UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 20-F

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d)

OF THE SECURITIES EXCHANGE ACT OF 1934

For the Fiscal Year Ended: December 31, 2017

Commission file number: 001-11854

NATUZZI S.p.A.

(Exact name of Registrant as specified in its charter)

Republic of Italy

(Jurisdiction of incorporation or organization)

Via Iazzitiello 47, 70029, Santeramo in Colle, Bari, Italy

(Address of principal executive offices)

Mr. Pietro Direnzo

Tel.: +39 080 8820 812; pdirenzo@natuzzi.com; Via Iazzitiello 47, 70029 Santeramo in Colle, Bari, Italy

(Name, telephone, e-mail and/or facsimile number and address of company contact person)

Securities registered or to be registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
American Depositary Shares, each representing one Ordinary Share	New York Stock Exchange
Ordinary Shares, with a par value of 1.00 each	New York Stock Exchange

(for listing purposes only)

Securities registered or to be registered pursuant to Section 12(g) of the Act:

None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

None

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report:

As of December 31, 2017 54,853,045 Ordinary Shares

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or an emerging growth company. See the definitions of large accelerated filer, accelerated filer and emerging growth company in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer

Emerging growth company

If an emerging growth company that prepares its financial statements in accordance with U.S. GAAP, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

The term new or revised financial accounting standard refers to any update issued by the Financial Accounting Standards Board to its Accounting Standards Codification after April 5, 2012.

Edgar Filing: NATUZZI S P A - Form 20-F

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP	IFRS	Other
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

If Other has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow. Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

PRESENTATION OF FINANCIAL AND OTHER INFORMATION

In this annual report on Form 20-F (the Annual Report), references to or Euro are to the Euro and references to U.S. dollars, dollars, U.S.\$ or \$ are to United States dollars.

Amounts stated in U.S. dollars, unless otherwise indicated, have been translated from the Euro amount by converting the Euro amounts into U.S. dollars at the noon buying rate in New York City for cable transfers in foreign currencies as certified for customs purposes by the Federal Reserve Bank of New York (the Noon Buying Rate) for euros on December 31, 2017 of U.S.\$ 1.2022. The foreign currency conversions in this Annual Report should not be taken as representations that the foreign currency amounts actually represent the equivalent U.S. dollar amounts or could be converted into U.S. dollars at the rates indicated.

The Consolidated Financial Statements included in Item 18 of this Annual Report are prepared in conformity with generally accepted accounting principles established by the Italian Accounting Profession (Italian GAAP). These principles vary in certain significant respects from generally accepted accounting principles in the United States (U.S. GAAP). See Note 31 to the Consolidated Financial Statements included in Item 18 of this Annual Report. All discussions in this Annual Report are in relation to Italian GAAP, unless otherwise indicated.

In this Annual Report, the term seat is used as a unit of measurement. A sofa consists of three seats; an armchair consists of one seat.

The terms Natuzzi, Natuzzi Group , Company, Group, we, us, and our, unless otherwise indicated or as the may otherwise require, mean Natuzzi S.p.A. and its consolidated subsidiaries.

None of the websites referred to in this Annual Report, including where a link is provided, nor any of the information contained on such websites is incorporated by reference in the Annual Report.

FORWARD-LOOKING INFORMATION

The Company makes forward-looking statements in this Annual Report. Statements that are not historical facts, including statements about the Group s beliefs and expectations, are forward-looking statements. Words such as believe, expect, intend, plan and anticipate and similar expressions are intended to identify forward-looking statements but are not exclusive means of identifying such statements. These statements are based on management s current plans, estimates and projections, and therefore readers should not place undue reliance on them. Forward-looking statements speak only as of the dates they were made, and the Company undertakes no obligation to update or revise any of them, whether as a result of new information, future events or otherwise.

Projections and targets included in this Annual Report are intended to describe our current targets and goals, and not as a prediction of future performance or results. The attainment of such projections and targets is subject to a number of risks and uncertainties described in the paragraph below and elsewhere in this Annual Report. See Item 3. Key Information Risk Factors.

Forward-looking statements involve inherent risks and uncertainties, as well as other factors that may be beyond our control. The Company cautions readers that a number of important factors could cause actual results to differ materially from those contained in any forward-looking statement. Such factors include, but are not limited to: effects on the Group from competition with other furniture producers, material changes in consumer demand or preferences, significant economic developments in the Group s primary markets, the Group s execution of its reorganization plans for its manufacturing facilities, significant changes in labor, material and other costs affecting the construction of new

plants, significant changes in the costs of principal raw materials, significant exchange rate movements or changes in the Group's legal and regulatory environment, including developments related to the Italian Government's investment incentive or similar programs. The Company cautions readers that the foregoing list of important factors is not exhaustive. When relying on forward-looking statements to make decisions with respect to the Company, investors and others should carefully consider the foregoing factors and other uncertainties and events.

ITEM 3. KEY INFORMATION

Selected Financial Data

The following table sets forth selected consolidated financial data for the periods indicated and is qualified by reference to, and should be read in conjunction with, the Consolidated Financial Statements and the notes thereto included in Item 18 of this Annual Report and the information presented under Operating and Financial Review and Prospects included in Item 5 of this Annual Report. The statement of operations and balance sheets data presented below have been derived from the Consolidated Financial Statements.

As consequence of the application of the new Italian legislation introduced by Legislative Decree no. 139 of August 2015, which endorsed the EU Directive 34/2013, in December 2016, the Italian Accounting Profession (OIC) issued new accounting standards applicable for the annual reporting periods beginning on or after January, 1 2016. Therefore, beginning in 2016, the consolidated financial statements of the Company have been prepared in compliance with these new accounting standards that led only to changes in the classification of some financial statements captions, while there were no changes in Natuzzi's accounting policies. These changes have been applied using the retrospective method, as if the new classification had always been applied.

The changes that have affected the consolidated financial statements of the Company as of December 31, 2016 are related to the change in the presentation of other income (expense), net. Under the previous accounting standard the impairment loss of long-lived assets and non-current investments and the accrual for the one-time termination benefits were classified in the caption other (expense), net of the consolidated statements of operations. Under the new accounting standard, such costs are classified in the cost of sales, selling expenses and general and administrative expenses based on the function of the cost to be reclassified. For additional details refer to notes 25, 26 and 28 included in Item 18 of this Annual Report.

Please refer to the Company's Annual Report on Form 20-F for the year ended on December 31, 2016, filed with the SEC on May 1, 2017 to see the summary of the impact of such changes on the Company's consolidated statements of operations for the years ended December 31, 2016, 2015, 2014 and 2013.

Generally accepted accounting principles in the Republic of Italy vary in certain significant respects from generally accepted accounting principles in the United States of America. Information relating to the nature and effect of such differences is presented in Note 31 to the consolidated financial statements.

The Consolidated Financial Statements, from which the selected consolidated financial data set forth below has been derived, were prepared in accordance with Italian GAAP, which differ in certain respects from U.S. GAAP. For a discussion of the principal differences between Italian GAAP and U.S. GAAP as they relate to the Group's consolidated net loss and shareholders' equity, see Note 31 to the Consolidated Financial Statements included in

Item 18 of this Annual Report.

31-Jan-2018	1.2488	1.1922
28-Feb-2018	1.2482	1.2211
31-Mar-2018	1.2440	1.2216
Through April 20, 2018	1.2384	1.2230

- (1) The average of the Noon Buying Rates for the relevant period, calculated using the average of the Noon Buying Rates on the last business day of each month during the period. Source: Federal Reserve Statistical Release on Foreign Exchange Rates Historical Rates for Euro Area; Bloomberg (USCFEURO Index).
The effective Noon Buying Rate on April 20, 2018 was U.S.\$ 1.2282 to 1 Euro.

Risk Factors

Investing in the Company's ADSs involves certain risks. You should carefully consider each of the following risks and all of the information included in this Annual Report.

The Group has a recent history of losses; the Group's future profitability, financial condition and ability to maintain adequate levels of liquidity depend, to a large extent, on its ability to overcome macroeconomic and operational challenges In 2017, the Group reported net losses of 31.4 million and an operating loss of 29.1 million. The results in 2017 mainly resulted from both external factors and new operational challenges. See Item 5. Operating and Financial Review and Prospects. During the 2013-2016 period, the Company implemented an intensive restructuring of its operations that led to an improving trend in its results. In fact, the Group reported a net loss of 68.6 million in 2013, 49.4 million in 2014, 16.5 million in 2015 and 6.1 million in 2016. Furthermore, during the same 2013-2016 period, the Group reported an improving trend also in its operating loss: 61.2 million in 2013, 40.4 million in 2014, 11.1 million in 2015 and 0.4 million in 2016.

In 2017, the Group concentrated its efforts on the expansion of the Group's retail network of monobrand stores, both directly operated and franchised. This new activity required significant upfront costs at both the regional and HQ level. Most of the newly opened monobrand stores were not fully productive in 2017 and, therefore, investments in the retail and marketing organization were, at the beginning, not adequately returned by sales. While the Group expects

the new directly-operated stores will progressively improve in productivity to absorb such up-front costs, there is a chance that these investments will not be recouped.

As in previous years, the Group continues to operate in a persistently difficult macroeconomic environment affecting the furniture industry as a whole (particularly evident in some mature markets, such as Europe), which includes weak economic activity in certain Euro-zone countries.

Table of Contents

In response to this difficult macroeconomic environment, in 2014, the Group launched a transformation plan (the Transformation Plan), which was aimed at restructuring the Group s operations, by reducing our Italian workforce. In 2017, the Company faced redundant workforce related challenges. See Item 5. Operating and Financial Review and Prospects. The Group may continue to be affected by difficult macroeconomic conditions and may face operational challenges going forward.

In addition, during the last six years, pursuant to our obligations under the Italian Reorganization Agreements (as defined in Item 10. Additional Information Material Contracts below), the Group incurred aggregate financial obligations in the amount of 41.4 million (16.9 million, 4.5 million, 4.5 million, 13.5 million, 1.4 million and 0.6 million for years 2017, 2016, 2015, 2014, 2013 and 2012, respectively) in connection with an incentive program aimed at reducing redundant employees.

Despite these incentive payments, the Group increased its cash and cash equivalents from 52.5 million at the end of 2015 to 65.0 million at the end of 2016. The Group s net financial position at the end of year 2016 amounted to 28.9 million, compared to 14.5 million at the 2015 year-end. This positive result was due to benefits deriving from the Transformation Plan and improvements in efficiency, trade receivables securitizations and other improvements in net working capital, despite declining sales. 2016 was also characterized by an increase in financial credit lines that were initially granted by financial institutions in 2015 on both a short- and long-term basis. In 2017, for the reasons highlighted above, with particular reference to the execution of the retail expansion program and the payments pursuant to our obligations under the Italian Reorganization Agreements, cash and cash equivalents decreased to 55.0 million from 65.0 million at the end of 2016. Our Net Financial Position was equal to 9.6 million at the end of 2017, from 28.9 million in 2016.

Despite the challenges arising from the restructuring of our Italian operations, management believes that the Group has a sufficient source of liquidity to fund working capital expenditures and other contractual obligations for the next 12 months. See Item 5. Operating and Financial Review and Prospects. The Group has also faced increased labor costs for some of its manufacturing plants operating abroad. See Item 4. Information on the Company Manufacturing for further information.

Our results of operations and ability to maintain adequate levels of liquidity in the future will depend on our ability to overcome these and other challenges. Our failure to achieve profitability in the future could adversely affect the trading price of our shares and our ability to raise additional capital and, accordingly, our ability to grow our business. There can be no assurance that we will succeed in addressing any or all of these risks, and the failure to do so could have a material adverse effect on our business, financial condition and operating results.

The Group has redundant workers at its Italian operations. This remains an unresolved issue and the management of such redundant workers may not be successful and therefore, could significantly impact our operations, earnings and liquidity in the foreseeable future In May 2017, the Italian Supreme Court rejected the Company s appeal of a lawsuit brought by two former employees of the Company relating to the implementation of the *Cassa Integrazione Guadagni Straordinaria* (CIGS), an Italian temporary lay-off program, ruling in favor of the plaintiffs. As a result of this decision, the Company accrued 9.3 million in the Provision for tax and Legal proceedings included in the Other liabilities caption of the Company s balance sheet. With reference to the Italian Supreme Court resolution dated May 2017, we recently received a new resolution from a local court ruling in favor of Natuzzi S.p.A. In October 2016 the Company laid off 176 workers as part of an organization restructuring, 166 of which were then re-employed in the second half of 2017 as the Bari Labor Court deemed the dismissals to have been carried out improperly. The Company challenged the Bari Labor Court s judicial measures in order to assert its positions but this challenge is still pending. In this regard, in December 2017, the Company reached an agreement with the Italian institutions representing these workers to extend the scope of the current Solidarity Agreement (as defined below) in

order to reduce the impact of the re-employments in 2018. The Company will continue to evaluate the implications of such decision and any future developments on its strategy and business organization, any of which could have an adverse impact on the Company's financial condition and results of operations in future periods. There is no guarantee that future developments on this matter could not have a material adverse effect on our business, financial condition and operating results.

Table of Contents

Global economic conditions may affect the Group's business and could significantly impact our operations, sales, earnings and liquidity in the foreseeable future Our sales volumes and revenues may be affected by overall general economic conditions. For example, a significant decline in the global economy, or in consumers' confidence could have a material adverse effect on our business. Deteriorating general economic conditions may affect disposable incomes and reduce consumer wealth, thus affecting client demand, which may negatively impact our profitability and put downward pressure on our prices and volumes. Many factors, all of which are generally beyond our control, affect the level of consumer spending in the home furnishing industry, including the state of the economy as a whole, stock market performance, interest and exchange rates, inflation, political uncertainty, the availability of consumer credit, tax rates, unemployment levels and other matters that influence consumer confidence. In general, sales of home furnishing goods tend to decline during recessionary periods when the level of disposable income tends to be lower or when consumer confidence is low. We distribute our products internationally and we may be affected by downturns in general economic conditions or uncertainties regarding future economic prospects that may affect the Countries in which we sell a significant portion of our products. In particular, the majority of our current sales are in the EU and in the United States; if we are unable to expand in emerging markets, a downturn in mature economies, such as the EU and the United States, may negatively affect our results of operations and financial performance.

In the EU, in particular, despite measures taken by several governments and monetary authorities to provide financial assistance to certain Eurozone countries and to avoid default on sovereign debt obligations, concerns persist regarding the debt burden of several countries. These concerns, along with the significant fiscal adjustments carried out in several countries, intended to manage actual or perceived sovereign credit risk, have led to further pressure on economic growth and may lead to new periods of recession. Furthermore, a resurgence of the sovereign debt crisis in Europe could diminish the banking industry's ability to lend to the real economy, thus creating a negative spiral of declining production, higher unemployment and a weakening financial sector.

In addition, uncertainties regarding future trade arrangements and industrial policies in various countries, such as in the United Kingdom following the referendum to leave the European Union and in the United States under the current administration, create additional macroeconomic risk. In the United States, any policy to discourage import into the United States of home furnishings manufactured elsewhere could adversely affect our operations. Any new policies and any steps we may take to address such new policies may have an adverse effect on our business, financial condition and results of operations.

These difficult conditions could continue to affect our sales and earnings in the future. Sales of residential furniture are impacted by downturns in the general economy primarily due to decreased discretionary spending by consumers.

Adverse economic conditions may also affect the financial health and performance of our dealers in a manner that will affect sales of our products or their ability to meet their commitments to us. Economic downturn may also affect retailers, our primary customers, and may result in the inability of our customers to pay the amounts owed to us. In addition, if our retail customers are unable to sell our products or are unable to access credit, they may experience financial difficulties leading to bankruptcies, liquidations, and other unfavorable events. If any of these events occur, or if unfavorable economic conditions continue to challenge the consumer environment, our future sales, earnings, and liquidity would likely be adversely impacted.

The Group's ability to generate the significant amount of cash needed to service our debt obligations and comply with our other financial obligations, and our ability to refinance all or a portion of our indebtedness or obtain additional financing depends on multiple factors, many of which may be beyond our control Our ability to make scheduled payments due on our existing and anticipated debt obligations and on our other financial obligations, and to refinance and to fund planned capital expenditure and development efforts will depend on our ability to generate cash. See The Group has a recent history of losses; the Group's future profitability, financial

condition and ability to maintain adequate levels of liquidity depend to a large extent on its ability to overcome macroeconomic and operational challenges. We will need to generate sufficient operating cash flow from our operations to service our current and future projected indebtedness. Our ability to obtain cash to service our existing and projected debts is subject to a range of economic, financial, competitive, legislative, regulatory, business and other factors, many of which are beyond our control. We may not be able to generate sufficient cash flow from our operations to satisfy our existing and projected debt and other financial obligations, in which case, we may have to undertake alternative financing plans, sell assets, reduce or delay capital investments, or seek to raise additional capital on terms that may be onerous or highly dilutive. Our ability to refinance our indebtedness will depend on the financial markets and our financial condition at such time. To the extent we have borrowings under bank overdrafts that are payable upon demand or which have short maturities, we may be required to repay or refinance such amounts on short notice, which may be difficult to do on acceptable financial terms or at all. At December 31, 2017, we had 19.7 million of bank overdrafts outstanding. In addition, while we had 55.0 million of cash and cash equivalents at December 31, 2017, 37.7% of this amount was held by our Chinese subsidiaries, which can be paid to us as a dividend incurring withholding

Table of Contents

taxes. We cannot assure you that any refinancing or restructuring would be possible, that any assets could be sold, or, if sold, of the timing of the sales or the amount of proceeds that would be realized from those sales. We cannot assure you that additional financing could be obtained on acceptable terms, if at all, or would be permitted under the terms of our various debt instruments then in effect. Our failure to generate sufficient cash flow to satisfy our existing and projected debt obligations, or to refinance our obligations on commercially reasonable terms, would have an adverse effect on our business, financial condition and results of operations.

The Company uses a securitization program to manage liquidity risk. Should such program be terminated, the Company's ability to manage such risk will be impaired As a means to manage liquidity risk, in July 2015, the Company entered into a non-recourse securitization agreement (the "Securitization Agreement") with an affiliate of Banca Intesa (the "Assignee"). Under the Securitization Agreement, the Company assigns certain customer receivables to the Assignee in exchange for short-term credit, thereby providing the Company with an important and stable source of short-term funding. The Company's ability to continue using this tool to mitigate liquidity risk depends on the assigned receivables meeting certain credit criteria, one such criterion being the continued solvency of the customers owing such receivables. If these criteria are not met, including, for example, because the credit quality of the Company's customers deteriorates, the Securitization Agreement may be terminated, thereby depriving the Company of an important tool for managing liquidity risk.

The Group's operations have benefited in 2017 and in previous years from temporary work force reduction programs that, if not continued, may have an impact on the Group's future performance Due to the persistently difficult business environment that has negatively affected the Group's sales performance over the years, the Company has in recent years entered into a series of agreements with Italian trade unions and the relevant Italian Ministry pursuant to which government funds have been used to pay a substantial portion of the salaries of redundant workers who are subject to either layoffs (as in the case of *Cassa Integrazione Guadagni Straordinaria*, or "CIGS", an Italian temporary lay-off program) or reduced work schedules (as in the case of the Solidarity Agreement, as defined below).

The agreements signed in recent years have been important. Between October 2013 and October 2015, 500 blue collar workers voluntarily terminated their employment with Company, which led to a gradual reduction of redundant structural staff.

On March 3, 2015, the Minister of Labour and Social Politics signed new agreements in order to reduce the redundant staff by reducing the working hours per day (the "Solidarity Agreement"). Pursuant to the Solidarity Agreement, a higher number of workers, as compared to the Company's current need, may continue to work at the Company, though with a salary reduction that is less than proportional to the reduction in working hours (as a result of government financial support). On March 22, 2016, the Solidarity Agreement was extended for a one-year period, expiring on May 1, 2017. On March 27, 2017, the Company and the trade unions involved agreed to extend the Solidarity Agreement until December 2018. Negotiations with the Trade Unions and the relevant Ministry about the management of such redundant workers after the expiration of the current Solidarity Agreement have recently started and still ongoing.

In 2017, the Company had to reintegrate 166 workers by carrying out the reinstatement measures of the Bari Labour Court that canceled the October 2016 dismissals.

The impact of the reintegration of these 166 workers was managed by the Company through the signing of a new Solidarity Agreement, with the Minister of Labor and Social Politics and trade unions, which extends to all employees, including reintegrated workers.

For further information, please see Item 5. Operating and Financial Review and Prospects One-Time Termination Benefits and Notes and 21 of the Consolidated Financial Statements included in Item 18 of this Annual Report.

The Company's inability to continue reducing redundant structural staff could have an adverse effect on our financial condition, results of operations, and cash flows.

Table of Contents**The Group's operations may be adversely impacted by strikes, slowdowns and other labor relations matters**

Many of our employees, including many of the laborers at our Italian plants, are unionized and covered by collective bargaining agreements. As a result, we are subject to the risk of strikes, work stoppages or slowdowns and other labor relations matters, particularly in our Italian plants. These collective bargaining agreements also limit the possibility to dynamically react to market conditions or competition without the agreement of Italian trade union representatives. During 2014, 2015 and 2016, we experienced strikes and slowdowns in connection with our Italian reorganization efforts, which resulted in lower productivity levels. In 2017, there were no strikes carried out at the Company's Italian plants. Our operations may also be adversely impacted by future strikes or slowdowns, which we anticipate could occur in the future in connection with the announcement of layoffs and the subsequent termination of redundant employees.

Any strikes, threats of strikes, slowdowns or other resistance in connection with our reorganization plan, the negotiation of new labor agreements or otherwise could adversely affect our business as well as impair our ability to implement further measures to reduce structural costs and improve production efficiencies. A lengthy strike that involves a significant portion of our manufacturing facilities could have an adverse effect on our financial condition, results of operations, and cash flows.

We may not execute our Business Plan, successfully or in a timely manner, which could have a material adverse effect on our results of operations or on our ability to achieve the objectives set forth in our plans

On April 6, 2018, the Board of Directors on April 6, 2018 adopted a new Business Plan for 2018 through 2022. As set out in this Business Plan, we expect a slight return to profitability, by consolidating investments made in the retail business and developing the private label business, while continuing efficiency actions in manufacturing and logistics. During the first quarter of 2018, the Company began to see positive signs for our retail expansion strategy, as our directly operated stores (DOS) network reported a single-digit increase in the order flow over the same period last year. The Business Plan has been prepared without considering the potential impacts of the joint venture with Jason Furniture (Hangzhou) Co., Ltd. (Kuka) on the Company's financial results, as better described in Note 32 of the consolidated financial statements included in Item 18 of this Annual Report. The profitability of our operations depends on the successful and timely execution of the Business Plan, as well as the impact of other matters, including the joint venture with Kuka. The failure to successfully and timely execute these objectives could result in ongoing losses for the Group and a failure to reduce costs and improve sales as contemplated by the Business Plan.

A failure to offer a wide range of products that appeal to consumers in the markets we target and at different price-points could result in a decrease in our future profitability

The Group's sales depend on our ability to anticipate and reflect consumer tastes and trends in the products we sell in various markets around the world, as well as our ability to offer our products at various price points that reflect the spending levels of our target consumers. While we have broadened the offering of our products in terms of styles and price points over the past several years in order to attract a wider base of consumers, our results of operations are highly dependent on our continued ability to properly anticipate and predict these trends. The potential inability of the Group to anticipate consumer tastes and preferences in the various markets in which we operate, and to offer these products at prices that are competitive to consumers, may negatively affect the Group's ability to generate future earnings.

In addition, with the vast majority of our net sales deriving from the sale of leather-upholstered furniture, consumers have the choice of purchasing upholstered furniture in a wide variety of styles and materials, and consumer preferences may change. There can be no assurance that the current market for leather-upholstered furniture will grow consistent with our internal projections or that it will not decline.

Demand for furniture is cyclical and may fall in the future Historically, the furniture industry has been cyclical, fluctuating with economic cycles, and sensitive to general economic conditions, housing starts, interest rate levels,

credit availability and other factors that affect consumer spending habits. Due to the discretionary nature of most furniture purchases and the fact that they often represent a significant expenditure to the average consumer, such purchases may be deferred during times of economic uncertainty such as those being recently experienced in some of our markets, such as Europe, or the United States some years ago.

The furniture market is highly competitive The Group operates in a highly competitive industry that includes a large number of manufacturers. No single company has a dominant position in the industry. Competition is generally based on product quality, brand name recognition, price and service.

The Group principally competes in the upholstered furniture sub-segment of the furniture market. In Europe, the upholstered furniture market is highly fragmented. In the United States, the upholstered furniture market includes a number of relatively large companies, some of which are larger and have greater financial resources than the Group. Some of the Group's competitors offer extensively advertised, well-recognized branded products.

Table of Contents

Competition has increased significantly in recent years as foreign producers from countries with lower manufacturing costs have begun to play an important role in the upholstered furniture market. Such manufacturers are often able to offer their products at lower prices, which increases price competition in the industry. In particular, manufacturers in Asia and Eastern Europe have increased competition in the lower-priced segment of the market. As a result of the actions and strength of the Group's competitors and the inherent fragmentation in some markets in which it competes, the Group is continually subject to the risk of losing market share, which may lower its sales and profits.

Market competition may also force the Group to reduce prices and margins, thereby reducing its cash flows.

The highly competitive nature of the industry means that we are constantly at risk of losing market share, which would likely result in a loss of future sales and earnings. In addition, due to high levels of competition, it may not be possible for us to raise the prices of our products in response to inflationary pressures or increasing costs, which could result in a decrease in our profit margins.

Fluctuations in currency exchange rates and interest rates may adversely affect the Group's results The Group conducts a substantial part of its business outside of the Euro-zone and is exposed to market risks stemming from fluctuations in currency and interest rates. In particular, an increase in the value of the Euro relative to other currencies used in the countries in which the Group operates has in the past, and may in the future, reduce the relative value of the revenues from its operations in those countries, and therefore may adversely affect its operating results or financial position, which are reported in Euro. In addition to this risk, the Group is subject to currency exchange rate risk to the extent that its costs are denominated in currencies other than those in which it earns revenues. In 2017, a significant portion of the Group's net sales (about 66%), but approximately 45% of its costs were denominated in currencies other than the Euro. The Group also holds a substantial portion of its cash and cash equivalents in currencies other than the Euro, including a large amount in Chinese Yuan (CNY or RMB, hereafter) received as compensation for the relocation of its Chinese manufacturing plant in 2011. The Group is therefore exposed to the risk that fluctuations in currency exchange rates may adversely affect its results, as has been the case in recent years. During 2017 through the first part of 2018, the foreign exchange markets have been subject to a high degree of volatility, with the Euro currency strengthening over the major currencies, US dollar in particular, in which the Group sells its products.

In addition, foreign exchange movements might also negatively affect the relative purchasing power of our clients which could also have an adverse effect on our results of operations.

Although we seek to manage our foreign currency risk in order to minimize negative effects from rate fluctuations, including through hedging activities, there can be no assurance that we will be able to do so successfully. Therefore, our business, results of operations and financial condition could be adversely affected by fluctuations in market rates, particularly if these highly volatile conditions persist.

In the normal course of business, the Group also faces risks that are either non-financial or non-quantifiable. Such risks principally include country risk, credit risk and legal risk. For more information about currency and interest rates risks, see Item 11, Quantitative and Qualitative Disclosures about Market Risk.

The Group faces risks associated with its international operations The Group is exposed to risks that arise from its international operations, including changes in governmental regulations, tariffs or taxes and other trade barriers, price, wage and exchange controls, political, social, and economic instability in the countries where the Group operates, inflation and exchange rate and interest rate fluctuations. Any of these factors could have a material adverse effect on the Group's results.

The Group's past results and operations have significantly benefited from government incentive programs, which may not be available in the future Historically, the Group derived significant benefits from the Italian Government's investment incentive programs for under-industrialized regions in Southern Italy, including tax benefits, subsidized loans and capital grants. See Item 4. Information on the Company Incentive Programs and Tax Benefits. In recent years, the Italian Parliament replaced these incentive programs with an investment incentive program for all under-industrialized regions in Italy, which is currently being implemented by the Group through grants, research and development benefits. There are no indications at this time that the Italian Government will implement new initiatives to support companies located in under-industrialized regions in Italy. Therefore, there can be no assurance that the Group will continue to be eligible for such grants, benefits or tax credits for its current or future investments in Italy.

Table of Contents

The Group has opened manufacturing operations in China, Brazil and Romania and through 2011, was granted tax benefits and export incentives by the respective governmental authorities in those countries. There can be no assurance that the Group will benefit from such tax benefits or export incentives in connection with future investments.

Failure to protect our intellectual property rights could adversely affect us We believe that our intellectual property rights are important to our success and market position. We attempt to protect our intellectual property rights through a combination of patent and trademark laws, as well as licensing agreements and third party nondisclosure and assignment agreements or confidentiality and restricted use agreements. We believe that our patents, trademarks and other intellectual property rights are adequately supported by applications for registrations, existing registrations and other legal protections in our principal markets. However, we cannot exclude the possibility that our intellectual property rights may be challenged by others or that agreements designed to protect our intellectual property will not be breached, or that we may be unable to register our patents, trademarks or otherwise adequately protect them in some jurisdictions.

The Company relies on information technology to operate its business, and any disruption to its technology infrastructure could harm the Company's operations We operate many aspects of our business including financial reporting, and customer relationship management through server and web-based technologies. We store various types of data on such servers or with third-parties who in turn store it on servers and in the cloud. Any disruption to the internet or to the Company's or its service providers' global technology infrastructure, including malware, insecure coding, Acts of God, attempts to penetrate networks, data theft or loss and human error, could have adverse effects on the Company's operations. A cyber attack of our systems or networks that impairs our information technology systems could disrupt our business operations and result in loss of service to customers. We have a Business Continuity Plan and cybersecurity test designed to protect and preserve the integrity of our information technology systems and the business continuity. Our ability to keep our business operating effectively depends on the functional and efficient operation of our information, data processing and telecommunications systems, including our design, procurement, manufacturing, inventory, sales and payment process. While we have invested and continue to invest in information technology risk management, cybersecurity and disaster recovery plans, these measures cannot fully insulate the Company from technology disruptions or data theft or loss and the resulting adverse effect on the Company's operations and financial results.

The price of the Group's principal raw materials is difficult to predict. In 2017, approximately 86% of the Group's total upholstered net sales came from leather-upholstered furniture sales. The acquisition of cattle hides represented approximately 18% of 2017 total cost of goods sold. The dynamics of the raw hides market are dependent on the consumption of beef, the levels of worldwide slaughtering, worldwide weather conditions and the level of demand in a number of different sectors, including footwear, automotive, furniture and clothing.

The Group is dependent on qualified personnel The Group's ability to maintain its competitive position will depend to some considerable degree upon the personal commitment of its founder, chief executive officer (CEO) and chairman of the Company's board of directors (the Board of Directors), Mr. Pasquale Natuzzi, as well as on its ability to continue to attract and maintain highly qualified managerial, manufacturing and sales and marketing personnel. There can be no assurance that the loss of key personnel would not have a material adverse effect on the Group's results of operations.

Changes in tax laws may affect our results. We are subject to income taxes in Italy and other jurisdictions. Changes in tax laws, regulations, or administrative practices in those jurisdictions, such as the recently-enacted U.S. tax reform legislation commonly referred to as the U.S. Tax Cuts and Jobs Act of 2017 (the 2017 Tax Act) could affect our financial position and results of operations. The 2017 Tax Act significantly changes the U.S. federal income tax rules

applicable to U.S. corporations, including by reducing the maximum statutory corporate income tax rate from 35% to 21% as of January 1, 2018. Accounting for the income tax effects of the 2017 Tax Act requires significant judgments in interpretation of its provisions, which may be affected by additional guidance that may be issued by the U.S. Treasury Department, the IRS, and standards-setting bodies. We have not yet completed our evaluation of the impact of the 2017 Tax Act on our U.S. operations. We expect to complete our analysis of the 2017 Tax Act by December 2018. Although we do not expect any adjustments that would impact our provision for income taxes in the period in which adjustments are made due to our historic operations in the U.S., it is possible that we may have modifications as we complete our analysis.

Investors may face difficulties in protecting their rights as shareholders or holders of ADSs The Company is incorporated under the laws of the Republic of Italy. As a result, the rights and obligations of its shareholders and certain rights and obligations of holders of its ADSs (as defined below) are governed by Italian law and the Company's *statuto* (or the By-laws). These rights and obligations are different from those that apply to U.S. corporations. Furthermore, under Italian law, holders of ADSs have no right to vote the shares underlying their ADSs; however, pursuant to the Deposit Agreement (as defined below), ADS holders do

Table of Contents

have the right to give instructions to The Bank of New York Mellon, National Association (BNY Mellon or the Depository) the ADS depository, as to how they wish such shares to be voted. For these reasons, the Company's ADS holders may find it more difficult to protect their interests against actions of the Company's management, board of directors or shareholders than they would if they were shareholders of a company incorporated in the United States.

One shareholder has a controlling stake of the Company Mr. Pasquale Natuzzi, who founded the Company and is currently CEO and chairman of the Board of Directors, beneficially owns, as of April 20, 2018, an aggregate amount of 30,967,521 ordinary shares of the Company (the Ordinary Shares), representing 56.5% of the Ordinary Shares outstanding (61.6% of the Ordinary Shares outstanding if the Ordinary Shares owned by members of Mr. Natuzzi's immediate family (the Natuzzi Family) are aggregated). As a result, Mr. Natuzzi has the ability to exert significant influence over our corporate affairs and to control the Company, including its management and the selection of its board of directors. Since December 16, 2003, Mr. Natuzzi has held his entire beneficial ownership of Natuzzi S.p.A. shares through INVEST 2003 S.r.l., an Italian holding company wholly-owned by Mr. Natuzzi and with its registered office located at Via Gobetti 8, Taranto, Italy.

In addition, under the Deposit Agreement dated as of May 15, 1993, as amended and restated as of December 23, 1996 and as of December 31, 2001 (the Deposit Agreement), among the Company, the Depository, and owners and beneficial owners of American Depositary Receipts (ADSs), the Natuzzi Family has a right of first refusal to purchase all the rights, warrants or other instruments which BNY Mellon, as Depository under the Deposit Agreement, determines may not lawfully or feasibly be made available to owners of ADSs in connection with each rights offering, if any, made to holders of Ordinary Shares.

Because a change of control of the Company would be difficult to achieve without the cooperation of Mr. Natuzzi and the Natuzzi Family, the holders of the Ordinary Shares and the ADSs may be less likely to receive a premium for their shares upon a change of control of the Company.

