(Zip Code)

(781) 376-5555
(Registrant's telephone number)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of exchange on which registered
Common Stock, \$0.001 par value per share	The NASDAQ Stock Market, LLC

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and

post such files). Yes ☒ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☒

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☐ Smaller reporting company ☒
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

The aggregate market value of the voting and non-voting common equity held by non-affiliates of the registrant was approximately \$10,175,076 based on the closing price of \$1.13 of the issuer's common stock, par value \$.001 per share, as reported by the NASDAQ Stock Market on March 30, 2012

On November 30, 2012, there were 15,210,038 shares of the registrant's common stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE: Portions of the definitive proxy statement for our 2013 annual meeting of stockholders, which is to be filed within 120 days after the end of the fiscal year ended September 30, 2012, are incorporated by reference into Part III of this Form 10-K, to the extent described in Part III.

Forward Looking Statement

Statements contained in this Annual Report on Form 10-K that are not based on historical facts are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements may be identified by the use of forward-looking terminology such as “should,” “could,” “may,” “will,” “expect,” “believe,” “estimate,” “anticipate,” “intends,” “continue,” or similar terms or variations of those terms or the negative of those terms. These statements appear in a number of places in this Form 10-K and include statements regarding the intent, belief or current expectations of Bridgeline Digital, Inc. Forward-looking statements are merely our current predictions of future events. Investors are cautioned that any such forward-looking statements are inherently uncertain, are not guaranties of future performance and involve risks and uncertainties. Actual results may differ materially from our predictions. Important factors that could cause actual results to differ from our predictions include the impact of the weakness in the U.S. and international economies on our business, our inability to manage our future growth effectively or profitably, fluctuations in our revenue and quarterly results, our license renewal rate, the impact of competition and our ability to maintain margins or market share, the limited market for our common stock, the volatility of the market price of our common stock, the performance of our products, our ability to respond to rapidly evolving technology and customer requirements, our ability to protect our proprietary technology, the security of our software, our dependence on our management team and key personnel, our ability to hire and retain future key personnel, or our ability to maintain an effective system of internal controls. Although we have sought to identify the most significant risks to our business, we cannot predict whether, or to what extent, any of such risks may be realized, nor is there any assurance that we have identified all possible issues which we might face. We assume no obligation to update our forward-looking statements to reflect new information or developments. We urge readers to review carefully the risk factors described herein and in the other documents that we file with the Securities and Exchange Commission. You can read these documents at www.sec.gov.

Where we say “we,” “us,” “our,” “Company” or “Bridgeline” we mean Bridgeline Digital, Inc.

PART I

Item 1. Business.

Overview

Bridgeline Digital enables its customers to maximize the performance of their mission critical websites, intranets, and online stores. Bridgeline is the developer of the award-winning iAPPS® Web Engagement Management (WEM) product platform and related digital solutions. The iAPPS platform deeply integrates Web Content Management, eCommerce, eMarketing, and web Analytics capabilities within the heart of websites or eCommerce web stores to help marketers deliver online experiences that attract, engage, and convert their customers across all digital channels. Bridgeline’s iAPPS platform combined with its digital services assists customers in maximizing on-line revenue, improving customer service and loyalty, enhancing employee knowledge, and reducing operational costs.

The iAPPS platform is delivered through a Cloud-based SaaS (“Software as a Service”) multi-tenant business model, whose flexible architecture provides customers with state of the art deployment providing maintenance, daily technical operation and support; or via a traditional perpetual licensing business model, in which the iAPPS software resides on a dedicated server in either the customer’s facility or Bridgeline’s co-managed hosting facility.

In 2012, KMWorld Magazine Editors selected Bridgeline Digital as one of the 100 Companies That Matter in Knowledge Management and also selected iAPPS as a Trend Setting Product in 2012. iAPPS Content Manager and iAPPS Commerce were selected as finalists for the 2011 and 2012 CODiE Awards for Best Content Management Solution and Best Electronic Commerce Solution, globally. iAPPS Content Manager was the winner of the 2010 CODiE Award for Best Content Management Solution, globally. B2B Interactive has selected Bridgeline Digital as

one of the Top Interactive Technology companies in the United States.

Bridgeline Digital was incorporated under the laws of the State of Delaware on August 28, 2000.

Locations

The Company's corporate office is Burlington, Massachusetts. The Company maintains regional field offices serving the following geographical locations: Atlanta, GA; Baltimore, MD; Boston, MA; Chicago, IL; Dallas, TX; Denver, CO; New York, NY; Philadelphia, PA; and Tampa, FL. The Company has one wholly-owned subsidiary, Bridgeline Digital Pvt. Ltd. located in Bangalore, India.

Highlights of Fiscal 2012

Highlights of fiscal 2012 include the achievement of record revenues, record iAPPS license sales and key iAPPS product releases and updates:

Financial

- Bridgeline achieved record revenues in fiscal 2012 of \$26,296,000.
- Total iAPPS related revenue increased 37% to \$16.6 million in fiscal 2012 from \$12.1 million in fiscal 2011.
- Recurring revenue, which reflects amounts that are contractually due to Bridgeline, increased 27% to \$4.2 million in fiscal 2012 from \$3.3 million in fiscal 2011.
- Bridgeline sold a record number of iAPPS licenses within fiscal 2012. The 267 new iAPPS licenses during fiscal 2012 was a 25% increase compared to licenses sold during fiscal 2011.

New Strategic Alliances, Products and Enhancements

- In the third quarter of fiscal 2012 Bridgeline announced that United Parcel Service (“UPS”) signed a multi-year partnership agreement with Bridgeline to offer B2B and B2C eCommerce web stores with an end-to-end offering comprised of Bridgeline’s eCommerce Fulfilled™ solution and UPS logistics and fulfillment services.
- In the fourth quarter of fiscal 2012 Bridgeline announced the release of new product, iAPPS distributed subscription (“iAPPS ds”), a platform that empowers large franchise and dealer networks with state-of-the-art web engagement management while providing superior oversight of corporate branding. iAPPS ds deeply integrates content management, eCommerce, eMarketing and web analytics and is a self-service web platform that is offered to each authorized franchise or dealer for a monthly subscription fee.
- In July of fiscal 2012 Bridgeline signed a multi-year agreement with a large national franchise network of over 4,300 locations who will license the iAPPS ds platform.
- Bridgeline released two versions of the iAPPS platform during fiscal 2012. In the first quarter of fiscal 2012 Bridgeline released iAPPS version 4.7 which provided many international eCommerce enhancements including multilingual and multi-currency support along with improvements in how iAPPS handles international fulfillment, tax and regulations logistics. In the third quarter of fiscal 2012 Bridgeline released iAPPS version 4.8 which offered full integration of front- and back-end eCommerce capabilities with built-in warehouse management and inventory control.

Acquisitions

- During the fiscal year Bridgeline continued its geographic expansion strategy with two acquisitions; Magnetic Corporation and Marketnet, Inc. These acquisitions expanded Bridgeline’s footprint into the Tampa and Dallas regions.

Products and Services

Products

Subscription and Perpetual Licenses

Revenue from sales of both on-demand SaaS web tools and perpetual licenses is reported as Subscription and perpetual licenses in the accompanying consolidated financial statements.

iAPPS Platform

The iAPPS platform provides a unified common set of shared software modules that are critical to today's mission critical websites, on-line stores, intranets, extranets, and portals. The iAPPS platform empowers companies and developers to create websites, web applications and online stores with advanced business logic, state-of-the-art graphical user interfaces, and improved quality – all in a shorter timeframe with less coding than is typically required by comparable products.

The iAPPS platform is a Web Engagement Management (WEM) platform that unifies web Content Management, web Analytics, eCommerce, and eMarketing capabilities deep within the websites, web applications or online stores in which they reside, enabling customers to enhance and optimize the value of their web properties and better engage their website users. The iAPPS platform significantly enhances WEM and Customer Experience Management (CXM) capabilities.

The iAPPS platform includes:

- iAPPS Content Manager allows non-technical users to create, edit, and publish content via a browser-based interface. The advanced, easy-to-use interface allows businesses to keep content and promotions fresh - whether for a public commercial site or a company intranet. iAPPS Content Manager handles the presentation of content based on a sophisticated indexing and security scheme that includes management of front-end access to online applications. The system provides a robust library functionality to manage permissions, versions and organization of different content types, including multimedia files and images. Administrators are able to easily configure a simple or advanced workflow. The system can accommodate the complexity of larger companies with strict regulatory policies. iAPPS Content Manager is uniquely integrated and unified with iAPPS Analyzer, iAPPS Commerce, and iAPPS Marketier; providing our customers with precise information, more accurate results, expansion options, and stronger user adoption.
- iAPPS Commerce is an online B2B and B2C eCommerce solution that allows users to maximize and manage all aspects of their domestic and international Commerce initiatives. The customizable dashboard provides customers with a real-time overview of the performance of their online stores, such as sales trends, demographics, profit margins, inventory levels, inventory alerts, fulfillment deficiencies, average check out times, potential production issues, and delivery times. Commerce also provides backend access to payment and shipping gateways. In combining iAPPS Commerce with iAPPS Analyzer and iAPPS Marketier, our customers can take their Commerce initiatives to a new level by personalizing their product offerings, improving their marketing effectiveness, providing value-added services and cross selling additional products. iAPPS Commerce is uniquely integrated and unified with iAPPS Analyzer, iAPPS Content Manager, and iAPPS Marketier; providing our customers with precise information, more accurate results, expansion options, and stronger user adoption.
- iAPPS Marketier is a marketing lifecycle management solution that includes customer transaction analysis, email management, surveys and polls, event registration and issue tracking to measure campaign return on investment and client satisfaction. Website content and user profiling is leveraged to deliver targeted campaigns and stronger customer relationships. The email management features provide comprehensive reporting capabilities including success rate, and recipient activity such as click-thrus and opt-outs. iAPPS Marketier integrates with leading customer relationship management systems (CRM's) such as Salesforce.com and leading ad banner engines such as Google. iAPPS Marketier is uniquely integrated and unified with iAPPS Analyzer, iAPPS Content Manager, and iAPPS Commerce; providing customers with precise information, more accurate results, expansion options, and stronger user adoption.
- iAPPS Analyzer provides the ability to manage, measure and optimize web properties by recording detailed events and subsequently mine data within a web application for statistical analysis. Our customers have access to information regarding where their visitors are coming from, what content and products their viewers are most interested in, and how they navigate through a particular web application. Through user-definable web reports, iAPPS Analytics provides deep insight into areas like visitor usage, content access, age of content, actions taken, and event triggers, and reports on both client and server-side events. iAPPS Analyzer's smart recommendation engine uses this data and identifies actionable solutions enabling our customers to optimize site content and reach their digital campaign goals. There are over 20 standard web reports that come with iAPPS Analyzer. iAPPS Analyzer is uniquely integrated and unified with iAPPS Content Manager, iAPPS Commerce, and iAPPS Marketier; providing our customers with precise information, more accurate results, expansion options, and stronger user adoption.

- iAPPS ds is a web content management and eCommerce platform for franchises and large dealer networks. iAPPS ds deeply integrates content management, eCommerce, eMarketing, and web analytics and is a self-service web platform that is offered to each authorized franchise or dealer for a monthly subscription fee. iAPPS ds acts as a control center for a large organization's distributed websites enabling local content publishing that is managed through a workflow approval process that gives corporate marketing control of the brand and message. iAPPS ds also supports responsive design that adapts to specific device screen sizes access a website, driving more positive user experiences and engagement. iAPPS ds is a cloud based SaaS solution

Services

Revenue from Web Application Development Services

Revenue from all web application development services is reported as Web application development services in the accompanying consolidated financial statements.

Web Application Development Services

Web Application development services address specific customer needs such as digital strategy, web design and web development, usability engineering, information architecture, rich media development, and SEO for their mission critical web site or web store. Application development engagements are often sold as part of a multiple element arrangement that includes our software products, hosting arrangements (i.e. Managed Service Hosting) that provide for the use of certain hardware and infrastructure at one of our co-managed network operating centers, or retained professional services subsequent to completion of the application development.

Digital Strategy Services

Bridgeline helps customers maximize the effectiveness of their online marketing activities to ensure that their web applications can be exposed to the potential customers that use search engines to locate products and services. Bridgeline's search engine optimization ("SEO") services include competitive analysis, website review, keyword generation, proprietary leading page technology, ongoing registration, monthly reports, and monitoring. Bridgeline's web analytics experts offer consulting and assistance in implementing iAPPS Analyzer or any other type of web analytics package.

Usability Design

By integrating usability into traditional development life cycles, we believe our usability experts can significantly enhance a user's experience. Our usability professionals provide the following services: usability audits, information architecture, process analysis and optimization, interface design and user testing. Our systematic and user-centered approach to application development focuses on developing applications that are intuitive, accessible, engaging, and effective. Our goal is to produce a net effect of increased traffic, improved visitor retention, increased user productivity, reduced user error, lower support cost, and reduced long-term development cost.

Information Architecture

Information Architecture is a design methodology focused on structuring information to ensure that users can find the appropriate data and can complete their desired transactions within a website or application. Understanding users and the context in which users will be initiating with a web application is central to information architecture. Information architects try to put themselves in the position of a typical user of an application to better understand a user's characteristics, behaviors, intentions and motivations. At the same time, the information architect develops an understanding of a web application's functionality and data structures. The understanding of these components enables the architect to make customer centric decisions about the end user and then translate those decisions into site maps, wire frames and clickable prototypes.

Information architecture forms the foundation of a web application's usability. The extent to which a web application is user-friendly and is widely adopted by a user base is primarily dependent on the success of the information architecture. Information architecture defines how well users can navigate through a website or application and how easily they can find the desired information or function. As web application development becomes more standard and commoditized, information architecture will increase as a differentiator for application developers.

Managed Service Hosting

Revenue from Managed Service Hosting

Revenue from Managed Service Hosting is reported as Managed service hosting in the accompanying consolidated financial statements.

A large number of our customers hire us to host and manage the mission critical web sites and web stores we develop. Through our partnerships with Savvis and Internap, we offer co-location services in state-of-the-art, Tier 1 secured data centers. We provide 24/7 application monitoring, emergency response, version control, load balancing, managed firewall security, and virus protection services. We provide shared hosting, dedicated hosting, and SaaS hosting for our customers.

Sales and Marketing

Overview

Bridgeline employs a direct sales force and each sale takes on average 90 to 180 days to complete. Our direct sales force focuses its efforts selling to medium-sized and large companies. These companies are generally categorized in the following vertical markets: financial services, consumer products and goods, health services and life sciences, high technology (software and hardware), retail brand names, associations and foundations and franchises/large dealer networks.

We have nine geographic locations in the United States with full-time professional direct sales personnel. Our geographic locations are in the metropolitan Atlanta, Baltimore, Boston, Chicago, Dallas, Denver, New York, Philadelphia, and Tampa areas.

We have a value added reseller channel to supplement our direct sales force for our iAPPS platform. Our value added resellers are generally located in territories where we do not have a direct sales force.

Strategic Alliances

We have dedicated business development professionals whose mission is to identify and establish strategic alliances for iAPPS and iAPPS ds. In June 2012, Bridgeline announced a strategic alliance with UPS Logistics. Bridgeline and UPS Logistics signed a multi-year agreement to offer B2B and B2C eCommerce web stores with an end-to-end eCommerce offering comprised of Bridgeline's eCommerce Fulfilled™ solution and UPS Logistics and fulfillment services. The combined Bridgeline and UPS Logistics offering provides customers with the ability to manage the eCommerce and supply chain fulfillment needs and was designed to benefit mid-market and larger online web stores who seek end to end solutions.

In July of fiscal 2012 Bridgeline signed a multi-year agreement with The UPS Stores, a national franchise network of over 4,300 locations who will license the iAPPS ds platform.

We believe pursuing other significant alliances will enhance the sales and distribution opportunities of iAPPS related intellectual property.

Engagement Methodology

We use an accountable, strategic engagement process developed specifically for target companies that require a technology based professional approach. We believe it is critical to qualify each opportunity and to assure our skill set and tools match up well with customer's needs. As an essential part of every engagement, we believe our engagement methodology streamlines our customer qualification process, strengthens our customer relationships, ensures our skill set and tools match the customer's needs, and results in the submission of targeted proposals.

Organic Growth From Existing Customer Base

We have specific proactive programs that consistently market our iAPPS platform and interactive development capabilities. Our business development professionals seek ongoing business opportunities within our existing customer base and within other operating divisions or subsidiaries of our existing customer base.

New Customer Acquisition

We identify target customers within our vertical expertise (financial services, consumer products and goods, health services and life sciences, high technology (software and hardware), retail brand names, transportation and storage and associations and foundations). Our business development professionals develop an annual territory plan identifying various strategies to engage our target customers. These territory plans are updated every 60 days.

Customer Retention Programs

We use digital marketing capabilities when marketing to our customer base. We email internally generated whitepapers, user case studies, or Company related announcements to our customers on a bimonthly basis. We also host educational on-line or face to face seminars.

New Lead Generation Programs

We generate targeted leads and new business opportunities by leveraging on-line marketing strategies. We receive leads by maximizing the search engine optimization capabilities of our own website. Through our website, we provide various educational white papers and promote upcoming on-line seminars. In addition we pay for banner advertisements on various independent newsletters, and paid search advertisements that are linked to our website. We also participate and exhibit at targeted events.

Social Media Programs

We market Bridgeline's upcoming events, white papers, blogs, case studies, digital product tutorials, announcements, and related articles frequently on leading social media platforms such as Twitter, LinkedIn, YouTube and Facebook.

Acquisitions

Bridgeline will continue to evaluate expanding its distribution of iAPPS and its interactive development capabilities throughout North America through acquisitions. Due to the nature of our sales process and delivery requirements, we believe local staff is required in order to maximize market-share objectives.

We believe the web application development market in North America and Europe is growing and fragmented. We believe established yet small web application development companies have the ability to market, sell and install our iAPPS platform in their local metropolitan markets. We believe these companies also have a .NET customer base and a niche presence in the local markets in which they operate. We believe there is an opportunity for us to acquire companies that specialize in web application development that are based in large North American cities in which we currently do not operate. We believe that by acquiring certain of these companies and applying our business practices and efficiencies, we can accelerate our time to market of the iAPPS platform.

We did not complete any acquisitions during the fiscal year ended September 30, 2011. We completed two acquisitions during the fiscal year ended September 30, 2012 as described below.

Magnetic Corporation

On October 3, 2011, we completed the acquisition of Magnetic Corporation ("Magnetic"), a Tampa, Florida based interactive technology company. We acquired all of the outstanding capital stock of Magnetic for consideration consisting of (i) \$150 thousand in cash (ii) assumption of \$130 thousand of indebtedness and (iii) contingent consideration of up to \$600 thousand in cash and 166,666 shares of Bridgeline Digital common stock. The contingent consideration is payable quarterly over the 12 consecutive calendar quarters following the acquisition, contingent upon the acquired business achieving certain quarterly revenue and quarterly operating income targets during the period. The contingent common stock has been issued and is being held in escrow pending satisfaction of the applicable targets. To the extent that either the quarterly revenue targets or the quarterly operating income targets are not met in a particular quarter, the earn-out period will be extended for up to four additional quarters.

Marketnet, Inc.

On May 31, 2012, we completed the acquisition of Marketnet, Inc. (“Marketnet”), an interactive technology company based in Dallas, Texas. Bridgeline acquired all of the outstanding capital stock of Marketnet for consideration consisting of (i) \$20 thousand in cash and (ii) assumption of debt of \$244 thousand and (ii) contingent consideration of up to \$650 thousand in cash and 204,331 shares of Bridgeline Digital common stock. This contingent consideration is payable quarterly over the 12 consecutive calendar quarters following the acquisition, contingent upon the acquired business achieving certain quarterly revenue and quarterly operating income targets during the period. To the extent that either the quarterly revenue target or the quarterly operating income target is not met in a particular quarter, the earn-out period will be extended for up to four additional quarters. Marketnet is also eligible to earn additional bonus equity consideration of 200,000 shares, if annual net revenues of the acquired business exceed a certain threshold in any fiscal year through September 30, 2015. The contingent common stock has been issued and is being held in escrow pending satisfaction of the applicable targets.

Magnetic and Marketnet's operating results are reflected in the condensed consolidated financial statements as of the acquisition date.

Research and Development

We invested approximately \$1.9 million in research and development activities for the year ended September 30, 2012, which included approximately \$480 thousand in capitalized software costs.

We invested approximately \$1.9 million in research and development for the year ended September 30, 2011, which included approximately \$59 thousand of capitalized software costs.

Employees

We employed 164 employees worldwide as of September 30, 2012. Substantially all of those employees are full time employees.

Customers

We primarily serve the following vertical markets that we believe have a history of investing in information technology enhancements and initiatives as follows:

- Financial services
- Consumer products and goods
- Associations and foundations
- Health services and life sciences
- High technology (software and hardware)
- Franchises/large dealer networks
- Retail brand names

For the years ended September 30, 2012 and 2011, no customer generated more than 10% of our revenue. We will focus our efforts to engage with customers that are aligned with the Company's core competencies and will continue to proactively end engagements with a number of smaller hosting customers obtained through previous acquisitions.

