddie Mac, which for our primary market area is currently \$417,000 for single-family homes. At June 30, 2015, our average one- to four-family residential mortgage loan had a principal balance of \$80,000. We also originate loans above the lending limit for conforming loans, which we refer to as jumbo loans. At June 30, 2015, \$29.4 million, or 20.3%, of our total one- to four-family residential loans had principal balances in excess of \$417,000. Most of our jumbo loans are originated with a seven-year fixed-rate term and a balloon payment, with up to a 30 year amortization schedule. Occasionally we will originate fixed-rate jumbo loans with terms of up to 15 years.

We actively monitor our interest rate risk position to determine the desirable level of investment in fixed-rate mortgage loans. In recent years there has been increased demand for long-term fixed-rate loans, as market rates have dropped and remained near historic lows. As a result, we have sold a substantial majority of our fixed-rate one- to four-family residential mortgage loans with terms of 15 years or greater. We sell fixed-rate residential mortgages to the Federal Home Loan Bank of Chicago, with servicing retained, under its Mortgage Partnership Finance Program. Since December 2008, we have sold loans to the Federal Home Loan Bank of Chicago under its Mortgage Partnership Finance Xtra Program. Total mortgages sold under this program were approximately \$10.1 million and \$7.8 million for the years ended June 30, 2015 and 2014, respectively. Generally, however, we retain in our portfolio fixed-rate one- to four-family residential mortgage loans with terms of less than 15 years, although this has represented a small percentage of the fixed-rate loans that we have originated in recent years due to the favorable long-term rates for borrowers.

We currently offer several types of adjustable-rate mortgage loans secured by residential properties with interest rates that are fixed for an initial period of one to seven years. We offer adjustable-rate mortgage loans that are fully amortizing. After the initial fixed period, the interest rate on adjustable-rate mortgage loans generally resets every year based upon the weekly average of a one-year U.S. Treasury Securities rate plus an applicable margin, subject to periodic and lifetime limitations on interest rate changes. The adjustable rate mortgage loans we are currently offering have a 2% maximum annual rate change up or down, and a 6% lifetime cap. In our portfolio are also adjustable rate mortgage loans with a 1% maximum annual rate change up or down, and a 5% lifetime cap up from the initial rate.

Interest rate changes are further limited by floors. After the initial fixed period, the interest rate will generally have a floor that is no less than 3.0% on the one and three year adjustable-rate mortgage loans, and no less than 4.0% on our five and seven year adjustable-rate mortgage loans.

Adjustable-rate mortgage loans generally present different credit risks than fixed-rate mortgage loans, primarily because the underlying debt service payments of the borrowers increase as interest rates increase, thereby increasing the potential for default and higher rates of delinquency. At the same time, the marketability of the underlying collateral may be adversely affected by higher interest rates. Since changes in the interest rates on

Table of Contents

adjustable-rate mortgages may be limited by an initial fixed-rate period or by the contractual limits on periodic interest rate adjustments, adjustable-rate loans may not adjust as quickly to increases in interest rates as our interest-bearing liabilities.

In addition to traditional one- to four-family residential mortgage loans, we offer home equity loans that are secured by a second mortgage on the borrower's primary or secondary residence. Home equity loans are generally underwritten using the same criteria that we use to underwrite one- to four-family residential mortgage loans. Home equity loans may be underwritten with a loan-to-value ratio of up to 90% when combined with the principal balance of the existing first mortgage loan. Our home equity loans are primarily originated with fixed rates of interest with terms of up to 10 years, fully amortized. At June 30, 2015, approximately \$1.2 million, or 0.3% of our one- to four-family mortgage loans were home equity loans secured by a second mortgage.

Home equity loans secured by second mortgages have greater risk than one- to four-family residential mortgage loans or home equity loans secured by first mortgages. We face the risk that the collateral will be insufficient to compensate us for loan losses and costs of foreclosure. When customers default on their loans, we attempt to foreclose on the property and resell the property as soon as possible to minimize foreclosure and carrying costs. However, the value of the collateral may not be sufficient to compensate us for the amount of the unpaid loan and we may be unsuccessful in recovering the remaining balance from those customers. Particularly with respect to our home equity loans, decreases in real estate values could adversely affect the value of property used as collateral for our loans.

We do not offer or purchase loans that provide for negative amortization of principal, such as Option ARM loans, where the borrower can pay less than the interest owed on the loan, resulting in an increased principal balance during the life of the loan.

We require title insurance on all of our one- to four-family residential mortgage loans, and we also require that borrowers maintain fire and extended coverage casualty insurance in an amount at least equal to the lesser of the loan balance or the replacement cost of the improvements. We also require flood insurance, as applicable. We do not conduct environmental testing on residential mortgage loans unless specific concerns for hazards are identified by the appraiser used in connection with the origination of the loan.

Commercial Real Estate and Multi-family Real Estate Loans. At June 30, 2015, \$103.6 million, or 28.7% of our loan portfolio consisted of commercial real estate loans, and \$58.4 million, or 16.2% of our loan portfolio consisted of multi-family (which we consider to be five or more units) residential real estate loans. At June 30, 2015, substantially all of our commercial real estate and multi-family real estate loans were secured by properties located in Illinois, Indiana, and Missouri.

Our commercial real estate mortgage loans are primarily secured by office buildings, owner-occupied businesses, retail rentals, churches, and farm loans secured by real estate. At June 30, 2015, loans secured by commercial real estate had an average loan balance of \$469,000. We originate commercial real estate loans with balloon and adjustable rates of up to seven years with amortization up to 25 years. At June 30, 2015, \$30.5 million or 29.4% of our commercial real estate loans had adjustable rates. The rates on our adjustable-rate commercial real estate loans are generally based on the prime rate of interest plus an applicable margin, and generally have a specified floor.

We originate multi-family loans with balloon and adjustable rates for terms of up to seven years with amortization up to 25 years. At June 30, 2015, \$29.7 million or 50.9% of our multi-family loans had adjustable rates. The rates on our adjustable-rate multi-family loans are generally tied to the prime rate of interest plus or minus an applicable margin and generally have a specified floor.

In underwriting commercial real estate and multi-family real estate loans, we consider a number of factors, which include the projected net cash flow to the loan's debt service requirement (generally requiring a minimum ratio of 120%), the age and condition of the collateral, the financial resources and income level of the borrower and the borrower's experience in owning or managing similar properties. Commercial real estate and multi-family real estate loans are originated in amounts up to 80% of the appraised value or the purchase price of the property securing the loan, whichever is lower. Personal guarantees are typically obtained from commercial real estate and multi-family real estate borrowers. In addition, the borrower's financial information on such loans is monitored on an ongoing basis by requiring periodic financial statement updates.

Table of Contents

Commercial real estate and multi-family real estate loans generally carry higher interest rates and have shorter terms than one- to four-family residential mortgage loans. Commercial real estate and multi-family real estate loans, however, entail greater credit risks compared to the one- to four-family residential mortgage loans we originate, as they typically involve larger loan balances concentrated with single borrowers or groups of related borrowers. In addition, the payment of loans secured by income-producing properties typically depends on the successful operation of the property, as repayment of the loan generally is dependent, in large part, on sufficient income from the property to cover operating expenses and debt service. Changes in economic conditions that are not in the control of the borrower or lender could affect the value of the collateral for the loan or the future cash flow of the property. Additionally, any decline in real estate values may be more pronounced for commercial real estate and multi-family real estate than for one- to four-family residential properties.

At June 30, 2015, our largest commercial real estate loan had an outstanding balance of \$7.0 million, was secured by a commercial building, and was performing in accordance with its terms. At that date, our largest multi-family real estate loan had a balance of \$6.1 million, was secured by apartment buildings, and was performing in accordance with its terms.

Home Equity Lines of Credit. In addition to traditional one- to four-family residential mortgage loans and home equity loans, we offer home equity lines of credit that are secured by the borrower's primary or secondary residence. Home equity lines of credit are generally underwritten using the same criteria that we use to underwrite one- to four-family residential mortgage loans. Our home equity lines of credit are originated with either fixed or adjustable rates and may be underwritten with a loan-to-value ratio of up to 90% when combined with the principal balance of an existing first mortgage loan. Fixed-rate lines of credit are generally based on the prime rate of interest plus an applicable margin and have monthly payments of 1.5% of the outstanding balance. Adjustable-rate home equity lines of credit are based on the prime rate of interest plus or minus an applicable margin and require interest paid monthly. Both fixed and adjustable rate home equity lines of credit have balloon terms of five years. At June 30, 2015 we had \$7.7 million, or 2.1% of our total loan portfolio in home equity lines of credit. At that date we had \$5.4 million of undisbursed funds related to home equity lines of credit.

Home equity lines of credit secured by second mortgages have greater risk than one- to four-family residential mortgage loans secured by first mortgages. We face the risk that the collateral will be insufficient to compensate us for loan losses and costs of foreclosure. When customers default on their loans, we attempt to foreclose on the property and resell the property as soon as possible to minimize foreclosure and carrying costs. However, the value of the collateral may not be sufficient to compensate us for the amount of the unpaid loan and we may be unsuccessful in recovering the remaining balance from those customers. Particularly with respect to our home equity lines of credit, decreases in real estate values could adversely affect the value of property securing the loan.

Commercial Business Loans. We also originate commercial non-mortgage business (term) loans and adjustable lines of credit. At June 30, 2015, we had \$ 37.2 million of commercial business loans outstanding, representing 10.3% of our total loan portfolio. At that date, we also had \$17.1 million of unfunded commitments on such loans. These loans are generally originated to small- and medium-sized companies in our primary market area. Our commercial business loans are generally used for working capital purposes or for acquiring equipment, inventory or furniture, and are primarily secured by business assets other than real estate, such as business equipment and inventory, accounts receivable or stock. We also offer agriculture loans that are not secured by real estate.

In underwriting commercial business loans, we generally lend up to 80% of the appraised value or purchase price of the collateral securing the loan, whichever is lower. The commercial business loans that we offer have fixed interest rates or adjustable rates indexed to the prime rate of interest plus an applicable margin, and with terms ranging from one to seven years. Our commercial business loan portfolio consists primarily of secured loans. When making

commercial business loans, we consider the financial statements, lending history and debt service capabilities of the borrower (generally requiring a minimum ratio of 120%), the projected cash flows of the business and the value of the collateral, if any. Virtually all of our loans are guaranteed by the principals of the borrower.

Table of Contents

Commercial business loans generally have a greater credit risk than one- to four-family residential mortgage loans. Unlike residential mortgage loans, which generally are made on the basis of the borrower's ability to make repayment from his or her employment and other income, and which are secured by real property whose value tends to be more easily ascertainable, commercial business loans are of higher risk and typically are made on the basis of the borrower's ability to make repayment from the cash flow of the borrower's business. As a result, the availability of funds for the repayment of commercial business loans may be substantially dependent on the success of the business itself. Further, the collateral securing the loans may depreciate over time, may be difficult to appraise and may fluctuate in value based on the success of the business. We seek to minimize these risks through our underwriting standards.

At June 30, 2015, our largest commercial business loan outstanding was for \$3.6 million and was secured by business equipment and assets. At June 30, 2015, this loan was performing in accordance with its terms.

Construction Loans. We also originate construction loans for one- to four-family residential properties and commercial real estate properties, including multi-family properties. At June 30, 2015, \$987,000, or 0.3%, of our total loan portfolio, consisted of construction loans, which were secured by one- to four-family residential real estate, multi-family real estate properties and commercial real estate properties. At June 30, 2015, the unadvanced portion of these construction loans totaled \$516,000.

Construction loans for one- to four-family residential properties are originated with a maximum loan to value ratio of 85% and are generally interest-only loans during the construction period which typically does not exceed 12 months. After this time period, the loan converts to permanent, amortizing financing following the completion of construction. Construction loans for commercial real estate are made in accordance with a schedule reflecting the cost of construction, and are generally limited to an 80% loan-to-completed appraised value ratio. We generally require that a commitment for permanent financing be in place prior to closing the construction loan.

Construction financing generally involves greater credit risk than long-term financing on improved, owner-occupied real estate. Risk of loss on a construction loan depends largely upon the accuracy of the initial estimate of the value of the property at completion of construction compared to the estimated cost (including interest) of construction and other assumptions. If the estimate of construction cost is inaccurate, we may be required to advance additional funds beyond the amount originally committed in order to protect the value of the property.

Moreover, if the estimated value of the completed project is inaccurate, the borrower may hold a property with a value that is insufficient to assure full repayment of the construction loan upon the sale of the property. Construction loans also expose us to the risk that improvements will not be completed on time in accordance with specifications and projected costs. In addition, the ultimate sale or rental of the property may not occur as anticipated.

At June 30, 2015, all of the construction loans that we originated were for one- to four-family residential properties, multi-family real estate properties and commercial real estate properties. The largest of such construction loans at June 30, 2015 was for a one- to four-family residential property and had a principal balance of \$783,000. This loan was performing in accordance with its terms at June 30, 2015.

Loan Originations, Purchases, Participations, Sales and Servicing. Lending activities are conducted primarily by our loan personnel operating in each office. All loans that we originate are underwritten pursuant to our standard policies and procedures. In addition, our one- to four-family residential mortgage loans generally incorporate Fannie Mae, Freddie Mac or Federal Home Loan Bank of Chicago underwriting guidelines, as applicable. We originate both adjustable-rate and fixed-rate loans. Our ability to originate fixed- or adjustable-rate loans is dependent upon the relative customer demand for such loans, which is affected by current market interest rates as well as anticipated future market interest rates. Our loan origination and sales activity may be adversely affected by a rising interest rate

environment which typically results in decreased loan demand. Most of our commercial real estate and commercial business loans are generated by our internal business development efforts and referrals from professional contacts. Most of our originations of one- to four-family residential mortgage loans, consumer loans and home equity loans and lines of credit are generated by existing customers, referrals from realtors, residential home builders, walk-in business and from our website.

Table of Contents

Consistent with our interest rate risk strategy, in the low interest rate environment that has existed in recent years, we have sold on a servicing-released basis a substantial majority of the conforming, fixed-rate one- to four-family residential mortgage loans with maturities of 15 years or greater that we have originated.

From time to time, we purchase loan participations in commercial loans in which we are not the lead lender secured by real estate and other business assets, primarily within 100 miles of our primary lending area. In these circumstances, we follow our customary loan underwriting and approval policies. We have sufficient capital to take advantage of these opportunities to purchase loan participations, as well as strong relationships with other community banks in our primary market area and throughout Illinois that may desire to sell participations, and we may increase our purchases of participations in the future as a growth strategy. At June 30, 2015 and 2014, the amount of commercial loan participations totaled \$27.8 million and \$24.8 million, respectively, of which \$8.8 million and \$7.9 million, at June 30, 2015 and 2014 were outside our primary market area.

We sell a portion of our fixed-rate residential mortgage loans to the Federal Home Loan Bank of Chicago under its Mortgage Partnership Finance Xtra Program. We retain servicing on all loans sold under this program. During the years ended June 30, 2015 and 2014, we sold \$10.1 million and \$7.8 million of loans to the Federal Home Loan Bank of Chicago under the program. Prior to December 2008, we also retained some credit risk associated with loans sold to the Federal Home Loan Bank of Chicago. For additional information regarding retained risk associated with these loans, see Allowance for Loan Losses Other Credit Risk.

Loan Approval Procedures and Authority. Our lending activities follow written, non-discriminatory underwriting standards and loan origination procedures established by our Board of Directors. The loan approval process is intended to assess the borrower's ability to repay the loan and the value of the collateral that will secure the loan. To assess the borrower's ability to repay, we review the borrower's employment and credit history and information on the historical and projected income and expenses of the borrower. We will also evaluate a guarantor when a guarantee is provided as part of the loan.

Iroquois Federal's policies and loan approval limits are established by our Board of Directors. Our loan officers generally have authority to approve one- to four-family residential mortgage loans up to \$100,000, other secured loans up to \$50,000, and unsecured loans up to \$10,000. Managing Officers (those with designated loan approval authority) generally have authority to approve one- to four-family residential mortgage loans and other secured loans up to \$300,000, and unsecured loans up to \$100,000. In addition, any two individual officers may combine their loan authority limits to approve a loan. Our Loan Committee may approve one- to four-family residential mortgage loans, commercial real estate loans, multi-family real estate loans and land loans up to \$1,000,000 in aggregate loans or \$750,000 for individual loans, and unsecured loans up to \$300,000. All loans above these limits must be approved by the Operating Committee, consisting of the Chairman, and up to four other Board members.

We generally require appraisals from certified or licensed third party appraisers of all real property securing loans. When appraisals are ordered, they are done so through an agency independent of the Association or by staff independent of the loan approval process, in order to maintain a process free of any influence or pressure from any party that has an interest in the transaction.

Non-performing and Problem Assets

For all of our loans, once a loan is 15 days delinquent, a past due notice is mailed. Past due notices continue to be mailed monthly in the event the account is not brought current. Prior to the time a loan is 30 days past due, we attempt to contact the borrower by telephone. Thereafter we continue with follow-up calls. Generally, once a loan becomes 90 days delinquent, if no work-out efforts have been pursued, we commence the foreclosure or repossession process. A

summary report of all loans 90 days or more past due and all criticized and classified loans is provided monthly to our Board of Directors.

Loans are evaluated for non-accrual status when payment of principal and/or interest is 90 days or more past due. Loans are also placed on non-accrual status when it is determined collection of principal or interest is in doubt or if the collateral is in jeopardy. When loans are placed on non-accrual status, unpaid accrued interest is fully reversed, and further income is recognized only to the extent received and only after the loan is returned to accrual status. The loans are typically returned to accrual status if unpaid principal and interest are repaid so that the loan is current.

Table of Contents

Non-Performing Assets. The table below sets forth the amounts and categories of our non-performing assets at the dates indicated. At June 30, 2015, 2014, 2013, 2012 and 2011, we had troubled debt restructurings of approximately \$2.6 million, \$2.9 million, \$3.3 million, \$3.8 million and \$1.8 million, respectively. At the dates presented, we had no loans that were delinquent 120 days or greater and that were still accruing interest.

Table of Contents

For the years ended June 30, 2015 and 2014, gross interest income that would have been recorded had our non-accruing loans been current in accordance with their original terms was \$155,000 and \$183,000, respectively. We recognized no interest income on such loans for the years ended June 30, 2015 and 2014.

At June 30, 2015, our non-accrual loans totaled \$3.0 million. These non-accrual loans consisted primarily of thirty one- to four-family residential loans with aggregate principal balances totaling \$ 2.7 million and specific allowances of \$39,000, two commercial real estate loans with aggregate principal balances totaling \$46,000 and specific allowances of \$25,000, two multi-family loans with aggregate principal balances totaling \$240,000 with no specific allowances, one commercial business loan with a principal balance of \$21,000 and no specific allowance, and two consumer loans with aggregate principal balances totaling \$14,000 and specific allowances of \$8,000.

Troubled Debt Restructurings. Troubled debt restructurings are defined under ASC 310-40 to include loans for which either a portion of interest or principal has been forgiven, or for loans modified at interest rates or on terms materially less favorable than current market rates. We periodically modify loans to extend the term or make other concessions to help borrowers stay current on their loans and to avoid foreclosure. At June 30, 2015 and 2014, we had \$2.6 million and \$2.9 million, respectively, of troubled debt restructurings. At June 30, 2015 our troubled debt restructurings consisted of \$1.3 million of residential one- to four-family mortgage loans, \$21,000 of commercial business loans, \$1.3 million of multi-family real estate loans, \$12,000 of commercial real estate loans, and \$8,000 of home equity line of credit loans, all of which were impaired.