Purchasers of our Ordinary Shares and ADSs may be exposed to increased transaction costs as a result of the Italian financial transaction tax or the proposed European financial transaction tax On February 14, 2013, the European Commission adopted a proposal for a directive on the financial transaction tax (hereafter EU FTT) to be implemented under the enhanced cooperation procedure by eleven Member States initially (Austria, Belgium, Estonia, France, Germany, Greece, Italy, Portugal, Slovenia, Slovakia and Spain). Following Estonia's formal withdrawal on March 16, 2016, ten Member States are currently participating in the negotiations on the proposed directive. Member States may join or leave the group of participating Member States at later stages and, subject to an agreement being reached by the participating Member States, a final directive will be enacted. The participating Member States will then implement the directive in local legislation. If the proposed directive is adopted and implemented in local legislation, investors in Ordinary Shares and ADSs may be exposed to increased transaction costs.

The Italian financial transaction tax (the IFTT) applies with respect to trades entailing the transfer of (i) shares or equity-like financial instruments issued by companies resident in Italy, such as the Ordinary Shares; and (ii) securities representing the shares and financial instruments under (i) above (including depository receipts such as the ADSs), regardless of the residence of the issuer. The IFTT may also apply to the transfer of Ordinary Shares and ADSs by a U.S. resident. The IFTT does not apply to companies having an average market capitalization lower than 500 million in the month of November of the year preceding the year in which the trade takes place. In order to benefit from this exemption, companies whose securities are listed on a foreign regulated market, such as the Company, need to be included on a list published annually by the Italian Ministry of Economy and Finance. The Company is not included in the list published on December 19, 2017 for transactions carried out in 2018. As a result of the IFTT, investors in the Ordinary Shares and ADSs may be exposed to increased transaction costs. See Taxation Other Italian Taxes The Italian Financial Transaction Tax.

Table of Contents**ITEM 4. INFORMATION ON THE COMPANY****Introduction**

History and development of the company Founded in 1959 by Pasquale Natuzzi, Natuzzi S.p.A. is Italy's largest furniture house and one of the most important global players in the furniture industry with an extensive manufacturing footprint and a global retail network. Natuzzi is the best known lifestyle brand in the global furniture industry (Brand Awareness Monitoring Report Ipsos 2016). Continuous stylistic research, creativity, innovation, solid craftsmanship and industrial know-how and integrated management throughout the entire value chain are the mainstays that have made Natuzzi one of the few players with global reach in the furniture market. Natuzzi S.p.A. has been listed on the New York Stock Exchange since May 13, 1993. Always committed to social responsibility and environmental sustainability, Natuzzi is ISO 9001 and 14001 certified (Quality and Environment), OHSAS 18001 certified (Safety on the Workplace) and FSC® certified (Forest Stewardship Council). The Company first targeted the U.S. market in 1983 and subsequently began entering other European markets. Natuzzi continues to focus its attention on Brazil, Russia, India, China and other developing markets. Today the distribution network covers approximately 100 countries on five continents.

The brand portfolio of the Group is made of three main brands: *Natuzzi Italia*, *Natuzzi Editions* and *Divani&Divani by Natuzzi*. For a detailed description of the brand and its target markets, please see Strategy The Brand Portfolio Strategy and Products below. The Group also offers unbranded products (also through its private label, Softaly) within a dedicated business unit to meet the specific needs of key accounts.

As of March 31, 2018, the Group distributed its products as follows:

Natuzzi Italia: 205 *Natuzzi Italia* stores (of which 37 are directly operated by the Group), 20 *Natuzzi Italia* concessions (store-in-store points of sale, directly managed by the United Kingdom and Mexican subsidiaries of the Group), and *Natuzzi Italia* galleries (store-in-store points of sales managed by independent partners). The ***Natuzzi Re-vive***® is an iconic product of *Natuzzi Italia* that is sold and distributed in over 80 different markets.

Natuzzi Editions : 226 stores (of which 11 located in China and 16 in Italy through the *Divani&Divani by Natuzzi* retail chain are directly managed by the Group) and galleries.

Private label: includes our unbranded and Softaly products and is currently marketed in North America, Europe, Brazil and Asia-Pacific principally through a selected number of furniture retailers.

The Natuzzi Group presents its products at the world's leading furniture fairs: *Il Salone del Mobile* in Milan, Italy, *IMM* in Cologne, Germany, *Furniture Market* in High Point, North Carolina, U.S., *100% Design* in London, United Kingdom, among others.

On June 7, 2002, the Company changed its name from Industrie Natuzzi S.p.A. to Natuzzi S.p.A. The *statuto* (or the By-laws) of the Company provide that the duration of the Company is until December 31, 2050. The Company, which operates under the trademark Natuzzi, is a *società per azioni* (joint stock company) organized under the laws of the Republic of Italy and was incorporated in 1959 by Mr. Pasquale Natuzzi, who is currently the CEO, chairman of the Board of Directors and controlling shareholder of the Company. Most of the Company's operations are carried out

through various subsidiaries that individually conduct a specialized activity, such as leather processing, foam production and shaping or furniture manufacturing.

The Company's principal executive offices are located at Via Iazzitiello 47, 70029 Santeramo in Colle, Italy, which is approximately 25 miles from Bari, in southern Italy. The Company's telephone number is: +39 080 882-0111. The Company's general sales agent subsidiary in the United States is Natuzzi Americas, Inc. (Natuzzi Americas), located at 130 West Commerce Avenue, High Point, North Carolina 27260. Natuzzi Americas telephone number is: +1 336 887-8300.

Table of Contents**Organizational Structure**

Natuzzi S.p.A. is the parent company of the Natuzzi Group. As of March 31, 2018, the Company's principal operating subsidiaries were:

Name	Percentage of ownership	Registered office	Activity
Italsofa Nordeste S/A	100.00	Salvador de Bahia, Brazil	(1)
Natuzzi (China) Ltd	100.00	Shanghai, China	(1)
Italsofa Romania S.r.l.	100.00	Baia Mare, Romania	(1)
Natco S.p.A.	99.99	Santeramo in Colle, Italy	(2)
I.M.P.E. S.p.A.	100.00	Bari, Italy	(3)

- (1) Manufacture and distribution
- (2) Intragroup leather dyeing and finishing
- (3) Production and distribution of polyurethane foam
- (4) Services and distribution
- (5) Investment holding
- (6) Dormant

Differently from the table in note 1 to the Consolidated Financial Statements included in Item 18 of this Annual Report, the table above does not include Natuzzi Benelux S.A., since on March 31, 2018 the subsidiary was sold to a third party.

See item 18 of this Annual Report for further information on the Company's subsidiaries.

Strategy

Over the last several years, the Group has focused its efforts on brand strengthening, expanding its product offering and retail network, and efficiency improvements in both procurement and operations. At the same time, the Group has implemented cost control measures to streamline its headquarter related costs.

In 2017, notwithstanding a competitive environment affecting both our retail and wholesale business, the Group decided not to lower prices in order to support sales, thus improving its sales. Furthermore, with a specific focus on wholesale distribution, the Group has undertaken a strategy that prioritizes margins rather than volumes; this has at times led to a decline in turnover in North America and in some European countries.

Table of Contents

The Company's recent focus on innovating, expanding its product offering and on points of sale, as well as improving high brand recognition, is expected to support growth in important markets to the Company, such as the U.S., U.K. and China.

Additionally, we launched a new Group organization in July 2016 based on two business models and two Divisions (Natuzzi Division and Softaly Division). Such strategy has stayed consistent throughout 2017.

1) The Natuzzi Division - The Natuzzi Division has further developed its strategy as a widely-recognized, global consumer brand whose footprint has existed for the past 10 years.

In 2017 the Natuzzi Division executed its plan to evolve into a direct-to-consumer business model, both organizationally and operationally.

First of all, a new consumer-centric organization has been established to drive the entire go-to-market process, from R&D to design, merchandising, brand communication, customer acquisition and customer value, supply chain, after sales service and customer retargeting.

With regard to customer acquisition worldwide, the direct-to-consumer business model has been accelerated through a wide set of actions, which included:

designing the **customer strategy** and the related **brand manifesto** for each brand (*Natuzzi Italia*, *Natuzzi Editions* and *Divani&Divani by Natuzzi*);

creating foundations for profitable growth through the appropriate **retail format**:

identifying and launching the new retail format of *Natuzzi Italia* stores;

consolidating the retail format of *Natuzzi Editions* stores;

redesigning the retail format of *Divani&Divani by Natuzzi* stores;

creating the **Merchandising Strategy** of each format, in order to maximize both margins by product category and sales per square foot;

launching the new **Brand campaigns** for each brand;

reaching out to consumers through the **digital engagement**, which includes:

a new website for each brand;

social media and digital campaigns;

a cutting-edge HD 3D product configurator, both online and in-store;

evolving the **marketing strategy** from price-driven into value-driven promotions, which contributed to lower discounts and higher margins;

setting and executing **selling ceremonies** for **retail excellence**, which includes:

customer engagement;

higher customer acquisition (conversion rate);

higher customer value (average purchase average ticket);

launching a **trade program** to engage interior designers, architects and real estate developers, which contributed to enlarging the customer audience and increasing the value of average purchases;

re-engineering **supply chain processes** to secure end-to-end order management and timely home delivery of custom-made orders;

setting the foundations of **Customer Retargeting** (CRM), which is being launched in 2018;

accelerating the **upgrade of the existing third-party wholesale distribution network**, by closing those accounts which did not fit with our consumer brand strategy, while opening new ones;

Table of Contents

purchasing a majority stake in those franchised stores (namely Florida and Mexico) that offered and led to the opportunity to make a turnaround and relaunch the business in such key markets;

operating the existing retail network by seeking to break-even and then generate profit in each direct-owned store;

designing the **growth strategy and the business plan** for key markets, through both direct-owned stores and franchised stores, namely:

opening new *Natuzzi Italia* directly owned stores in the U.S., by executing the new retail format;

completing the business plan for a JV in China, which was signed in 2018;

completing the business plan for a JV in the United Kingdom, which is planned to be executed in 2018;

promoting the retail network expansion through franchised stores into other key markets worldwide.

The execution of the above strategy is set to continue and accelerate during 2018, in order to further nurture and protect the Brand identity of each brand while strengthening the evolution towards a direct-to-consumer business model.

2) The second division is **Softaly**, our private label business, offering just upholstery and addressing the medium/low-end of the market. It is manufactured at the Group's foreign plants and represents that part of the business aimed at large department store resellers. This segment of the retail market is exposed to competition for product and price, which affects our margins. In order to get higher efficiencies, economies of scale, and recover competitiveness in this division, we will continue to be focused on simplifying the Softaly collection, re-engineering most of the Softaly models and developing new models according to modular platform bases. Furthermore, we have been also reviewing our Softaly customer portfolio with the aim of focusing on those customers having appropriate size and business potential. Having gone through this process over the past few months, we recently presented a new collection during the latest exhibitions in Europe and the U.S. with positive results, and expect sales to improve especially in North America. In 2017, the Softaly division grew in line with our expectation both in the Asia-Pacific and EMEA region, whereas in North America region it suffered from a downsizing and decline in sales of the most important key retailers in that specific region. We believe that by executing the above mentioned innovation plans, we should return this part of our business to solid profitability.

Following several years of challenges, during which the Company improved its operating margins and carried out investments to become a retail company from a pure manufacturer, we are now focused on initiatives to support growth and recover market share to return to profitability.

The implementation of these initiatives is a gradual process; therefore, immediate results are not expected.

Although, increased sales volumes and margins are fundamental for any enterprise, this is even more true for the Natuzzi Group as it seeks to continue to deliver upon the central mission that its founder has for Puglia maintaining

employment levels, industrial know how and a business culture in the region.

The Brand Portfolio Strategy The Natuzzi Group, through its three brands, competes in all price segments of the upholstered furniture market with an increasingly important offer of furnishings and accessories. This differentiated offering is designed to address all market segments and is aimed at increasing sales and profitability.

Precise market segmentation, clear brand positioning and clearly defined customer and consumer targets are intended to enhance the Group's competitive strengths in all market segments to gain market share through its different product lines:

a) *Natuzzi Italia* is sold mainly through the retail channel in monobrand stores, concessions and galleries in multi-brand specialized stores and high-end department stores. The offer includes sofas designed and manufactured in Italy at the Company's factories, positioned in the high end of the market, with unique and customized materials, workmanship and finishes thanks to the Natuzzi heritage of fine craftsmanship in the leather sofas segment. The *Natuzzi Italia* product line includes furnishings and accessories for the living room and beds, bed linens and bedroom furnishings to further expand its product offerings. We believe that the *Natuzzi Italia* benefit consists of helping consumers make their home a harmonious, beautiful environment. Through the style and quality of its products and the merchandising in its stores, the Group aims to position this product line in the premium segment of the market. From the identification of market trends to the delivery to the consumer's home, Natuzzi directly controls the upholstered production and distribution value chain with the aim of ensuring ultimate quality at competitive prices.

Table of Contents

b) *Natuzzi Editions* was initially designed specifically for the U.S. market. This collection includes a wide range of leather upholstery products, targeting the medium/medium-high segment of the market and leveraging the know-how and high credibility of the Natuzzi brand in the leather upholstery industry. *Natuzzi Editions* products are manufactured at the Group's overseas plants (Romania, China and Brazil), as well as in Italy, and are sold through monobrand stores and galleries.

c) *Divani&Divani by Natuzzi* represents the monobrand retail network of the Group in the Italian market, made of both direct-owned stores and franchised stores.

Private label (Softaly division) is a key account program to compete in low-end segments of the market by conducting business mainly through large distributions. Through this program, the Group intends to replicate the best practices already applied in connection with its most demanding customers in terms of quality, service and price. Each large distributor is managed by a dedicated team under the following guidelines:

accurate forecasting;

product offerings to create production efficiency through synergies on raw materials, components and coverings, resulting in a focused collection with few models, versions and coverings;

dedicated manufacturing plants: China for Asian-Pacific and American accounts (other than those located in Brazil), Romania for European accounts and Brazil for South American accounts; and

dedicated supply chain and transportation service.

Improvement of the Group's Retail Program and Brand Development The Group has made significant investments to improve its existing distribution network and strengthen its Natuzzi brand. The high level of recognition of the Natuzzi brand among luxury consumers is the result of investments the Company has made over the past decade in its products, communication, in-store experience and customer service. This consumer brand awareness encourages the Company to carry on its brand development, through the rationalization of the Group's brand portfolio and enhancement of the Group's distribution network, in order to further increase consumers' familiarity with the Natuzzi brand, and their association of it as a premium brand.

During 2017, the Group opened 30 *Natuzzi Italia* stores, 7 of which are located in China, 4 in each of the U.S., Brazil and United Kingdom, 1 in each of Indonesia, Taiwan, Greece, Holland, Qatar, Romania, Spain, Turkey, United Arab Emirates, Colombia and Uruguay. In 2017, the Group also opened 27 *Natuzzi Italia* galleries. As of March 31, 2018, there were 205 *Natuzzi Italia* stores, of which 37 were directly operated by the Group, in addition to 20 concessions (8 located in the United Kingdom and 12 in Mexico).

Natuzzi Editions as well as the *Divani&Divani by Natuzzi* retail chains are characterized by a medium positioning in the upholstery business. During 2017, the Group opened 46 *Natuzzi Editions* as well as 3 *Divani&Divani by Natuzzi* stores. As of March 31, 2018, we distributed our products through 464 *Natuzzi Editions* galleries, and 147 *Natuzzi Editions* stores worldwide, of which 104 are located in China (of which 11 *Natuzzi Editions* stores were directly operated by the Group) and 32 in Brazil. As of the same date, there were 79 *Divani&Divani by Natuzzi* stores, 75 located in Italy (of which 16 directly operated by the Group) and 4 in Portugal.

We place a strong emphasis on the design of our stores, with the goal that they stand out from among the other stores in their respective retail environments. The Company decided to invest in a full upgrade of the retail concept for both *Natuzzi Editions* and *Divani&Divani by Natuzzi* stores. The first store with the new concept for *Divani&Divani by*

Natuzzi opened in Italy in December 2017.

Product Diversification and Innovation The Group believes that it is crucial to display a coordinated product mix through its *harmony maker* offer. The *harmony maker* offer is a branded package in accordance with the latest trends in design, materials and colors, and includes high quality sofas, furnishings (including wall units, dining tables and chairs) and accessories, all of which are developed mainly in-house and presented in harmonious and personalized solutions. The Group has taken a number of steps to broaden its product lines, including the development of new models, such as modular and motion frames, and the introduction of new materials and colors, including exclusive fabrics and microfibers. The Group believes that expanding its *harmony maker* offer will strengthen its relationships with the world's leading distribution chains, which are interested in offering branded packages. The Group has also invested in the Natuzzi Style Center in Santeramo in Colle, Italy, to serve as a creative hub for the Group's design activities.

Table of Contents

In recent years Natuzzi developed important partnerships with internationally renowned designers, such as Claudio Bellini, Studio Memo, Mauro Lipparini and Jamie Durie, who are able to capture the brand's spirit in their designs.

Beginning in 2014, The Group also began distributing beds, bed linens and bedroom furnishings to further expand its product offerings.

Manufacturing

Our manufacturing facilities are located in China, Romania, Brazil and Italy.

Our Chinese plant is located in Shanghai, extending over 88,000 square meters, and has been in operation since 2011. As of December 31, 2017, our Chinese plant employed 1,088 people, of whom 1,008 were laborers. It manufactures *Natuzzi Editions* and private label products for the Americas (apart from Brazil) and for the Asia-Pacific market. In 2017, the Chinese plant produced about 36% of the Group's total consolidated upholstery revenue.

Our Romanian plant is located in Baia Mare, extending over 75,600 square meters, and has been in operation since 2003. As of December 31, 2017, our Romanian plant employed 1,042 people, of whom 877 were laborers. It produces *Natuzzi Editions* and private label products for Eastern Europe, the Middle East and Africa (EMEA). In 2017 this plant generated about 16% of the Group's total consolidated upholstery revenue.

Our Brazilian plant is located in Salvador De Bahia, extending over 28,700 square meters, and has been in operation since 2000. As of December 31, 2017, our Brazilian plant employed 235 people, of whom 176 were laborers. Since the end of 2016, in addition to Natuzzi Revive, Natuzzi Editions and Private Label, the Brazilian plant also produces the *Natuzzi Italia* brand for the Brazil and South America market. During 2017, due to the consistent increase in production volumes, a fourth and fifth moving line have been set up. The Group previously owned a Brazilian plant located in Pojuca, which it sold in 2015 for a total consideration of approximately 4.0 million. For further information on the sale of the Pojuca plant, see Manufacturing Brazilian Production below.

Our three Italian plants dedicated to the production of upholstered products and two warehouses are located in Santeramo Jesce, Matera Jesce and Laterza, all of which are located either in or within a 25 kilometer radius of Santeramo in Colle, where the Group's headquarters are located. Collectively these sites extend over 120,000 square meters. As of December 31, 2017, these sites (together with the Group's headquarters) employed 1,918 workers, the majority of whom were subject to the layoff program. See Item 6. Directors, Senior Managers and Employees Employees. With the exception of our Brazilian and South American markets, the Italian plants are the exclusive producers of *Natuzzi Italia* products for the world market and, beginning in the first quarter of 2014, these plants began producing the Re-vive performance recliner. In 2017, these plants generated about 42% of the Group's total consolidated upholstery revenue. As a result of a solidarity contract a significant portion of the *Natuzzi Editions* production was transferred from Romania to Italy in order to more evenly distribute production based on the Group's human resources needs.

In addition to these three Italian plants, we have two plants elsewhere in Italy: one dedicated to the production of leather and another one dedicated to the production of flexible polyurethane foam, as further described below.

These operations retain many characteristics of hand-crafted production coordinated through a management information system that identifies by number (by means of a bar-code system) each component of every piece of furniture and facilitates its automatic transit and traceability through the different production phases up to the warehouse.

In recent years, the Group has been investing in the reorganization of its production processes, following the Lean Production approach. We believe that ongoing implementation of these more efficient production processes will allow us to regain competitiveness by reducing costs (both in terms of labor and consumption of materials) and improving the quality of our services (by reducing defects and lead time for production).

The industrialization of the prototyped product lines was further defined in May 2011, and in December 2011 three new production lines were completed in a new dedicated plant in Matera Jesce. We also moved the manufacturing of wooden frames, which was originally carried out in the production site located in Santeramo in Colle, Italy, to the Matera Jesce plant, thus further optimizing both productivity and logistics costs through a direct, *in-loco* integration of sofa assembly.

Table of Contents

During 2012, these new moving lines were gradually introduced in all of the Group's production facilities. In 2013, the Group integrated the following production phases in the moving line production process within our plants:

direct integration with wood and foam suppliers to serve each plant according to daily needs (just in time supplying) with the advantage of reducing the stock level for semi-finished goods; and

leather cutting and sewing.

This upgrade in the industrial process allows us to better control every stage in the moving line sequence in terms of quality, since every worker at every stage supervises the quality of the piece he receives from the immediately previous stage as well as the piece he passes forward; should a quality issue arise, it must be resolved immediately before getting re-introduced into the production chain. This on-the-spot product quality monitoring started to slightly reduce our defect claims rate and we expect further improvement from this monitoring.

Testing of limited model samples produced with the moving line process demonstrated a nearly 7% decline in cost of goods sold for certain *Natuzzi Editions* and private label products and a decline in cost of goods sold of nearly 12% for certain *Natuzzi Italia* products. Following these tests, management confirmed its decision to transform all the Group's plants, substituting the old Isle Production models, with a roll out of moving line production processes to all plants. As of December 31, 2017 the following number of moving lines were implemented and completed: 26 moving lines in China; 14 moving lines in Romania; 8 moving lines in Italy; 4 moving lines in Brazil. Each moving line has an estimated production capacity of up to 130 seats per day when utilized for two eight-hour shifts per day.

Beginning in 2014, we have also been designing a software program in cooperation with the University of Lecce that assists in assigning models to the moving line to which they are best-suited and where production would be most efficient. In 2015, we implemented the software in the Romanian plant. A final release was subsequently performed in Matera Jesce and soon after released in China and Brazil.

Consistent with its commitments under the Italian Reorganization Agreements, the Company has reorganized its Italian operations by closing its plant located in Ginosa, effective January 2014. This closure has allowed us to concentrate all upholstered furniture production activities within just three facilities with the aim of reducing logistics costs and industrial costs.

The Company initially also planned to close its warehouse in Matera-La Martella, but, following the decision to execute the covering-cutting phase within all of the Italian plants, thus reducing space available for products assembled, it decided not to close it and to continue utilizing the Matera-La Martella plant as a general warehouse for sofas and accessory furnishings.

Furthermore, the Group also utilizes two facilities for the processing of leather (Natco S.p.A. (Natco), located in Udine), and for the production of polyurethane foam (IMPE S.p.A. (IMPE), located near Naples).

The Group processes leather hides to be used as upholstery in its Udine plant whose main activities are leather dyeing and finishing. The Udine facility, which had 157 employees as of December 31, 2017, of whom 131 were laborers, receives both raw and tanned cattle hides, sends raw cattle hides to subcontractors for tanning, and then dyes and finishes the hides. Hides are tanned, dyed and finished on the basis of orders given by the Group's central office in accordance with the Group's on demand planning system, as well as on the basis of estimates of future requirements.

The movement of hides through the various stages of processing is monitored through our management information system. See Item 4. Information on the Company Manufacturing Supply-Chain Management.

The Group produces, directly and by subcontracting, ten grades of leather in approximately 40 finishes and 280 colors. The hides, after being tanned, are split and shaved to obtain uniform thickness and separated into top grain and split. Top grain leather is primarily used in the manufacture of most *Natuzzi Italia* leather products, while split leather is used, in addition to top grain leather, in the manufacture of some *Natuzzi Italia* products and most *Natuzzi Editions* products. The hides are then colored with dyes and treated with fat liquors and resins to soften and smooth the leather, after which they are dried. Finally, the semi-processed hides are treated to improve the appearance and strength of the leather and to provide the desired finish. The Group also purchases finished hides from third parties.

The Group's facility for the production of polyurethane foam, IMPE, employed 32 workers as of December 31, 2017, of whom 19 were laborers, and is engaged in the production of flexible polyurethane foam, and also sells foam to third parties because the facility's production capacity is in excess of the Group's needs. In 2012, IMPE obtained ISO 14001 certification in accordance with the environmental policy of the Natuzzi Group and also improved safety conditions at the plant. As part of the Group's efforts to improve its production process, we have substituted some chemical compounds with more ecologically-friendly materials.

Table of Contents

As a result of intensive research and development activity, the Company has developed a new family of highly resilient materials. The new polymer matrix is safer than others available in the market because of its improved flame resistance, and it is more environmentally-friendly because it can be disposed of without releasing harmful by-products and because the raw materials used to make it cause a less harmful environmental impact during handling and storage.

Chinese Production: The original Chinese plant owned by the Group was subject to an expropriation process by local Chinese authorities, since the plant was located on land that was intended for public utilities. Negotiations involving the expropriation process began in 2009 and were concluded in 2011. The agreement setting for the payment of compensation for the expropriated plant was signed with Chinese authorities on January 26, 2011. As compensation for this expropriation, the parties agreed upon a total indemnity of CNY 420 million, which was equivalent to approximately 46.7 million based on the Yuan-Euro exchange rate as of December 31, 2011. The Company collected the full amount of the indemnity payment from the local Chinese authorities in 2011. During 2013, a second supplementary agreement was signed between the Company and the Shanghai Municipality, by which the Company obtained the reimbursement (8.7 million) of taxes due and paid on the 2011 relocation compensation.

The Group's current production plant in Shanghai was made available in January 2011 to compensate for the reduction in production capacity caused by the expropriation. The relocation process began in February 2011 and was completed, as planned, by the end of May 2011, after equipment and machinery were moved to the new plant. The relocation resulted in worker turnover of approximately 20% because of the distance of the new plant to the old one (approximately 35 kilometers). In response, management hired new personnel, fully eliminating the turn-over effect by the end of April 2011.

Brazilian Production: The Group owned two plants in Brazil that, in the past, have been used for the production of upholstery for the Americas region. Due to the overall appreciation of the Brazilian Real against the U.S. dollar since these plants were opened and a consequent decline in competitiveness, the Group decided to temporarily close the Pojuca plant (putting it up for sale in 2010) and reduced the production capacity of the Salvador de Bahia plant to a level that is sufficient to serve only the Brazilian market. In February 2015 the Group entered into a sale purchase agreement to sell the Pojuca plant to a Brazilian company. By the end of 2015, the buyer paid the majority of the agreed sale price. The buyer completed the payment of the remainder of the agreed sale price in January 2016.

In March 2015, the Group set up a new moving line dedicated to production of Re-vive, to be sold exclusively to the Brazilian and South American market.

In order to minimize the potential future effects of currency fluctuations and reduce supply lead times, our Brazilian subsidiary began to increase its local sourcing in 2014.

After frequent interactions between the Group and top local retailers in the past few years, as well as in light of the high level of fragmentation of the Brazilian market, which consists primarily of small producers with low levels of know-how, the Group believes that the South America region currently represents a very good opportunity for the development of additional business.

Therefore, the Group intends to continue investing in the South America market, with a particular focus on Brazil, by better organizing operating, sales and marketing activities, by developing the current distribution channel of *Natuzzi Editions* and *Natuzzi Italia* points-of-sale and by improving relations with the most important local key accounts through a dedicated private label production.

Raw Materials The principal raw materials used in the manufacture of the Group's products are cattle hides, polyurethane foam, polyester fiber and wood.

The Group purchases hides from slaughterhouses and tanneries located mainly in Italy, Brazil, Germany, other countries in South America and Europe. The hides purchased by the Group are divided into several categories, with hides in the lowest categories being purchased mainly in South America. The hides in the middle categories are purchased in Europe or South America and hides in the highest-quality categories are purchased in Germany and the United Kingdom. A significant number of hides in the lowest categories are purchased at the wet blue stage *i.e.*, after tanning while some hides purchased in the middle and highest categories are unprocessed. The Group has implemented a leather purchasing policy according to which a percentage of leather is purchased at a finished or semi-finished stage. The Group purchases finished leather hides, which is leather that for either technical or price reasons is not processed by the Group's tanneries, from tanneries mainly located in Italy and Brazil. The finished leather suppliers ship their goods directly to the destinations where the Group's factories are located: Santeramo (Italy), Shanghai (China),

Table of Contents

Baia Mare (Romania) and Salvador Bahia (Brazil). Hides purchased from Europe are delivered directly by the suppliers to the Group's leather facilities near Udine, while those purchased outside of Italy are delivered to an Italian port and then sent to Udine and inspected by technicians of the Group.

The Group has had a smaller inventory of split leather to sell to third parties. Approximately 80% of the Group's hides are purchased from 10 suppliers, with whom the Group enjoys long-term and stable relationships. Hides are generally purchased from the suppliers pursuant to orders given every one to two months specifying the number of hides, the purchase price and the delivery date.

Management believes that the Group is able to purchase leather hides from its suppliers at reasonable prices as a result of the volume of its orders, and that alternative sources of supply of hides in any category could be found quickly at an acceptable cost if the supply of hides in such category from one or several of the Group's current suppliers ceased to be available or were no longer available on acceptable terms. The supply of raw cattle hides is principally dependent upon the consumption of beef, rather than on the demand for leather.

During 2017, the prices for hides decreased by about 5% compared to 2016. Due to the volatile nature of the hides market, there can be no assurance that current prices will remain stable or that price trends will not rise in the future. See Item 3. Key Information Risk Factors The price of the Group's principal raw materials is difficult to predict.

The Group also purchases fabrics and microfibers for use in coverings. Both kinds of coverings are divided into several price categories. Most fabrics are purchased in Italy from about a dozen suppliers which provide the product at the finished stage. Microfibers are purchased in Italy, South Korea and China through suppliers who provide them at the finished stage. Fabrics and microfibers are generally purchased from suppliers pursuant to orders given every week specifying the quantity (in linear meters) and the delivery date.

Fabrics and microfibers for the *Natuzzi Italia* products that are purchased from Italian suppliers are delivered directly by the suppliers to the Group's facility in Laterza, while those that are purchased outside of Italy are delivered to an Italian port and then sent to the Laterza facility.

Fabrics and microfibers for the *Natuzzi Editions* and private label products are delivered directly by the suppliers to Chinese, Romanian and Brazilian ports and then sent to the Group's Shanghai, Bahia Mare and Salvador de Bahia facilities.

The Group continuously searches for alternative supply sources in order to obtain the best product at the best price.

Price performance of fabrics is quite different from that of microfibers, depending on the different range of the products' quality.

Because fabrics are purchased predominantly in Italy and are composed of natural fibers, their prices are influenced by the cost of labor and the quality of the product.

The price of microfibers, in contrast, is mainly influenced by the international availability of high-quality products and raw materials at low costs, especially from Asian markets.

The Group obtains the chemicals required for the production of polyurethane foam from major chemical companies located in Europe (including Germany, Italy and the United Kingdom) and the polyester fiber filling for its polyester fiber-filled cushions from several suppliers located mainly in Indonesia, China, Taiwan and India. The chemical components of polyurethane foam are petroleum-based commodities, and the prices for such components are therefore

subject to, among other things, fluctuations in the price of crude oil, which in 2017 increased as compared to 2016. Within our Romanian industrial plant, we have a woodworking facility that provides wooden frames.

The Group also offers a collection of home furnishing accessories (tables, lamps, rugs, home accessories and wall units in different materials). Most of the suppliers are located in Italy and other European countries, while some hand-made products (such as rugs) are made in India and China. The new collections of beds, bedroom furniture and bed linens are produced by Italian companies that are external to the Group. Before any items are introduced into our collection, they are tested in accordance with European and world safety standards. In the design phase particular attention is paid to the choice of innovative technological solutions that add value to the product and ensure long lasting quality. We believe that the Group's product packaging adheres to a higher standard than the average product packaging marketed by its competitors; we prioritize our high standard of packaging in an effort to ensure better customer service.

Table of Contents**Supply-Chain Management**

Procurement Policies and Operations Integration In order to improve customer service and reduce industrial costs, in 2009 the Group established a policy for handling suppliers and supply logistics. All of the sub-departments working in the Logistics Department were reorganized to maximize efficiency throughout the supply-chain. The Logistics Department coordinates periodic meetings among all of its working groups in order to identify areas of concern that arise in the supply-chain, and to identify solutions that will be acceptable to all groups. The Logistics Department is responsible for monitoring the proposed solutions in order to ensure their effectiveness. Additionally, in order to improve access to supply-chain information throughout the Group, the Logistics Department utilizes a portal that allows it and other departments (such as Customer Service and Sales) to monitor the movement of goods through the supply-chain. The Company continues to invest in this area so as to continuously improve supply-chain tools and processes.

Production Planning (Order Management, Warehouse Management, Production, Procurement) The Group's commitment to reorganizing procurement logistics has led to:

- 1) the development of a logistics-production model to customize the level of service to customers;
- 2) a stable level of the size of the Group's inventory of raw materials and/or components, particularly those pertaining to coverings. This positive impact was made possible by both the development of software that allows more detailed production programming and broader access by suppliers themselves, and a more general reorganization of supplier relationships. Suppliers are now able to provide assembly lines at Italian plants with requested components within four hours. At the same time, a procedure was implemented for the continuous monitoring of global finished products inventories in order to determine which in-stock goods are currently not being sold as part of our existing collections (as a result of being phased-out) and enable the different commercial branches to promote specific sales campaigns of these goods;
- 3) the planning and partial completion of the industrial reorganization of the local production center; and
- 4) the implementation of the SAP system since January 2009, throughout the organization.

The Group also plans procurements of raw materials and components:

- i) **On demand** for those materials and components (which the Group identifies by code numbers) that require a shorter lead time for order completion than the standard production planning cycle for customers' orders. This system allows the Group to handle a higher number of product combinations (in terms of models, versions and coverings) for customers all over the world, while maintaining a high level of service and minimizing inventory size. Procuring raw materials and components on demand eliminates the risk that these materials and components would become obsolete during the production process; and
- ii) **Upon forecast** for those materials and components requiring a long lead time for order completion. The Group utilizes a forecast methodology that balances the Group's desire to maintain low inventory levels against the Sales Department's needs for flexibility in filling orders, all the while maintaining high customer satisfaction levels. This methodology was developed together with the Group's Information Systems Department, in order to create an intranet portal, called Advanced Planning and Optimization (APO). APO was launched in March 2011 for sales coming from the North American and Asian-Pacific markets, under the supervision of a forecast manager and, beginning in June 2011, was implemented worldwide. This tool currently supports corporate logistics, operations managers and sales managers in our efforts to better forecast the future demand for the Group's products and to improve communication

between the Sales Department and the Logistics Department, therefore reducing inventory levels and improving the availability of raw materials.

Since 2012, a new methodology concerning furnishing management has been introduced. A more efficient cooperation with suppliers enabled the Group to handle furnishings components without storing them in our warehouses, resulting in improved service and reducing inventory levels.

Lead times can be longer than those mentioned above when a high number of unexpected orders are received. Delivery times vary depending on the place of discharge (transport lead times vary widely depending on the distance between the final destination and the production plant).