Competition

The markets for our products and services, including software for web content management, eCommerce platform software, eMarketing software, web analytics software and web application development services are highly competitive, fragmented, and rapidly changing. Barriers to entry in such markets remain relatively low. The markets are significantly affected by new product introductions and other market activities of industry participants. With the introduction of new technologies and market entrants, we expect competition to persist and intensify in the future.

We believe we compete adequately with others and we distinguish ourselves from our competitors in a number of ways:

- We believe our competitors generally offer their web application software typically as a single point of entry type product (such as only content management, or only commerce) as compared to the deeply integrated approach that is provided by the iAPPS platform.
-

We believe our competitors can generally only deploy their solutions in either a Cloud/SaaS environment or in a dedicated server environment. The iAPPS platform's architecture is flexible and is capable of being deployed in either a Cloud/SaaS or dedicated server environment.

- We believe the majority of our competitors do not provide interactive technology development services that complement their software products. Our ability to develop mission critical web sites and online stores on our own deeply integrated iAPPS platform providing a quality end-to-end solution that distinguishes us from our competitors.
- We believe the interface of the iAPPS platform has been designed for ease of use without substantial technical skills.
- Finally, we believe the iAPPS platform offers a competitive price-to-functionality ratio when compared to our competitors.

Available Information

This Annual Report on Form 10-K, as well as our quarterly reports on Form 10-Q and current reports on Form 8-K, along with any amendments to those reports, are made available upon request, on our website www.bridgeline.digital.com as soon as reasonably practicable after such material is electronically filed with or furnished to the Securities and Exchange Commission. Copies of the following are also available through our website on the “About Us - Investor Information” page under the caption “Governance” and are available in print to any shareholder who requests it:

- Code of Business Ethics
- Committee Charters for the following Board Committees:
 - o Nominating and Corporate Governance Committee
 - o Audit Committee
 - o Compensation Committee

The public may read and copy any materials that we file with the SEC at the SEC’s Public Reference Room at 450 Fifth Street, N.W., Washington, D.C. 20549. Information regarding the SEC’s Public Reference Room can be obtained by calling the SEC at 1-800-SEC-0330. The SEC also maintains an Internet site that contains reports, proxy and information statements, and other information and can be found at <http://www.sec.gov>.

Item 1A. Risk Factors

This report contains forward-looking statements that involve risks and uncertainties, such as statements of our objectives, expectations and intentions. The cautionary statements made in this report are applicable to all forward-looking statements wherever they appear in this report. Our actual results could differ materially from those discussed herein. In addition to the risks discussed in “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” our business is subject to the risks set forth below.

We operate in a rapidly changing environment that involves certain risks and uncertainties, some of which are beyond our control. The risks described below are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial may also materially adversely affect our business, financial condition and/or operating results.

The weakness in the U.S. and international economies could negatively affect our business, results of operations, and financial condition.

Our business, results of operations and financial condition depend in part on international economic conditions. The prolonged downturn in the U.S. and international economies have resulted in a tightening in the credit markets, a low level of liquidity in many financial markets, and extreme volatility in credit, equity and fixed income markets. Both the severity and duration of the downturn in U.S. and international economies are unknown and outside of our control. The impact of these economic conditions on our business may include decreased customer demand; decreased customer confidence; longer sales cycles; delayed payments or difficulty in collecting accounts receivable; decreased margins; and insolvency of customers. Any of these events, or any other events caused by the weakness in the U.S. and international economies, may have a material adverse effect on our business, operating results, and financial condition.

Stress in the global financial system may adversely affect our results of operations and financial condition in ways that may be hard to predict or to defend against.

Recent events in the financial markets have demonstrated that businesses and industries throughout the world are very tightly connected to each other. Thus, financial developments which may appear unrelated to our business or industry may adversely affect us over the course of time. For example, material increases in LIBOR or other applicable interest rate benchmarks may increase the debt payment costs for our credit facilities. Credit contraction in financial markets may hurt our ability to access credit in the event that we identify an acquisition opportunity or require significant access to credit for other reasons. Similarly, volatility in our stock price due to seemingly unrelated financial developments could hurt our ability to raise capital for the financing of acquisitions or other reasons. Any of these events, or any other events caused by stress in world financial markets, may have a material adverse effect on our business, operating results, and financial condition and prevent us from executing our growth strategy.

If we are unable to manage our future growth efficiently, our business, revenues and profitability may suffer.

We anticipate that continued expansion of our business will require us to address potential market opportunities. For example, we may need to expand the size of our research and development, sales, corporate finance or operations staff. There can be no assurance that our infrastructure will be sufficiently flexible and adaptable to manage our projected growth or that we will have sufficient resources, human or otherwise, to sustain such growth. If we are unable to adequately address these additional demands on our resources, our profitability and growth might suffer. Also, if we continue to expand our operations, management might not be effective in expanding our physical facilities and our systems, procedures or controls might not be adequate to support such expansion. Our inability to manage our growth could harm our business and decrease our revenues.

Our revenue and quarterly results may fluctuate, which could adversely affect our stock price.

We have experienced, and may in the future experience, significant fluctuations in our quarterly operating results that may be caused by many factors. These factors include:

- changes in demand for our products;
- introduction, enhancement or announcement of products by us or our competitors;
- market acceptance of our new products;
- the growth rates of certain market segments in which we compete;
- size and timing of significant orders;
- budgeting cycles of customers;
- mix of products and services sold;
- changes in the level of operating expenses;
- completion or announcement of acquisitions; and
- general economic conditions in regions in which we conduct business.

The length of our sales cycle can fluctuate significantly which could result in significant fluctuations in license revenues being recognized from quarter to quarter.

The decision by a customer to purchase our products often involves the development of a complex implementation plan across a customer's business. This process often requires a significant commitment of resources both by prospective customers and us. Given the significant investment and commitment of resources required in order to implement our software, it may take several months, or even several quarters, for marketing opportunities to materialize. If a customer's decision to purchase our products is delayed or if the installation of our products takes longer than originally anticipated, the date on which we may recognize revenues from these sales would be delayed. Such delays and fluctuations could cause our revenues to be lower than expected in a particular period and we may not be able to adjust our costs quickly enough to offset such lower revenue, potentially negatively impacting our results of operations.

Because most of our licenses are renewable on an annual basis, a reduction in our license renewal rate could reduce our revenue.

Our customers have no obligation to renew their annual subscription licenses, and some customers have elected not to do so. Our license renewal rates may decline or fluctuate as a result of a number of factors, including customer dissatisfaction with our products and services, our failure to update our products to maintain their attractiveness in the market, or constraints or changes in budget priorities faced by our customers. A decline in license renewal rates could cause our revenue to decline which would have a material adverse effect on our operations.

We face intense and growing competition, which could result in price reductions, reduced operating margins and loss of market share.

We operate in a highly competitive marketplace and generally encounter intense competition to create and maintain demand for our services and to obtain service contracts. If we are unable to successfully compete for new business and license renewals, our revenue growth and operating margins may decline. The market for our iAPPS platform (Content Manager, Analyzer, eCommerce, Marketier) and web development services are competitive and rapidly changing. Barriers to entry in such markets are relatively low. With the introduction of new technologies and market entrants, we expect competition to intensify in the future. Some of our principal competitors offer their products at a lower price, which may result in pricing pressures. Such pricing pressures and increased competition generally could result in reduced sales, reduced margins or the failure of our product and service offerings to achieve or maintain more

widespread market acceptance.

The web development/services market is highly fragmented with a large number of competitors and potential competitors. Our prominent public company competitors are Open Text, Oracle (Art Technology Group), Demandware, Digital River, GSI Commerce, Adobe (Omniiture) and Sapien. We face competition from customers and potential customers who develop their own applications internally. We also face competition from potential competitors that are substantially larger than we are and who have significantly greater financial, technical and marketing resources, and established direct and indirect channels of distribution. As a result, they are able to devote greater resources to the development, promotion and sale of their products than we can.

Our growth depends on our relationships with certain strategic partners, and a reduction in the cooperative efforts from our partners could materially impact our revenues.

A significant portion of our business strategy relies on the continued cooperation of our strategic partners to provide sales opportunities as well as the establishment of new strategic relationships. Our licensing revenue could be adversely impacted if there is a reduction in partner cooperation or sales efforts. Our success will depend, in part, upon our ability to maintain our existing relationships with strategic partners and establish new relationships. The cooperation and performance of strategic partners is outside of our control, and we are unable to predict the extent to which these relationships will be successful.

There may be a limited market for our common stock which may make it more difficult for you to sell your stock and which may reduce the market price of our common stock.

The average shares traded per day in fiscal 2012 was approximately 50,000 shares per day. In fiscal 2011 our average shares traded per day was less than 17,000. If our average trading volume of our common stock were to decrease it may impair the ability of holders of our common stock to sell their shares at the time they wish to sell them or at a price that they consider reasonable. The low trading volume may also reduce the fair market value of the shares of our common stock. Accordingly, there can be no assurance that the price of our common stock will ever reflect our actual value. There can be no assurance that the daily trading volume of our common stock will increase or improve either now or in the future.

The market price of our common stock is volatile which could adversely affect your investment in our common stock.

The market price of our common stock is volatile and could fluctuate significantly for many reasons, including, without limitation: as a result of the risk factors listed in this annual report on Form 10-K; actual or anticipated fluctuations in our operating results; and general economic and industry conditions. In fiscal 2012, the closing price of our common stock as reported by NASDAQ was between \$.47 and \$3.24.

If our products fail to perform properly due to undetected errors or similar problems, our business could suffer, and we could face product liability exposure.

We develop and sell complex WEM software which may contain undetected errors, or bugs. Such errors can be detected at any point in a product's life cycle, but are frequently found after introduction of new software or enhancements to existing software. We continually introduce new products and new versions of our products. Despite internal testing and testing by current and potential customers, our current and future products may contain serious defects. If we detect any errors before we ship a product, we might have to delay product shipment for an extended period of time while we address the problem. We might not discover software errors that affect our new or current products or enhancements until after they are deployed, and we may need to provide enhancements to correct such errors. Therefore, it is possible that, despite our testing, errors may occur in our software. These errors could result in the following:

- harm to our reputation;
- lost sales;
- delays in commercial release;
- product liability claims;
- contractual disputes;
- negative publicity;
- delays in or loss of market acceptance of our products;
- license terminations or renegotiations; or

- unexpected expenses and diversion of resources to remedy errors.

Furthermore, our customers may use our software together with products from other companies. As a result, when problems occur, it might be difficult to identify the source of the problem. Even when our software does not cause these problems, the existence of these errors might cause us to incur significant costs, divert the attention of our technical personnel from our product development efforts, impact our reputation, or cause significant customer relations problems.

Technology and customer requirements evolve rapidly in our industry, and if we do not continue to develop new products and enhance our existing products in response to these changes, our business could suffer.

We will need to continue to enhance our products in order to maintain our competitive position. We may not be successful in developing and marketing enhancements to our products on a timely basis, and any enhancements we develop may not adequately address the changing needs of the marketplace. Overlaying the risks associated with our existing products and enhancements are ongoing technological developments and rapid changes in customer requirements. Our future success will depend upon our ability to develop and introduce in a timely manner new products that take advantage of technological advances and respond to new customer requirements. The development of new products is increasingly complex and uncertain, which increases the risk of delays. We may not be successful in developing new products and incorporating new technology on a timely basis, and any new products may not adequately address the changing needs of the marketplace. Failure to develop new products and product enhancements that meet market needs in a timely manner could have a material adverse effect on our business, financial condition and operating results.

If we are unable to protect our proprietary technology and other intellectual property rights, our ability to compete in the marketplace may be substantially reduced.

If we are unable to protect our intellectual property, our competitors could use our intellectual property to market products similar to our products, which could decrease demand for such products, thus decreasing our revenue. We rely on a combination of copyright, trademark and trade secret laws, as well as licensing agreements, third-party non-disclosure agreements and other contractual measures, to protect our intellectual property rights. These protections may not be adequate to prevent our competitors from copying or reverse-engineering our products. Our competitors may independently develop technologies that are substantially equivalent or superior to our technology. To protect our trade secrets and other proprietary information, we require employees, consultants, advisors and collaborators to enter into confidentiality agreements. These agreements may not provide meaningful protection for our trade secrets, know-how or other proprietary information in the event of any unauthorized use, misappropriation or disclosure of such trade secrets, know-how or other proprietary information. The protective mechanisms we include in our products may not be sufficient to prevent unauthorized copying. Existing copyright laws afford only limited protection for our intellectual property rights and may not protect such rights in the event competitors independently develop similar products. In addition, the laws of some countries in which our products are or may be licensed do not protect our products and intellectual property rights to the same extent as do the laws of the United States.

Policing unauthorized use of our products is difficult, and litigation could become necessary in the future to enforce our intellectual property rights. Any litigation could be time consuming and expensive to prosecute or resolve, result in substantial diversion of management attention and resources, and materially harm our business or financial condition.

If a third party asserts that we infringe upon its proprietary rights, we could be required to redesign our products, pay significant royalties or enter into license agreements.

Claims of infringement are becoming increasingly common as the software industry develops and as related legal protections, including patents, are applied to software products. Although we do not believe that our products infringe on the rights of third parties, a third party may assert that our technology or technologies of entities we acquire violates its intellectual property rights. As the number of software products in our markets increases and the functionality of these products further overlap, we believe that infringement claims will become more common. Any claims against us, regardless of their merit, could:

- be expensive and time consuming to defend;
- result in negative publicity;
- force us to stop licensing our products that incorporate the challenged intellectual property;
- require us to redesign our products;
- divert management's attention and our other resources; or
- require us to enter into royalty or licensing agreements in order to obtain the right to use necessary technologies, which may not be available on terms acceptable to us, if at all.

We believe that any successful challenge to our use of a trademark or domain name could substantially diminish our ability to conduct business in a particular market or jurisdiction and thus decrease our revenues and result in possible losses to our business.

If the security of our software, in particular the hosted Internet solutions products we have developed, is breached, our business and reputation could suffer.

Fundamental to the use of our products is the secure collection, storage and transmission of confidential information. Third parties may attempt to breach our security or that of our customers and their databases. We might be liable to our customers for any breach in such security, and any breach could harm our customers, our business and reputation. Any imposition of liability, particularly liability that is not covered by insurance or is in excess of insurance coverage, could harm our reputation, business and operating results. Computers, including those that utilize our software, are vulnerable to computer viruses, physical or electronic break-ins and similar disruptions, which could lead to interruptions, delays or loss of data. We might be required to expend significant capital and other resources to protect further against security breaches or to rectify problems caused by any security breach, which, in turn could divert funds available for corporate growth and expansion or future acquisitions.

We are dependent upon our management team, and the loss of any of these individuals could harm our business.

We are dependent on the efforts of our key management personnel. The loss of any of our key management personnel, or our inability to recruit and train additional key management and other personnel in a timely manner, could materially and adversely affect our business, operations and future prospects. We do not maintain a key man insurance policy covering any of our employees. In addition, in the event that Thomas Massie, our founder, Chairman and Chief Executive Officer, is terminated by us without cause, he is entitled to receive severance payments equal to three years' total compensation, including bonus amounts. In the event we are required to pay the severance payments to Mr. Massie, it could have a material adverse effect on our results of operations for the fiscal quarter and year in which such payments are made.

Because competition for highly qualified personnel is intense, we might not be able to attract and retain the employees we need to support our planned growth.

We will need to increase the size and maintain the quality of our sales force, software development staff and professional services organization to execute our growth plans. To meet our objectives, we must attract and retain highly qualified personnel with specialized skill sets. Competition for qualified personnel can be intense, and we might not be successful in attracting and retaining them. Our ability to maintain and expand our sales, product development and professional services teams will depend on our ability to recruit, train and retain top quality people with advanced skills who understand sales to, and the specific needs of, our target customers. For these reasons, we have experienced, and we expect to again experience in the future, challenges in hiring and retaining highly skilled employees with appropriate qualifications for our business. In addition to hiring services personnel to meet our needs, we may also engage additional third-party consultants as contractors, which could have a negative impact on our financial results. If we are unable to hire or retain qualified personnel, or if newly hired personnel fail to develop the necessary skills or reach productivity slower than anticipated, it would be more difficult for us to sell our products and services, and we could experience a shortfall in revenue and not achieve our planned growth.

Future acquisitions may be difficult to integrate into our existing operations, may disrupt our business, dilute stockholder value, divert management's attention, or negatively affect our operating results.

We have acquired multiple businesses since our inception in 2000. A key element of our growth and market share expansion strategy is the pursuit of additional acquisitions in the fragmented web application development industry in the future. These future acquisitions may create risks such as: (i) the need to integrate and manage the businesses and products acquired with our own business and products, (ii) additional demands on our resources, systems, procedures and controls, (iii) disruption of our ongoing business, (iv) unknown liabilities associated with the acquired businesses, and (v) diversion of management's attention from other business concerns. In addition, future acquisitions could involve substantial investment of funds or financings by issuance of debt or equity securities and could result in one-time charges and expenses and have the potential to either dilute the interests of existing shareholders or result in the issuance of or assumption of debt. Any such acquisition may not be successful in generating revenues, income or other returns to us, and the resources committed to such activities will not be available to us for other purposes. Moreover, if we are unable to access capital markets on acceptable terms or at all, we may not be able to consummate acquisitions, or may have to do so on the basis of a less than optimal capital structure. Our inability to take advantage of growth opportunities for our business or to address risks associated with acquisitions or investments in businesses may negatively affect our operating results. Additionally, any impairment of goodwill or other intangible assets acquired in an acquisition or in an investment, or charges to earnings associated with any acquisition or investment activity, may materially reduce our earnings which, in turn, may have an adverse material effect on the price of our common stock.

Increasing government regulation could affect our business and may adversely affect our financial condition.

We are subject not only to regulations applicable to businesses generally, but also to laws and regulations directly applicable to electronic commerce. Although there are currently few such laws and regulations, state, federal and foreign governments may adopt laws and regulations applicable to our business. Any such legislation or regulation could dampen the growth of the Internet and decrease its acceptance. If such a decline occurs, companies may choose in the future not to use our products and services. Any new laws or regulations in the following areas could affect our business:

- user privacy;
- the pricing and taxation of goods and services offered over the Internet;
- the content of websites;

- copyrights;
- consumer protection, including the potential application of “do not call” registry requirements on customers and consumer backlash in general to direct marketing efforts of customers;
- the online distribution of specific material or content over the Internet; or
- the characteristics and quality of products and services offered over the Internet.

We have never paid dividends and we do not anticipate paying dividends in the future.

We have never paid cash dividends and do not believe that we will pay any cash dividends on our common stock in the future. Since we have no plan to pay cash dividends, an investor would only realize income from his investment in our shares if there is a rise in the market price of our common stock, which is uncertain and unpredictable.

Item 1B. Unresolved Staff Comments

Not required.

Item 2. Properties.

The following table lists our offices, all of which are leased:

Geographic Location	Address	Size
Atlanta, Georgia	5555 Triangle Parkway Norcross, Georgia 30092	8,547 square feet, professional office space
Baltimore, Maryland	6711 Columbia Gateway Dr. Baltimore, Maryland 21046	4,925 square feet, Professional office space
Bangalore, India	65 Bagmane Tech Park, C.V Raman Nagar Byrasandra, Corp Ward 83, Bangalore 560 052	6,000 square feet professional office space
Boston, Massachusetts	80 Blanchard Road Burlington, Massachusetts 01803	9,335 square feet, professional office space
Chicago, Illinois	30 N. LaSalle Street, 20 th Floor Chicago, IL 60602	4,880 square feet, professional office space
Denver, Colorado	410 17 th Street, Suite 600 Denver, CO 80202	5,993 square feet, professional office space
Philadelphia, Pennsylvania	1100 East Hector Street Conshohocken, Pennsylvania 19428	4,619 square feet Professional office space
New York, New York	450 7 th Avenue New York, NY 10123	5,582 square feet, professional office space
Tampa, Florida	5325 Primrose Lake Circle Tampa, FL. 33647	4,264 square feet Professional office space
Dallas, Texas	5360 Legacy Drive Plano, TX 75024	10,158 square feet, professional office space

Item 3. Legal Proceedings.

From time to time we are subject to ordinary routine litigation and claims incidental to our business. We are not currently involved in any legal proceedings that we believe are material beyond those described below.

Bridgeline Digital, Inc vs. e.Magination network, LLC and its principal owner, Daniel Roche.

In August 2010, Bridgeline initiated a lawsuit against e.Magination network, LLC and its principal owner, Daniel Roche, in the Federal District Court of Massachusetts. Bridgeline sought damages for accounts receivable allegedly collected by Mr. Roche and e.Magination and used to pay obligations of e.Magination and Mr. Roche (accounts receivable contractually belonging to Bridgeline). e.Magination and Mr. Roche asserted counterclaims against Bridgeline and Thomas Massie alleging that Bridgeline breached Mr. Roche's employment agreement by improperly terminating Mr. Roche for cause and also alleging breach of the Asset Purchase Agreement by Bridgeline. In

November 2012 we agreed to enter into mediation with Mr. Roche. As of the date of this filing there has been no progress in the mediation..