For the years ended June 30, 2015 and 2014, gross interest income that would have been recorded had our troubled debt restructurings been performing in accordance with their original terms was \$54,000 and \$35,000, respectively. We recognized interest income of \$97,000 and \$106,000 on such modified loans for the years ended June 30, 2015 and 2014, respectively.

Table of Contents

Total delinquent loans increased by \$419,000 to \$3.2 million at June 30, 2015 from \$2.8 million at June 30, 2014. The increase in delinquent loans was due primarily to an increase of \$779,000 in one- to four-family loans delinquent 90 days or more, partially offset by a decrease of \$152,000 in one- to four-family loans delinquent 60 to 89 days, and a decrease of \$212,000 in commercial real estate loans delinquent 60 to 89 days.

Real Estate Owned and Foreclosed Assets. Real estate acquired by us as a result of foreclosure or by deed in lieu of foreclosure is classified as real estate owned. When property is acquired it is recorded at fair value less cost to sell at the date of foreclosure, establishing a new cost basis. Estimated fair value generally represents the sale price a buyer would be willing to pay on the basis of current market conditions, including normal terms from other financial institutions, less the estimated costs to sell the property. Holding costs and declines in fair value result in charges to expense after acquisition. In addition, we could repossess certain collateral, including automobiles and other titled vehicles, called other repossessed assets. At June 30, 2015, we had \$50,000 in foreclosed assets compared to \$436,000 as of June 30, 2014. Foreclosed assets at June 30, 2015, consisted of \$50,000 in residential real estate property, while foreclosed assets at June 30, 2014, consisted of \$416,000 in residential real estate properties and \$20,000 in commercial real estate.

Classification of Assets. Our policies, consistent with regulatory guidelines, provide for the classification of loans and other assets that are considered to be of lesser quality as substandard, doubtful, or loss assets. An asset is considered substandard if it is inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Substandard assets include those assets characterized by the distinct possibility that we will sustain some loss if the deficiencies are not corrected. Assets classified as doubtful have all of the weaknesses inherent in those classified substandard with the added characteristic that the weaknesses present make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. Assets (or portions of assets) classified as loss are those considered uncollectible and of such little value that their continuance as assets is not warranted. Assets that do not expose us to risk sufficient to warrant classification in one of the aforementioned categories, but which possess potential weaknesses that deserve our close attention, are required to be designated as watch.

When we classify assets as either substandard or doubtful, we undertake an impairment analysis which may result in allocating a portion of our general loss allowances to a specific allowance for such assets as we deem prudent. The allowance for loan losses is the amount estimated by management as necessary to absorb credit losses incurred in the loan portfolio that are both probable and reasonably estimable at the balance sheet date. When we classify a problem asset as loss, we charge off the asset. For other classified assets, we provide a specific allowance for that portion of the asset that is considered uncollectible. Our determination as to the classification of our assets and the amount of our loss allowances are subject to review by our principal federal regulator, the Office of the Comptroller of the Currency, which can require that we establish additional loss allowances. We regularly review our asset portfolio to determine whether any assets require classification in accordance with applicable regulations.

The following table sets forth our amounts of classified assets, assets designated as watch and total criticized assets (classified assets and loans designated as watch) as of the date indicated. Amounts shown at June 30, 2015 and 2014, include approximately \$3.1 million and \$2.8 million of nonperforming loans, respectfully. The related specific valuation allowance in the allowance for loan losses for such nonperforming loans was \$83,000 and \$177,000 at June 30, 2015 and 2014, respectively. Substandard assets shown include foreclosed assets.

At June 30,
2015 2014

| | (In thousands) | |
|-------------------------|-----------------------|-----------|
| Classified assets: | | |
| Substandard | \$ 6,492 | \$ 7,564 |
| Doubtful | | |
| Loss | | |
| Total classified assets | 6,492 | 7,564 |
| Watch | 2,753 | 2,619 |
| Total criticized assets | \$ 9,245 | \$ 10,183 |

At June 30, 2015, substandard assets consisted of \$2.8 million of one- to four-family residential mortgage loans, \$240,000 in multi-family loans, \$3.4 million of commercial real estate loans, \$8,000 in home equity lines of credit loans, \$21,000 of commercial business loans, \$21,000 of consumer loans, and \$50,000 of real estate owned.

Table of Contents

At June 30, 2015, watch assets consisted of \$759,000 of one- to four-family residential mortgage loans, \$170,000 of multi-family loans, \$748,000 of commercial real estate loans and \$1.1 million in commercial business loans. At June 30, 2015, no assets were classified as doubtful or loss.

Other Loans of Concern. At June 30, 2015, there were no other loans or other assets that are not disclosed in the text or tables above where known information about the possible credit problems of borrowers caused us to have serious doubts as to the ability of the borrowers to comply with present loan repayment terms and which may result in disclosure of such loans in the future.

Other Credit Risk. We also have some credit risk associated with fixed-rate residential loans that we sold to the Federal Home Loan Bank of Chicago prior to December 2008 under its Mortgage Partnership Finance Program (MPFP). However, while we retain the servicing of these loans and receive both service fees and credit enhancement fees, they are not our assets. We continue to service approximately \$6.1 million of these loans, for which our maximum potential credit risk is approximately \$206,000. From June 2000 to June 30, 2015, we experienced only \$91,000 in actual losses under the MPFP. Loans that we have sold to the Federal Home Loan Bank of Chicago since December 2008 are sold under its Mortgage Partnership Finance Xtra Program, rather than the MPFP. Unlike loans sold under the MPFP, we do not retain any credit risk with respect to loans sold under the Mortgage Partnership Finance Xtra Program.

Allowance for Loan Losses

The allowance for loan losses represents one of the most significant estimates within our financial statements and regulatory reporting. Because of this, we have developed, maintained, and documented a comprehensive, systematic, and consistently applied process for determining the allowance for loan losses, in accordance with GAAP, our stated policies and procedures, management's best judgment and relevant supervisory guidance.

Our allowance for loan losses is the amount considered necessary to reflect probable incurred losses in our loan portfolio. We evaluate the need to establish allowances against losses on loans on a quarterly basis, and more frequently if warranted. We analyze the collectability of loans held for investment and maintain an allowance that is appropriate and determined in accordance with GAAP. When additional allowances are necessary, a provision for loan losses is charged to earnings.

Our methodology for assessing the appropriateness of the allowance for loan losses consists of two key elements: (1) specific allowances for estimated credit losses on individual loans that are determined to be impaired through our review for identified problem loans; and (2) a general allowance based on estimated credit losses inherent in the remainder of the loan portfolio.

In performing the allowance for loan loss review, we have divided our credit portfolio into several separate homogeneous and non-homogeneous categories within the following groups:

Mortgage Loans: one- to four-family residential first lien loans originated by Iroquois Federal; one- to four-family residential first lien loans purchased from a separate origination company; one- to four-family residential junior lien loans; home equity lines of credit; multi-family residential loans on properties with five or more units; non-residential real estate loans; and loans on land under current development or for future development.

Edgar Filing: IF Bancorp, Inc. - Form 10-K

Consumer Loans (unsecured or secured by other than real estate): loans secured by deposit accounts; loans for home improvement; educational loans; automobile loans; mobile home loans; loans on other security; and unsecured loans.

Commercial Loans (unsecured or secured by other than real estate): secured loans and unsecured loans.

Table of Contents

Determination of Specific Allowances for Identified Problem Loans. We establish a specific allowance when loans are determined to be impaired. Loss is measured by determining the present value of expected future cash flows, the loan's observable market value, or, for collateral-dependant loans, the fair value of the collateral adjusted for market conditions and selling expenses. Factors used in identifying a specific problem loan include: (1) the strength of the customer's personal or business cash flows; (2) the availability of other sources of repayment; (3) the amount due or past due; (4) the type and value of collateral; (5) the strength of our collateral position; (6) the estimated cost to sell the collateral; and (7) the borrower's effort to cure the delinquency. In addition, for loans secured by real estate, we consider the extent of any past due and unpaid property taxes applicable to the property serving as collateral on the mortgage.

Determination of General Allowance for Remainder of the Loan Portfolio. We establish a general allowance for loans that are not deemed impaired to recognize the inherent losses associated with lending activities, but which, unlike specific allowances, has not been allocated to particular problem assets. This general valuation allowance is determined by segregating the loans by loan category and assigning allowance percentages based on our historical loss experience, delinquency trends and management's evaluation of the collectability of the loan portfolio. The allowance is then adjusted for significant factors that, in management's judgment, affect the collectability of the portfolio as of the evaluation date. These significant factors may include: (1) Management's assumptions regarding the minimal level of risk for a given loan category and includes amounts for anticipated losses which may not be reflected in our current loss history experience; (2) changes in lending policies and procedures, including changes in underwriting standards, and charge-off and recovery practices not considered elsewhere in estimating credit losses; (3) changes in international, national, regional and local economics and business conditions and developments that affect the collectability of the portfolio, including the conditions of various market segments; (4) changes in the nature and volume of the portfolio and in the terms of loans; (5) changes in the experience, ability, and depth of the lending officers and other relevant staff; (6) changes in the volume and severity of past due loans, the volume of non-accrual loans, and the volume and severity of adversely classified loans; (7) changes in the quality of the loan review system; (8) changes in the value of the underlying collateral for collateral-dependant loans; (9) the existence and effect of any concentrations of credit, and changes in the level of such concentrations; and (10) the effect of other external factors such as competition and legal and regulatory requirements on the level of estimated credit losses in the existing portfolio. The applied loss factors are re-evaluated quarterly to ensure their relevance in the current environment.

Although our policy allows for a general valuation allowance on certain smaller-balance, homogenous pools of loans classified as substandard, we have historically evaluated every loan classified as substandard, regardless of size, for impairment as part of our review for establishing specific allowances. Our policy also allows for a general valuation allowance on certain smaller-balance, homogenous pools of loans which are loans criticized as special mention or watch. A separate general allowance calculation is made on these loans based on historical measured weakness, and which is no less than twice the amount of general allowances calculated on our non-classified loans.

In addition, as an integral part of their examination process, the Office of the Comptroller of the Currency will periodically review our allowance for loan losses. Such agency may require that we recognize additions to the allowance based on their judgments of information available to them at the time of their examination.

We periodically evaluate the carrying value of loans and the allowance is adjusted accordingly. While we use the best information available to make evaluations, future adjustments to the allowance may be necessary if conditions differ substantially from the information used in making the evaluations.

The accrual of interest on loans is discontinued at the time the loan is 90 days delinquent unless the credit is well secured and in the process of collection. Loans are placed on nonaccrual status or charged off at an earlier date if collection of principal or interest is considered doubtful.

All interest accrued but not collected for loans, including troubled debt restructurings, that are placed on nonaccrual status or charged off is reversed against interest income. The interest on these loans is accounted for on the cash-basis or cost-recovery method, until qualifying for return to accrual. Generally, loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Table of Contents

The allowance for loan losses increased \$253,000 to \$4.2 million at June 30, 2015, from \$4.0 million at June 30, 2014. The increase was a result of an increase in outstanding loans and was necessary in order to bring the allowance for loan losses to a level that reflects management's estimate of the probable loss in the Company's loan portfolio at June 30, 2015.

As noted above, in its quarterly evaluation of the adequacy of its allowance for loan losses, the Company employs historical data including past due percentages, charge-offs, and recoveries. The Company's allowance methodology weights the most recent twelve-quarter period's net charge-offs and uses this information as one of the primary factors for evaluation of allowance adequacy. The most recent four-quarter net charge-offs are given a higher weight of 50%, while quarters 5-8 are given a 30% weight and quarters 9-12 are given only a 20% weight. The average net charge-offs in each period are calculated as net charge-offs by portfolio type for the period as a percentage of the quarter end balance of respective portfolio type over the same period. As the Company and the industry have seen increases in loan defaults in the past several years, the Company believes that it is prudent to emphasize more recent historical factors in the allowance evaluation.

The following table sets forth the Company's weighted average historical net charge-offs as of June 30, 2015, and June 30, 2014:

| Portfolio segment | June 30, 2015 Net charge-offs 12 quarter weighted historical | June 30, 2014 Net charge-offs 12 quarter weighted historical |
|--------------------------|---|---|
| Real Estate: | | |
| One- to four-family | .01% | .04% |
| Multi-family | (.09)% | % |
| Commercial | .02% | .06% |
| HELOC | .15% | .26% |
| Construction | % | % |
| Commercial business | .13% | .25% |
| Consumer | (.04)% | .25% |
| Entire portfolio total | % | .06% |

Additionally, in its quarterly evaluation of the adequacy of the allowance for loan losses, the Company evaluates changes in financial conditions of individual borrowers; changes in local, regional, and national economic conditions; the Company's historical loss experience; and changes in market conditions for property pledged to the Company as collateral. As noted above, the Company has identified specific qualitative factors that address these issues and assigns a percentage to each factor based on management's judgement. The qualitative factors are applied to the allowance for loan losses based upon the following percentages by loan type:

| Portfolio segment | Qualitative factor applied at June 30, 2015 | Qualitative factor applied at June 30, 2014 |
|--------------------------|--|--|
| Real Estate: | | |
| One- to four-family | .81% | .81% |
| Multi-family | 1.54% | 1.40% |
| Commercial | 1.23% | 1.14% |

Edgar Filing: IF Bancorp, Inc. - Form 10-K

| | | |
|------------------------|-------|-------|
| HELOC | .95% | .89% |
| Construction | .65% | .65% |
| Commercial business | 1.87% | 2.10% |
| Consumer | .94% | .62% |
| Entire portfolio total | 1.15% | 1.07% |

At June 30, 2015, the amount of our allowance for loan losses attributable to these qualitative factors was approximately \$4.2 million, as compared to \$3.6 million at June 30, 2014. The general increase in qualitative factors was attributable primarily to significant loan growth from 2014 to 2015.

Table of Contents

While management believes that our asset quality remains strong, it recognizes that, due to the continued growth in the loan portfolio, the increase in troubled debt restructurings and the potential changes in market conditions, our level of nonperforming assets and resulting charges-offs may fluctuate. Higher levels of net charge-offs requiring additional provisions for loan losses could result. Although management uses the best information available, the level of the allowance for loan losses remains an estimate that is subject to significant judgment and short-term change.

The following table sets forth activity in our allowance for loan losses at and for the periods indicated.

| | At or For the Fiscal Years Ended June 30, | | | | |
|--|--|-------------|-------------|-------------|-------------|

(1) Includes home equity loans.

Net charge-offs decreased from \$482,000 for the year ended June 30, 2014 to \$207,000 for the year ended June 30, 2015, with most of the charge-offs during both periods involving one- to four-family residential real estate loans and consumer loans. In addition, non-performing loans increased by \$301,000 during the year ended June 30, 2015.

The allowance for loan losses increased \$253,000, or 6.4%, to \$4.2 million at June 30, 2015 from \$4.0 million at June 30, 2014. The increase was based on the amount in charge-offs, an increase in the loan portfolio and the change in loan portfolio composition. At June 30, 2015, the allowance for loan losses represented 1.17% of total loans compared to 1.18% of total loans at June 30, 2014.

Investments

We conduct investment transactions in accordance with our Board-approved investment policy. The investment policy is reviewed at least annually by the Budget and Investment Committee of the Board, and any changes to the policy are subject to ratification by the full Board of Directors. This policy dictates that investment decisions give consideration to the safety of the investment, liquidity requirements, potential returns, the ability to

Table of Contents

provide collateral for pledging requirements, minimizing exposure to credit risk, potential returns and consistency with our interest rate risk management strategy. Authority to make investments under approved guidelines is delegated to our Investment Committee, comprised of our President and Chief Executive Officer, our Senior Executive Vice President and Chief Financial Officer, our Senior Executive Vice President and Chief Operating Officer, and our Executive Vice President and Watseka Community President. All investments are reported to the Board of Directors for ratification at the next regular Board meeting.

Our current investment policy permits us to invest only in investment quality securities permitted by Office of the Comptroller of the Currency regulations, including U.S. Treasury or Government guaranteed securities, U.S. Government agency securities, securities issued or guaranteed by Fannie Mae, Freddie Mac and Ginnie Mae, bank-qualified municipal securities, bank-qualified money market instruments, and bank-qualified corporate bonds. We do not engage in speculative trading. As of June 30, 2015, we held no asset-backed securities other than mortgage-backed securities. As a federal savings and loan association, Iroquois Federal is generally not permitted to invest in equity securities, although this general restriction will not apply to IF Bancorp, which may acquire up to 5% of voting securities of any company without regulatory approval.

ASC 320-10, Investment Debt and Equity Securities requires that, at the time of purchase, we designate a security as held to maturity, available-for-sale, or trading, depending on our ability and intent. Securities available for sale are reported at fair value, while securities held to maturity are reported at amortized cost. All of our securities are available for sale. We do not maintain a trading portfolio.

U.S. Government and Agency Debt Securities. While U.S. Government and federal agency securities generally provide lower yields than other investments, including mortgage-backed securities and interest-earning certificates of deposit, we maintain these investments, to the extent appropriate, for liquidity purposes and as collateral for borrowings.

Mortgage-Backed Securities. We invest in mortgage-backed securities insured or guaranteed by the U.S. Government or government sponsored enterprises. Mortgage-backed securities are created by pooling mortgages and issuing a security with an interest rate that is less than the interest rate on the underlying mortgages. Some securities pools are guaranteed as to payment of principal and interest to investors. Mortgage-backed securities generally yield less than the loans that underlie such securities because of the cost of payment guarantees and credit enhancements. However, mortgage-backed securities are more liquid than individual mortgage loans since there is an active trading market for such securities. In addition, mortgage-backed securities may be used to collateralize our specific liabilities and obligations. Finally, mortgage-backed securities are assigned lower risk weightings for purposes of calculating our risk-based capital level. Investments in mortgage-backed securities involve a risk that actual payments will be greater or less than the prepayment rate estimated at the time of purchase, which may require adjustments to the amortization of any premium or acceleration of any discount relating to such interests, thereby affecting the net yield on our securities. We periodically review current prepayment speeds to determine whether prepayment estimates require modification that could cause amortization or accretion adjustments.

Municipal Obligations. Iroquois Federal's investment policy allows it to purchase municipal securities of credit-worthy issuers, and does not permit it to invest more than 10% of Iroquois Federal's capital in the bonds of any single issuer. At June 30, 2015, we held \$3.9 million of municipal securities, all of which were issued by local governments and school districts within our market area.

Federal Home Loan Bank Stock. At June 30, 2015, we held \$5.4 million of Federal Home Loan Bank of Chicago common stock in connection with our borrowing activities totaling \$58.0 million. The common stock of the Federal Home Loan Bank is carried at cost and classified as a restricted equity security.

Bank-Owned Life Insurance. We invest in bank-owned life insurance to provide us with a funding source for our benefit plan obligations. Bank-owned life insurance also generally provides us noninterest income that is non-taxable. Federal regulations generally limit our investment in bank-owned life insurance to 25% of our Tier 1 capital plus our allowance for loan losses. At June 30, 2015, we had invested \$8.3 million in bank-owned life insurance, which was 11.9% of our Tier 1 capital plus our allowance for loan losses.