Table of Contents

All planning activities (finished goods load optimization, customer order acknowledgement, production and suppliers planning) are synchronized in order to guarantee that during the production process, the correct materials are located in the right place at the right time, thereby achieving a maximum level of service while minimizing handling and transportation costs.

Load Optimization and Transportation The Group delivers goods to customers by common carriers. Those goods destined for the Americas and other markets outside Europe are transported by sea in 40-foot high cube containers, while those produced for the European market are generally delivered by truck and, in some cases, by railway. In 2017, the Group shipped 6,990 containers overseas and approximately 4,872 full load mega-trailer trucks to European destinations.

With the aim of decreasing costs and safeguarding product quality, the Group uses software developed through a research partnership with the University of Bari and the University of Copenhagen that permits us to manage load optimization.

As far as the load composition by truck is concerned, the Group uses software designed to minimize total transport costs by taking into account volume, route and optimization of carriers for customer orders in defined areas. To maintain service levels, we use a supplier vendor rating that measures the performance of carriers and distributors providing direct service over land.

The Group relies principally on several shipping and trucking companies operating under time-volume service contracts to deliver its products to customers and to transport raw materials to the Group's plants and processed materials from one plant to another. In general, the Group prices its products to cover its door-to-door shipping costs, including all customs duties and insurance premiums. Some of the Group's overseas suppliers are responsible for delivering raw materials to the port of departure; therefore, transportation costs for these materials are generally under the Group's control.

Products

Products are mainly designed in the Company's Style Center, but the Group also collaborates with acclaimed international designers for the conception and prototyping of certain products in order to enhance brand visibility, especially with respect to the *Natuzzi Italia* product line.

New models are the result of a constant information flow from the market, in which preferences are analyzed, interpreted and turned into a brief for designers in terms of style, function and price point. Designers draw the sketches of new products in accordance with the guidelines they are provided and, through collaboration with the prototype department, approximately 70 new sofa models are generally introduced each year. The diversity of customer tastes and preferences as well as the Group's inclination to offer new solutions results in the development of products that are increasingly personalized. More than 100 highly-qualified employees conduct the Group's research and development efforts from its headquarters in Santeramo in Colle, Italy.

The Group's wide range of products includes a comprehensive collection of sofas and armchairs with particular styles, coverings and functions, with more than two million combinations.

The **Natuzzi Italia** collection stands out for high quality in the choice of materials and finishes, as well as for the creativity and details of its design. As of December 31, 2017, this line of products offered around 108

models of sofas and seven models of beds. With respect to coverings, the *Natuzzi Italia* collection has 9 leather articles in 81 colors and 25 softcover articles in 135 colors. The collection also includes a selection of additional furniture (wall units, coffee tables, tables, chairs, lamps and carpets) and accessories (vases, mirrors, magazines racks, trays and decorative objects) to offer complete furnishings with the aim of enabling the Group to grow a lifestyle brand.

The **Natuzzi Re-vive, the iconic product of Natuzzi Italia collection**, was designed by Formway Design Studio of New Zealand and is the subject of two patents, one covering the design and one covering the unique mechanism made of 120 different parts. *Natuzzi Re-vive* armchairs are available in seven styles (Quilted, Linear, Tailored, Casual, Club, Lounge, Suit), two sizes (King and Queen), four configurations (with/without headrest basic chair/complete with ottoman), nine leather articles in 81 colors, and 25 softcover articles in 135 colors, four basic spine/base finishing and two special spine/base finishing. The finished product and each of its components are subject to rigorous quality controls.

The **Natuzzi Editions** collection, as of December 31, 2017, consisted of 99 models. The vast range of models cover all styles from casual/contemporary to more traditional, suitable for all markets from Europe to Americas to Asia. *Natuzzi Editions* focus is leather, offering a wide range of 14 leather types available in 122 colors; nevertheless a collection of seven fabric articles available in 47 colors was added to the line and have received positive feedback from the market.

Table of Contents

The **private label** collection, as of December 31, 2017 was comprised of 243 models, including exclusive models for key accounts. The products are mainly leather (or leather matched with Next Leather[®], a bonded leather that contains a minimum of 17 per cent of leather). During 2013 all the products already in the collection were re-engineered in order to meet the requirements of the moving line manufacturing process and all the new products have been designed according to this production system. This investment has improved quality, while reducing industrial costs.

The Group operates in accordance with strict quality standards and has earned the ISO 9001 certification for quality and the ISO 14001 certification for its low environmental impact. The ISO 14001 certification also applies to the Company's tannery subsidiary, Natco, located near Udine, Italy. The Group's plants in Laterza and the Santeramo in Colle headquarters have also received an ISO 9001 certification for their roles in design and production.

Innovation

Since the end of 2013, the Company has been implementing a new production model based on the Lean Production principles.

The sofa production model, under which sofas were traditionally assembled in a department-based factory (or *Isle Production* model), was subject to rigorous review with a view toward implementing moving line-based manufacturing processes, which would lead to improvements in efficiency, quality and lead time. The moving line production model improves job area ergonomics by splitting products into lighter pieces at individual phases and also coordinates workers by ensuring that they work at a similar pace. The finished product tends to be of higher quality and produced more quickly. Tests and development of the moving line production model at all stages of the production process still continue and are coordinated with our products design.

In the field of process and product innovation, the Group implemented since 2013 the Modular Industrial Platform System, aimed at reducing manufacturing costs. Industrial platforms represent an industrial base common to many models that can be technically and aesthetically modified in order to meet customers' requests. The utilization of such platforms grants substantial benefits in terms of product simplification (easy assembly), management (fewer codes to be managed), quality (fewer production failures), and production costs (economies of scale), leading to an increase in competitiveness.

Beginning in 2015, the Company implemented the following new programs and measures related to the product development process and product design and engineering systems:

It launched a *holistic quality based approach* to control the quality of the product based on the Finite Element Method, paving the way to reduce claims and to increase customer satisfaction regarding product durability;

It established a dedicated comfort team, aimed to improve the ergonomic and comfort performance of the prototyped sofas, introducing also Virtual Seating and Ergonomic IT solutions in order to increase the wellness comfort experience of customers;

A *3D designing System* was implemented with the support of a product data management. The system increases the effectiveness of the engineering team by reducing complexity, facilitating product development

activities and testing platforms and the critical quality points. The Company also improved the design for manufacture and assembly strategy for product development and aligned it with the Lean Production System;

An improved control system for the product development process was implemented introducing a visual management system, making it possible to have a real time understanding of product development requests;

An open innovation office was established with the aim to lead breakthrough innovations, procure innovative materials and collaborate with third-party professionals at the most famous research institutes. Management also continues to encourage innovation and new products by leveraging on the above-mentioned innovations activities and adopting the most updated technology that exists in the sector.

Table of Contents

In reference to the innovation process, we began to implement the moving line production system in our plants at the beginning of 2014, and the system was fully implemented across all of our plants by the end of 2015 with the implementation of the following number of moving lines: 24 in China, 11 in Romania and 4 in each of Italy and Brazil.

As for the Chinese plant in particular, during the first part of 2014, the installation of the moving line production system was not simultaneously accompanied by the development of an appropriate IT system to support moving line production. It also lacked an appropriate training plan for workers who had to adapt their skills with the new moving line-based production model. For these reasons and several others, namely, the need for a reduction in complexity, the unavailability of complete and functioning moving lines, together with a production planning that was inadequate in terms of mix of products, caused a sharp decline in the overall production efficiency and productivity of our Chinese plant. In response, beginning in July 2014, we created a dedicated team (the lean team) whose main goal was to increase productivity, in particular through the:

analysis of the main product platforms produced in different plants of the Group;

diagnosis of these platforms, resulting in the elimination of underperforming models;

simplification of production complexity, through the elimination of models, versions, coverings that turned out to be underperforming;

test and implementation, in collaboration with the University of Lecce, of a new software able to plan the production of all of the Group's plants, with the ultimate goal of increasing the degree of repetitiveness in production, so as to reduce the complexity of production not only in individual plants but also in each production moving lines;

use of an additional software necessary to define the best production sequence of models belonging to the same family of products (i.e., having similar components and similar production times) to be assembled and determine a correct balance between the various stations of the line.

We formally launched the above-mentioned activities in December 2014. The results have been very encouraging since from their implementation in early 2015. These activities are currently part of the ordinary industrial process.

The lean team, with support from all of the departments, continued their activities to achieve these goals in 2015 and 2016. The results in terms of reducing complexity and standardizing the moving lines processes have been very encouraging. As a result of their analysis, the Company formalized the implementation of a Last Planner, a planning tool scheduling the activity of every single moving line, in the Romanian plant in September 2015, in the Iesce1 Plant in November 2015 and in the Brazilian Plant in December 2015.

Furthermore, beginning in July 2014, an experimental laboratory for simulating all single phases within a typical moving line was built at the headquarters in Santeramo in Colle. In this laboratory, our experts test ideas proposed by the lean team, with the aim of improving production efficiency, productivity, quality of finished products and workstation ergonomics. The results were better than expected, thanks also to the proactive involvement of people

within this project. All of the ideas that have been tested successfully in this laboratory are expected to be implemented in all of the Group's industrial plants. In 2015, this laboratory tested all the new models designed and the new work methodology, providing a strong hand in improving the efficiency and product quality. In 2016 and 2017, we expanded this laboratory by adding another production line.

For years, but especially in 2016 and 2017, Natuzzi products have been, both, addressing consumer needs and employing Lean Production practices. These are two elements that contribute to our continuous pattern of innovation that is vital to our business and that help us develop products that stand out from those of our competitors and keep pace with changes in the marketplace and consumer needs.

In the past year, we continued to improve the Natuzzi platform system, which allows the Company to achieve a shorter product development than in the past. Furthermore, the Company's requirements concerning the testing and approval stages of our products have become even more stringent through the utilization of a Finite Element Analysis-based software that simulates stress conditions on materials and functions.

We are using all the resources to provide our customers durable products and benefits in terms of availability in the market and higher value products in terms of quality and functionality.

Table of Contents

In addition, during 2017, our research and development teams worked to develop new high-tech structural materials, innovative foams and fibers, ergonomic automated mechanisms and an appealing aesthetic design, intended to contribute to an increased wellness and health experience.

The Company has developed an Open Innovation System , which enables it to develop and strengthen relationships with academia, external technology centers of excellence and suppliers, contributing to the development of the next generation of sofas. We are constantly exploring potential opportunities for scientific collaboration and we have designed a three-year Open Innovation road map where we have engaged researchers around the world inventors, scientists and academic research institutions to help us continue to innovate, build our brand and commercialize the next big changes in product development.

Research and development expenses, which include labor costs for the research and development department, design and modeling consultancy expenses and other costs related to the research and development department, were 4.5 million in 2017, 4.0 million in 2016 and 3.3 million in 2015.

Advertising

Natuzzi S.p.A. Marketing & Communication strategy has been built mainly with the goal to support revenues in each distribution channel with different communication and media strategies per each branded product line.

We also launched the Natuzzi Digital (r)evolution project and continued to invest in our brand with special projects, events, media partnerships and advertising on high end lifestyle magazines.

The marketing strategy is executed on monthly basis in the key countries (where each branded product line is distributed), providing *Natuzzi Italia* and *Divani&Divani by Natuzzi* with promotional calls to actions, driven by a clear mission to encourage qualitative traffic of consumers in each of our retail stores. Thanks to strong integration between the merchandising strategy and the communication strategy, each marketing campaign advertises specific products, using a specific media kit to hit the right customer audience that we find most widely active, following an in-depth digital analysis, in the catchment area of a specific store (directly owned and licensed).

In reference to the *Natuzzi Editions* galleries, advertising was carried out with the help of the retail advertising kit: a collection of templates that enables the direct advertising of the product lines in conjunction with the retailer's brand.

The Group also invested in its online/multichannel digital strategy, making new websites for each brand with a better user experience and with a more easy and efficient product customization journey. This was made possible thanks to the launch of a 3D HD product configurator developed by the internal Marketing & Communication Lab together with one of the best Italian application development companies. The configuration application (also available online on our websites) was intended to help the customer in its digital journey but already showed to be very helpful for the store staff (both in our stores and in our galleries) who are now able to upsell and cross-sell items that are not available in the store but that can be powerfully seen by a customer on the tablet.

In conjunction with these digital platforms and tools, the Company increased its digital media spending from a global incidence of 30% up to 60% of total advertising costs, becoming a fast growing and strong digital media advertiser. Digital advertising helped us to better plan, monitor, measure and report the performances of each marketing campaign.

As a brand building strategy for *Natuzzi Italia*, we targeted high-end consumers, architects, designers, interior decorators and young generations of influencers. The home-philosophy of *Natuzzi Italia*, was narrated through a

communication campaign made with internationally renowned photographers and advertised on the best interior design, fashion and lifestyle magazines (both printed and digital).

Ultimately in order to spread our message in the design community we have set up projects and contents for it: in China we presented the Natuzzi Designers Club , a yearly contest made for design professionals and students, in partnership with the best Chinese universities.

In Italy we partnered with the most influential design academies, sponsoring two classes that exercised on R&D for projects suggested by Natuzzi: such as multi-functionality and versatility in small spaces.

In Brazil we have finalized a media partnership to launch an interior design contest in the Brazilian Architects community.

Table of Contents

Upon implementing these activities we received positive press coverage, which showcased our stronger and most up-to-date vision of Natuzzi in the design community.

Retail Development

The Group has been increasingly focused on achieving the objectives of its retail development plan in its most important markets by opening new stores and closing/relocating those stores that have not met expected revenue goals.

The majority of *Natuzzi Italia* stores that the Company opened in 2017, or which the Company plans to open in 2018, currently follow or will follow the new retail format. This format is aimed at addressing the expectations and spending power of a wider range of consumers, and continuing to provide consistent and satisfactory results.

In Mexico the Company signed an agreement with a local dealer in order to be directly involved in the management and development of its distribution there. We started upgrading the existing 3 stores and 12 galleries to the latest format in November 2017. In the United States, five new *Natuzzi Italia* directly operated stores with the new format were opened in Paramus, Philadelphia, Costa Mesa, Chicago and West Palm Beach during 2017 and the first part of 2018, with an average size of 8.000 square feet. In the United Kingdom we opened four *Natuzzi Italia* stores with the new format, mainly in the Greater London area.

In 2017, *Natuzzi Editions* store openings were concentrated mainly in China (28) and Brazil (14).

The following table sets forth the total store openings during 2017.

Store Openings 2017	Natuzzi Italia	Natuzzi Editions	Divani&Divani by Natuzzi	TOTAL
United States and Canada	4			4

Markets

The Group markets its products internationally as well as in Italy. Outside Italy, the Group sells its furniture, on a wholesale basis, to major retailers and, on a retail basis, to furniture stores. In 1990, the Group began selling its leather-upholstered products in Italy and abroad through franchised *Divani&Divani by Natuzzi* and *Natuzzi* (now *Natuzzi Italia*) furniture stores. Since 2001, the Group has also sold its furniture through directly owned *Natuzzi* (now *Natuzzi Italia*) stores and *Divani&Divani by Natuzzi* stores. In 2005, the Group introduced the *Natuzzi Editions* to the U.S. market, and it continues to be sold in the Americas through galleries and concessions. In October 2013, the Group officially launched Re-vive, its innovative performance recliner, now a *Natuzzi Italia* iconic product, and began its distribution in the first half of 2014 in 25 markets.

The Company has almost completed its commercial and distribution re-organization in all its commercial regions, in order to better exploit market opportunities all over the world. This reorganization includes expanding its retail presence in large department stores to increase visibility of the Natuzzi brand's product lines as well as establishing a separate business unit, aimed at generating sales volumes and developing new key accounts through its private label offerings.

The following tables show the number of Group stores as of March 31, 2018 according to our principal geographic areas.

Table of Contents

¹⁾ Includes the United States, Canada and Latin America (including Brazil) (collectively, the Americas). As of March 31, 2018, there were 20 *Natuzzi Italia* concessions, of which were 8 located in United Kingdom and 12 in Mexico. The concessions are store-in-store concept selling *Natuzzi Italia* products, and are managed directly by the Company's subsidiaries located in the United Kingdom and U.S., respectively.

The following table shows the leather and fabric-upholstered furniture net sales of the Group broken down by geographic market and Business Division for each of the years indicated:

Total	421.6	100.0%	431.6	100.0%	458.8	100.0%
--------------	--------------	---------------	--------------	---------------	--------------	---------------

- (1) Includes the United States, Canada and Latin America (including Brazil) (collectively, the Americas).
- (2) The Natuzzi brand includes the Group's three lines of product: *Natuzzi Italia*, *Natuzzi Editions*, *Divani&Divani by Natuzzi* and *Natuzzi Re-Vive*. Starting from the second half of 2014, upholstered net sales under the Natuzzi brand also includes net sales of beds sold under the *Natuzzi Italia* line.
- (3) Due to a reorganization of our sales department, India is included in the EMEA region. Figures have been reclassified accordingly.

In 2017, the Group derived 46.5% of its core business (including sales of upholstery sofas, beds and furnishings) from the EMEA region, 35.5% from the Americas (Brazil included), and 18.0% from the Asia-Pacific region.

Table of Contents**1. The Americas.**

In 2017, net sales of products within our core business (leather and fabric-upholstered furniture and beds, as well as furnishings) in the United States and the rest of the Americas (including Brazil) were 149.5 million, down 7.2% from 161.1 million reported in 2016, and the number of seats sold decreased by 19.1%, from 612,838 in 2016 to 495,603 in 2017.

In particular, net sales from our Natuzzi branded products were 108.6 million, up 3.2% from 105.2 million reported in 2016 thanks to the acceleration of its direct-to-consumer strategy through direct-owned monobrand stores.

Sales from our Softaly division were 40.8 million down from 55.9 million reported in 2016. Such negative performance in this region was largely due to a decline in sales of private label products. Softaly is still suffering due to difficult retail conditions experienced in the North American market, as some of our historical partners are restructuring their retail assets, resulting in a reduction of their points of sales. We are continuing our efforts to build new relationships in North America. In April 2018, we presented at the High Point Fair a newly designed and innovative collection, with aggressive price points in order to capture the attention of the American market.

The Group's principal customers are major retailers. The Group advertises its products to retailers and, recently, to consumers in the United States, Canada, and Latin America (excluding Brazil) both directly and through the use of various marketing tools. The Group also relies on its network of sales representatives and on the furniture fairs held at its High Point, North Carolina offices each spring and fall to promote its products. The Group also takes part in the Las Vegas Furniture Fair.

Natuzzi Americas maintains offices in High Point, North Carolina, the heart of the most important furniture manufacturing and distribution region in the United States, and provides Natuzzi S.p.A with agency services. The staff at High Point provides customer service, trademarks and products promotions, credit collection assistance, and generally acts as the customers contact for the Group. As of March 31, 2018, the High Point North Carolina operation had 56 employees. In addition, such Company has 12 independent sales representatives.

All of our commercial activities in Brazil are overseen from our Salvador de Bahia facility. The Group's commercial structure in Brazil has been reinforced by an increase in personnel, from 12 representatives in 2012 to 27 as of the end of 2017. 2017 sales in Brazil increased by 27.7%, from 11.0 million in 2016 to 14.1 million mainly due to the strong focus in the Brazilian high-end consumer market. The new strategy, which added more contemporary models to the collection in a new store concept, led to the opening of 14 *Natuzzi Editions* franchising stores and several *Natuzzi Editions* galleries. As of March 31, 2018, in Brazil there were 5 *Natuzzi Italia* stores, 32 *Natuzzi Editions* stores and both *Natuzzi Editions* and *Natuzzi Italia* galleries.

The focus in the high-end consumer market culminated in the launch of a *Natuzzi Italia* made in Brazil collection, entirely manufactured in Brazil and dedicated exclusively to the South American market. After opening at the end of 2016 of the first *Natuzzi Italia* store in the Gabriel Monteiro da Silva Avenue (São Paulo), during 2017, 4 more *Natuzzi Italia* stores were opened in Brazil (Brasilia, Balneario Camboriu, Curitiba, Salvador).

For 2018 we expect to open in Brazil 13 new *Natuzzi Editions* stores and 2 *Natuzzi Italia* stores. The company expects to open 5 new *Natuzzi Editions* store and 4 *Natuzzi Italia* store in the rest of South America in 2018, as well.

In February 2014, we opened a new, directly-operated *Natuzzi Italia* flagship store in New York City on Madison Avenue, with the aim of anchoring the Group's expansion in the New York-Connecticut-New Jersey Tristate area. We closed our New York City store located in Soho in June 2014. In 2016, the Group acquired 7 *Natuzzi Italia* stores all

located in Florida. In December 2016, the Company established a new trading subsidiary located in Mexico, Natmex S.DE.R.L.DE.C.V. (NATMEX). In January, 2017, NATMEX signed an agreement with the Sandler family owners of Muebleria Standard its current partner for the distribution of Natuzzi products in Mexico. Under the agreement, NATMEX acquired the three existing *Natuzzi Italia* stores from Muebleria Standard. The stores are located in Mexico City-Altavista, Guadalajara and Monterrey. In addition to the directly operated stores, NATMEX will sell in the Mexican market through 12 directly managed *Natuzzi Italia* concessions in Palacio de Hierro, a high-end retailer having shopping malls in excellent locations throughout Mexico. In June 2017, the Company opened its new North American retail store in West Palm Beach, Florida. Measuring approximately 7,200 square feet and located in the City Center on South Rosemary Avenue, this new store is part of the strategy announced last year to open Company managed stores in high traffic and prime retail locations, showcasing the new store design, merchandising concept and overall Natuzzi consumer experience.

Table of Contents

As of March 31, 2018, the Company operated in the Americas 15 DOS (of which 12 were in the U.S. and three were in Mexico), and 12 concessions located in Mexico, all of them under the *Natuzzi Italia* name. As of the same date, there were also 12 *Natuzzi Italia* stores operating in the Americas that are owned by local dealers (5 in Brazil, two in Venezuela, one in each of the U.S., Colombia, Panama, Dominican Republic and Uruguay). Furthermore, as of the same date, there were 34 *Natuzzi Editions* stores, of which 32 were located in Brazil and one in each of Paraguay and Peru.

2. EMEA

During 2017, the Group continued to consolidate its position in Western Europe, and increase its presence in Eastern Europe, the Middle East, Africa and India (collectively, EMEA), by investing in stores and galleries. Net sales of our core business in EMEA (including Italy) were 196.1 million in 2017, down 4.2% from 204.8 million reported in 2016, with the number of seats sold decreasing by 6.0%, from 681,220 in 2016 to 640,480 in 2017. Natuzzi branded sales amounted to a total of 139.4 million in 2017 (down 5.2% from 2016), whereas private label net sales decreased by 1.8% to 56.7 million.

2a) Italy. Since 1990, the Group has sold its upholstered products within Italy principally through the *Divani&Divani by Natuzzi* franchised network of furniture stores. As of March 31, 2018, there were 75 *Divani&Divani by Natuzzi* stores, and four *Natuzzi Italia* stores located in Italy. The Group directly owns 20 of these stores, including all the stores operating under the *Natuzzi Italia* name.

2b) Europe (Outside Italy). The Group expands into other European markets mainly through stores (local dealers, franchisees or directly operated stores). As of March 31, 2018, 79 stores were operating in Europe: 4 under the *Divani&Divani by Natuzzi*, all located in Portugal; 72 were under the *Natuzzi Italia* name (13 in each of the United Kingdom and Spain, seven in each of France and Russia, four in each of the Czech Republic and Turkey, three in Switzerland, two in each of Bosnia, Romania and Ukraine and one in each of France, Armenia, Azerbaijan, Croatia, Cyprus, Greece, the Netherlands, Hungary, Kosovo, Latvia, Malta, Poland, Serbia, Slovakia and Slovenia) and three *Natuzzi Editions* all located in Serbia. Of these stores, 18 were directly owned by the Group as of March 31, 2018 and all were operated under the *Natuzzi Italia* name: 11 in Spain, three in each of the United Kingdom and Switzerland, and one in France. Apart from the *Natuzzi Italia* stores, the Group also operates eight concessions in the United Kingdom.

Given the size of the Russian market and its strategic relevance to the Group's future growth, a local representative office was opened in Moscow in February 2010, with the aim of managing sales, marketing and customer service for Russia and the Ukraine, and to supervise the opening of new single-brand stores in the Russian market.

2c) Middle East, Africa and India. As of March 31, 2018, the Group had a total of 27 *Natuzzi Italia* stores in the Middle East, Africa and India region: seven in India, five in Israel, three in each of Saudi Arabia and the United Arab Emirates, and one in each of Algeria, Côte d'Ivoire, Egypt, Lebanon, Pakistan, Qatar, Jordan, Libya and Sri Lanka. In addition, one *Natuzzi Editions* store was operating in Israel.

In January 2012, following the worsening of the European Union's diplomatic relations with Iran and Syria, the Company decided to cease all business relations with these two countries.

No impairment issue arose following the cessation of business relations with those two countries. The Group had no sales in Iran or Syria in 2017, 2016 and 2015. Our prior interests and activities in Iran or Syria were not a material investment risk, either from an economic, financial or reputational point of view. The Group has not had, nor does it plan to have, any commercial contacts with the governments of Iran or Syria, or with entities connected with such

governments.

The Group has never generated sales in Sudan or North Korea or Cuba.

3. Asia-Pacific Region.

In 2017, net sales of our core business in the Asia-Pacific region increased by 15.5% to 76.0 million, from 65.8 million in 2016, and the number of seats sold increased 13.1%, from 146,927 in 2016 to 166,120 in 2017. Natuzzi branded sales increased by 14.6% to 69.9 million, and private label sales increased by 26.8% to 6.1 million.

Table of Contents

Natuzzi Trading (Shanghai) Co., Ltd. acts as a regional office and manages the commercial part of the business throughout the region. Furthermore, the Group also controls a subsidiary in Japan, an agency in South Korea and an agency for Australia and New Zealand. All of these offices report to the regional office in Shanghai. The general strategy for the *Natuzzi* brand is to further expand the store network throughout the region, with a strong emphasis on the Chinese market. In this regard, on March 22, 2018 the Company announced that it signed a joint venture agreement (the Joint Venture Agreement) with Kuka, under which the Company's wholly-owned Chinese subsidiary, Natuzzi Trading (Shanghai) Co., Ltd. would become a joint venture (the Joint Venture). The purpose of the Joint Venture is to expand the Company's retail network in Mainland China, Hong Kong and Macau (the Territory). The Joint Venture will distribute *Natuzzi Italia* and *Natuzzi Editions* branded products through a network of single-brand directly operated stores and franchised operated stores in the Territory, as well as through online stores. See Note 32 to the Consolidated Financial Statements included in Item 18 of this Annual Report.

As of March 31, 2018, 75 *Natuzzi Italia* stores were operating in the Asia-Pacific market: 52 in China, eight in Australia, seven in Taiwan, two in South Korea and Hong Kong, one in each of Indonesia, Philippines, Singapore and Thailand. In addition, as of the same date, the Group had 109 *Natuzzi Editions* stores, of which 104 located in China (including 11 directly operated by the Group), two in Vietnam, one in each of Hong Kong Thailand and Taiwan. The Group also maintains galleries in the Asia-Pacific region under the *Natuzzi Italia* and *Natuzzi Editions*.

Customer Credit Management

The Group maintains an active credit management program. The Group evaluates the creditworthiness of its customers on a case-by-case basis according to each customer's credit history and information available to the Group. Throughout the world, the Group utilizes open terms in 73% of its sales and obtains credit insurance for 84% of this amount; about 9% of the Group's sales are commonly made to customers on a cash against documents and cash on delivery basis; and lastly, about 18% of the Group's sales are supported by a letter of credit or payment in advance. In July 2015, the Company signed a 5-year non-recourse (*pro-soluto*) assignment of trade receivables with a major Italian financial company by means of a securitization program.

Incentive Programs and Tax Benefits

Historically, the Group derived benefits from the Italian Government's investment incentive program for under-industrialized regions in Southern Italy, which includes the area that serves as the center of the Group's operations. The investment incentive program provides tax benefits, capital grants and subsidized loans. There can be no assurance that the Group will continue to be eligible for such grants, benefits or tax credits for its current or future investments in Italy.

In 2013, The Company took part in a businesses temporary association (*Associazione Temporanea di Imprese*) (ATI), under a program called MAIND that aims to share Research, Development and Training expenses that relate to eco-innovative materials and advanced technologies for the manufacturing and construction industries. By taking part in ATI, the Company hopes to receive grants by the Italian Government covering its investments in the moving line of its Italian plants. In November 2014, The Italian Ministry of Education, University and Research accepted the request for a grant from ATI, and in particular, granted Natuzzi S.p.A. 0.6 million to cover almost all of its expenses presented under this experimental research and development project. In 2015, the Company, through the company that leads the ATI, presented to the Italian Ministry of Economic Development a statement of expenses related to the personnel in the research and development department, as well as training expenses in moving line. In 2017, the Company collected 0.1 million from the Italian Ministry of Education, University and Research. In 2018, the Company presented

Table of Contents

to the Italian Ministry of Economic Development a statement of expenses under this program totaling 0.8 million. As of the date of this Annual Report, the Company has not yet been informed by the relevant Italian Ministry of the timing of collection of the remaining part of the grant.

In September 2015, the Company presented to the Italian Ministry of Economic Development a 49.7 million investment program for industrial development, which is composed of six programs, including programs in research and development and for upgrading its Italian facilities located in the Puglia and Basilicata Regions. The Company formally requested that the Italian Ministry of Economic Development grant is 37.3 million from public incentives. The total amount of 49.7 million is composed of 27.7 million to upgrade the Italian plants located in Puglia and Basilicata Regions, and the remaining part of 22.0 million is for innovation, research and development expenses. The Company entered into a formal agreement with the Ministry of Economic Development (*Ministero dello Sviluppo Economico*) and the governments of the Puglia and Basilicata regions reflecting this investment on September 23, 2015 (the Developing Contract). On January 23, 2017, following its review of such program, the Italian Ministry of Economic Development reduced the amount of investments from 49.7 million to 37.8 million, of which 27.6 million has been allocated to upgrade the Italian plants located in Puglia and Basilicata Regions and 10.2 million has been allocated for innovation, research and development expenses. As a consequence, grants from public incentives were reduced from 37.3 million to 26.9 million. The expected grant should be represented by 11.0 million as a capital grant and 15.9 as subsidized loan. The Company has already begun planned investment activity and, specifically, in 2016, invested 5.0 million, and in 2017 a further 2.0 million. In January 2018, the Ministry issued a decree for the Company to sign. The Company, following the unfavorable judgement by the Bari Labor Court, which required the Company to re-employ 166 workers decided not to sign such decree since the conditions set forth by the decree, among which is an obligation not to fire workers for a 10-year period are considered by the Company to be too onerous. Negotiations on such labor issue with the relevant Ministry are still ongoing. See Note 21 to the Consolidated Financial Statements included in Item 18 of this Annual Report.

In 2018, the Company took part in a businesses temporary association (*Associazione Temporanea di Società*) (ATS), under a program called M2H- Machine to Human that aims to share Research and Development expenses related to leather processing. This program was designed and coordinated by the University of Lecce. Such program was presented by the ATS to the Puglia region in March 2017. In October 2017, the Puglia region accepted the request for a grant in favor of the ATS and in particular granted Natuzzi S.p.A. 0.7 million to cover almost entirely the expenses presented under this project.

In particular, the Company intends to utilize a new technology that will automatically classify the raw hides (wet blue) according to the degree of imperfections. This stage of the leather processing is currently carried out by workers rather than machines.

Management of Exchange Rate Risk

The Group is subject to currency exchange rate risk in the ordinary course of its business to the extent that its costs are denominated in currencies other than those in which it earns revenues. Exchange rate fluctuations also affect the Group's operating results because it recognizes revenues and costs in currencies other than Euro but publishes its financial statements in Euro. The Group also holds a substantial portion of its cash and cash equivalents in currencies other than the Euro, including a large amount in RMB received in 2011 as compensation for the relocation of its Chinese manufacturing plant. The Group's sales and results may be materially affected by exchange rate fluctuations. For more information, see Item 11. Quantitative and Qualitative Disclosures about Market Risk.

Trademarks and Patents

The Group's products are sold under the *Natuzzi*, *Natuzzi Italia*, *Natuzzi Editions*, *Natuzzi Re-vive*, *Softaly* trademarks. These trademarks and certain other trademarks, such as *Divani&Divani by Natuzzi*, have been registered in all jurisdictions in which the Group has a commercial interest, such as Italy, the European Union and elsewhere. In order to protect its investments in new product development, the Group has also undertaken the practice of registering certain new designs in most of the countries in which such designs are sold. The Group currently has approximately 1,000 design patents and patents (registered and pending) and approximately 12,000 design patents and patents by model and by country/jurisdiction (the same model may be registered in more than one countries and/or jurisdiction). Applications are made with respect to new product introductions that the Group believes will enjoy commercial success and have a high likelihood of being copied.

Table of Contents

In 2013, the Natuzzi Group launched *Re-vive*[®], an innovative armchair that was the result of a collaborative effort between Natuzzi's Style Center and the Formway Design Studio of Wellington, New Zealand. The *Re-viv*[®] recliner combines style and comfort, Italian artisan expertise and innovative New Zealand design. This innovative armchair is internationally protected by several patents covering both its shape and all of its components. In particular, the design patent was filed in 39 countries, while the mechanism patent was filed in 44 countries. Natuzzi has entered into a 20-year licensing agreement, signed in January 2011, with Formway that allows it to utilize the design and mechanisms developed for the *Re-vive* armchair in exchange for a licensing fee, payable in installments, and royalties representing a percentage of sales of the armchair.

As for the distribution of the products that are manufactured in the Group's plants and identified under various names (*Natuzzi Italia*, *Natuzzi Editions*, *Natuzzi Re-vive*), the Group has in place with its customers (retailers and/or wholesalers) business agreements under the form of a sales license (product supply and brand usage license).

Furthermore, the Group also has supply agreements in place with large wholesalers for the supply of private label products that are manufactured by the Group's industrial plants outside of Italy.

Regulation

The Company is incorporated under the laws of the Republic of Italy. The principal laws and regulations that apply to the operations of the Company—those of Italy and the European Union—are different from those of the United States. Such non-U.S. laws and regulations may be subject to varying interpretations or may be changed, and new laws and regulations may be adopted, from time to time. Our products are subject to regulations applicable in the countries where they are manufactured and sold. Our production processes are regularly inspected to ensure compliance with applicable regulations. While management believes that the Group is currently in compliance in all material respects with such laws and regulations (including rules with respect to environmental matters), there can be no assurance that any subsequent official interpretation of such laws or regulations by the relevant governmental authorities that differs from that of the Company, or any such change or adoption, would not have an adverse effect on the results of operations of the Group or the rights of holders of the Ordinary Shares or the owners of the Company's ADSs. See Item 4. Information on the Company Environmental Regulatory Compliance, Item 10. Additional Information Exchange Controls and Item 10. Additional Information Taxation.

Environmental Regulatory Compliance

The Group, to the best of its knowledge, operates all of its facilities in compliance with all applicable laws and regulations.