Ingeniador, LLC vs. Interwoven, Inc., Bridgeline Digital, Inc., et al

On April 26, 2012, Bridgeline was informed that on such date the United States District Court for the District of Puerto Rico entered a default judgment against Bridgeline as part of a patent infringement lawsuit brought by Ingeniador, LLC against 16 companies, including Bridgeline. On June 15, 2012 the court granted our request to have the default judgment set aside and dismissed the case. On October 10, 2012 Bridgeline entered into a Covenant Not to Sue Agreement (the "CNTS") with Ingeniador, LLC, for no monetary consideration, whereby both Bridgeline and Ingeniador, LLC agreed not to pursue any further legal claim against the other party, entered into a mutual release and dismissed all pending claims. In addition, Bridgeline agreed not to encourage and/or participate in a challenge to the validity or enforceability of the patent owned by Ingeniador's which was the subject of the suit described above, unless required by law. In addition, both Bridgeline and Ingeniador attested that the CNTS itself does not represent any admission or acknowledgement of any kind in relation to the validity of Ingeniador's claim of patent infringement.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Common Equity, Related Stockholder Matters and Issuer Purchase of Equity Securities.

The following table sets forth, for the periods indicated, the range of high and low sale prices for our common stock. Our common stock trades on the NASDAQ Capital Market under the symbol BLIN.

Year Ended September 30, 2012	High	Low
Fourth Quarter	\$1.63	\$1.05
Third Quarter	\$3.24	\$1.10
Second Quarter	\$1.18	\$0.53
First Quarter	\$0.78	\$0.47

Year Ended September 30, 2011	High	Low
Fourth Quarter	\$1.16	\$0.53
Third Quarter	\$1.22	\$0.82
Second Quarter	\$1.51	\$1.03
First Quarter	\$1.62	\$0.99

We have not declared or paid cash dividends on our common stock and do not plan to pay cash dividends to our shareholders in the near future. As of November 28, 2012, our common stock was held of record by approximately 1,533 shareholders. Most of the Company's stock is held in street name through one or more nominees.

Recent Sales of Unregistered Securities; Use of Proceeds From Registered Securities

The following summarizes all sales of our unregistered securities during the year ended September 30, 2012, other than sales of unregistered securities during the quarter ended June 30, 2012 that were previously disclosed on Form 8-K. The securities in the below-referenced transactions were (i) issued without registration and (ii) were subject to restrictions under the Securities Act and the securities laws of certain states, in reliance on the private offering exemptions contained in Sections 4(2), 4(6) and/or 3(b) of the Securities Act and on Regulation D promulgated there under, and in reliance on similar exemptions under applicable state laws as transactions not involving a public offering. Unless stated otherwise, no placement or underwriting fees were paid in connection with these transactions.

During the year ended September 30, 2012, the Company granted 2,094,667 stock options under its Amended and Restated Stock Incentive Plan at a weighted average exercise price of \$0.80 per share.

The securities were issued exclusively to our directors, executive officers and employees. The issuance of options and the shares of common stock issuable upon the exercise of such options as described above were issued pursuant to written compensatory plans or arrangements with our employees, directors and consultants, in reliance on the exemptions from the registration provisions of the Securities Act set forth in Section 4(2) thereof relative to sales by an issuer not involving any public offering, to the extent an exemption from such registration was required.

Item 6. Selected Financial Data.

Not required

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

This section contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in the forward-looking statements as a result of a variety of factors and risks including the impact of the weakness in the U.S. and international economies on our business, our inability to manage our future growth effectively or profitably, fluctuations in our revenue and quarterly results, our license renewal rate, the impact of competition and our ability to maintain margins or market share, the limited market for our common stock, the volatility of the market price of our common stock, the performance of our products, our ability to respond to rapidly evolving technology and customer requirements, our ability to protect our proprietary technology, the security of our software, our dependence on our management team and key personnel, our ability to hire and retain future key personnel, or our ability to maintain an effective system of internal controls. These and other risks are more fully described herein and in our other filings with the Securities and Exchange Commission.

This section should be read in combination with the accompanying audited consolidated financial statements and related notes prepared in accordance with United States generally accepted accounting principles.

Overview

Bridgeline Digital enables its customers to maximize the performance of their mission critical websites, intranets, and online stores. Bridgeline is the developer of the award-winning iAPPS® Web Engagement Management (WEM) product platform and related digital solutions. The iAPPS platform deeply integrates Web Content Management, eCommerce, eMarketing, and web Analytics capabilities within the heart of websites or eCommerce web stores to help marketers deliver online experiences that attract, engage, and convert their customers across all digital channels. Bridgeline's iAPPS platform combined with its digital services assists customers in maximizing on-line revenue, improving customer service and loyalty, enhancing employee knowledge, and reducing operational costs.

The iAPPS platform is delivered through a Cloud-based SaaS ("Software as a Service") multi-tenant business model, whose flexible architecture provides customers with state of the art deployment providing maintenance, daily technical operation and support; or via a traditional perpetual licensing business model, in which the iAPPS software resides on a dedicated server in either the customer's facility or Bridgeline's co-managed hosting facility.

In 2012, KMWorld Magazine Editors selected Bridgeline Digital as one of the 100 Companies That Matter in Knowledge Management and also selected iAPPS as a Trend Setting Product in 2012. iAPPS Content Manager and iAPPS Commerce were selected as finalists for the 2011 and 2012 CODiE Awards for Best Content Management Solution and Best Electronic Commerce Solution, globally. iAPPS Content Manager was the winner of the 2010 CODiE Award for Best Content Management Solution, globally. B2B Interactive has selected Bridgeline Digital as one of the Top Interactive Technology companies in the United States.

Bridgeline Digital was incorporated under the laws of the State of Delaware on August 28, 2000.

Locations

The Company's corporate office is located in Burlington, Massachusetts. The Company maintains regional field offices serving the following geographical locations: Atlanta, GA; Baltimore, MD; Boston, MA; Chicago, IL; Dallas, TX; Denver, CO; New York, NY; Philadelphia, PA; and Tampa, FL. The Company has one wholly-owned subsidiary, Bridgeline Digital Pvt. Ltd. located in Bangalore, India.

Sales and Marketing

Bridgeline employs a direct sales force and each sale takes on average 60 to 180 days to complete. Our direct sales force focuses its efforts selling to medium-sized and large companies. These companies are generally categorized in the following vertical markets: (i) financial services, (ii) consumer products and goods (iii) health services and life sciences, (iv) high technology, (software and hardware), (v) retail brand names, (vi) transportation and storage, and (vii) associations and foundations.

We have nine geographic locations in the United States with full-time professional direct sales personnel. Our geographic locations are in the metropolitan Atlanta, Baltimore, Boston, Chicago, Dallas, Denver, New York, Philadelphia, and Tampa areas.

We have a value added reseller channel to supplement our direct sales force for our iAPPS platform. Our value added resellers are generally located in territories where we do not have a direct sales force.

We have dedicated business development professionals whose mission is to identify and establish strategic alliances for iAPPS and iAPPS ds. In June 2012, Bridgeline announced a strategic alliance with UPS Logistics. Bridgeline and UPS Logistics signed a multi-year agreement to offer B2B and B2C eCommerce web stores with an end-to-end eCommerce offering comprised of Bridgeline's eCommerce Fulfilled™ solution and UPS Logistics and fulfillment services. The combined Bridgeline and UPS Logistics offering provides customers with the ability to manage the eCommerce and supply chain fulfillment needs and was designed to benefit mid-market and larger online web stores who seek end to end solutions.

In July of fiscal 2012 Bridgeline signed a multi-year agreement with a large national franchise network of over 4,300 locations who will license the iAPPS ds platform.

We believe pursuing other significant alliances will enhance the sales and distribution opportunities of iAPPS related intellectual property.

Acquisitions

Bridgeline will continue to evaluate expanding its distribution of iAPPS and its interactive development capabilities throughout North America through acquisitions. Due to the nature of our sales process and delivery requirements, we believe local staff is required in order to maximize market-share objectives.

We believe the web application development market in North America and Europe is growing and fragmented. We believe established yet small web application development companies have the ability to market, sell and install our iAPPS platform in their local metropolitan markets. We believe these companies also have a .NET customer base and a niche presence in the local markets in which they operate. We believe there is an opportunity for us to acquire companies that specialize in web application development that are based in large North American cities in which we currently do not operate. We believe that by acquiring certain of these companies and applying our business practices and efficiencies, we can accelerate our time to market of the iAPPS platform.

During the fiscal year ended September 30, 2012 we completed two acquisitions. On October 3, 2011, we completed the acquisition of Magnetic Corporation ("Magnetic"), a Tampa, Florida based interactive technology company. We acquired all of the outstanding capital stock of Magnetic for consideration consisting of (i) \$150 thousand in cash (ii) assumption of \$130 thousand of indebtedness and (iii) contingent consideration of up to \$600 thousand in cash and 166,666 shares of Bridgeline Digital common stock. The contingent consideration is payable quarterly over the 12 consecutive calendar quarters following the acquisition, contingent upon the acquired business achieving certain quarterly revenue and quarterly operating income targets during the period. The contingent common stock has been issued and is being held in escrow pending satisfaction of the applicable targets. To the extent that either the quarterly revenue targets or the quarterly operating income targets are not met in a particular quarter, the earn-out period will be extended for up to four additional quarters.

On May 31, 2012, we completed the acquisition of Marketnet, Inc. ("Marketnet"), an interactive technology company based in Dallas, Texas. Bridgeline acquired all of the outstanding capital stock of Marketnet for consideration consisting of (i) \$20 thousand in cash, (ii) assumption of debt of \$244 thousand and (ii) contingent consideration of up to \$650 thousand in cash and 204,331 shares of Bridgeline Digital common stock. This contingent consideration is payable quarterly over the 12 consecutive calendar quarters following the acquisition, contingent upon the acquired business achieving certain quarterly revenue and quarterly operating income targets during the period. To the extent that either the quarterly revenue target or the quarterly operating income target is not met in a particular quarter, the

earn-out period will be extended for up to four additional quarters. Marketnet is also eligible to earn additional bonus equity consideration of 200,000 shares, if annual net revenues of the acquired business exceed a certain threshold in any fiscal year through September 30, 2015. The contingent common stock has been issued and is being held in escrow pending satisfaction of the applicable targets.

Each of Magnetic and Marketnet's operating results are reflected in the condensed consolidated financial statements as of the acquisition date.

We did not complete any acquisitions in the fiscal year ended September 30, 2011.

We may make additional acquisitions in the foreseeable future. These potential acquisitions are consistent with our iAPPS platform distribution strategy and growth strategy by providing Bridgeline with new geographical distribution opportunities, an expanded customer base, an expanded sales force and an expanded developer force. In addition, integrating acquired companies into our existing operations allows us to consolidate the finance, human resources, legal, marketing, research and development of the acquired businesses with our own internal resources, hence reducing the aggregate of these expenses for the combined businesses and resulting in improved operating results.

Customer Information

We currently have over 500 active customers. For the years ended September 30, 2012 and 2011 no one customer represented 10% or more of the Company's total revenue.

Summary of Results of Operations

Total revenue for the fiscal year ended September 30, 2012 ("fiscal 2012") increased to \$26,296 thousand from \$26,267 thousand for the fiscal year ended September 30, 2011 ("fiscal 2011"). Loss from operations for fiscal 2012 was (\$602) thousand compared with loss from operations of (\$547) thousand for fiscal 2011. We had a net loss for fiscal 2012 of (\$945) thousand compared with a net loss of (\$782) thousand for fiscal 2011. Loss per share for fiscal 2012 was (\$0.07) compared with loss per share of (\$0.06) for fiscal 2011.

Highlights of Fiscal 2012

Highlights of fiscal 2012 include the achievement of record revenues, record iAPPS license sales and key iAPPS product releases and updates:

Financial

- Bridgeline achieved record revenues in fiscal 2012 of \$26,296,000.
- Total iAPPS related revenue increased 37% to \$16.6 million in fiscal 2012 from \$12.1 million in fiscal 2011.
- Recurring revenue, which reflects amounts that are contractually due to Bridgeline, increased 27% to \$4.2 million in fiscal 2012 from \$3.3 million in fiscal 2011.
- Bridgeline sold a record number of iAPPS licenses within fiscal 2012. The 267 new iAPPS licenses during fiscal 2012 was a 25% increase compared to licenses sold during fiscal 2011.

New Strategic Alliances, Products and Enhancements

- In the third quarter of fiscal 2012 Bridgeline announced that United Parcel Service ("UPS") signed a multi-year partnership agreement with Bridgeline to offer B2B and B2C eCommerce web stores with an end-to-end offering comprised of Bridgeline's eCommerce Fulfilled™ solution and UPS logistics and fulfillment services.
- In the fourth quarter of fiscal 2012 Bridgeline announced the release of new product, iAPPS distributed subscription ("iAPPS ds"), a platform that empowers large franchise and dealer networks with state-of-the-art web engagement management while providing superior oversight of corporate branding. iAPPS ds deeply integrates content management, eCommerce, eMarketing and web analytics and is a self-service web platform that is offered to each authorized franchise or dealer for a monthly subscription fee.
- In July of fiscal 2012 Bridgeline signed a multi-year agreement with a large national franchise network of over 4,300 locations who will license the iAPPS ds platform.

- Bridgeline released two versions of the iAPPS platform during fiscal 2012. In the first quarter of fiscal 2012 Bridgeline released iAPPS version 4.7 which provided many international eCommerce enhancements including multilingual and multi-currency support along with improvements in how iAPPS handles international fulfillment, tax and regulations logistics. In the third quarter of fiscal 2012 Bridgeline released iAPPS version 4.8 which offered full integration of front- and back-end eCommerce capabilities with built-in warehouse management and inventory control.

Acquisitions

- During the fiscal year Bridgeline continued its geographic expansion strategy with two acquisitions; Magnetic Corporation and Marketnet, Inc. These acquisitions expanded Bridgeline's footprint into the Tampa and Dallas regions.

Revenue

Our revenue is derived from three sources: (i) web application development services (ii) managed service hosting and (iii) subscription and perpetual licenses.

Web Application Development Services

Web application development services revenue is comprised of iAPPS development related services and other web development related services generated from non iAPPS related engagements. Total revenue from web application development services decreased \$605 thousand, or 3%, to \$21.3 million for the year ended September 30, 2012 (“fiscal 2012”). However, revenue from iAPPS related application development services increased \$4.0 million, or 42% to \$13.5 million compared to the year ended September 30, 2011 (“fiscal 2011”) as we continue to concentrate on selling higher-margin iAPPS engagements to both new and existing customers. The decrease in web application development services revenue compared to the prior period is due to a decrease in non-iAPPS application development services revenues of \$4.6 million attributable to a stoppage in non-iAPPS related development services from a customer due to a loss of their funding, as well as our decision to stop servicing low margin non-iAPPS opportunities.

Web application development services revenue as a percentage of total revenue decreased to 81% from 83% in the prior period. The decrease is attributable to a larger mix of iAPPS license related revenue and managed service hosting revenue as compared to sales of web application development services.

Managed Service Hosting

Revenue from managed service hosting increased \$511 thousand, or 25%, to \$2.5 million from \$2.0 million in fiscal 2011. The increase is attributable to incremental revenues generated from our fiscal 2012 acquisitions and, to a lesser extent, revenue from iAPPS related hosting arrangements for perpetual licenses sold.

Managed services revenue as a percentage of total revenue increased to 10% from 8% in fiscal 2011 due to the incremental revenue from our acquisitions.

Subscription and Perpetual Licenses

Revenue from subscription and perpetual licenses increased \$123 thousand, or 5%, to \$2.5 million from \$2.4 million in fiscal 2011. The increase is due primarily to a higher amount of subscription license revenues and annual maintenance renewals.

Subscription and perpetual license revenue as a percentage of total revenue remained at 9% in fiscal 2012.

Costs of Revenue

Total cost of revenue for the fiscal year ended September 30, 2012 decreased \$1.2 million, or 9%, to \$11.8 million from \$13.0 million in fiscal 2011.

Cost of Web Application Development Services

Cost of web application development services decreased \$0.9 million, or 8%, compared to fiscal 2011. The cost of total web application development services as a percentage of total web application development services revenue decreased to 51% from 54% in fiscal 2011. This decrease is a result of our decision to stop servicing lower margin

non-iAPPS engagements and, to a lesser extent, a decreased use of subcontractors.

Cost of iAPPS application development services increased \$1.9 million to \$6.3 million, an increase of 41% when compared to fiscal 2011. The increase is a result of iAPPS application development service revenue increasing 42% when compared to fiscal 2011. Cost of iAPPS application development services as a percentage of iAPPS application development revenue remained steady at 47% in each of fiscal 2012 and fiscal 2011.

Cost of other application development services for fiscal 2012 decreased \$2.8 million to \$4.6 million, a decrease of 38% when compared to fiscal 2011. The cost of other application development services as a percentage of other application development service revenue decreased to 59% in fiscal 2012 from 60% in fiscal 2011. This decrease is a result of our decision to stop servicing lower margin non-iAPPS engagements and to a lesser extent a decreased use of subcontractors.

Cost of Managed Service Hosting

Cost of managed service hosting decreased \$71 thousand or 16% when compared to fiscal 2011. The cost of managed services as a percentage of managed services revenue decreased to 15% from 22% in fiscal 2011. The decrease in the amount of managed service hosting costs is due to efforts to streamline costs by ending engagements with lower margin hosting customers, and our continued investments in our co-managed network operation center to support our core iAPPS customer base.

Cost of Subscription and Perpetual License

Cost of subscription and perpetual licenses decreased \$231 thousand, or 34% when compared to fiscal 2011. The cost of subscription and perpetual licenses as a percentage of subscription and perpetual license revenue decreased to 18% from 29% in fiscal 2011. The decrease is due to a decrease in amortization of software costs associated with the initial development of iAPPS and, to a lesser extent cost efficiencies realized on our iAPPS SaaS environment. We expect amortization of software costs to increase in fiscal 2013 due to costs capitalized in the fourth quarter of fiscal 2012. These costs are related to significant enhancements to our iAPPS platform that will be released in fiscal 2013 and to a lesser extent costs associated with the development of iAPPS ds.

Gross Profit

Gross profit increased \$1.3 million, or 9%, when compared with fiscal 2011. This increase is due to our focus on higher margin iAPPS engagements and a decrease in amortization of software costs.

Operating Expenses

Sales and Marketing Expenses

Sales and marketing expenses increased \$1.0 million, or 15%, to \$7.7 million compared to fiscal 2011. This increase is primarily attributable to increases associated with costs related to our acquisitions of Magnetic and Marketnet, including personnel costs and marketing costs to promote our iAPPS products.

General and Administrative Expenses

General and administrative expenses relatively flat when compared to fiscal 2011. General and administrative expense represented 15% for both fiscal 2012 and 2011. General and administrative expenses decreased \$1.1 million for the adjustment of contingent earnout payments from prior acquisitions that will not be achieved, offset by increases in personnel costs and increases in staffing.

Research and Development

Research and development expense decreased by \$410 thousand, or 22%, to \$1.5 million compared with fiscal 2011, after capitalization of software development costs. Capitalized software development costs were \$480 thousand and \$59 thousand for fiscal 2012 and 2011, respectively. The decrease is due to the aforementioned increase in capitalized software and development costs related to enhancements to our existing iAPPS platform and the development of iAPPS ds.

Depreciation and Amortization

Depreciation and amortization expense increased by \$389 thousand, or 29%, to \$1.7 million compared to fiscal 2011. Depreciation and amortization increased to 7% of total revenue compared to 5% of total revenue for fiscal 2011. This increase is primarily attributable to additional depreciation expense related to leasehold improvements and investments made in our co-managed network operation center. Incremental amortization expense as a result of our fiscal 2012 acquisitions was offset by a decrease in amortization for intangibles acquired before fiscal 2010 that reached the end of their useful life.

Impairment of Intangible Assets

The increase in fiscal 2012 compared to 2011 is attributable to an impairment charge recorded in the first quarter of fiscal 2012. We incurred a charge to operations of \$281 thousand for impairment charges related to an intangible asset assumed from our fiscal 2010 acquisition of e.Magination and its wholly-owned subsidiary e.Magination IG, LLC. In the first quarter of fiscal 2012, the Company stopped servicing low margin non-iAPPS opportunities acquired from e.Magination IG, LLC. It was therefore determined that a portion of the customer list was impaired.

Income (Loss) from Operations

The loss from operations was (\$602) thousand for fiscal 2012 compared to a loss from operations of (\$547) for fiscal 2011. This increase in loss from operations is primarily due to an increase in selling and marketing expenses as a result of our fiscal 2012 acquisitions and the aforementioned impairment of the intangible asset, offset by the increase in gross profit.

Interest Income (Expense), net

Interest income (expense), net increased to a \$275 thousand net expense for fiscal 2012 from a \$211 thousand net expense for 2011. The increase in net expense in fiscal 2012 is attributable to increased interest expense incurred due to the Company's borrowing on its term loan facility near the end of fiscal 2011.