Table of Contents

Investment Securities Portfolio. The following table sets forth the composition of our investment securities portfolio at the dates indicated, excluding Federal Home Loan Bank of Chicago stock, federally insured interest-earning time deposits and bank-owned life insurance. As of June 30, 2015, 2014 and 2013 all of such securities were classified as available for sale.

Table of Contents**Sources of Funds**

General. Deposits traditionally have been our primary source of funds for our lending and investment activities. We also borrow from the Federal Home Loan Bank of Chicago, to supplement cash flow needs, to lengthen the maturities of liabilities for interest rate risk management purposes and to manage our cost of funds. Our additional sources of funds are the proceeds from the sale of loans originated for sale, scheduled loan payments, maturing investments, loan prepayments, retained earnings and income on other earning assets.

Deposits. We generate deposits primarily from the areas in which our branch offices are located. We rely on our competitive pricing, convenient locations and customer service to attract and retain both retail and commercial deposits.

We offer a variety of deposit accounts with a range of interest rates and terms. Our deposit accounts consist of statement savings accounts, certificates of deposit, money market accounts, commercial and regular checking accounts, individual retirement accounts and health savings accounts. From time to time we utilize brokered certificates of deposit or internet funding. At June 30, 2015, we had \$39.6 million in brokered certificates of deposit and \$3.2 million in internet funding.

Interest rates, maturity terms, service fees and withdrawal penalties are established on a periodic basis. Deposit rates and terms are based primarily on current operating strategies, including the cost of alternate sources of funds, and market interest rates, liquidity requirements, interest rates paid by competitors and our deposit growth goals.

The following tables set forth the distribution of our average total deposit accounts, by account type, for the periods indicated.

| | For the Fiscal Year Ended June 30, 2015 | | | For the Fiscal Year Ended June 30, 2014 | | |

Table of Contents

Personnel

At June 30, 2015, the Association had 97 full-time employees and 2 part-time employees, none of whom is represented by a collective bargaining unit. Iroquois Federal believes that its relationship with its employees is good.

Subsidiaries

IF Bancorp conducts its principal business activities through its wholly-owned subsidiary, Iroquois Federal Savings and Loan Association. The Iroquois Federal Savings and Loan Association has one wholly-owned subsidiary, L.C.I. Service Corporation, an insurance agency with offices in Watseka and Danville, Illinois.

REGULATION AND SUPERVISION

General

Iroquois Federal is examined and supervised by the Office of the Comptroller of the Currency (OCC) and is subject to examination by the Federal Deposit Insurance Corporation (FDIC). This regulation and supervision establishes a comprehensive framework of activities in which an institution may engage and is intended primarily for the protection of the FDIC 's deposit insurance fund and depositors, and not for the protection of stockholders. Under this system of federal regulation, financial institutions are periodically examined to ensure that they satisfy applicable standards with respect to their capital adequacy, assets, management, earnings, liquidity and sensitivity to market interest rates. Iroquois Federal also is a member of and owns stock in the Federal Home Loan Bank of Chicago, which is one of the twelve regional banks in the Federal Home Loan Bank System. Iroquois Federal is also regulated to a lesser extent by the Board of Governors of the Federal Reserve System (the Federal Reserve Board) governing reserves to be maintained against deposits and other matters. Iroquois Federal must comply with the consumer protection regulations issued by the Consumer Financial Protections Bureau. The OCC examines Iroquois Federal and prepares reports for the consideration of its Board of Directors on any operating deficiencies. Iroquois Federal 's relationship with its depositors and borrowers is also regulated to a great extent by federal law and, to a much lesser extent, state law, especially in matters concerning the ownership of deposit accounts, the form and content of Iroquois Federal 's mortgage documents and certain consumer protection matters.

As a savings and loan holding company, IF Bancorp is required to comply with the rules and regulations of the Federal Reserve Board and to file certain reports with and is subject to examination by the Federal Reserve Board. IF Bancorp is also subject to the rules and regulations of the Securities and Exchange Commission under the federal securities laws.

Set forth below are certain material regulatory requirements that are applicable to Iroquois Federal and IF Bancorp. This description of statutes and regulations is not intended to be a complete description of such statutes and regulations and their effects on Iroquois Federal and IF Bancorp. Any change in these laws or regulations, whether by Congress or the applicable regulatory agencies, could have a material adverse impact on IF Bancorp, Iroquois Federal and their operations.

Dodd-Frank Act

The Dodd-Frank Act made significant changes to the regulatory structure for depository institutions and their holding companies, as well as changes that affect the lending, investments and other operations of all depository institutions. The Dodd-Frank Act required the Federal Reserve Board to set minimum capital levels for both bank holding companies and savings and loan holding companies that are as stringent as those required for the insured depository

subsidiaries, and the components of Tier 1 capital for holding companies were restricted to capital instruments that were then currently considered to be Tier 1 capital for insured depository institutions. The legislation also established a floor for capital of insured depository institutions that cannot be lower than the standards in effect upon passage, and directed the federal banking regulators to implement new leverage and capital requirements that take into account off-balance sheet activities and other risks, including risks relating to securitized products and derivatives.

Table of Contents

The Dodd-Frank Act created a new Consumer Financial Protection Bureau with broad powers to supervise and enforce consumer protection laws. The Consumer Financial Protection Bureau has broad rule-making authority for a wide range of consumer protection laws that apply to all banks and savings institutions such as Iroquois Federal, including the authority to prohibit unfair, deceptive or abusive acts and practices. The Consumer Financial Protection Bureau has examination and enforcement authority over all banks and savings institutions with more than \$10 billion in assets. Banks and savings institutions with \$10 billion or less in assets are still examined for compliance by their applicable bank regulators. The new legislation also weakened the federal preemption available for national banks and federal savings associations, and gave state attorneys general the ability to enforce applicable federal consumer protection laws.

The Dodd-Frank Act broadened the base for FDIC insurance assessments. Assessments are now based on the average consolidated total assets less tangible equity capital of a financial institution, rather than on total deposits. The legislation also permanently increased the maximum amount of deposit insurance for banks, savings institutions and credit unions to \$250,000 per depositor. The Dodd-Frank Act increased stockholder influence over boards of directors by requiring companies to give stockholders a non-binding vote on executive compensation and so-called golden parachute payments. The legislation also directs the Federal Reserve Board to promulgate rules prohibiting excessive compensation paid to bank holding company executives, regardless of whether the company is publicly traded or not. Further, the legislation requires that originators of securitized loans retain a percentage of the risk for transferred loans, directs the Federal Reserve Board to regulate pricing of certain debit card interchange fees and contains a number of reforms related to mortgage originations.

Many provisions of the Dodd-Frank Act involve delayed effective dates and/or require implementing regulations or have not been issued in final form. The full impact on our operations cannot yet fully be assessed. However, the Dodd-Frank Act has increased regulatory burden and compliance, operating and interest expense for Iroquois Federal and IF Bancorp, and is likely to continue to do so.

Federal Banking Regulation

Business Activities. A federal savings bank derives its lending and investment powers from the Home Owners Loan Act, as amended, and the regulations of the OCC. Under these laws and regulations, Iroquois Federal may invest in mortgage loans secured by residential and nonresidential real estate, commercial business loans and consumer loans, certain types of debt securities and certain other assets, subject to applicable limits. While Iroquois Federal may originate, invest in, sell, or purchase unlimited loans on the security of residential real estate, certain types of lending, such as commercial and consumer lending, is subject to an aggregate limit calculated as a specified percentage of Iroquois Federal's total capital assets. The Dodd-Frank Act authorized, for the first time, the payment of interest on commercial checking accounts. Iroquois Federal may also establish subsidiaries that may engage in certain activities not otherwise permissible for Iroquois Federal, including real estate investment and securities and insurance brokerage.

Capital Requirements. Federal regulations require savings associations to meet several minimum capital standards: a common equity Tier 1 capital to risk-based assets ratio of 4.5%, a Tier 1 capital to risk-based assets ratio of 6.0%, a total capital to risk-based assets of 8%, and a 4% Tier 1 capital to total assets leverage ratio. The existing capital requirements were effective January 1, 2015 and are the result of regulations implementing recommendations of the Basel Committee on Banking Supervision and certain requirements of the Dodd-Frank Act.

As noted, the risk-based capital standards for savings associations require the maintenance of common equity Tier 1 capital, Tier 1 capital and total capital to risk-weighted assets of at least 4.5%, 6% and 8%, respectively. In determining the amount of risk-weighted assets, all assets, including certain off-balance sheet assets, are multiplied by

a risk-weight factor assigned by the regulations based on the risks believed inherent in the type of asset. Common equity Tier 1 capital is generally defined as common stockholders' equity and retained earnings. Tier 1 capital is generally defined as common equity Tier 1 and additional Tier 1 capital. Additional Tier 1 capital includes certain noncumulative perpetual preferred stock and related surplus and minority interests in equity accounts of consolidated subsidiaries. Total capital includes Tier 1 capital (common equity Tier 1 capital plus additional Tier 1 capital) and Tier 2 capital. Tier 2 capital is comprised of capital instruments and related surplus, meeting specified requirements, and may include cumulative preferred stock and long-term perpetual

Table of Contents

preferred stock, mandatory convertible securities, intermediate preferred stock and subordinated debt. Also included in Tier 2 capital is the allowance for loan and lease losses limited to a maximum of 1.25% of risk-weighted assets and, for institutions that have exercised an opt-out election regarding the treatment of Accumulated other comprehensive income, up to 45% of net unrealized gains on available-for-sale equity securities with readily determinable fair market values. Calculation of all types of regulatory capital is subject to deductions and adjustments specified in the regulations. In assessing an institution's capital adequacy, the OCC takes into consideration, not only these numeric factors, but qualitative factors as well, and has the authority to establish higher capital requirements for individual associations where necessary.

In addition to establishing the minimum regulatory capital requirements, the regulations limit capital distributions and certain discretionary bonus payments to management if the institution does not hold a capital conservation buffer consisting of 2.5% of common equity Tier 1 capital to risk-weighted asset above the amount necessary to meet its minimum risk-based capital requirements. The capital conservation buffer requirement is being phased in beginning January 1, 2016 at 0.625% of risk-weighted assets and increasing each year until fully implemented at 2.5% on January 1, 2019.

At June 30, 2015, Iroquois Federal's capital exceeded all applicable requirements. See Historical and Pro Forma Regulatory Capital Compliance.

Loans to One Borrower. Generally, a federal savings bank may not make a loan or extend credit to a single or related group of borrowers in excess of 15% of unimpaired capital and surplus. An additional amount may be loaned, equal to 10% of unimpaired capital and surplus, if the loan is secured by readily marketable collateral, which generally does not include real estate.

On July 30, 2012 Iroquois Federal received approval from the OCC to participate in the Supplemental Lending Limits Program (SLLP). This program allows eligible savings associations to make additional residential real estate loans or extensions of credit to one borrower, small business loans or extensions of credit to one borrower, or small farm loans or extensions of credit to one borrower, in the lesser of the following two amounts: (1) 10% of its capital and surplus; or (2) the percentage of capital and surplus, in excess of 15%, that a state bank is permitted to lend under the state lending limit that is available for loans secured by one- to four-family residential real estate, small business loans, small farm loans or unsecured loans in the state where the main office of the savings association is located. For Iroquois Federal, this additional limit (or supplemental limit) for one- to four-family residential real estate, small business, or small farm loans is 10% of its capital and surplus. In addition, the total outstanding amount of Iroquois Federal's loans or extensions of credit or parts of loans and extensions of credit made to all of Iroquois Federal's borrowers under the SLLP may not exceed 100% of Iroquois Federal's capital and surplus. Iroquois Federal uses the supplemental limit for its loans to one borrower infrequently, and all such credit facilities must receive prior approval by the Board of Directors.

As of June 30, 2015, Iroquois Federal was in compliance with its loans-to-one borrower limitations.

Qualified Thrift Lender Test. As a federal savings bank, Iroquois Federal must satisfy the qualified thrift lender, or QTL, test. Under the QTL test, Iroquois Federal must maintain at least 65% of its portfolio assets in qualified thrift investments in at least nine months of the most recent 12 months. Portfolio assets generally means total assets of a savings institution, less the sum of specified liquid assets up to 20% of total assets, goodwill and other intangible assets, and the value of property used in the conduct of the savings institution's business. A savings bank that fails the qualified thrift lender test must operate under specified restrictions specified in the Home Owners Loan Act. The Dodd-Frank Act made noncompliance with the QTL Test potentially subject to agency enforcement action for a violation of law. At June 30, 2015, Iroquois Federal held 75.32% of its portfolio assets in qualified thrift investments,

and satisfied the QTL Test.

Capital Distributions. Federal regulations govern capital distributions by a federal savings bank, which include cash dividends, stock repurchases and other transactions charged to the capital account. A savings bank must file an application for approval of a capital distribution if:

Table of Contents

the total capital distributions for the applicable calendar year exceed the sum of the savings bank's net income for that year to date plus the savings bank's retained net income for the preceding two years;

the savings bank would not be at least adequately capitalized (as defined in the prompt corrective action regulations discussed below) following the distribution;

the distribution would violate any applicable statute, regulation, agreement or regulatory condition; or

the savings bank is not eligible for expedited treatment of its filings.

Even if an application is not otherwise required, every savings bank that is a subsidiary of a holding company, such as Iroquois Federal, must still file a notice with the Federal Reserve Board (with a copy to the OCC) at least 30 days before the Board of Directors declares a dividend or approves a capital distribution.

The Federal Reserve Board, upon consultation with OCC, may disapprove a notice or application if:

the savings bank would be undercapitalized following the distribution;

the proposed capital distribution raises safety and soundness concerns; or

the capital distribution would violate a prohibition contained in any statute, regulation, agreement with a federal banking regulatory agency or condition, imposed in connection with an application or notice.

In addition, the Federal Deposit Insurance Act provides that an insured depository institution may not make any capital distribution if, after making such distribution, the institution would fail to satisfy any applicable regulatory capital requirement. A federal savings bank also may not make a capital distribution that would reduce its regulatory capital below the amount required for the liquidation account established in connection with its conversion to stock form. In addition, beginning in 2016, Iroquois Federal's ability to pay dividends will be limited if Iroquois Federal does not have the capital conservation buffer required by the new capital rules, which may limit the ability of IF Bancorp to pay dividends to its stockholders. See [Capital Requirements](#).

Community Reinvestment Act and Fair Lending Laws. All federal savings banks have a responsibility under the Community Reinvestment Act and related regulations to help meet the credit needs of their communities, including low- and moderate-income borrowers. In connection with its examination of a federal savings bank, the OCC is required to assess the association's record of compliance with the Community Reinvestment Act. In addition, the Equal Credit Opportunity Act and the Fair Housing Act prohibit lenders from discriminating in their lending practices on the basis of characteristics specified in those statutes. A savings bank's failure to comply with the provisions of the Community Reinvestment Act could, at a minimum, result in denial of certain corporate applications such as branches or mergers, or in restrictions on its activities. The failure to comply with the Equal Credit Opportunity Act and the Fair Housing Act could result in enforcement actions by the OCC, as well as other federal regulatory agencies and the Department of Justice. Iroquois Federal received a satisfactory Community Reinvestment Act rating in its most recent federal examination.

Transactions with Related Parties. A federal savings bank's authority to engage in transactions with its affiliates is limited by federal regulations and by Sections 23A and 23B of the Federal Reserve Act and its implementing Regulation W. An affiliate is a company that controls, is controlled by, or is under common control with an insured depository institution such as Iroquois Federal. IF Bancorp is an affiliate of Iroquois Federal because of its control of Iroquois Federal. In general, transactions between an insured depository institution and its affiliate are subject to certain quantitative and collateral requirements. In addition, federal regulations prohibit a savings bank from lending to any of its affiliates that are engaged in activities that are not permissible for bank holding companies and from purchasing the securities of any affiliate, other than a subsidiary. Finally, transactions with affiliates must be consistent with safe and sound banking practices, not involve the purchase of low-quality assets and be on terms that are as favorable to the institution as comparable transactions with non-affiliates. Federal regulations require savings banks to maintain detailed records of all transactions with affiliates.

Table of Contents

Iroquois Federal's authority to extend credit to its directors, executive officers and 10% stockholders, as well as to entities controlled by such persons, is currently governed by the requirements of Sections 22(g) and 22(h) of the Federal Reserve Act and Regulation O of the Federal Reserve Board. Among other things, these provisions generally require that extensions of credit to insiders

be made on terms that are substantially the same as, and follow credit underwriting procedures that are not less stringent than, those prevailing for comparable transactions with unaffiliated persons and that do not involve more than the normal risk of repayment or present other unfavorable features (subject to an exception for bank-wide lending programs available to all employees); and

not exceed certain limitations on the amount of credit extended to such persons, individually and in the aggregate, which limits are based, in part, on the amount of Iroquois Federal's capital.

In addition, extensions of credit in excess of certain limits must be approved by Iroquois Federal's Board of Directors. Extensions of credit to executive officers are subject to additional restrictions, including limits on various types of loans.

Enforcement. The OCC has primary enforcement responsibility over federal savings institutions and has the authority to bring enforcement action against all institution-affiliated parties, including stockholders, and attorneys, appraisers and accountants who knowingly or recklessly participate in wrongful action likely to have an adverse effect on an insured institution. Formal enforcement action by the OCC may range from the issuance of a capital directive or cease and desist order, to removal of officers and/or directors of the institution and the appointment of a receiver or conservator. Civil penalties cover a wide range of violations and actions, and range up to \$25,000 per day, unless a finding of reckless disregard is made, in which case penalties may be as high as \$1 million per day. The FDIC also has the authority to terminate deposit insurance or to recommend to the OCC that enforcement action be taken with respect to a particular savings institution. If action is not taken by the OCC, the FDIC has authority to take action under specified circumstances.

Standards for Safety and Soundness. Federal law requires each federal banking agency to prescribe certain standards for all insured depository institutions. These standards relate to, among other things, internal controls, information systems and audit systems, loan documentation, credit underwriting, interest rate risk exposure, asset growth, compensation, and other operational and managerial standards as the agency deems appropriate. Interagency guidelines set forth the safety and soundness standards that the federal banking agencies use to identify and address problems at insured depository institutions before capital becomes impaired. If the appropriate federal banking agency determines that an institution fails to meet any standard prescribed by the guidelines, the agency may require the institution to submit to the agency an acceptable plan to achieve compliance with the standard. If an institution fails to meet these standards, the appropriate federal banking agency may require the institution to implement an acceptable compliance plan. Failure to implement such a plan can result in further enforcement action, including the issuance of a cease and desist order or the imposition of civil money penalties.

Prompt Corrective Action Regulations. Federal law requires, among other things, that federal bank regulatory authorities take prompt corrective action with respect to banks that do not meet minimum capital requirements. For these purposes, the law establishes five capital categories: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized.

The OCC and the Federal Deposit Insurance Corporation have adopted regulations to implement the prompt corrective action legislation. For this purpose, a Federal savings bank is placed in one of the five categories based on the savings bank's capital:

Well Capitalized a total risk-based capital ratio of 10.0% or greater, a Tier 1 risk-based capital ratio of 8.0% or greater, a leverage ratio of 5.0% or greater and a common equity Tier 1 ratio of 6.5% or greater.