Insurance

The Group maintains insurance against a number of risks. The Group insures against loss or damage to its facilities, loss or damage to its products while in transit to customers, failure to recover receivables, certain potential environmental liabilities, product liability claims and Directors and Officer Liabilities. While the Group's insurance does not cover 100% of these risks, management believes that the Group's present level of insurance is adequate in light of past experience.

Table of Contents**Description of Properties**

The location, approximate size and function of the principal physical properties used by the Group as of March 31, 2018 are set forth below:

Country	Location	Size (approximate square meters)	Function	Production Capacity per day	Unit of Measure
Italy	Santeramo in Colle (BA)	27,000	Headquarters, prototyping, showroom (Owned)	N.A.	N.A.
Italy	Santeramo in Colle (BA)	2,000	Experimental laboratory: Leather cutting, Sewing, Assembling wooden parts for frame, product assembly (Owned)	100	Seats
Italy	Santeramo in Colle, Jesce (BA)	28,000	Sewing and product assembly (Owned)	800	Seats
Italy	Matera La Martella	38,000	General warehouse of sofas and accessory furnishing (Owned)	N.A.	N.A.
Italy	Matera, Jesce	10,000	Leather cutting, Sewing, Assembling wooden parts for frame, product assembly (Owned)	350	Seats
Italy	Laterza (TA)	10,300	Leather and fabrics Warehouse, Leather and fabrics cutting, (Owned)	N.A.	N.A.
Italy	Laterza (TA)	10,000	Sewing, Assembling wooden parts for frame, product assembly (Owned)	500	Seats
Italy	Laterza (TA)	16,000	Semi-finished products and accessories Warehouse (Owned)	N.A.	N.A.
Italy	Qualiano (NA)	12,000	Polyurethane foam production (Owned)	87	Tons
Italy	Pozzuolo del Friuli (UD)	21,000	Leather dyeing and finishing (Owned)	14,000	Square Meters
U.S.A.	High Point, North Carolina	10,000	Office and showroom for Natuzzi Americas (Owned)	N.A.	N.A.
Romania	Baia Mare	75,600	Leather cutting, sewing and product assembly, manufacturing of wooden frames, polyurethane foam shaping, fiberfill	1,290	Seats

				production and wood and wooden product manufacturing (Owned)		
China	Shanghai		88,000	Leather cutting, sewing and product assembly, manufacturing of wooden frames, polyurethane foam shaping, fiberfill production (Leased)	1,050	Seats
Brazil	Salvador de Bahia	Bahia	28,700	Leather cutting, sewing and product assembly, manufacturing of wooden frames, polyurethane foam shaping, fiberfill production (Owned)	190	Seats

The Group believes that its production facilities are suitable for its production needs and are well maintained.

Capital Expenditures

The following table sets forth the Group's capital expenditures for each year for the three-year period ended December 31, 2017:

	Year ended December 31, (millions of Euro)		
	2017	2016	2015
Land and plants	0.7	0.5	0.2
Equipment	6.0	5.6	2.1
Intangible assets	1.2	0.5	1.1
Total	7.9	6.6	3.7

Table of Contents

Capital expenditures during the last three years were primarily made to make improvements to property, plant and equipment and for the expansion of the Company's retail network. In 2017, capital expenditures were primarily made to make improvements at the Group's existing facilities, in particular in Italy for the implementation of the lean production system, and to improve the Group's retail facilities. The Company made these capital expenditures as part of the Developing Contract (as defined in Item 4. Information on the Company Incentive Programs and Tax Benefits and further described below). As of the date of this Annual Report, the Company has not been officially informed yet by the Government as for the amount and timing of possible government grants and subsidized loans for such investments.

As of April 20, 2018, the Company has spent 2.4 million on capital expenditures since January 1, 2018.

The Group expects that capital expenditures in 2018 will be in the region of 10.0 million. Capital expenditures in 2018 are expected to be financed mainly through improved cash flow from operations.

ITEM 4A. UNRESOLVED STAFF COMMENTS

Not applicable.

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

The following discussion of the Group's results of operations, liquidity and capital resources is based on information derived from the audited Consolidated Financial Statements and the notes thereto included in Item 18 of this Annual Report. These financial statements have been prepared in accordance with Italian GAAP, which differ in certain respects from U.S. GAAP. For a discussion of the principal differences between Italian GAAP and U.S. GAAP as they relate to the Group's consolidated net losses and shareholders' equity, see Note 31 to the Consolidated Financial Statements included in Item 18 of this Annual Report. All information that is not historical in nature and disclosed under Item 5 Operating and Financial Review and Prospects is deemed to be a forward-looking statement. See Item 3. Key Information Forward Looking Information.

Critical Accounting Policies and estimates

Use of Estimates The significant accounting policies used by the Group to prepare its financial statements are described in Note 3 to the Consolidated Financial Statements included in Item 18 of this Annual Report. The application of these policies requires management to make estimates, judgments and assumptions that are subjective and complex, and which affect the reported amounts of assets and liabilities as of any reporting date and the reported amounts of revenues and expenses during any reporting period. The Group's financial results could be materially different if different estimates, judgments or assumptions were used. The following discussion addresses the estimates, judgments and assumptions that the Group considers most material based on the degree of uncertainty and the likelihood of a material impact if a different estimate, judgment or assumption were used. Actual results could differ from such estimates, due to, among other things, uncertainty, lack or limited availability of information, variations in economic inputs such as prices, costs, and other significant factors including the matters described under Risk Factors.

Long-lived Assets Management reviews long-lived assets, including intangible assets with estimable useful life, for impairment whenever changes in circumstances indicate that the carrying amount of the assets may not be recoverable and would record an impairment charge if necessary. Recoverability of assets to be held and used is measured as follows: (a) under Italian GAAP by a comparison of the carrying amount of an asset to the recoverable amount, which is the higher of the estimated fair value less cost to sell or of future discounted net cash flows expected to be generated

by the asset; (b) under US GAAP by a comparison of the

Table of Contents

carrying amount of an asset to the recoverable amount which is the higher of the estimated fair value or of future undiscounted net cash flows expected to be generated by the asset. Future discounted and undiscounted net cash flows are significantly impacted by estimates of future prices for our products, capital needs, economic trends and other factors. If the carrying value of a long-lived asset is considered impaired, an impairment charge is recorded for the amount by which the carrying value of the long-lived asset exceeds its estimated recoverable amount, in relation to its use or realization, as determined by reference to the most recent corporate plans. Assets not in use/to be disposed of are reported at the lower of their carrying amount and their fair value less costs to sell. Estimated fair value is generally determined through various valuation techniques including quoted market values and third-party independent appraisals, as considered necessary. The Company analyzes its overall valuation and performs an impairment analysis of its long-lived assets in accordance with Italian GAAP and US GAAP.

Due to a market capitalization that falls below the carrying amount of the Company, and history of operating loss and revenues decline, management has performed impairment tests on certain long-lived assets where losses have been generated. The fair value analysis of each long-lived asset is unique and requires that management use estimates and assumptions that are deemed prudent and reasonable for a particular set of circumstances. Management believes that the estimates used in the analyses are reasonable; however, changes in estimates could affect the relevant valuations and the recoverability of the carrying values of the assets. The cash flows employed in our 2017 discounted and undiscounted cash flow analyses for impairment analysis of long lived assets, were based on the 2018-2022 Business Plan, as adopted by the Board of Directors on April 6, 2018.

While management believes its estimates are reasonable, many of these matters involve significant uncertainty, and actual results may differ from the estimates used. The key inputs and assumptions that were used in performing the 2017 impairment test for long-lived assets are as follows:

		Year Ended Dec. 31, 2017				
		Net book value of the asset after impairment test (thousands of)	G	WACC	Sales CAGR 2018-22	
Long lived assets	located in	Cash flows				
	Italy (Production site)	Discounted and undiscounted	43,263	0.5%	10%	5%
	Italy (Production site)	Third-party independent appraisal	1,546	n/a	n/a	n/a
	Italy (retail site)	Discounted	1,484	0.5%	10%	5%
	Brazil (Production site)	Third-party independent appraisal	5,537	n/a	n/a	n/a
	Mexico (retail site)	Discounted	2,148	0.5%	17%	8.5%
	Florida (retail site)	Discounted and undiscounted	1,420	0.5%	9%	10%
Total assets tested			55,398			

G estimated long-term growth rate from Damodaran Online at <http://pages.stern.nyu.edu/~adamodar/>

WACC Weighted Average Cost of Capital

Sales CAGR Sales Compound Annual Growth Rate

The compound annual growth rate for sales for Italian production sites is based on the five- year business plan.

The deterioration of the macroeconomic environment, retail industry and the deterioration of our performance, could affect our Italian production long-lived assets. In performing the impairment analysis management has performed a sensitivity analysis, which results in an undiscounted and discounted cash flow exceeding the carrying amount of long-lived assets with an adequate cushion.

As of December 31, 2017, 2016 and 2015, the Company recorded an impairment loss for the long-lived assets of nil, 0.6 million and nil, respectively. For a discussion of a difference between Italian GAAP and US GAAP with respect to the above impairment analysis and the effect on net loss and shareholders' equity as of December 31, 2017, 2016 and 2015, please see Note 31(g) of the Consolidated Financial Statements included in Item 18 of this Annual Report.

Recoverability of Deferred Tax Assets Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the accounting in the consolidated financial statements of existing assets and liabilities and their respective tax bases, as well as for losses available for carrying forward in the various tax jurisdictions. Deferred tax assets are reduced by a valuation allowance to an amount that is reasonably certain to be realized. Deferred tax assets and liabilities are calculated using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the period that includes the enactment date.

Table of Contents

In assessing the feasibility of the realization of deferred tax assets, management considers whether it is reasonably certain that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible and the tax loss carried-forwards are utilized. Estimating future taxable income requires estimates about matters that are inherently uncertain and requires significant management judgment, and different estimates can have a significant impact on the outcome of the analysis.

In 2017 and 2016, because domestic companies and some of foreign subsidiaries realized significant pre-tax losses and were in a cumulative loss position, management did not consider it reasonably certain that the deferred tax assets of those companies would be realized in the scheduled reversal periods (see Note 18 to the Consolidated Financial Statements included in Item 18 of this Annual Report). In making its determination that a valuation allowance was required, management considered the scheduled reversal of deferred tax liabilities and tax planning strategies but was unable to identify any relevant tax planning strategies available to reduce the need for a valuation allowance.

Changes in the assumptions and estimates related to future taxable income, tax planning strategies and scheduled reversal of deferred tax liabilities could affect the recoverability of the deferred tax assets. If actual results differ from such estimates and assumptions the Group financial position and results of operation may be affected.

Allowance for Doubtful Accounts The Group makes estimates and judgments in relation to the collectability of its accounts receivable and maintains an allowance for doubtful accounts based on losses it may experience as a result of failure by its customers to pay amounts owed. The Group estimates these losses using consistent methods that take into consideration, in particular, insurance coverage in place, the creditworthiness of its customers, historical trends and general economic conditions. Changes to assumptions relating to these estimates could affect actual results. Actual results may differ significantly from the Group's estimates if factors such as general economic conditions and the creditworthiness of its customers are different from the Group's assumptions.

Allowances for Warranties The Group estimates and creates an allowance for them in the year of the related sales. The Group makes estimates in connection with such allowances based on its experience and historical trends in its large volumes of homogeneous transactions. However, actual costs for warranties may differ significantly from these estimates if factors such as economic conditions, customer preferences or changes in product quality differ from the ones used by the Group in making these estimates.

Allowances for Discounts The Group records revenues net of discounts. The Group estimates discounts and creates an allowance for them in the year of the related sales. The Group makes estimates in connection with such allowance based on its experience and historical trends in its large volumes of homogeneous transactions. However, actual costs for discounts may differ significantly from these estimates if factors such as economic conditions, customer preferences or changes in product quality differ from the ones used by the Group in making these estimates.

Revenue Recognition Under Italian GAAP, the Group recognizes sales revenue, and accrues associated costs, at the time products are shipped from its manufacturing facilities located in Italy and abroad. A significant part of the products are shipped from factories directly to customers under sales terms such that ownership, and thus risk, is transferred to the customer when the customer takes possession of the goods. These sales terms are referred to as delivered duty paid, delivered at place and delivered at terminal. Delivery to the customer generally occurs within one to six weeks from the time of shipment. The Group's revenue recognition under Italian GAAP is at variance with U.S. GAAP. For a discussion of revenue recognition under U.S. GAAP, see Note 31(c) to the Consolidated Financial Statements included in Item 18 of this Annual Report.

Non-GAAP Financial Measures

We monitor and evaluate our operating and financial performance using several non-GAAP financial measures including: Adjusted EBIT, Adjusted EBITDA and Net Financial Position.

We believe that these non-GAAP financial measures provide useful and relevant information regarding our performance and our ability to assess our financial performance and financial position. They also provide us with comparable measures that facilitate management's ability to identify operational trends, as well as make decisions regarding future spending, resource

Table of Contents

allocations and other operational decisions. While similar measures are widely used in the industry in which we operate, the financial measures we use may not be comparable to other similarly titled measures used by other companies nor are they intended to be substitutes for measures of financial performance or financial position as prepared in accordance with the Italian generally accepted accounting principles.

Adjusted EBIT

Adjusted EBIT is defined as the Operating Income/(Loss), as reported in the consolidated statements of operations included in Item 18 of this Annual Report.

The following table sets forth the calculation, in millions of Euro, of Adjusted EBIT for the years ended December 31, 2017, 2016 and 2015.

	2017	2016	2015
Net sales	449.6	457.2	488.5
Cost of sales	(311.5)	(300.3)	(334.0)
Gross profit	138.1	156.9	154.5
Selling expenses	(131.1)	(124.3)	(133.4)
General and administrative expense	(36.1)	(33.0)	(32.1)
Operating income/(loss) or Adjusted EBIT	(29.1)	(0.4)	(11.0)

Alternatively, we define Adjusted EBIT as Net Income/(Loss) plus Income Taxes, plus Other Income/Expense, net.

The following table sets forth the calculation, in millions of Euro, of Adjusted EBIT for the years ended December 31, 2017, 2016 and 2015.

	2017	2016	2015
Net income/(loss)	(31.8)	(6.5)	(16.5)
Income taxes	2.6	4.3	0.6
Other (income)/expense, net	0.1	1.8	4.9
Operating income/(loss) or Adjusted EBIT	(29.1)	(0.4)	(11.0)

Adjusted EBITDA

Adjusted EBITDA is defined as Adjusted EBIT plus depreciation and amortization. The following table sets forth the calculation, in millions of Euro, of Adjusted EBITDA for the years ended December 31, 2017, 2016 and 2015.

	2017	2016	2015
Net sales	449.6	457.2	488.5
Cost of sales	(311.5)	(300.3)	(334.0)

Gross profit	138.1	156.9	154.5
Selling expenses	(131.1)	(124.3)	(133.4)
General and administrative expenses	(36.1)	(33.0)	(32.1)
Operating income/(loss) or Adjusted EBIT	(29.1)	(0.4)	(11.0)
Depreciation and amortization*	12.8	13.0	13.7
Adjusted EBITDA	(16.3)	12.6	2.7

* *Please see the Consolidated Statements of Cash Flow included in Item 18 of this Annual report*

Alternatively, we define Adjusted EBITDA as Net Income/(Loss) plus Income Taxes, plus Other Income/Expense, net, plus Depreciation and Amortization.

Table of Contents

The following table sets forth the calculation, in millions of Euro, of Adjusted EBITDA for the years ended December 31, 2017, 2016 and 2015.

	2017	2016	2015
Net income/(loss)	(31.8)	(6.5)	(16.5)
Income taxes	2.6	4.3	0.6
Other (income)/expense, net	0.1	1.8	4.9
Depreciation and amortization*	12.8	13.0	13.7
Adjusted EBITDA	(16.3)	12.6	2.7

* Please see the Consolidated Statements of Cash Flow included in Item 18 of this Annual report

Adjusted EBITDA is presented by management to aid investors in their analysis of the performance of the Group and to assist investors in the comparison of the Group's performance with that of other companies.

Management believes that this non-GAAP measure can be used as a proxy for a company's current operating profitability.

Net Financial Position

Net Financial Position is defined as Cash and cash equivalents, plus Marketable securities, less Bank Overdrafts, less Current portion of long-term debt, less Long-term debt.

The following table sets forth the calculation, in millions of Euro, of Net Financial Position for the years ended December 31, 2017, 2016 and 2015.

	2017	2016	2015
Cash and cash equivalents	55.0	65.0	52.5
Marketable securities	0.0	0.0	0.0
Bank Overdrafts	(19.7)	(18.2)	(19.0)
Current portion of long-term debt	(4.8)	(11.6)	(3.4)
Long-term debt	(20.9)	(6.3)	(15.6)
Net Financial Position	9.6	28.9	14.5

We believe our Net Financial Position provides useful information for investors because it gives evidence of our consolidated position either in terms of net indebtedness or net cash by measuring our capital resources based on cash, cash equivalents and marketable securities and the total level of our financial indebtedness.

Results of Operations

Summary In 2014, the Group started a thorough reorganization process covering its industrial, sales and service operations. The first signs of efficiency recovery were achieved in 2015 and the process has continued in 2016 with an almost break-even operating margin. In 2017, the Company continued to invest resources to complete its retail and marketing organization worldwide and restructure its overhead costs. Results of operations were also affected by external factors as explained hereafter.

The Company continues to undertake actions to lay the foundation for growth. The Company intends to aggressively follow its vision and strategy for the future by pursuing two parallel paths to gain new market share: the Natuzzi branded retail business and the private label business.

Full year 2017 **total net sales** were 449.6 million, down from 457.2 million in 2016. Under constant exchange rates, 2017 consolidated net sales would have been equal to 457.5 million, flat compared to 2016.

The Group distributes worldwide its products through three divisions:

Natuzzi Retail division, a network of Directly Operated Stores (DOS) and concessions,

Natuzzi wholesale division, that distributes branded products through franchised operated stores (FOS), and

Softaly wholesale division.

Table of Contents

Retail division

In 2017, the Group opened 7 DOS, of which 3 *Natuzzi Italia* are in the U.S. (Paramus, West Palm Beach and Philadelphia), one *Natuzzi Italia* is in Spain (Valladolid) and 3 *Natuzzi Editions* are in China. During 2017, we also acquired 3 *Natuzzi Italia* DOS and 12 *Natuzzi Italia* concessions in Mexico.

Furthermore, in the first part of 2018, we opened three additional *Natuzzi Italia* DOS, namely one in Chicago, one in Los Angeles-Costa Mesa and one in Paris. In addition, one *Natuzzi Edition* DOS was opened in China. As of the date of this Annual Report, there are 64 DOS, of which 37 operated under the *Natuzzi Italia* name, 16 *Divani&Divani by Natuzzi* and 11 *Natuzzi Edition*. Besides, the Group also directly operates 20 *Natuzzi Italia* concessions.

Retail sales represented 13.4% of our 2017 core business including sales of upholstery, sofas, beds as well as furnishings, compared to 10.4% in 2016.

In 2017 sales from our DOS network (excluding the concessions in the UK and Mexico) increased by 26.0% to 53.1 million with positive results in our DOS network in China (+14.5%), U.S. (+261.1%), Spain (+2.7%), UK (+10.0%) and Italy (+8.6%). Sales from our *Natuzzi Italia* concessions network (store-in-store points of sale, directly managed by the Group's subsidiaries located in the United Kingdom and Mexico) were 3.3 million in 2017, up from 2.8 million in 2016.

Natuzzi Italia DOS sales increased 37.0% to 33.5 million, *Natuzzi Editions* DOS sales increased 14.5% at 6.7 million and *Divani&Divani by Natuzzi* DOS sales increased by 8.9% million at 12.9 million.

On like-for-like basis, our DOS network reported sales of 37.3 million (up 1.6% from 36.7 million in 2016) and an operating profit of 0.5 million improving by 28.5% versus 2016. In particular, we continue to see like-for-like basis sales improvements in our DOS located in China (+25.7%), U.S. (+25.3%), UK (+19.1%), and Switzerland (+15.5%) compared to the prior year. Our Italy-based *Divani&Divani by Natuzzi* retail network is still undergoing a restructuring phase. In this regard, we have recently presented the new concept store reflecting a more updated positioning of the brand, including a new layout, logo, website and digital advertising tools highlighting innovation and technology features of the new collection.

In 2017, our retail operations have started delivering encouraging results with an increase in the number of sales by 19.9% and average sale by 9.8% over 2016.

We are, instead, currently restructuring the recently acquired *Natuzzi Italia* stores in Mexico to bring them more in line with our brand positioning.

Natuzzi wholesale division

Sales from the Natuzzi wholesale division were 261.5 million in 2017, down 2.5% compared to 2016. We are restructuring the current distribution network of our franchised Natuzzi points of sales. In fact, while we have been opening new points of sale with the aim of upgrading our current distribution network, we are closing relations with some of the existing partners whose business is not profitable or otherwise adequate.

Furthermore, the Company will continue its efforts to strengthen our sales organization in order to leverage the Natuzzi brand.

Table of Contents

Softaly wholesale division

Sales from the Softaly wholesale business were 103.7 million, down 12.5% over 2016. Softaly is still suffering due to difficult retail conditions experienced in the North American market, as some of our historical partners are restructuring their retail assets, resulting in a reduction of their points of sales. We are continuing our efforts to build new relationships in North America.

Operating Results

2017 results of operations were greatly affected by some particular factors as set forth below:

The Italian Supreme Court's resolution in May 2017 ruling on the Group's redundant workers caused the Company to accrue **9.3** million for legal proceedings risks.

We incurred in higher labor costs of **2.0** million due to the re-employment of 166 workers. In October 2016 the Company laid off 176 workers, 166 of which were re-employed in 2017 as the Bari Labor Court deemed such dismissals to have been done improperly. On December 2017, the Company was able to reach an agreement with the Italian Institutions representing those workers and extend the Solidarity Agreement in order to reduce the impact on the Company from such job re-employment in 2018.

The Company executed a cost reduction program. As a result, it incurred restructuring costs of **2.6** million.

The Company accrued further **0.6** million for bad debts following the difficult financial conditions of some of our customers.

Throughout 2017 the Company invested in new DOS openings and store acquisitions, retail and marketing skilled personnel and digital tools. Due to the costs associated with retail expansion, we incurred higher Selling Expenses and General and Administrative Expenses, almost entirely as a result of the above-mentioned investments.

Foreign exchange fluctuations resulted in a negative **3.4** million impact on operating results. In 2017, the Group reported a net operating loss of 29.1 million and a total net loss of 31.4 million.

The Company is focusing on growing sales and increasing productivity of its retail chain.

Group's available cash as of December 31, 2017 was 55.0 million and net financial position was positive at 9.6 million as of the end of 2017.

Table of Contents

The following table sets forth certain statement of operations data expressed as a percentage of net sales for the years indicated:

	Year Ended December 31,		
	2017	2016	2015
Net sales	100.0%	100.0%	100.0%
Cost of sales	69.3	65.7	68.4
Gross profit	30.7	34.3	31.6
Selling expenses	29.2	27.2	27.3
General and administrative expenses	8.0	7.2	6.6
Operating margin	(6.5)	(0.1)	(2.3)
Other income (expense), net	0.0	(0.4)	(1.0)
Income taxes	0.6	0.9	0.1
Net loss	(7.1)	(1.4)	(3.4)

2017 Compared to 2016

Total net sales for 2017, including sales of leather and fabric-upholstered furniture and other sales (principally sales of polyurethane foam and leather sold to third parties as well as of accessories), decreased 1.7% to 449.6 million in 2017 as compared to 457.2 million in 2016.

In 2017, although we experienced persisting difficult business conditions, the Group decided not to lower prices in order to support sales. In fact, despite a decreasing turnover, the Group improved its sales. Thanks to the growing strength of the Natuzzi brand, the overall price per seat increased by 4.1% as compared to 2016.

Furthermore, considering wholesale distribution only, the Group has undertaken a strategy that gives priority to margins rather than volumes: this has sometimes led to a decline in turnover, particularly in the North America and Europe regions.

Net sales for 2017 of leather and fabric-upholstered furniture decreased 4.0% to 393.1 million, as compared to 409.0 million in 2016. This 4.0% decrease was due principally to 9.6% decrease in terms of seats sold, and to a 1.8% negative currency translation, partially offset by generalized price-list increase and a positive sales mix contribution (+6.8%).

Natuzzi's core business (sofas, beds and furnishings) reached 421.6 million, down 2.3% from 431.7 million reported in 2016. Under constant exchange rates, core business would have decreased by 0.5%. Natuzzi branded revenues increased by 1.5%, while private label fell by 12.5%.

Within Natuzzi branded sales (317.9 million), the Company saw a 3.2% increase in the Americas (at 108.6 million) and a 14.6% increase in the Asia-Pacific region (at 69.9 million) that both more than offset the 5.2% decrease in the EMEA region (at 139.4 million) negatively affected by the stronger Euro versus local currency in the United Kingdom, one of the Company's core markets, and the ongoing reorganization of the Italy-based distribution network of *Divani&Divani by Natuzzi*. Net sales in the Americas were positively affected by the openings and the acquisition of the new *Natuzzi Italia* DOS during 2017.

In 2017 sales from our DOS network (excluding the concessions in the UK and Mexico) increased by 26.0% at 53.1 million with positive results in our DOS network in China (+14.5%), U.S. (+261.1%), Spain (+2.7%), UK

(+10.0%) and Italy (+8.6%).

Our Italy-based *Divani&Divani by Natuzzi* retail network is still undergoing a restructuring phase. In this regard, we have recently presented the new concept store reflecting a more updated positioning of the brand, including a new layout, logo, website and digital advertising tools highlighting innovation and technology features of the new collection.

Sales from our Softaly wholesale division were 103.7 million in 2017, down 12.5% as compared to 2016. The Softaly division has been suffering in the North American market due to adverse business conditions of some of our top retailers. The Group is focusing on implementing actions aimed at rationalizing the collection, re-engineering our dedicated industrial platforms, improving products quality and customer service, in order to recover market shares in the North American market, which remains one of our best opportunities for growth. Our focus in the other two macro-regions, APAC and EMEA, showed results in line with our expectations: +26.8% in APAC (at 6.1 million) and a 1.8% decrease in the EMEA, or slightly up under constant exchange rates. See Item 4. Information on the Company Markets for tables setting forth the Group's net leather- and fabric-upholstered furniture sales and seats sold, which are broken down by geographic market and business division, for the years ended December 31, 2015, 2016 and 2017.

Table of Contents

Cost of Sales in 2017 was 311.5 million (or 69.3% as a percentage of total net sales), as compared to 300.3 million (or 65.7% of total net sales) in 2016.

This increase in the cost of sales was mainly attributable to non-recurring events. In May 2017 the Italian Supreme Court entered a ruling regarding the Group's redundant workers that caused the Company to accrue 9.3 million for legal proceedings risks. We also incurred in higher cost of labor of 2.0 million due to the re-employment of 166 workers. In fact, in October 2016 the Company laid off 176 workers, 166 of which were re-employed in 2017 as the Bari Labor Court deemed such dismissals to have been done improperly. Those factors offset the positive contribution deriving from decreasing leather prices and from a generalized pricelist increase in sofas products. The Company also suffered extraordinary salary costs in China, Romania and Italy, due to the declining orders. As a result, transformation costs (defined as Labor plus Other manufacturing costs) increased from 23.9% in 2016 to 27.3% in 2017.

Gross Profit. The Group's gross profit in 2017 amounted to 138.1 million (30.7% of net sales), as compared to 156.9 million in 2016 (34.3% of net sales) as a result of the factors described above.

Selling Expenses increased in 2017 to 131.1 million (29.2% of net sales), as compared to 124.3 million in 2016 (27.2% of net sales). In 2017 the Group achieved cost savings in transportation costs (9.0% of net sales from 9.5% in 2016). See Note 26 to the Consolidated Financial Statements included in Item 18 of this Annual Report. Such savings were offset by the increase in personnel costs, following the reorganization of the sales and marketing operations in HQ and North America.

General and Administrative Expenses. In 2017, the Group's general and administrative expenses increased by 3.1 million to 36.1 million, from 33.0 million in 2016, and, as a percentage of net sales, from 7.2% in 2016 to 8.0% in 2017, mainly due to additional personnel costs as explained hereafter.

In 2017, the Company continued its transformation process from a pure manufacturer into a retail-oriented company. Therefore, in 2017 the Company continued to invest in new DOS openings and store acquisitions, retail and marketing skilled personnel and digital tools. Consequently, in executing this new retail expansion strategy, we incurred higher Selling Expenses and General and Administrative Expenses, mainly due to higher labor cost and retail expansion-related costs as a result of the above-mentioned investments. Lastly, the Company executed a cost reduction program and consequently it incurred restructuring costs within Selling Expenses and General and Administrative Expenses for a total of 1.6 million.

Operating Loss. As a result of the factors described above, in 2017 the Group had an operating loss of 29.1 million, compared to an operating loss of 0.4 million in 2016. In 2017, the Group achieved a loss before interests, taxes, depreciation and amortization of 16.3 million compared to earnings of 12.6 million of 2016.

Other Income (expenses), net. The Group registered Other expense, net, of 0.1 million in 2017 as compared to Other expense, net, of 1.8 million in 2016. Other expense, net of 2017 included interest, net of (4.8) million compared to interest, net of (4.1) million in 2016, and foreign-exchange net gain of 3.3 million (foreign-exchange net gain of 2.2 million in 2016).

The increase in net interest expense is mainly due to higher utilization in bank overdraft and higher bank charges. In 2017, the Company securitized an average amount of 44.0 million, the same as in 2016.

The Group recorded a 3.3 million foreign-exchange net gain in 2017 (included in other income (expense), net), as compared to a net gain of 2.2 million in 2016. The foreign exchange gain in 2017 primarily reflected the following

factors:

a net realized gain of 1.9 million in 2017 (as compared to a net realized gain of 0.5 million in 2016) on domestic currency swaps due to the difference between the forward rates of the domestic currency swaps and the spot rates at which the domestic currency swaps were closed (the Group uses forward rate contracts to hedge its price risks against unfavorable exchange rate variations);

Table of Contents

a net realized gain of 0.4 million in 2017 (compared to a gain of 1.7 million in 2016), from the difference between invoice exchange rates and collection/payment exchange rates;

a net unrealized gain of 0.0 million in 2017 (compared to an unrealized gain of 1.0 million in 2016) on accounts receivable and payable; and

a net unrealized gain of 0.9 million in 2017 (compared to an unrealized loss of 1.0 million in 2016), from the mark-to-market evaluation of domestic currency swaps.

The Group does not use hedge accounting and records all fair value changes of its domestic currency swaps in its statement of operations. See Note 28 to the Consolidated Financial Statements included in Item 18 of this Annual Report.

The Group recorded income of 1.4 million during 2017 that was recorded under Other, net, compared to Other, net of 0.1 million reported in 2016.

Income Taxes. In 2017, the Group income taxes decreased to 2.6 million from 4.2 million in 2016. The Group had an effective tax rate of 8.8% on its losses before taxes and non-controlling interests, compared to the Group's effective tax rate of 190.3% reported in 2016.

Net Loss. Reflecting the factors above, the Group reported a net loss of 31.9 million in 2017, as compared to a net loss of 6.5 million in 2016. On a per-Ordinary Share, or per-ADS basis, the Group had net losses of 0.57 in 2017, as compared to net losses of 0.11 in 2016.

As disclosed in Note 31 to the Consolidated Financial Statements included in Item 18 of this Annual Report, generally accepted accounting principles in Italy vary in certain significant respects from U.S. GAAP.

2016 Compared to 2015

Total net sales for 2016, including sales of leather and fabric-upholstered furniture and other sales (principally sales of polyurethane foam and leather sold to third parties as well as of accessories), decreased 6.4% to 457.2 million in 2016 as compared to 488.5 million in 2015.

In 2016, although we experienced significant savings on operating costs (raw materials and transportation in particular, see below), the Group decided not to lower prices in order to support sales. In fact, despite a decreasing turnover, the Group improved the quality of its sales, margins and cash flow. Thanks to the growing strength of the Natuzzi brand, the overall price per seat increased by 2.3% as compared to 2015.

Furthermore, considering the wholesale distribution only, the Group has undertaken a strategy that gives priority to margins rather than volumes: this has sometimes led to a decline in turnover, particularly in the North America and Europe regions.

Net sales for 2016 of leather and fabric-upholstered furniture decreased 6.4% to 409.0 million, as compared to 437.0 million in 2015. The 6.4% decrease was due principally to 6.6% decrease in terms of seats sold, and to a 1.6% negative currency translation, partially offset by generalized price-list increase and a positive sales mix contribution (+1.8%).

Natuzzi's core business (sofas, beds and furnishings) reached 431.7 million, down 5.9% from 458.7 million reported in 2015. Natuzzi Branded revenues fell by 4.0%, while private label fell by 10.6%.

Within Natuzzi branded sales (313.1 million), the Company saw a slight increase in the Asia-Pacific region (+0.7% to 61.0 million), while EMEA results were negatively affected by the stronger Euro versus local currency in the United Kingdom, one of the Company's core markets, and the ongoing reorganization of the Italy-based distribution network of *Divani&Divani by Natuzzi*. Net sales in the Americas were down 6.4% to 105.2 million, however, the Company expects that the new sales and marketing organization and the recent *Natuzzi Italia* store acquisitions in this region will be able to support sales in the near future.

Table of Contents

Natuzzi DOS had positive results in Spain, U.S. and China. The Company is now increasing its efforts with respect to DOS in the United Kingdom and Switzerland. The restructuring of the Company's retail operations will continue aggressively into 2017.

Sales from our Softaly wholesale division were 118.5 million in 2016, down 10.6% as compared to 2015. This overall performance in private label was due largely to a decline in sales from one of our major customers in North America. The Group is focusing on implementing actions, both in organization and marketing, to recover business in the North American market, which remains one of our best opportunities for growth. Our focus in the other two macro-regions, EMEA and APAC, showed positive results: +4.9% to 57.8 million and +2.1% to 4.8 million, respectively.

See Item 4. Information on the Company Markets for tables setting forth the Group's net leather- and fabric-upholstered furniture sales and seats sold, which are broken down by geographic market and business division, for the years ended December 31, 2014, 2015 and 2016.

Cost of Sales in 2016 decreased by 10.1% to 300.3 million (representing 65.7% of net sales), as compared to 334.0 million (or 68.4% of net sales) in 2015. In particular, consumption costs (defined as purchases plus beginning stock minus final stock and plus leather processing) decreased as a percentage of total net sales, passing from 46.0% in 2015 to 41.7% in 2016. This decrease was mainly due to lower leather prices in 2016 (approximately 16% price decrease at constant exchange rate compared to 2015), and to the generalized pricelist increase in sofas products. In addition, transformation costs were positively affected by the benefits deriving from the recovering efficiency plan (which involved all Natuzzi plants) off-set by salary increases which affected, in particular, the Romanian and Chinese plants. Lastly, the Company also suffered extraordinary salary costs in China, denominated as factory-off indemnities, due to the declining orders from the Americas affecting the Softaly Division. As a result, transformation costs increased from 22.4% in 2015 to 23.9% in 2016.