Provision for Income Taxes

The provision for income tax expense was \$68 thousand for fiscal 2012 compared to \$24 thousand for fiscal 2011. Income tax expense represents the estimated liability for Federal, state and foreign income taxes owed by the Company, including the alternative minimum tax. The increase in fiscal 2012 is due to an increase in foreign income taxes related to our India subsidiary. The Company has net operating loss carryforwards and other deferred tax benefits that are available to offset future taxable income. A valuation allowance is established if it is more likely than not that all or a portion of the deferred tax asset will not be realized. Accordingly, the Company has established a full valuation allowance against its net deferred tax asset at September 30, 2012 and 2011.

The Federal net operating loss (NOL) carryforward of approximately \$6.0 million as of September 30, 2012 expires on various dates through 2028. Internal Revenue Code Section 382 places a limitation on the amount of taxable income which can be offset by NOL carryforwards after a change in control of a loss corporation. Generally, after a change in control, a loss corporation cannot deduct NOL carryforwards in excess of the Section 382 Limitation. Due to these "change of ownership" provisions, utilization of NOL carryforwards may be subject to an annual limitation regarding their utilization against taxable income in future periods. The Company has not performed a Section 382 analysis. However, if performed, Section 382 may be found to limit potential future utilization of our NOL carryforwards.

Adjusted EBITDA

We also measure our performance based on a non-GAAP ("Generally Accepted Accounting Principles") measurement of earnings before interest, taxes, depreciation, and amortization and before stock compensation expense and impairment of goodwill and intangible assets ("Adjusted EBITDA").

We believe this non-GAAP financial measure of Adjusted EBITDA is useful to management and investors in evaluating our operating performance for the periods presented and provides a tool for evaluating our ongoing operations. Adjusted EBITDA, however, is not a measure of operating performance under GAAP and should not be considered as an alternative or substitute for GAAP profitability measures such as (i) income from operations and net income, or (ii) cash flows from operating, investing and financing activities, both as determined in accordance with GAAP. Adjusted EBITDA as an operating performance measure has material limitations since it excludes the financial statement impact of income taxes, net interest expense, amortization of intangibles, depreciation, other amortization and stock-based compensation, and therefore does not represent an accurate measure of profitability. As a result, Adjusted EBITDA should be evaluated in conjunction with net income for a complete analysis of our profitability, as net income includes the financial statement impact of these items and is the most directly comparable GAAP operating performance measure to Adjusted EBITDA. Our definition of Adjusted EBITDA may also differ

from and therefore may not be comparable with similarly titled measures used by other companies, thereby limiting its usefulness as a comparative measure. Because of the limitations that Adjusted EBITDA has as an analytical tool, investors should not consider it in isolation, or as a substitute for analysis of our operating results as reported under GAAP.

The following table reconciles net income (which is the most directly comparable GAAP operating performance measure) to EBITDA, and EBITDA to Adjusted EBITDA:

	Year Ended September 30,	
	2012	2011
Net loss	\$(946)	\$(782)
Provision for income taxes	68	24
Interest (income) expense, net	276	211
Amortization of intangible assets	750	765
Impairment of intangible assets	281	-
Depreciation	979	603
EBITDA	1,408	821
Other amortization	170	350
Stock-based compensation	386	356
Adjusted EBITDA	\$1,964	\$1,527

Adjusted EBITDA was \$2.0 million for fiscal 2012 compared with \$1.5 million for fiscal 2011, an increase of 29%. The increase in Adjusted EBITDA is due to the increase in gross profit and the reduction of contingent earnout payments from prior acquisitions that will not be achieved, offset by increases in operating expenses as we continue to invest in sales and marketing, research and development, and other operating expenses to support iAPPS sales growth.

Liquidity and Capital Resources

Cash Flows

Operating Activities

Cash provided by operating activities was \$279 thousand for fiscal 2012, compared to \$823 thousand for fiscal 2011. This decrease in cash from operating activities is primarily attributable to lower net income for fiscal 2012 and adjustments to reconcile net loss to net cash used in operating activities as changes in working capital between the two periods was essentially the same.

Investing Activities

Cash used in investing activities was \$2.0 million for fiscal 2012 compared to \$1.4 million for fiscal 2011. This amount includes expenditures for equipment and improvements of \$0.9 million in fiscal 2012 compared with \$618 thousand for fiscal 2011, and capitalized software development costs of \$557 thousand for fiscal 2012 as compared with \$59 thousand in fiscal 2011. These increases in investing activities are offset by a decrease in contingent acquisition payments in fiscal 2012 when compared to fiscal 2011.

Financing Activities

Cash provided by financing activities was \$1.3 million for fiscal, 2012 compared with \$34 thousand for fiscal 2011. The cash provided by financing activities for fiscal 2012 was attributable to cash generated from the sale of common stock net of issuance costs of \$2.2 million (discussed below) and \$133 thousand from employee stock option exercises, offset by net payments under the term loan and bank line of credit of \$319 thousand and payments on capital leases of \$289 thousand and subordinated debt of \$179 thousand. At September 30, 2012, the Company had an outstanding balance under the credit line of \$2.4 million at 5.25% (Silicon Valley Bank's prime rate was 4.00%) and \$1.7 million on its term loan at 5.75%.

Capital Resources and Liquidity Outlook

On March 31, 2010, the Company entered into an Amended and Restated Loan and Security Agreement with Silicon Valley Bank (the "Loan Agreement"). The Loan Agreement provides for up to \$5.0 million of revolving credit advances, of which \$3.0 million may be used for acquisitions and up to \$5.0 million may be used for working capital purposes. The Loan Agreement has a two year term which expired on March 31, 2012. Borrowings are limited to the lesser of (i) \$5 million or (ii) 80% of eligible receivables as defined. In the event that the borrowing base formula results in less than \$5.0 million in available borrowings, the Company can borrow up to \$2.0 million in out of formula borrowings (provided such amount does not exceed \$5.0 million) for specified periods of time. Borrowings bear interest at prime plus 1% or 1.25%, depending on the level of the adjusted EBITDA, as defined. The Company pays an annual commitment fee of .50% and an unused fee of .25%. The Company is also required to comply with certain financial and other covenants. Borrowings are secured by all of the Company's assets and all of the Company's intellectual property. The Loan Agreement replaced the Company's prior credit facility with Silicon Valley Bank which expired on March 31, 2010.

In May 2011, the Company amended its loan arrangement (the “Amendment”) with Silicon Valley Bank (“SVB”). The Amendment: (i) extended the maturity date of the line of credit for one year to March 31, 2013; (ii) revised certain financial covenants; and (iii) amended the out of formula borrowings to be structured as a \$2 million term loan and interest on the term loan will be at SVB’s prime rate plus 1.75%. Interest on the term loan will be paid until April 1, 2012 and on and after April 2, 2012, principal and interest on the term loan will be paid over 36 months ending on April 1, 2015. In May 2012, we amended our loan agreement (the “2012 Amendment”) with SVB, extending the maturity date of the line of credit for one year to March 31, 2014. The 2012 Amendment also revised a financial covenant, increasing our minimum liquidity requirement. Minimum liquidity is defined as funds held with SVB plus borrowing availability on our line of credit.

In May 2012, we assumed two promissory notes in connection with the acquisition of Marketnet, Inc. The first promissory note in the amount of \$63 thousand is payable in eight equal installments of \$8 thousand, including interest accrued at 5%, and matures in May 2014. The first installment was paid in July 2012. The second promissory note in the amount of \$80 thousand is due in twelve equal installments of \$7 thousand, including interest accrued at 5%, and matures in May 2015. The first installment was paid in July 2012.

On May 31, 2012, the Company sold 2,173,913 shares of common stock at \$1.15 per share for gross proceeds of \$2.5 million in a private placement. Net proceeds after offering expenses were approximately \$2.2 million.

We believe that cash generated from operations and proceeds from the bank line of credit and the sale of common stock will be sufficient to fund the company’s working capital and capital expenditure needs in the foreseeable future.

Inflation

Inflationary increases can cause pressure on wages and the cost of benefits offered to employees. We believe that the relatively moderate rates of inflation in recent years have not had a significant impact on our operations.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements, financings or other relationships with unconsolidated entities or other persons, other than our operating leases and contingent acquisition payments.

We currently do not have any variable interest entities. We do not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. Therefore, we are not materially exposed to any financing, liquidity, market or credit risk that could arise if we had engaged in such relationships.

Contractual Obligations

We lease our facilities in the United States and India. Other contractual obligations include (i) certain equipment acquired under capitalized lease agreements, (ii) a subordinated promissory note in the amount of \$375 thousand payable quarterly over three years beginning January 2011 with interest at 1% per annum and adjusted contingent earnouts of \$256 thousand payable quarterly based on achievement of revenue targets beginning with the quarter ended December 31, 2010, both related to the TMX Acquisition, (iii) contingent earnouts in the amount of \$748 thousand payable in cash beginning with the quarter ended September 30, 2010 based on the achievement of revenue and earnings targets and \$675 thousand payable in Bridgeline common stock beginning with the quarter ending December 31, 2012 based on the achievement of revenue and earnings targets, in connection with the e.Magination acquisition, (iv) contingent earnouts in the amount of \$600 thousand payable in cash beginning with the quarter ended

December 31, 2012 based on the achievement of revenue and earnings targets and 166,666 shares of Bridgeline common stock in connection with the Magnetic acquisition, (v) contingent earnouts in the amount of \$650 thousand payable in cash beginning with the quarter ended September 30, 2012 based on the achievement of revenue and earnings targets and 404,331 shares of Bridgeline common stock in connection with the Marketnet acquisition, and (vi) potential contingent acquisition payments related to acquisitions completed prior to September 30, 2009 which are not recorded in the Company's financial statements in the maximum amount of \$165 thousand quarterly through the first quarter of fiscal 2013. Our contractual obligations extend through FY 2019 and pertain to two leased facilities located in the United States.

The following summarizes our contractual obligations:

(in thousands)	For the Year Ending September 30,					Total
	2013	2014	2015	2016	2018 and thereafter	
Payment obligations by year						
Line of credit	\$-	\$2,382	\$-	\$-	\$-	\$2,382
Term loan	1,200	400	92			1,692
Subordinated promissory note	224	93	21	-	-	338
Capital leases	248	100	27	-	-	375
Operating leases (a)	1,416	1,172	1,015	836	1,441	5,880
Contingent acquisition payments						
(b)	893	802	165	-	-	1,860
Contingent acquisition payments						
(c)	165	-	-	-	-	165
Total	\$4,146	\$4,949	\$1,320	\$836	\$1,441	\$12,692

(a) Net of sublease income

(b) The contingent acquisition payments are maximum potential earn-out consideration payable to former owners of acquired companies. Amounts actually paid may be less. Contingent acquisition payments do not include \$1.4 million of potential common stock issuable upon achievement of certain revenue and earnings targets.

(c) Potential contingent acquisition payments related to acquisitions completed prior to January 1, 2009 and not currently recorded. Contingent payments will be recorded when and if earned.

Critical Accounting Policies

These critical accounting policies and estimates by our management should be read in conjunction with Note 2 Summary of Significant Accounting Policies to the Consolidated Financial Statements that were prepared in accordance with accounting principles generally accepted in the United States of America ("US GAAP").

The preparation of financial statements in accordance US GAAP requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses in the reporting period. We regularly make estimates and assumptions that affect the reported amounts of assets and liabilities. The most significant estimates included in our financial statements are the valuation of accounts receivable and long-term assets, including intangibles, goodwill and deferred tax assets, stock-based compensation, amounts of revenue to be recognized on service contracts in progress, unbilled receivables, and deferred revenue. We base our estimates and assumptions on current facts, historical experience and various other factors that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the accrual of costs and expenses that are not readily apparent from other sources. The actual results experienced by us may differ materially and adversely from our estimates. To the extent there are material differences between our estimates and the actual results, our future results of operations will be affected.

We consider the following accounting policies to be both those most important to the portrayal of our financial condition and those that require the most subjective judgment:

- Revenue recognition

- Allowance for doubtful accounts;
- Accounting for cost of computer software to be sold, leased or otherwise marketed;
- Accounting for goodwill and other intangible assets; and
- Accounting for stock-based compensation.

Revenue Recognition

Overview

We enter into arrangements to sell web application development services (professional services), software licenses or combinations thereof. Revenue is categorized into (i) Web Application Development Services (ii) Managed Service Hosting, and (iii) Subscriptions and Perpetual Licenses.

We recognize revenue as required by the Revenue Recognition Topic of the Codification. Revenue is generally recognized when all of the following conditions are satisfied: (1) there is persuasive evidence of an arrangement; (2) delivery has occurred or the services have been provided to the customer; (3) the amount of fees to be paid by the customer is fixed or determinable; and (4) the collection of the fees is reasonably assured. Billings made or payments received in advance of providing services are deferred until the period these services are provided.

During fiscal 2010, we began to develop a reseller channel to supplement our direct sales force for our iAPPS platform. We continued to develop this reseller channel in fiscal 2012. Resellers are generally located in territories where we do not have a direct sales force. Customers generally sign a license agreement directly with us. Revenue from perpetual licenses sold through resellers is recognized upon delivery to the end user as long as evidence of an arrangement exists, collectability is probable, and the fee is fixed and determinable. Revenue for subscription licenses is recognized monthly as the services are delivered.

Web Application Development Services

Web application development services include professional services primarily related to the Company's web development solutions that address specific customer needs such as information architecture and usability engineering, interface configuration, application development, rich media development, back end integration, search engine optimization, and project management.

Web application development services are contracted for on either a fixed price or time and materials basis. For its fixed price engagements, after assigning the relative selling price to the elements of the arrangement, the Company applies the proportional performance model (if not subject to contract accounting) to recognize revenue based on cost incurred in relation to total estimated cost at completion. The Company has determined that labor costs are the most appropriate measure to allocate revenue among reporting periods, as they are the primary input when providing application development services. Customers are invoiced monthly or upon the completion of milestones. For milestone based projects, since milestone pricing is based on expected hourly costs and the duration of such engagements is relatively short, this input approach principally mirrors an output approach under the proportional performance model for revenue recognition on such fixed priced engagements. For time and materials contracts, revenues are recognized as the services are provided.

Web application development services also include retained professional services contracted for on an "on call" basis or for a certain amount of hours each month. Such arrangements generally provide for a guaranteed availability of a number of professional services hours each month on a "use it or lose it" basis. For retained professional services sold on a stand-alone basis we recognize revenue as the services are delivered or over the term of the contractual retainer period. These arrangements do not require formal customer acceptance and do not grant any future right to labor hours contracted for but not used.

Managed Service Hosting

Managed service hosting includes hosting arrangements that provide for the use of certain hardware and infrastructure for those customers who do not wish to host our applications independently. Hosting agreements are either annual or month-to-month arrangements that provide for termination for convenience by either party generally upon 30-days notice. Revenue is recognized monthly as the hosting services are delivered. Set up fees paid by customers in connection with managed hosting services are deferred and recognized ratably over the longer of the life of the hosting period or the expected lives of customer relationships. We continue to evaluate the length of the amortization period of the set up fees as we gain more experience with customer contract renewals.

Subscriptions and Perpetual Licenses

The Company licenses its software on either a perpetual or subscription basis. Customers who license the software on a perpetual basis receive rights to use the software for an indefinite time period and an option to purchase post-customer support (“PCS”). For arrangements that consist of a perpetual license and PCS, as long as Vendor Specific Objective Evidence (“VSOE”) exists for the PCS, then PCS revenue is recognized ratably on a straight-line basis over the period of performance and the perpetual license is recognized on a residual basis. Under the residual method, the fair value of the undelivered elements are deferred and the remaining portion of the arrangement fee is allocated to the delivered elements and recognized as revenue, assuming all other revenue recognition criteria have been met.

Customers may also license the software on a subscription basis, which can be described as “Software as a Service” or “SaaS”. SaaS is a model of software deployment where an application is hosted as a service provided to customers across the Internet. Subscription agreements include access to the Company’s software application via an internet connection, the related hosting of the application, and PCS. Customers receive automatic updates and upgrades, and new releases of the products as soon as they become available. Customers cannot take possession of the software.

Subscription agreements are either annual or month-to-month arrangements that provide for termination for convenience by either party upon 90 days notice. Revenue is recognized monthly as the services are delivered. Set up fees paid by customers in connection with subscription services are deferred and recognized ratably over the longer of the life of subscription period or the expected lives of customer relationships. We continue to evaluate the length of the amortization period of the set up fees as we gain more experience with customer contract renewals.

Multiple Element Arrangements

In accounting for multiple element arrangements, we follow either ASC Topic 605-985 Revenue Recognition Software or ASC Topic 605-25 Revenue Recognition Multiple Element Arrangements, as applicable.

In October 2009, the FASB issued Accounting Standards Update No. 2009-13, Revenue Recognition: Multiple-Deliverable Revenue Arrangements (“ASU 2009-13”). ASU 2009-13 provides amendments to certain paragraphs of previously issued ASC Subtopic 605-25 – Revenue Recognition: Multiple-Deliverable Revenue Arrangements. In accordance with ASU 2009-13, each deliverable within a multiple-deliverable revenue arrangement is accounted for as a separate unit of accounting if both of the following criteria are met (1) the delivered item has value to the customer on a standalone basis and (2) for an arrangement that includes a right of return relative to the delivered item, delivery or performance of the delivered item is considered probable and within our control. If the deliverables do not meet the criteria for being a separate unit of accounting then they are combined with a deliverable that does meet that criterion. The accounting guidance also requires that arrangement consideration be allocated at the inception of an arrangement to all deliverables using the relative selling price method. The accounting guidance also establishes a selling price hierarchy for determining the selling price of a deliverable. We determine selling price using VSOE, if it exists; otherwise, we use Third-party Evidence (“TPE”). If neither VSOE nor TPE of selling price exists for a unit of accounting, we use Estimated Selling Price (“ESP”).

VSOE is generally limited to the price at which we sell the element in a separate stand-alone transaction. TPE is determined based on the prices charged by our competitors for a similar deliverable when sold separately. It is difficult for us to obtain sufficient information on competitor pricing, so we may not be able to substantiate TPE. If we cannot establish selling price based on VSOE or TPE then we will use ESP. ESP is derived by considering the selling price for similar services and our ongoing pricing strategies. The selling prices used in our allocations of arrangement consideration are analyzed at minimum on an annual basis and more frequently if our business necessitates a more timely review. We have determined that we have VSOE on our SaaS offerings, certain application development services, managed hosting services, and PCS because we have evidence of these elements sold on a stand-alone basis.

When the Company licenses its software on a perpetual basis in a multiple element arrangement that arrangement typically includes PCS and application development services, we follow the guidance of ASC Topic 605-985. In assessing the hierarchy of relative selling price for PCS, we have determined that VSOE is established for PCS. VSOE for PCS is based on the price of PCS when sold separately, which has been established via annual renewal rates. Similarly, when the Company licenses its software on a perpetual basis in a multiple element arrangement that also includes managed service hosting (“hosting”), we have determined that VSOE is established for hosting based on the price of the hosting when sold separately, which has been established based on renewal rates of the hosting contract. Revenue recognition for perpetual licenses sold with application development services are considered on a case by case basis. The Company has not established VSOE for perpetual licenses or fixed price development services and therefore in accordance with ASC Topic 605-985, when perpetual licenses are sold in

multiple element arrangements including application development services where VSOE for the services has not been established, the license revenue is deferred and recognized using contract accounting. The Company has determined that services are not essential to the functionality of the software and it has the ability to make estimates necessary to apply percentage-of-completion accounting. In those cases where perpetual licenses are sold in a multiple element arrangement that includes application development services where VSOE for the services has been established, the license revenue is recognized under the residual method and the application services are recognized upon delivery.

In determining VSOE for the application development services element, the separability of the application development services from the software license and the value of the services when sold on a standalone basis are considered. The Company also considers the categorization of the services, the timing of when the services contract was signed in relation to the signing of the perpetual license contract and delivery of the software, and whether the services can be performed by others. The Company has concluded that its application development services are not required for the customer to use the product but, rather enhance the benefits that the software can bring to the customer. In addition, the services provided do not result in significant customization or modification of the software and are not essential to its functionality, and can also be performed by the customer or a third party. If an application development services arrangement does qualify for separate accounting, the Company recognizes the perpetual license on a residual basis. If an application development services arrangement does not qualify for separate accounting, the Company recognizes the perpetual license under the proportional performance model as described above.

When subscription arrangements are sold with application development services, the Company uses its judgment as to whether the application development services qualify as a separate unit of accounting. When subscription service arrangements involve multiple elements that qualify as separate units of accounting, the Company allocates arrangement consideration in multiple-deliverable arrangements at the inception of an arrangement to all deliverables based on the relative selling price model in accordance with the selling price hierarchy, which includes: (i) VSOE when available; (ii) TPE if VSOE is not available; and (iii) ESP if neither VSOE or TPE is available. For those subscription arrangements sold with multiple elements whereby the application development services do not qualify as a separate unit of accounting, the application services revenue is recognized ratably over the subscription period. Subscriptions also include a PCS component, and the Company has determined that the two elements cannot be separated and must be recognized as one unit over the applicable service period. Set up fees paid by customers in connection with subscription arrangements are deferred and recognized ratably over the longer of the life of the hosting period or the expected lives of customer relationships, which generally range from two to three years. We continue to evaluate the length of the amortization period of the set up fees as we gain more experience with customer contract renewals and our newer product offerings.