Table of Contents

Adequately Capitalized a total risk-based capital ratio of 8.0% or greater, a Tier 1 risk-based capital ratio of 6.0% or greater, a leverage ratio of 4.0% or greater and a common equity Tier 1 ratio of 4.5% or greater.

Undercapitalized a total risk-based capital ratio of less than 8.0%, a Tier 1 risk-based capital ratio of less than 6.0%, a leverage ratio of less than 4.0% or a common equity Tier 1 ratio of less than 4.5%.

Significantly Undercapitalized a total risk-based capital ratio of less than 6.0%, a Tier 1 risk-based capital ratio of less than 4.0%, a leverage ratio of less than 3.0% or a common equity Tier 1 ratio of less than 3.0%.

Critically Undercapitalized a ratio of tangible equity (as defined in the regulations) to total assets that is equal to or less than 2.0%.

At June 30, 2015, Iroquois Federal met the criteria for being considered well-capitalized.

Insurance of Deposit Accounts. The Deposit Insurance Fund of the FDIC insures deposits at FDIC-insured financial institutions such as Iroquois Federal. Deposit accounts in Iroquois Federal are insured by the FDIC generally up to a maximum of \$250,000 per separately insured depositor and up to a maximum of \$250,000 for self-directed retirement accounts. The FDIC charges insured depository institutions premiums to maintain the Deposit Insurance Fund.

Under the FDIC's risk-based assessment system, insured institutions are assigned to one of four risk categories based on supervisory evaluations, regulatory capital levels and certain other risk factors. Rates are based on each institution's risk category and certain specified risk adjustments. Stronger institutions pay lower rates while riskier institutions pay higher rates.

The FDIC issued a final rule that redefined the assessment base used for calculating deposit insurance assessments effective April 1, 2011. Under the rule, assessments are based on an institution's average consolidated total assets minus average tangible equity instead of total deposits. The final rule revised the assessment rate schedule to establish assessments ranging from 2.5 to 45 basis points.

In addition to the FDIC assessments, the Financing Corporation (FICO) is authorized to impose and collect, with the approval of the FDIC, assessments for anticipated payments, issuance costs and custodial fees on bonds issued by the FICO in the 1980s to recapitalize the former Federal Savings and Loan Insurance Corporation. The bonds issued by the FICO are due to mature in 2017 through 2019. For the quarter ended June 30, 2015, the annualized FICO assessment was equal to .58 of a basis point of total assets less tangible capital.

The FDIC has authority to increase insurance assessments. Any significant increases would have an adverse effect on the operating expenses and results of operations of Iroquois Federal. Management cannot predict what assessment rates will be in the future.

Insurance of deposits may be terminated by the FDIC upon a finding that an institution has engaged in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC. We do not currently know of any practice, condition or violation that may lead to termination of our deposit insurance.

Prohibitions Against Tying Arrangements. Federal savings banks are prohibited, subject to some exceptions, from extending credit to or offering any other service, or fixing or varying the consideration for such extension of credit or

service, on the condition that the customer obtain some additional service from the institution or its affiliates or not obtain services of a competitor of the institution.

Federal Home Loan Bank System. Iroquois Federal is a member of the Federal Home Loan Bank System, which consists of 12 regional Federal Home Loan Banks. The Federal Home Loan Bank System provides a central

Table of Contents

credit facility primarily for member institutions as well as other entities involved in home mortgage lending. As a member of the Federal Home Loan Bank of Chicago, Iroquois Federal is required to acquire and hold shares of capital stock in the Federal Home Loan Bank. As of June 30, 2015, Iroquois Federal was in compliance with this requirement.

Federal Reserve System

Federal Reserve Board regulations require savings banks to maintain noninterest-earning reserves against their transaction accounts, such as negotiable order of withdrawal and regular checking accounts. At June 30, 2015, Iroquois Federal was in compliance with these reserve requirements.

Other Regulations

Interest and other charges collected or contracted for by Iroquois Federal are subject to state usury laws and federal laws concerning interest rates. Iroquois Federal's operations are also subject to federal laws applicable to credit transactions, such as the:

Truth-In-Lending Act, governing disclosures of credit terms to consumer borrowers;

Real Estate Settlement Procedures Act, requiring that borrowers for mortgage loans for one- to four-family residential real estate receive various disclosures, including good faith estimates of settlement costs, lender servicing and escrow account practices, and prohibiting certain practices that increase the cost of settlement services;

Home Mortgage Disclosure Act, requiring financial institutions to provide information to enable the public and public officials to determine whether a financial institution is fulfilling its obligation to help meet the housing needs of the community it serves;

Equal Credit Opportunity Act, prohibiting discrimination on the basis of race, creed or other prohibited factors in extending credit;

Fair Credit Reporting Act, governing the use and provision of information to credit reporting agencies;

fair lending laws;

Unfair or Deceptive Acts or Practices laws and regulations;

Fair Debt Collection Act, governing the manner in which consumer debts may be collected by collection agencies;

Truth in Savings Act; and

Rules and regulations of the various federal agencies charged with the responsibility of implementing such federal laws.

In addition, the Consumer Financial Protection Bureau issues regulations and standards under these federal consumer protection laws that affect our consumer businesses. These include regulations setting ability to repay and qualified mortgage standards for residential mortgage loans and mortgage loan servicing and originator compensation standards. Iroquois Federal is evaluating recent regulations and proposals, and devotes significant compliance, legal and operational resources to compliance with consumer protection regulations and standards.

The operations of Iroquois Federal also are subject to the:

Table of Contents

Right to Financial Privacy Act, which imposes a duty to maintain confidentiality of consumer financial records and prescribes procedures for complying with administrative subpoenas of financial records;

Electronic Funds Transfer Act and Regulation E promulgated thereunder, which govern automatic deposits to and withdrawals from deposit accounts and customers' rights and liabilities arising from the use of automated teller machines and other electronic banking services;

Check Clearing for the 21st Century Act (also known as Check 21), which gives substitute checks, such as digital check images and copies made from that image, the same legal standing as the original paper check;

The USA PATRIOT Act, which requires savings banks to, among other things, establish broadened anti-money laundering compliance programs, and due diligence policies and controls to ensure the detection and reporting of money laundering. Such required compliance programs are intended to supplement existing compliance requirements that also apply to financial institutions under the Bank Secrecy Act and the Office of Foreign Assets Control regulations; and

The Gramm-Leach-Bliley Act, which places limitations on the sharing of consumer financial information by financial institutions with unaffiliated third parties. Specifically, the Gramm-Leach-Bliley Act requires all financial institutions offering financial products or services to retail customers to provide such customers with the financial institution's privacy policy and provide such customers the opportunity to opt out of the sharing of certain personal financial information with unaffiliated third parties.

Holding Company Regulation

General. IF Bancorp is a unitary savings and loan holding company within the meaning of Home Owners' Loan Act. As such, IF Bancorp is registered with the Federal Reserve Board and is subject to regulations, examinations, supervision and reporting requirements applicable to savings and loan holding companies. In addition, the Federal Reserve Board has enforcement authority over IF Bancorp and any future non-savings institution subsidiaries. Among other things, this authority permits the Federal Reserve Board to restrict or prohibit activities that are determined to be a serious risk to the subsidiary savings institution.

Permissible Activities. Under present law, the business activities of IF Bancorp are generally limited to those activities permissible for financial holding companies under Section 4(k) of the Bank Holding Company Act of 1956, as amended, provided certain conditions are met (including electing such status), or for multiple savings and loan holding companies. A financial holding company may engage in activities that are financial in nature, including underwriting equity securities and insurance as well as activities that are incidental to financial activities or complementary to a financial activity. A multiple savings and loan holding company is generally limited to activities permissible for bank holding companies under Section 4(c)(8) of the Bank Holding Company Act, subject to regulatory approval, and certain additional activities authorized by federal regulations. As of June 30, 2015, IF Bancorp has not elected financial holding company status.

Federal law prohibits a savings and loan holding company, including IF Bancorp, directly or indirectly, or through one or more subsidiaries, from acquiring more than 5% of another savings institution or holding company thereof, without prior regulatory approval. It also prohibits the acquisition or retention of, with certain exceptions, more than 5% of a non-subsidiary company engaged in activities that are not closely related to banking or financial in nature, or

acquiring or retaining control of an institution that is not federally insured. In evaluating applications by holding companies to acquire savings institutions, the Federal Reserve Board must consider the financial and managerial resources, future prospects of the company and institution involved, the effect of the acquisition on the risk to the federal deposit insurance fund, the convenience and needs of the community and competitive factors.

The Federal Reserve Board is prohibited from approving any acquisition that would result in a multiple savings and loan holding company controlling savings institutions in more than one state, subject to two exceptions:

Table of Contents

the approval of interstate supervisory acquisitions by savings and loan holding companies; and

the acquisition of a savings institution in another state if the laws of the state of the target savings institution specifically permit such acquisition.

The states vary in the extent to which they permit interstate savings and loan holding company acquisitions.

Capital. Savings and loan holding companies historically have not been subject to consolidated regulatory capital requirements. The Dodd-Frank Act required the Federal Reserve Board to establish for all depository institution holding companies minimum consolidated capital requirements that are as stringent as those required for the insured depository subsidiaries. However, pursuant to legislation passed in December 2014, the Federal Reserve Board has extended the applicability of the Small Bank Holding Company exception to its consolidated capital requirements to savings and loan holding companies and increased the threshold for the exception to \$1.0 billion, effective May 15, 2015. As a result, savings and loan holding companies with less than \$1.0 billion in consolidated assets are generally not subject to the capital requirements unless otherwise advised by the Federal Reserve Board.

Source of Strength. The Dodd-Frank Act extended the source of strength doctrine to savings and loan holding companies. The Federal Reserve Board has issued regulations requiring that all bank and savings and loan holding companies serve as a source of managerial and financial strength to their subsidiary savings and loan associations by providing capital, liquidity and other support in times of financial stress.

Dividends. The Federal Reserve Board has issued a policy statement regarding the payment of dividends and the repurchase of shares of common stock by bank holding companies and savings and loan holding companies. In general, the policy provides that dividends should be paid only out of current earnings and only if the prospective rate of earnings retention by the holding company appears consistent with the organization's capital needs, asset quality and overall financial condition. Regulatory guidance provides for prior regulatory consultation with respect to capital distributions in certain circumstances such as where the company's net income for the past four quarters, net of dividends previously paid over that period, is insufficient to fully fund the dividend or the company's overall rate or earnings retention is inconsistent with the company's capital needs and overall financial condition. The ability of a savings and loan holding company to pay dividends may be restricted if a subsidiary savings and loan association becomes undercapitalized. The policy statement also states that a savings and loan holding company should inform the Federal Reserve Board supervisory staff prior to redeeming or repurchasing common stock or perpetual preferred stock if the savings and loan holding company is experiencing financial weaknesses or if the repurchase or redemption would result in a net reduction, as of the end of a quarter, in the amount of such equity instruments outstanding compared with the beginning of the quarter in which the redemption or repurchase occurred. These regulatory policies may affect the ability of IF Bancorp to pay dividends, repurchase shares of common stock or otherwise engage in capital distributions.

Acquisition. Under the Federal Change in Bank Control Act, a notice must be submitted to the Federal Reserve Board if any person (including a company), or group acting in concert, seeks to acquire direct or indirect control of a savings and loan holding company. Under certain circumstances, a change of control may occur, and prior notice is required, upon the acquisition of 10% or more of the company's outstanding voting stock, unless the Federal Reserve Board has found that the acquisition will not result in control of the company. A change in control definitively occurs upon the acquisition of 25% or more of the company's outstanding voting stock. Under the Change in Bank Control Act, the Federal Reserve Board generally has 60 days from the filing of a complete notice to act, taking into consideration certain factors, including the financial and managerial resources of the acquirer and the competitive effects of the acquisition.

Federal Securities Laws

IF Bancorp common stock is registered with the Securities and Exchange Commission under the Securities Exchange Act of 1934, as amended. IF Bancorp is subject to the information, proxy solicitation, insider trading restrictions and other requirements under the Securities Exchange Act of 1934.

The registration under the Securities Act of 1933 of shares of common stock issued in the stock offering does not cover the resale of those shares. Shares of common stock purchased by persons who are not our affiliates

Table of Contents

may be resold without registration. Shares purchased by our affiliates are subject to the resale restrictions of Rule 144 under the Securities Act of 1933. If we meet the current public information requirements of Rule 144 under the Securities Act of 1933, each affiliate of ours that complies with the other conditions of Rule 144, including those that require the affiliate's sale to be aggregated with those of other persons, would be able to sell in the public market, without registration, a number of shares not to exceed, in any three-month period, the greater of 1% of our outstanding shares, or the average weekly volume of trading in the shares during the preceding four calendar weeks. In the future, we may permit affiliates to have their shares registered for sale under the Securities Act of 1933.

Sarbanes-Oxley Act of 2002

The Sarbanes-Oxley Act addresses, among other issues, corporate governance, auditing and accounting, executive compensation, and enhanced and timely disclosure of corporate information. As directed by the Sarbanes-Oxley Act, our Chief Executive Officer and Chief Financial Officer are required to certify that our quarterly and annual reports do not contain any untrue statement of a material fact. The rules adopted by the Securities and Exchange Commission under the Sarbanes-Oxley Act have several requirements, including having these officers certify that: (i) they are responsible for establishing, maintaining and regularly evaluating the effectiveness of our internal control over financial reporting; (ii) they have made certain disclosures to our auditors and the audit committee of the board of directors about our internal control over financial reporting; and (iii) they have included information in our quarterly and annual reports about their evaluation and whether there have been changes in our internal control over financial reporting or in other factors that could materially affect internal control over financial reporting.

Table of Contents**ITEM 1A. RISK FACTORS**

Because we intend to continue to originate commercial real estate, multi-family and commercial business loans, our credit risk may increase, and continued downturns in the local real estate market or economy could adversely affect our earnings.

We intend to continue originating commercial real estate, multi-family and commercial business loans. At June 30, 2015, \$103.6 million, or 28.7%, of our total loan portfolio consisted of commercial real estate loans, \$58.4 million, or 16.2%, of our total loan portfolio consisted of multi-family loans, and \$37.2 million, or 10.3%, of our total loan portfolio consisted of commercial business loans. These categories of loans have increased significantly since June 30, 2009, when \$23.8 million, or 10.5%, of our total loan portfolio consisted of commercial real estate loans, \$14.8 million, or 6.6%, of our total loan portfolio consisted of multi-family loans, and \$9.3 million, or 4.1%, of our total loan portfolio consisted of commercial business loans. We expect each of these loan categories to continue to increase as a percentage of our total loan portfolio. Commercial real estate, multi-family and commercial business loans generally have more risk than the one- to four-family residential real estate loans that we originate. Because the repayment of commercial real estate, multi-family and commercial business loans depends on the successful management and operation of the borrower's properties or businesses, repayment of such loans can be affected by adverse conditions in the local real estate market or economy. Commercial real estate, multi-family and commercial business loans may also involve relatively large loan balances to individual borrowers or groups of related borrowers. In addition, a downturn in the real estate market or the local economy could adversely affect the value of properties securing the loan or the revenues from the borrower's business, thereby increasing the risk of nonperforming loans. As our commercial real estate, multi-family and commercial business loan portfolios increase, the corresponding risks and potential for losses from these loans may also increase.

If our non-performing loans and other non-performing assets increase, our earnings will decrease.

At June 30, 2015, our non-performing assets (which consist of non-accrual loans, loans 90 days or more delinquent, and real estate owned) totaled \$3.1 million, which is a decrease of \$85,000 from our non-performing assets of \$3.2 million at June 30, 2014, and a decrease of \$1.6 million from our non-performing assets at of \$4.7 million at June 30, 2013. Our non-performing assets adversely affect our net income in various ways. We do not record interest income on non-accrual loans, and we must establish reserves or take charge-offs for probable losses on non-performing loans. Reserves are established through a current period charge to income in the provision for loan losses. There are also legal fees associated with the resolution of problem assets. Additionally, our real estate owned results in carrying costs such as taxes, insurance and maintenance fees. Further, the resolution of non-performing assets requires the active involvement of management, which can distract us from the overall supervision of operations and other income-producing activities of Iroquois Federal. Finally, if our estimate of the allowance for loan losses is inadequate, we will have to increase the allowance accordingly by recording a provision for loan losses.

If our allowance for loan losses is not sufficient to cover actual loan losses, our earnings will decrease.

Our customers may not repay their loans according to the original terms, and the collateral, if any, securing the payment of these loans may be insufficient to pay any remaining loan balance. We may experience significant loan losses, which may have a material adverse effect on our operating results. We make various assumptions and judgments about the collectability of our loan portfolio, including the creditworthiness of our borrowers and the value of the real estate and other assets serving as collateral for the repayment of many of our loans. In determining the amount of the allowance for loan losses, we review our loans and our loss and delinquency experience, and we evaluate economic conditions. If our assumptions are incorrect, our allowance for loan losses may not be sufficient to cover probable losses in our loan portfolio, requiring us to make additions to our allowance for loan losses. Our allowance for loan losses was 1.17% of total loans at June 30, 2015. Additions to our allowance could materially

decrease our net income.

In addition, bank regulators periodically review our allowance for loan losses and may require us to increase our allowance for loan losses or recognize further loan charge-offs. Any increase in our allowance for loan losses or loan charge-offs as required by these regulatory authorities may have a material adverse effect on our financial condition and results of operations.

Table of Contents

Future changes in interest rates could reduce our profits.

Our profitability largely depends on our net interest income, which can be negatively affected by changes in interest rates. Net interest income is the difference between:

the interest income we earn on our interest-earning assets, such as loans and securities; and

the interest expense we incur on our interest-bearing liabilities, such as deposits and borrowings.

The interest rates on our loans are generally fixed for a longer period of time than the interest rates on our deposits. Like many savings institutions, our focus on deposits as a source of funds, which either have no stated maturity or shorter contractual maturities than mortgage loans, results in our liabilities having a shorter average duration than our assets. For example, as of June 30, 2015, 21.8% of our loans had remaining maturities of, or reprice after, 5 years or longer, while 60.7% of our certificates of deposit had remaining maturities of, or reprice in, one year or less. This imbalance can create significant earnings volatility because market interest rates change over time. In a period of rising interest rates, the interest we earn on our assets, such as loans and investments, may not increase as rapidly as the interest we pay on our liabilities, such as deposits. In a period of declining market interest rates, the interest income we earn on our assets may decrease more rapidly than the interest expense we incur on our liabilities, as borrowers prepay mortgage loans and mortgage-backed securities and callable investment securities are called or prepaid, thereby requiring us to reinvest these cash flows at lower interest rates. See Management's Discussion and Analysis of Financial Condition and Results of Operations Management of Market Risk.

In addition, changes in interest rates can affect the average life of loans and mortgage-backed and related securities. A decline in interest rates generally results in increased prepayments of loans and mortgage-backed and related securities, as borrowers refinance their debt in order to reduce their borrowing costs. This creates reinvestment risk, which is the risk that we may not be able to reinvest prepayments at rates that are comparable to the rates we earned on the prepaid loans or securities. Additionally, increases in interest rates may decrease loan demand and/or make it more difficult for borrowers to repay adjustable-rate loans.

We evaluate interest rate sensitivity using a model that estimates the change in our net portfolio value over a range of interest rate scenarios, also known as a rate shock analysis. Net portfolio value is the discounted present value of expected cash flows from assets, liabilities and off-balance sheet contracts. See Management's Discussion and Analysis of Financial Condition and Results of Operations Management of Market Risk.