Gross Profit. The Group's gross profit in 2016 amounted to 156.9 million (34.3% of net sales), as compared to 154.5 million in 2015 (31.6% of net sales) as a result of the factors described above.

Selling Expenses decreased in 2016 to 124.3 million (27.2% of net sales), as compared to 133.4 million in 2015 (27.3% of net sales). In 2016 the Group achieved considerable cost savings in transportation costs, defined as Freight plus Other freight costs (9.5% of net sales from 11.0% in 2015). See Note 26 to the Consolidated Financial Statements included in Item 18 of this Annual Report. Such savings were partially offset by the increase in personnel costs in North Americas region, following the reorganization of the sales and marketing operations in that region.

General and Administrative Expenses. In 2016, the Group's general and administrative expenses increased by 0.9 million to 33.0 million, from 32.1 million in 2015, and, as a percentage of net sales, from 6.6% in 2015 to 7.2% in 2016, mainly due to additional personnel costs and consultancy expenses.

Operating Loss. As a result of the factors described above, in 2016 the Group had an operating loss of 0.4 million, compared to an operating loss of 11.1 million in 2015. In 2016, the Group achieved an earnings before interests, taxes, depreciation and amortization of 12.6 million compared to 2.7 million of 2015.

Other Income (expenses), net. The Group registered Other expense, net, of 1.8 million in 2016 as compared to Other expense, net, of 4.8 million in 2015. Other expense, net of 2016 included interest, net of (4.1) million compared to interest, net of (3.3) million in 2015, and foreign-exchange net gain of 2.2 million (foreign-exchange net loss of 1.1 million in 2015).

The increase in net interest expense is mainly due to the additional interests paid for the securitization of trade receivables that started in August 2015 pursuant to the Securitization Agreement. In addition, during 2016, the Company amended the Securitization Agreement to increase the maximum amount of receivables available to be sold (on a revolving and non-recourse basis) from 35 million to 55 million. In 2016, the Company securitized an average amount of 44.0 million compared to 35.0 million in 2015.

The Group recorded a 2.2 million foreign-exchange net gain in 2016 (included in other income (expense), net), as compared to a net loss of 1.1 million in 2015. The foreign exchange gain in 2016 primarily reflected the following factors:

a net realized gain of 0.5 million in 2016 (as compared to a net realized gain of 0.1 million in 2015) on domestic currency swaps due to the difference between the forward rates of the domestic currency swaps and the spot rates at which the domestic currency swaps were closed (the Group uses forward rate contracts to hedge its price risks against unfavorable exchange rate variations);

a net realized gain of 1.7 million in 2016 (compared to a loss of 12.3 million in 2015), from the difference between invoice exchange rates and collection/payment exchange rates;

Table of Contents

a net unrealized gain of 1.0 million in 2016 (compared to an unrealized gain of 11.2 million in 2015) on accounts receivable and payable; and

a net unrealized loss of 1.0 million in 2016 (compared to an unrealized loss of 0.1 million in 2015), from the mark-to-market evaluation of domestic currency swaps.

The Group does not use hedge accounting and records all fair value changes of its domestic currency swaps in its statement of operations. See Note 28 to the Consolidated Financial Statements included in Item 18 of this Annual Report.

The Group recorded income of 0.1 million during 2016 that was recorded under Other, net, compared to Other, net of (0.5) million reported in 2015.

Income Taxes. In 2016, the Group income taxes increased to 4.2 million from 0.6 million in 2015. The Group had an effective tax rate of 190.3% on its losses before taxes and non-controlling interests, compared to the Group's effective tax rate of 3.6% reported in 2015.

The increase in Income taxes is mainly due to the following factors:

income tax accruals on the Chinese production subsidiary (Natuzzi China Ltd.) were 1.7 million, as compared to 0.0 million in 2015, thanks to the consolidated benefits deriving from the efficiency recovering plan launched in the second half of 2014 (thanks to the implementation of efficiency recovery measures that resulted into higher profit before income);

income taxes on unremitted earnings were 1.8 million, as compared to 1.0 million in 2015, which was attributable to the withholding tax due on distribution of dividends by its Chinese subsidiary that Natuzzi management determined will occur in 2017;

income tax accruals were 0.5 million as a provision for the Company's probable tax liability, as compared to nil in 2015. As mentioned in the 2015 annual report on Form 20-F, on March 9, 2016, the Tax Agency of the Puglia region- initiated a tax inspection for fiscal year 2014, both upon direct and indirect taxes. This inspection was carried out in accordance with Article 27, paragraph 9 of Legislative Decree 185/2008, on the basis of the periodic controls upon large entities (business volumes of more than 100 million). During the inspection, the tax auditor expanded the scope of the fiscal years to be inspected from 2014 to 2013 to also include 2012 and 2011. The most important tax issue resulted from the inspection was related to transfer pricing. The Company intends to reach an agreement in order to settle such issue. Management believes that the appraisal of 0.5 million represents the probable liability that will be paid to settle this tax claim.

Net Loss. Reflecting the factors above, the Group reported a net loss of 6.5 million in 2016, as compared to a net loss of 16.5 million in 2015. On a per-Ordinary Share, or per-ADS basis, the Group had net losses of 0.11 in 2016, as compared to net losses of 0.30 in 2015.

As disclosed in Note 31 to the Consolidated Financial Statements included in Item 18 of this Annual Report, generally accepted accounting principles in Italy vary in certain significant respects from generally accepted accounting principles in the U.S. (US GAAP).

Liquidity and Capital Resources

In the ordinary course of business, our use of funds is for the payment of operating expenses, working capital requirements and capital expenditures. The Group's principal source of liquidity has historically been its existing cash and cash equivalents and cash flow from operations, supplemented to the extent needed to meet the Group's short term cash requirements by accessing the Group's existing lines of credit.

During 2014, the Group experienced some operating difficulties in the implementation of the Group Business Plan. The Business Plan foresaw, in its main guidelines, product innovation initiatives, with the introduction of the moving line production system in Group plants and subsequent re-engineering of existing models, and a sharp decrease in fixed and production costs. See Item 3. Key Information Risk Factors The Group has a recent history of losses; the Group's future profitability, financial condition and ability to maintain adequate levels of liquidity depend to a large extent on its ability to overcome macroeconomic and operational challenges, Item 3. Key Information Risk Factors The Group's ability to generate the significant amount of cash needed to service our debt obligations and comply with our other financial obligations and our ability to refinance all or a portion of our indebtedness or obtain additional financing depends on multiple factors, many of which may be beyond our control .

Table of Contents

In 2015, as a result of corrective measures introduced in the second half of 2014, the Group achieved positive results in terms of production efficiency (in particular in the Italian and Chinese plants) and in terms of control and reduction of fixed costs and rationalization of the DOS network. As a consequence the operating loss improved from - 40.4 million in 2014 to - 11.1 million in 2015.

During 2015, the Group was able to obtain new credit lines to support its cash needs. In particular, the Company was granted a long-term loan of 5 million, and a bank overdraft of 2.5 million, while the Romanian subsidiary obtained a bank facility in the amount of 10 million. In addition, the existing short-term credit lines were renewed and a non-recourse trade receivable securitization agreement was signed in July 2015 with a primary Italian financial institution, for the sale of a maximum amount of 35 million performing receivables, on a revolving basis.

In 2016, the Group further improved its results achieving earnings before interests, taxes, depreciation and amortization of 12.6 million, as compared to 2.7 million in 2015.

In 2017, the Group reported an operating loss of 29.1 million from an operating loss of 0.4 million in 2016 as a result, among others, of the events connected to disputes with workers.

The Group's net financial position remained positive at 9.6 million at year-end 2017. The Group obtained during 2017 additional long-term loans for a total nominal amount of 12.5 million.

As of December 31, 2017, the Group had cash and cash equivalents on hand of 55.0 million, and credit facilities totaling 147.7 million (117.8 million as of December 31, 2016). Existing credit lines of 2017 are as follows: a) unsecured credit line for 51.3 million; b) secured credit line for 41.4 million secured by real estate mortgage and invoice discount facilities; and c) securitization of trade receivables of 55.0 million. The Group uses these lines of credit to manage its operational needs. The unused portions of lines of credit were approximately 33.1 million (see Note 15 to the Consolidated Financial Statements included in Item 18 of this Annual Report) as of December 31, 2017. The vast majority of these credit lines are under credit facilities that are not subject to any restrictions. Bank overdrafts are repayable either on demand or on a short-term basis. See Item 3 Key Information Risk Factors. The Group's borrowing needs generally are not subject to significant seasonal fluctuations.

Table of Contents

Although we had 55.0 million in cash and cash equivalents on hand at December 31, 2017, 20.7 million of this amount is located in our Chinese subsidiaries. To the extent management intends to move the cash from China by a dividend distribution, a withholding tax of 10% and the income taxes in Italy (equal to 24.0% of 5% of the dividends distributed) would have to be paid.

Management believes that the Group has sufficient sources of liquidity that can be generated by operating activities to fund working capital needs, capital expenditures and other contractual obligations for the next 12 months, without considering the cash injection deriving from the partnership with Kuka, as disclosed in Note 32 of the consolidated financial statements included in Item 18 of this Annual Report. This partnership was finalized on March 22, 2018 and provides for an investment by Kuka in favor of the Group of 65 million, for the acquisition of the majority stake in the subsidiary Natuzzi Trading (Shanghai) Co., Ltd. Out of these 65 million, 20 million will remain at Natuzzi Trading (Shanghai) Co., Ltd. to sustain investments, while 45 million will be paid in favor of Natuzzi S.p.A., as cash consideration for the purchase of the investment in the subsidiary and right of use of Natuzzi's trademarks. The completion of the transaction contemplated by the Share Purchase Agreement and the Joint Venture Agreement (the Transaction) is subject to obtaining any applicable authorizations, regulatory filings and approvals (including approval by Kuka's shareholders of certain agreements entered into by the Company, its subsidiary and the Joint Venture in connection with the Transaction), as well as the satisfaction of other customary closing conditions. Assuming these conditions are met, it is expected that the closing will occur by August 22, 2018.

In this regard, on April 17, 2018, Natuzzi Trading (Shanghai) Co., Ltd., the Company's wholly-owned Chinese subsidiary, following the Share Purchase Agreement dated March 22, 2018, received CNY 271.2 million, equivalent to 35.0 million at the exchange rate provided by the Bank of China on the same date. This payment was carried out by Kuka as a contribution to the Joint Venture for the subscription of a capital increase of U.S.\$ 567,869 in the Joint Venture. However, this amount cannot be disposed of immediately. Full availability of such amount is subject to obtaining any applicable authorizations, regulatory filings and approvals, as well as the satisfaction of other customary closing conditions.

The Company will continue to be focused on effective cash management, by rationalizing our overhead structure, finding additional efficiency in our plants, improving logistics and quality, in order to balance our financial resources between working capital and investments needs.

Cash Flows The Group's cash and cash equivalents were 55.0 million as of December 31, 2017 as compared to 65.0 million as of December 31, 2016. The most significant changes in the Group's cash flows between 2017 and 2016 are described below.

In 2017, Net Cash used by operating activities was 4.9 million notwithstanding 8.3 million paid as one-time termination costs. In 2016, net cash provided by operations were 26.0 million (of which (4.5) million was related to one-time termination costs).

During 2017, the Group continued to reduce net working capital as a result of: a) 10.6 million as positive contribution from the extension in days payables outstanding, of which 4.9 million mainly due to benefit from indirect factoring; b) 10.4 million as positive contribution from the improvement of receivables, of which 6.6 million relates to the improvement of other trade receivables (not involved in the securitization process). These positive effects were however offset by the payment of one-time termination benefits of 8.3 million.

Net cash used by investment activities in 2017 was 11.7 million as compared to net cash used by investment activities of 10.7 million in 2016. The increase in cash used was mainly due to the following factors: a) 3.5 million as cash used for the business acquisition of Natmex S.DE.R.L.DE.C.V, occurred in 2017, while in 2016 the Company used

3.2 million for the business acquisition of six stores in Florida and 2.5 million for four stores in Italy; b) in 2017, the Company distributed dividends from its Chinese subsidiary (Italsofa Shanghai Ltd) and paid 1.3 million to the minority shareholders (0.4 million paid in 2016); and c) in 2017, the Company used 7.9 million for capital expenditures, whereas the Company invested 6.6 million in 2016.

In 2017, capital expenditures were primarily made for the expansion of the Company's retail network, to make improvements to property, plant and equipment of the existing facilities worldwide, to increase efficiency in production processes, and in software, with particular reference to the development of a 3D product-configurator application.

Cash provided by financing activities in 2017 was 9.3 million compared to cash used by financing activities in 2016 of 1.9 million; this change is mainly due to the increase in long-term loan (+ 12.5 million) in 2017.

As of December 31, 2017, the Group's long-term contractual cash obligations amounted to 159.5 million, of which 42.8 million comes due in 2018. See Item 5. Operating and Financial Review and Prospects Contractual Obligations and Commitments. The Group's long-term debt represented 24.2% of shareholders' equity as of December 31, 2017 (12.0% as of December 31, 2016) (see Note 20 to the Consolidated Financial Statements included in Item 18 of this Annual Report). As of

Table of Contents

December 31, 2017 and 2016 covenants existing on long-term loans were respected. The Group's uses of funds are expected to be the payment of operating expenses, working capital requirements, capital expenditures and restructuring of operations. See Item 4. Products for further description of our research and development activities. See Item 4. Incentive Programs and Tax Benefits for further description of certain government programs and policies related to our operations. See Item 4. Capital expenditure for further description of our capital expenditures.

Contractual Obligations and Commitments

The Group's current policy is to fund its cash needs, accessing its cash on hand and existing lines of credit, consisting of short-term credit facilities and bank overdrafts, to cover any short-term shortfall. The Group's policy is to procure financing and access to credit at the Company level, with the liquidity of Group companies managed through a cash-pooling zero-balancing arrangement with a centralized bank account at the Company level and sub-accounts for each subsidiary. Under this arrangement, cash is transferred to subsidiaries as needed on a daily basis to cover the subsidiaries' cash requirements, but any positive cash balance at subsidiaries must be transferred back to the top account at the end of each day, thus centralizing coordination of the Group's overall liquidity and optimizing the interest earned on cash held by the Group.

As of December 31, 2017, the Group's long-term debt consisted of 25.7 million (including 4.8 million of the current portion of such debt) and its short-term debt consisted of 19.7 million outstanding under its existing lines of credit, comprised entirely of bank overdrafts.

The Group maintains cash and cash equivalents in the currencies in which it conducts its operations, principally Chinese Yuan, U.S. dollars, euro, New Romanian Leu, British pounds and Canadian dollars.

The following table sets forth the material contractual obligations and commercial commitments of the Group as of December 31, 2017:

Contractual Obligations	Payments Due by Period (thousands of euro)				
	Total	Less than 1 year	2-3 years	4-5 years	After 5 years
Long-term debt	25,717	4,840	13,748	4,222	2,907
Bank overdrafts	19,680	19,680			
Total Debt⁽¹⁾	45,397	24,520	13,748	4,222	2,907
Interest due on Total Debt ⁽²⁾	1,596	632	646	227	90
Operating Leases ⁽³⁾	112,524	17,639	37,333	38,185	19,367
Total Contractual Cash Obligations	159,517	42,791	51,727	42,634	22,364

(1) Please see Note 20 to the Consolidated Financial Statements included in Item 18 of this Annual Report for more information on the Group's long-term debt. See Notes 15 and 20 of the Consolidated Financial Statements included in Item 18 of this Annual Report on Form 20-F.

(2) Interest due on total debt has been estimated using rates contractually agreed with lenders.

(3) The leases relate to the leasing of manufacturing facilities and stores by several of the Group's companies. Under Italian law, the Company and its Italian subsidiaries are required to pay a termination indemnity to their employees when these cease their employment with the Company or the relevant subsidiary. Likewise, the Company and its Italian subsidiaries are required to pay an indemnity to their sales agents upon termination of the sales agent's agreement. As of December 31, 2017, the Group had accrued an aggregate employee termination indemnity of 17.2 million. In addition, as of December 31, 2017, the Company had accrued an aggregate sales agent termination indemnity of 1.2 million, whereas the one-time termination indemnity was completely utilized. See Notes 3(n) and 21 of the Consolidated Financial Statements included in Item 18 of this Annual Report. These amounts are not reflected in the table above. It is not possible to determine when the amounts that have been accrued will become payable.

Table of Contents

In September 2011, the Company renewed its agreement with the trade unions and the Ministry of Labor and Social Policy that permitted it to participate in a temporary workforce reduction program and to benefit from the *Cassa Integrazione Guadagni Straordinaria*, or CIGS, for a period of 24 months beginning on October 16, 2011. Pursuant to the CIGS, government funds pay a substantial majority of the salaries of redundant workers who are subject to layoffs or reduced work schedules. From 2011 through 2013, an average of 1,273 employees from the Group's headquarters and production facilities were covered by the program, which contemplated a surplus of 1,060 employees at the end of the period on October 15, 2013.

On October 10, 2013, shortly before the expiration of the 2011 agreement, the Company entered into the 2013 Italian Reorganization Agreement with local institutions, Italian trade unions, the Ministries of Economic Development and of Labor and Social Policy and the regions of Puglia and Basilicata governing the reorganization plan for the Group's Italian operations. The plan contemplated by the 2013 Italian Reorganization Agreement anticipated future layoffs of 1,506 employees (instead of the 1,060 contemplated by the agreement signed in 2011). Due to the complexity of the measures envisioned by the plan and in order to better manage workforce reductions, the Company and the trade unions obtained a one-year extension of the Company's participation in the CIGS through October 15, 2014. The Company anticipated making incentive payments to induce the voluntary resignation of up to 600 employees at the conclusion of the period covered by the CIGS program. As a result, in 2013, the Company increased the one-time termination benefits reserve with an accrual of 19.9 million, which was recorded as an expense.

During 2014, the Company granted incentive payments to 429 workers, for an amount of 13.5 million, further to the individual agreements reached during the year. Also, the Company obtained a further one-year extension of its participation in the CIGS program (expiring on October 16, 2015) for 1,550 workers. In the meantime, negotiations started with social parties to obtain a solidarity agreement aimed to avoid layoffs by reducing the number of daily work hours for all employees, and reduce the labor and social contribution costs. The 2015 Italian Reorganization Agreement was finally signed on March 3, 2015 and refers to a total of 1,818 workers.

During 2015, the Company granted incentive payments to 78 workers, for a total amount of 4.5 million. In addition, 100 workers, who were originally employed at the Ginosa plant, were re-employed at the Jesce, Matera, and Laterza plants. As for the remaining redundancy, on July 28, 2015, a new incentive payment program was launched, with an ultimate deadline of June 30, 2016. As of December 31, 2015, 65 workers participated in the new incentive payment program. As a result of these programs, the estimated remaining redundancy was 359 workers. Based on this new estimate of the number of redundancies, an accrual of 3.4 million was posted in 2015 to the one-termination benefit reserve. Therefore, the remaining provision of 10.2 million at 2015 year-end has been deemed as sufficient to cover the cost of future layoffs.

During 2016, 220 workers accepted aggregate incentive payments of 11.6 million pursuant to a voluntary mobility program. For further information, please see Item 5. Operating and Financial Review and Prospects One-Time Termination Benefits and Note 21 of the Consolidated Financial Statements included in Item 18 of this Annual Report.

The Group is also involved in a number of claims (including tax claims) and legal actions arising in the ordinary course of business. As of December 31, 2017, the Group had accrued provisions relating to these contingent liabilities in the amount of 14.9 million. See Item 8. Financial Information Legal and Governmental Proceedings and Note 21 to the Consolidated Financial Statements included in Item 18 of this Annual Report.

Trend information

The global economy expanded in the second half of 2017. Global economic activity is expected to remain strong going forward, although the pace of growth will gradually moderate. The outlook for advanced economies is for robust expansion, reinforced by the significant fiscal stimulus in the United States. For emerging market economies, the outlook is supported by strengthening activity among commodity exporters. Global trade growth is seen to remain buoyant in the near term, while inflation is expected to rise slowly as spare capacity at the global level diminishes.

The recovery of the global economy is subject to a number of factors, most of which remain uncertain.

In the United States, activity is expected to remain robust on the back of solid domestic demand, as tight labor market conditions gradually feed into higher wage growth and still favorable financial conditions boost wealth. The approval of tax reform legislation last December and the rise in the ceilings on government expenditure agreed in February are projected to further boost domestic demand.

Table of Contents

Economic activity in central and eastern European countries is expected to remain robust, albeit at a more moderate pace than in 2017. Economic activity in central and eastern European countries grew strongly in 2017, driven by a rebound in investment and solid private consumption. Looking forward, it is expected to remain supported by strong investment, linked to the absorption of EU funds, solid consumer spending and improvements in the labor market. In Europe, a high degree of uncertainty continues to surround the negotiations that will define the new trade relationship between the European Union and the United Kingdom.

In the United Kingdom, real GDP growth is expected to remain subdued yet resilient. Economic activity rebounded moderately in the second half of 2017 and positive signs have arisen in real economy indicators, helping to dispel fears of an abrupt slowdown following the Brexit referendum. Uncertainty about the medium-term economic repercussions of the United Kingdom's withdrawal from the European Union remains acute.

In Japan, the economic expansion has been seen to gradually decelerate. Economic activity is projected to remain relatively solid over the short term, benefiting from the current positive momentum and accommodative monetary policy stance. Looking further ahead, however, growth is expected to gradually slow, suffering from persistently weak consumption and investment. Recent data still provides for an uncertain outlook, although the expansionary fiscal policy measures recently passed could rekindle national demand.

In China, activity continues to expand at a robust pace, supported by strong consumption and a still thriving housing market. The near-term outlook is dominated by the authorities' focus on stable growth and the mitigation of financial risks. The assumption over the medium term is that continued structural reforms will gradually be implemented, leading to an orderly growth slowdown. Some risks remain, however, concerning the high level of private sector and local government debt and a possible slippage of housing prices, which have gone up in the last two years.

In India, GDP continued to grow, while industrial production expanded at a very moderate pace. The actions on banknotes circulation, recently implemented by the local government to reduce local corruption and tax evasion, have resulted in a strong curb on consumption and on economic activity.

Activity in Brazil is expected to continue recovering from a recessionary period. Rising confidence, an improved labor market and continuing monetary accommodation should support consumption, against contained inflationary pressures. Political uncertainty in this election year and a potential reversal of the benign external financial conditions are key risks to the country's improving economic outlook.

In Russia, leading indicators signal a temporary dip in economic activity in the last quarter of 2017, following robust growth in the first half of the year, as industrial production declined. The U.S. has imposed sanctions against certain designated Russian entities and individuals, which block the property and all interests in property of such entities and individuals. As a result, U.S. persons are effectively prohibited from engaging in any economic or commercial transactions with these Russian entities and individuals unless they are authorized by the U.S. Treasury Department. Similarly, the EU has imposed sanctions against certain Russian entities and individuals, which prohibit EU persons from engaging in any commercial or economic transactions with such Russian entities or individuals unless the same are authorized by the competent EU export control authority.

Although on the upside in the short term, risks to the outlook for global activity remain skewed to the downside in the medium term. On the upside, the broadening of the global recovery could lead to stronger investment and trade in the short term, while the US fiscal package could have a stronger impact on activity than currently anticipated. Over the medium term, however, these factors are seen to be outweighed by downside risks such as an increase in trade protectionism, a sudden financial market correction which would result in a tightening of global financial conditions disruptions associated with China's reform and liberalization process, and political and geopolitical uncertainties

associated with Brexit-related risks in particular.

Prospects remain uncertain in particular in the Euro area due to the general weakness in the job market, ongoing vulnerability in the real-estate sector, a decreasing level of savings among families, high levels of public indebtedness in most developed countries, political instability in Greece, austerity measures designed to reduce public expenditures and consequent decreased consumer spending. Furthermore, a resurgence of the sovereign debt crisis in certain European countries could diminish the banking industry's ability to lend to the real economy, thus setting in motion a negative spiral of declining production, higher unemployment and a weakening financial sector.

Total Group order flow through the first fifteen weeks of 2018 Total Group's order flow is down high single-digit versus the same period of 2017, due in particular to the weak performance of the Softaly division. Under constant exchange rates, total order flow would have been down low single-digit.

1) Natuzzi Division The Natuzzi division reported a low single-digit decrease in the order flow as compared to the same period of last year, also due to adverse currency movements: under constant exchange rates it would have reported a low single-digit increase.

Table of Contents

We reported a positive performance in the Asia-Pacific region, whereas order flow decreased both in the Americas and in the EMEA (due in particular to the difficult experienced in the Italian market). Order flow for the Natuzzi Italia products increased thanks to DOS segment, and notwithstanding adverse currency movements, while order flow for the Natuzzi Edition products reported a decrease.

For 2018, the Group will continue to focus its efforts primarily on North America, China and the United Kingdom.

The efforts the Company has made over the last several years on expanding its product offering and on points of sale, together with high Natuzzi brand recognition, are expected to support the business.

2) Softaly Division year-to-date order flow, as compared to the same period in 2017, shows a significant decrease in the overall business, almost entirely due to the weak performance from the North American market.

The Softaly division has been suffering in the North American market due to major adverse retailing conditions of the existing top retailers not yet balanced by newly acquired major accounts. In the EMEA region, order flow was down medium single-digit. In South America and APAC, where volumes are not yet significant order flow was up double-digit versus the same period of 2017. The Company has adopted a specific plan to recover the Softaly business. In particular:

the rationalization of the collection;

the re-engineering of our dedicated industrial platforms;

a specific focus on the Quality of Product & Service program.

The recent exhibitions held in Cologne and High Point have been encouraging for the Softaly business, although the impact on the order flow is not yet visible.

Off-Balance Sheet Arrangements

As of December 31, 2017, neither Natuzzi S.p.A. nor any of its subsidiaries was a party to any off-balance sheet arrangements.

Related Party Transactions

Please see Item 7. Major Shareholders and Related Party Transactions of this Annual Report.

New Accounting Standards under Italian and US GAAP

Process of Transition to International Accounting Standards Following the entry into force of European Regulation No. 1606 of July 2002, EU companies whose securities are traded on regulated markets in the EU have been required, since 2005, to adopt International Financial Reporting Standards (IFRS), formerly known as IAS, in the preparation of their consolidated financial statements. Given that the Company's securities are only traded on the New York Stock Exchange (the NYSE), the Company is not subject to this requirement and continues to report its financial results in accordance with Italian GAAP and to provide the required reconciliation of certain items to U.S. GAAP in

the Company's Annual Reports on Form 20-F.

Italian GAAP As consequence of the application of the new Italian legislation introduced by Legislative Decree no. 139 of August 2015, which endorsed the EU Directive 34/2013, in December 2016, the Italian Accounting Profession (OIC) issued new accounting standards applicable for the annual reporting periods beginning on or after January, 1 2016. Therefore, starting from 2016, the consolidated financial statements of the Company as of December 31, 2016 have been prepared in compliance with these new accounting standards that led only to changes in the classification of some financial statements captions, while there were no changes in the Natuzzi's accounting policies. These changes have been applied using the retrospective method, as if the new classification had always been applied.

Table of Contents

The changes that have affected the consolidated financial statements of the Company as of December 31, 2016 are related to the change in the presentation of other income (expense), net. Under the previous accounting standard the impairment loss of long-lived assets and non-current investments and the accrual for the one-time termination benefits were classified in the caption other (expense), net of the consolidated statements of operations. Under the new accounting standard such costs are classified in the cost of sales, selling expenses and general and administrative expenses based on the function of the cost to which they relate. For additional details refer to Notes 21, 25, 26 and 28 included in Item 18 of this Annual Report.

In March 2018, the Italian Accounting Profession (OIC) issued the revised accounting principle *OIC 11, Financial Statements Aims and Assumption*, which updates the old OIC 11 to appropriately reflect the recently issued accounting standards issued by the OIC in December 2016 and applicable for annual reporting periods beginning on or after January 1, 2016 (see note 2). This accounting standard is effective for annual and interim periods in fiscal years beginning on or after January 1, 2018. The adoption of this standard will not have a material impact on the Company's consolidated financial statements.

There are no additional recently issued accounting standards under Italian GAAP that have not been adopted by the Group.

Recently issued Accounting Pronouncements US GAAP Recently issued but not yet adopted US Accounting pronouncements relevant for the Company are as follows:

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from contract with customers*, which was further amended through various updates issued by the FASB thereafter. This topic converges the guidance within US GAAP and International Financial Reporting Standards (IFRS) and supersedes ASC Topic 605, *Revenue Recognition*. The core principle of the new standard is that a company should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services and establishes a five step model to be applied by an entity in evaluating its contracts with customers. The new standard will become effective for annual reporting periods beginning after December 15, 2017. The Company will adopt the standard on January 1, 2018.

The new standard allows two permitted transition methods: the full retrospective method, in which case the standard would be applied to each prior reporting period presented, or the modified retrospective method, in which case the cumulative effect of applying the standard would be recognized at the date of initial application.

The Company elected to apply the modified retrospective approach only to contracts that are not completed as of the date of initial application. As a consequence, the cumulative effects deriving from the adoption of the new standard, calculated only to ongoing contracts with customers, will be recognized in retained earnings as of January 1, 2018.

The Company presents the calculation of net loss and shareholders' equity in conformity with US GAAP under the note *Application of generally accepted accounting principles in the United States of America* of the Group's annual report on Form 20-F. Considering the election of the modified retrospective approach to apply the new standard, comparative figures included in such note will continue to be presented according to previous applicable accounting standards. As for figures as of December 31, 2018, a new reconciling item is expected to be presented in the reconciliation of net loss, reconciliation of equity attributable to Natuzzi S.p.A. and subsidiaries, reconciliation of net sales and operating loss from Italian GAAP to US GAAP, according to the results of the analysis performed by the Company.

Since the issuance of the new standard by the FASB, the Company has analyzed the overall impacts of the standard, also considering the related considerations on the Group's internal control system. In particular, as a starting point, the Company has reconsidered its revenue streams in order to obtain an understanding of how the new standard will affect each revenue stream and also performed a detailed contract analysis to identify the promised goods or services within such contracts and determined which of those goods and services could represent separate performance obligations, therefore eligible to be allocated a portion of the transaction price and be accounted separately.

The analysis performed resulted in the identification of some performance obligations that will be subject to a different recognition criteria as compared to current GAAP, as described below:

Service-type warranties, usually sold together with the Group's products, represent, according to the new standard, services capable of being distinct. Such service-type warranties are currently recognized as revenues when sales occur, while, given new requirements, are to be recognized as performance obligations satisfied over time. They will therefore require a separate allocation of the transaction price, with related revenues to be recognized over the validity period of such warranties.

Table of Contents

Revenues deriving from the sale of the Natuzzi Display System (NDS), and related slotting fees recognized to retailers for the purchase of NDS are currently recognized as sales/costs when they occur. The new provisions require them to be identified as performance obligations satisfied over time, with the need to defer over the length of the distribution contract both revenues and slotting fees.

Based on the Company's assessment of the quantitative impacts of the application of the new standard, it will not have a material impact on the amounts reported in the Group's consolidated financial statements. Indeed, as of year-end 2017, service-type warranties represent only 0.08% of net sales, and NDS sales and slotting fees represent only 0.59% of net sales and 0.50% of cost of sales, respectively. The Group has also implemented new controls and processes designed to meet the requirements of the standard and assessed the required new disclosures upon adoption.

On January 5, 2016 the FASB issued ASU 2016-01, *Financial Instruments - Overall - Recognition and Measurement of Financial Assets and Financial Liabilities*. The amendments in this Update require all equity investments to be measured at fair value with changes in the fair value recognized through net income (other than those accounted for under equity method of accounting or those that result in consolidation of the investee). The amendments in this Update also require an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments. In addition, the amendments in this Update eliminate the requirement to disclose the fair value of financial instruments measured at amortized cost for entities that are not public business entities and the requirement for to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet for public business entities. The new standard is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2017. Early adoption is permitted. The adoption of this standard is not expected to have a material impact on the Company's financial statements.

On February 25, 2016 the FASB issued ASU 2016-02, *Leases*, Topic 842. The amendments in this Update are to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet and disclosing key information about leasing arrangements. The new standard is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. Early adoption is permitted. The Company has chosen not to early adopt this standard. The Company expects that the adoption of this standard will have a material impact on its consolidated financial statements due to the recognition of right-of-use assets and liabilities.

In June 2016, the FASB issued ASU 2016-13, *Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments*, which significantly changes the way entities recognize impairment of many financial assets by requiring immediate recognition of estimated credit losses expected to occur over their remaining life. Such new standard is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. Early adoption is permitted. The Company is evaluating the provisions of this standard, but it does not expect adoption to have a material impact on the Company's consolidated financial statements.

In August 2016, the FASB issued ASU 2016-15, *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments*, which addresses eight classification issues related to the statement of cash flows:

Debt prepayment or debt extinguishment costs;

Settlement of zero-coupon bonds;

Contingent consideration payments made after a business combination;

Proceeds from the settlement of insurance claims;

Proceeds from the settlement of corporate-owned life insurance policies, including bank-owned life insurance policies;

Distributions received from equity method investees;

Beneficial interests in securitization transactions; and

Separately identifiable cash flows and application of the predominance principle.

This standard is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2017. Early adoption is permitted. The Company is evaluating the provisions of this standard, but it does not expect adoption to have a material impact on the Company's consolidated financial statements.

Table of Contents

In October 2016, the FASB issued ASU 2016-16, *Income Taxes (Topic 740), Intra-Entity Transfers of Assets Other Than Inventory*, which requires companies to account for the income tax effects of intercompany sales and transfers of assets other than inventory (e.g., intangible assets) when the transfer occurs. That is a change from today's guidance, which requires companies to defer the income tax effects of intercompany transfers of assets until the asset has been sold to an outside party or otherwise recognized (e.g., depreciated, amortized, impaired). The new guidance will require companies to defer the income tax effects only of intercompany transfers of inventory. Such new standard is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2017. Early adoption is permitted. The Company is evaluating the provisions of this standard, but it does not expect adoption to have a material impact on the Company's consolidated financial statements.

In November 2016, the FASB issued ASU 2016-18, *Statement of Cash Flows (Topic 230), Restricted Cash*, which requires entities to show the changes in the total of cash, cash equivalents, restricted cash and restricted cash equivalents in the statement of cash flows. As a result, entities will no longer present transfers between cash and cash equivalents and restricted cash and restricted cash equivalents in the statement of cash flows. Such new standard is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2017. Early adoption is permitted. The Company is evaluating the provisions of this standard, but it does not expect adoption to have a material impact on the Company's consolidated financial statements.