Customer Payment Terms

Payment terms with customers typically require payment 30 days from invoice date. Payment terms may vary by customer but generally do not exceed 45 days from invoice date. Invoicing for web application development services are either monthly or upon achievement of milestones and payment terms for such billings are within the standard terms described above. Invoicing for subscriptions and hosting are typically issued monthly and are generally due in the month of service.

Our agreements with customers do not provide for any refunds for services or products and therefore no specific reserve for such is maintained. In the infrequent instances where customers raise concerns over delivered products or services, we have endeavored to remedy the concern and all costs related to such matters have been insignificant in all periods presented.

Warranty

Certain arrangements include a warranty period, which is generally 30 days from the completion of work. In hosting arrangements, we provide warranties of up-time reliability. We continue to monitor the conditions that are subject to the warranties to identify if a warranty claim may arise. If we determine that a warranty claim is probable, then any related cost to satisfy the warranty obligation is estimated and accrued. Warranty claims to date have been immaterial.

Reimbursable Expenses

In connection with certain arrangements, reimbursable expenses are incurred and billed to customers and such amounts are recognized as both revenue and cost of revenue.

Allowance for Doubtful Accounts

We maintain an allowance for doubtful accounts which represents estimated losses resulting from the inability, failure or refusal of our clients to make required payments.

We analyze historical percentages of uncollectible accounts and changes in payment history when evaluating the adequacy of the allowance for doubtful accounts. We use an internal collection effort, which may include our sales and services groups as we deem appropriate. Although we believe that our allowances are adequate, if the financial

condition of our clients deteriorates, resulting in an impairment of their ability to make payments, or if we underestimate the allowances required, additional allowances may be necessary, resulting in increased expense in the period in which such determination is made.

Accounting for Cost of Computer Software to be Sold, Leased or Otherwise Marketed

We charge research and development expenditures for technology development to operations as incurred. However, in accordance with Codification 985-20 Costs of Software to be Sold Leased or Otherwise Marketed, we capitalize certain software development costs subsequent to the establishment of technological feasibility. Based on our product development process, technological feasibility is established upon completion of a working model. Certain costs incurred between completion of a working model and the point at which the product is ready for general release are capitalized if significant. Once the product is available for general release, the capitalized costs are amortized in cost of sales.

Accounting for Goodwill and Intangible Assets

Goodwill is tested for impairment annually during the fourth quarter of every year and more frequently if events and circumstances indicate that the asset might be impaired. In assessing goodwill for impairment, an entity has the option to assess qualitative factors to determine whether events or circumstances indicate that it is not more likely than not that the fair value of a reporting unit is less than its carrying amount. We assess goodwill at the consolidated level as one reporting unit. If this is the case, then performing the quantitative two-step goodwill impairment test is unnecessary. An entity can choose not to perform a qualitative assessment for any or all of its reporting units, and proceed directly to the use of the two-step impairment test. In assessing qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount, we assess relevant events and circumstances that may impact the fair value and the carrying amount of a reporting unit. The identification of relevant events and circumstances and how these may impact a reporting unit's fair value or carrying amount involve significant judgments by management. These judgments include the consideration of macroeconomic conditions, industry and market considerations, cost factors, overall financial performance, events which are specific to Bridgeline, and trends in the market price of our common stock. Each factor is assessed to determine whether it impacts the impairment test positively or negatively, and the magnitude of any such impact.

For fiscal 2012 we performed the annual assessment of our goodwill during the fourth quarter of fiscal 2012, using the qualitative approach described above. Based on our qualitative assessment, we concluded that it was not more likely than not that the fair values of any of our reporting units were less than their carrying amounts, and therefore it was not necessary to perform the quantitative two-step impairment test. The key qualitative factors that led to our conclusion included the following: (i) our stock price more than doubled to \$1.20 as of September 30, 2012. (ii) our strategic alliance with UPS Logistics and the successful launch of iAPPS ds with our first iAPPS ds customer, a franchisor with over 4,000 locations, has improved the predictability of our forecasts and (iii) inputs from recent transactions within the technology sector, such a revenue multiples used to value transactions, have either remained steady or improved since the fiscal 2011 assessment.

In the fiscal 2011's assessment, though our stock price declined from \$1.22 at September 30, 2010 (the date of the fiscal 2010 annual test) to \$0.53 at September 30, 2011, we did not consider the decline in stock price a triggering event as:

- Our performance since the last annual test has not deteriorated as both revenue and gross profit have increased and loss from operations was greater compared to fiscal 2010 due the Company's decision to invest in its iAPPS platform.
- The significant decrease in stock price is relatively recent as the stock price was \$1.44 at December 31, 2010, \$1.10 at March 31, 2011, and \$0.95 at June 30, 2011 and is not related to a change in the market conditions that would affect the Company.

At September 30, 2011 (the date of the fiscal 2011 annual test), the fair value exceeded the carrying value by \$4.3 million. This margin was based on a weighting applied to four different valuation methods which result in fair values ranging from \$24.6 million to \$27.2 million before the weightings were applied. Had the four methodologies been weighted differently, the percentage by which the fair value exceeded the carrying value may have been larger.

The factors we considered important that could indicate impairment include its stock price, significant under performance relative to prior operating results, change in projections, significant changes in the manner of our use of assets or the strategy for our overall business, and significant negative industry or economic trends.

In evaluating goodwill impairment, we considered a number of factors including discounted cash flow projections, guideline public company comparisons, acquisition transactions of comparable third party companies and capitalization value. Evaluating the potential impairment of goodwill is highly subjective and requires us to make significant estimates and judgment at many points during the analysis, especially with regard to our future cash flows.

For the fiscal 2010 annual test, we weighted the Market Approach–Direct Market Capitalization Method 75% in its evaluation of the fair value of our one reporting unit, which was a decrease from the 90% weighting used in fiscal 2009. For the fiscal 2011 annual test, we reduced the weighting further to 25% as the low level of market activity and substantial variation in price quotations based on the low activity of our stock support the view that our stock was inactive. The key assumption included in the Market Approach–Direct Market Capitalization Method was a control premium of 150%. This control premium was primarily based on an analysis of control premiums from a study of guideline merger and acquisition transactions. Specifically, the implied revenue multiples (the most commonly used valuation method for mergers and acquisitions in the technology industry) from the guideline transactions averaged 2.4 times revenue. The control premium of 150% implies a revenue multiple of 0.9 which the Company's management believes is reasonable and conservative. The control premium assumption of 150% was also corroborated by an analysis of potential synergies which could be realized by a market participant in an acquisition transaction. Using this control premium resulted in the fair value determined by the Market Approach–Direct Market Capitalization Method exceeding carrying value by \$2.5 million. We believe the most significant change in circumstances that could affect the key assumptions in its valuation is a significant reduction in the observed revenue multiples implied by future mergers and acquisitions.

While there are inherent limitations in any valuation, we believe that placing a significant weighting of 75% on the Discounted Cash Flow Method, the Guideline Public Company Method, and the Guideline Transaction Method are more indicative of the fair value, or the price, that the Company would be sold at in an orderly transaction between market participants. We believe the most significant change in circumstances that could affect the key assumptions in our valuation are a significant reduction in the observed revenue multiples implied by future mergers and acquisitions and/or a significant deterioration of the projected financial performance.

During the twelve month period ended September 30, 2011, the carrying value of goodwill increased as a result of the acquisitions of TMX and e.Magination (both of which included contingent earnout payments recorded at the time of the transaction) and the accrual of contingent acquisition payments related to acquisitions completed prior to September 30, 2009 (which are recorded as increases to goodwill as they are earned but not currently recorded). During the twelve month period ended September 30, 2012, the carrying value of goodwill increased as a result of the acquisitions of Magnetic and Marketnet (both of which included contingent earnout payments recorded at the time of the transaction) and the accrual of contingent acquisition payments related to acquisitions completed prior to September 30, 2009 (which are recorded as increases to goodwill as they are earned but not currently recorded). We are obligated to continue paying quarterly contingent acquisition payments to former owners of companies acquired before January 1, 2009 in the amount of \$165 thousand based on the achievement of certain predefined operating metrics. If such payments are earned they will be recorded as an increase to goodwill. To the extent goodwill continues to increase as a result of such payments and to the extent there are unfavorable changes in assumptions used to determine the fair value of the company (including a decline in market capitalization), there can be no assurance that we will not have an impairment charge in the future.

Accounting for Stock-Based Compensation

At September 30, 2012, we maintained one stock-based compensation plan more fully described in Note 11.

The Company accounts for stock compensation awards in accordance with the Compensation-Stock Compensation Topic of the Codification. Share-based payments (to the extent they are compensatory) are recognized in our consolidated statements of operations based on their fair values.

We recognize stock-based compensation expense for share-based payments issued or assumed after October 1, 2006 that are expected to vest on a straight-line basis over the service period of the award, which is generally three years. We recognize the fair value of the unvested portion of share-based payments granted prior to October 1, 2006 over the remaining service period, net of estimated forfeitures. In determining whether an award is expected to vest, we use an estimated, forward-looking forfeiture rate based upon our historical forfeiture rate and reduce the expense over the recognition period. Estimated forfeiture rates are updated for actual forfeitures quarterly. We also consider, each quarter, whether there have been any significant changes in facts and circumstances that would affect our forfeiture rate. Although we estimate forfeitures based on historical experience, actual forfeitures in the future may differ. In addition, to the extent our actual forfeitures are different than our estimates, we record a true-up for the difference in the period that the awards vest, and such true-ups could materially affect our operating results.

We estimate the fair value of employee stock options using the Black-Scholes-Merton option valuation model. The fair value of an award is affected by our stock price on the date of grant as well as other assumptions including the estimated volatility of our stock price over the term of the awards and the estimated period of time that we expect employees to hold their stock options. The risk-free interest rate assumption we use is based upon United States treasury interest rates appropriate for the expected life of the awards. We use the historical volatility of our publicly traded options in order to estimate future stock price trends. In order to determine the estimated period of time that we expect employees to hold their stock options, we use historical trends of employee turnovers. Our expected dividend rate is zero since we do not currently pay cash dividends on our common stock and do not anticipate doing so in the

foreseeable future. The aforementioned inputs entered into the option valuation model we use to fair value our stock awards are subjective estimates and changes to these estimates will cause the fair value of our stock awards and related stock-based compensation expense we record to vary.

We record deferred tax assets for stock-based awards that result in deductions on our income tax returns, based on the amount of stock-based compensation recognized and the statutory tax rate in the jurisdiction in which we will receive a tax deduction.

Stock Options Activity (Repricing Plan)

On October 28, 2011, the Company offered its employees the opportunity to have certain outstanding options modified by (i) reducing the grant exercise price to \$0.67, the fair market value of the common stock as of the modification date and (ii) starting a new three year vesting schedule. The aggregate fair value of the modified options of approximately \$90 thousand was calculated using the difference in value between the original terms and the new terms as of the modification date. The incremental cost of the modified option over the original option will be recognized as additional compensation expense over the new three year vesting period beginning on the date of modification. This opportunity was generally limited to options issued subsequent to October 2008.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Not required.

Item 8. Financial Statements and Supplementary Data.

Report of Independent Registered Public Accounting Firm

To the Board of Directors of
Bridgeline Digital, Inc:

We have audited the consolidated balance sheets of Bridgeline Digital, Inc. (the “Company”) as of September 30, 2012 and 2011, and the related consolidated statements of operations, stockholders’ equity, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Bridgeline Digital, Inc. as of September 30, 2012 and 2011, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

BRIDGELINE DIGITAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except share and per share data)

1. Description of Business

Overview

Bridgeline Digital, The Digital Engagement Company™, enables its customers to maximize the performance of their mission critical websites, intranets, and online stores. Bridgeline is the developer of the award-winning iAPPS Web Engagement Management (WEM) product platform and related digital solutions. The iAPPS platform deeply integrates Web Content Management, eCommerce, eMarketing, and web Analytics capabilities within the heart of websites or eCommerce web stores to help marketers deliver online experiences that attract, engage, and convert their customers across all digital channels. Bridgeline's iAPPS platform combined with its digital services assists customers in maximizing on-line revenue, improving customer service and loyalty, enhancing employee knowledge, and reducing operational costs.

The iAPPS platform is delivered through a Cloud-based SaaS ("Software as a Service") multi-tenant business model, whose flexible architecture provides customers with state of the art deployment providing maintenance, daily technical operation and support; or via a traditional perpetual licensing business model, in which the iAPPS software resides on a dedicated server in either the customer's facility or Bridgeline's co-managed hosting facility.

In 2012, KMWorld Magazine Editors selected Bridgeline Digital as one of the 100 Companies That Matter in Knowledge Management and also selected iAPPS as a Trend Setting Product in 2010, 2011 and 2012. iAPPS Content Manager and iAPPS Commerce were selected as finalists for the 2011 and 2012 CODiE Awards for Best Content Management Solution and Best Electronic Commerce Solution, globally. iAPPS Content Manager was the winner of the 2010 CODiE Award for Best Content Management Solution, globally. B2B Interactive has selected Bridgeline Digital as one of the Top Interactive Technology companies in the United States for the past four consecutive years.

Bridgeline's team of Microsoft® Gold Certified developers specialize in end-to-end interactive technology solutions which include digital strategy, user-centered design, rich media development, .NET development, and search engine optimization.

Bridgeline Digital was incorporated under the laws of the State of Delaware on August 28, 2000.

Locations

The Company's corporate office is located north of Boston, Massachusetts. The Company maintains regional field offices serving the following geographical locations: Atlanta, GA; Baltimore, MD; Boston, MA; Chicago, IL; Denver, CO; New York, NY; Philadelphia, PA; Dallas, TX; and Tampa, FL. The Company has one wholly-owned subsidiary, Bridgeline Digital Pvt. Ltd. located in Bangalore, India.

2. Summary of Significant Accounting Policies

Basis of Presentation and Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant inter-company accounts and transactions have been eliminated.

BRIDGELINE DIGITAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except share and per share data)

Use of Estimates

The preparation of financial statements in conformity with US GAAP requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reported periods. The most significant estimates included in these financial statements are the valuation of accounts receivable and long-term assets, including intangibles, goodwill and deferred tax assets, stock-based compensation, amounts of revenue to be recognized on service contracts in progress, unbilled receivables, and deferred revenue. Actual results could differ from these estimates under different assumptions or conditions.

The complexity of the estimation process and factors relating to assumptions, risks and uncertainties inherent with the use of the proportional performance model affect the amount of revenue and related expenses reported in the Company's financial statements. Internal and external factors can affect the Company's estimates.

Cash and Cash Equivalents

The Company considers all highly liquid instruments with original maturity of three months or less from the date of purchase to be cash equivalents.

Concentration of Credit Risk, Significant Customers, and Off-Balance Sheet Risk

Financial instruments, which potentially expose the Company to concentrations of credit risk consist primarily of cash, cash equivalents, and accounts receivable. The Company's cash is maintained with what management believes to be a high-credit quality financial institution. At times, deposits held at this bank may exceed the federally insured limits. Management believes that the financial institutions that hold the Company's deposits are financially sound and have minimal credit risk. Risks associated with cash and cash equivalents are mitigated by the Company's investment policy, which limits the Company's investing of excess cash into only money market mutual funds.

The Company extends credit to customers on an unsecured basis in the normal course of business. Management performs ongoing credit evaluations of its customers' financial condition and limits the amount of credit when deemed necessary. Accounts receivable are carried at original invoice less an estimate for doubtful accounts based on a review of all outstanding amounts. The Company did not have any customers that contributed greater than 10% of revenue for the fiscal years ended September 30, 2012 ("fiscal 2012") and 2011 ("fiscal 2011"), respectively.

The Company has no significant off-balance sheets risks such as foreign exchange contracts, interest rate swaps, option contracts or other foreign hedging agreements.

Allowance for Doubtful Accounts

The Company maintains allowances for doubtful accounts for estimated losses resulting from the inability of its customers to make required payments. For all customers, the Company recognizes allowances for doubtful accounts based on the length of time that the receivables are past due, current business environment and its historical experience. If the financial condition of the Company's customers were to deteriorate, resulting in impairment of their ability to make payments, additional allowances may be required. The Company did not have any customers that had an accounts receivable balance of greater than 10% of total accounts receivable at September 30, 2012 and 2011.

Revenue Recognition

Overview

The Company enters into arrangements to sell web application development services (professional services), software licenses or combinations thereof. Revenue is categorized into (i) Web Application Development Services (ii) Managed Service Hosting, and (iii) Subscriptions and Perpetual Licenses.

The Company recognizes revenue as required by the Revenue Recognition Topic of the Codification. Revenue is generally recognized when all of the following conditions are satisfied: (1) there is persuasive evidence of an arrangement; (2) delivery has occurred or the services have been provided to the customer; (3) the amount of fees to be paid by the customer is fixed or determinable; and (4) the collection of the fees is reasonably assured. Billings made or payments received in advance of providing services are deferred until the period these services are provided.

During fiscal 2010, The Company began to develop a reseller channel to supplement our direct sales force for our iAPPS platform. The Company continued to develop this reseller channel in fiscal 2012. Resellers are generally located in territories where The Company does not have a direct sales force. Customers generally sign a license agreement directly with The Company. Revenue from perpetual licenses sold through resellers is recognized upon delivery to the end user as long as evidence of an arrangement exists, collectability is probable, and the fee is fixed and determinable. Revenue for subscription licenses is recognized monthly as the services are delivered.

Web Application Development Services

Web application development services include professional services primarily related to the Company's web development solutions that address specific customer needs such as information architecture and usability engineering, interface configuration, application development, rich media development, back end integration, search engine optimization, and project management.

Web application development services are contracted for on either a fixed price or time and materials basis. For its fixed price engagements, after assigning the relative selling price to the elements of the arrangement, the Company applies the proportional performance model (if not subject to contract accounting) to recognize revenue based on cost incurred in relation to total estimated cost at completion. The Company has determined that labor costs are the most appropriate measure to allocate revenue among reporting periods, as they are the primary input when providing application development services. Customers are invoiced monthly or upon the completion of milestones. For milestone based projects, since milestone pricing is based on expected hourly costs and the duration of such engagements is relatively short, this input approach principally mirrors an output approach under the proportional performance model for revenue recognition on such fixed priced engagements. For time and materials contracts, revenues are recognized as the services are provided.

Web application development services also include retained professional services contracted for on an "on call" basis or for a certain amount of hours each month. Such arrangements generally provide for a guaranteed availability of a number of professional services hours each month on a "use it or lose it" basis. For retained professional services sold on a stand-alone basis we recognize revenue as the services are delivered or over the term of the contractual retainer period. These arrangements do not require formal customer acceptance and do not grant any future right to labor hours contracted for but not used.

BRIDGELINE DIGITAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except share and per share data)

Managed Service Hosting

Managed service hosting includes hosting arrangements that provide for the use of certain hardware and infrastructure for those customers who do not wish to host The Company's applications independently. Hosting agreements are either annual or month-to-month arrangements that provide for termination for convenience by either party generally upon 30-days notice. Revenue is recognized monthly as the hosting services are delivered. Set up fees paid by customers in connection with managed hosting services are deferred and recognized ratably over the longer of the life of the hosting period or the expected lives of customer relationships. The Company will continue to evaluate the length of the amortization period of the set up fees as The Company gains more experience with customer contract renewals.

Subscriptions and Perpetual Licenses

The Company licenses its software on either a perpetual or subscription basis. Customers who license the software on a perpetual basis receive rights to use the software for an indefinite time period and an option to purchase post-customer support ("PCS"). For arrangements that consist of a perpetual license and PCS, as long as Vendor Specific Objective Evidence ("VSOE") exists for the PCS, then PCS revenue is recognized ratably on a straight-line basis over the period of performance and the perpetual license is recognized on a residual basis. Under the residual method, the fair value of the undelivered elements are deferred and the remaining portion of the arrangement fee is allocated to the delivered elements and recognized as revenue, assuming all other revenue recognition criteria have been met.

Customers may also license the software on a subscription basis, which can be described as "Software as a Service" or "SaaS". SaaS is a model of software deployment where an application is hosted as a service provided to customers across the Internet. Subscription agreements include access to the Company's software application via an internet connection, the related hosting of the application, and PCS. Customers receive automatic updates and upgrades, and new releases of the products as soon as they become available. Customers cannot take possession of the software. Subscription agreements are either annual or month-to-month arrangements that provide for termination for convenience by either party upon 90 days notice. Revenue is recognized monthly as the services are delivered. Set up fees paid by customers in connection with subscription services are deferred and recognized ratably over the longer of the life of subscription period or the expected lives of customer relationships. The Company continues to evaluate the length of the amortization period of the set up fees as The Company gains more experience with customer contract renewals.

Multiple Element Arrangements

In accounting for multiple element arrangements, we follow either ASC Topic 605-985 Revenue Recognition Software or ASC Topic 605-25 Revenue Recognition Multiple Element Arrangements, as applicable.