Historically low interest rates may adversely affect our net interest income and profitability.

During the past five years it has been the policy of the Board of Governors of the Federal Reserve System to maintain interest rates at historically low levels through its targeted federal funds rate and the purchase of mortgage-backed securities. As a result, market rates on the loans we have originated and the yields on securities we have purchased have been at lower levels than as available prior to 2009. Consequently, the average yield on our interest earning assets has decreased to 3.59% for the year ended June 30, 2015 from 5.29% for the year ended June 30, 2009. As a general matter, our interest-bearing liabilities reprice or mature more quickly than our interest-earning assets. This has resulted in increases in net interest income in the short term. However, our ability to lower our interest expense is limited at these interest rate levels while the average yield on our interest-earning assets may continue to decrease. Accordingly, our net interest income (the difference between interest income earned on assets and interest expense paid on liabilities) may decrease, which may have an adverse affect on our profitability.

If we fail to achieve profitability on our new branch that we opened in April, 2014, it may negatively affect our results of operations.

We opened a new branch in Savoy, Illinois in April, 2014. A new branch office may not generate earnings, or may not generate earnings within a reasonable period of time. Numerous factors contribute to the performance of a new branch, such as a suitable location, qualified personnel, and an effective marketing strategy. Additionally, it takes time for a new branch to originate sufficient loans and generate sufficient deposits to produce enough income to offset expenses, some of which, like salaries and occupancy expense, are considered fixed costs. We expect that it may take a period of time before the new branch office can become profitable. During this period, operating this new branch office may negatively impact our net income.

Table of Contents

Increased interest rates and changes in secondary mortgage market conditions could reduce our earnings from our mortgage banking operations.

Our mortgage banking income varies with movements in interest rates, and increases in interest rates could negatively affect our ability to originate loans in the same volume as we have in recent years. In addition to being affected by interest rates, the secondary mortgage markets are also subject to investor demand for residential mortgage loans and increased investor yield requirements for these loans. These conditions may fluctuate or worsen in the future. In light of current conditions, there is greater risk in retaining mortgage loans pending their sale to investors. As a result, a prolonged period of secondary market illiquidity may reduce our loan mortgage production volume and could have a material adverse effect on our financial condition and results of operations.

A portion of our loan portfolio consists of loan participations secured by properties outside of our primary market area. Loan participations may have a higher risk of loss than loans we originate because we are not the lead lender and we have limited control over credit monitoring.

We occasionally purchase loan participations secured by properties outside of our primary market area in which we are not the lead lender. Although we underwrite these loan participations consistent with our general underwriting criteria, loan participations may have a higher risk of loss than loans we originate because we rely on the lead lender to monitor the performance of the loan. Moreover, our decision regarding the classification of a loan participation and loan loss provisions associated with a loan participation is made in part based upon information provided by the lead lender. A lead lender also may not monitor a participation loan in the same manner as we would for loans that we originate. At June 30, 2015, our loan participations totaled \$27.8 million, or 7.7% of our gross loans, most of which are within 100 miles of our primary lending market and consist primarily of multi-family, commercial real estate and commercial loans.

Additionally, we expect to continue to use loan participations as a way to effectively deploy our capital. If our underwriting of these participation loans is not sufficient, our non-performing loans may increase and our earnings may decrease.

We have in the past purchased loans originated by other banks and mortgage companies, some of which have experienced a higher rate of losses than loans that we originate. If we continue to experience losses on these loans, our earnings will decrease.

In addition to loans that we originate, at June 30, 2015, our loan portfolio included \$11.5 million of purchased loans. These loans were primarily purchased from three vendors: Irwin Mortgage Corporation (now serviced by Everhome Mortgage Company); Mid America Bank (now serviced by PNC Bank); and Countrywide Financial (now serviced by Bank of America). Of these loans, \$3.3 million were purchased from Countrywide and have experienced a significantly higher rate of losses than loans that we originate. As of June 30, 2015, the loans purchased from Countrywide consisted of 6 loans secured by one- to four-family residential loans, primarily in the Chicago market area. Of these 6 loans, 3 are classified as substandard and have specific allowances of \$4,000. The other 3 loans are performing in accordance with their original terms. If we experience additional losses on these loans, our earnings will decrease.

Government responses to economic conditions may adversely affect our operations, financial condition and earnings.

The Dodd-Frank Wall Street Reform and Consumer Protection Act has changed the bank regulatory framework, created an independent consumer protection bureau that has assumed the consumer protection responsibilities of the

various federal banking agencies, and established more stringent capital standards for savings associations and savings and loan holding companies, subject to a transition period. Bank regulatory agencies also have been responding aggressively to concerns and adverse trends identified in examinations. Ongoing uncertainty and adverse developments in the financial services industry and the domestic and international credit markets, and the effect of the Dodd-Frank Act and regulatory actions, may adversely affect our operations by restricting our

Table of Contents

business activities, including our ability to originate or sell loans, modify loan terms, or foreclose on property securing loans. These risks could affect the performance and value of our loan and investment securities portfolios, which also would negatively affect our financial performance.

We operate in a highly regulated environment and may be adversely affected by changes in laws and regulations.

We are subject to extensive regulation, supervision, and examination by the Office of the Comptroller of the Currency and the Federal Deposit Insurance Corporation. Federal regulations govern the activities in which we may engage, and are primarily for the protection of depositors and the Deposit Insurance Fund. These regulatory authorities have extensive discretion in connection with their supervisory and enforcement activities, including the imposition of restrictions on the operations of a savings association, the classification of assets by a savings association, and the adequacy of a savings association's allowance for loan losses. Any change in such regulation and oversight, whether in the form of regulatory policy, regulations or legislation, could have a material impact on our results of operations. Because our business is highly regulated, the laws, rules and applicable regulations are subject to regular modification and change. Any legislative, regulatory or policy changes adopted in the future could make compliance more difficult or expensive or otherwise adversely affect our business, financial condition or prospects. Further, we expect any such new laws, rules or regulations will add to our compliance costs and place additional demands on our management team.

The short-term and long-term impact of the changing regulatory capital requirements and new capital rules is uncertain.

In July, 2013, the federal banking agencies approved a new rule that will substantially amend the regulatory risk-based capital rules applicable to Iroquois Federal and IF Bancorp. The final rule implements the Basel III regulatory capital reforms and changes required by the Dodd-Frank Act.

The final rule included new minimum risk-based capital and leverage ratios, which was effective for Iroquois Federal and IF Bancorp on January 1, 2015, and refined the definition of what constitutes capital for purposes of calculating these ratios. The new minimum capital requirements are: (i) a new common equity Tier 1 capital ratio of 4.5%; (ii) a Tier 1 to risk-based assets capital ratio of 6% (increased from 4%); (iii) a total capital ratio of 8% (unchanged from current rules); and (iv) a Tier 1 leverage ratio of 4%. The final rule also established a capital conservation buffer of 2.5% above the new regulatory minimum capital ratios, and when fully effective in 2019, will result in the following minimum ratios: (i) a common equity Tier 1 capital ratio of 7.0%, (ii) a Tier 1 to risk-based assets capital ratio of 8.5%, and (iii) a total capital ratio of 10.5%. The new capital conservation buffer requirement would be phased in beginning in January 2016 at 0.625% of risk-weighted assets and would increase each year until fully implemented in January 2019. An institution will be subject to limitations on paying dividends, engaging in share repurchases, and paying discretionary bonuses if its capital level falls below the buffer amount. These limitations will establish a maximum percentage of eligible retained income that can be utilized for such activities.

The application of more stringent capital requirements for Iroquois Federal and IF Bancorp could, among other things, result in lower returns on equity, require the raising of additional capital, and result in regulatory actions such as the inability to pay dividends or repurchase shares if we were to be unable to comply with such requirements.

Strong competition within our market areas may limit our growth and profitability.

Competition in the banking and financial services industry is intense. In our market areas, we compete with commercial banks, savings institutions, credit unions, mortgage brokerage firms, finance companies, mutual funds,

insurance companies, and brokerage and investment banking firms operating locally and elsewhere. Some of our competitors have greater name recognition and market presence that benefit them in attracting business, and offer certain services that we do not or cannot provide. In addition, larger competitors may be able to price loans and deposits more aggressively than we do, which could affect our ability to grow and remain profitable on a long-term basis. Our profitability depends upon our continued ability to successfully compete in our market areas. If we must raise interest rates paid on deposits or lower interest rates charged on our loans, our net interest margin and profitability could be adversely affected.

Table of Contents

Our information systems may experience an interruption or breach in security.

We rely heavily on communications and information systems to conduct our business. Any failure, interruption, or breach in security or operational integrity of these systems could result in failures or disruptions in our customer relationship management, general ledger, deposit, loan, and other systems. While we have policies and procedures designed to prevent or limit the effect of the failure, interruption, or security breach of our information systems, we cannot assure you that any such failures, interruptions, or security breaches will not occur or, if they do occur, that they will be adequately addressed. The occurrence of any failures, interruptions, or security breaches of our information systems could damage our reputation, result in a loss of customer business, subject us to additional regulatory scrutiny, or expose us to civil litigation and possible financial liability, any of which could have a material adverse effect on our financial condition and results of operations.

 Holders.

As of September 10, 2015, there were 417 holders of record of the Company's common stock.

 Dividends.

The Company declared dividends of \$0.05 per share in September 2014 and February 2015. The payment of dividends in the future will depend upon a number of factors, including capital requirements, the Company's financial condition and results of operations, tax considerations, statutory and regulatory limitations and general economic conditions. In addition, the Company's ability to pay dividends is dependent on dividends received from Iroquois Federal. No assurances can be given that dividends will continue to be paid, or that, if paid, will not be reduced. For more information regarding restrictions on the payment of cash dividends by the Company and by Iroquois Federal, see

Business Regulation and Supervision Holding Company Regulation Dividends and Regulation and Supervision Federal Savings Institution Regulation Capital Distributions.

(1) The interest rate spread represents the difference between the weighted-average yield on interest-earning assets and the weighted-average cost of interest-bearing liabilities for the period.

- (2) The net interest margin represents net interest income as a percent of average interest-earning assets for the period.
- (3) The efficiency ratio represents noninterest expense as a percentage of the sum of net interest income and noninterest income.
- (4) The common equity Tier 1 (CET1) capital is a new capital requirement adopted by the OCC, which became effective for the Association in January, 2015.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

Overview

We have grown our organization to \$563.7 million in assets at June 30, 2015 from \$377.2 million in assets at June 30, 2009. We have increased our assets primarily through increased investment securities and loan growth.

Historically, we have operated as a traditional thrift institution. As recently as June 30, 2009, \$163.6 million, or approximately 72.4% of our loan portfolio, consisted of longer-term, one- to four-family residential real estate loans. However, in recent years, we have increased our focus on the origination of commercial real estate loans, multi-family real estate loans and commercial business loans, which generally provide higher returns than one- to four-family residential mortgage loans, have shorter durations and are often originated with adjustable rates of interest. As a result, our net interest rate spread (the difference between the yield on average interest-earning assets and the cost of average interest-bearing liabilities) increased to 2.87% for the year ended June 30, 2015 from 2.53% for the year ended June 30, 2009. This contributed to a corresponding increase in net interest income (the difference between interest income and interest expense) to \$15.7 million for the fiscal year ended June 30, 2015 from \$9.5 million for the fiscal year ended June 30, 2009.

Our emphasis on conservative loan underwriting has resulted in relatively low levels of non-performing assets at a time when many financial institutions are experiencing significant asset quality issues. Our non-performing assets totaled \$3.1 million or 0.55% of total assets at June 30, 2015.

Other than our loans for the construction of one- to four-family residential properties and the draw portion of our home equity lines of credit, we do not offer interest only mortgage loans on one- to four-family residential properties (where the borrower pays interest but no principal for an initial period, after which the loan converts to a fully amortizing loan). We also do not offer loans that provide for negative amortization of principal, such as Option ARM loans, where the borrower can pay less than the interest owed on their loan, resulting in an increased principal balance during the life of the loan. We do not offer subprime loans (loans that generally target borrowers with weakened credit histories typically characterized by payment delinquencies, previous charge-offs, judgments, bankruptcies, or borrowers with questionable repayment capacity as evidenced by low credit scores or high debt-burden ratios) or Alt-A loans (traditionally defined as loans having less than full documentation). We also do not own any private label mortgage-backed securities that are collateralized by Alt-A, low or no documentation or subprime mortgage loans.

The Association's legal lending limit to any one borrower is 15% of unimpaired capital and surplus. On July 30, 2012 the Association received approval from the Office of the Comptroller of the Currency to participate in the Supplemental Lending Limits Program (SLLP). This program allows eligible savings associations to make additional residential real estate loans or extensions of credit to one borrower, small business loans or extensions of credit to one borrower, or small farm loans or extensions of credit to one borrower. For our association this additional limit (or supplemental limit(s)) for one- to four-family residential real estate, small business, or small farm loans is 10% of our Association's capital and surplus. In addition, the total outstanding amount of the Association's loans or extensions of credit or parts of loans and extensions of credit made to all of its borrowers under the SLLP may not exceed 100% of the Association's capital and surplus. By Association policy, participation of any credit facilities in the SLLP is to be infrequent and all credit facilities are to be with prior Board approval.

All of our mortgage-backed securities have been issued by Freddie Mac, Fannie Mae or Ginnie Mae, U.S. government-sponsored enterprises. These entities guarantee the payment of principal and interest on our mortgage-backed securities.

Edgar Filing: IF Bancorp, Inc. - Form 10-K

On July 7, 2011 we completed our initial public offering of common stock in connection with Iroquois Federal's mutual-to-stock conversion, selling 4,496,500 shares of common stock at \$10.00 per share, including 384,900 shares sold to Iroquois Federal's employee stock ownership plan, and raising approximately \$45.0 million of gross proceeds. In addition, we issued 314,755 shares of our common stock to the Iroquois Federal Foundation.

Table of Contents

In April, 2014 we opened a new branch office at 108 Arbours Drive, Savoy, Illinois, in Champaign County.

Critical Accounting Policies

We consider accounting policies that require management to exercise significant judgment or discretion or make significant assumptions that have, or could have, a material impact on the carrying value of certain assets or on income, to be critical accounting policies. We consider the following to be our critical accounting policies.

Allowance for Loan Losses. We believe that the allowance for loan losses and related provision for loan losses are particularly susceptible to change in the near term, due to changes in credit quality which are evidenced by trends in charge-offs and in the volume and severity of past due loans. In addition, our portfolio is comprised of a substantial amount of commercial real estate loans which generally have greater credit risk than one- to four-family residential mortgage and consumer loans because these loans generally have larger principal balances and are non-homogenous.

The allowance for loan losses is maintained at a level to cover probable credit losses inherent in the loan portfolio at the balance sheet date. Based on our estimate of the level of allowance for loan losses required, we record a provision for loan losses as a charge to earnings to maintain the allowance for loan losses at an appropriate level. The estimate of our credit losses is applied to two general categories of loans:

loans that we evaluate individually for impairment under ASC 310-10, Receivables; and

groups of loans with similar risk characteristics that we evaluate collectively for impairment under ASC 450-20, Loss Contingencies.

The allowance for loan losses is evaluated on a regular basis by management and reflects consideration of all significant factors that affect the collectability of the loan portfolio. The factors used to evaluate the collectability of the loan portfolio include, but are not limited to, current economic conditions, our historical loss experience, the nature and volume of the loan portfolio, the financial strength of the borrower, and estimated value of any underlying collateral. This evaluation is inherently subjective as it requires estimates that are subject to significant revision as more information becomes available. Actual loan losses may be significantly more than the allowance for loan losses we have established which could have a material negative effect on our financial results. See also Business Allowance for Loan Losses.

Income Tax Accounting. The provision for income taxes is based upon income in our consolidated financial statements, rather than amounts reported on our income tax return. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on our deferred tax assets and liabilities is recognized as income or expense in the period that includes the enactment date. Under GAAP, a valuation allowance is required to be recognized if it is more likely than not that a deferred tax asset will not be realized. The determination as to whether we will be able to realize the deferred tax assets is highly subjective and dependent upon judgment concerning our evaluation of both positive and negative evidence, our forecasts of future income, applicable tax planning strategies, and assessments of current and future economic and business conditions. Positive evidence includes the existence of taxes paid in available carryback years as well as the probability that taxable income will be generated in future periods, while negative evidence includes any cumulative losses in the current year and prior two

years and general business and economic trends. Any reduction in estimated future taxable income may require us to record a valuation allowance against our deferred tax assets. Any required valuation allowance would result in additional income tax expense in the period and could have a significant impact on our future earnings. Positions taken in our tax returns may be subject to challenge by the taxing authorities upon examination. The benefit of an uncertain tax position is initially recognized in the financial statements only when it is more likely than not the position will be sustained upon examination by the tax authorities. Such tax positions are both initially and subsequently measured as the largest amount of tax benefit that is greater than 50% likely of being realized upon settlement with the tax authority, assuming full knowledge of the position and all relevant facts. Differences between our position and the position of tax authorities could result in a reduction of a tax benefit or an increase to a tax liability, which could adversely affect our future income tax expense.

Table of Contents

The Company established a charitable foundation at the time of its mutual-to-stock conversion and donated to it cash and shares of common stock for a total value of approximately \$3.6 million. The Company established a deferred tax asset associated with this charitable contribution. No valuation allowance has been established, as it appears that the Company will be able to deduct the contribution, which is subject to limitations each year, during the five year carry-forward period which ends June 30, 2017. Management continues to monitor its taxable income projections through June 30, 2017, to determine whether a valuation allowance is needed.

We believe our tax policies and practices are critical accounting policies because the determination of our tax provision and current and deferred tax assets and liabilities have a material impact on our net income and the carrying value of our assets. We believe our tax liabilities and assets are properly recorded in the consolidated financial statements at June 30, 2015 and no valuation allowance was necessary.

Comparison of Financial Condition at June 30, 2015 and June 30, 2014

Total assets increased \$12.3 million, or 2.2%, to \$563.7 million at June 30, 2015 from \$551.3 million at June 30, 2014. The increase was primarily due to a \$26.3 million increase in net loans and a \$493,000 increase in cash and cash equivalents, partially offset by a \$14.0 million decrease in investment securities.

Net loans receivable, including loans held for sale, increased by \$26.3 million, or 8.0%, to \$356.2 million at June 30, 2015 from \$329.9 million at June 30, 2014. The increase in net loans receivable during this period was due primarily to a \$20.5 million, or 24.6%, increase in commercial real estate loans and a \$14.0 million, or 60.7%, increase in commercial business loans, partially offset by a \$4.5 million, or 3.0%, decrease in one- to four-family loans, a \$3.2 million, or 5.2%, decrease in multi-family loans, a \$184,000, or 2.2%, decrease in consumer loans, a \$585,000, or 37.2%, decrease in construction loans, and a \$111,000, or 1.4%, decrease in home equity lines of credit.

Investment securities, consisting entirely of securities available for sale, decreased \$14.0 million, or 7.6%, to \$170.6 million at June 30, 2015 from \$184.6 million at June 30, 2014. The decrease was primarily due to the sale of securities to fund loan growth. We had no held-to-maturity securities at June 30, 2015 or June 30, 2014.