In January 2017, the FASB issued ASU 2017-01, *Business Combinations (Topic 805): Clarifying the Definition of a Business*, which provides a new framework for determining whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The new standard is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2017. Early adoption is permitted. The adoption of this standard is not expected to have a material impact on the Company's financial statements.

In January 2017, the FASB issued ASU 2017-04, *Intangibles Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment*, which requires an entity to no longer perform a hypothetical purchase price allocation to measure goodwill impairment. Instead, impairment will be measured using the difference between the carrying amount and the fair value of the reporting unit. The new standard is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. Early adoption is permitted. The adoption of this standard is not expected to have a material impact on the Company's financial statements.

In February 2017, the FASB issued ASU 2017-05 *Other Income Gains and Losses from the Derecognition of Nonfinancial Assets (Subtopic 610-20): Clarifying the Scope of Asset Derecognition Guidance and Accounting for Partial Sales of Nonfinancial Assets*, which clarifies the guidance in Subtopic 610-20 on accounting for derecognition of a nonfinancial asset. The ASU also defines in-substance nonfinancial assets and includes guidance on partial sales of nonfinancial assets. An entity is required to apply the amendments in this ASU at the same time that it applies ASU 2014-09. The Company will adopt this standard in fiscal year 2018 and does not expect it to have a material impact on the Company's consolidated financial statements.

In May 2017, the FASB issued ASU 2017-10 *Service Concession Arrangements (Topic 853): Determining the Customer of the Operation Services*, which clarifies that the customer in a service concession arrangement is always the grantor. This ASU is effective at the same time as ASU 2014-09, *Revenue from Contracts with Customers (Topic 606)* (the new revenue standard). The Company will adopt this standard in fiscal year 2018 and does not expect it to have a material impact on the Company's consolidated financial statements.

In August 2017, the FASB issued ASU 2017-12 *Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities*, which changes the recognition and presentation requirements of hedge accounting, including: (a) eliminating the requirement to separately measure and report hedge ineffectiveness; and (b) presenting

all items that affect earnings in the same income statement line item as the hedged item.

The ASU also provides new alternatives for:

applying hedge accounting to additional hedging strategies;

measuring the hedged item in fair value hedges of interest rate risk;

reducing the cost and complexity of applying hedge accounting by easing the requirements for effectiveness testing, hedge documentation and application of the critical terms match method; and

reducing the risk of material error correction if a company applies the shortcut method inappropriately.

Table of Contents

This ASU is effective for public business entities, for annual and interim periods in fiscal years beginning after December 15, 2018. Early adoption is permitted any time after the issuance of the ASU, including in an interim period. If adopted at other than the beginning of a fiscal year, cumulative effect adjustments are reflected as of the beginning of the fiscal year. The adoption of this standard will not have a material impact on the Company's consolidated financial statements.

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

The board of directors of Natuzzi S.p.A. currently consists of seven members, all of whom were elected at the Company's annual general shareholders' meeting held on April 30, 2018. All of the members of the board of directors were elected for a three-year period. The directors and senior executive officers of the Company as of April 30, 2018, were as follows:

Name	Age	Position within the Company
Pasquale Natuzzi *	79	Chairman of the Board of Directors and CEO
Antonia Isabella Perrone *	48	Non-executive Director
Paolo Braghieri*	64	Non-executive Director
Giuseppe Antonio D' Angelo *	52	Non-executive Director
Vincenzo Perrone*	59	Non-executive Director
Stefania Saviolo*	53	Non-executive Director
Ernesto Greco*	67	Executive Director
Vittorio Notarpietro	55	Chief Financial Officer (CFO)
Antonio Cavallera	39	Operating General Manager
Michele Variale	38	Internal Control Systems Manager
Nazzario Pozzi	46	Chief Natuzzi Division Officer
Giovanni Tucci	46	Chief Softaly Officer

* The above mentioned members of the board of directors were elected at the Company's annual general shareholders' meeting held on April 30, 2018.

Pasquale Natuzzi, currently Chairman of the Board of Directors and CEO. He founded the Company in 1959. Mr. Natuzzi held the title of sole director of the Company from its incorporation in 1972 until 1991, when he became the Chairman of the Board of Directors. Mr. Natuzzi has creative skills and is directly involved with brand development and product styling. He takes care of strategic partnerships with existing and new accounts.

Antonia Isabella Perrone is a Non-executive Director and is involved in the main areas of Natuzzi Group management, from the definition of strategies to retail distribution, marketing and brand development, and foreign transactions. In 1998, she was appointed sole director of a company in the agricultural-food sector, wholly owned by the Natuzzi Family. She joined the Natuzzi Group in 1994, dealing with marketing and communication for the Italian market under the scope of retail development management until 1997. She has been married to Pasquale Natuzzi since 1997.

Paolo Braghieri is a Non-executive Director of the Company. In 2017 he founded and is the controlling shareholder of G.B.C. S.A., a real estate company. From 2009 through 2016, he served as CEO and general manager of GE Capital Interbanca. From 2004 through 2008 he was a general manager of Interbanca S.p.A. and from 2001 through 2004 he acted as country manager and head of the corporate and investment banking division of ABN Amro in Italy.

From 1991 through 2001, he worked at Credit Suisse First Boston in London and was responsible for the management of corporate finance transactions involving Italian clients. He started his banking career as a credit analyst at The Chase Manhattan Bank N.A. where he eventually held various positions in the investment banking division of the London, Rome and Milan branches from 1980 through 1991. He served as member of the board of directors and of the executive committee of Sorin S.p.A. (2006 - 2009) and as member of the board of directors of IMA S.p.A. (2004 - 2006). He is a member of the Advisory Board of the Department of Mechanical Engineering of the Polytechnic of Milan since 2016. He earned his degree in Mechanical Engineering from the Polytechnic of Milan and his MBA from the Polytechnic of Milan School of Management.

Giuseppe Antonio D Angelo is a Non-executive Director of the Company and is currently Executive Vice President of Anglo-America & CIS regions with Ferrero International SA. Before joining Ferrero in 2009, he acquired significant international experience in general management of multinational companies such as General Mills (from 1997 to 2009), S.C. Johnson & Son (from 1991 to 1997) and Procter & Gamble (from 1989 to 1991). Mr. D Angelo earned his Bachelor of Arts degree in Economics from LUISS University of Rome in 1988. He received certification from Harvard Business School in the Advanced Management Program in 2004.

Table of Contents

Vincenzo Perrone is a Non-executive Director of the Company and is currently Professor of Organizational Theory and Behavior at Bocconi University Milan, Italy, where he also previously served as Director of the Organizational and Human Resource Management Department of the Bocconi School of Management (1996–2002), Chairman of the Institute of Organization and Information Systems (2001–2007) and Vice-Rector for Research (2008–2012). He was a visiting professor at Carlson School of Management at the University of Minnesota from 1992 to 1994. He currently serves on the board of publishing company Egea S.p.A. (since June 2009) and of Aviva Italia Holding (since 2015), an insurance company where he also serves as a member of the risk, auditing and remuneration committees. He has prior experience as a member of the board of directors of ClarisVita S.p.A. (2003–2005), ACTA S.p.A. (2004), IP Cleaning S.p.A. (2004–2008) and Società Autostrada Pedemontana Lombarda S.p.A. (2009–2011) and served on the advisory boards of Arthur Andersen MBA S.r.l. (1999–2000) and SAP Italia S.p.A. (2000–2001), as a member of the Technical and Scientific Oversight Board for procurement studies overseen by the Ministry of Economy and Finance Treasury Department, on board committees responsible for awarding public tenders organized by Consip S.p.A. (2000–2003), on the Technical Committee for Research and Innovation of Confindustria (2004–2008) and on the Technical Commission for Public Finance at the Ministry of Economy and Finance (2007–2008). He has served as the Director of the Bocconi School of Management's *Economia & Management* journal and has served as a reviewer for the *Academy of Management Journal*, *Academy of Management Review*, *Organization Science* (editorial board member) and *Journal of International Business Studies*. He has published several books and articles both in Italian and international journals.

Stefania Saviolo is a Non-executive Director of the Company. She is currently Professor of Management at Bocconi University and SDA Bocconi School of Management where, since 2013, she has been the Director of the Luxury & Fashion Knowledge Center and, since 2001, founder and director of the Master in Fashion, Experience & Design Management in partnership with Fondazione Altagamma. She was a visiting scholar at the Stern School of Business, New York University and also served as a visiting professor at Fudan University in Shanghai, China. She is a member of the board of directors of TXT e-solutions, a listed international software products and solutions vendor, where she is also member of the risk committee and President of the remuneration committee. She has gained expertise in brand and retail management, product marketing and international strategies as a senior consultant for international fashion, luxury and design companies. She is the author and co-author of several books and articles diffused at international level, particularly in the luxury, fashion and design industries.

Ernesto Greco is an Executive Director of the Company. Following the ordinary shareholders meeting held on May 2, 2017, the Board of Directors met on the same day and entrusted Director Ernesto Greco with ad hoc powers to supervise and support activities of the finance staff. Since October 2007 has been the Chief Financial Officer and General Manager for Administration, Control and Information Systems of the Ferragamo Group. He started his professional career working at large chemical companies, including Montedison and Eni, as well as in technology companies such as Hewlett Packard and Wang Laboratories in controllership and finance related positions. From 1989 to 2006 he served as Chief Financial Officer at the Bulgari Group and, from 2006 to 2007, he served as Chief Executive Officer of the Natuzzi Group.

Vittorio Notarpietro is the CFO of the Company. He joined the Group in 2009 and from 1991 to 1998, he was the Finance Director and Investor Relations Manager for the Group. From 1999 to 2006, he was Vice President for Finance for IT Holding Group. From 2006 to 2009, he was the CEO of Malo S.p.A., a leading Italian company in the luxury sector. He re-joined the Group in September 2009.

Antonio Cavallera is the Operating General Manager. Reporting to the CEO, he is in charge of defining the medium-to long-term operating strategy, which include R&D, Manufacturing, Quality, Procurement, Supply Chain and Engineering Departments. He is also ad interim HR & Legal Director. He joined the Company in December 2005 and from September 2011 to November 2015, he served as Chief Strategic Planning Officer of the Company with

principle responsibility for defining and monitoring the goals of the Transformation Plan project. He also covered roles of increasing responsibility in the Human Resources & Organization Department. From November 2010 to August 2011 he was Corporate & Commercial Human Resources Manager and from June 2009 to November 2010 as Commercial Human Resources Manager. He has also served as Training & Change Management Manager from July 2008 to June 2009 and HR Retail Specialist from September 2006 to June 2009.

Table of Contents

Michele Variale is the Internal Control System Manager for the Group. He joined the Group at the end of August 2017 with responsibility for providing assurance to the Board of Directors and the Audit Committee that processes and internal controls are effective and properly designed to mitigate business risks. Within the mandate he has been provided by the Board of Directors, his scope of work covers all key Group risks, including strategic, financial, operational and compliance risks. His main duties include defining and completing planned audit activities, following up on opportunities for improvement, providing independent advice and periodically reporting to the Audit Committee and the Board of Directors. In addition, he is responsible for providing assurance over design and effectiveness of key controls relevant for SOX. His team members are located in Italy HQ, EMEA, Asia and America, and operate their duties in compliance with the ethical code of the Institute of Internal Audit. His professional career has included different roles in Finance, Internal Audit and Financial Crime Compliance in the last 15 years. Previously, he has worked for PwC, General Electric and Willis Towers Watson, in different industries and sectors. He is a Certified Internal Auditor.

Nazzario Pozzi is the Chief Natuzzi Division Officer. He joined the Group in 2016 and is responsible for the growth strategy relating to the brand strategy, brand communication, consumer strategy, research and development, style and design, merchandising, product development and product engineering, marketing, global retail and sales operations and customer acquisition. He graduated from Harvard Business School. Throughout his career, he has held general management positions in brands and retail businesses at global level and in the luxury goods, consumer goods and cross-industry retail sectors. He has managed brand strategies and profitable growth in brands such as HUGO BOSS, Salvatore Ferragamo and DIESEL, and has served as senior strategy advisor to the CEO of Baccarat.

Giovanni Tucci is the Chief Softaly Officer of the Natuzzi Group. He joined the Group in 2013 and is responsible for the worldwide merchandising and sales for both the commercial and the industrial elements of business, overseeing the Softaly global team. He joined the Group in January 2013 as Private Label Sales Director for EMEA, bringing many years of experience in merchandising and sales, having previously worked in both the automotive and wholesale furniture industries. Giovanni's background includes: scientific high school, a flight academy and a bachelor's degree in economics and business administration. His role is presently focused on restructuring sales in the North American market in line with the EMEA.

Compensation of Directors and Officers

As a matter of Italian law and under our By-laws, the compensation of executive directors, including the CEO, is determined by the Board of Directors, after consultation with the board of statutory auditors, within a maximum amount established by the Company's shareholders. The Company's shareholders determine the base compensation for all members of the Board of Directors, including non-executive directors. Compensation of the Company's executive officers (for performing their role as such) is determined by the CEO. None of our directors or senior executive officers is party to a contract with the Company that would entitle such persons to benefits upon the termination of service as a director or employment, as the case may be.

Aggregate compensation paid by the Group to the directors and officers was approximately 3.0 million in 2017.

The compensation paid in 2017 to the members of the Board of Directors is set forth below individually:

Name	Base Compensation
Pasquale Natuzzi	120,000.00

Edgar Filing: NATUZZI S P A - Form 20-F

Antonia Isabella Perrone	25,000.00
Giuseppe Antonio D Angelo	25,000.00
Cristina Finocchi Mahne	25,000.00
Stefania Saviolo	25,000.00
Ernesto Greco	25,000.00
Vincenzo Perrone	25,000.00

In 2017, approximately 120 managers from around the world participate in the MBO incentive system. The Company will only pay a bonus pursuant to the MBO system if certain budget results relating to the operating result are achieved.

Table of Contents**Statutory Auditors**

The following table sets forth the names of the three members of the board of statutory auditors of the Company and the two alternate statutory auditors and their respective positions for the periods covered by this Annual Report. The current board of statutory auditors was elected for a three-year term on April 27, 2016, at the annual general shareholders meeting.

Name	Position
Carlo Gatto	Chairman
Cataldo Sferra	Member
Giuseppe Pio Macario	Member
Andrea Venturelli	Alternate
Vito Passalacqua	Alternate

During 2017, the Group's statutory auditors received approximately 0.1 million in compensation in the aggregate for their services to the Company and its Italian subsidiaries.

We are subject to Rule 10A-3 (Rule 10A-3) under the Securities Exchange Act of 1934, as amended (the Exchange Act), which requires, absent an exemption, that a listed company maintain an audit committee composed of members of the issuer's board of directors that meet certain independence requirements.

The Company relies on an exemption from the Rule 10A-3 requirements provided by Rule 10A-3(c)(3) of the Exchange Act for foreign private issuers with a board of statutory auditors established in accordance with local law or listing requirements and subject to independence requirements under local law or listing requirements. See Item 16D. Exemption from Listing Standards for Audit Committees for more information.

Employees

The following table illustrates the breakdown of the Group's employees by qualification and location for the periods indicated:

Qualification	As of December 31,			Change	Change
	2017	2016	2015	2017/2016	2016/2015
Top managers	55	56	58	(1)	(2)
Middle managers	223	202	172	21	30
Clerks	1,012	981	952	31	29
Laborers	3,849	3,932	4,459	(83)	(527)
Total	5,139	5,171	5,641	(32)	(470)

Location	As of December 31,			Change	Change
	2017	2016	2015	2017/2016	2016/2015
Italy	2,436	2,268	2,565	168	(297)
Outside Italy	2,703	2,903	3,076	(200)	(173)
Total	5,139	5,171	5,641	(32)	(470)

We completed an employee reorganization plan at our Italian operations (the Italy Plan) in 2016. As a result, in 2016, we reduced our total workforce by 364 units, of which 188 workers accepted incentives in exchange for voluntarily terminating their employment with the Company, whereas 176 workers did not accept the Company's incentives and opposed the employment termination.

During 2016, we experienced four days of strikes in relation to employment termination; however, this did not have a major impact on the Company's operations. In 2017, no strike occurred at the Company's Italian operations.

Table of Contents

On March 22, 2016 the Company, trade unions and the Economic Development Ministry agreed to extend the Solidarity Agreement for a one-year period, which, as a result, affected 1,915 employees, workers in particular. On March 27, 2017, the same parties agreed to extend the Solidarity Agreement through December 2018, which, as a result, affected 1,909 employees, workers in particular.

During 2017, the Company reintegrated 166 workers who had been dismissed on October 16, 2016 as a result of the organizational restructuring after the Bari Labor Court ordered they had been wrongfully terminated. The Bari Labor Court considered the dismissals made by the Company to have been illegitimate because it found a lack of the objective requirements necessary under the legislation on collective redundancies. The Company has challenged the judicial measures of the Bari Labor Court in order to assert its positions, and the judgments are still pending. On December 22, 2017, after discussions with trade unions and the Economic Development Ministry, the same parties agreed to extend the Solidarity Agreement to all employees, including reintegrated workers, through December 2018, which affected 2,075 employees.

Employee Development

Professional development is a key part of Natuzzi's human resources department and we are constantly working to put in place programs and tools.

During 2017, we had a number of on-going projects focused on improving the processes lined to the Employee Life-Cycle, which consists of the following iterative phases:

Acquisition of talent (recruitment, development of board);

Talent development (training, learning and development);

Talent commitment;

Involvement of talent;

Talent reward; and

Workforce planning.

The above iterative phases are part of a modern HR organizational model, divided into three dimensions: **HR CoE** (HR Competence Center), **HR Admin & Operational** and **HR Business Partner**.

The implementation of the Employee Life-Cycle follows a progressive approach.

In 2017 our talent development program improved certain aspects of our program (like the Natuzzi Performance Appraisal) and we continue to work on developing solutions to support our line functions.

Moreover, this year we utilized new models from our competencies assessment to improve accurate data evaluation with respect to tools used in our hiring, induction and onboarding phases.

We are also continuing to work on extending the processes implemented so far in other regions and countries, for widespread, consistent and sustainable implementation in all locations in which the Company operates.

During 2017, we focused our planning and development of training activities to support our corporate strategy as well as develop and strengthen our brand to face global competition.

The training courses provided have included:

Innovation Management, Digital Transformation and Digital Reputation. Some colleagues also took part in the DIGITAL DESIGN DAYS training event.

We also had training aimed at strengthening IT skills to use software for rendering activities (like 3D STUDIO MAX, VRAY) and for BIG DATA management activities (like SQL DATA WAREHOUSE).

Training was carried out on FSC® certification (Forest Stewardship Council) and on the updating of the ISO 9001 standard.

Other training was dedicated to managerial skills in order to develop effective negotiation techniques. Inductions were also held for newly hired staff to support and speed up the onboarding.

Table of Contents

We also had training focused on language skills, including foreign language training both through full immersion and mini-classes in house.

We continued to provide health and safety training for all workers on general and specific risks present in the workplace and also completing the training for newly-appointed RLS (*Rappresentanti dei Lavoratori per la Sicurezza*) as well as providing an update for existing.

During the months of July and August 2017, training activities were held dedicated to reintegrated personnel, as support for their re-qualification, covering the issues of security, information technology, ISO certification management systems, etc.

In total, in 2017 1.122 employees participated in Natuzzi training courses, for a total of 25,159 hours of training.

For a breakdown on the type of training, see the following:

TRAINING TYPE	%
Induction	8%
Language	3%
Managerial	4%
Duty	42%
Redevelopment	28%
Specialistic	15%

With specific regard to retail / commercial training, in 2017 we put in place:

11 induction plans, 3 of these were for corporate staff, and 8 were related to staff of our subsidiaries, for a total of 420 man-hours provided.

19 training sessions for the staff of POS (points of sales) for the two brands (*Natuzzi Italia* and *Natuzzi Editions*), both for FOS staff and DOS staff, for a total of 1.540 / man-hours provided, with an average satisfaction rate of 92%.

1 session of TTT (Train to Trainer) for the internal Trainer team (mainly located in South America, UK, China).

Finally, during 2017 we started the public tender founded training (Avviso 4/2016 della Regione Puglia), which will be continued in 2018 and 2019. The courses relate to the development of technical design skills using CAD. Within this plan, in 2018 some important projects will be carried out for the development and skills certification such as: Project Management Professional, Green Belt, etc.

We entered into recruitment agreements and partnerships with the following universities and institutions:

University of Bari Aldo Moro ;

Polytechnic of Bari;

SPEGEA Business School, Bari;

La Sapienza University of Roma;

Fondazione Italia Cina;

Polytechnic of Milano;

Consorzio interuniversitario AlmaLaurea;

Cooperation agreement Technical University of Cluj-Napoca;

ITS Antonio Cuccovillo, Bari.

NABA e Domus Academy, Milano

Table of Contents

We have also collaborated on the development of four important educational projects, which are:

Progettazione del biennio di Alta specializzazione in Meccanica del legno dell ITS Cuccovillo di Bari ;

University of Bari Aldo Moro , department of management and economy and corporate law, about Marketing course (totally in English);

Alternanza scuola lavoro , where we host students attending local schools for a training program.

Domus Academy | Master in Interior and Living Design Design of Spaces workshop. To explain and explore the potentials of the new system of Tiny House.

Share Ownership

Mr. Pasquale Natuzzi, who founded the Company and is currently its CEO and Chairman of the Board of Directors, as of April 20, 2018, beneficially owns an aggregate amount of 30,967,521 Ordinary Shares, representing 56.5% of the Ordinary Shares outstanding (61.6% of the Ordinary Shares outstanding if the 5.1% of the Ordinary Shares owned by members of Mr. Natuzzi's immediate family (the Natuzzi Family) are aggregated).

As a result, Mr. Natuzzi controls Natuzzi S.p.A., including its management and the selection of the members of its board of directors. Since December 16, 2003, Mr. Natuzzi has held his entire beneficial ownership of Natuzzi S.p.A. shares through INVEST 2003 S.r.l., an Italian holding company wholly-owned by Mr. Natuzzi and having its registered office at Via Gobetti 8, Taranto, Italy.

On November 6, 2014, INVEST 2003 s.r.l. completed the purchase of 250,000 ADSs, each representing one Ordinary Share, at a price of U.S.\$2.00 per ADS. The purchase was privately negotiated with a single individual and was effected through an escrow arrangement with BNY Mellon.

On July 30, 2014, INVEST 2003 s.r.l. completed the purchase of 500,000 ADSs, each representing one Ordinary Share, at a price of U.S.\$2.75 per ADS. The purchase was privately negotiated with a single individual and was effected through an escrow arrangement with BNY Mellon. For more information, refer to Schedule 13D (Amendment No. 2), filed with the SEC on September 14, 2014, that amends and supplements the Schedule 13D, filed with the SEC on April 24, 2008 (as amended by Amendment No. 1 filed on April 8, 2013 (Amendment No. 1).

These two purchases, carried out for investment purposes, brought the number of Ordinary Shares beneficially owned by each of Mr. Natuzzi and INVEST 2003 to 30,967,521 (representing 56.5% of the Ordinary Shares outstanding).

Between September 27, 2011 through April 30, 2013, INVEST 2003 S.r.l. completed the purchase of a total of 859,628 Natuzzi S.p.A. ADSs (representing approximately 1.6% of the Company's total shares outstanding), at an average price of U.S.\$ 2.37 per ADS. These purchases were made in accordance with a purchase plan undertaken pursuant to Rule 10b-18 (*Purchases of Certain Equity Securities by the Issuer and Others*) promulgated under the Securities Exchange Act of 1934 (the Rule 10b-18 Plan).

On April 18, 2008, INVEST 2003 S.r.l. purchased 3,293,183 ADSs, each representing one Ordinary Share, at the price of U.S.\$ 3.61 per ADS. For more information, refer to Schedule 13D, filed with the SEC on April 24, 2008, and related Amendment No. 1 to Schedule 13D, filed with the SEC on April 8, 2013. For further discussion, see Note 22 to the Consolidated Financial Statements included in Item 18 of this Annual Report.

Each of the Company's other directors and officers owns less than 1% of the Company's Ordinary Shares and ADSs. None of the Company's directors or officers has stock options.

Table of Contents**ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS****Major Shareholders**

Mr. Pasquale Natuzzi, who founded the Company and is currently its CEO and Chairman of the Board of Directors, as of April 20, 2018, beneficially owns an aggregate amount of 30,967,521 Ordinary Shares representing 56.5% of the Ordinary Shares outstanding (61.6% of the Ordinary Shares outstanding if the 5.1% of the Ordinary Shares owned by the Natuzzi Family are aggregated). Since December 16, 2003, Mr. Natuzzi has held his entire beneficial ownership of Natuzzi S.p.A. shares through INVEST 2003 S.r.l., an Italian holding company wholly-owned by Mr. Natuzzi and having its registered office at Via Gobetti 8, Taranto, Italy.

The following table sets forth information, as reflected in the records of the Company as of April 20, 2018, with respect to each person who beneficially owns 5% or more of the Company's Ordinary Shares or ADSs:

	Number of shares owned	Percent owned
Pasquale Natuzzi ⁽¹⁾	30,967,521	56.5%
Quaeroq CVBA ⁽²⁾	3,748,181	6.8%
Donald Smith & Co., Inc. ⁽³⁾	3,417,934	6.2%

(1) Includes ADSs purchased on April 18, 2008, purchases made from September 27, 2011 through April 30, 2013 under the Rule 10b-18 Plan and two privately negotiated purchases executed on July 30, 2014 and November 6, 2014. If Mr. Natuzzi's Ordinary Shares are aggregated with those held by members of the Natuzzi Family, the amount owned would be 33,767,521 and the percentage ownership of Ordinary Shares would be 61.6%.

(2) According to the Schedule 13G filed with the SEC by Quaeroq CVBA on May 1, 2017.

(3) According to the Schedule 13G filed with the SEC by Donald Smith & Co., Inc. on February 8, 2018.

As indicated in Item 6. Share Ownership, Mr. Natuzzi controls Natuzzi S.p.A., including its management and the selection of the members of its board of directors. Since December 16, 2003, Mr. Natuzzi has held his entire beneficial ownership of Natuzzi S.p.A. shares through INVEST 2003 S.r.l., an Italian holding company wholly-owned by Mr. Natuzzi and having its registered office at Via Gobetti 8, Taranto, Italy.

In addition, the Natuzzi Family has a right of first refusal to purchase all the rights, warrants or other instruments which BNY, as Depository under the Deposit Agreement, determines may not lawfully or feasibly be made available to owners of ADSs in connection with each rights offering, if any, made to holders of Ordinary Shares. None of the shares held by the above shareholders has any special voting rights.

As of December 31, 2017, 54,853,045 Ordinary Shares were outstanding. As of the same date, there were 21,809,907 ADSs (equivalent to 21,809,907 Ordinary Shares) outstanding. The ADSs represented 39.8% of the total number of Natuzzi Ordinary Shares issued and outstanding.

Since certain Ordinary Shares and ADSs are held by brokers or other nominees, the number of direct record holders in the United States may not be fully indicative of the number of direct beneficial owners in the United States or of where the direct beneficial owners of such shares are resident.

Related Party Transactions

In 2017 and 2016, the Company had business relations with related parties conducted at arm's length conditions that consisted of sales of sofas and furnishings. Transactions with related parties amounted to 3.7 million in 2017 net sales (5.4 million in 2016) and 1.4 million as at December 31, 2017 in trade receivables (1.6 million in 2016).

Table of Contents

In addition, in 2016 the Company acquired from a related party 100% of a business composed by four *Divani&Divani by Natuzzi* stores, located in the North East of Italy, for a cash consideration of 2.5 million. Such business has been acquired at arm's length conditions. For further information, see Note 1 of the Consolidated Financial Statements included in Item 18 of this Annual Report.

Other than the foregoing transactions, neither the Company nor any of its subsidiaries was a party to a transaction with a related party that was material to the Company or the related party, or any transaction that was unusual in its nature or conditions, involving goods, services, or tangible or intangible assets, nor is any such transaction presently proposed. During the same period, neither the Company nor any of its subsidiaries made any loans to or for the benefit of any related party.

ITEM 8. FINANCIAL INFORMATION

Consolidated Financial Statements

Please refer to Item 18. Financial Statements of this Annual Report.

Export Sales

Export sales from Italy totaled approximately 131.8 million in 2017, up 17.4% from 2016. That figure represents 33.5% of the Group's 2017 net leather and fabric-upholstered furniture sales.

Legal and Governmental Proceedings

The Group is involved in tax and legal proceedings, including several minor claims and legal actions, arising in the ordinary course of business. The provision recorded against these claims is 14.9 million as of December 31, 2017 (11.2 million as of December 31, 2016). See Item 3. Key Information Risk factors and Note 21 to the Consolidated Financial Statements included in Item 18 of this Annual Report.

Apart from the proceedings described above, neither the Company nor any of its subsidiaries is a party to any legal or governmental proceeding that is pending or, to the Company's knowledge, threatened or contemplated against the Company or any such subsidiary that, if determined adversely to the Company or any such subsidiary, would have a materially adverse effect, either individually or in the aggregate, on the business, financial condition or results of the Group's operations.

Dividends

Considering that the Group reported a negative net result in 2017 and considering the capital requirements necessary to implement the restructuring of the operations and its planned retail and marketing activities, the Group decided not to distribute dividends in respect of the year ended on December 31, 2017. The Group has also not paid dividends in any of the prior three fiscal years.

The payment of future dividends will depend upon the Company's earnings and financial condition, capital requirements, governmental regulations and policies and other factors. Accordingly, there can be no assurance that dividends in future years will be paid at a rate similar to dividends paid in past years or at all.

Dividends paid to owners of ADSs or Ordinary Shares who are United States residents qualifying under the Income Tax Convention will generally be subject to Italian withholding tax at a maximum rate of 15%, provided that certain

certifications are given timely. Such withholding tax will be treated as a foreign income tax which U.S. owners may elect to deduct in computing their taxable income, or, subject to the limitations on foreign tax credits generally, credit against their United States federal income tax liability. See Item 10. Additional Information Taxation Taxation of Dividends.

Table of Contents**ITEM 9. THE OFFER AND LISTING****Trading Markets and Share Prices**

Natuzzi's Ordinary Shares are listed on the NYSE in the form of ADSs under the symbol NTZ. Neither the Company's Ordinary Shares nor its ADSs are listed on a securities exchange outside the United States. BNY is the Company's Depositary for purposes of issuing the American Depositary Receipts evidencing ADSs. Trading in the ADSs on the NYSE commenced on May 13, 1993.

The following table sets forth, for the periods indicated, the high and low market prices on an intraday basis per ADS as reported by the NYSE.

	New York Stock Exchange	
	Price per	
	ADS (in US dollars)	
	High	Low

ITEM 10. ADDITIONAL INFORMATION**By-laws**

The following is a summary of certain information concerning the Company's shares and By-laws (*statuto*) and of Italian law applicable to Italian stock corporations whose shares are not listed on a regulated market in the European Union, as in effect at the date of this Annual Report. In particular, Italian issuers of shares that are not listed on a regulated market of the European Community are governed by the rules of the Italian civil code (the "Civil Code"). This summary contains all the information that the Company considers to be material regarding its shares, but does not purport to be complete and is qualified in its entirety by reference to the By-laws or Italian law, as the case may be.

Table of Contents

General The issued share capital of the Company consists of 54,853,045 Ordinary Shares, with a par value of 1.00 per share. All the issued shares are fully paid, non-assessable and in registered form.

The Company is registered with the Companies Registry of Bari at No. 261878, with its registered office in Santeramo in Colle (Bari), Italy.

As set forth in Article 3 of the By-laws, the Company's corporate purpose is the production, marketing and sale of sofas, armchairs, furniture in general and raw materials used for their production. The Company is generally authorized to take any actions necessary or useful to achieve its corporate purpose.

Authorization of Shares At the extraordinary shareholders' meeting of the Company held on July 23, 2004, the shareholders authorized the Company's board of directors to carry out a free capital increase of up to 500,000, and a capital increase against payment of up to 3.0 million to be issued, in connection with the grant of stock options to employees of the Company and of other Group companies. On January 24, 2006 the Company's board of directors, in accordance with the Regulations of the Natuzzi Stock Incentive Plan 2004-2009 (which was approved by the board of directors in a meeting held on July 23, 2004), decided to issue without consideration 56,910 new Ordinary Shares in favor of the beneficiary employees. Consequently, the number of Ordinary Shares increased on the same date from 54,681,628 to 54,738,538. On January 23, 2007, the Company's board of directors, in accordance with the Regulations of the Natuzzi Stock Incentive Plan 2004-2009, decided to issue without consideration 85,689 new Ordinary Shares in favor of beneficiary employees. Consequently, the number of Ordinary Shares increased on the same date from 54,738,538 to 54,824,227. On January 24, 2008 the Company's board of directors, in accordance with the Regulations of the Natuzzi Stock Incentive Plan 2004-2009, decided to issue without consideration 28,818 new Ordinary Shares in favor of the beneficiary employees. Consequently, the number of Ordinary Shares increased on the same date from 54,824,227 to 54,853,045, the current number.

Form and Transfer of Shares The Company's Ordinary Shares are in certificated form and are freely transferable by endorsement of the share certificate by or on behalf of the registered holder, with such endorsement either authenticated by a notary, in Italy or elsewhere, or by a broker-dealer or a bank in Italy. The transferee must request that the Company enter his name in the register of shareholders in order to exercise his rights as a shareholder of the Company.

Dividend Rights Payment by the Company of any annual dividend is proposed by the board of directors and is subject to the approval of the shareholders at the annual shareholders' meeting. Before dividends may be paid out of the Company's unconsolidated net income in any year, an amount at least equal to 5% of such net income must be allocated to the Company's legal reserve until such reserve is at least equal to one-fifth of the par value of the Company's issued share capital. If the Company's share capital is reduced as a result of accumulated losses, no dividends may be paid until the capital is reconstituted or reduced by the amount of such losses. The Company may pay dividends out of available retained earnings from prior years, provided that, after such payment, the Company will have a legal reserve at least equal to the legally required minimum. No interim dividends may be approved or paid.

Dividends will be paid in the manner and on the date specified in the shareholders' resolution approving their payment (usually within 30 days of their annual general meeting). Dividends that are not collected within five years of the date on which they become payable are forfeited to the benefit of the Company. Holders of ADSs will be entitled to receive payments in respect of dividends on the underlying shares through BNY, as ADR Depository, in accordance with the deposit agreement relating to the ADSs.

Voting Rights Registered holders of the Company's Ordinary Shares are entitled to one vote *per* Ordinary Share.

As a registered shareholder, the Depositary (or its nominee) will be entitled to vote the Ordinary Shares underlying the ADSs. The Deposit Agreement requires the Depositary (or its nominee) to accept voting instructions from holders of ADSs and to execute such instructions to the extent permitted by law. Neither Italian law nor the Company's By-laws limit the right of non-resident or foreign owners of the Company's Ordinary Shares to hold or vote shares of the Company.