In October 2009, the FASB issued Accounting Standards Update No. 2009-13, Revenue Recognition: Multiple-Deliverable Revenue Arrangements ("ASU 2009-13"). ASU 2009-13 provides amendments to certain paragraphs of previously issued ASC Subtopic 605-25 – Revenue Recognition: Multiple-Deliverable Revenue Arrangements. In accordance with ASU 2009-13, each deliverable within a multiple-deliverable revenue arrangement is accounted for as a separate unit of accounting if both of the following criteria are met (1) the delivered item has value to the customer on a standalone basis and (2) for an arrangement that includes a right of return relative to the

delivered item, delivery or performance of the delivered item is considered probable and within our control. If the deliverables do not meet the criteria for being a separate unit of accounting then they are combined with a deliverable that does meet that criterion. The accounting guidance also requires that arrangement consideration be allocated at the inception of an arrangement to all deliverables using the relative selling price method. The accounting guidance also establishes a selling price hierarchy for determining the selling price of a deliverable. We determine selling price using VSOE, if it exists; otherwise, we use Third-party Evidence (“TPE”). If neither VSOE nor TPE of selling price exists for a unit of accounting, we use Estimated Selling Price (“ESP”).

BRIDGELINE DIGITAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except share and per share data)

VSOE is generally limited to the price at which we sell the element in a separate stand-alone transaction. TPE is determined based on the prices charged by The Company's competitors for a similar deliverable when sold separately. It is difficult for us to obtain sufficient information on competitor pricing, so we may not be able to substantiate TPE. If we cannot establish selling price based on VSOE or TPE then we will use ESP. ESP is derived by considering the selling price for similar services and our ongoing pricing strategies. The selling prices used in the Company's allocations of arrangement consideration are analyzed at minimum on an annual basis and more frequently if our business necessitates a more timely review. The Company has determined that The Company has VSOE on our SaaS offerings, certain application development services, managed hosting services, and PCS because we have evidence of these elements sold on a stand-alone basis.

When the Company licenses its software on a perpetual basis in a multiple element arrangement that arrangement typically includes PCS and application development services, we follow the guidance of ASC Topic 605-985. In assessing the hierarchy of relative selling price for PCS, we have determined that VSOE is established for PCS. VSOE for PCS is based on the price of PCS when sold separately, which has been established via annual renewal rates. Similarly, when the Company licenses its software on a perpetual basis in a multiple element arrangement that also includes managed service hosting ("hosting"), we have determined that VSOE is established for hosting based on the price of the hosting when sold separately, which has been established based on renewal rates of the hosting contract. Revenue recognition for perpetual licenses sold with application development services are considered on a case by case basis. The Company has not established VSOE for perpetual licenses or fixed price development services and therefore in accordance with ASC Topic 605-985, when perpetual licenses are sold in multiple element arrangements including application development services where VSOE for the services has not been established, the license revenue is deferred and recognized using contract accounting. The Company has determined that services are not essential to the functionality of the software and it has the ability to make estimates necessary to apply percentage-of-completion accounting. In those cases where perpetual licenses are sold in a multiple element arrangement that includes application development services where VSOE for the services has been established, the license revenue is recognized under the residual method and the application services are recognized upon delivery.

In determining VSOE for the application development services element, the separability of the application development services from the software license and the value of the services when sold on a standalone basis are considered. The Company also considers the categorization of the services, the timing of when the services contract was signed in relation to the signing of the perpetual license contract and delivery of the software, and whether the services can be performed by others. The Company has concluded that its application development services are not required for the customer to use the product but, rather enhance the benefits that the software can bring to the customer. In addition, the services provided do not result in significant customization or modification of the software and are not essential to its functionality, and can also be performed by the customer or a third party. If an application development services arrangement does qualify for separate accounting, the Company recognizes the perpetual license on a residual basis. If an application development services arrangement does not qualify for separate accounting, the Company recognizes the perpetual license under the proportional performance model as described above.

BRIDGELINE DIGITAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except share and per share data)

When subscription arrangements are sold with application development services, the Company uses its judgment as to whether the application development services qualify as a separate unit of accounting. When subscription service arrangements involve multiple elements that qualify as separate units of accounting, the Company allocates arrangement consideration in multiple-deliverable arrangements at the inception of an arrangement to all deliverables based on the relative selling price model in accordance with the selling price hierarchy, which includes: (i) VSOE when available; (ii) TPE if VSOE is not available; and (iii) ESP if neither VSOE or TPE is available. For those subscription arrangements sold with multiple elements whereby the application development services do not qualify as a separate unit of accounting, the application services revenue is recognized ratably over the subscription period. Subscriptions also include a PCS component, and the Company has determined that the two elements cannot be separated and must be recognized as one unit over the applicable service period. Set up fees paid by customers in connection with subscription arrangements are deferred and recognized ratably over the longer of the life of the hosting period or the expected lives of customer relationships, which generally range from two to three years. The Company continues to evaluate the length of the amortization period of the set up fees as we gain more experience with customer contract renewals and our newer product offerings.

Customer Payment Terms

Payment terms with customers typically require payment 30 days from invoice date. Payment terms may vary by customer but generally do not exceed 45 days from invoice date. Invoicing for web application development services are either monthly or upon achievement of milestones and payment terms for such billings are within the standard terms described above. Invoicing for subscriptions and hosting are typically issued monthly and are generally due in the month of service.

The Company's agreements with customers do not provide for any refunds for services or products and therefore no specific reserve for such is maintained. In the infrequent instances where customers raise concerns over delivered products or services, the Company has endeavored to remedy the concern and all costs related to such matters have been insignificant in all periods presented.

Warranty

Certain arrangements include a warranty period, which is generally 30 days from the completion of work. In hosting arrangements, the Company provides warranties of up-time reliability. The Company continues to monitor the conditions that are subject to the warranties to identify if a warranty claim may arise. If it is determined that a warranty claim is probable, then any related cost to satisfy the warranty obligation is estimated and accrued. Warranty claims to date have been immaterial.

Reimbursable Expenses

In connection with certain arrangements, reimbursable expenses are incurred and billed to customers and such amounts are recognized as both revenue and cost of revenue.

Equipment and Improvements

The components of equipment are stated at cost, net of accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful lives of the related assets (three to five years). Leasehold improvements

are amortized using the straight-line method over the lesser of the estimated useful life of the asset or the lease term. Repairs and maintenance costs are expensed as incurred.

Internal Use Software

Costs incurred in the preliminary stages of development are expensed as incurred. Once an application has reached the development stage, internal and external costs, if direct and incremental, are capitalized until the software is substantially complete and ready for its intended use. Capitalization ceases upon completion of all substantial testing. The Company also capitalizes costs related to specific upgrades and enhancements when it is probable that the expenditures will result in additional functionality. Capitalized costs are recorded as part of equipment and improvements. Training costs are expensed as incurred. Internal use software is amortized on a straight-line basis over its estimated useful life, generally three years.

BRIDGELINE DIGITAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except share and per share data)

Research and Development and Software Development Costs

Costs for research and development of a product to sell, lease or otherwise market are charged to operations as incurred until technological feasibility has been established. Once technological feasibility has been established, certain software development costs incurred during the application development stage are eligible for capitalization. Based on the Company's product development process, technological feasibility is established upon completion of a working model.

Software development costs that are capitalized are amortized to cost of sales over the estimated useful life of the software, typically three years. Capitalization ceases when a product is available for general release to customers. Capitalization costs are included in other assets in the consolidated financial statements. The Company capitalized \$557 thousand and \$59 thousand of costs in fiscal 2012 and fiscal 2011, respectively.

Intangible Assets

All intangible assets have finite lives and are stated at cost, net of amortization. Amortization is computed over the estimated useful life of the related assets on a straight-line method as follows:

Description	Estimated Useful Life (years)		
Developed and core technology	3		
Non-compete agreements	3	-	6
Customer relationships	5	-	6
Trademarks and trade names	10		

Business Combinations

During the year ended September 30, 2010 ("fiscal 2010"), the Company adopted ASC 805, Business Combinations, which revised the accounting guidance required to apply to acquisitions in comparison to prior fiscal years. The principles are similar to the previous guidance, as goodwill is recognized separately from the assets acquired and the liabilities assumed. Under the new guidance, the assets acquired and the liabilities assumed are measured at fair value at the acquisition date instead of relying on a cost allocation method per the original guidance. While the Company uses its best judgment to assign fair value, estimates are subject to refinement. The refinement period is one year from acquisition date. Adjustments are recorded to the assets acquired and liabilities assumed, with the corresponding offset to goodwill. Any subsequent adjustments made after the one year refinement period are charged to the consolidated statement of operations.

As a result of adopting the revised accounting guidance provided by ASC 805 as of the beginning of fiscal 2010, certain of the Company's policies differ from those used when accounting for acquisitions prior to fiscal 2010, including the following:

- The direct transaction costs associated with the business combination are expensed as incurred (prior to fiscal 2010, direct transaction costs were included as part of the purchase price);

The costs to exit or restructure certain activities of an acquired company are accounted for separately (prior to fiscal 2010, these exit and restructuring costs were included as a part of the assumed liabilities when calculating the purchase price);

- Any adjustments to estimates associated with income tax valuation allowances or uncertain tax positions after the measurement period are generally recognized as income tax expense (prior to fiscal 2010, any such adjustment was generally included a part of the purchase price allocation indefinitely).

Goodwill

Goodwill is tested for impairment annually during the fourth quarter of every year and more frequently if events and circumstances indicate that the asset might be impaired. In assessing goodwill for impairment, an entity has the option to assess qualitative factors to determine whether events or circumstances indicate that it is not more likely than not that the fair value of a reporting unit is less than its carrying amount. We assess goodwill at the consolidated level as one reporting unit. If this is the case, then performing the quantitative two-step goodwill impairment test is unnecessary. An entity can choose not to perform a qualitative assessment for any or all of its reporting units, and proceed directly to the use of the two-step impairment test. In assessing qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount, we assess relevant events and circumstances that may impact the fair value and the carrying amount of a reporting unit. The identification of relevant events and circumstances and how these may impact a reporting unit's fair value or carrying amount involve significant judgments by management. These judgments include the consideration of macroeconomic conditions, industry and market considerations, cost factors, overall financial performance, events which are specific to the company, and trends in the market price of our common stock. Each factor is assessed to determine whether it impacts the impairment test positively or negatively, and the magnitude of any such impact.

BRIDGELINE DIGITAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except share and per share data)

For fiscal 2012 we performed the annual assessment of our goodwill during the fourth quarter of 2012, using the qualitative approach described above. Based on our qualitative assessment, we concluded that it was not more likely than not that the fair values of any of our reporting units were less than their carrying amounts, and therefore it was not necessary to perform the quantitative two-step impairment test. The key qualitative factors that led to our conclusion included the following: (i) our stock price more than doubled to \$1.20 as of September 30, 2012. (ii) our strategic alliance with UPS Logistics and the successful launch of iAPPS ds with our first iAPPS ds customer, a franchisor with over 4,000 locations, has improved predictability of our forecasts and (iii) inputs from recent transactions within the technology sector, such as revenue multiples used to value transactions, have either remained steady or improved since the fiscal 2011 assessment

In fiscal 2011, though the Company's stock price declined from \$1.22 at September 30, 2010 (the date of the fiscal 2011 annual test) to \$0.53 at September 30, 2012, the Company did not consider the decline in stock price a triggering event because:

- The Company's performance since the last annual test has not deteriorated as both revenue and gross profit have increased and loss from operations was greater compared to fiscal 2010 due the Company's decision to invest in its iAPPS platform.
- The significant decrease in stock price is relatively recent as the stock price was \$1.44 at December 31, 2010, \$1.10 at March 31, 2011, and \$0.95 at June 30, 2011 and is not related to a change in the market conditions that would affect the Company.

At September 30, 2011 (the date of the fiscal 2011 annual test), the fair value exceeded the carrying value by \$4.3 million. This margin was based on a weighting applied to four different valuation methods which result in fair values ranging from \$24.6 million to \$27.2 million before the weightings were applied. Had the four methodologies been weighted differently, the percentage by which the fair value exceeded the carrying value may have been larger.

The factors the Company considers important that could indicate impairment include its stock price, significant under performance relative to prior operating results, change in projections, significant changes in the manner of the Company's use of assets or the strategy for the Company's overall business, and significant negative industry or economic trends.

In evaluating goodwill impairment, the Company considers a number of factors including discounted cash flow projections, guideline public company comparisons, acquisition transactions of comparable third party companies and capitalization value. Evaluating the potential impairment of goodwill is highly subjective and requires the Company to make significant estimates and judgment at many points during the analysis, especially with regard to the Company's future cash flows.

For the fiscal 2010 annual test, the Company weighted the Market Approach–Direct Market Capitalization Method 75% in its evaluation of the fair value of the Company's one reporting unit, which was a decrease from the 90% weighting used in fiscal 2009. For the fiscal 2011 annual test, the Company reduced the weighting further to 25% as the low level of market activity and substantial variation in price quotations based on the low activity of the Company's stock support the view that the Company's stock is inactive. The key assumption included in the Market Approach–Direct Market Capitalization Method was a control premium of 150%. This control premium was primarily based on an analysis of control premiums from a study of guideline merger and acquisition transactions. Specifically,

the implied revenue multiples (the most commonly used valuation method for mergers and acquisitions in the technology industry) from the guideline transactions averaged 2.4 times revenue. The control premium of 150% implies a revenue multiple of 0.9, which the Company believes is reasonable and conservative. The control premium assumption of 150% was also corroborated by an analysis of potential synergies which could be realized by a market participant in an acquisition transaction. Using this control premium resulted in the fair value determined by the Market Approach–Direct Market Capitalization Method exceeding carrying value by \$2.5 million. The Company’s management believes the most significant change in circumstances that could affect the key assumptions in its valuation is a significant reduction in the observed revenue multiples implied by future mergers and acquisitions.

BRIDGELINE DIGITAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except share and per share data)

While there are inherent limitations in any valuation, the Company believes that placing a significant weighting of 75% on the Discounted Cash Flow Method, the Guideline Public Company Method, and the Guideline Transaction Method are more indicative of the fair value, or the price, that the Company would be sold at in an orderly transaction between market participants. The Company believes the most significant change in circumstances that could affect the key assumptions in our valuation are a significant reduction in the observed revenue multiples implied by future mergers and acquisitions and/or a significant deterioration of the Company's projected financial performance.

For all acquisitions completed before September 30, 2009, the Company records contingent consideration as additional purchase price and goodwill when earned. Such contingent consideration is unrelated to continuing employment with the Company and meets all other relevant criteria. Upon the adoption of ASC 805, during fiscal 2010, for acquisitions completed after October 1, 2009, the Company records contingent consideration payments as additional purchase price and goodwill at the acquisition date. Any adjustment made after the one year refinement period will be charged to the consolidated statement of operations.

Valuation of Long-Lived Assets

The Company periodically reviews its long-lived assets, which consist primarily of property and equipment and intangible assets with finite lives, for impairment whenever events or changes in circumstances indicate the carrying amount of such assets may exceed their fair value. Recoverability of these assets is assessed using a number of factors including operating results, business plans, budgets, economic projections and undiscounted cash flows.

In addition, the Company's evaluation considers non-financial data such as market trends, product development cycles and changes in management's market emphasis. For the definite-lived intangible asset impairment review, the carrying value of the intangible assets is compared against the estimated undiscounted cash flows to be generated over the remaining life of the intangible assets. During fiscal 2012, the Company impaired \$281 thousand for an related to an asset assumed from our fiscal 2010 acquisition of e.Magination and its wholly-owned subsidiary eMagination IG, LLC (now Bridgeline Intelligence Group, Inc (See note 6)

Deferred Revenue

Deferred revenue includes post customer support ("PCS") and services billed in advance. PCS revenue, whether sold separately or as part of a multiple element arrangement, is deferred and recognized ratably over the term of the maintenance contract, generally 12 months. Payments made for PCS fees are generally made in advance and are nonrefundable. Revenue from consulting and training services is recognized as the related services are performed, using a proportional performance model.

Fair Value of Financial Instruments

The fair value of cash and cash equivalents and trade receivables approximates their carrying values due to their short maturities. The fair value of non-current assets and liabilities approximate their carrying value unless otherwise stated. The fair value of subordinated debt, bank term loans and credit lines also approximate their carrying values.

In accordance with FASB ASC Topic 820, "Fair Value Measurements and Disclosures", the estimated fair values of amounts reported in the consolidated financial statements have been determined using available market information and valuation methodologies, as applicable. Fair value is defined as the exchange price that would be received for an

asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Entities are required to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value based on the following value hierarchy:

BRIDGELINE DIGITAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except share and per share data)

Level 1 Quoted prices in active markets for identical assets or liabilities;

Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities; and

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Foreign Currency

The Company determines the appropriate method of measuring assets and liabilities as to whether the method should be based on the functional currency of the entity in the environment it operates or the reporting currency of the Company, the U.S. dollar. The Company has determined that the functional currency of its Indian subsidiary is the Rupee. Assets and liabilities are translated into U.S. dollars at exchange rates in effect at the balance sheet date. Revenue and expense items are translated into U.S. dollars at average exchange rates for the period. The adjustments are recorded as a separate component of stockholders' equity and are included in accumulated other comprehensive income (loss). The Company's foreign currency translation net losses for fiscal 2012 and 2011 were not material.

Segment Information

The Company operates internally as one reportable operating segment because all of the Company's locations have similar economic characteristics.

Stock-Based Compensation

The Company accounts for stock compensation awards in accordance with the Compensation-Stock Compensation Topic of the Codification. Share-based payments (to the extent they are compensatory) are recognized in the consolidated statements of operations based on their fair values.

Valuation of Stock Options and Warrants Issued to Non-Employees

The Company measures expense for non-employee stock-based compensation and the estimated fair value of options exchanged in business combinations and warrants issued for services using the fair value method for services received or the equity instruments issued, whichever is more readily measured. The Company estimated the fair value of stock options issued to non-employees using the Black-Scholes Merton option valuation model.

The Company estimated the fair value of common stock warrants issued to non-employees using the binomial options pricing model. The Company evaluates common stock warrants as they are issued to determine whether they should be classified as an equity instrument or a liability. Those warrants that are classified as a liability are carried at fair value at each reporting date, with changes in their fair value recorded in other income (expense) in the consolidated statements of operation.

Advertising Costs

Advertising costs are expensed when incurred. Such costs were \$836 thousand and \$563 thousand for fiscal 2012 and 2011, respectively.

BRIDGELINE DIGITAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except share and per share data)

Employee Benefits

The Company sponsors a contributory 401(k) plan covering all full-time employees who meet prescribed service requirements. The Company is not required to make matching contributions, although the plan provides for discretionary contributions by the Company. The Company made no contributions in either fiscal 2012 or fiscal 2011.

Income Taxes

The Company recognizes deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the Company's financial statements and tax returns. Deferred income taxes are recognized based on temporary differences between the financial statement and tax basis of assets and liabilities using enacted tax rates in effect for the year in which the temporary differences are expected to reverse. Valuation allowances are provided if based upon the weight of available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized.

The Company provides for reserves for potential payments of taxes to various tax authorities related to uncertain tax positions. Reserves are based on a determination of whether and how much of a tax benefit taken by the Company in its tax filings or positions is "more likely than not" to be realized following resolution of any uncertainty related to the tax benefit, assuming that the matter in question will be raised by the tax authorities. Interest and penalties associated with uncertain tax positions are included in the provision for income taxes.

The Company does not provide for U.S. income taxes on the undistributed earnings of its Indian subsidiary, which the Company considers to be permanent investments.

Comprehensive Loss

The Company's comprehensive loss is comprised of net loss and foreign currency translation adjustments.

Net Income (Loss) Per Share

Basic net income (loss) per share is computed by dividing net income (loss) available to common shareholders by the weighted average number of common shares outstanding. Diluted net income per share is computed using the weighted average number of common shares outstanding during the period plus the dilutive effect of outstanding stock options and warrants using the "treasury stock" method. The computation of diluted earnings per share does not include the effect of outstanding stock options and warrants that are anti-dilutive.

Recent Accounting Pronouncements

In December 2011, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update 2011-11 ("ASU 2011-11"), Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities. This amendment requires disclosing and reconciling gross and net amounts for financial instruments that are offset in the balance sheet, and amounts for financial instruments that are subject to master netting arrangements and other similar clearing and repurchase arrangements. ASU 2011-11 is effective for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. The adoption of ASU 2011-11 will not have a material impact on the Company's disclosures.

In July 2012, the FASB issued Accounting Standards Update No. 2012-02, Testing Indefinite-Lived Intangible Assets for Impairment (“ASU No. 2012-02”), which allows entities to use a qualitative approach to test indefinite-lived intangible assets for impairment. ASU No. 2012-02 permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of the indefinite-lived intangible asset is less than its carrying value. If it is concluded that this is the case, it is necessary to perform the currently prescribed quantitative impairment test. Otherwise, the quantitative impairment test is not required. ASU No. 2012-02 is effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. The Company early adopted ASU No. 2012-02 and it did not have a material impact on the Company’s financial position or results of operations.

BRIDGELINE DIGITAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except share and per share data)

3. Accounts Receivable and Unbilled Receivables

Accounts receivable and unbilled receivables consists of the following:

	September 30,	
	2012	2011
Accounts receivable	\$3,794	\$4,197
Unbilled receivables	381	365
Subtotal	4,175	4,562
Allowance for doubtful accounts	(198)	(288)
Accounts receivable and unbilled receivables, net	\$3,977	\$4,274

4. Equipment and Improvements

Equipment and improvements consists of the following:

	September 30,	
	2012	2011
Furniture and fixtures	\$1,471	\$1,052
Purchased software	866	817
Computers and equipment	2,882	2,583
Leasehold improvements	1,791	622
Total cost	7,010	5,074
Less accumulated depreciation	(4,275)	(3,295)
Equipment and improvements, net	\$2,735	\$1,779

Included above are assets acquired under capitalized leases of \$1.2 million and \$1.0 million at September 30, 2012 and 2011, respectively, with accumulated depreciation of \$795 thousand and \$520 thousand, respectively.

5. Acquisitions

Marketnet, Inc.

On May 31, 2012, the Company completed the acquisition of Marketnet, Inc. ("Marketnet"), an interactive technology company based in Dallas, Texas. Bridgeline acquired all of the outstanding capital stock of Marketnet for consideration consisting of (i) \$20 thousand in cash and (ii) assumption of debt of \$244 thousand and (ii) contingent consideration of up to \$650 thousand in cash and 204,331 shares of Bridgeline Digital common stock. The cash consideration was further reduced by \$142 thousand due to the Seller's inability to meet an agreed upon target for working capital. This contingent consideration is payable quarterly over the 12 consecutive calendar quarters following the acquisition, contingent upon the acquired business achieving certain quarterly revenue and quarterly operating income targets during the period. To the extent that either the quarterly revenue target or the quarterly operating income target is not met in a particular quarter, the earn-out period will be extended for up to four additional quarters. Marketnet is also eligible to earn additional bonus equity consideration of 200,000 shares, if annual net revenues of the acquired business exceed a certain threshold in any fiscal year through September 30, 2015. The Company is required to assess the probability of the acquired business achieving the contingent cash and stock

payments which requires management to make estimates and judgments based on forecasts of future performance. As a result, the Company estimated and accrued \$607 thousand of the contingent cash consideration to be achieved and \$262 thousand of the contingent stock consideration (valued at \$1.38 per share) to be achieved. The contingent common stock has been issued and is being held in escrow pending satisfaction of the applicable targets. Marketnet's operating results are reflected in the Company's condensed consolidated financial statements as of the acquisition date.

BRIDGELINE DIGITAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except share and per share data)

Magnetic Corporation

On October 3, 2011, the Company completed the acquisition of Magnetic Corporation (“Magnetic”), a web technology company based in Tampa, Florida. Bridgeline acquired all of the outstanding capital stock of Magnetic for consideration consisting of (i) \$150 thousand in cash and (ii) contingent consideration of up to \$600 thousand in cash and 166,666 shares of Bridgeline Digital common stock, valued at \$150 thousand (\$0.90 per share). The cash consideration was further reduced by \$100 thousand due to the Seller’s inability to meet an agreed upon target for working capital. The contingent consideration is payable quarterly over the 12 consecutive calendar quarters following the acquisition, contingent upon the acquired business achieving certain quarterly revenue and quarterly operating income targets during the period. The contingent common stock has been issued and is being held in escrow pending satisfaction of the applicable targets. To the extent that either the quarterly revenue target or the quarterly operating income target is not met in a particular quarter, the earn-out period will be extended for up to four additional quarters. The Company is required to assess the probability of the acquired business achieving the contingent cash and stock payments which requires management to make estimates and judgments based on forecasts of future performance. As a result, the Company estimated and accrued \$600 thousand of the contingent cash consideration to be achieved and \$150 thousand of the contingent stock consideration to be achieved. Magnetic’s operating results are reflected in the Company’s condensed consolidated financial statements as of the acquisition date, which corresponds to the Company’s commencement of fiscal 2012.

The estimated fair value of net assets acquired from the acquisitions of Marketnet and Magnetic are summarized as follows:

	Amount
Net assets acquired:	
Cash	\$35
Accounts Receivable, net	363
Other Assets	265
Fixed Assets	91
Intangible Assets	1,030
Goodwill	1,175
Total Assets	2,959
Current Liabilities	1,199
Liabilities, net of current	73
Total liabilities assumed	1,272
Net assets acquired:	\$1,687
Purchase Price:	
Cash Paid	\$70
Contingent earnouts - payable in cash	1,206
Contingent earnouts - payable in common stock	411
	\$1,687

As part of the Magnetic acquisition, of the \$430 thousand allocated to intangible assets, \$350 thousand is allocated to customer relationships and \$80 thousand is allocated to non-compete agreements, with an average useful life of five years.

As part of the Marketnet acquisition, of the \$600 thousand allocated to intangible assets, \$440 thousand is allocated to customer relationships and \$160 thousand is allocated to non-compete agreements, with an average useful life of five years. These amounts are preliminary and will be adjusted when the formal valuations are completed.

BRIDGELINE DIGITAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except share and per share data)

The goodwill recorded as a result of the Magnetic and Marketnet acquisitions are nondeductible for tax purposes.

Contingent earnout liabilities for acquisitions completed after January 1, 2009 were recorded at fair value based on valuation models that utilize relevant factors such as estimated probabilities of the acquisitions achieving the performance targets throughout the earnout period. The following table summarizes the changes in earnout liabilities for the fiscal year ended September 30, 2012:

Balance at September 30, 2011	\$1,067
Contingent earnout liability accruals	1,458
Contingent earnout liability payments	(437)
Contingent earnout liability valuation adjustment	(723)
Balance at September 30, 2012	\$1,365

The following unaudited pro forma financial information reflects the combined results of operations for Bridgeline for the fiscal years ended September 30, 2012 and 2011. This information does not necessarily reflect the results of operations that would have occurred had the acquisitions taken place at the beginning of the period, and is not necessarily indicative of the results which may be obtained in the future (in thousands, except per share data):

	Year Ended September 30,	
	2012	2011
Total revenue	\$28,019	\$31,268
Net loss	(1,020)	(678)
Net loss per share		
Basic and diluted	\$(0.08)	\$(0.06)
Number of weighted average shares		
Basic and diluted	13,135,178	12,311,433

6. Intangible Assets

Changes in the carrying amount of intangible assets are as follows:

	September 30, 2012			
	Gross Amount	Accumulated Amortization	Impairment	Net Amount
Intangible assets:				
Domain and trade names	\$26	\$ (26)	\$-	\$-

Total intangible assets	\$4,422	\$ (2,895) \$-	\$1,527

BRIDGELINE DIGITAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except share and per share data)

Total amortization expense related to intangible assets for the years ended September 30, 2012 and 2011 is reflected in the Company's Consolidated Statements of Operations as follows:

	September 30, 2012	2011
Cost of revenue	\$-	\$29
Operating expense (a)	1,030	736
Total	\$1,030	\$765

(a) Included in operating expense for fiscal 2012 was a charge to operations of \$281 thousand for an impairment charge related to an asset assumed from our fiscal 2010 acquisition of e.Magination and its wholly-owned subsidiary e.Magination IG, LLC (now Bridgeline Intelligence Group, Inc). In the first quarter of fiscal 2012, the Company stopped servicing low margin non-iAPPS opportunities acquired from e.Magination IG, LLC. It was therefore determined that a portion of the customer list was impaired.

The estimated amortization expense for fiscal years 2013, 2014, 2015, 2016 and thereafter is, in thousands: \$494, \$376, \$317, \$193 and \$147, respectively.

7. Goodwill

Changes in the carrying amount of goodwill follows:

	September 30, 2012	2011
Balance at beginning of period	\$20,122	\$20,036
Acquisitions	1,175	-
Contingent acquisition payments	248	3
Purchase price allocation adjustments	-	83
Balance at end of period	\$21,545	\$20,122

8. Accrued Liabilities

Accrued liabilities consist of the following:

	September 30, 2012	2011
Compensation and benefits	\$671	\$386
Subcontractors	49	92
Professional fees	252	231
Deferred rent	205	141
Lease abandonment	45	80
Other	84	151
Total	\$1,306	\$1,081

BRIDGELINE DIGITAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except share and per share data)

Deferred Rent

In connection with new leases entered into in fiscal 2012 for the Company's headquarters in Burlington, Massachusetts and a new location in New York, the Company made investments in leasehold improvements at these locations of approximately \$1.3 million, of which the respective landlords funded approximately \$857 thousand. The improvements funded by the landlords are treated as lease incentives. Accordingly, the funding received from the landlords was recorded as fixed asset additions and a deferred rent liability on the Consolidated Balance Sheet. The deferred rent liability is being amortized as a reduction of rent expense over the lives of the leases. As of September 30, 2012, \$121 thousand was reflected in Accrued Liabilities and \$640 thousand is reflected in Other Long Term Liabilities on the Consolidated Balance Sheet as deferred rent liabilities. The capitalized leasehold improvements are being amortized over the initial lives of each lease.

9. Debt

Debt consists of the following:

	September 30,	
	2012	2011
Line of credit borrowings	\$2,382	\$2,392
Bank term loan	1,692	2,000
Subordinated promissory notes	338	375
Total debt	\$4,412	\$4,767
Less current portion	\$1,424	\$1,750
Long term debt, net of current portion	\$2,988	\$3,017

Line of Credit

In September 2008, the Company entered into a Loan and Security Agreement (the "SVB Agreement") with Silicon Valley Bank ("SVB") that provided for a revolving working capital line of credit of up to the lesser of (i) \$1.25 million and (ii) 80% of eligible accounts receivable, subject to specified adjustments. Borrowings under the credit line were due in September 2009 and subject to interest at prime plus 1.0%. Borrowings were secured by all of the Company's accounts receivable, investment property and financial assets.

In December 2008, the Company amended its Loan and Security Agreement with SVB (the "Amendment"). The Amendment extended the term of the SVB Agreement to December 28, 2009 and increased availability under the credit line to the lesser of (i) \$3.0 million and (ii) 80% of eligible accounts receivable, subject to specified adjustments. Borrowings were subject to interest at prime plus 2.0%, with a minimum interest rate of 8.0% and were secured by all of the Company's assets. At September 30, 2009, the Company had an outstanding balance under the credit line of \$1 million at 8% (prime was 3.25%) which was repaid in October 2009. The Company obtained an extension of this Amendment to March 31, 2010.

In March 2010, the Company entered into an Amended and Restated Loan and Security Agreement with SVB (the "Loan Agreement"). The Loan Agreement has a two year term which expires on March 31, 2012. The Loan Agreement provides for up to \$5 million of revolving credit advances, of which \$3.0 million may be used for acquisitions and up to \$5.0 million may be used for working capital purposes. Borrowings are limited to the lesser of (i) \$5 million and (ii)

80% of eligible receivables as defined. In the event that the borrowing base formula results in less than \$5 million in available borrowing, the Company can borrow up to \$2.0 million in out of formula borrowings (provided such amount does not exceed \$5 million) for specified periods of time. Borrowings bear interest at SVB's prime plus 1.00% or 1.25%, depending on the level of the adjusted EBITDA, as defined. The Company pays an annual commitment fee of 0.50% and an unused fee of 0.25%. Borrowings are secured by all of the Company's assets and all of the Company's intellectual property. The Company is also required to comply with certain financial and performance covenants. The Loan Agreement replaced the Company's prior credit facility with SVB, which expired on March 31, 2010.

In May 2011, the Company amended its loan arrangement (the "Amendment") with Silicon Valley Bank ("SVB"). Under the terms of the existing agreement with SVB, the Company's line of credit was limited to the lesser of (i) \$5 million and (ii) 80% of eligible receivables as defined, and up to \$2 million could be borrowed in out of formula borrowings for specified periods of time (provided the total amount outstanding does not exceed \$5 million).

BRIDGELINE DIGITAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except share and per share data)

The Amendment: (i) extended the maturity date of the line of credit for one year to March 31, 2013; (ii) revised certain financial covenants; and (iii) amended the out of formula borrowings to be structured as a \$2 million term loan and interest on the term loan will be at SVB's prime rate plus 1.75%. Interest on the term loan was paid until April 1, 2012 and on and after April 2, 2012, principal and interest on the term loan was being paid over 36 months ending on April 1, 2015. In May 2012, we amended our loan agreement (the "2012 Amendment") with SVB, extending the maturity date of the line of credit for one year to March 31, 2014. The 2012 Amendment also revised a financial covenant, increasing our minimum liquidity requirement. Minimum liquidity is defined as funds held with SVB plus borrowing availability on our line of credit.

At September 30, 2012, the Company had an outstanding balance under the credit line of \$2.4 million and \$1.7 million outstanding on the term loan, of which \$0.8 million was repaid in October 2012.

Subordinated Promissory Note

In May 2010, in connection with the acquisition of TMX, the Company issued a \$500 thousand subordinated promissory note ("the Note") payable to TMX. The Note is subordinated to the Company's primary lender (Silicon Valley Bank) and is payable in twelve quarterly installments of \$42 thousand, plus interest at 1%, with the first payment due on January 15, 2011. The Note may be paid in whole or in part at any time without discount, premium, or penalty.

In May 2012, the Company assumed two Promissory Notes in connection with the acquisition of Marketnet, Inc. The first Promissory Note in the amount of \$63 thousand is payable in eight equal installments of \$8 thousand, including interest accrued at 5%, and matures in May 2014. The first installment was due in July 2012. The second Promissory Note in the amount of \$80 thousand is payable in twelve equal installments of \$7 thousand, including interest accrued at 5%, and matures in May 2015. The first installment was due in July 2012.

As of September 30, 2012, the Company had the following minimum debt obligation payments remaining:

	Amount
Year Ending September 30,	
2013	\$ 1,424
2014	2,875
2015	113
2016	-
2017	-
Total	\$4,412
Less interest at a weighted average of 1.00%	10
Total debt obligations	\$4,402

BRIDGELINE DIGITAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except share and per share data)

Capital Lease Obligation

	September 30,	
	2012	2011
Capital lease obligations	\$357	\$431
Less: Current portion	(230)	(216)
Capital lease obligations	\$127	\$215

As of September 30, 2012, the Company's future minimum lease payments due under capitalized lease obligations due in fiscal 2013, 2014, and 2015 consist of \$248 thousand, \$99 thousand and \$10 thousand, respectively.

10. Commitments and Contingencies

Litigation

The Company is subject to ordinary routine litigation and claims incidental to its business. As of September 30, 2012, Bridgeline was not engaged with any material legal proceedings, except as described below.

Bridgeline Digital, Inc vs. e.Magination network, LLC and its principal owner, Daniel Roche.

In August 2010, Bridgeline initiated a lawsuit against e.Magination network, LLC and its principal owner, Daniel Roche, in the Federal District Court of Massachusetts. Bridgeline seeks damages for accounts receivable allegedly collected by Mr. Roche and e.Magination and used to pay obligations of e.Magination and Mr. Roche (accounts receivable contractually belonging to Bridgeline). e.Magination and Mr. Roche have asserted counterclaims against Bridgeline and Thomas Massie alleging that Bridgeline has breached Mr. Roche's employment agreement by improperly terminating Mr. Roche for cause and also alleging breach of the Asset Purchase Agreement by Bridgeline. In November 2012 we agreed to enter into mediation with Mr. Roche. As of the date of this filing there has been no progress in the mediation..

Ingeniador, LLC vs. Interwoven, Inc., Bridgeline Digital, Inc., et al

On April 26, 2012, the Company was informed that on such date the United States District Court for the District of Puerto Rico entered a default judgment against the Company as part of a patent infringement lawsuit brought by Ingeniador, LLC against 16 companies, including Bridgeline. On June 15, 2012 the court granted our request to have the default judgment set aside and dismissed the case. On October 10, 2012 the Company entered into a Covenant Not to Sue Agreement (the "CNTS") with Ingeniador, LLC, for no monetary consideration, whereby both the Company and Ingeniador, LLC agreed to avoid seeking any further legal disputes and mutually release and dismiss all pending claims as long as the Company does not encourage and/or participate in a challenge to the validity or enforceability of Ingeniador's patent unless required by law. In addition, both the Company and Ingeniador attested that the CNTS itself does not represent any admission or acknowledgement of any kind in relation to the validity of Ingeniador's claim of patent infringement.

Operating Lease Commitments

We lease our facilities in the United States and India. During the quarter ended December 31, 2011, the Company signed a new office lease for its Burlington, MA corporate office location. The lease term expires in January 2019, with future minimum lease payments totaling \$1.8 million.

Future minimum rental commitments under non-cancelable operating leases with initial or remaining terms in excess of one year at September 30, 2012 were as follows:

BRIDGELINE DIGITAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except share and per share data)

	Amount
Year Ending September 30,	
2013	\$ 1,416
2014	1,172
2015	1,015
2016	836
2017 and thereafter	1,441
Total	\$5,880

Rent expense for fiscal 2012 and 2011 was approximately \$1.4 million for each fiscal year, exclusive of sublease income of \$22 thousand and \$36 thousand for fiscal 2012 and 2011, respectively.

Lease Restructuring

During the three months ended September 30, 2011, the Company exited its leased office space in Arlington, Virginia, and consolidated the Arlington operations with its Baltimore, Maryland office. As a result, the Company recorded a charge of \$115 thousand which is reflected in General and administrative expense on its Consolidated Statements of Operations. This charge consists of contractual rental commitments and related costs, offset by sub-lease income. The term of the restructured lease ends in May 2014. Cash outlay over the next 12 months is expected to be \$45 thousand.

Other Commitments, Guarantees, and Indemnification Obligations

The Company frequently warrants that the technology solutions it develops for its clients will operate in accordance with the project specifications without defects for a specified warranty period, subject to certain limitations that the Company believes are standard in the industry. In the event that defects are discovered during the warranty period, and none of the limitations apply, the Company is obligated to remedy the defects until the solution that the Company provided operates within the project specifications. The Company is not typically obligated by contract to provide its clients with any refunds of the fees they have paid, although a small number of its contracts provide for the payment of liquidated damages upon default. The Company has purchased insurance policies covering professional errors and omissions, property damage and general liability that reduce its monetary exposure for warranty-related claims and enable it to recover a portion of any future amounts paid.

The Company's contracts typically provide for testing and client acceptance procedures that are designed to mitigate the likelihood of warranty-related claims, although there can be no assurance that such procedures will be effective for each project. The Company has not paid any material amounts related to warranties for its solutions. The Company sometimes commits unanticipated levels of effort to projects to remedy defects covered by its warranties. The Company's estimate of its exposure to warranties on contracts is immaterial as of September 30, 2012.

The Company's agreements with customers generally require the Company to indemnify the customer against claims in which the Company's products infringe third-party patents, copyrights, or trademarks and indemnify against product liability matters. As of September 30, 2012 and 2011, respectively, the Company has not experienced any losses related to the indemnification obligations and no significant claims with respect thereto were outstanding. The Company does not expect significant claims related to the indemnification obligations and, consequently, concluded that the fair value of these obligations is negligible, and no related reserves were established.

BRIDGELINE DIGITAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except share and per share data)

11. Shareholder's Equity

On May 31, 2012, the Company sold 2,173,913 shares of common stock at \$1.15 per share for gross proceeds of \$2.5 million in a private placement. Net proceeds to the Company after offering expenses were approximately \$2.3 million. In addition, the Company issued the placement agent and its affiliates five year warrants to purchase an aggregate of 217,913 shares of Bridgeline's common stock at a price equal to \$1.40 per share. There are no plans to register the common stock issued in this offering, however in the event the Company does register other Common stock, the Company agreed to provide piggyback registration rights with respect to the shares of common stock sold in the offering and underlying the warrants.

In connection with the acquisition of Marketnet on May 31, 2012, contingent consideration of 204,331 shares of Bridgeline Digital common stock is contingently issuable to the sole stockholder of Marketnet. The contingent consideration is payable quarterly over the 12 consecutive calendar quarters following the acquisition, contingent upon the acquired business achieving certain operating and revenue targets. The common stock has been issued and is being held in escrow pending satisfaction of the applicable earnout targets. In addition, Marketnet is also eligible to earn additional equity consideration of 200,000 shares of Bridgeline Digital common stock if a certain annual revenue threshold is met in any fiscal year during the next three years.

In connection with the acquisition of Magnetic Corporation on October 3, 2011, contingent consideration of 166,666 shares of Bridgeline Digital common stock is contingently issuable to the sole stockholder of Magnetic. The contingent consideration is payable quarterly over the 12 consecutive calendar quarters following the acquisition, contingent upon the acquired business achieving certain operating and revenue targets. The common stock has been issued and is being held in escrow pending satisfaction of the applicable earnout targets. For the nine months ended June 30, 2012, the sole stockholder of Magnetic earned 41,666 shares of common stock.

In order to increase employee retention and morale, in October 2011, the Company offered its employees the opportunity to have certain outstanding options modified by (i) reducing the grant exercise price to \$0.67, the fair market value of the common stock as of the modification date and (ii) starting a new three year vesting schedule. The aggregate fair value of the modified options of approximately \$90 thousand was calculated using the difference in value between the original terms and the new terms as of the modification date. The incremental cost of the modified option over the original option will be recognized as additional compensation expense over the new three year vesting period beginning on the date of modification. This opportunity was generally limited to options issued subsequent to the October 2008 repricing described in Note 11 to the Company's Annual Report on Form 10-K for fiscal 2011. Options to purchase a total of 697,667 shares of common stock were exchanged for new grants in the October 28, 2011 repricing.

On October 29, 2010, the Company sold 1,000,000 shares of common stock at \$1.00 per share for gross proceeds of \$1,000,000 in a private placement. Net proceeds to the Company after offering expenses were approximately \$857,000. The placement agents also received a four year warrant exercisable for 64,000 shares of the Company's common stock at a price equal to \$1.45 per share. In return for such warrants, the placement agents agreed to cancel certain outstanding warrants to purchase shares of the Company's common stock previously issued to such placement agents to purchase 71,231 shares of the Company's common stock at a price of \$5.00 per share and 57,000 shares of the Company's common stock at a price of \$7.50 per share.

The Company has granted common stock, common stock warrants, and common stock option awards (the “Equity Awards”) to employees, consultants, advisors and debt holders of the Company and to former owners and employees of acquired companies that have become employees of the Company. At September 30, 2012, the Company maintained one stock option plan and one employee stock purchase plan.

BRIDGELINE DIGITAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except share and per share data)

Amended and Restated Stock Incentive Plan

Effective March 2011, the Company's Amended and Restated Stock Incentive Plan (the "Plan") provides for the issuance of up to 3.3 million shares of common stock. The Plan authorizes the award of incentive stock options, non-statutory stock options, restricted stock, unrestricted stock, performance shares, stock appreciation rights and any combination thereof to employees, officers, directors, consultants, independent contractors and advisors of the Company. Options granted under the Plan may be granted with contractual lives of up to ten years. There were 2,989,620 options outstanding reserved under the Plan as of September 30, 2012 and 310,380 shares available for future issuance.

2001 Lead Dog Stock Option Plan

In connection with the Company's merger with Lead Dog in February 2002, the Company assumed Lead Dog's 2001 Stock Option Plan (the "Lead Dog Plan"). Options under the Lead Dog Plan may be granted for periods of up to ten years and at prices no less than the fair market value of the shares on the date of grant. There were 7,419 options reserved for issuance under the Lead Dog Plan as of February 2012. The Lead Dog Plan expired in February 2012.

Employee Stock Purchase Plan

On April 12, 2012, the Company's stockholders approved and adopted the Bridgeline Digital, Inc. 2012 Employee Stock Purchase Plan (the "ESPP"). Under the terms of the ESPP, the Company will grant eligible employees the right to purchase shares of Bridgeline common stock through payroll deductions at a price equal to 85% of the fair market value of Bridgeline common stock on the purchase termination date of defined offering or purchase periods. Each offering period is six months in duration. The ESPP permits the Company to offer up to 300,000 shares of common stock. The maximum number of shares of common stock that may be purchased by all participants in any purchase period may not exceed 150,000 shares. The first purchase period is June 2012 through November 2012.

Common Stock Warrants

In July 2007, the Company issued 150,000 warrants to the underwriter's of the Company's initial public offering (the "IPO Warrants") with an original exercise price of \$7.50 per share. In October 2010, 57,000 IPO warrants were cancelled (see below). After adjustments for anti-dilution provisions, the IPO Warrants are exercisable to purchase shares of the Company's common stock at an exercise price of \$7.39. The IPO Warrants expired in July 2012.

On October 21, 2010, the Company issued 50,000 common stock warrants to purchase shares of the Company's common stock to a non-employee consultant as compensation for services rendered. The warrants vested over a one year period and expire on October 15, 2015. Of the warrants issued, 25,000 are exercisable at an exercise price of \$1.00 per share and 25,000 are exercisable at an exercise price of \$2.00 per share.

On October 29, 2010, the Company issued four year warrants to the placement agent in the Company's private placement. The warrants are exercisable to purchase 64,000 shares of the Company's common stock at a price equal to \$1.45 per share. In return for such warrants, the placement agent agreed to cancel 71,231 warrants issued to the placement agent in April 2006 and 57,000 IPO Warrants.

On May 31, 2012, the Company issued five year warrants to the placement agent in the Company's private placement. The warrants are exercisable to purchase 217,931 shares of the Company's common stock at a price equal

to \$1.40 per share.

As of September 30, 2012: (i) placement agent warrants to purchase 64,000 shares and 217,931 at an exercise price of \$1.45 and \$1.40 respectively are outstanding; and (ii) warrants issued to a non-employee consultant to purchase 25,000 shares at an exercise price of \$1.00 and 25,000 shares at an exercise price of \$2.00 are outstanding.

BRIDGELINE DIGITAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except share and per share data)

Effective October 1, 2009, the Company changed its method of accounting for its common stock warrants to comply with the guidance in ASC 815-40-15 “Derivatives and Hedging” (formerly Emerging Issues Task force EITF 07-05). ASC 815-40-15 requires many common stock awards that were previously treated as equity to be accounted for as liabilities due to certain features with downside ratchet provisions that are not considered indexed to a company’s stock. The Company evaluated its common stock warrants to determine whether they should be classified as an equity instrument or a liability and made the determination that its common stock warrants should be classified as liabilities; however, the fair value of the related liability was immaterial. Accordingly, no adjustment was needed.

Subsequent to the adoption of AC 815-40-15, the common stock warrants are carried at fair value at each reporting date, with changes in their fair value recorded in other income (expense) in the consolidated statements of operation. The Company estimates the fair value of common stock warrants issued to non-employees using a binomial options pricing model. As of September 30, 2012, the change in fair value of the common stock warrants was immaterial for all interim periods since the date of adoption and no adjustment to income(loss) was recorded in the consolidated statements of operations for the year ended September 30, 2012.

Stock Option and Warrant Activity and Outstanding Shares

A summary of combined option and warrant activity follows:

	Stock Options		Stock Warrants	
	Options	Weighted Average Exercise Price	Warrants	Weighted Average Exercise Price
Outstanding, September 30, 2010	2,345,705	\$1.01	302,000	\$5.58
Granted	692,000	\$1.20	114,000	\$1.47
Exercised	(117,999)	\$1.03	—	—
Forfeited or expired	(639,502)	\$1.24	(209,000)	\$4.71
Outstanding, September 30, 2011	2,280,204	\$1.00	207,000	\$4.13
Granted	2,094,667	\$0.80	217,931	\$1.40
Exercised	(157,921)	\$0.84	—	—
Forfeited or expired	(1,227,330)	\$1.00	(93,000)	\$7.39
Outstanding, September 30, 2012	2,989,620	\$0.86	331,931	\$1.42

There were 157,921 options exercised during the year ended September 30, 2012, with an intrinsic value of \$42 thousand. There were 117,999 options exercised during the year ended September 30, 2011, with an intrinsic value of \$33 thousand. There were 1,028,293 options vested and exercisable as of September 30, 2012 with an intrinsic value of \$290 thousand. The intrinsic value was calculated based on the gross difference between the Company’s closing stock price on the last day of trading of fiscal 2012 and the exercise prices for all in-the money options vested and exercisable, excluding tax effects.

BRIDGELINE DIGITAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except share and per share data)

A summary of the status of nonvested shares is as follows:

	Shares	Weighted Average Grant-Date Fair Value
Nonvested at September 30, 2011	1,229,261	\$ 1.05
Granted	2,094,667	0.80
Vested	(419,264)	0.94
Forfeited	(943,607)	0.99
Nonvested at September 30, 2012	1,961,057	\$ 0.83

Price ranges of outstanding and exercisable options as of September 30, 2012 are summarized below:

Outstanding Options				Exercisable Options		
Exercise Price		Number of Options	Weighted Average Remaining Contractual Life (Years)	Weighted Average Exercise Price	Number of Options Exercisable	Weighted Average Exercise Price
\$0.01to	\$0.75	1,359,667	9.04	\$ 0.65	44,000	\$ 0.68
\$0.76to	\$1.00	1,053,703	6.67	0.89	853,703	0.90
\$1.01to	\$1.10	79,000	7.80	1.08	47,004	1.07
\$1.11to	\$3.00	497,250	9.00	1.35	83,856	1.20
		2,989,620	8.17	\$ 0.86	1,028,563	\$ 0.92

Compensation Expense

The Company estimates the fair value of stock options using the Black-Scholes-Merton option valuation model (the "Model"). The assumptions used to calculate compensation expense is as follows:

	Year Ended September 30,			
	2012		2011	
Expected option life in years	6.0		6.5	
Expected volatility	65.00%		56.00%	
Expected dividend rate	0.00%		0.00%	
Risk free interest rate	1.13		1.86	
Option exercise prices	\$0.59to	\$1.48	\$1.00to	\$1.58
Weighted average fair value of options granted during the year	\$0.51		\$0.67	

BRIDGELINE DIGITAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except share and per share data)

Compensation expense is generally recognized on a graded straight-line basis over the vesting period of grants. During the years ended September 30, 2012 and 2011, the Company recognized \$386 thousand and \$356 thousand, respectively, as compensation expense related to share based payments. As of September 30, 2012, the Company had approximately \$392 thousand of unrecognized compensation costs related to unvested options which the Company expects to recognize through fiscal 2015.

12. Income Taxes

The provisions of ASC 740-10 “Accounting for Uncertain Income Tax Positions”, requires that the impact of tax positions be recognized in the financial statements if they are more likely than not of being sustained upon examination, based on the technical merits of the position. There was no impact to the Company as a result of adopting ASC 740-10 as the Company’s management has determined that the Company has no uncertain tax positions requiring recognition under ASC 740-10 as of September 30, 2012 and 2011.

The Company’s income tax provision was computed based on the federal statutory rate and average state statutory rates, net of related federal benefit. The provision differs from the amount computed by applying the statutory federal income tax rate to income before provision for income taxes.

The sources, all domestic, and tax effects of the differences are as follows:

	Year Ended September 30,	
	2012	2011
Income tax benefit at the federal statutory rate of 34%	\$(356)	\$(239)
Permanent differences, net	204	341
State income tax expense (benefit)	(51)	(34)
Change in valuation allowance attributable to operations	227	(54)
Foreign Taxes	46	-
Other	(2)	10
Total	\$68	\$24

As of September 30, 2012, the Company has a federal net operating loss (NOL) carryforward of approximately \$6 million that expires on various dates through 2032. Internal Revenue Code Section 382 places a limitation on the amount of taxable income which can be offset by NOL carryforwards after a change in control of a loss corporation. Generally, after a change in control, a loss corporation cannot deduct NOL carryforwards in excess of the Section 382 Limitation. Due to these “change of ownership” provisions, utilization of NOL carryforwards may be subject to an annual limitation regarding their utilization against taxable income in future periods. The Company has not performed a Section 382 analysis. However, if performed, Section 382 may be found to limit potential future utilization of the Company’s NOL carryforwards.

The Company has net operating loss carryforwards and other deferred tax benefits that are available to offset future taxable income. A valuation allowance is established if it is more likely than not that all or a portion of the deferred tax asset will not be realized. Accordingly, the Company has established a full valuation allowance against its deferred tax asset at September 30, 2012 and 2011. For the year ended September 30, 2012 the valuation allowance for deferred tax assets increased \$1,205 which was mainly due to the increase in the net operating loss. For the year ended September 30, 2011, the valuation allowance for deferred tax assets increased \$227 thousand which was mainly

due to the decreases in certain allowances, intangibles and reserves.

The Company recognizes interest accrued related to unrecognized tax benefits in interest expense. Penalties, if incurred, are recognized as a component of tax expense.

The Company is subject to U.S. federal income tax as well as income tax of certain state jurisdictions. The Company has not been audited by the Internal Revenue Service (IRS) or any states in connection with income taxes. The tax periods from 2009 – 2012 generally remain open to examination by the IRS and state authorities.

BRIDGELINE DIGITAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except share and per share data)

Significant components of the Company's deferred tax assets and liabilities are as follows:

	September 30,	
	2012	2011
Deferred tax assets:		
Current:		
Bad debt reserve	\$76	\$112
Deferred revenue	332	454
Long-term		
AMT carryforward	9	15
Net operating loss carryforwards	2,618	1,741
Intangibles	104	-
Total deferred tax assets	3,139	2,322
Deferred tax liabilities:		
Long-term:		
Intangibles	-	(396)
Depreciation	(259)	(251)
Total deferred tax liabilities	(259)	(647)
Total deferred tax assets, net, before valuation allowance	2,880	1,675
Valuation allowance	(2,880)	(1,675)
Net deferred tax assets	\$-	\$-

Undistributed earnings of the Company's foreign subsidiary amounted to approximately \$492 thousand and \$474 thousand at September 30, 2012 and 2011, respectively. These earnings are considered to be indefinitely reinvested; accordingly, no provision for US federal and state income taxes has been provided thereon. Upon repatriation of those earnings, in the form of dividends or otherwise, the Company would be subject to both US income taxes (subject to an adjustment for foreign tax credits) and withholding taxes payable to the applicable foreign tax authority. Determination of the amount of unrecognized deferred US income tax liability is not material and the detailed calculations have not been performed. As of September 30, 2012, there would be minimal withholding taxes upon remittance of all previously unremitted earnings.

BRIDGELINE DIGITAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except share and per share data)

13. Earnings per Share

Options to purchase shares of the Company's common stock of 375,085 for fiscal 2012 were excluded from the computation of diluted net loss per share as the effect was anti-dilutive to the Company's net loss. Also, excluded were contingent shares issuable in connection with the e.Magination, Magnetic and Marketnet acquisitions. Options to purchase shares of the Company's common stock of 390,791 for fiscal 2011 were excluded from the computation of diluted net loss per share as the effect was anti-dilutive to the Company's net loss. Also, excluded were contingent shares issuable in connection with the e.Magination acquisition.

Basic and diluted net loss per share are calculated as follows:

	Year Ended September 30,	
	2012	2011
Net loss	\$ (946)	\$ (782)
Basic net loss per share:		
Weighted average common shares outstanding	13,084,095	12,187,767
Basic net loss per share	\$ (0.07)	\$ (0.06)
Diluted net loss per share:		
Weighted average common shares outstanding	13,084,095	12,187,767
Weighted average dilutive common share equivalents	-	-
Total weighted average common shares outstanding and dilutive common equivalents	13,084,095	12,187,767
Diluted net loss per share	\$ (0.07)	\$ (0.06)

14. Related Party Transactions

The Company has retained the services of one of its outside directors as a management consultant to assist the executive management team. The term of the engagement is one year, expiring in January 2013, at a rate of \$4,000 per month. The consulting arrangement may be terminated by either party with thirty days written notice.

As part of the Magnetic acquisition, the Company entered into an operating lease for the Bridgeline Tampa location with the previous owner of Magnetic who now serves as the Senior Vice President and General Manager of Bridgeline Tampa. The lease term is three years and rent is \$85 thousand per year.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.

None

Item 9A. Controls and Procedures.

Management's Report on Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports filed under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our President and Chief Executive Officer (Principal Executive Officer) and our Executive Vice President of Finance and Chief Financial Officer (Principal Financial and Accounting Officer), as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, as ours are designed to do, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

As of September 30, 2012, the end of our fiscal year covered by this report, we carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures. Based on the foregoing, we concluded that our disclosure controls and procedures were effective as of the end of the period covered by this annual report.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of control procedures. The objectives of internal control include providing management with reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition, and that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States. Our management assessed the effectiveness of our internal control over financial reporting as of September 30, 2012. In making this assessment, our management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in Internal Control-Integrated Framework. Our management has concluded that as of September 30, 2012, our internal control over financial reporting is effective in providing reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with US generally accepted accounting principles. Our management reviewed the results of their assessment with our Board of Directors.

This annual report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to a permanent exemption from the internal control audit requirements of Section 404(b) of the Sarbanes-Oxley Act of 2002.

Inherent limitations on effectiveness of controls

Internal control over financial reporting has inherent limitations which include but are not limited to the use of independent professionals for advice and guidance, interpretation of existing and/or changing rules and principles,

segregation of management duties, scale of organization, and personnel factors. Internal control over financial reporting is a process which involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Internal control over financial reporting also can be circumvented by collusion or improper management override. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements on a timely basis, however these inherent limitations are known features of the financial reporting process and it is possible to design into the process safeguards to reduce, though not eliminate, this risk. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Changes in Internal Control over Financial Reporting

There have been no significant changes in our internal controls over financial reporting that occurred during the fiscal quarter ended September 30, 2012 that have materially or are reasonably likely to materially affect, our internal controls over financial reporting.

Item 9B: Other Information.

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

The following table sets forth information regarding our directors and executive officers:

Name	Age	Position
Thomas Massie	51	Chairman, Chief Executive Officer and President
John Cavalier	73	Director(2)(3)(4)
Kenneth Galaznik	61	Director (1)(4)
Robert Hegarty	49	Director(2)(3)(4)
Joni Kahn	57	Director (1)(2)(4)
Scott Landers	42	Director(1)(3)(4)
Brett Zucker	40	Executive Vice President and Chief Technical Officer
Michael Prinn	39	Executive Vice President of Finance and Chief Financial Officer

|-----|--|
| (1) | Member of the Audit Committee. |
| (2) | Member of the Compensation Committee. |
| (3) | Member of the Nominating and Governance Committee. |
| (4) | Independent director. |

The additional information required by this Item 10 of Form 10-K is hereby incorporated by reference to the information in our definitive proxy statement to be filed within 120 days after the close of our fiscal year.

Item 11. Executive Compensation.

The information required by this Item 11 of Form 10-K is hereby incorporated by reference to the information in our definitive proxy statement to be filed within 120 days after the close of our fiscal year.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

We maintain a number of equity compensation plans for employees, officers, directors and other entities and individuals whose efforts contribute to our success. The table below sets forth certain information as of our fiscal year ended September 30, 2012 regarding the shares of our common stock available for grant or granted under our equity compensation plans.

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column a) (c)
Equity compensation plans approved by security holders (1)	2,989,620	\$0.86	610,380
Equity compensation plans not approved by security holders (2)	331,931	\$1.42	-
Total	3,321,551	\$0.92	610,380

(1) On April 12, 2012, the Company's stockholders approved and adopted the Bridgeline Digital, Inc. 2012 Employee Stock Purchase Plan for a total of 300,000 shares which are included in column (c).

(2) At September 30, 2012, there were 331,931 total Warrants outstanding. A total of 93,000 warrants were exercised or expired in fiscal 2012.

In fiscal 2006, the Company issued 280,000 warrants to note holders of Senior Secured Notes issued in a private placement (which have been repaid) (the "Debt Warrants") and issued 112,000 warrants to the underwriters of the debt offering (the "Underwriter's Debt Warrants"). The Debt Warrants were exercisable to purchase shares of the Company's common stock at an exercise price of \$0.001 per share any time within five years from the date of grant. After adjustments for anti-dilution provisions, the Underwriter's Debt Warrants were exercisable to purchase shares of the Company's common stock at an exercise price of \$4.93 per share any time within five years from the date of grant. As of September 30, 2012, all Debt Warrants had been either exercised or expired.

In fiscal 2007, the Company issued 150,000 warrants to the underwriter's of the Company's initial public offering (the "IPO Warrants") with an original exercise price of \$7.50 per share. After adjustments for anti-dilution provisions, the IPO Warrants are exercisable to purchase shares of the Company's common stock at an exercise price of \$7.39. The IPO Warrants expired in July 2012.

In fiscal 2011, the Company issued 50,000 common stock warrants to purchase shares of the Company's common stock to a non-employee consultant as compensation for services rendered. The warrants vest over a one year period and expire on October 15, 2015. Of the warrants issued, 25,000 have an exercise price of \$1.00 per share and 25,000 have an exercise price of \$2.00 per share. In fiscal 2011, the Company also issued four year warrants to the placement agent in the Company's private placement. The warrants are exercisable to purchase 64,000 shares of the Company's common stock at \$1.45 per share. In return for such warrants, the placement agent agreed to cancel 71,231 Underwriter's Debt Warrants (see above) and 57,000 IPO Warrants (see above).

In fiscal 2012, the Company issued four year warrants to the placement agent in the Company's private placement. The warrants are exercisable to purchase 21,931 shares of the Company's common stock at \$1.40 per share.

The additional information required by this Item 12 of Form 10-K is hereby incorporated by reference to the information in our definitive proxy statement to be filed within 120 days after the close of our fiscal year.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

The information required by this Item 13 of Form 10-K is hereby incorporated by reference to the information in our definitive proxy statement to be filed within 120 days after the close of our fiscal year.

Item 14. Principal Accounting Fees and Services.

The information required by this Item 14 of Form 10-K is hereby incorporated by reference to the information in our definitive proxy statement to be filed within 120 days after the close of our fiscal year.

PART IV

Item 15. Exhibits and Financial Statement Schedules.

(a) Documents Filed as Part of this Form 10-K

1. Financial Statements (included in Item 8 of this report on Form 10-K):