As of June 30, 2015, other assets decreased \$110,000 to \$379,000, premises and equipment decreased \$324,000 to \$4.8 million, interest receivable decreased \$115,000 to \$1.7 million, and other real estate decreased \$386,000 to \$50,000, while the deferred income tax asset increased \$190,000 to \$2.2 million from their respective balances as of June 30, 2014. Federal Home Loan Bank stock was \$5.4 million at both June 30, 2015 and 2014. The decrease in other assets resulted from a decrease in accounts receivable general due to the receipt of a receivable that was outstanding as of June 30, 2014. The decrease in premises and equipment was primarily due to normal depreciation and the decrease in interest receivable was primarily due to the reduction of the investment security portfolio, while the decrease in other real estate was due to the sale of other real estate owned. The increase in deferred income taxes was mostly due to a decrease in the unrealized gain on sale of available-for sale securities.

At June 30, 2015, our investment in bank-owned life insurance was \$8.3 million, an increase of \$264,000 from \$8.0 million at June 30, 2014. We invest in bank-owned life insurance to provide us with a funding source for our benefit plan obligations. Bank-owned life insurance also generally provides us noninterest income that is non-taxable. Federal regulations generally limit our investment in bank-owned life insurance to 25% of the Association's Tier 1 capital plus our allowance for loan losses, which totaled \$17.4 million at June 30, 2015.

Deposits increased \$11.0 million, or 2.7%, to \$415.5 million at June 30, 2015 from \$404.6 million at June 30, 2014. Certificates of deposit, excluding brokered certificates of deposit, decreased \$11.6 million, or 5.3%, to \$208.1 million, savings, NOW, and money market accounts increased \$18.1 million, or 13.7%, to \$150.8 million, brokered certificates

of deposit increased \$4.0 million, or 11.2%, to \$39.6 million, and noninterest bearing demand accounts increased \$468,000, or 2.8% to \$17.2 million. Repurchase agreements increased \$1.7 million to \$4.0 million.

Table of Contents

Advances from the Federal Home Loan Bank of Chicago increased \$1.2 million, or 2.2%, to \$58.0 million at June 30, 2015 from \$56.8 million at June 30, 2014.

Total equity decreased \$1.7 million, or 2.0%, to \$80.4 million at June 30, 2015 from \$82.1 million at June 30, 2014. Equity decreased due to the repurchase of 298,383 shares of common stock at an aggregate cost of approximately \$5.0 million, partially offset by net income of \$3.3 million. During the year ended June 30, 2015, the Company announced one new stock repurchase plan. Under the repurchase plan, which was announced on May 21, 2015, the Company could repurchase up to 210,313 shares of its common stock, or approximately 5% of the then current outstanding shares. Under the prior stock repurchase program, which was announced on May 14, 2014, the company could repurchase up to 221,383 shares of its common stock, or approximately 5% of the then current outstanding shares. This first stock repurchase plan was completed on May 21, 2015 and the average price per share was \$16.52. As of June 30, 2015, the maximum number of shares that may yet be repurchased under the current repurchase plan was 83,313.

Comparison of Operating Results for the Years Ended June 30, 2015 and 2014

General. Net income decreased \$203,000, or 5.8%, to \$3.3 million net income for the year ended June 30, 2015 from \$3.5 million net income for the year ended June 30, 2014. The decrease was primarily due to a decrease in net interest income and an increase in noninterest expense, partially offset by an increase in noninterest income and a decrease in provision for loan losses.

Net Interest Income. Net interest income decreased by \$144,000, or 0.9%, to \$15.7 million for the year ended June 30, 2015 from \$15.8 million for the year ended June 30, 2014. The decrease was due to a decrease of \$66,000 in interest and dividend income and an increase of \$78,000 in interest expense. The decrease in net interest income was primarily the result of a decrease in the average balance of interest earning assets and higher rates paid on interest bearing liabilities. We had a \$12.7 million, or 2.4%, decrease in the average balance of interest earning assets, offset by a \$13.6 million, or 3.0%, decrease in the average balance of interest bearing liabilities. Our interest rate spread increased 4 basis points to 2.87% for the year ended June 30, 2015 from 2.83% for the year ended June 30, 2014, and our net interest margin increased by 4 basis points to 2.98% for the year ended June 30, 2015 from 2.94% for the year ended June 30, 2014.

Interest and Dividend Income. Interest and dividend income decreased \$66,000, or 0.3%, to \$18.9 million for the year ended June 30, 2015 from \$19.0 million for the year ended June 30, 2014. The decrease in interest income was due to a decrease in interest income on securities, partially offset by an increase in interest income on loans. Interest on securities decreased \$684,000, or 13.5%, as a \$31.2 million decrease in the average balance of securities to \$173.0 million at June 30, 2015 from \$204.2 million at June 30, 2014, was partially offset by a 9 basis point increase in the average yield on securities to 2.62% from 2.53%. An increase of \$560,000, or 4.1%, in interest on loans resulted from a \$16.6 million, or 5.1%, increase in the average balance of loans to \$343.4 million for the year ended June 30, 2015, partially offset by a 4 basis point, or 1.0%, decrease in the average yield on loans to 4.17% from 4.21%. The decrease in the average yield on loans reflected a reduction in the current interest rates charged on loans originated during the period versus the average rates on loans in the portfolio in the prior period.

Interest Expense. Interest expense increased \$78,000, or 2.5%, to \$3.2 million for the year ended June 30, 2015 from \$3.1 million for the year ended June 30, 2014. The increase was primarily due to increased average balances of deposits and higher market interest rates during the period.

Interest expense on interest-bearing deposits increased \$111,000, or 4.8%, to \$2.4 million for the year ended June 30, 2015 from \$2.3 million for the year ended June 30, 2014. This increase was primarily due to an increase in the

average balance of interest-bearing deposits to \$393.6 million for the year ended June 30, 2015, from \$376.1 million for the year ended June 30, 2014. The average cost of interest-bearing deposits was 0.62% for both the year ended June 30, 2015 and for the year ended June 30, 2014.

Interest expense on borrowings, including FHLB advances and repurchase agreements, decreased \$33,000, or 4.0%, to \$793,000 for the year ended June 30, 2015 from \$826,000 for the year ended June 30, 2014. This decrease was due to a \$31.1 million, or 37.3%, decrease in the average balance of borrowings to \$52.3 million for the year ended June 30, 2015 from \$83.4 million for the year ended June 30, 2014, partially offset by a 53 basis point increase in the average cost of such borrowings to 1.52% for the year ended June 30, 2015 from 0.99% for the year ended June 30, 2014.

Table of Contents

Provision for Loan Losses. We establish provisions for loan losses, which are charged to operations in order to maintain the allowance for loan losses at a level we consider necessary to absorb probable credit losses inherent in our loan portfolio. We recorded a provision for loan losses of \$460,000 for the year ended June 30, 2015, compared to a provision for loan losses of \$502,000 for the year ended June 30, 2014. The allowance for loan losses was \$4.2 million, or 1.17% of total loans, at June 30, 2015, compared to \$4.0 million, or 1.18% of total loans, at June 30, 2014. Non-performing loans increased during the year ended June 30, 2015, to \$3.1 million. During the year ended June 30, 2015 and 2014, \$207,000 and \$482,000 in net charge-offs were recorded.

The following table sets forth information regarding the allowance for loan losses and nonperforming assets at the dates indicated:

| | Year Ended June 30, 2015 | Year Ended June 30, 2014 |
|--|-------------------------------------|-------------------------------------|
| Allowance to non-performing loans | 137.3% | 143.1% |
| Allowance to total loans outstanding at the end of the period | 1.17% | 1.18% |
| Net charge-offs to average total loans outstanding during the period, annualized | 0.01% | 0.15% |
| Total non-performing loans to total loans | 0.85% | 0.82% |
| Total non-performing assets to total assets | 0.55% | 0.58% |

Noninterest Income. Noninterest income increased \$252,000, or 8.2%, to \$3.3 million for the year ended June 30, 2015 from \$3.1 million for the year ended June 30, 2014. The increase was primarily due to increases in net realized gains on the sale of available-for-sale securities, gains on sale of loans, insurance commissions, brokerage commissions, and other service charges and fees, partially offset by a decrease in customer service fees. For the year ended June 30, 2015, net realized gains (losses) on the sale of available-for-sale securities decreased to (\$24,000) from (\$123,000), gains on sale of loans increased to \$123,000 from \$90,000, insurance commissions increased to \$720,000 from \$684,000, brokerage commissions increased to \$732,000 from \$704,000, and other service charges and fees increased to \$122,000 from \$109,000, while mortgage banking income, net, decreased to \$185,000 from \$197,000 and customer service fees decreased to \$506,000 from \$532,000. The reduction in net realized losses on the sale of available-for-sale securities was due to the rate environment in the year ended June 30, 2015, that allowed for a repositioning of the investment portfolio that was not available in the year ended June 30, 2014. The increase in gains on sale of loans was primarily due to an increase in the number of loans sold to the Federal Home Loan Bank of Chicago in the year ended June 30, 2015, the increase in insurance commissions is primarily due to higher contingency commissions in the year ended June 30, 2015, the increase in brokerage commissions reflects increased activity due to movement in market interest rates, and the increase in other service charges and fees was due to an increase in loan fees earned. The decrease in customer service fees was primarily due to a decrease in overdraft fees collected.

Noninterest Expense. Noninterest expense increased \$380,000, or 2.9%, to \$13.4 million for the year ended June 30, 2015 from \$13.0 million for the year ended June 30, 2014. The largest components of this increase were compensation and benefits, which increased \$124,000, or 1.5%, equipment expense, which increased \$126,000, or 15.0%, and professional services, which increased \$167,000, or 48.0%. Increased medical insurance costs, normal salary increases, and stock equity plan expenses primarily accounted for the increase in compensation and benefits expense. The increase in equipment expense was due to routine technology upgrades and the increase in professional services was due to additional services received in the year ended June 30, 2015. These increases were partially offset by decreases in loss on foreclosed assets, net, advertising, and audit and accounting. The decrease in loss on foreclosed assets, net, was due to smaller losses taken in the year ended June 30, 2015, while the decrease in advertising was due

to increased expenses in the year ended June 30, 2014 when the Savoy office was opened, and the decrease in audit and accounting was due to additional services received in the year ended June 30, 2014.

Table of Contents

Income Tax Expense. We recorded a provision for income tax of \$1.8 million for the year ended June 30, 2015, compared to a provision for income tax of \$1.9 million for the year ended June 30, 2014, reflecting effective tax rates of 35.9% and 34.9%, respectively.

Asset Quality and Allowance for Loan Losses

For information regarding asset quality and allowance for loan loss activity, see Item 1. Business Non-performing and Problem Assets and Item 1. Business Allowance for Loan Losses.

Average Balances and Yields

The following tables set forth average balance sheets, average yields and costs, and certain other information for the periods indicated. Tax-equivalent yield adjustments have not been made for tax-exempt securities. All average balances are based on month-end balances, which management deems to be representative of the operations of Iroquois Federal. Non-accrual loans were included in the computation of average balances, but have been reflected in the table as loans carrying a zero yield. The yields set forth below include the effect of deferred fees, discounts and premiums that are amortized or accreted to interest income or expense.

| Average interest-earning assets to interest-bearing liabilities | | 118% | | | 117% | | | 119% | |

(1) Includes home equity loans.

(2) Net interest rate spread represents the difference between the yield on average interest-earning assets and the cost of average interest-bearing liabilities.

(3) Net interest-earning assets represents total interest-earning assets less total interest-bearing liabilities.

(4) Net interest margin represents net interest income divided by average total interest-earning assets.

Table of Contents**Rate/Volume Analysis**

The following table presents the effects of changing rates and volumes on our net interest income for the periods indicated. The rate column shows the effects attributable to changes in rate (changes in rate multiplied by prior volume). The volume column shows the effects attributable to changes in volume (changes in volume multiplied by prior rate). The net column represents the sum of the prior columns. For purposes of this table, changes attributable to both rate and volume, which cannot be segregated, have been allocated to the changes due to rate and the changes due to volume in proportion to the relationship of the absolute dollar amounts of change in each.

Table of Contents

Management of Market Risk

General. Because the majority of our assets and liabilities are sensitive to changes in interest rates, our most significant form of market risk is interest rate risk. We are vulnerable to an increase in interest rates to the extent that our interest-bearing liabilities mature or reprice more quickly than our interest-earning assets. As a result, a principal part of our business strategy is to manage interest rate risk and limit the exposure of our net interest income to changes in market interest rates. Accordingly, our Board of Directors has established an Asset/Liability Management Committee pursuant to our Interest Rate Risk Management Policy that is responsible for evaluating the interest rate risk inherent in our assets and liabilities, for determining the level of risk that is appropriate, given our business strategy, operating environment, capital, liquidity and performance objectives, and for managing this risk consistent with the guidelines approved by the Board of Directors.

As part of our ongoing asset-liability management, we currently use the following strategies to manage our interest rate risk:

- (i) sell the majority of our long-term, fixed-rate one- to four-family residential mortgage loans that we originate;
- (ii) lengthen the weighted average maturity of our liabilities through retail deposit pricing strategies and through longer-term wholesale funding sources such as fixed-rate advances from the Federal Home Loan Bank of Chicago;
- (iii) invest in shorter- to medium-term investment securities and interest-earning time deposits;
- (iv) originate commercial mortgage loans, including multi-family loans and land loans, commercial loans and consumer loans, which tend to have shorter terms and higher interest rates than one- to four-family residential mortgage loans, and which generate customer relationships that can result in larger noninterest-bearing demand deposit accounts; and
- (v) maintain adequate levels of capital.

We currently do not engage in hedging activities, such as futures, options or swap transactions, or investing in high-risk mortgage derivatives, such as collateralized mortgage obligations, residual interests, real estate mortgage investment conduit residual interests or stripped mortgage backed securities.

In addition, changes in interest rates can affect the fair values of our financial instruments. For additional information regarding the fair values of our assets and liabilities, see Note 17 to the Notes to our Consolidated Financial Statements.

Interest Rate Risk Analysis

We also perform our own internal interest rate risk analysis that assesses our earnings at risk, capital at risk and our net economic value of equity (NEVE) at risk. Our analysis involves shocking interest rates up to 400 basis points using a dynamic and realistic yield curve as well as real world simulation and timing. In addition to measuring net

economic value of equity, our model also analyzes earnings at risk for both net interest income and net income, and capital at risk for tangible equity capital, tier 1 risk based capital, and total risk based capital in rate shock scenarios up to 400 basis points over a three-year period. Due to the current low interest rate environment, we do not analyze rate shock scenarios involving decreasing interest rates at this time. When interest rates increase, we will also analyze scenarios involving decreasing rates. Details of our general ledger along with key data from each deposit, loan, investment, and borrowing are downloaded into our forecasting model, which takes into account both market and internal trends. Historical testing is done internally on a regular basis to confirm the validity of the model, while third-party testing is done periodically. Details of our interest rate risk analysis are reviewed by the Asset/Liability Management Committee and presented to the Board on a quarterly basis.

The tables below illustrate the simulated impact of rate shock scenarios up to 400 basis points over a three-year period on our earnings at risk (for both net interest income and net income) and our capital at risk (for tangible

Table of Contents

equity capital, tier 1 risk-based capital, and total risk-based capital). The earnings at risk tables show net interest income and net income decreasing in a rising rate environment. The capital at risk tables show tangible equity capital, tier 1 risk-based capital, and total risk-based capital all remain well capitalized when shocked 400 basis points over a three year period. The net economic value of equity at risk table below sets forth our calculation of the estimated changes in our net economic value of equity at June 30, 2015 resulting from immediate rate shocks up to 400 basis points.

Earnings at Risk

Liquidity and Capital Resources

Liquidity is the ability to meet current and future financial obligations of a short-term nature. Our primary sources of funds consist of deposit inflows, loan sales and repayments, advances from the Federal Home Loan Bank of Chicago, and maturities of securities. We also utilize brokered certificates of deposit, internet funding, borrowings from the Federal Reserve, and sales of securities, when appropriate. While maturities and scheduled amortization of loans and securities are predictable sources of funds, deposit flows and mortgage prepayments are greatly influenced by general interest rates, economic conditions and competition. Our Asset/Liability Management Committee is responsible for establishing and monitoring our liquidity targets and strategies in order to ensure that sufficient liquidity exists for meeting the borrowing needs and deposit withdrawals of our customers as well as unanticipated contingencies. For the years ended June 30, 2015 and 2014, our liquidity ratio averaged 31.6% and 36.3% of our total assets, respectively. We believe that we have enough sources of liquidity to satisfy our short- and long-term liquidity needs as of June 30, 2015.

Table of Contents

We regularly monitor and adjust our investments in liquid assets based upon our assessment of: (i) expected loan demand; (ii) expected deposit flows; (iii) yields available on interest-earning deposits and securities; and (iv) the objectives of our asset/liability management program. Excess liquid assets are invested generally in interest-earning deposits and short- and medium-term securities.

Our most liquid assets are cash and cash equivalents. The levels of these assets are affected by our operating, financing, lending and investing activities during any given period. At June 30, 2015, cash and cash equivalents totaled \$13.2 million.

Our cash flows are derived from operating activities, investing activities and financing activities as reported in our Statements of Cash Flows included in our financial statements.

At June 30, 2015, we had \$32.0 million in loan commitments outstanding, and \$32.9 million in unused lines of credit to borrowers. Certificates of deposit due within one year of June 30, 2015 totaled \$150.3 million, or 36.2% of total deposits. Depending on market conditions, we may be required to pay higher rates on such deposits or other borrowings than we currently pay on the certificates of deposit due on or before June 30, 2015. Additionally, it is our intention as we continue to grow our commercial real estate portfolio, to emphasize lower cost deposit relationships with these commercial loan customers and thereby replace the higher cost certificates with lower cost deposits. We have the ability to attract and retain deposits by adjusting the interest rates offered.

Our primary investing activity is originating loans. During the years ended June 30, 2015 and 2014, we originated \$146.1 million and \$81.8 million of loans, respectively.

Financing activities consist primarily of activity in deposit accounts and Federal Home Loan Bank advances. We had a net increase in total deposits of \$11.0 million for the year ended June 30, 2015, and a net increase in total deposits of \$33.4 million for the year ended June 30, 2014. Deposit flows are affected by the overall level of interest rates, the interest rates and products offered by us and our local competitors, and by other factors.

Liquidity management is both a daily and long-term function of business management. If we require funds beyond our ability to generate them internally, borrowing agreements exist with the Federal Home Loan Bank of Chicago, which provides an additional source of funds. Federal Home Loan Bank advances were \$58.0 million at June 30, 2015. At June 30, 2015, we had the ability to borrow up to an additional \$95.5 million from the Federal Home Loan Bank of Chicago based on our collateral and had the ability to borrow an additional \$23.7 million from the Federal Reserve based upon current collateral pledged.

Iroquois Federal is subject to various regulatory capital requirements, including a risk-based capital measure. The risk-based capital guidelines include both a definition of capital and a framework for calculating risk-weighted assets by assigning balance sheet assets and off-balance sheet items to broad risk categories. At June 30, 2015, Iroquois Federal exceeded all regulatory capital requirements. Iroquois Federal is considered well capitalized under regulatory guidelines. See Note 12 Regulatory Matters of the notes to the financial statements included in this Annual Report on Form 10-K.