Board of directors Under Italian law and pursuant to the Company's By-laws, the Company may be run by a sole director or by a board of directors, consisting of seven to eleven individuals. The Company is currently run by a board of directors composed of seven individuals (see Item 6. Directors, Senior Management and Employees). The board of directors is elected by the ordinary shareholders' meeting of the Company, for the period established at the time of election but in no case for longer than three fiscal years. A director, who may, but is not required to be, a shareholder of the Company, may be reappointed for successive terms.

Table of Contents

The board of directors has the full power of ordinary and extraordinary management of the Company and in particular may perform all acts it deems advisable for the achievement of the Company's corporate purposes, except for the actions reserved by the applicable law or the By-laws to a vote of the ordinary or extraordinary shareholders' meeting. See also Item 10. Additional Information Meetings of Shareholders.

The board of directors must appoint a chairman (*presidente*) and may appoint a vice-chairman. The chairman of the board of directors is the legal representative of the Company. The board of directors may delegate certain powers to one or more managing directors (*amministratori delegati*), determine the nature and scope of the powers delegated to each director and revoke such delegation at any time. The managing directors must report to the board of directors and the board of statutory auditors at least every 180 days on the Company's business and the main transactions carried out by the Company or by its subsidiaries.

The board of directors may not delegate certain responsibilities, including the preparation and approval of the draft financial statements, the approval of merger and de-merger plans to be presented to shareholders' meetings, increases in the amount of the Company's share capital or the issuance of convertible debentures (if any such power has been delegated to the board of directors by vote of the extraordinary shareholders' meeting) and the fulfilment of the formalities required when the Company's capital has to be reduced as a result of accumulated losses that reduce the Company's stated capital by more than one-third. See also Item 10. Additional Information Meetings of Shareholders.

The board of directors may also appoint a general manager (*direttore generale*), who must report directly to the board of directors and confer powers for single acts or categories of acts to employees of the Company or persons unaffiliated with the Company.

Meetings of the board of directors are called no less than five days in advance by letter sent via fax, telegram or e-mail by the chairman on his own initiative. Meetings may be held in person, by video-conference or tele-conference, in the location indicated in the notice convening the meeting, or in any other destination, each time that the chairman may consider necessary. The quorum for meetings of the board of directors is a majority of the directors in office. Resolutions are adopted by the vote of a majority of the directors present at the meeting. In case of a tie, the chairman has the deciding vote.

Directors having any interest in a proposed transaction must disclose their interest to the board of directors and to the board of statutory auditors, even if such interest is not in conflict with the interest of the Company in the same transaction. The interested director is not required to abstain from voting on the resolution approving the transaction, but the resolution must state explicitly the reasons for, and the benefit to the Company of, the approved transaction. In the event that these provisions are not complied with, or that the transaction would not have been approved without the vote of the interested director, the resolution may be challenged by a director or by the board of statutory auditors if the approved transaction may be prejudicial to the Company. A managing director must solicit prior board approval of any proposed transaction in which he has any interest and that is within the scope of his powers. The interested director may be held liable for damages to the Company resulting from a resolution adopted in breach of the above rules. Finally, directors may be held liable for damages to the Company if they illicitly profit from insider information or corporate opportunities.

The board of directors may transfer the Company's registered office within Italy, set up and eliminate secondary offices and approve mergers by absorption into the Company of any subsidiary in which the Company holds at least 90% of the issued share capital. The board of directors may also approve the issuance of shares or convertible debentures and reductions of the Company's share capital in case of withdrawal of a shareholder if so authorized by the Company's extraordinary shareholders' meeting.

Under Italian law and pursuant to the Company's By-laws, directors may be removed from office at any time by the vote of shareholders at an ordinary shareholders' meeting. However, if removed in circumstances where there was no just cause, such directors may have a claim for damages against the Company. Directors may resign at any time by written notice to the board of directors and to the chairman of the board of statutory auditors. The board of directors, subject to the approval of the board of statutory auditors, must appoint substitute directors to fill vacancies arising from removals or resignations to serve until the next ordinary shareholders' meeting. If at any time more than half of the members of the board of directors appointed by the shareholders' meeting of the Company resign, such resignation is ineffective until the majority of the new board of directors has been appointed. In such a case, the remaining members of the board of directors (or the board of statutory auditors if all the members of the board of directors have resigned or ceased to be directors) must promptly call an ordinary shareholders' meeting to appoint the new directors.

Table of Contents

The compensation of executive directors, including the CEO, is determined by the board of directors, after consultation with the board of statutory auditors, within a maximum amount established by the Company's shareholders meeting. The Company's shareholders meeting determines the base compensation for all board members, including non-executive directors. Directors are entitled to reimbursement for expenses reasonably incurred in connection with their functions.

Statutory Auditors In addition to appointing the board of directors, the ordinary shareholders' meeting of the Company, appoints a board of statutory auditors (*collegio sindacale*) and its chairman, and set the compensation of its members. The statutory auditors are elected for a term of three fiscal years, may be re-elected for successive terms and may be removed only for cause and with the approval of a competent court. Expiration of their office will have no effect until a new board is appointed. Membership of the board of statutory auditors is subject to certain good standing, independence and professional requirements, and shareholders must be informed as to the offices the proposed candidates hold in other companies prior to or at the time of their election. In particular, at least one standing and one alternate member must be a certified auditor.

The Company's By-laws provide that the board of statutory auditors shall consist of three statutory auditors and two alternate auditors (who are automatically substituted for a statutory auditor who resigns or is otherwise unable to serve).

The Company's board of statutory auditors is required, among other things, to verify that the Company (i) complies with applicable laws and the By-laws, (ii) respects principles of good governance, and (iii) maintains adequate organizational structure and administrative and accounting systems. The Company's board of statutory auditors must be convened at least once every 90 days. The board of statutory auditors reports to the annual shareholders' meeting on the results of its activity and the results of the Company's operations. In addition, the statutory auditors of the Company must attend the meetings of the Company's board of directors and shareholders' meetings.

The statutory auditors may decide to call a shareholders' meeting, ask the directors information about the management of the Company, carry out inspections and verifications at the Company and exchange information with the Company's external auditors. Additionally, the statutory auditors have the power to initiate a liability action against one or more directors after adopting a resolution with an affirmative vote by two thirds of the auditors in office. Any shareholder may submit a complaint to the board of statutory auditors regarding facts that such shareholder believes should be subject to scrutiny by the board of statutory auditors, which must take any complaint into account in its report to the shareholders' meeting. If shareholders collectively representing 5% of the Company's share capital submit such a complaint, the board of statutory auditors must promptly undertake an investigation and present its findings and any recommendations to a shareholders' meeting of the Company (which must be convened immediately if the complaint appears to have a reasonable basis and there is an urgent need to take action). The board of statutory auditors may report to a competent court serious breaches of directors' duties.

External Auditor The audit of the Company's accounts is entrusted, as per current legislation, to an independent audit firm whose appointment falls under the competency of the shareholders' meeting, upon the board of statutory auditors' proposal. In addition to the obligations set forth in national auditing regulations, Natuzzi's listing on the NYSE requires that the audit firm issues an audit report on the consolidated financial statements included in the annual report on Form 20-F, in compliance with the auditing standards issued by the Public Company Accounting Oversight Board (PCAOB). Moreover, the independent audit firm is required, if applicable, to issue an opinion on the effectiveness of the internal control system applied to financial reporting. No changes were identified in the Company's internal control over financial reporting that occurred during the 2017 fiscal year that have materially affected or are reasonably likely to affect the Company's internal control over financial reporting.

The external auditor or the firm of external auditors is appointed for a three-year term, may be re-elected for successive terms, and its compensation is determined by a vote at an ordinary shareholders' meeting of the Company and may be removed only for just cause by a vote of the shareholders' meeting.

Meetings of Shareholders Shareholders are entitled to attend and vote at ordinary and extraordinary shareholder meetings. Votes may be cast personally or by proxy. Shareholders' meetings may be called by the Company's board of directors (or the board of statutory auditors) and must be called if requested by holders of at least 10% of the issued shares. If a shareholders' meeting is not called despite the request by shareholders and such refusal is unjustified, a competent court may call the meeting. Shareholders are not entitled to request that a meeting of shareholders be convened to vote on matters which, as a matter of law, shall be resolved on the basis of a proposal, plan or report by the Company's board of directors.

The Company may hold general meetings of shareholders at its registered office in Santeramo in Colle, or elsewhere within Italy or at locations outside Italy, following publication of notice of the meeting in any of the following Italian newspapers: *Il Sole 24 Ore*, *Corriere della Sera* or *La Repubblica* at least 15 days before the date fixed for the meeting.

Table of Contents

The ordinary shareholders' meeting of the Company must be convened at least once a year. The Company's annual stand-alone financial statements are prepared by the board of directors and submitted for approval to the ordinary shareholders' meeting, which must be convened within 120 days after the end of the fiscal year to which such financial statements relate. This term may be extended by up to 180 days after the end of the fiscal year, as long as the Company continues to be bound by law to draw up consolidated financial statements or if particular circumstances concerning its structure or its purposes so require. At ordinary shareholders' meetings, shareholders also appoint the external auditors, approve the distribution of dividends, appoint the board of directors and statutory auditors, determine their remuneration and vote on any matter the resolution or authorization of which is entrusted to them by law.

Extraordinary shareholders' meetings may be called to vote on proposed amendments to the By-laws, issuance of convertible debentures, mergers and de-mergers, capital increases and reductions, when such resolutions may not be taken by the board of directors. Liquidation of the Company must be resolved by an extraordinary shareholders' meeting.

The notice of a shareholders' meeting of the Company may specify two or more meeting dates for an ordinary or extraordinary shareholders' meeting; such meeting dates are generally referred to as "calls".

The quorum for an ordinary shareholders' meeting of the Company is 50% of the Ordinary Shares, and resolutions are carried by the majority of Ordinary Shares present or represented. At an adjourned ordinary meeting, no quorum is required, and the resolutions are carried by the majority of Ordinary Shares present or represented. Certain matters, such as amendments to the By-laws, the issuance of shares, the issuance of convertible debentures, mergers and de-mergers, may only be resolved upon at an extraordinary meeting, at which special voting rules apply. Resolutions at an extraordinary meeting of the Company are carried, on first call, by a majority of the Ordinary Shares. An adjourned extraordinary meeting is validly held with a quorum of one-third of the issued shares and its resolutions are carried by a majority of at least two-thirds of the holders of shares present or represented at such meeting. In addition, certain matters (such as a change in purpose or corporate form of the company, demergers, mergers, the transfer of its registered office outside Italy, its liquidation prior to the term set forth in its By-laws, the extension of the term, the revocation of liquidation and the issuance of preferred shares) are approved by the holders of more than two-thirds of the shares present and represented at such meeting that must also represent more than one-third of the issued shares.

According to the By-laws, in order to attend any shareholders' meeting, each shareholder of the Company, at least five days prior to the date fixed for the meeting, must deposit its share certificates at the offices of the Company or with such banks as may be specified in the notice of call of the relevant meeting, in exchange for an admission ticket. Owners of ADRs may make special arrangements with the Depositary for the beneficial owners of such ADRs to attend shareholders' meetings, but not to vote at or formally address such meetings. The procedures for making such arrangements will be specified in the notice of such meeting to be mailed by the Depositary to the owners of ADRs.

Shareholders may appoint proxies by delivering in writing an appropriate power of attorney to the Company. Directors, auditors and employees of the Company or of any of its subsidiaries may not be proxies and any one proxy cannot represent more than 20 shareholders.

Pre-emptive Rights Pursuant to Italian law, holders of Ordinary Shares or of debentures convertible into shares, if any exist, are entitled to subscribe for the issuance of shares, debentures convertible into shares and rights to subscribe for shares, in proportion to their holdings, unless such issues are for non-cash consideration or pre-emptive rights are waived or limited and such waiver or limitation is required in the interest of the Company. There can be no assurance that the holders of ADSs may be able to exercise fully any pre-emptive rights pertaining to Ordinary Shares.

Preference Shares. Other Securities The Company's By-laws allow the Company to issue preference shares with limited voting rights, to issue other classes of equity securities with different economic and voting rights, to issue so-called participation certificates with limited voting rights, as well as so-called tracking stock. The power to issue such financial instruments is attributed to the extraordinary meeting of shareholders.

The Company, by resolution of the Board of Directors, may issue debt securities non-convertible into shares, while it may issue debt securities convertible into shares through a resolution of an extraordinary shareholders' meeting.

Segregation of Assets and Proceeds The Company, by means of an extraordinary shareholders' meeting resolution, may approve the segregation of certain assets into one or more separate pools. Such pools of assets may have an aggregate value not exceeding 10% of the shareholders' equity of the Company. Each pool of assets must be used exclusively to carry out a specific business and may not be attached by the general creditors of the Company. Similarly, creditors with respect to such specific business may only attach those assets of the Company that are included in the corresponding pool. Tort creditors, on the other hand, may always attach any assets of the Company. The Company may issue securities carrying economic and administrative rights relating to a pool. In addition, financing agreements relating to the funding of a specific business may provide that the proceeds of such business be used exclusively to repay the financing. Such proceeds may be attached only by the financing party and such financing party would have no recourse against other assets of the Company.

Table of Contents

Liquidation Rights Pursuant to Italian law and subject to the satisfaction of the claims of all other creditors, shareholders are entitled to a distribution in liquidation that is equal to the nominal value of their shares (to the extent available out of the net assets of the Company). Holders of preferred shares, if any such shares are issued in the future by the Company, may be entitled to a priority right to any such distribution from liquidation up to their par value. Thereafter, all shareholders would rank equally in their claims to the distribution or surplus assets, if any. Ordinary Shares rank *pari passu* among themselves in liquidation.

Purchase of Shares by the Company The Company is allowed to purchase shares, subject to certain conditions and limitations provided for by Italian law. Shares may be purchased out of profits available for dividends or out of distributable reserves, in each case as appearing on the latest stand-alone financial statements approved by the Company's shareholders' meeting. Further, the Company may only repurchase fully paid-in shares. Such purchases must be authorized by the ordinary shareholders' meeting. The aggregate purchase price of such shares may not exceed the earnings reserve specifically approved by shareholders. Shares held in violation of the above conditions and limitations must be sold within one year of the date of purchase. Similar limitations apply with respect to purchases of the Company's shares by its subsidiaries.

A corresponding reserve equal to the purchase price of such shares must be created in the balance sheet, and such reserve is not available for distribution, unless such shares are sold or cancelled. Shares purchased and held by the Company may be resold only pursuant to a resolution adopted at an ordinary shareholders' meeting. The voting rights attaching to the shares held by the Company or its subsidiaries cannot be exercised, but the shares are counted for quorum purposes in shareholders' meetings. Dividends and pre-emptive rights attaching to such shares will accrue to the benefit of other shareholders.

The Company does not own any of its ordinary shares.

Notification of the Acquisition of Shares In accordance with Italian antitrust laws, the Italian Competition Authority prohibits the acquisition of control in a company which would thereby create or strengthen a dominant position in the domestic market or a significant part thereof and which would result in the elimination or substantial reduction of competition on a lasting basis, provided that certain turnover thresholds are exceeded. However, if the turnover of the acquiring party and the company to be acquired exceed certain other monetary thresholds, the antitrust review of the acquisition falls within the exclusive jurisdiction of the European Commission and will be assessed under the EU Merger Regulation (Council Regulation (EC) No. 139/2004).

Minority Shareholders' Rights. Withdrawal Rights Shareholders' resolutions which are not adopted in conformity with applicable law or the Company's By-laws may be challenged (with certain limitations and exceptions) within ninety days by absent, dissenting or abstaining shareholders representing individually or in the aggregate at least 5% of Company's share capital (as well as by the board of directors or the board of statutory auditors). Shareholders not reaching this threshold or shareholders not entitled to vote at Company's meetings may only claim damages deriving from the resolution.

Dissenting or absent shareholders may require the Company to buy back their shares as a result of shareholders' meeting resolutions approving, among other things, material modifications of the Company's corporate purpose or of the voting rights of its shares, the transformation of the Company from a stock corporation into a different legal entity, or the transfer of the Company's registered office outside Italy. The buy-back would occur at a price established by the board of directors, upon consultation with the board of statutory auditors and the Company's external auditor, having regard to the net assets value of the Company, its prospective earnings and the market value of its shares, if any. The Company's By-laws may set forth different criteria to determine the consideration to be paid to dissenting shareholders in such buy-backs.

Each shareholder may bring to the attention of the board of statutory auditors facts or actions which are deemed wrongful. If such shareholders represent more than 5% of the share capital of the Company, the board of statutory auditors must investigate without delay and report its findings and recommendations to the shareholders' meeting (which must be convened immediately if the complaint appears to have a reasonable basis and there is an urgent need to take action).

Shareholders representing more than 10% of the Company's share capital have the right to report to a competent court all of the serious breaches of the directors' duties, which may be prejudicial to the Company or to its subsidiaries. In addition, shareholders representing at least 20% of the Company's share capital may commence derivative suits before a competent court against its directors, statutory auditors and general managers.

Table of Contents

The Company may waive or settle the suit unless shareholders holding at least 20% of the shares vote against such waiver or settlement. The Company will reimburse the legal costs of such action in the event that the claim of such shareholders is successful and the court does not award such costs against the relevant directors, statutory auditors or general managers.

Any dispute arising out of or in connection with the By-Laws that may arise between the Company and its shareholders, directors, or liquidators shall fall under the exclusive jurisdiction of the Tribunal of Bari (Italy).

Liability for Mismanagement of Subsidiaries Under Italian law, companies and other legal entities that, acting in their own interest or the interest of third parties, mismanage a company subject to their direction and coordination powers are liable to such company's shareholders and creditors for ensuing damages suffered by such shareholders. This liability is excluded if (i) the ensuing damage is fully eliminated, including through subsequent transactions, or (ii) the damage is effectively offset by the global benefits deriving in general to the company from the continuing exercise of such direction and coordination powers. Direction and coordination powers are presumed to exist, among other things, with respect to consolidated subsidiaries.

The Company is subject to the direction and coordination of INVEST 2003 S.r.l.

Material Contracts

In the two years immediately preceding the filing of this Annual Report on Form 20-F, neither the Company nor any member of the group has been a party to a material contract, other than contracts entered into in the ordinary course of business and the contracts described immediately below:

The Securitization Agreement with Muttley S.r.l., and concerning Banca IMI, Intesa San Paolo for the without recourse factoring of export-related financial receivables for 35 million, dated July 7, 2015. The Securitization Agreement can be found in Exhibit 4.5 to this Annual Report; in June 21, 2016, we amended the Securitization Agreement to increase the credit line to 55 million.

The Company has entered into various agreements with representatives of trade unions regarding the reorganization of its employees, dated March 22, 2016 and March 27, 2017 (the Italian Reorganization Agreements). The Italian Reorganization Agreements are attached as Exhibits 4.3, 4.4, 4.6 and 4.7 to this Annual Report.

The Company has entered into a joint venture contract with Jason Furniture (Hangzhou) Co., Ltd. (Kuka) on March 22, 2018 (the Joint Venture Agreement) under which the Company's wholly-owned Chinese subsidiary, Natuzzi Trading (Shanghai) Co., Ltd. (Natuzzi Trading Shanghai) would become a joint venture (the Joint Venture). The Joint Venture will distribute *Natuzzi Italia* and *Natuzzi Editions* branded products through a network of single-brand directly operated stores and franchised operated stores in Mainland China, Hong Kong and Macau, as well as through online stores. The Joint Venture Agreement is subject to regulatory approval and approval by Kuka's shareholders. The Joint Venture Agreement is attached as Exhibit 4.8 to this Annual Report.

The Company has entered into an agreement for the sale and purchase and subscription of shares in Natuzzi Trading Shanghai with Kuka and Natuzzi Trading Shanghai on March 22, 2018 (the Share Purchase Agreement). Under the Share Purchase Agreement, Kuka will make a 65 million investment in exchange for a majority stake in the Joint Venture. The Share Purchase Agreement is subject to regulatory approval and approval by Kuka's shareholders. The Share Purchase Agreement is attached as Exhibit 4.9 to this Annual Report.

Exchange Controls

There are currently no exchange controls, as such, in Italy restricting rights deriving from the ownership of shares. Residents and non-residents of Italy may hold foreign currency and foreign securities of any kind, within and outside Italy. Non-residents may invest in Italian securities without restriction and may transfer to and from Italy cash, instruments of credit and securities, in both foreign currency and Euro, representing interest, dividends, other asset distributions and the proceeds of any dispositions.

Certain requirements however are imposed by law. Regulations on the use of cash and bearer securities are contained in legislative decree No. 231 of November 21, 2007, as amended from time to time (the Decree 231), which implemented in Italy the European directive on anti-money laundering No. 2015/849. Such legislation requires that, subject to certain exceptions, transfers of cash or bearer instruments in Euro or in foreign currency, effected for whatsoever reason between different parties, shall be carried out by means of credit institutions, Poste Italiane S.p.A., electronic money institutions and payment institutions providing payment services which are different from those indicated under Article 1, paragraph 1, letter d), number 6) of legislative decree No. 11 of January 27, 2010 when the total amount to be transferred is equal to or more than 3,000. Cash remittance services are subject to a

Table of Contents

1,000 limit. Credit institutions and the other intermediaries effecting such transactions on behalf of residents or non-residents of Italy are required to maintain records of such transactions for ten years after the end of the relevant business relationship or the closing of the relevant transaction. Such records may be inspected at any time by Italian tax and judicial authorities.

Non-compliance with, *inter alia*, the reporting and record-keeping requirements set forth in the above-mentioned Decree 231 may result in administrative fines or, in the case of (*inter alia*) reporting of false or misleading information or falsification of the information that is relevant for the purposes of compliance with Decree 231, criminal penalties. The Financial Intelligence Unit of the Bank of Italy (the FIU) may use the information received and/or transfer it to the anti-mafia investigative directorate, the special monetary police nucleus (*nucleo speciale di polizia valutaria della Guardia di Finanza*) and other competent authorities, to police money laundering, tax evasion and any other unlawful activity. The FIU is required in certain cases to maintain record of the reports for ten years.

Individuals, non-profit entities and partnerships that are residents of Italy must disclose on their annual tax returns all investments and financial assets held outside Italy. Such obligation lies also on the aforesaid resident taxpayers who, even if do not own directly investments and financial assets held abroad, qualify as beneficial owner of the same. No such tax disclosure is required in respect of securities deposited for management with qualified Italian financial intermediaries and in respect of contracts entered into through their intervention, provided that the items of income derived from such foreign financial assets are subjected to withholding tax or substitute tax through the intervention of the same intermediaries. Corporate residents of Italy are exempt from these tax disclosure requirements with respect to their annual tax returns because this information is required to be disclosed in their financial statements.

There can be no assurance that the current regulatory environment in or outside Italy will persist or that particular policies presently in effect will be maintained, although Italy is required to maintain certain regulations and policies by virtue of its membership of the EU and other international organizations and its adherence to various bilateral and multilateral international agreements.

Taxation

The following is a summary of certain U.S. federal and Italian tax matters. The summary contains a description of the principal U.S. federal and Italian tax consequences of the purchase, ownership and disposition of Ordinary Shares or ADSs by a holder who is a citizen or resident of the United States or a U.S. corporation or who otherwise will be subject to U.S. federal income tax on a net income basis in respect of the Ordinary Shares or ADSs. The summary is not a comprehensive description of all of the tax considerations that may be relevant to a decision to purchase or hold Ordinary Shares or ADSs. In particular, the summary deals only with beneficial owners who will hold Ordinary Shares or ADSs as capital assets and does not address the tax treatment of a beneficial owner who owns 10% or more of the voting shares of the Company or who may be subject to special tax rules, such as banks, tax-exempt entities, insurance companies, partners or partnerships therein, or dealers in securities or currencies, or persons that will hold Ordinary Shares or ADSs as a position in a straddle for tax purposes or as part of a constructive sale or a conversion transaction or other integrated investment comprised of Ordinary Shares or ADSs and one or more other investments. The summary does not address the U.S. Medicare tax on net investment income, the U.S. alternative minimum tax, or any aspect of U.S. state or local tax law. The summary does not discuss the treatment of Ordinary Shares or ADSs that are held in connection with a permanent establishment through which a non-resident beneficial owner carries on business or performs personal services in Italy.

The summary is based upon tax laws and practice of the United States and Italy in effect on the date of this Annual Report, which are subject to change.

Investors and prospective investors in Ordinary Shares or ADSs should consult their own advisors as to the U.S., Italian or other tax consequences of the purchase, beneficial ownership and disposition of Ordinary Shares or ADSs, including, in particular, the effect of any state or local tax laws.

For purposes of the summary, beneficial owners of Ordinary Shares or ADSs who are considered residents of the United States for purposes of the current income tax convention between the United States and Italy (the Income Tax Convention), and are not subject to an anti-treaty shopping provision that applies in limited circumstances, are referred to as U.S. owners. Beneficial owners who are citizens or residents of the United States, corporations organized under U.S. law, and U.S. partnerships, estates or trusts (to the extent their income is subject to U.S. tax either directly or in the hands of partners or beneficiaries) generally will be considered to be residents of the United States under the Income Tax Convention. Special rules apply to U.S. owners who are also residents of Italy, according to the Income Tax Convention.

Table of Contents

For the purpose of the Income Tax Convention and the United States Internal Revenue Code of 1986, as amended, beneficial owners of ADSs evidencing ADSs will be treated as the beneficial owners of the Ordinary Shares represented by those ADSs.

Taxation of Dividends

i) Italian Tax Considerations As a general rule, Italian laws provide for the withholding of income tax on dividends paid by Italian companies to shareholders who are not residents of Italy for tax purposes, currently levied at a 26% rate. Italian laws provide a mechanism under which non-resident shareholders can claim a refund, up to 11/26 of Italian withholding taxes on dividend income by establishing to the Italian tax authorities that the dividend income was subject to income tax in another jurisdiction in an amount at least equal to the total refund claimed. U.S. owners should consult their own tax advisers concerning the possible availability of this refund, which traditionally has been payable only after extensive delays. Alternatively, reduced rates (normally 15%) may apply to non-resident shareholders who are entitled to, and comply with procedures for claiming, benefits under an income tax convention.

Under the Income Tax Convention, dividends derived and beneficially owned by U.S. owners are subject to an Italian withholding tax at a reduced rate of 15%.

However, the amount initially made available to the Depository for payment to U.S. owners will reflect withholding at the 26% rate. U.S. owners who comply with the certification procedures described below may then claim an additional payment of 11% of the dividend (representing the difference between the 26% rate, and the 15% rate, and referred to herein as a treaty refund). This certification procedure will require U.S. owners (i) to obtain from the U.S. Internal Revenue Service (IRS) a form of certification required by the Italian tax authorities (IRS Form 6166), unless a previously filed certification is effective on the dividend payment date (such certificates, filed together with the statement indicated under (ii) below, should be effective until the end of the fiscal year for which the statement was originally filed), (ii) to produce a statement in accordance with the Italian tax authorities decree of July 10, 2013, whereby the U.S. owner represents to be a U.S. owner individual or corporation with no permanent establishment in Italy, and (iii) to set forth other required information. IRS Form 6166 may be obtained by filing a request for certification on IRS Form 8802. (Additional information, including IRS Form 8802, can be obtained from the IRS website at www.irs.gov. Information appearing on the IRS website is not incorporated by reference into this document.) The time for processing requests for certification by the IRS normally is 30 to 45 days. Accordingly, in order to be eligible for the procedure described below, U.S. owners should begin the process of obtaining certificates as soon as possible after receiving instructions from the Depository on how to claim a treaty refund.

The Depository's instructions will specify certain deadlines for delivering to the Depository the documentation required to obtain a treaty refund, including the certification that the U.S. owners must obtain from the IRS. In the case of ADSs held by U.S. owners through a broker or other financial intermediary, the required documentation should be delivered to such financial intermediary for transmission to the Depository. In all other cases, the U.S. owners should deliver the required documentation directly to the Depository. The Company and the Depository have agreed that if the required documentation is received by the Depository on or within 30 days after the dividend payment date and, in the reasonable judgment of the Company, such documentation satisfies the requirements for a refund by the Company of Italian withholding tax under the Convention and applicable law, the Company will within 45 days thereafter pay the treaty refund to the Depository for the benefit of the U.S. owners entitled thereto.

If the Depository does not receive a U.S. owner's required documentation within 30 days after the dividend payment date, such U.S. owner may for a short grace period (specified in the Depository's instructions) continue to claim a treaty refund by delivering the required documentation (either through the U.S. owner's financial intermediary or directly, as the case may be) to the Depository. However, after this grace period, the treaty refund must be claimed

directly from the Italian tax authorities rather than through the Depositary. Expenses and extensive delays have been encountered by U.S. owners seeking refunds from the Italian tax authorities.

Distributions of profits in kind will be subject to withholding tax. In that case, prior to receiving the distribution, the holder will be required to provide the Company with the funds to pay the relevant withholding tax.

Table of Contents

ii) United States Tax Considerations The gross amount of any dividends (that is, the amount before reduction for Italian withholding tax) paid to a U.S. owner generally will be subject to U.S. federal income taxation as foreign-source dividend income and will not be eligible for the dividends-received deduction allowed to domestic corporations. Dividends paid in Euro will be included in the income of such U.S. owners in a dollar amount calculated by reference to the exchange rate in effect on the day the dividends are received by the Depository or its agent. If the Euro are converted into dollars on the day the Depository or its agent receives them, U.S. owners generally should not be required to recognize foreign currency gain or loss in respect of the dividend income. U.S. owners who receive a treaty refund may be required to recognize foreign currency gain or loss to the extent the amount of the treaty refund (in dollars) received by the U.S. owner differs from the U.S. dollar equivalent of the Euro amount of the treaty refund on the date the dividends were received by the Depository or its agent. Italian withholding tax at the 15% rate will be treated as a foreign income tax which U.S. owners may elect to deduct in computing their taxable income or, subject to the limitations on foreign tax credits generally, credit against their U.S. federal income tax liability. The rules governing the foreign tax credit are complex and U.S. owners are urged to consult their own tax advisers in this regard. Dividends will generally constitute foreign-source passive category income for U.S. tax purposes.

Subject to certain exceptions for short-term and hedged positions, the U.S. dollar amount of dividends received by an individual with respect to the Ordinary Shares or ADSs will be subject to taxation at reduced rates if the dividends are qualified dividends. Dividends paid on the Ordinary Shares or ADSs will be treated as qualified dividends if (i) the Company is eligible for the benefits of a comprehensive income tax treaty with the United States that the IRS has approved for the purposes of the qualified dividend rules and (ii) the Company was not, in the year prior to the year in which the dividend was paid, and is not, in the year in which the dividend is paid, a passive foreign investment company (PFIC). The Income Tax Convention has been approved for the purposes of the qualified dividend rules, and the Company believes it is eligible for the benefits of the Income Tax Convention. Based on the Company's audited financial statements and relevant market and shareholder data, the Company believes that it was not treated as a PFIC for U.S. federal income tax purposes with respect to its 2016 or 2017 taxable year. In addition, based on the Company's audited financial statements and its current expectations regarding the value and nature of its assets, the sources and nature of its income, and relevant market and shareholder data, the Company does not anticipate becoming a PFIC for its 2018 taxable year.

The U.S. Treasury has announced its intention to promulgate rules pursuant to which holders of ADSs or common stock and intermediaries through whom such securities are held will be permitted to rely on certifications from issuers to treat dividends as qualified for tax reporting purposes. Because such procedures have not yet been issued, it is not clear whether the Company will be able to comply with the procedures. Holders of Ordinary Shares and ADSs should consult their own tax advisers regarding the availability of the reduced dividend tax rate in the light of the considerations discussed above and their own particular circumstances.

Foreign tax credits may not be allowed for withholding taxes imposed in respect of certain short-term or hedged positions in securities or in respect of arrangements in which a U.S. owner's expected economic profit is insubstantial. U.S. owners should consult their own advisers concerning the implications of these rules in light of their particular circumstances.

A beneficial owner of Ordinary Shares or ADSs who is, with respect to the United States, a foreign corporation or a nonresident alien individual, generally will not be subject to U.S. federal income tax on dividends received on Ordinary Shares or ADSs, unless such income is effectively connected with the conduct by the beneficial owner of a trade or business in the United States.

Taxation of Capital Gains

i) Italian Tax Considerations Under Italian law, capital gains tax (CGT) is generally levied on capital gains realized by non-residents from the disposal of shares in companies resident in Italy for tax purposes even if those shares are held outside of Italy. However, capital gains realized by non-resident holders on the sale of non-qualified shareholdings (as defined below) in companies listed on a stock exchange and resident in Italy for tax purposes (as is the Company's case) are not subject to CGT. In order to benefit from this exemption, such non-Italian-resident holders may need to file a certificate evidencing their residence outside of Italy for tax purposes.

A qualified shareholding consists of securities that entitle the holder to exercise more than 2% of the voting rights of a company with shares listed on a stock exchange in the ordinary meeting of the shareholders or represent more than 5% of the share capital of a company with shares listed on a stock exchange. A non-qualified shareholding is any shareholding that does not exceed either of these thresholds. The relevant percentage is calculated taking into account the shareholdings sold during the prior 12-month period.

Table of Contents

As a general rule, capital gains realized upon disposal of a qualified shareholding are partially included in the shareholders' taxable income, for an amount equal to 58.14%. If a taxpayer realizes taxable capital gains in excess of 58.14% of capital losses of a similar nature incurred in the same tax year, such excess amount is included in his total taxable income. If 58.14% of such taxpayer's capital losses exceeds its taxable capital gains, then the excess amount can be carried forward and deducted from the taxable amount of similar capital gains realized by such person in the following tax years, up to the fourth, provided that it is reported in the tax report in the year of disposal.

Please note that, pursuant to Art. 1(999-1006) of Law No. 205 of December 27, 2017 (the Italian Budget Law for 2018), capital gains realized as of January 1, 2019 by non-residents upon disposal of qualified shareholdings will be subject to a 26% substitute tax.

The above is subject to any provisions of an income tax treaty entered into by the Republic of Italy, if the income tax treaty provisions are more favorable. The majority of double tax treaties entered into by Italy, including the Income Tax Convention, in accordance with the OECD Model tax convention, provide that capital gains realized from the disposition of Italian securities are subject to CGT only in the country of residence of the seller.

The Income Tax Convention between Italy and the U.S. provides that a U.S. owner is not subject to the Italian CGT on the disposal of shares, provided that the shares are not held through a permanent establishment of the U.S. owner in Italy.

ii) United States Tax Considerations Gain or loss realized by a U.S. owner on the sale or other disposition of Ordinary Shares or ADSs will be subject to U.S. federal income taxation as capital gain or loss in an amount equal to the difference between the U.S. owner's basis in the Ordinary Shares or the ADSs and the amount realized on the disposition (or its dollar equivalent, determined at the spot rate on the date of disposition, if the amount realized is denominated in a foreign currency). Any such gain or loss generally would be treated as arising from sources within the United States. Such gain or loss will generally be long-term capital gain or loss if the U.S. owner holds the Ordinary Shares or ADSs for more than one year. The net amount of long-term capital gain recognized by a U.S. owner that is an individual holder generally is subject to taxation at a reduced rate. The ability to offset capital losses against ordinary income is subject to limitations. Deposits and withdrawals of Ordinary Shares by U.S. owners in exchange for ADSs will not result in the realization of gain or loss for U.S. federal income tax purposes.

