STEALTHGAS INC. REPORTS SECOND QUARTER

**AND SIX MONTHS 2006 RESULTS AND ANNOUNCES QUARTERLY CASH DIVIDEND OF \$0.1875 PER
COMMON SHARE**

ATHENS, GREECE, August 21, 2006. STEALTHGAS INC. (NASDAQ: GASS), a ship-owning company serving the liquefied petroleum gas (LPG) sector of the international shipping industry, announced today its unaudited financial and operating results for the second quarter and six-month period ended June 30, 2006.

Second Quarter 2006 Results

For the second quarter ended June 30, 2006, net revenues amounted to \$17.2 million and net income was \$4.6 million. Earnings per share, basic and diluted, calculated on 14.0 million weighted average number of shares outstanding, were \$0.33. EBITDA for the second quarter of 2006 was \$8.9 million.

An average of 25.1 vessels were owned and operated in the second quarter 2006 earning an average time-charter-equivalent rate of approximately \$6,922 per day.

Six-Month 2006 Results

For the six-month period ended June 30, 2006, net revenues amounted to \$34.2 million and net income was \$11.6 million. Earnings per share, basic and diluted, calculated on 14.0 million weighted average number of shares outstanding, were \$0.83. EBITDA for the first six-months of 2006 was \$19.0 million.

An average of 23.8 vessels were owned and operated in the first six-months of 2006 earning an average time-charter-equivalent rate of approximately \$7,377 per day.

CEO Harry Vafias commented: Our operations in the second quarter 2006 were affected by the softness in the spot market, where we operated five of our vessels, coupled with more extended drydockings for our fleet. We have since increased the fixed period employment of our fleet to 81% of our operating days for 2006 and to 43% for 2007 thereby further enhancing the stability and predictability of our earnings.

In the second quarter 2006 we completed the acquisition of four additional vessels. In fewer than nine months since our IPO in October 2005, we achieved our initial target of tripling our fleet to 28 vessels. These latest acquisitions reaffirm our leadership position as number one in owned vessels in the 3,000 to 8,000 cbm segment, the area of our strategic focus. All four additional vessels were acquired for a total of \$ 46.6 million and came with contracted employment ranging from six-months to three years

Since our IPO, we have continued with the consistent implementation of our strategy of fleet expansion, maintaining moderate leverage, securing a visible revenue stream, having cost efficient operations and paying stable dividends to our shareholders.

On Friday, August 18, we declared our third consecutive cash dividend of 18.75 cents per share payable on September 5, 2006 to shareholders of record on August 31, 2006. Since our IPO on October 2005, we have declared dividends totaling 56.25 cents per share. Our next dividend declaration is intended for November, 2006.

Looking at the remainder of 2006, we expect our profitability to benefit from the increased employment of our fleet under fixed period contracts. We will also continue looking for accretive acquisitions and in this context we expanded our equity base by welcoming among our shareholders Nike Investments Corporation, which on August 3, 2006 acquired 400,000 newly issued shares of StealthGas for \$ 5.0 million. Nike Investments Corporation is principally owned by Mr. Thanassis Martinos, one of the most prominent shipowners in Greece, who also serves on our Board of Directors. This investment confirms our company's positive outlook for the LPG shipping industry and our growth prospects."

CFO Andrew Simmons commented: With all 28 vessels delivered, as of June 30, 2006 our net debt to capitalization remained at the moderate level of 45.6%, which affords us flexibility for further growth.

In May, we concluded a five year non amortizing interest rate swap with DNB NOR Bank in an amount of \$25 million at a fixed rate of 5.42% per annum, effective as of September 11, 2006. Upon entering this interest rate swap, STEALTHGAS INC. will have covered \$70 million of its debt through various interest rate hedging mechanisms.

1) Average number of vessels is the number of vessels that constituted our fleet for the relevant period, as measured by the sum of the number of days each vessel was a part of our fleet during the period divided by the number of calendar days in that period.

2) Total calendar days are the total days the vessels were in our possession for the relevant period including off-hire days associated with major repairs, drydockings or special or intermediate surveys.

3) Total voyage days for fleet reflect the total days the vessels were in our possession for the relevant period net of off-hire days associated with major repairs, drydocks or special or intermediate surveys.

4) Fleet utilization is the percentage of time that our vessels were available for revenue generating voyage days, and is determined by dividing voyage days by fleet calendar days for the relevant period.

5) Total time charter days for fleet are the number of voyage days the vessels in our fleet operated on time charters for the relevant period.

6) Total spot market charter days for fleet are the number of voyage days the vessels in our fleet operated on spot market charters for the relevant period.

7) Time charter equivalent, or TCE, is a measure of the average daily revenue performance of a vessel on a per voyage basis. Our method of calculating TCE is consistent with industry standards and is determined by dividing voyage revenues (net of voyage expenses) by voyage days for the relevant time period. Voyage expenses primarily consist of port, canal and fuel costs that are unique to a particular voyage, which would otherwise be paid by the charterer under a time charter contract, as well as commissions. TCE is a standard shipping industry performance measure used primarily to compare period-to-period changes in a shipping company's performance despite changes in the mix of charter types (i.e., spot charters, time charters and bareboat charters) under which the vessels may be employed between the periods.

8) Vessel operating expenses, which include crew costs, provisions, deck and engine stores, lubricating oil, insurance, maintenance and repairs is calculated by dividing vessel operating expenses by fleet calendar days for the relevant time period.

9) Total vessel operating expenses, or TVOE, is a measurement of our total expenses associated with operating our vessels. TVOE is the sum of vessel operating expenses and general and administrative expenses. Daily TVOE is calculated by dividing TVOE by fleet calendar days for the relevant time period.

EBITDA Reconciliation

EBITDA represents net earnings before interest, taxes, depreciation and amortization. EBITDA does not represent and should not be considered as an alternative to net income or cash flow from operations, as determined by United States generally accepted accounting principles, or U.S. GAAP, and our calculation of EBITDA may not be comparable to that reported by other companies.

EBITDA is included herein because it is a basis upon which we assess our liquidity position and because we believe that it presents useful information to investors regarding a company's ability to service and/or incur indebtedness. The Company's definition of EBITDA may not be the same as that used by other companies in the shipping or other industries.

Forward-Looking Statement

Matters discussed in this release may constitute forward-looking statements. Forward-looking statements reflect our current views with respect to future events and financial performance and may include statements concerning plans, objectives, goals, strategies, future events or performance, and underlying assumptions and other statements, which are other than statements of historical facts. The forward-looking statements in this release are based upon various assumptions, many of which are based, in turn, upon further assumptions, including without limitation, management's examination of historical operating trends, data contained in our records and other data available from third parties. Although STEALTHGAS INC. believes that these assumptions were reasonable when made, because these assumptions are inherently subject to significant uncertainties and contingencies which are difficult or impossible to predict and are beyond our control, STEALTHGAS INC. cannot assure you that it will achieve or accomplish these expectations, beliefs or projections. Important factors that, in our view, could cause actual results to differ materially from those discussed in the forward-looking statements include the strength of world economies and currencies, general market conditions, including changes in charterhire rates and vessel values, changes in demand that may affect attitudes of time charterers to scheduled and unscheduled drydocking, changes in STEALTHGAS INC.'s operating

expenses, including bunker prices, dry-docking and insurance costs, or actions taken by regulatory authorities, potential liability from pending or future litigation, domestic and international political conditions, potential disruption of shipping routes due to accidents and political events or acts by terrorists.

Risks and uncertainties are further described in reports filed by STEALTHGAS INC. with the US Securities and Exchange Commission.