Off-Balance Sheet Arrangements and Aggregate Contractual Obligations

Commitments. As a financial services provider, we routinely are a party to various financial instruments with off-balance-sheet risks, such as commitments to extend credit and unused lines of credit. While these contractual obligations represent our future cash requirements, a significant portion of commitments to extend credit may expire without being drawn upon. Such commitments are subject to the same credit policies and approval process accorded

to loans we make. For additional information, see Note 19 Commitments and Credit Risk of the notes to the financial statements included in this Annual Report on Form 10-K.

Table of Contents

Contractual Obligations. In the ordinary course of our operations, we enter into certain contractual obligations. Such obligations include data processing services, operating leases for premises and equipment, agreements with respect to borrowed funds and deposit liabilities.

Recent Accounting Pronouncements

For a discussion of the impact of recent and future accounting pronouncements, see Note 1 of the notes to our consolidated financial statements beginning on page F-1 of this Annual Report on Form 10-K.

Impact of Inflation and Changing Prices

Our financial statements and related notes have been prepared in accordance with U.S. GAAP. U.S. GAAP generally requires the measurement of financial position and operating results in terms of historical dollars without consideration of changes in the relative purchasing power of money over time due to inflation. The impact of inflation is reflected in the increased cost of our operations. Unlike industrial companies, our assets and liabilities are primarily monetary in nature. As a result, changes in market interest rates have a greater impact on our performance than the effects of inflation.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information required by this item is incorporated herein by reference to Part II, Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operation*.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The Consolidated Financial Statements, including supplemental data, of IF Bancorp begin on page F-1 of this Annual Report.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures.

The Company's President and Chief Executive Officer, its Chief Financial Officer, and other members of its senior management team have evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) or 15d-15(e)), as of June 30, 2015. Based on such evaluation, the President and Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures, as of the end of the period covered by this report, were adequate and effective to provide reasonable assurance that information required to be disclosed by the Company, including Iroquois Federal, in reports that are filed or submitted under the Exchange Act, is (1) recorded, processed, summarized and reported, within the time periods specified in the

Commission's rules and forms and (2) is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer as appropriate to allow timely discussions regarding required disclosures.

Changes in Internal Controls Over Financial Reporting.

There have been no changes in the Company's internal control over financial reporting during the quarter ended June 30, 2015 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Management's Report on Internal Control Over Financial Reporting.

The management of the Company is responsible for establishing and maintaining adequate internal control

Table of Contents

over financial reporting. The internal control process has been designed under our supervision to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company's financial statements for external reporting purposes in accordance with accounting principles generally accepted in the United States of America.

Management conducted an assessment of the effectiveness of the Company's internal control over financial reporting as of June 30, 2015, utilizing the framework established in *Internal Control - Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment, management has determined that the Company's internal control over financial reporting as of June 30, 2015 is effective.

Our internal control over financial reporting includes policies and procedures that pertain to the maintenance of records that accurately and fairly reflect, in reasonable detail, transactions and dispositions of assets; and provide reasonable assurances that: (1) transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America; (2) receipts and expenditures are being made only in accordance with authorizations of management and the directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the Company's financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

ITEM 9B. OTHER INFORMATION

Not applicable.

Table of Contents

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information relating to the directors and officers of the Company, information regarding compliance with Section 16(a) of the Exchange Act and information regarding the audit committee and audit committee financial expert is incorporated herein by reference to the Company's Proxy Statement for the Registrant's Annual Meeting of Stockholders, to be held on November 23, 2015 (the Proxy Statement) under the captions Proposal 1 Election of Directors, Executive Officers, Section 16(a) Beneficial Ownership Reporting Compliance, Nominating Committee Procedures Procedures to be Followed by Stockholders, Corporate Governance Committees of the Board of Directors and Audit Committee is incorporated herein by reference.

Report of Independent Registered Public Accounting Firm

Audit Committee and Board of Directors

IF Bancorp, Inc.

Watseka, Illinois

We have audited the accompanying consolidated balance sheets of IF Bancorp, Inc. (Company) as of June 30, 2015 and 2014, and the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for the years then ended. The Company's management is responsible for these financial statements. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing auditing procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. Our audits also include examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of IF Bancorp, Inc. as of June 30, 2015 and 2014, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Notes to Consolidated Financial Statements

June 30, 2015 and 2014

(Table dollar amounts in thousands)

Note 1: Nature of Operations and Summary of Significant Accounting Policies

Nature of Operations

IF Bancorp, Inc., (IF Bancorp or the Company) is a Maryland corporation whose principal activity is the ownership and management of its wholly-owned subsidiary, Iroquois Federal Savings and Loan Association (Iroquois Federal or the Association).

The Association is primarily engaged in providing a full range of banking and financial services to individual and corporate customers within a 100-mile radius of its locations in Watseka, Danville, Clifton, Hoopeston and Savoy, Illinois and Osage Beach, Missouri. The principal activity of the Association's wholly-owned subsidiary, L.C.I. Service Corporation (L.C.I.), is the sale of property and casualty insurance. The Company is primarily engaged in the business of directing, planning, and coordinating the business activities of the Association. The Company and Association are subject to competition from other financial institutions. The Company and Association are also subject to the regulation of certain federal and state agencies and undergo periodic examinations by those regulatory authorities.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company, the Association and Association's wholly owned subsidiary, L.C.I. All significant intercompany accounts and transactions have been eliminated in consolidation.

Operating Segment

The Company provides community banking services, including such products and services as loans, certificates of deposits, savings accounts, and mortgage originations. These activities are reported as a single operating segment.

The Company does not derive revenues from, or have assets located in, foreign countries, nor does it derive revenues from any single customer that represents 10% or more of the Company's total revenues.

Table of Contents

IF Bancorp, Inc.

Notes to Consolidated Financial Statements

June 30, 2015 and 2014

(Table dollar amounts in thousands)

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Material estimates that are particularly susceptible to significant change relate to the determination of the allowance for loan losses and the valuation of real estate acquired in connection with foreclosures or in satisfaction of loans, fair value measurements and classifications of investment securities, loan servicing rights and income taxes.

Interest-bearing Deposits in Banks

Interest-bearing deposits in banks mature within five years and are carried at cost.

Cash Equivalents

The Company considers all liquid investments with original maturities of three months or less to be cash equivalents. At June 30, 2015 and 2014, cash equivalents consisted primarily of noninterest bearing deposits and interest bearing demand deposits.

Securities

Securities are classified as available for sale and recorded at fair value, with unrealized gains and losses excluded from earnings and reported in other comprehensive income (loss). Purchase premiums and discounts are recognized in interest income using the interest method over the terms of the securities. Gains and losses on the sale of securities are recorded on the trade date and are determined using the specific identification method.

Loans Held for Sale

Mortgage loans originated and intended for sale in the secondary market are carried at the lower of cost or fair value in the aggregate. Net unrealized losses, if any, are recognized through a valuation allowance by charges to noninterest income. Gains and losses on loan sales are recorded in noninterest income, and direct loan origination costs and fees are deferred at origination of the loan and are recognized in noninterest income upon sale of the loan.

Notes to Consolidated Financial Statements

June 30, 2015 and 2014

(Table dollar amounts in thousands)

Loans

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoffs are reported at their outstanding principal balances adjusted for unearned income, charge-offs, the allowance for loan losses, and any unamortized deferred fees or costs on originated loans.

For loans amortized at cost, interest income is accrued based on the unpaid principal balance. Loan origination fees, net of certain direct origination costs, are deferred and amortized as a level yield adjustment over the respective term of the loan.

The accrual of interest on loans is discontinued at the time the loan is 90 days past due unless the credit is well-secured and in process of collection. Past due status is based on contractual terms of the loan. In all cases, loans are placed on nonaccrual or charged off at an earlier date if collection of principal or interest is considered doubtful.

All interest accrued but not collected for loans that are placed on nonaccrual or charged off are reversed against interest income. The interest on these loans is accounted for on the cash-basis or cost-recovery method, until qualifying for return to accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Allowance for Loan Losses

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to income. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectibility of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

The allowance consists of allocated and general components. The allocated component relates to loans that are classified as impaired. For those loans that are classified as impaired, an allowance is established when the collateral value of the impaired loan is lower than the carrying value of that loan. The general component covers nonclassified loans and is based on historical charge-off experience and expected loss given default derived from the Company's internal risk rating process. Other adjustments may be made to the allowance for pools of loans after an assessment of internal or external influences on credit quality that are not fully reflected in the historical loss or risk rating data.

Table of Contents**IF Bancorp, Inc.****Notes to Consolidated Financial Statements****June 30, 2015 and 2014****(Table dollar amounts in thousands)**

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis for commercial and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price or the fair value of the collateral if the loan is collateral dependent.

Groups of loans with similar characteristics, including individually evaluated loans not determined to be impaired, are collectively evaluated for impairment based on the group's historical loss experience adjusted for changes in trends, conditions and other relevant factors that affect repayment of the loans.

Premises and Equipment

Depreciable assets are stated at cost less accumulated depreciation. Depreciation is charged to expense using the straight-line method over the estimated useful lives of the assets.

The estimated useful lives for each major depreciable classification of premises and equipment are as follows:

| | |
|----------------------------|-------------|
| Buildings and improvements | 35-40 years |
| Furniture and equipment | 3-5 years |

Federal Home Loan Bank Stock

Federal Home Loan Bank stock is a required investment for institutions that are members of the Federal Home Loan Bank system. The required investment in the common stock is based on a predetermined formula, carried at cost and evaluated for impairment.

Foreclosed Assets Held for Sale

Assets acquired through, or in lieu of, loan foreclosure are held for sale and are initially recorded at fair value less cost to sell at the date of foreclosure, establishing a new cost basis. Subsequent to foreclosure, valuations are periodically performed by management and the assets are carried at the lower of carrying amount or fair value less cost to sell.

Revenue and expenses from operations and changes in the valuation allowance are included in net income or expense from foreclosed assets.

F-14

Table of Contents

IF Bancorp, Inc.

Notes to Consolidated Financial Statements

June 30, 2015 and 2014

(Table dollar amounts in thousands)

Bank-owned Life Insurance

Bank-owned life insurance policies are reflected on the consolidated balance sheets at the estimated cash surrender value. Changes in the cash surrender value are reflected in noninterest income in the consolidated statements of income.

Fee Income

Loan origination fees, net of direct origination costs, are recognized as income using the level-yield method over the contractual life of the loans.

Mortgage Servicing Rights

Mortgage servicing assets are recognized separately when rights are acquired through purchase or through sale of financial assets. Under the servicing assets and liabilities accounting guidance (ASC 860-50), servicing rights resulting from the sale or securitization of loans originated by the Company are initially measured at fair value at the date of transfer. The Company has elected to initially and subsequently measure the mortgage servicing rights for consumer mortgage loans using the fair value method. Under the fair value method, the servicing rights are carried in the balance sheet at fair value and the changes in fair value are reported in earnings in the period in which the changes occur.

Fair value is based on market prices for comparable mortgage servicing contracts, when available, or alternatively, is based on a valuation model that calculates the present value of estimated future net servicing income. The valuation model incorporates assumptions that market participants would use in estimating future net servicing income, such as the cost to service, the discount rate, the custodial earnings rate, an inflation rate, ancillary income, prepayment speeds and default rates and losses. These variables change from quarter to quarter as market conditions and projected interest rates change, and may have an adverse impact on the value of the mortgage servicing right and may result in a reduction to noninterest income.

Servicing fee income is recorded for fees earned for servicing loans. The fees are based on a contractual percentage of the outstanding principal or a fixed amount per loan and are recorded as income when earned. The change in fair value of mortgage servicing rights is netted against loan servicing fee income.

Table of Contents

IF Bancorp, Inc.

Notes to Consolidated Financial Statements

June 30, 2015 and 2014

(Table dollar amounts in thousands)

Transfers of Financial Assets

Transfers of financial assets are accounted for as sales, when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets and (3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity or the ability to unilaterally cause the holder to return specific assets.

Income Taxes

The Company accounts for income taxes in accordance with income tax accounting guidance (ASC 740, *Income Taxes*). The income tax accounting guidance results in two components of income tax expense: current and deferred. Current income tax expense reflects taxes to be paid or refunded for the current period by applying the provisions of the enacted tax law to the taxable income or excess of deductions over revenues. The Company determines deferred income taxes using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is based on the tax effects of the differences between the book and tax bases of assets and liabilities, and enacted changes in tax rates and laws are recognized in the period in which they occur. Deferred income tax expense results from changes in deferred tax assets and liabilities between periods. Deferred tax assets are reduced by a valuation allowance if, based on the weight of evidence available, it is more likely than not that some portion or all of a deferred tax asset will not be realized.

Tax positions are recognized if it is more likely than not, based on the technical merits, that the tax position will be realized or sustained upon examination. The term more likely than not means a likelihood of more than 50 percent; the terms examined and upon examination also include resolution of the related appeals or litigation processes, if any. A tax position that meets the more-likely-than-not recognition threshold is initially and subsequently measured as the largest amount of tax benefit that has a greater than 50 percent likelihood of being realized upon settlement with a taxing authority that has full knowledge of all relevant information. The determination of whether or not a tax position has met the more-likely-than-not recognition threshold considers the facts, circumstances and information available at the reporting date and is subject to management's judgment. With a few exceptions, the Company is no longer subject to U.S. federal, state and local or non-U.S. income tax examinations by tax authorities for years before 2011.

The Company recognizes interest and penalties on income taxes as a component of income tax expense.

The Company files consolidated income tax returns with its subsidiary.

Table of Contents

IF Bancorp, Inc.

Notes to Consolidated Financial Statements

June 30, 2015 and 2014

(Table dollar amounts in thousands)

Earnings Per Share

Basic earnings per share represents income available to common stockholders divided by the weight-average number of common shares outstanding during each year. Diluted earnings per share reflects additional potential common shares that would have been outstanding if dilutive potential common shares had been issued, as well as any adjustment to income that would result from the assumed issuance. Potential common shares that may be issued by the Company relate solely to outstanding stock options and restricted stock awards and are determined using the treasury stock method.

Comprehensive Income

Comprehensive income consists of net income and other comprehensive income (loss), net of applicable income taxes. Other comprehensive income (loss) includes unrealized appreciation (depreciation) on available-for-sale securities and changes in the funded status of the postretirement health benefit plan.

Stock-based Compensation Plans

At June 30, 2015, the Company has stock-based compensation plans (stock options and restricted stock) which are described more fully in Note 15.

Transfers between Fair Value Hierarchy Levels

Transfers in and out of Level 1 (quoted market prices), Level 2 (other significant observable inputs) and Level 3 (significant unobservable inputs) are recognized on the period ending date.

Recent and Future Accounting Requirements

In May, 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606). The update provides a five-step revenue recognition model for all revenue arising from contracts with customers and affects all entities that enter into contracts to provide goods or services to their customers (unless the contracts are included in the scope of other standards). The guidance requires an entity to recognize the revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. For public entities, the guidance is effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period, and must be applied either retrospectively or using the modified retrospective approach. Early adoption is not permitted. In April 2015, the Financial Accounting Standards Board voted for a one year deferral of the effective date of ASU 2014-09. Management is evaluating the new guidance, but does not expect the adoption of this guidance to have a material impact on the Company's Consolidated Financial Statements.

Table of Contents**IF Bancorp, Inc.****Notes to Consolidated Financial Statements****June 30, 2015 and 2014****(Table dollar amounts in thousands)****Note 2: Securities**

The amortized cost and approximate fair values, together with gross unrealized gains and losses, of securities are as follows:

| | Amortized Cost | Gross Unrealized Gains | Gross Unrealized Losses | Fair Value |
|---|-------------------|------------------------------|-------------------------------|---------------|
| Available-for-sale Securities: | | | | |
| June 30, 2015: | | | | |
| U.S. Government and federal agency and Government sponsored enterprises (GSEs) | \$ 105,742 | \$ 2,283 | \$ (87) | \$ 107,938 |
| Mortgage-backed: | | | | |
| GSE residential | 59,213 | 531 | (904) | 58,840 |
| State and political subdivisions | 3,585 | 267 | | 3,852 |
| | \$ 168,540 | \$ 3,081 | \$ (991) | \$ 170,630 |
| June 30, 2014: | | | | |
| U.S. Government and federal agency and Government sponsored enterprises (GSEs) | \$ 112,511 | \$ 2,773 | \$ (622) | \$ 114,662 |
| Mortgage-backed: | | | | |
| GSE residential | 67,033 | 721 | (1,022) | 66,732 |
| State and political subdivisions | 3,022 | 185 | (15) | 3,192 |
| | \$ 182,566 | \$ 3,679 | \$ (1,659) | \$ 184,586 |

With the exception of U.S. Government and federal agency and GSE securities and Mortgage-backed-GSE residential securities with a book value of \$105,742,000 and \$59,213,000, respectively, and a market value of \$107,938,000 and \$58,840,000, respectively at June 30, 2015, the Company held no securities at June 30, 2015 with a book value that exceeded 10% of total equity.

All mortgage-backed securities at June 30, 2015 and 2014 were issued by government sponsored enterprises.

Table of Contents**IF Bancorp, Inc.****Notes to Consolidated Financial Statements****June 30, 2015 and 2014****(Table dollar amounts in thousands)**

The amortized cost and fair value of available-for-sale securities at June 30, 2015, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

| | Amortized Cost | Fair Value |
|----------------------------|---------------------------|-----------------------|
| Within one year | \$ 36 | \$ 36 |
| One to five years | 24,920 | 25,981 |
| Five to ten years | 82,384 | 83,657 |
| After ten years | 1,987 | 2,116 |
| | 109,327 | 111,790 |
| Mortgage-backed securities | 59,213 | 58,840 |
| Totals | \$ 168,540 | \$ 170,630 |

The carrying value of securities pledged as collateral, to secure public deposits and for other purposes, was \$58,260,000 at June 30, 2015 and \$50,144,000 at June 30, 2014.

Gross gains of \$516,000 and \$1,174,000 and gross losses of \$540,000 and \$1,297,000 resulting from sales of available-for-sale securities were realized for 2015 and 2014, respectively. The tax credit applicable to these net realized losses amounted to approximately \$(10,000) and \$(50,000), respectively.

Certain investments in debt securities are reported in the consolidated financial statements at an amount less than their historical cost. Total fair value of these investments at June 30, 2015 and 2014, was \$49,541,000 and \$69,616,000, respectively, which is approximately 29.0% and 37.7% of the Company's available-for-sale investment portfolio. These declines primarily resulted from recent increases in market interest rates. Management believes the declines in fair value for these securities are temporary.