A beneficial owner of Ordinary Shares or ADSs who is, with respect to the United States, a foreign corporation or a nonresident alien individual will not be subject to U.S. federal income tax on gain realized on the sale of Ordinary Shares or ADSs, unless (i) such gain is effectively connected with the conduct by the beneficial owner of a trade or business in the United States or (ii), in the case of gain realized by an individual beneficial owner, the beneficial owner is present in the United States for 183 days or more in the taxable year of the sale and certain other conditions are met.

Taxation of Distributions from Capital Reserves

Italian Tax Considerations Special rules apply to the distribution of certain capital reserves. Under certain circumstances, such a distribution may be considered as taxable income in the hands of the recipient depending on the existence of current profits or outstanding reserves at the time of distribution and the actual nature of the reserves distributed. The application of such rules may also have an impact on the tax basis in the Ordinary Shares or ADSs held and/or the characterization of any taxable income received and the tax regime applicable to it. Non-resident shareholders may be subject to withholding tax and CGT as a result of such rules. You should consult your tax adviser in connection with any distribution of capital reserves.

Other Italian Taxes

Estate and Inheritance Tax A transfer of Ordinary Shares or ADSs by reason of death or gift is subject to an inheritance and gift tax levied on the value of the inheritance or gift, as follows:

Transfers to a spouse or direct descendants or ancestors up to 1,000,000 to each beneficiary are exempt from inheritance and gift tax. Transfers in excess of such threshold will be taxed at a 4% rate on the value of the Ordinary Shares or ADSs exceeding such threshold;

Transfers between relatives within the fourth degree other than siblings, and direct or indirect relatives-in-law within the third degree are taxed at a rate of 6% on the value of the Ordinary Shares or ADSs (where transfers between siblings up to a maximum value of 100,000 for each beneficiary are exempt from inheritance and gift tax); and

Transfers by reason of gift or death of Ordinary Shares or ADSs to persons other than those described above will be taxed at a rate of 8% on the value of the Ordinary Shares or ADSs.

Table of Contents

If the beneficiary of any such transfer is a disabled individual, whose handicap is recognized pursuant to Law No. 104 of February 5, 1992, the tax is applied only on the value of the assets received in excess of 1,500,000 at the rates illustrated above, depending on the type of relationship existing between the deceased or donor and the beneficiary.

The tax regime described above will not prevent the application, if more favorable to the taxpayer, of any different provisions of a bilateral tax treaty, including the convention between Italy and the United States against double taxation with respect to taxes on estates and inheritances, pursuant to which non-Italian resident shareholders are generally entitled to a tax credit for any estate and inheritance taxes possibly applied in Italy.

Italian Financial Transaction Tax The IFTT is applicable, among other transactions, to all trades entailing the transfer of title of (i) shares or equity-like financial instruments issued by companies resident in Italy, such as the Ordinary Shares; and (ii) securities representing the shares and financial instruments under (i) above (including depositary receipts such as the ADSs), regardless of the residence of the securities issuer. The IFTT may also apply to the transfer of Ordinary Shares and ADSs by a U.S. resident.

The IFTT applies at a rate of 0.2% for over-the-counter transactions, reduced to 0.1% for trades executed on a regulated market or multilateral trading facility established in States or territories allowing an adequate exchange of information with the Italian tax authorities. The New York Stock Exchange should qualify as a regulated market for such purposes.

The rules governing the IFTT are fairly complex. As to its basic features, it should be noted that the IFTT (i) is levied on a tax base equal to (x) the market value (calculated by taking the net balance of daily trades on the relevant securities) or, in the absence of any such market value, (y) the consideration paid for each trade; and (ii) is borne by the purchaser but is collected by the financial intermediaries (including non-resident financial intermediaries) intervening in the relevant trades.

However, a number of exemptions apply, including with respect to trades of securities issued by companies having an average market capitalization lower than 500 million in the month of November of the year preceding the year in which the trade takes place. Companies, the securities of which are listed on a foreign regulated market, and which could benefit from this exemption, such as the Company, need a confirmation from the Italian Ministry of Economy and Finance: such companies must communicate their market capitalization for each tax year to the Ministry, which will then prepare a list of the companies in relation to which the exemption applies.

EU Financial Transaction Tax On February 14, 2013, the European Commission proposed the implementation of the EU FTT (see Item 3. Key Information Risk Factors) that may also apply to the transfer of Ordinary Shares and ADSs by a U.S. resident. This directive has been modified by the European Commission. However, the related EU directive has not yet been enacted. Moreover, the implementation of the proposed EU FTT may also affect the IFTT, as described above. A new draft text for the EU FTT is expected by middle of 2017.

United States Information Reporting and Backup Withholding Requirements In general, information reporting requirements will apply to payments by a paying agent within the United States to a non-corporate (or other non-exempt) U.S. owner of dividends in respect of the Company Shares or ADSs, or the proceeds received on the sale or other disposition of the Company Shares or ADSs. Backup withholding may apply to such amounts if the U.S. owner fails to provide an accurate taxpayer identification number to the paying agent on a properly completed IRS Form W-9 or otherwise comply with the applicable requirements of the backup withholding rules. Amounts withheld as backup withholding will be creditable against the U.S. owner's U.S. federal income tax liability, provided that the required information is timely furnished to the IRS.

Specified Foreign Financial Assets Certain U.S. owners that own specified foreign financial assets with an aggregate value in excess of USD 50,000 are generally required to file an information statement along with their tax returns, currently on Form 8938, with respect to such assets. Specified foreign financial assets include any financial accounts held at a non-U.S. financial institution, as well as securities issued by a non-U.S. issuer that are not held in accounts maintained by financial institutions. Higher reporting thresholds apply to certain individuals living abroad and to certain married individuals. Regulations extend this reporting requirement to certain entities that are treated as formed or availed of to hold direct or indirect interests in specified foreign financial assets based on certain objective criteria. U.S. owners who fail to report the required information could be subject to substantial penalties. You should consult your own tax advisors concerning the application of these rules to your particular circumstances.

Table of Contents**Documents on Display**

The Company is subject to the information reporting requirements of the Exchange applicable to foreign private issuers. In accordance therewith, the Company is required to file reports, including annual reports on Form 20-F, and other information with the U.S. Securities and Exchange Commission. These materials, including this Annual Report, are available for inspection and copying at the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. Please call the Commission at 1-800-SEC-0330 for further information on the public reference room. As a foreign private issuer, we have been required to make filings with the SEC by electronic means since November 4, 2002. Any filings we make electronically will be available to the public over the Internet at the SEC's website at <http://www.sec.gov>. The Form 20-F and reports and other information filed by the Company with the Commission will also be available for inspection by ADS holders at the Corporate Trust Office of BNY at 101 Barclay Street, New York, New York 10286.

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The following discussion of the Group's risk management activities includes forward-looking statements that involve risks and uncertainties. Actual results could differ materially from those projected in the forward looking statements. See Forward Looking Information. A significant portion of the Group's net sales and its costs, are denominated in currencies other than the euro, in particular the U.S. dollar.

The Group is exposed to market risks principally from fluctuations in the exchange rates between the Euro and other currencies, including in particular the U.S. dollar, and to a significantly lesser extent, from variations in interest rates.

Exchange Rate Risks The Group's foreign exchange rate risks in 2017 arose principally in connection with U.S. dollars, British pounds, Euro (for the Company's subsidiary located in Eastern Europe), Australian dollars, Japanese yen, Canadian dollars, Danish kroner, Swedish kroner, Norwegian kroner and Swiss francs as well as in connection with Chinese yuan, Romanian Leu, Brazilian Reais, Mexican Peso, Russian Rubles, Indian Rupee, for the Company's subsidiaries operating in currencies different from the Euro.

As of December 31, 2017 and 2016, the Group had outstanding trade receivables denominated in foreign currencies totaling 26.0 million and 30.5 million, respectively, of which 41.0% and 55.8%, respectively, were denominated in U.S. dollars. On those same dates, the Group had 21.2 million and 22.2 million, respectively, of trade payables denominated in foreign currencies, principally U.S. dollars. See Notes 6 and 16 to the Consolidated Financial Statements included in Item 18 of this Annual Report.

As of December 31, 2017, the Company was a party to a number of currency forward contracts (known in Italy as domestic currency swaps), all of which are designed to hedge future sales denominated in U.S. dollars and other currencies. The Group does not use such foreign exchange contracts for speculative trading purposes.

As of December 31, 2017, the notional amount in Euro terms of all of the Group's outstanding currency forward contracts totaled 49.6 million. As of December 31, 2016, the notional amounts of all of the Group's outstanding currency forward contracts totaled 67.5 million.

At the end of 2017, such currency forward contracts had notional amounts of U.S.\$ 24.7 million, British pounds 10.0 million, 10.0 million, Australian dollars 3.5 million, Japanese yen 223.0 million, Canadian dollars 2.0 million, Danish kroner 5.3 million, and Swedish kroner 2.4 million. All of these forward contracts had various maturities extending through May 2018. See Note 29 to the Consolidated Financial Statements included in Item 18 of this Annual Report. The table below summarizes (in thousands of Euro equivalent) the contractual amounts of currency

forward contracts intended to hedge future cash flows from accounts receivable and sales orders as of December 31, 2017 and 2016:

Euro equivalent of contractual amounts of	December 31,	
currency forward contracts as of:	2017	2016
U.S. dollars	21,979	26,670
British pounds	11,137	15,860
Euro*	10,226	13,925
Australian dollars	2,294	2,964
Japanese yen	1,692	2,117
Canadian dollars	1,338	4,965

Table of Contents

Euro equivalent of contractual amounts of currency forward contracts as of:	December 31,	
	2017	2016
Danish Kroner	713	618
Swedish kroner	249	421
Total	49,627	67,540

* Used by the Group's Romanian subsidiary to hedge its net collections denominated in Euro vs. RON.

As of December 31, 2017, these forward contracts had a net unrealized gain of 0.1 million, compared to a net unrealized loss of 1.1 million as of December 31, 2016. The Group recorded this amount in other income (expense), net in its Consolidated Financial Statements. See Notes 28 and 29 to the Consolidated Financial Statements included in Item 18 of this Annual Report.

The following table presents information regarding the contract amount in thousands of Euro equivalent and the estimated fair value of all of the Group's foreign exchange contracts: contracts with unrealized gains are presented as assets and contracts with unrealized losses are presented as liabilities.

	December 31, 2017		December 31, 2016	
	Contract Amount	Unrealized gains (losses)	Contract Amount	Unrealized gains (losses)
Assets	31,089	346	25,698	223
Liabilities	18,538	(271)	41,842	(1,293)
Total	49,627	76	67,540	(1,070)

The Group's foreign currency forward contracts as of December 31, 2017 had maturities of a maximum of five months. The potential loss in fair value of all of the Group's forward contracts outstanding as of December 31, 2017 that would have resulted from a hypothetical, instantaneous and unfavorable 10% change in currency exchange rates would have been approximately 5.1 million. This sensitivity analysis assumes an instantaneous and unfavorable 10% fluctuation in exchange rates affecting the foreign currencies of all of the Group's hedging contracts outstanding as of the end of 2017.

For the accounting of transactions entered into in an effort to reduce the Group's exchange rate risks, see Notes 3 and 29 to the Consolidated Financial Statements included in Item 18 of this Annual Report.

At December 31, 2017, the Group had 20.7 million in cash and cash equivalents held in Chinese yuan (40.2 million as at December 31, 2016). Exchange rate fluctuations in respect of this amount could have significant positive or negative effects on our results of operations in future periods.

Interest Rate Risk To a significantly lesser extent, the Group is also exposed to interest rate risk. As of December 31, 2017, the Group had 45.4 million (equivalent to 14.3% of the Group's total assets as of the same date) in debt outstanding (bank overdrafts and long-term debt, including the current portion of such debt), which is for the most part subject to floating interest rates. See Notes 15 and 20 to the Consolidated Financial Statements included in

Item 18 of this Annual Report.

The potential increase in annual interest expenses on the Group's total debt (bank overdrafts and long-term debt, including their current portion) that would have resulted from a hypothetical, instantaneous and unfavorable 1.0% increase in interest rates would have been approximately 0.3 million. This sensitivity analysis assumes an instantaneous and unfavorable 1.0% increase in the variable interest rates of Group's total debt outstanding as of December 31, 2017.

In the normal course of business, the Group also faces risks that are either non-financial or non-quantifiable. Such risks principally include country risk, credit risk and legal risk.

ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

ITEM 12A. DEBT SECURITIES

Not applicable.

Table of Contents

ITEM 12B. WARRANTS AND RIGHTS

Not applicable.

ITEM 12C. OTHER SECURITIES

Not applicable.

ITEM 12D. AMERICAN DEPOSITARY SHARES

Fees paid by ADS holders The BNY Mellon, as the Depositary of our ADSs, collects its fees for delivery and surrender of ADSs directly from investors depositing shares or surrendering ADSs for the purpose of withdrawal or from intermediaries acting for them. The Depositary collects fees for making distributions to investors by deducting those fees from the amounts distributed or by selling a portion of distributable property to pay the fees. The Depositary may generally refuse to provide fee-attracting services until its fees for those services are paid.

Persons depositing or withdrawing shares must pay:

\$5.00 (or less) per 100 ADSs (or portion of 100 ADSs)

A fee for the distribution of proceeds of sales of securities or rights in an amount equal to the lesser of: (i) the fee for the issuance of ADSs referred to above which would have been charged as a result of the deposit by owners of securities (for purposes hereof treating all such securities as if they were shares) or shares received in exercise of rights distributed to them, respectively, but which securities or rights are instead sold by the Depositary and the net proceeds distributed and (ii) the amount of such proceeds

Registration or transfer fees

Expenses of the Depositary

For:

Depositing or substituting the underlying shares

Selling or exercising rights

Cancellation of ADSs for the purpose of withdrawal, including if the deposit agreement terminates

Distribution of securities distributed to holders of deposited securities which are distributed by the Depositary to ADS registered holders

Transfer and registration of shares on our share register to or from the name of the Depositary or its agent when holders deposit or withdraw shares

Cable, telex and facsimile transmissions (when expressly provided in the deposit agreement)

Converting foreign currency to U.S. dollars

Table of Contents

Persons depositing or withdrawing shares must pay:

For:

Taxes and other governmental charges the Depository or the custodian have to pay on any ADS or share underlying an ADS, for example, stock transfer taxes, stamp duty or withholding taxes As necessary

Any charges incurred by the Depository or its agents for servicing the deposited securities As necessary

Fees payable by the Depository to the Company

i) Fees incurred in past annual period From January 1, 2017 to December 31, 2017, the Depository waived a total of \$2,097.89 in administrative fees for routine corporate actions including services relating to Natuzzi's annual general meeting of shareholders.

ii) Fees to be paid in the future The Company does not have any agreements in place with the Depository for the payment or reimbursement of fees or other direct or indirect payments by the Depository to the Company in connection with its ADS program.

PART II

ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES

None.

ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

None.

ITEM 15. CONTROLS AND PROCEDURES

(a) Disclosure Controls and Procedures The Company carried out an evaluation under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of December 31, 2017. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. Based on the Company's evaluation of its disclosure controls and procedures, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of December 31, 2017 to provide reasonable assurance that information required to be disclosed in the reports the Company files and submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's applicable rules and forms, and that it is accumulated and communicated to the Company's management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

(b) Management's Annual Report on Internal Control Over Financial Reporting The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended. Internal control over financial

reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in

Table of Contents

accordance with generally accepted accounting principles. Because of its inherent limitations, internal controls over financial reporting may not prevent or detect misstatements. Even when determined to be effective, they can provide only reasonable assurance regarding the reliability of financial reporting and the preparation and presentation of financial statements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies and procedures may deteriorate.

To assess the effectiveness of the Company's internal control over financial reporting, the Company's management, including the Chief Executive Officer and the Chief Financial Officer, used the criteria described in "2013 Internal Control Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

The Company's management assessed the effectiveness of its internal control over financial reporting as of December 31, 2017. Based on such assessment, the Company's management has concluded that as of December 31, 2017, the Company's internal control over financial reporting was effective and that there were no material weaknesses in the Company's internal control over financial reporting.

(d) Changes in Internal Control over Financial Reporting During the period covered by this Annual Report, there were no changes in our internal control over financial reporting that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

ITEM 16. [RESERVED]**ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT**

The Company has determined that, because of the existence and nature of its board of statutory auditors, it qualifies for an exemption provided by Rule 10A-3(c)(3) of the Exchange Act from many of the Rule 10A-3 audit committee requirements. The board of statutory auditors has determined that each of its members is an audit committee financial expert as defined in Item 16A of Form 20-F. For the names of the members of the board of statutory auditors, see Item 6. Directors, Senior Management and Employees Statutory Auditors and Item 16G. Corporate Governance Audit Committee and Internal Audit Function.

Each of the audit committee financial experts is independent under the NYSE Independence Standards that would apply to audit committee members in the absence of our reliance on the exemption in Rule 10A-3(c)(3).

ITEM 16B. CODE OF ETHICS

The Company has adopted a code of ethics, as defined in Item 16B of Form 20-F under the Exchange Act. This code of ethics applies, among others, to the Company's CEO and CFO. The Company's code of ethics is downloadable from its website at http://www.natuzzigroup.com/pdf/ir/coe_inglese.pdf.

ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES

KPMG S.p.A. (KPMG) served as Natuzzi S.p.A.'s principal independent registered public auditor for fiscal years 2017 and 2016, for which it audited the consolidated financial statements for the years-ended December 31, 2017 and 2016 included in this Annual Report. Ernst & Young S.p.A. (Ernst & Young) served as Natuzzi S.p.A.'s principal independent registered public auditor for fiscal year 2015, for which it audited the consolidated financial statements for the year-ended December 31, 2015 included in this Annual Report.

Edgar Filing: NATUZZI S P A - Form 20-F

The following table sets forth the aggregate fees billed and billable to the Company by KPMG in Italy and abroad during the fiscal years ended December 31, 2017 and 2016, for audit fees, audit related fees, tax fees and all other fees for audit.

	2017	2016
	(Expressed in thousands of euros)	
Audit fees	480	480
Audit-related fees		
Tax fees		
All Other fees		
Total fees	480	480

Table of Contents

Audit fees in the above table are the aggregate fees billed and billable in connection with the audit of the Company's annual financial statements.

The Company's board of statutory auditors expressly pre-approves on a case-by-case basis any engagement of our independent auditors for audit and non-audit services provided to our subsidiaries or to us. All services rendered by our independent auditors for audit and non-audit services were pre-approved by our board of statutory auditors in accordance with this policy.

ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES.

The Company is relying on the exemption from listing standards for audit committees provided by Exchange Act Rule 10A-3(c)(3). The basis for this reliance is that the Company's board of statutory auditors meets the following requirements set forth in Exchange Act Rule 10A-3(c)(3):

- 1) the board of statutory auditors is established and selected pursuant to Italian law expressly permitting such a board;
- 2) the board of statutory auditors is required under Italian law to be separate from the Company's board of directors;
- 3) the board of statutory auditors is not elected by management of the Company and no executive officer of the Company is a member of the board of statutory auditors;
- 4) Italian law provides for standards for the independence of the board of statutory auditors from the Company and its management;
- 5) the board of statutory auditors, in accordance with applicable Italian law and the Company's governing documents, is responsible, to the extent permitted by Italian law, for the appointment, retention and oversight of the work (including, to the extent permitted by law, the resolution of disagreements between management and the auditor regarding financial reporting) of any registered public accounting firm engaged for the purpose of preparing or issuing an audit report or performing other audit, review or attest services for the Company, and
- 6) to the extent permitted by Italian law, the audit committee requirements of paragraphs (b)(3), (b)(4) and (b)(5) of Rule 10A-3 apply to the board of statutory auditors.

The Company's reliance on Rule 10A-3(c)(3) does not, in its opinion, materially adversely affect the ability of its board of statutory auditors to act independently and to satisfy the other requirements of Rule 10A-3.

ITEM 16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS

On November 6, 2014, INVEST 2003 s.r.l. completed the purchase of 250,000 ADSs, each representing one Ordinary Share, at a price of U.S.\$2.00 per ADS. The purchase was privately negotiated with a single individual and was effected through an escrow arrangement with BNY Mellon. On July 30, 2014, INVEST 2003 s.r.l. completed the

purchase of 500,000 ADSs, each representing one Ordinary Share, at a price of U.S.\$2.75 per ADS. The purchase was privately negotiated with a single individual and was effected through an escrow arrangement with BNY Mellon. For more information, refer to Schedule 13D (Amendment No. 2), filed with the SEC on September 14, 2014, that amends and supplements the Schedule 13D, filed with the SEC on April 24, 2008 (as amended by Amendment No. 1 filed on April 8, 2013).

From January 1, 2014 to December 31, 2017, no purchases were made by or on behalf of the Company or any other affiliated purchaser of the Company's Ordinary Shares or ADSs.

Table of Contents**ITEM 16F. CHANGE IN REGISTRANT'S CERTIFYING ACCOUNTANT**

None.

ITEM 16G. CORPORATE GOVERNANCE

Under NYSE rules, the Company is permitted, as a listed foreign private issuer, to adhere to the corporate governance rules of our home country in lieu of certain NYSE corporate governance rules.

Corporate governance rules for Italian stock corporations (*società per azioni*) like the Company, whose shares are not listed on a regulated market in the European Union, are set forth in the Civil Code. As described in more detail below, the Italian corporate governance rules set forth in the Civil Code differ in a number of ways from those applicable to U.S. domestic companies under NYSE listing standards, as set forth in the NYSE Listed Company Manual.

As a general rule, Company's main corporate bodies are governed by the Civil Code and are assigned specific powers and duties that are legally binding and cannot be derogated from. The Company follows the traditional Italian corporate governance system, with a board of directors (*consiglio di amministrazione*) and a separate board of statutory auditors (*collegio sindacale*) with supervisory functions. The two boards are separate and no individual may be a member of both boards. Both the members of the board of directors and the members of the board of statutory auditors owe duties of loyalty and care to the Company. As required by Italian law, an external auditing firm (*società di revisione*) is in charge of auditing the Company's financial statements. The members of the Company's board of directors and board of statutory auditors, as well as the external auditor, are directly and separately appointed by shareholder resolution at the shareholders' meetings. This system differs from the unitary system envisaged for U.S. domestic companies by the NYSE listing standards, which contemplate the board of directors serving as the sole governing body.

Below is a summary of the significant differences between Italian corporate governance rules and practices, as the Company has implemented them, and those applicable to U.S. issuers under NYSE listing standards, as set forth in the NYSE Listed Company Manual.

Independent Directors

NYSE Domestic Company Standards The NYSE listing standards applicable to U.S. companies provide that independent directors must comprise a majority of the board. In order for a director to be considered independent, the board of directors must affirmatively determine that the director has no material direct or indirect relationship with the company. These relationships can include commercial, industrial, banking, consulting, legal, accounting, charitable and familial relationship (among others).

More specifically, a director is not independent if, *inter alia*, such director or his/her immediate family members has certain specified relationships with the company, its parent, its consolidated subsidiaries, their internal or external auditors, or companies that have significant business relationships with the company, its parent or its consolidated subsidiaries. Ownership of a significant amount of stock, by itself, is not a per se bar to independence.

Our Practice The presence of a prescribed number of independent directors on the Company's board is neither mandated by any Italian law applicable to the Company nor required by the Company's By-laws.

However, Italian law sets forth certain independence requirements applicable to the Company's statutory auditors. Statutory auditors' independence is assessed on the basis of the following rules: a person who (i) is a director,

or the spouse or a close relative of a director, of the Company or any of its affiliates, or (ii) has an employment or a regular consulting or similar relationship with the Company or any of its affiliates, or (iii) has an economic relationship with the Company or any of its affiliates which might compromise his/her independence, cannot be appointed to the Company's board of statutory auditors. The law sets forth certain principles aimed at ensuring that any member of the board of statutory auditors who is a chartered public accountant (*iscritto nel registro dei revisori contabili*) be substantively independent from the company subject to audit and not be in any way involved in the company's decision-making process. The Civil Code mandates that at least one standing and one alternative member of the board of statutory auditors be a chartered public accountant. Each of the current members of the board of statutory auditors is a chartered public accountant.

Table of Contents

Executive Sessions

NYSE Domestic Company Standards Non-executive directors of U.S. companies listed on the NYSE must meet regularly in executive sessions, and independent directors should meet alone in an executive session at least once a year.

Our Practice Under the laws of Italy, neither non-executive directors nor independent directors are required to meet in executive sessions. The members of the Company's board of statutory auditors are required to meet at least every 90 days.

Audit Committee and Internal Audit Function

NYSE Domestic Company Standards U.S. companies listed on the NYSE are required to have an audit committee that satisfies the requirements of Rule 10A-3 under the Exchange Act and certain additional requirements set by the NYSE. In particular, all members of this committee must be independent and the committee must adopt a written charter. The committee's prescribed responsibilities include (i) the appointment, compensation, retention and oversight of the external auditors; (ii) establishing procedures for the handling of whistle blower complaints regarding accounting, internal accounting controls, or auditing matters; (iii) engaging independent counsel and other advisers, as it determines necessary to carry out its duties and (v) determine appropriate funding for payments to the external auditor, advisors employed by the audit committee and other necessary administrative expenses of the audit committee. A company must also have an internal audit function, which may be outsourced, except to the independent auditor.

Our Practice Rule 10A-3(c)(3) of the Exchange Act provides that foreign private issuers with a board of statutory auditors established in accordance with local law or listing requirements and meeting specified requirements with regard to independence and responsibilities (including the performance of most of the specific tasks assigned to audit committees by Rule 10A-3, to the extent permitted by local law) (the Statutory Auditor Requirements) are exempt from the audit committee requirements established by the rule. The Company is relying on this exemption on the basis of its separate board of statutory auditors, which is permitted by the Civil Code and which satisfies the Statutory Auditor Requirements. Nevertheless our board of statutory auditors, consisting of independent and highly professional experts, complies with the requirements indicated at points (i), (iii) and (iv) of the preceding paragraph. The Company also has an internal audit function, which has not been outsourced.

Compensation Committee

NYSE Domestic Company Standards U.S. companies listed on the NYSE are required to have a compensation committee (or equivalent) comprised solely of independent directors and have a written charter addressing certain corporate governance matters. The compensation committee must approved the compensation of the CEO and make recommendations to the board of directors with regard to the compensation of other officers, incentive compensation plans and equity-based plans. Disclosure of individual management compensation information for these companies is mandated by the Exchange Act's proxy rules, from which foreign private issuers are generally exempt.

Our Practice The Company has not established a compensation committee. As a matter of Italian law applicable to Italian stock corporations whose shares are not listed on a regulated market in the European Union and under our By-laws, the compensation of executive directors, including the CEO, is determined by the board of directors, after consultation with the board of statutory auditors, within a maximum amount established by the Company's shareholders, while the Company's shareholders determine the base compensation for all members of the Board of Directors, including non-executive directors. Compensation of the Company's executive officers is determined by the

CEO. The Company does not produce a compensation report. However, the Company discloses aggregate compensation of all of its directors and officers as well as individual compensation of each director in Item 6 of its Annual Report.

Nominating Committee

NYSE Domestic Company Standards Under NYSE standards, a domestic company must have a nominating/corporate governance committee (or equivalent) comprised solely of independent directors, which is responsible for nominating directors, and a written charter addressing certain corporate governance matters.

Our Practice As allowed by Italian laws, the Company has not established a nominating/corporate governance committee (or equivalent) responsible for nominating its directors. Directors may be designated by any of the Company's shareholders but shall be appointed by the shareholders' meeting. If, during the term of the appointment, one or more directors of Company's board of directors ends its directorship, the other directors shall replace them by a resolution approved by the board of statutory auditors, provided that the majority is still made up of directors appointed by the shareholders. Replacement directors remain in office until the next shareholders' meeting. If at any time more than half of the members of the board of directors appointed by the Assembly of Shareholders resign, such resignation is ineffective until the majority of the new board of directors has been appointed. In such a case, the remaining members of the board of directors (or the board of statutory auditors if all the members of the board of directors have

Table of Contents

resigned or ceased to be directors) must promptly call an ordinary shareholders meeting to appoint the new directors. Invest 2003 s.r.l., a company controlled by Mr. Pasquale Natuzzi, by virtue of owning a majority of the outstanding shares of the Company, controls the Company and the appointment of its board of directors.

Corporate Governance and Code of Ethics

NYSE Domestic Company Standards Under NYSE standards, a company must adopt governance guidelines and a code of business conduct and ethics for directors, officers and employees. A company must also publish these items on its website and provide printed copies on request. Section 406 of the Sarbanes-Oxley Act requires a company to disclose whether it has adopted a code of ethics for senior financial officers, and if not, the reasons why it has not done so. The NYSE listing standards applicable to U.S. companies provide that codes of conduct and ethics should address, at a minimum, conflicts of interest; corporate opportunities; confidentiality; fair dealing; protection and use of company assets; legal compliance; and reporting of illegal and unethical behavior. Corporate governance guidelines must address, at a minimum, directors qualifications, responsibilities and compensation; access to management and independent advisers; management succession; director orientation and continuing education; and annual performance evaluation of the board.

Our Practice In January 2011, the Company's board of directors approved the adoption of a compliance program to prevent certain criminal offenses, according to the Italian Decree 231/2001. The task of supervising the application of the compliance program requested by the above mentioned Italian Decree has been entrusted to an autonomous supervisory body (*Organismo di Vigilanza*) that consists of three independent and qualified members. In February 2016, the Board of Directors approved a new code of ethics that applies to all employees and officers of the Company, including the Board of Directors and the board of statutory auditors, the CEO, the CFO and principal accounting officer. The Company believes that its code of ethics and the conduct and procedures adopted by the Company address the relevant issues contemplated by the NYSE standards applicable to U.S. companies noted above. The code of ethics is available on Natuzzi's website.

Certifications as to Violations of NYSE Standards

NYSE Domestic Company Standards Under NYSE listing standards, the CEO of a U.S. company listed on the NYSE must certify annually to the NYSE that he or she is not aware of any violation by the company of the NYSE corporate governance standards. The company must disclose this certification, as well as the fact that the CEO/CFO certification required under Section 302 of the Sarbanes-Oxley Act of 2002 has been made in the company's annual report to shareholders (or, if no annual report to shareholders is prepared, its annual report). Each listed company on the NYSE, both domestic and foreign issuers, must submit an annual written affirmation to the NYSE regarding compliance with applicable NYSE corporate governance standards. In addition, each listed company on the NYSE, both domestic and foreign issuers, must submit interim affirmations to the NYSE upon the occurrence of specified events. A domestic issuer must file such an interim affirmation whenever the independent status of a director changes, a director joins or leaves the board, a change occurs to the composition of the audit, nominating/corporate governance, or compensation committee, or there is a change in the company's classification as a controlled company.

The CEO of both domestic and foreign issuers listed on the NYSE must promptly notify the NYSE in writing if any executive officer becomes aware of any non-compliance with the NYSE corporate governance standards.

Our Practice Under the NYSE rules, the Company's CEO is not required to certify annually to the NYSE whether he is aware of any violation by the Company of the NYSE corporate governance standards. However, the Company is required to submit an annual affirmation of compliance with applicable NYSE corporate governance standards to the NYSE within 30 days of the filing of its annual report on Form 20-F with the SEC. The Company is also required to

submit to the NYSE an interim written affirmation any time it is no longer eligible to rely on, or chooses to no longer rely on, a previously applicable exemption provided by Rule 10A-3, or if a member of its audit committee ceases to be deemed independent or an audit committee member had been added. Under NYSE rules, the Company's CEO must notify the NYSE in writing if any executive officer becomes aware of any material non-compliance by the Company with NYSE corporate governance standards.

Shareholder Approval of Adoption and Modification of Equity Compensation Plans

NYSE Domestic Company Standards Shareholders of a U.S. company listed on the NYSE must approve the adoption of and any material revision to the company's equity compensation plans, with certain exceptions.

Table of Contents

Our Practice Although the Company's shareholders must authorize (i) the issuance of shares in connection with capital increases, and (ii) the buy-back of its own shares, the adoption of equity compensation plans does not per se require prior approval of the shareholders.

Report of Independent Registered Public Accounting Firm

To the Shareholders and Board of Directors of

Natuzzi S.p.A.

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of Natuzzi S.p.A. and subsidiaries (the Company) as of December 31, 2017 and 2016, the related consolidated statements of operations, changes in shareholders' equity, and cash flows for each of the years in the two-year period ended December 31, 2017, and the related notes (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and 2016, and the results of its operations and its cash flows for each of the years in the two-year period ended December 31, 2017, in conformity with generally accepted accounting principles in the Republic of Italy.

As part of our audit of the 2016 consolidated financial statements, we also audited the adjustments described in note 2 that were applied to the 2015 consolidated financial statements to reflect the retrospective adoption of Italian accounting standards. In our opinion, such adjustments are appropriate and have been properly applied. We were not engaged to audit, review or apply any procedures to the 2015 consolidated financial statements of the Company other than with respect to the adjustments and, accordingly, we do not express an opinion or any other form of assurance on the 2015 consolidated financial statements taken as a whole.

Differences from U.S. Generally Accepted Accounting Principles

Accounting principles generally accepted in the Republic of Italy vary in certain significant respects from U.S. generally accepted accounting principles. Information relating to the nature and effect of such differences is presented in note 31 to the consolidated financial statements.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by

management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of

Natuzzi S.p.A.

We have audited, before the effects of the reclassifications to retrospectively reflect the changes in established accounting principles in the Republic of Italy described in note 2 Basis of preparation of the consolidated financial statements, the accompanying consolidated statements of operations, changes in shareholders equity and cash flows of Natuzzi S.p.A. and subsidiaries for the year ended December 31, 2015 (the 2015 consolidated financial statements, before the effects of the reclassifications described in note 2 Basis of preparation , are not presented herein). These financial statements are the responsibility of the Company s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above, before the effects of the reclassifications described above, present fairly, in all material respects, the consolidated result of operations and cash flows of Natuzzi S.p.A. and subsidiaries for the year ended December 31, 2015, in conformity with established accounting principles in the Republic of Italy.

Established accounting principles in the Republic of Italy vary in certain significant respects from generally accepted accounting principles in the United States of America. Information related to the nature and effect of such differences is presented in note 31 to the consolidated financial statements.

We were not engaged to audit, review, or apply any procedures to the reclassifications made to retrospectively reflect the changes in the established accounting principles in the Republic of Italy described in note 2 Basis of preparation . Accordingly, we do not express an opinion or any other form of assurance about whether such reclassifications are appropriate and have been properly applied. Those reclassifications were audited by other auditors.