Table of Contents**IF Bancorp, Inc.****Notes to Consolidated Financial Statements****June 30, 2015 and 2014****(Table dollar amounts in thousands)**

The following table shows the Company's gross unrealized investment losses and the fair value of the Company's investments with unrealized losses that are not deemed to be other-than-temporarily impaired, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position at June 30, 2015 and 2014:

| Description of Securities | Less Than 12 Months Unrealized | | 12 Months or More Unrealized | | Total Unrealized | |
|--|--------------------------------------|----------|---------------------------------|------------|---------------------|------------|
| | Fair Value | Losses | Fair Value | Losses | Fair Value | Losses |
| June 30, 2015: | | | | | | |
| U.S. Government and federal agency and Government sponsored enterprises (GSE's) | \$ 9,913 | \$ (87) | \$ | \$ | \$ 9,913 | \$ (87) |
| Mortgage-backed: | | | | | | |
| GSE residential | 20,875 | (322) | 18,753 | (582) | 39,628 | (904) |
| State and political subdivisions | | | | | | |
| Total temporarily impaired securities | \$ 30,788 | \$ (409) | \$ 18,753 | \$ (582) | \$ 49,541 | \$ (991) |
| June 30, 2014: | | | | | | |
| U.S. Government and federal agency and Government sponsored enterprises (GSE's) | \$ 6,616 | \$ (148) | \$ 17,370 | \$ (474) | \$ 23,986 | \$ (622) |
| Mortgage-backed: | | | | | | |
| GSE residential | | | 44,585 | (1,022) | 44,585 | (1,022) |
| State and political subdivisions | | | 1,045 | (15) | 1,045 | (15) |
| Total temporarily impaired securities | \$ 6,616 | \$ (148) | \$ 63,000 | \$ (1,511) | \$ 69,616 | \$ (1,659) |

The unrealized losses on the Company's investment in residential mortgage-backed securities, state and political subdivisions, and U.S. Government and federal agency and Government sponsored enterprises were caused by interest rate increases. The Company expects to recover the amortized cost basis over the term of the securities. Because the decline in market value is attributable to changes in interest rates and not credit quality, and because the Company does not intend to sell the investments and it is not more likely than not the Company will be required to sell the investments before recovery of their amortized cost bases, which may be maturity, the Company does not consider those investments to be other-than-temporarily impaired at June 30, 2015.

Table of Contents**IF Bancorp, Inc.****Notes to Consolidated Financial Statements****June 30, 2015 and 2014****(Table dollar amounts in thousands)****Note 3: Loans and Allowance for Loan Losses**

Classes of loans at June 30, include:

| | 2015 | 2014 |
|--|-------------------|-------------------|
| Real estate loans | | |
| One- to four-family, including home equity loans | \$ 145,064 | \$ 149,549 |
| Multi-family | 58,399 | 61,603 |
| Commercial | 103,614 | 83,134 |
| Home equity lines of credit | 7,713 | 7,824 |
| Construction | 987 | 1,572 |
| Commercial | 37,151 | 23,120 |
| Consumer | 8,325 | 8,509 |
| | 361,253 | 335,311 |
| Less | | |
| Unearned fees and discounts, net | 155 | 104 |
| Loans in process | 693 | 1,325 |
| Allowance for loan losses | 4,211 | 3,958 |
| Loans, net | \$ 356,194 | \$ 329,924 |

The Company had loans held for sale included in one- to four-family real estate loans totaling \$93,000 and \$313,000 as of June 30, 2015 and 2014, respectively.

The Company believes that sound loans are a necessary and desirable means of employing funds available for investment. Recognizing the Company's obligations to its depositors and to the communities it serves, authorized personnel are expected to seek to develop and make sound, profitable loans that resources permit and that opportunity affords. The Company maintains lending policies and procedures in place designed to focus our lending efforts on the types, locations, and duration of loans most appropriate for our business model and markets. The Company's lending activity includes the origination of one- to four-family residential mortgage loans, multi-family loans, commercial real estate loans, home equity lines of credits, commercial business loans, consumer (consisting primarily of automobile loans), and, to a much lesser extent, construction loans and land loans. The primary lending market includes the Illinois counties of Vermilion, Iroquois and Champaign, as well as the adjacent counties in Illinois and Indiana. The Company also has a loan production and wealth management office in Osage Beach, Missouri, which serves the Missouri counties of Camden, Miller, and Morgan. Generally, loans are collateralized by assets, primarily real estate,

of the borrowers and guaranteed by individuals. The loans are expected to be repaid from cash flows of the borrowers or from proceeds from the sale of selected assets of the borrowers.

Table of Contents

IF Bancorp, Inc.

Notes to Consolidated Financial Statements

June 30, 2015 and 2014

(Table dollar amounts in thousands)

Management reviews and approves the Company's lending policies and procedures on a routine basis. Management routinely (at least quarterly) reviews our allowance for loan losses and reports related to loan production, loan quality, concentrations of credit, loan delinquencies and non-performing and potential problem loans. Our underwriting standards are designed to encourage relationship banking rather than transactional banking. Relationship banking implies a primary banking relationship with the borrower that includes, at a minimum, an active deposit banking relationship in addition to the lending relationship. The integrity and character of the borrower are significant factors in our loan underwriting. As a part of underwriting, tangible positive or negative evidence of the borrower's integrity and character are sought out. Additional significant underwriting factors beyond location, duration, the sound and profitable cash flow basis underlying the loan and the borrower's character are the quality of the borrower's financial history, the liquidity of the underlying collateral and the reliability of the valuation of the underlying collateral.

The Company's policies and loan approval limits are established by the Board of Directors. The loan officers generally have authority to approve one- to four-family residential mortgage loans up to \$100,000, other secured loans up to \$50,000, and unsecured loans up to \$10,000. Managing Officers (those with designated loan approval authority), generally have authority to approve one- to four-family residential mortgage loans up to \$300,000, other secured loans up to \$300,000, and unsecured loans up to \$100,000. In addition, any two individual officers may combine their loan authority limits to approve a loan. Our Loan Committee may approve one- to four-family residential mortgage loans, commercial real estate loans, multi-family real estate loans and land loans up to \$1,000,000 in aggregate loans or \$750,000 for individual loans, and unsecured loans up to \$300,000. All loans above these limits must be approved by the Operating Committee, consisting of the Chairman, and up to four other Board members. At no time is a borrower's total borrowing relationship to exceed our regulatory lending limit. Loans to related parties, including executive officers and the Company's directors, are reviewed for compliance with regulatory guidelines and the Board of Directors at least annually.

The Company conducts internal loan reviews that validate the loans against the Company's loan policy quarterly for mortgage, consumer, and small commercial loans on a sample basis, and all larger commercial loans on an annual basis. The Company also receives independent loan reviews performed by a third party on larger commercial loans to be performed annually. In addition to compliance with our policy, the third party loan review process reviews the risk assessments made by our credit department, lenders and loan committees. Results of these reviews are presented to management and the Board of Directors.

Table of Contents

IF Bancorp, Inc.

Notes to Consolidated Financial Statements

June 30, 2015 and 2014

(Table dollar amounts in thousands)

The Company's lending can be summarized into six primary areas; one- to four-family residential mortgage loans, commercial real estate and multi-family real estate loans, home equity lines of credits, real estate construction, commercial business loans, and consumer loans.

One- to four-family Residential Mortgage Loans

The Company offers one- to four-family residential mortgage loans that conform to Fannie Mae and Freddie Mac underwriting standards (conforming loans) as well as non-conforming loans. In recent years there has been an increased demand for long-term fixed-rate loans, as market rates have dropped and remained near historic lows. As a result, the Company has sold a substantial portion of the fixed-rate one- to four-family residential mortgage loans with terms of 15 years or greater. Generally, the Company retains fixed-rate one- to four-family residential mortgage loans with terms of less than 15 years, although this has represented a small percentage of the fixed-rate loans originated in recent years due to the favorable long-term rates for borrower.

In addition, the Company also offers home equity loans that are secured by a second mortgage on the borrower's primary or secondary residence. Home equity loans are generally underwritten using the same criteria used to underwrite one- to four-family residential mortgage loans.

As one- to four-family residential mortgage and home equity loan underwriting are subject to specific regulations, the Company typically underwrites its one- to four-family residential mortgage and home equity loans to conform to widely accepted standards. Several factors are considered in underwriting including the value of the underlying real estate and the debt to income and credit history of the borrower.

Commercial Real Estate and Multi-Family Real Estate Loans

Commercial real estate mortgage loans are primarily secured by office buildings, owner-occupied businesses, strip mall centers, churches, and farm loans secured by real estate. In underwriting commercial real estate and multi-family real estate loans, the Company considers a number of factors, which include the projected net cash flow to the loan's debt service requirement, the age and condition of the collateral, the financial resources and income level of the borrower and the borrower's experience in owning or managing similar properties. Personal guarantees are typically obtained from commercial real estate and multi-family real estate borrowers. In addition, the borrower's financial information on such loans is monitored on an ongoing basis by requiring periodic financial statement updates. The repayment of these loans is primarily dependent on the cash flows of the underlying property. However, the commercial real estate loan generally must be supported by an adequate underlying collateral value. The performance and the value of the underlying property may be adversely affected by economic factors or geographical and/or industry specific factors. These loans are subject to other industry guidelines that are closely monitored by the Company.

Table of Contents

IF Bancorp, Inc.

Notes to Consolidated Financial Statements

June 30, 2015 and 2014

(Table dollar amounts in thousands)

Home Equity Lines of Credit

In addition to traditional one- to four-family residential mortgage loans and home equity loans, the Company offers home equity lines of credit that are secured by the borrower's primary or secondary residence. Home equity lines of credit are generally underwritten using the same criteria used to underwrite one- to four-family residential mortgage loans. As home equity lines of credit underwriting are subject to specific regulations, the Company typically underwrites its home equity lines of credit to conform to widely accepted standards. Several factors are considered in underwriting including the value of the underlying real estate and the debt to income and credit history of the borrower.

Commercial Business Loans

The Company originates commercial non-mortgage business (term) loans and adjustable lines of credit. These loans are generally originated to small- and medium-sized companies in the Company's primary market area. Commercial business loans are generally used for working capital purposes or for acquiring equipment, inventory or furniture, and are primarily secured by business assets other than real estate, such as business equipment and inventory, accounts receivable or stock. The Company also offers agriculture loans that are not secured by real estate.

The commercial business loan portfolio consists primarily of secured loans. When making commercial business loans, the Company considers the financial statements, lending history and debt service capabilities of the borrower, the projected cash flows of the business and the value of the collateral, if any. The cash flows of the underlying borrower, however, may not perform consistent with historical or projected information. Further, the collateral securing loans may fluctuate in value due to individual economic or other factors. Loans are typically guaranteed by the principals of the borrower. The Company has established minimum standards and underwriting guidelines for all commercial loan types.

Real Estate Construction Loans

The Company originates construction loans for one- to four-family residential properties and commercial real estate properties, including multi-family properties. The Company generally requires that a commitment for permanent financing be in place prior to closing the construction loan. The repayment of these loans is typically through permanent financing following completion of the construction. Real estate construction loans are inherently more risky than loans on completed properties as the unimproved nature and the financial risks of construction significantly enhance the risks of commercial real estate loans. These loans are closely monitored and subject to other industry guidelines.

Table of Contents

IF Bancorp, Inc.

Notes to Consolidated Financial Statements

June 30, 2015 and 2014

(Table dollar amounts in thousands)

Consumer Loans

Consumer loans consist of installment loans to individuals, primarily automotive loans. These loans are underwritten utilizing the borrower's financial history, including the Fair Isaac Corporation (FICO) credit scoring and information as to the underlying collateral. Repayment is expected from the cash flow of the borrower. Consumer loans may be underwritten with terms up to seven years, fully amortized. Unsecured loans are limited to twelve months. Loan-to-value ratios vary based on the type of collateral. The Company has established minimum standards and underwriting guidelines for all consumer loan collateral types.

Loan Concentrations

The loan portfolio includes a concentration of loans secured by commercial real estate properties amounting to \$162,013,000 and \$144,737,000 as of June 30, 2015 and 2014, respectively. Generally, these loans are collateralized by multi-family and nonresidential properties. The loans are expected to be repaid from cash flows or from proceeds from the sale of the properties of the borrower.

Purchased Loans and Loan Participations

The Company's loans receivable included purchased loans of \$11,489,000 and \$13,688,000 at June 30, 2015 and 2014, respectively. All of these purchased loans are secured by single family homes located out of our primary market area primarily in the Midwest. The Company's loans receivable also include commercial loan participations of \$27,821,000 and \$24,772,000 at June 30, 2015 and 2014, respectively, of which \$8,814,000 and \$7,893,000, at June 30, 2015 and 2014 were outside of our primary market area. These participation loans are secured by real estate and other business assets.

Table of Contents**IF Bancorp, Inc.****Notes to Consolidated Financial Statements****June 30, 2015 and 2014****(Table dollar amounts in thousands)**

The following tables present the balance in the allowance for loan losses and the recorded investment in loans based on portfolio segment and impairment method as of June 30, 2015 and 2014:

| | 2015 | | | | |
|---|-------------------------------------|---------------------|-------------------|--|---------------------|

(Table dollar amounts in thousands)

Management's opinion as to the ultimate collectability of loans is subject to estimates regarding future cash flows from operations and the value of property, real and personal, pledged as collateral. These estimates are affected by changing economic conditions and the economic prospects of borrowers.

Allowance for Loan Losses

The allowance for loan losses represents an estimate of the amount of losses believed inherent in our loan portfolio at the balance sheet date. The allowance calculation involves a high degree of estimation that management attempts to mitigate through the use of objective historical data where available. Loan losses are charged against the allowance for loan losses when management believes that the loan balance is confirmed as uncollectible. Subsequent recoveries, if any, are credited to the allowance. Overall, we believe the reserve to be consistent with prior periods and adequate to cover the estimated losses in our loan portfolio.

The Company's methodology for assessing the appropriateness of the allowance for loan losses consists of two key elements: (1) specific allowances for estimated credit losses on individual loans that are determined to be impaired through the Company's review for identified problem loans; and (2) a general allowance based on estimated credit losses inherent in the remainder of the loan portfolio.

The specific allowance is measured by determining the present value of expected cash flows, the loan's observable market value, or for collateral-dependent loans, the fair value of the collateral adjusted for market conditions and selling expense. Factors used in identifying a specific problem loan include: (1) the strength of the customer's personal or business cash flows; (2) the availability of other sources of repayment; (3) the amount due or past due; (4) the type and value of collateral; (5) the strength of the collateral position; (6) the estimated cost to sell the collateral; and (7) the borrower's effort to cure the delinquency. In addition for loans secured by real estate, the Company also considers the extent of any past due and unpaid property taxes applicable to the property serving as collateral on the mortgage.

The Company establishes a general allowance for loans that are not deemed impaired to recognize the inherent losses associated with lending activities, but which, unlike specific allowances, has not been allocated to particular problem assets. The general valuation allowance is determined by segregating the loans by loan category and assigning allowance percentages based on the Company's historical loss experience and management's evaluation of the collectability of the loan portfolio. The allowance is then adjusted for qualitative factors that, in management's judgment, affect the collectability of the portfolio as of the evaluation date. These qualitative factors may include: (1) Management's assumptions regarding the minimal level of risk for a given loan category; (2) changes in lending policies and procedures, including changes in underwriting standards, and charge-off and recovery practices not considered elsewhere in estimating credit losses; (3) changes in international, national, regional and local economics and business conditions and developments that affect the collectability of the portfolio, including the conditions of various market segments; (4) changes in the nature and volume of the portfolio and in the terms of loans; (5) changes

in the experience, ability, and depth of the lending officers and other relevant staff; (6)

changes in the volume and severity of past due loans, the volume of non-accrual loans, the volume of troubled debt restructured and other loan modifications, and the volume and severity of adversely classified loans; (7) changes in the quality of the loan review system; (8) changes in the value of the underlying collateral for collateral-dependent loans; (9) the existence and effect of any concentrations of credit, and changes in the level of such concentrations; and (10) the effect of other external factors such as competition and legal and regulatory requirements on the level of estimated credit losses in the existing portfolio. The applied loss factors are re-evaluated quarterly to ensure their relevance in the current environment.

Although the Company's policy allows for a general valuation allowance on certain smaller-balance, homogenous pools of loans classified as substandard, the Company has historically evaluated every loan classified as substandard, regardless of size, for impairment as part of the review for establishing specific allowances. The Company's policy also allows for general valuation allowance on certain smaller-balance, homogenous pools of loans which are loans criticized as special mention or watch. A separate general allowance calculation is made on these loans based on historical measured weakness, and which is no less than twice the amount of the general allowance calculated on the non-classified loans.

There have been no changes to the Company's accounting policies or methodology from the prior periods.

Credit Quality Indicators

The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as current financial information, historical payment experience, credit documentation, public information and current economic trends, among other factors. All loans are graded at inception of the loan. Subsequently, analyses are performed on an annual basis and grade changes are made as necessary. Interim grade reviews may take place if circumstances of the borrower warrant a more timely review. The Company utilizes an internal asset classification system as a means of reporting problem and potential problem loans. Under the Company's risk rating system, the Company classifies problem and potential problem loans as Watch, Substandard, Doubtful, and Loss. The Company uses the following definitions for risk ratings:

Pass Loans classified as pass are well protected by the ability of the borrower to pay or by the value of the asset or underlying collateral.

Watch Loans classified as watch have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the Company's credit position at some future date.

Table of Contents

IF Bancorp, Inc.

Notes to Consolidated Financial Statements

June 30, 2015 and 2014

(Table dollar amounts in thousands)

Substandard Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable.

Loss Loans classified as loss are the portion of the loan that is considered uncollectible so that its continuance as an asset is not warranted. The amount of the loss determined will be charged-off.

Risk characteristics applicable to each segment of the loan portfolio are described as follows.

Residential One- to four-family and Equity Lines of Credit Real Estate: The residential one- to four-family real estate loans are generally secured by owner-occupied one- to four-family residences. Repayment of these loans is primarily dependent on the personal income and credit rating of the borrowers. Credit risk in these loans can be impacted by economic conditions within the Company's market areas that might impact either property values or a borrower's personal income. Risk is mitigated by the fact that the loans are of smaller individual amounts and spread over a large number of borrowers.

Commercial and Multi-family Real Estate: Commercial and multi-family real estate loans typically involve larger principal amounts, and repayment of these loans is generally dependent on the successful operations of the property securing the loan or the business conducted on the property securing the loan. These loans are viewed primarily as cash flow loans and secondarily as loans secured by real estate. Credit risk in these loans may be impacted by the creditworthiness of a borrower, property values and the local economies in the Company's market areas.

Construction Real Estate: Construction real estate loans are usually based upon estimates of costs and estimated value of the completed project and include independent appraisal reviews and a financial analysis of the developers and property owners. Sources of repayment of these loans may include permanent loans, sales of developed property, or an interim loan commitment from the Company until permanent financing is obtained. These loans are considered to be higher risk than other real estate loans due to their ultimate repayment being sensitive to interest rate changes, general economic conditions and the availability of long-term financing. Credit risk in these loans may be impacted by the creditworthiness of a borrower, property values and the local economies in the Company's market areas.

Table of Contents**IF Bancorp, Inc.****Notes to Consolidated Financial Statements****June 30, 2015 and 2014****(Table dollar amounts in thousands)**

Commercial: The commercial portfolio includes loans to commercial customers for use in financing working capital needs, equipment purchases and expansions. The loans in this category are repaid primarily from the cash flow of a borrower's principal business operation. Credit risk in these loans is driven by creditworthiness of a borrower and the economic conditions that impact the cash flow stability from business operations.

Consumer: The consumer loan portfolio consists of various term loans such as automobile loans and loans for other personal purposes. Repayment for these types of loans will come from a borrower's income sources that are typically independent of the loan purpose. Credit risk is driven by consumer economic factors (such as unemployment and general economic conditions in the Company's market area) and the creditworthiness of a borrower.

The following tables present the credit risk profile of the Company's loan portfolio, as of June 30, 2015 and 2014, based on rating category and payment activity:
