NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS

(Unaudited)

Note 1 Basis of Presentation

Basis of Presentation

In the opinion of management, the unaudited interim consolidated condensed financial statements of Applied Materials, Inc. and its subsidiaries (Applied or the Company) included herein have been prepared on a basis consistent with the October 30, 2011 audited consolidated financial statements and include all material adjustments, consisting of normal recurring adjustments, necessary to fairly present the information set forth therein. These unaudited interim consolidated condensed financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in Applied's Annual Report on Form 10-K for the fiscal year ended October 30, 2011 (2011 Form 10-K). Applied's results of operations for the three and six months ended April 29, 2012 are not necessarily indicative of future operating results. Applied's fiscal year ends on the last Sunday in October of each year. Fiscal 2012 and 2011 each contain 52 weeks, and the first half of fiscal 2012 and 2011 each contained 26 weeks. In November 2011, Applied completed its acquisition of Varian Semiconductor Equipment Associates, Inc. (Varian). Beginning in the first quarter of fiscal 2012, the acquired business is included in Applied's consolidated results of operations and the results of the Silicon Systems Group and Applied Global Services segments.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make judgments, estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ materially from those estimates. On an ongoing basis, Applied evaluates its estimates, including those related to accounts receivable and sales allowances, fair values of financial instruments, inventories, intangible assets and goodwill, useful lives of intangible assets and property and equipment, fair values of share-based awards, and income taxes, among others. Applied bases its estimates on historical experience and on various other assumptions that are believed to be reasonable, the results of which form the basis for making judgments about the carrying values of assets and liabilities.

Revenue Recognition

Applied recognizes revenue when all four revenue recognition criteria have been met: persuasive evidence of an arrangement exists; delivery has occurred or services have been rendered; seller's price to buyer is fixed or determinable; and collectability is probable. Applied's shipping terms are customarily FOB Applied shipping point or equivalent terms. Applied's revenue recognition policy generally results in revenue recognition at the following points: (1) for all transactions where legal title passes to the customer upon shipment, Applied recognizes revenue upon shipment for all products that have been demonstrated to meet product specifications prior to shipment; the portion of revenue associated with certain installation-related tasks is deferred, and that revenue is recognized upon completion of the installation-related tasks; (2) for products that have not been demonstrated to meet product specifications prior to shipment, revenue is recognized at customer technical acceptance; (3) for transactions where legal title does not pass at shipment, revenue is recognized when legal title passes to the customer, which is generally at customer technical acceptance; and (4) for arrangements containing multiple elements, the revenue relating to the undelivered elements is deferred using the relative selling price method utilizing estimated sales prices until delivery of the deferred elements. Applied limits the amount of revenue recognition for delivered elements to the amount that is not contingent on the future delivery of products or services, future performance obligations or subject to customer-specified return or adjustment. In cases where Applied has sold products that have been demonstrated to meet product specifications prior to shipment, Applied believes that at the time of delivery, it has an enforceable claim to amounts recognized as revenue. The completed contract method is used for thin film solar lines. Spare parts revenue is generally recognized upon shipment, and services revenue is generally recognized over the period that the services are provided.

Table of Contents

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS — (Continued)

When a sales arrangement contains multiple elements, such as hardware and services and/or software products, Applied allocates revenue to each element based on a selling price hierarchy. The selling price for a deliverable is based on its vendor specific objective evidence (VSOE) if available, third party evidence (TPE) if VSOE is not available, or estimated selling price (ESP) if neither VSOE nor TPE is available. Applied generally utilizes the ESP due to the nature of its products. In multiple element arrangements where more-than-incidental software deliverables are included, revenue is allocated to each separate unit of accounting for each of the non-software deliverables and to the software deliverables as a group using the relative selling prices of each of the deliverables in the arrangement based on the aforementioned selling price hierarchy. If the arrangement contains more than one software deliverable, the arrangement consideration allocated to the software deliverables as a group is then allocated to each software deliverable using the guidance for recognizing software revenue, as amended.

Note 2 Earnings Per Share

Basic earnings per share is determined using the weighted average number of common shares outstanding during the period. Diluted earnings per share is determined using the weighted average number of common shares and potential common shares (representing the dilutive effect of stock options, restricted stock units, and employee stock purchase plan shares) outstanding during the period. Applied's net income has not been adjusted for any period presented for purposes of computing basic or diluted earnings per share due to the Company's non-complex capital structure.

	Three Months Ended		Six Months Ended	
	April 29, 2012	May 1, 2011	April 29, 2012	May 1, 2011
	(In millions, except per share amounts)			
Numerator:				
Net income	\$289	\$489	\$406	\$995
Denominator:				
Weighted average common shares outstanding	1,289	1,320	1,294	1,322
Effect of dilutive stock options, restricted stock units and employee stock purchase plan shares	12	13	11	11
Denominator for diluted earnings per share	1,301	1,333	1,305	1,333
Basic and diluted earnings per share	\$0.22	\$0.37	\$0.31	\$0.75
Potentially dilutive securities	8	18	13	18

Potentially dilutive securities attributable to outstanding stock options and restricted stock units were excluded from the calculation of diluted net income per share because the combined exercise price, average unamortized fair value and assumed tax benefits upon the exercise of options and the vesting of restricted stock units were greater than the average market price of the Company's shares, and therefore their inclusion would have been anti-dilutive.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS — (Continued)

Gains and Losses on Investments

Gross realized gains and losses on sales of investments during the three and six months ended April 29, 2012 and May 1, 2011 were as follows:

	Three Months Ended		Six Months Ended	
	April 29, 2012	May 1, 2011	April 29, 2012	May 1, 2011
	(In millions)			
Gross realized gains	\$ 1	\$ 8	\$ 2	\$ 13
Gross realized losses	\$ 1	\$ 1	\$ 2	\$ 1

At April 29, 2012, Applied had a gross unrealized loss of \$1 million due to a decrease in the fair value of certain fixed income securities. Applied regularly reviews its investment portfolio to identify and evaluate investments that have indications of possible impairment. Factors considered in determining whether an unrealized loss was considered to be temporary, or other-than-temporary and therefore impaired, include: the length of time and extent to which fair value has been lower than the cost basis; the financial condition, credit quality and near-term prospects of the investee; and whether it is more likely than not that Applied will be required to sell the security prior to recovery. Generally, the contractual terms of investments in marketable securities do not permit settlement at prices less than the amortized cost of the investments. Applied determined that the gross unrealized losses on its marketable securities at April 29, 2012 and May 1, 2011 were temporary in nature and therefore it did not recognize any impairment of its marketable securities for the three and six months ended April 29, 2012 and May 1, 2011. During the first half of fiscal 2012, Applied determined that certain of its equity investments held in privately held companies were other-than-temporarily impaired and, accordingly, recognized impairment charges of \$3 million for the three and six months ended April 29, 2012. Applied did not recognize any impairment on its equity investments in privately-held companies for the three and six months ended May 1, 2011.

The following table provides the fair market value of Applied's investments with unrealized losses that were not deemed to be other-than-temporarily impaired as of April 29, 2012.

	In Loss Position for Less Than 12 Months		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
	(In millions)			
Asset-backed and mortgage-backed securities	\$42	\$ 1	\$42	\$ 1
Publicly traded equity securities	\$19	\$6	\$19	\$6
Total	\$61	\$7	\$61	\$7

The following table provides the fair market value of Applied's investments with unrealized losses that were not deemed to be other-than-temporarily impaired as of October 30, 2011.

	In Loss Position for Less Than 12 Months		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
	(In millions)			
Commercial paper, corporate bonds and medium-term notes	\$32	\$ 1	\$32	\$ 1
Asset-backed and mortgage-backed securities	77	1	77	1

Total	\$109	\$2	\$109	\$2
-------	-------	-----	-------	-----

Unrealized gains and temporary losses on investments classified as available-for-sale are included within accumulated other comprehensive income (loss), net of any related tax effect. Upon realization, those amounts are reclassified from accumulated other comprehensive income (loss) to results of operations.

Table of Contents

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS — (Continued)

Note 4 Fair Value Measurements

Applied's financial assets are measured and recorded at fair value, except for equity investments held in privately-held companies. These equity investments are generally accounted for under the cost method of accounting and are periodically assessed for other-than-temporary impairment when events or circumstances indicate that an other-than-temporary decline in value may have occurred. Applied's nonfinancial assets, such as goodwill, intangible assets, and property, plant and equipment, are recorded at cost and are assessed for impairment when events or circumstances indicate that an other-than-temporary decline in value may have occurred.

Fair Value Hierarchy

Applied uses the following fair value hierarchy, which prioritizes the inputs to valuation techniques used to measure fair value into three levels and bases the categorization within the hierarchy upon the lowest level of input that is available and significant to the fair value measurement:

Level 1 — Quoted prices in active markets for identical assets or liabilities;

Level 2 — Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities; and

Level 3 — Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Applied's investments are comprised primarily of debt securities that are classified as available-for-sale and recorded at their fair values. In determining the fair value of investments, Applied uses pricing information from pricing services that value securities based on quoted market prices and models that utilize observable market inputs. In the event a fair value estimate is unavailable from a pricing service, Applied generally obtains non-binding price quotes from brokers. Applied then reviews the information provided by the pricing services or brokers to determine the fair value of its short-term and long-term investments. In addition, to validate pricing information obtained from pricing services, Applied periodically performs supplemental analysis on a sample of securities. Applied reviews any significant unanticipated differences identified through this analysis to determine the appropriate fair value. Investments with remaining effective maturities of 12 months or less from the balance sheet date are classified as short-term investments. Investments with remaining effective maturities of more than 12 months from the balance sheet date are classified as long-term investments. As of April 29, 2012, substantially all of Applied's available-for-sale, short-term and long-term investments were recognized at fair value that was determined based upon observable inputs.

Table of Contents

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS — (Continued)

Assets and Liabilities Measured at Fair Value on a Recurring Basis

Financial assets and liabilities (excluding cash balances) measured at fair value on a recurring basis are summarized below as of April 29, 2012 and October 30, 2011:

	April 29, 2012			October 30, 2011		
	Level 1	Level 2	Total	Level 1	Level 2	Total
	(In millions)					
Assets:

Liabilities:						
Deferred compensation	\$7	\$—	\$7	\$—	\$—	\$—
Total	\$7	\$—	\$7	\$—	\$—	\$—

The deferred compensation liability represents our obligation to pay benefits under a non-qualified deferred compensation plan. The related investments, held in a rabbi trust, consist of equity securities, primarily mutual funds, and are classified as Level 1 in the valuation hierarchy.

There were no transfers in and out of Level 1 and Level 2 fair value measurements during either the three or six months ended April 29, 2012 and May 1, 2011. Applied did not have any financial assets or liabilities measured at fair value on a recurring basis within Level 3 fair value measurements as of April 29, 2012 or October 30, 2011.

Assets and Liabilities Measured at Fair Value on a Non-recurring Basis

Equity investments in privately-held companies are generally accounted for under the cost method of accounting and are periodically assessed for other-than-temporary impairment when an event or circumstance indicates that an other-than-temporary decline in value may have occurred. If Applied determines that an other-than-temporary impairment has occurred, the investment will be written down to its estimated fair value based on available information, such as pricing in recent rounds of financing, current cash positions, earnings and cash flow forecasts, recent operational performance and any other readily available market data. Equity investments in privately-held companies totaled \$69 million at April 29, 2012, of which \$52 million of investments were accounted for under the cost method of accounting and \$17 million of Level 3 investments had been measured at fair value on a non-recurring basis due to an other-than-temporary decline in value. At October 30, 2011, equity investments in privately-held companies totaled \$62 million, of which \$40 million of investments were accounted for under the cost method of accounting and \$22 million of Level 3 investments had been measured at fair value on a non-recurring basis due to an other-than-temporary decline in value. During the three and six months ended April 29, 2012, Level 3 equity investments in privately-held companies of \$5 million were transferred to Level 1 assets measured at fair value on a recurring basis due to change in investee structure which improved price transparency.

Table of Contents

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS — (Continued)

During the first half of fiscal 2012, Applied determined that certain of its equity investments held in privately held companies were other-than-temporarily impaired and, accordingly, recognized impairment charges of \$3 million for the three and six months ended April 29, 2012. Applied did not recognize any impairment on its equity method investments in privately-held companies for the three and six months ended May 1, 2011.

Other

The carrying amounts of Applied's financial instruments, including cash and cash equivalents, accounts receivable, notes payable, and accounts payable and accrued expenses, approximate fair value due to the short maturities of these financial instruments. At April 29, 2012, the carrying amount of long-term debt was \$1.9 billion and the estimated fair value was \$2.2 billion. The estimated fair value of long-term debt is determined by Level 2 inputs and is based on quoted market prices for the same or similar issues.

Note 5 Derivative Instruments and Hedging Activities

Derivative Financial Instruments

Applied conducts business in a number of foreign countries, with certain transactions denominated in local currencies, such as Japanese yen, euro, Israeli shekel, Taiwanese dollar and Swiss franc. Applied uses derivative financial instruments, such as forward exchange contracts and currency option contracts, to hedge certain forecasted foreign currency denominated transactions expected to occur typically within the next 24 months. The purpose of Applied's foreign currency management is to mitigate the effect of exchange rate fluctuations on certain foreign currency denominated revenues, costs and eventual cash flows. The terms of currency instruments used for hedging purposes are generally consistent with the timing of the transactions being hedged. Applied does not use derivative financial instruments for trading or speculative purposes.

Derivative instruments and hedging activities, including foreign currency exchange contracts, are recognized on the balance sheet at fair value. Changes in the fair value of derivatives that do not qualify for hedge treatment, as well as the ineffective portion of any hedges, are recognized currently in earnings. All of Applied's derivative financial instruments are recorded at their fair value in other current assets or in accounts payable and accrued expenses. Hedges related to anticipated transactions are designated and documented at the inception of the hedge as cash flow hedges and are typically entered into once per month. Cash flow hedges are evaluated for effectiveness quarterly. The effective portion of the gain or loss on these hedges is reported as a component of accumulated other comprehensive income or loss (AOCI) in stockholders' equity and is reclassified into earnings when the hedged transaction affects earnings. The majority of the after-tax net income or loss related to derivative instruments included in AOCI at April 29, 2012 is expected to be reclassified into earnings within 12 months. Changes in the fair value of currency forward exchange and option contracts due to changes in time value are excluded from the assessment of effectiveness. Both ineffective hedge amounts and hedge components excluded from the assessment of effectiveness are recognized promptly in earnings. If the transaction being hedged is no longer probable to occur, or if a portion of any derivative is deemed to be ineffective, Applied promptly recognizes the gain or loss on the associated financial instrument in general and administrative expenses. The amount recognized due to discontinuance of cash flow hedges that were probable not to occur by the end of the originally specified time period was not significant for the three and six months ended April 29, 2012 and May 1, 2011.

Additionally, forward exchange contracts are generally used to hedge certain foreign currency denominated assets or liabilities. These derivatives are typically entered into once per month and are not designated for hedge accounting treatment. Accordingly, changes in the fair value of these hedges are recorded promptly in earnings to offset the changes in the fair value of the assets or liabilities being hedged.

The fair values of derivative instruments at April 29, 2012 and October 30, 2011 were not material.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS — (Continued)

Credit Risk Contingent Features

If Applied's credit rating were to fall below investment grade, it would be in violation of credit risk contingent provisions of the derivative instruments discussed above, and certain counterparties to the derivative instruments could request immediate payment on derivative instruments in net liability positions. The aggregate fair value of all derivative instruments with credit risk-related contingent features that were in a net liability position was immaterial as of April 29, 2012.

Entering into foreign exchange contracts with banks exposes Applied to credit-related losses in the event of the banks' nonperformance. However, Applied's exposure is not considered significant.

Note 6 Accounts Receivable, Net

Applied has agreements with various financial institutions to sell accounts receivable and discount promissory notes from selected customers. Applied also discounts letters of credit through various financial institutions. Applied sells its accounts receivable without recourse. Details of discounted letters of credit, factored accounts receivable and discounted promissory notes for the three and six months ended April 29, 2012 and May 1, 2011 were as follows:

	Three Months Ended		Six Months Ended	
	April 29, 2012	May 1, 2011	April 29, 2012	May 1, 2011
	(In millions)			
Discounted letters of credit	\$—	\$50	\$—	\$173
Factored accounts receivable and discounted promissory notes	—	19	70	55
Total	\$—	\$69	\$70	\$228

Financing charges on the sale of receivables and discounting of letters of credit are included in interest expense in the accompanying Consolidated Condensed Statements of Operations and were not material for both periods presented. Accounts receivable are presented net of allowance for doubtful accounts of \$82 million at April 29, 2012 and \$73 million at October 30, 2011. Applied sells principally to manufacturers within the semiconductor, display and solar industries. As a result of challenging economic and industry conditions, certain of these manufacturers may experience difficulties in meeting their obligations in a timely manner. While Applied believes that its allowance for doubtful accounts is adequate and represents Applied's best estimate as of April 29, 2012, Applied will continue to closely monitor customer liquidity and other economic conditions, which may result in changes to Applied's estimates regarding collectability.

Deferred revenue	922	867
	\$ 1,113	\$ 1,116

Applied typically receives deposits on future deliverables from customers in its Energy and Environmental Solutions and Display segments. In certain instances, customer deposits may be received from customers in the Applied Global Services segment.

Note 8 Business Combination

On November 10, 2011, Applied completed the acquisition of Varian, a public company manufacturer of semiconductor processing equipment and the leading supplier of ion implantation equipment used by chip makers around the world, for an aggregate purchase price of \$4.2 billion in cash, net of cash acquired and assumed earned equity awards of \$27 million, pursuant to an Agreement and Plan of Merger (the Merger Agreement) dated as of May 3, 2011. Applied's primary reasons for this acquisition were to complement existing product offerings and to provide opportunities for future growth. Varian designs, markets, manufactures and services ion implantation systems. These systems are primarily used in the manufacture of transistors, which are a basic building block of integrated circuits (ICs) or microchips. Ion implantation systems create a beam of electrically charged particles called ions, which are implanted into transistor structures at precise locations and depths, changing the electrical properties of the semiconductor device. These implantation systems may also be used in other areas of IC manufacture for modifying the material properties of the semiconductor devices, as well as in manufacturing crystalline-silicon solar cells. Applied allocated the purchase price of this acquisition to tangible and identifiable intangible assets acquired and liabilities assumed, based on their estimated fair values. Applied preliminarily recorded \$2.6 billion in goodwill, which represented the excess of the purchase price over the aggregate estimated fair values of the assets acquired and liabilities assumed in the acquisition. Of this amount, \$1.8 billion of goodwill was allocated to the Silicon Systems Group segment, and the remainder was allocated to the Applied Global Services segment. Goodwill associated with the acquisition is primarily attributable to the opportunities from the addition of Varian's product portfolio which complement Applied's Silicon Systems Group's suite of products, including providing integrated process solutions to customers. Goodwill is not deductible for tax purposes. A discussion of the subsequent revision made during the second quarter of fiscal 2012 to the initial preliminary purchase price allocation is included in Note 9, Goodwill, Purchased Technology and Other Intangible Assets. The estimated fair value assigned to identifiable assets acquired and liabilities assumed was based upon preliminary estimates. Valuations and assumptions pertaining to income taxes are subject to change as additional information is obtained during the measurement period.

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS — (Continued)

The results of operations of Varian are included in Applied's consolidated results of operations, primarily in the results for the Silicon Systems Group and Applied Global Services segments, beginning in the first quarter of fiscal 2012. For the three months ended April 29, 2012, net sales of Varian products of approximately \$333 million and an operating loss of approximately \$1 million were included in the consolidated results of operations. For the six months ended April 29, 2012, net sales of Varian products of approximately \$535 million and an operating loss of approximately \$131 million were included in the consolidated results of operations. For the three and six months ended April 29, 2012, results of operations included charges of \$69 million and \$222 million, respectively, attributable to inventory fair value adjustments on products sold, amortization of purchased intangible assets, share-based compensation associated with accelerated vesting, deal costs and other integration costs associated with the acquisition. Of these amounts, deal costs and other acquisition-related costs of \$1 million and \$37 million were not allocated to the segments for the three and six months ended April 29, 2012, respectively. Deal costs are included in selling, general and administrative expenses in Applied's consolidated results of operations.

The following unaudited pro forma consolidated results of operations assume the acquisition was completed as of the beginning of the fiscal reporting periods presented. The pro forma consolidated results of operations for the three and six months ended May 1, 2011 combine the results of Applied for the three and six months ended May 1, 2011, with the results of Varian for the three and six months ended April 1, 2011.

	Three Months Ended		Six Months Ended	
	April 29, 2012	May 1, 2011	April 29, 2012	May 1, 2011
	(In millions, except per share amounts)			
Net sales	\$2,541	\$3,192	\$4,730	\$6,161
Net income	\$308	\$508	\$503	\$957
Basic and diluted earnings per share	\$0.24	\$0.38	\$0.39	\$0.72

The pro forma results above include adjustments related to the purchase price allocation and financing of the acquisition, primarily to increase depreciation and amortization with the higher values of property, plant and equipment and identifiable intangible assets, to increase interest expense for the additional debt incurred to complete the acquisition, and to reflect the related income tax effect. The pro forma results for the three and six months ended May 1, 2011 include costs of \$15 million and \$117 million, respectively, which reduced net income due to inventory fair value adjustments on products sold, share-based compensation associated with accelerated vesting and acquisition-related costs, which are not expected to occur in future quarters. The pro forma information does not necessarily reflect the actual results of operations had the acquisition been consummated at the beginning of the fiscal reporting period indicated nor is it necessarily indicative of future operating results. The pro forma information does not include any (i) potential revenue enhancements, cost synergies or other operating efficiencies that could result from the acquisition or (ii) transaction or integration costs relating to the acquisition.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS — (Continued)

Note 9 Goodwill, Purchased Technology and Other Intangible Assets

Goodwill and Purchased Intangible Assets

Applied's methodology for allocating the purchase price relating to purchase acquisitions is determined through established and generally accepted valuation techniques. Goodwill is measured as the excess of the cost of the acquisition over the sum of the amounts assigned to tangible and identifiable intangible assets acquired less liabilities assumed. Applied assigns assets acquired (including goodwill) and liabilities assumed to one or more reporting units as of the date of acquisition. Typically, acquisitions relate to a single reporting unit and thus do not require the allocation of goodwill to multiple reporting units. If the products obtained in an acquisition are assigned to multiple reporting units, the goodwill is distributed to the respective reporting units as part of the purchase price allocation process.

Goodwill and purchased intangible assets with indefinite useful lives are not amortized, but are reviewed for impairment annually during the fourth quarter of each fiscal year and whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. The process of evaluating the potential impairment of goodwill and intangible assets requires significant judgment, especially in emerging markets. Applied regularly monitors current business conditions and other factors including, but not limited to, adverse industry or economic trends, restructuring actions and lower projections of profitability that may impact future operating results.

In fiscal 2011, Applied adopted authoritative guidance which allows entities to use a qualitative approach to test goodwill for impairment. This authoritative guidance permits an entity to first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If it is concluded that this is the case, it is necessary to perform the two-step goodwill impairment test. Otherwise, the two-step goodwill impairment test is not required. In the first step of the two-step goodwill impairment test, Applied would compare the estimated fair value of each reporting unit to its carrying value. Applied's reporting units are consistent with the reportable segments identified in Note 15, Industry Segment Operations, based on the manner in which Applied operates its business and the nature of those operations. Applied determines the fair value of each of its reporting units based on a weighting of income and market approaches. Under the income approach, Applied calculates the fair value of a reporting unit based on the present value of estimated future cash flows. Estimated future cash flows will be impacted by a number of factors including anticipated future operating results, estimated cost of capital and/or discount rates. Under the market approach, Applied estimates the fair value based on market multiples of revenue or earnings for comparable companies, as appropriate. If the fair value of the reporting unit exceeds the carrying value of the net assets assigned to that unit, goodwill is not impaired and no further testing is performed. If the carrying value of the net assets assigned to the reporting unit exceeds the fair value of the reporting unit, then Applied would perform the second step of the impairment test in order to determine the implied fair value of the reporting unit's goodwill. Applied would then allocate the fair value of the reporting unit to all of the assets and liabilities of that unit, as if Applied had acquired the reporting unit in a business combination, with the fair value of the reporting unit being the "purchase price." The excess of the "purchase price" over the carrying amounts assigned to assets and liabilities represents the implied fair value of goodwill. If Applied determined that the carrying value of a reporting unit's goodwill exceeded its implied fair value, Applied would record an impairment charge equal to the difference.

In the second quarter of fiscal 2011, Applied negotiated the divestiture of certain assets held in the Applied Global Services segment and determined the trade name included in assets held for sale to be impaired and recorded \$18 million of impairment charges. Applied performed a qualitative assessment to test goodwill for impairment in the fourth quarter of fiscal 2011, and determined that it was more likely than not that each of its reporting units' fair value exceeded its carrying value and that it was not necessary to perform the two-step goodwill impairment test. Applied tested goodwill of the Energy and Environmental Solutions reporting unit for potential impairment during the second quarter of fiscal 2012 in light of second quarter developments that included current industry trends, financial

performance, weaker short-term outlooks, and other adverse operating conditions within the solar industry. The results of the first step of the impairment test indicated that goodwill of the Energy and Environmental Solutions reporting unit was not impaired.

Table of Contents

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS — (Continued)

Applied utilized an equal weighting of both the discounted cash flow method of the income approach and the guideline company method of the market approach to estimate the fair value of the Energy and Environmental Solutions reporting unit. The results of the first step of the impairment test indicated that goodwill within the Energy and Environmental Solutions reporting unit was not impaired, as the estimated fair value in excess of carrying value was approximately \$700 million (or 73 percent over the carrying value of the reporting unit) at April 1, 2012. The evaluation of goodwill for impairment requires the exercise of significant judgment. The estimates used in the impairment testing were consistent with the discrete forecasts that Applied uses to manage its business, and considered the significant developments that occurred during the quarter. Under the discounted cash flow method, cash flows beyond the discrete forecasts were estimated using a terminal growth rate, which considered the long-term earnings growth rate specific to the Energy and Environmental Solutions reporting unit. The estimated future cash flows were discounted to present value using a discount rate that was the value-weighted average of the reporting unit's estimated cost of equity and debt derived using both known and estimated market metrics, and was adjusted to reflect risk factors that considered both the timing and risks associated with the estimated cash flows. The tax rate used in the discounted cash flow method reflected the international structure currently in place, which is consistent with the market participant perspective. Under the guideline company method, market multiples were applied to forecasted revenues and earnings before interest, taxes, depreciation and amortization. The market multiples used were consistent with the median multiples based on comparable publicly-traded companies. While there are inherent uncertainties related to the significant assumptions used and management's application of these assumptions in conducting the goodwill impairment analysis, Applied believes that the assumptions used provide a reasonable estimate of the fair value of the Energy and Environmental Solutions reporting unit.

Applied also tested goodwill of the Display reporting unit for potential impairment during the second quarter of fiscal 2012 in light of second quarter developments that included current industry trends, the Display reporting unit's financial performance and short-term outlook. The results of the first step of the impairment test indicated that goodwill of the Display reporting unit was not impaired and the estimated fair value of the reporting unit was more than 100 percent over the carrying value of the reporting unit.

In the event of future changes in business conditions in the markets in which the Display and Energy and Environmental Solutions reporting units operate, Applied will be required to reassess and update its forecasts and estimates used in future impairment analyses. If the results of these analyses are lower than current estimates, a material impairment charge may result at that time. As discussed in Note 16, Subsequent Event, on May 10, 2012, Applied announced that a committee of the Board of Directors approved a plan to restructure the Energy and Environmental Solutions segment. The restructuring plan is not expected to have a significant impact on the fair value of the Energy and Environmental Solutions reporting unit.

During the first half of fiscal 2012, goodwill and other indefinite-lived intangible assets increased by \$2.7 billion due to the acquisition of Varian as discussed in Note 8, Business Combination. Of this amount, an adjustment of \$64 million to increase goodwill was recorded in the second quarter of fiscal 2012 related to the changes in net assets acquired from the Varian acquisition during the measurement period as Applied obtained the necessary information to compute the U.S. tax liability on undistributed earnings of non-U.S. subsidiaries as of the acquisition date. Of the total adjustment in the second quarter of fiscal 2012, \$44 million was allocated to the Silicon Systems Group segment and the remainder was allocated to Applied Global Services segment.

Table of Contents

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS — (Continued)

Details of indefinite-lived intangible assets were as follows:

	April 29, 2012			October 30, 2011		
	Goodwill	Other Intangible Assets	Total	Goodwill	Other Intangible Assets	Total
	(In millions)					
Silicon Systems Group	\$2,151	\$142	\$2,293	\$381	\$—	\$381
Applied Global Services	1,027	—	1,027	193	—	193
Display	116	—	116	116	—	116
Energy and Environmental Solutions	645	—	645	645	—	645
Carrying amount	\$3,939	\$142	\$4,081	\$1,335	\$—	\$1,335

Other intangible assets that are not subject to amortization consist primarily of in-process technology, which will be subject to amortization upon commercialization. The fair value assigned to in-process technology was determined using the income approach based on estimates and judgments regarding risks inherent in the development process, including the likelihood of achieving technological success and market acceptance. If an in-process technology project is abandoned, the acquired technology attributable to the project will be written-off.

Finite-Lived Purchased Intangible Assets

Applied amortizes purchased intangible assets with finite lives using the straight-line method over the estimated economic lives of the assets, ranging from 1 to 15 years.

Applied evaluates long-lived assets for impairment whenever events or changes in circumstances indicate the carrying value of an asset group may not be recoverable. Applied assesses the fair value of the assets based on the amount of the undiscounted future cash flow that the assets are expected to generate and recognizes an impairment loss when estimated undiscounted future cash flow expected to result from the use of the asset, plus net proceeds expected from disposition of the asset, if any, are less than the carrying value of the asset. When Applied identifies an impairment, Applied reduces the carrying value of the group of assets to comparable market values, when available and appropriate, or to its estimated fair value based on a discounted cash flow approach.

Intangible assets, such as purchased technology, are generally recorded in connection with a business acquisition. The value assigned to intangible assets is usually based on estimates and judgments regarding expectations for the success and life cycle of products and technology acquired. Applied evaluates the useful lives of its intangible assets each reporting period to determine whether events and circumstances require revising the remaining period of amortization. In addition, Applied reviews intangible assets for impairment when events or changes in circumstances indicate their carrying value may not be recoverable. Management considers such indicators as significant differences in actual product acceptance from the estimates, changes in the competitive and economic environment, technological advances, and changes in cost structure.

Accumulated amortization	\$(513)) \$(270)) \$(783)) \$(426)) \$(241)) \$(667)
Carrying amount	\$1,031	\$291	\$1,322	\$127	\$84	\$211

During the first half of fiscal 2012, the change in gross carrying amount of the amortized intangible assets was approximately \$1.2 billion, due to the acquisition of Varian as discussed in Note 8, Business Combination.

In the second quarter of fiscal 2011, Applied negotiated the divestiture of certain assets held in the Applied Global Services segment and determined identified purchased technology and finite-lived intangible assets included in assets held for sale to be impaired and recorded \$6 million of impairment charges.

Details of amortization expense were as follows:

	Three Months Ended		Six Months Ended	
	April 29, 2012	May 1, 2011	April 29, 2012	May 1, 2011

Selling, general and administrative	9	4	18	9
Total amortization expense	\$55	\$13	\$116	\$27

As of April 29, 2012, future estimated amortization expense is expected to be as follows:

	Amortization Expense (In millions)
2012	\$109
2013	209
2014	199
2015	183
2016	174
Thereafter	448
	\$1,322

Note 10 Borrowing Facilities and Long-Term Debt

Applied has credit facilities for unsecured borrowings in various currencies of up to \$1.6 billion, of which \$1.5 billion is comprised of a committed four-year revolving credit agreement with a group of banks that is scheduled to expire in May 2015. This agreement provides for borrowings in United States dollars at interest rates keyed to one of the two rates selected by Applied for each advance and includes financial and other covenants with which Applied was in compliance at April 29, 2012. Remaining credit facilities in the amount of approximately \$99 million are with Japanese banks. Applied's ability to borrow under these facilities is subject to bank approval at the time of the borrowing request, and any advances will be at rates indexed to the banks' prime reference rate denominated in Japanese yen. No amounts were outstanding under any of the credit facilities at April 29, 2012 or October 30, 2011. Long-term debt outstanding was as follows:

Due Date	Principal Amount		Stated Interest Rate	Effective Interest Rate	Interest Payment Dates
	April 29, 2012	October 30, 2011			
	(In millions)				
June 15, 2016	\$400	\$400	2.650%	2.666%	June 15, December 15
October 15, 2017	200	200	7.125%	7.190%	April 15, October 15
June 15, 2021	750	750	4.300%	4.326%	June 15, December 15
June 15, 2041	600	600	5.850%	5.879%	June 15, December 15
Other debt	—	1			
	1,950	1,951			
Total unamortized discount	(4) (4)		
Total long-term debt	\$1,946	\$1,947			

Applied has debt agreements that contain financial and other covenants. These covenants require Applied to maintain certain minimum financial ratios. At April 29, 2012, Applied was in compliance with all such covenants.

Unrealized gain on investments, net	20	17
Cumulative translation adjustments	12	14
	\$7	\$6

Stock Repurchase Program

On March 5, 2012, Applied's Board of Directors approved a new stock repurchase program authorizing up to \$3.0 billion in repurchases over the next three years ending in March 2015. Under this authorization, Applied purchased shares of its common stock under a systematic stock repurchase program and may also make supplemental stock repurchases from time to time, depending on market conditions, stock price and other factors. Applied's stock repurchase program authorized on March 8, 2010 was terminated concurrent with the start of the new repurchase program.

The following table summarizes Applied's stock repurchases for the three and six months ended April 29, 2012 and May 1, 2011:

	Three Months Ended		Six Months Ended	
	April 29, 2012	May 1, 2011	April 29, 2012	May 1, 2011
	(In millions, except per share amounts)			
Shares of common stock repurchased	16	8	34	19
Cost of stock repurchased	\$200	\$118	\$400	\$268
Average price paid per share	\$12.33	\$15.54	\$11.60	\$14.48

Dividends

The following table summarizes the dividends declared by Applied's Board of Directors during fiscal 2012:

Date Declared	Record Date	Payable Date	Amount per Share	Aggregate Amount (In millions)
December 6, 2011	February 23, 2012	March 15, 2012	\$0.08	\$103
March 5, 2012	May 24, 2012	June 14, 2012	\$0.09	\$115

Applied currently anticipates that it will continue to pay cash dividends on a quarterly basis in the future, although the declaration and amount of any future cash dividend are at the discretion of the Board of Directors and will depend on Applied's financial condition, results of operations, capital requirements, business conditions and other factors, as well as a determination that cash dividends are in the best interest of Applied and its stockholders.

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS — (Continued)

Share-Based Compensation

Applied has adopted stock plans that permit grants to employees of share-based awards, including stock options, restricted stock, restricted stock units, performance shares and performance units. In addition, the Employee Stock Incentive Plan provides for the automatic grant of restricted stock units to non-employee directors and permits the grant of share-based awards to non-employee directors and consultants. Applied also has two Employee Stock Purchase Plans, one for United States employees and a second for international employees (collectively, ESPP), which enable eligible employees to purchase Applied common stock.

During the three and six months ended April 29, 2012 and May 1, 2011, Applied recognized share-based compensation expense related to stock options, ESPP shares, restricted stock units, restricted stock, performance shares and performance units. Total share-based compensation and related tax benefits were as follows:

	Three Months Ended		Six Months Ended	
	April 29, 2012	May 1, 2011	April 29, 2012	May 1, 2011
	(In millions)			
Share-based compensation	\$43	\$38	\$96	\$72
Tax benefit recognized	\$12	\$11	\$27	\$21

The effect of share-based compensation on the results of operations for the three and six months ended April 29, 2012 and May 1, 2011 was as follows:

	Three Months Ended		Six Months Ended	
	April 29, 2012	May 1, 2011	April 29, 2012	May 1, 2011
	(In millions)			
Cost of products sold	\$14	\$13	\$27	\$24
Research, development, and engineering	13	12	26	22
Selling, general and administrative	16	13	43	26
Total share-based compensation	\$43	\$38	\$96	\$72

The cost associated with share-based awards that are subject solely to time-based vesting requirements, less expected forfeitures, is recognized over the awards' service period for the entire award on a straight-line basis. The cost associated with performance-based equity awards is recognized for each tranche over the service period, based on an assessment of the likelihood that the applicable performance goals will be achieved.

At April 29, 2012, Applied had \$289 million in total unrecognized compensation expense, net of estimated forfeitures, related to grants of stock options, restricted stock units, restricted stock, performance units, performance shares and shares issued under Applied's ESPP, which will be recognized over a weighted average period of 2.7 years. On March 6, 2012, Applied's stockholders approved the amended and restated Employee Stock Incentive Plan (the Plan), which included an increase of 125 million shares of Applied common stock available for issuance under the Plan and other amendments to the Plan. Also, upon approval of the amended and restated Plan, the 2000 Global Equity Incentive Plan, which had approximately 76 million shares available for issuance, became unavailable for any future grants. At April 29, 2012, there were 199 million shares available for grants of stock options, restricted stock units, restricted stock, performance units, performance shares and other share-based awards under the Plan, and an additional 51 million shares available for issuance under the ESPP.

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS — (Continued)

Stock Options

Applied grants options to purchase, at future dates, shares of its common stock to employees and consultants. The exercise price of each stock option equals the fair market value of Applied common stock on the date of grant. Options typically vest over three to four years, subject to the grantee's continued service with Applied through the scheduled vesting date, and expire no later than seven years from the grant date. The fair value of each option grant is estimated on the date of grant using the Black-Scholes option pricing model. This model was developed for use in estimating the value of publicly traded options that have no vesting restrictions and are fully transferable. Applied's employee stock options have characteristics significantly different from those of publicly traded options. There were no stock options granted in the six months ended April 29, 2012 and May 1, 2011.

Stock option activity for the six months ended April 29, 2012 was as follows:

	Shares	Weighted Average Exercise Price
	(In millions, except per share amounts)	
Outstanding at October 30, 2011	30	\$13.05
Assumed in Varian acquisition	5	\$4.85
Exercised	(2)	\$6.72
Canceled and forfeited	(8)	\$16.70
Outstanding at April 29, 2012	25	\$10.78
Exercisable at April 29, 2012	23	\$11.13

Restricted Stock Units, Restricted Stock, Performance Shares and Performance Units

Restricted stock units are converted into shares of Applied common stock upon vesting on a one-for-one basis. Restricted stock has the same rights as other issued and outstanding shares of Applied common stock except these shares have no right to dividends and are held in escrow until the award vests. Performance shares and performance units are awards that result in a payment to a grantee in shares of Applied common stock on a one-for-one basis if performance goals and/or other vesting criteria established by the Human Resources and Compensation Committee of Applied's Board of Directors (the Committee) are achieved or the awards otherwise vest. Restricted stock units, restricted stock and performance units typically vest over four years and vesting usually is subject to the grantee's continued service with Applied and, in some cases, achievement of specified performance goals. The compensation expense related to the service-based awards is determined using the fair market value of Applied common stock on the date of the grant, and the compensation expense is recognized over the vesting period.

Restricted stock units, restricted stock, performance shares and performance units granted to certain executive officers and other key employees are also subject to the achievement of specified performance goals (performance-based awards). These performance-based awards become eligible to vest only if performance goals are achieved and then actually will vest only if the grantee remains employed by Applied through each applicable vesting date.

Table of Contents

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS — (Continued)

For performance-based awards granted during fiscal 2011 and 2010, the performance goals require (i) the achievement of targeted annual, adjusted operating profit margin levels compared to Applied's peer companies in at least one of the four fiscal years beginning with the fiscal year of the grant, and (ii) that Applied's annual adjusted operating profit margin is positive in such year. An award that has become eligible for time-based vesting based on achievement of the performance goals will vest over approximately four years from the date of grant, provided that the grantee remains employed by Applied through each scheduled vesting date. Performance-based awards that do not become eligible for time-based vesting in a particular year may become eligible for time-based vesting in subsequent years up until the fourth fiscal year after grant, after which they are forfeited if the required performance goals have not been achieved. During the six months ended April 29, 2012 the Committee granted performance-based awards that require the achievement of positive and relative annual, adjusted operating profit margin goals in a manner similar to the previously granted performance-based awards, with additional shares becoming eligible for time-based vesting depending on certain levels of achievement of Applied's total shareholder return (TSR) relative to a peer group comprised of companies in the Standard & Poor's 500 Information Technology Index measured at the end of a two-year period beginning fiscal 2012. The fair value of these performance-based awards is estimated on the date of the grant and assumes that the specified performance goals will be achieved. If the goals are achieved, these awards vest over a specified remaining service period as described above. If the performance goals are not met, no compensation expense is recognized and any previously recognized compensation expense is reversed. The expected cost of each award is reflected over the service period and is reduced for estimated forfeitures.

As of April 29, 2012, 100 percent of the performance-based awards granted in fiscal 2011 had been earned based on performance and became subject to the additional time-based vesting requirements. As of April 29, 2012, 82 percent of the performance-based awards granted in fiscal 2010 had been earned based on performance and became subject to the additional time-based vesting requirements. The remaining 18 percent of the awards may still be earned, depending on future performance in one or both of fiscal years 2012 and 2013.

Restricted stock unit, restricted stock and performance unit activity for the six months ended April 29, 2012 was as follows:

	Shares	Weighted Average Grant Date Fair Value	Weighted Average Remaining Contractual Term	
(In millions, except per share amounts)				
Non-vested restricted stock units, restricted stock and performance units at October 30, 2011	28	\$ 12.64	2.8	Years
Granted	15	\$ 10.69		
Vested	(7)	\$ 12.86		
Canceled	(1)	\$ 12.89		
Non-vested restricted stock units, restricted stock and performance units at April 29, 2012	35	\$ 11.76	2.9	Years

At April 29, 2012, 1 million additional performance-based awards could be earned upon certain levels of achievement of Applied's TSR relative to a peer group at a future date.

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS — (Continued)

Employee Stock Purchase Plans

Under the ESPP, substantially all employees may purchase Applied common stock through payroll deductions at a price equal to 85 percent of the lower of the fair market value of Applied common stock at the beginning or end of each 6-month purchase period, subject to certain limits. Based on the Black-Scholes option pricing model, the weighted average estimated fair value of purchase rights under the ESPP was \$2.89 and \$3.61 for the three and six months ended April 29, 2012 and May 1, 2011, respectively. The number of shares issued under the ESPP during the three and six months ended April 29, 2012 and May 1, 2011 was 3 million. Compensation expense associated with the ESPP is calculated using the fair value of the employees' purchase rights under the Black-Scholes model. Underlying assumptions used in the model are outlined in the following table:

	Three Months Ended		Six Months Ended	
	April 29, 2012	May 1, 2011	April 29, 2012	May 1, 2011
ESPP:				
Dividend yield	2.94%	1.98%	2.94%	1.98%
Expected volatility	33%	27%	33%	27%
Risk-free interest rate	0.12%	0.17%	0.12%	0.17%
Expected life (in years)	0.5	0.5	0.5	0.5

Note 12 Employee Benefit Plans

Applied sponsors a number of employee benefit plans, including defined benefit plans of certain foreign subsidiaries, and a plan that provides certain medical and vision benefits to eligible retirees. A summary of the components of net periodic benefit costs of these defined and postretirement benefit plans for the three and six months ended April 29, 2012 and May 1, 2011 is presented below:

	Three Months Ended		Six Months Ended	
	April 29, 2012	May 1, 2011	April 29, 2012	May 1, 2011
	(In millions)			
Service cost	\$4	\$4	\$8	\$8
Interest cost	3	3	7	7
Expected return on plan assets	(3)	(3)	(6)	(6)
Amortization of actuarial loss	1	1	1	1
Net periodic benefit cost	\$5	\$5	\$10	\$10

Table of Contents

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS — (Continued)

Note 13 Income Taxes

Applied's effective income tax rate for the second quarter of fiscal 2012 and fiscal 2011 was a provision of 25.3 percent and 28.7 percent, respectively. Applied's effective income tax rate for the first six months of fiscal 2012 and fiscal 2011 was a provision of 25.6 percent and 27.2 percent, respectively. The rates for the three and six months ended April 29, 2012 were both lower than the rates for the comparable periods in the prior year primarily due to a favorable U.S. Internal Revenue Service audit settlement and changes in the composition of income in jurisdictions outside the U.S. with tax incentives. Applied's future effective income tax rate depends on various factors, such as tax legislation and the geographic composition of Applied's pre-tax income. Management carefully monitors these factors and timely adjusts the interim income tax rate accordingly.

Applied's tax returns remain subject to examination by taxing authorities for fiscal 2004 and later years.

The timing of the resolution of income tax examinations, as well as the amounts and timing of various tax payments that may be made as part of the resolution process, is highly uncertain and could cause an impact to Applied's consolidated results of operations. This could also cause large fluctuations in the balance sheet classification of current assets and non-current assets and liabilities. Applied expects that unrecognized tax benefits will decrease by \$9 million in the next 12 months.

Note 14 Warranty, Guarantees and Contingencies

Warranty

Changes in the warranty reserves during the three and six months ended April 29, 2012 and May 1, 2011 were as follows:

	Three Months Ended		Six Months Ended	
	April 29, 2012	May 1, 2011	April 29, 2012	May 1, 2011
(In millions)				
Beginning balance	\$161	\$173	\$168	\$155
Provisions for warranty	33	48	62	99
Consumption of reserves	(42)	(37)	(78)	(70)
Ending balance	\$152	\$184	\$152	\$184

Applied products are generally sold with a 12-month warranty period following installation. The provision for the estimated cost of warranty is recorded when revenue is recognized. Parts and labor are covered under the terms of the warranty agreement. The warranty provision is based on historical experience by product, configuration and geographic region. Quarterly warranty consumption is generally associated with sales that occurred during the preceding four quarters, and quarterly warranty provisions are generally related to the current quarter's sales.

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS — (Continued)

Guarantees

In the ordinary course of business, Applied provides standby letters of credit or other guarantee instruments to third parties as required for certain transactions initiated by either Applied or its subsidiaries. As of April 29, 2012, the maximum potential amount of future payments that Applied could be required to make under these guarantee agreements was approximately \$49 million. Applied has not recorded any liability in connection with these guarantee agreements beyond that required to appropriately account for the underlying transaction being guaranteed. Applied does not believe, based on historical experience and information currently available, that it is probable that any amounts will be required to be paid under these guarantee agreements.

Applied also has agreements with various banks to facilitate subsidiary banking operations worldwide, including overdraft arrangements, issuance of bank guarantees, and letters of credit. As of April 29, 2012, Applied Materials, Inc. has provided parent guarantees to banks for approximately \$188 million to cover these services.

Legal Matters

Jusung

Applied has been engaged in several lawsuits and patent and administrative proceedings with Jusung Engineering Co., Ltd. and/or Jusung Pacific Co., Ltd. (Jusung) in Taiwan and South Korea since 2003, and more recently in China, involving technology used in manufacturing liquid crystal displays (LCDs). Applied believes that it has meritorious claims and defenses against Jusung that it intends to pursue vigorously.

In 2004, Applied filed a complaint for patent infringement against Jusung in the Hsinchu District Court in Taiwan seeking damages and a permanent injunction for infringement of a patent related to chemical vapor deposition (CVD) equipment. Jusung filed a counterclaim against Applied. On December 31, 2010, the Hsinchu District Court dismissed both actions, and appeals by both parties remain pending at the Taiwan Intellectual Property Court. Jusung unsuccessfully sought invalidation of Applied's CVD patent in the Taiwanese Intellectual Property Office (TIPO). In September 2010, the Taipei Supreme Administrative Court dismissed Jusung's appeal of the TIPO's decision. In 2009, Jusung filed a second action with the TIPO seeking invalidation of Applied's CVD patent, which action remains pending.

In 2006, Applied filed an action in the TIPO challenging the validity of a Jusung patent related to separability of the transfer chamber on a CVD tool. Jusung sued Applied and AKT America in the Hsinchu District Court in Taiwan alleging infringement of the same patent. In March 2009, the Hsinchu District Court dismissed Jusung's lawsuit; in October, 2010, the Taiwan Intellectual Property Court dismissed Jusung's appeal; and on December 1, 2011, the Supreme Administrative Court dismissed Jusung's further appeal. Separately, the TIPO granted requests by Applied and another party to invalidate Jusung's patent. Following intermediate court appeals, on December 15, 2011, the Supreme Administrative Court dismissed Jusung's further appeal, irrevocably invalidating Jusung's patent. In November 2009, Applied filed an action in China with the Patent Reexamination Board of the State Intellectual Property Office seeking to invalidate a Chinese counterpart to Jusung's separable chamber patent. On June 18, 2010, the Patent Reexamination Board issued a decision invalidating Jusung's patent in China. Jusung appealed to the Beijing No. 1 Intermediate People's Court and on June 13, 2011, this Court dismissed Jusung's appeal. Jusung appealed this decision to the Beijing High People's Court in July 2011, and Jusung's appeal remains pending.

In 2006, Jusung filed a complaint of private prosecution in the Taipei District Court of Taiwan alleging that Applied's outside counsel received from the Court and used a copy of an expert report that Jusung had filed in the ongoing patent infringement lawsuits that Jusung had intended to remain confidential. The complaint named as defendants Applied's outside counsel in Taiwan, as well as Michael R. Splinter, Applied's Chairman, President and Chief Executive Officer, as the statutory representative of Applied. The Taipei District Court dismissed the private prosecution complaint, and the matter was transferred to the Taipei District Attorney's Office. The Taipei District Attorney's Office issued six separate rulings not to prosecute, each of which Jusung appealed. In the first five instances, the Taiwan High Court District Attorney returned the matter to the Taipei District Attorney's Office for

further consideration. Following the sixth ruling not to prosecute, the Taiwan High Court District Attorney dismissed Jusung's appeal. Jusung then petitioned to the Taipei District Court for a trial, and on February 7, 2012, the Court dismissed Jusung's petition.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS — (Continued)

Korea Criminal Proceedings

In February 2010, the Seoul Prosecutor's Office for the Eastern District of Korea (the Prosecutor's Office) indicted employees of several companies for the alleged improper receipt and use of confidential information belonging to Samsung Electronics Co., Ltd. (Samsung), a major Applied customer based in Korea. The Prosecutor's Office did not name Applied or any of its subsidiaries as a party to the criminal action. The individuals charged included the former head of Applied Materials Korea (AMK), who at the time of the indictment was a vice president of Applied Materials, Inc., and certain other AMK employees. Hearings on these matters are ongoing in the Seoul Eastern District Court. Applied and Samsung entered into a settlement agreement effective as of November 1, 2010, which resolves potential civil claims related to this matter, which is separate from and does not affect the criminal proceedings.

From time to time, Applied receives notification from third parties, including customers and suppliers, seeking indemnification, litigation support, payment of money or other actions by Applied in connection with claims made against them. In addition, from time to time, Applied receives notification from third parties claiming that Applied may be or is infringing or misusing their intellectual property or other rights. Applied also is subject to various other legal proceedings and claims, both asserted and unasserted, that arise in the ordinary course of business.

Although the outcome of the above-described matters or these claims and proceedings cannot be predicted with certainty, Applied does not believe that any of these proceedings or other claims will have a material adverse effect on its consolidated financial condition or results of operations.

Environmental Matters

Liabilities for future remediation costs are recorded when environmental assessments and/or remedial efforts are probable and costs can be reasonably estimated. Environmental liabilities classified as current are included in accounts payable and accrued expenses with the non-current portion included in other liabilities. Generally, the timing of these accruals is based on the completion of a feasibility study or a commitment to a formal plan of action. Environmental liabilities are based on best estimates of probable undiscounted future costs based on currently available information. Should new information become available, the liability would be adjusted.

In connection with the acquisition of Varian, Applied assumed certain environmental liabilities, including environmental investigation and remediation costs. Environmental remediation costs incurred were not material for the three and six months ended April 29, 2012. At April 29, 2012, Applied's environmental liability was \$9 million, of which \$8 million was classified as non-current and included in other liabilities. As part of accounting for the acquisition of Varian, Applied performed a review and assessment of the assumed environmental liabilities. Management believes that the liability arising from environmental-related matters is not material to Applied's consolidated financial position.

Prior to the acquisition, Varian had entered into a settlement agreement with an insurance company to pay a portion of the past and future environmental-related expenditures. Accordingly, as part of the acquisition, Applied recorded a receivable of \$2 million as of April 29, 2012, which is included in other assets.

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS — (Continued)

Note 15 Industry Segment Operations

Applied's four reportable segments are: Silicon Systems Group, Applied Global Services, Display, and Energy and Environmental Solutions. Applied's chief operating decision-maker has been identified as the President and Chief Executive Officer, who reviews operating results to make decisions about allocating resources and assessing performance for the entire company. Segment information is presented based upon Applied's management organization structure as of April 29, 2012, and the distinctive nature of each segment. Future changes to this internal financial structure may result in changes to Applied's reportable segments.

Each reportable segment is separately managed and has separate financial results that are reviewed by Applied's chief operating decision-maker. Each reportable segment contains closely related products that are unique to the particular segment. Segment operating income is determined based upon internal performance measures used by Applied's chief operating decision-maker.

Applied derives the segment results directly from its internal management reporting system. The accounting policies Applied uses to derive reportable segment results are substantially the same as those used for external reporting purposes. Management measures the performance of each reportable segment based upon several metrics including orders, net sales and operating income. Management uses these results to evaluate the performance of, and to assign resources to, each of the reportable segments. Applied does not allocate to its reportable segments certain operating expenses that it manages separately at the corporate level, which include costs related to share-based compensation; certain management, finance, legal, human resources, and research, development and engineering functions provided at the corporate level; and unabsorbed information technology and occupancy. In addition, Applied does not allocate to its reportable segments restructuring and asset impairment charges and any associated adjustments related to restructuring actions, unless these charges or adjustments pertain to a specific reportable segment. Segment operating income excludes interest income/expense and other financial charges and income taxes. Management does not consider the unallocated costs in measuring the performance of the reportable segments.

In November 2011, Applied completed its acquisition of Varian. Beginning in the first quarter of fiscal 2012, the acquired business is primarily included in the results for the Silicon Systems Group and Applied Global Services segments, with certain corporate functions included in corporate and unallocated costs.

The Silicon Systems Group segment includes semiconductor capital equipment for etch, rapid thermal processing, deposition, chemical mechanical planarization, metrology and inspection, wafer packaging, and ion implantation.

The Applied Global Services segment includes technically differentiated products and services to improve operating efficiency, reduce operating costs and lessen the environmental impact of semiconductor, display and solar customers' factories. Applied Global Services' products consist of spares, services, certain earlier generation products, remanufactured equipment, and products that have reached a particular stage in the product lifecycle. Customer demand for these products and services is fulfilled through a global distribution system with trained service engineers located in close proximity to customer sites.

The Display segment encompasses products for manufacturing LCDs, organic light-emitting diodes, and other display technologies for TVs, personal computers, tablets, smart phones, and other consumer-oriented devices.

The Energy and Environmental Solutions segment includes products for fabricating solar photovoltaic cells and modules, high throughput roll-to-roll coating systems for flexible electronics and web products, and systems used in the manufacture of energy-efficient glass.

Table of Contents

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS — (Continued)

Net sales and operating income (loss) for each reportable segment for the three and six months ended April 29, 2012 and May 1, 2011 were as follows:

	Three Months Ended		Six Months Ended	
	Net Sales	Operating Income (loss)	Net Sales	Operating Income (loss)
	(In millions)			
April 29, 2012:				
Silicon Systems Group	\$1,777	\$504	\$3,121	\$775
Applied Global Services	551	109	1,085	216
Display	134	7	238	12
Energy and Environmental Solutions	79	(63)	286	(86)
Total Segment	\$2,541	\$557	\$4,730	\$917
May 1, 2011:				
Silicon Systems Group	\$1,453	\$491	\$2,950	\$1,034
Applied Global Services	614	91	1,181	176
Display	158	31	305	58
Energy and Environmental Solutions	637	170	1,113	313
Total Segment	\$2,862	\$783	\$5,549	\$1,581

Operating results for the three and six months ended May 1, 2011 included favorable adjustments of \$8 million and \$36 million, respectively, related to a restructuring program announced in fiscal 2010, which was reported in the Energy and Environmental Solutions segment.

In the second quarter of fiscal 2011, Applied negotiated the divestiture of certain assets held in the Applied Global Services segment and determined identified intangible assets and purchased technology included in assets held for sale to be impaired. Results for the three and six months ended May 1, 2011 included impairment charges of \$24 million, which were reported in the Applied Global Services segment.

As discussed in Note 16, Subsequent Event, on May 10, 2012, Applied announced that a committee of the Board of Directors approved a plan to restructure the Energy and Environmental Solutions segment.

Reconciliations of total segment operating income to Applied's consolidated operating income for the three and six months ended April 29, 2012 and May 1, 2011 were as follows:

	Three Months Ended		Six Months Ended	
	April 29, 2012	May 1, 2011	April 29, 2012	May 1, 2011
	(In millions)			
Total segment operating income	\$557	\$783	\$917	\$1,581
Corporate and unallocated costs	(148)	(126)	(329)	(251)
Restructuring and asset impairment benefit, net	—	20	—	21
Income from operations	\$409	\$677	\$588	\$1,351

Corporate and unallocated costs for the three and six months ended April 29, 2012 included deal costs and other acquisition-related costs related to the Varian acquisition of \$1 million and \$37 million, respectively.

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS — (Continued)

The following companies accounted for at least 10 percent of Applied's net sales for the six months ended April 29, 2012, which were for products in multiple reportable segments.

	April 29, 2012	
Samsung Electronics Co., Ltd .	30	%
Taiwan Semiconductor Manufacturing Company Limited	13	%

Note 16 Subsequent Event

On May 10, 2012, Applied announced that a committee of the Board of Directors approved a plan (the Restructuring Plan) to restructure the Company's Energy and Environmental Solutions segment in light of challenging industry conditions affecting the solar photovoltaic and light-emitting diode (LED) equipment markets. These actions are consistent with the Company's previously-stated goal to reduce the Energy and Environmental Solutions segment's annual revenue breakeven level. As part of the Restructuring Plan, Applied expects to relocate manufacturing, business operations and customer support functions of precision wafering systems and significantly reduce LED development activities, which will impact up to approximately 250 positions globally. The total estimated pre-tax cost of implementing the Restructuring Plan is expected to be in the range of approximately \$70 million to \$100 million, which will be incurred over a period of 12 to 18 months beginning in the third quarter of fiscal 2012.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

All statements in this Quarterly Report on Form 10-Q and those made by the management of Applied, other than statements of historical fact, are forward-looking statements. Examples of forward-looking statements include statements regarding Applied's future financial or operating results, cash flows and cash deployment strategies, declaration of dividends, share repurchases, expected nature and impact of restructuring activities, business strategies, projected costs, products, competitive positions, management's plans and objectives for future operations, research and development, acquisitions and joint ventures, growth opportunities, customers, working capital, liquidity, investment portfolio and policies, and legal proceedings and claims, as well as industry trends and outlooks. These forward-looking statements are based on management's estimates, projections and assumptions as of the date hereof and include the assumptions that underlie such statements. Forward-looking statements may contain words such as "may," "will," "should," "could," "would," "expect," "plan," "anticipate," "believe," "estimate," "potential" and "continue," or other comparable terminology. Any expectations based on these forward-looking statements are subject to risks and uncertainties and other important factors, including those discussed in Part II, Item 1A, "Risk Factors" below and elsewhere in this report. Other risks and uncertainties may be disclosed in Applied's prior Securities and Exchange Commission (SEC) filings. These and many other factors could affect Applied's future financial condition and operating results and could cause actual results to differ materially from expectations based on forward-looking statements made in this document or elsewhere by Applied or on its behalf. Applied undertakes no obligation to revise or update any forward-looking statements.

Overview

Applied provides manufacturing equipment, services and software to the global semiconductor, flat panel display, solar photovoltaic (PV) and related industries. Applied's customers include manufacturers of semiconductor wafers and chips, flat panel liquid crystal displays (LCDs), solar PV cells and modules, and other electronic devices. These customers may use what they manufacture in their own end products or sell the items to other companies for use in advanced electronic components. Applied operates in four reportable segments: Silicon Systems Group, Applied Global Services, Display, and Energy and Environmental Solutions. A summary of financial information for each reportable segment is found in Note 15 of Notes to Consolidated Condensed Financial Statements. A discussion of factors that could affect Applied's operations is set forth under "Risk Factors" in Item 1A of Part II of this report, which is incorporated herein by reference. Product development and manufacturing activities occur primarily in North America, Europe, Israel and Asia. Applied's broad range of equipment and service products are highly technical and are sold primarily through a direct sales force.

Applied's results historically have been driven primarily by worldwide demand for semiconductors, which in turn depends on end-user demand for electronic products. Each of Applied's businesses is subject to highly cyclical industry conditions, as demand for manufacturing equipment and services can change depending on supply and demand for chips, LCDs, solar PVs and other electronic devices, as well as other factors, such as global economic and market conditions, and technological advances in fabrication processes. In light of this cyclicity, Applied's results can vary significantly year over year, as well as quarter over quarter.

The Silicon Systems Group continues to reflect investment in the semiconductor industry driven by capacity demand for mobile devices. Foundry customers are expected to lead capacity additions for advanced technology nodes, and are the primary drivers for net sales of the Silicon Systems Group.

Table of Contents

The following tables present certain significant measurements for the periods indicated:

	Three Months Ended			Change Q2 2012 over Q1 2012	Change Q2 2012 over Q2 2011

Reconciliations of non-GAAP measures are presented under “Non-GAAP Results.”

Fiscal years 2012 and 2011 are both 52-week years with 26 weeks in the first six months.

Table of Contents

In November 2011, Applied completed its acquisition of Varian Semiconductor Equipment Associates, Inc. (Varian). As of the beginning of the first quarter of fiscal 2012, the acquired business is included in Applied's consolidated results of operations and in the results for the Silicon Systems Group and Applied Global Services segments. For the three and six months ended April 29, 2012, net sales of Varian products were \$333 million and \$535 million, respectively.

Financial results for the second quarter of fiscal 2012 compared to the first quarter of fiscal 2012 reflected an increase in both new orders and net sales, primarily driven by strong demand for semiconductor manufacturing equipment. Operating income in the second quarter of fiscal 2012 included \$69 million of charges attributable to the acquisition of Varian consisting of inventory fair value adjustments on products sold, amortization of purchased intangible assets, share-based compensation associated with accelerated vesting, deal costs and other integration costs. Of this amount, \$51 million was recorded under cost of products sold and \$18 million was included in operating expenses.

Financial results for the second quarter and first half of fiscal 2012 compared to the comparable periods in the prior year were characterized by the continued strong demand for semiconductor equipment and the addition of Varian's products, offset by decreased demand for display and solar equipment due to cyclical downturns in those industries. Operating income for the first six months of fiscal 2012 included \$222 million of charges attributable to the acquisition of Varian as described above. Of this amount, \$147 million was recorded under cost of products sold and \$75 million was included in operating expenses. Operating expenses included \$37 million of deal costs and other acquisition-related costs, which were not allocated to the segments. Operating income in the second quarter and first half of fiscal 2011 included \$4 million and \$33 million, respectively, of favorable adjustments to restructuring reserves, net of asset impairment charges.

On May 10, 2012, Applied announced that a committee of the Board of Directors approved a plan (the Restructuring Plan) to restructure the Company's Energy and Environmental Solutions segment in light of challenging industry conditions affecting the solar photovoltaic and LED equipment markets. These actions are consistent with the Company's previously-stated goal to reduce the Energy and Environmental Solutions segment's annual revenue breakeven level. As part of the Restructuring Plan, Applied expects to relocate manufacturing, business operations and customer support functions of precision wafering systems and significantly reduce LED development activities, which will impact up to approximately 250 positions globally. The total estimated pre-tax cost of implementing the Restructuring Plan is expected to be in the range of approximately \$70 million to \$100 million, which will be incurred over a period of 12 to 18 months beginning in the third quarter of fiscal 2012.

Results of Operations

New Orders

New orders by geographic region, determined by the product shipment destination specified by the customer, for the periods indicated were as follows:

	Three Months Ended						Change	Change
	April 29, 2012		January 29, 2012		May 1, 2011		Q2 2012	Q2 2012

Total	4,773	100	6,157	100	(22)%

(*)Primarily the United States.

New orders for the second quarter of fiscal 2012 increased from the first quarter of fiscal 2012, primarily attributable to increased demand for semiconductor equipment primarily from foundry customers. New orders for the second and first quarters of fiscal 2012 included \$366 million and \$267 million of new orders for Varian products, respectively. New orders for the second quarter of fiscal 2012 also included a \$95 million single order of thin film solar equipment. New orders for the second quarter and first six months of fiscal 2012 decreased from the comparable periods in the prior year, reflecting sharp decreases in demand for c-Si solar and LCD TV equipment, partially offset by orders for Varian products.

For the second quarter of fiscal 2012, orders to customers in Taiwan had the largest increase compared to the first quarter of fiscal 2012, while orders to customers in Korea had the largest increase compared to the second quarter of fiscal 2011, reflecting increased orders of semiconductor equipment. Orders to customers in Korea for the first half of fiscal 2012 increased compared to the first half of fiscal 2011, while orders to customers in all other regions decreased.

New orders by reportable segment for the periods indicated were as follows:

	Three Months Ended				Change		Change
	April 29, 2012		January 29, 2012		May 1, 2011		Q2 2012 over Q1 2012
	(\$)	(%)	(\$)	(%)	(\$)	(%)	over Q2 2011
	(In millions, except percentages)						
Silicon Systems Group	1,969	71	1,418	70	1,715	54	39%
Applied Global Services	650	24	517	26	603	19	26%
Display	84	3	40	2	255	8	110%
Energy and Environmental Solutions	62	2	33	2	612	19	88%
Total	2,765	100	2,008	100	3,185	100	38%

Table of Contents

	Six Months Ended April 29, 2012		May 1, 2011		Change First Half 2012 over First Half 2011
	(\$)	(%)	(\$)	(%)	
	(In millions, except percentages)				
Silicon Systems Group	3,387	71	3,325	54	2%
Applied Global Services	1,167	24	1,155	19	1%
Display	124	3	397	6	(69)%
Energy and Environmental Solutions	95	2	1,280	21	(93)%
Total	4,773	100	6,157	100	(22)%

New orders for the second quarter of fiscal 2012 compared to the first quarter of fiscal 2012 increased for all segments, led by increased demand for semiconductor equipment led by foundry customers. New orders for the second quarter and first half of fiscal 2012 increased for the Silicon Systems Group and Applied Global Services, but decreased for Display and Energy and Environmental Solutions from the comparable periods in the prior year. The Silicon Systems Group's relative share of total new orders increased for both the three and six month periods ended April 29, 2012 from the prior quarter and the comparable periods in the prior year.

Applied's backlog for the most recent three fiscal quarters was as follows: \$2.4 billion at April 29, 2012, \$2.2 billion at January 29, 2012, and \$2.4 billion at October 30, 2011. Backlog adjustments for the quarter ended April 29, 2012 were negative and totaled \$24 million. Negative backlog adjustments of \$97 million consisted of financial debookings, cancellations and foreign exchange effects primarily related to services and semiconductor equipment customers. Negative adjustments were offset in part by \$73 million of rebookings primarily related to display customers. Backlog consists of: (1) orders for which written authorizations have been accepted and assigned shipment dates are within the next 12 months, or shipment has occurred but revenue has not been recognized; and (2) contractual service revenue and maintenance fees to be earned within the next 12 months. Applied's backlog at any particular time is not necessarily indicative of actual sales for any future periods, due to the potential for customer changes in delivery schedules or cancellation of orders. In the second quarter of fiscal 2012, approximately 71 percent of the net sales in the Silicon Systems Group, Applied's largest business segment, were from orders received and shipped in the same quarter.

Backlog by reportable segment as of April 29, 2012, January 29, 2012, and October 30, 2011 was as follows:

	April 29, 2012		January 29, 2012		October 30, 2011		Change Q2 2012 over Q1 2012	Change Q2 2012 over Q4 2011

Total	4,730	100	5,549	100			(15)%

(*)Primarily the United States.

Net sales for the second quarter of fiscal 2012 increased compared to the first quarter of fiscal 2012 as a result of strong investments in semiconductor equipment driven by foundry customers and continued investment in touch panel and low temperature polysilicon (LTPS) systems by display customers, offset by decreased investment in c-Si solar equipment. The decrease in net sales for the second quarter and first half of fiscal 2012 from the comparable periods in the prior year reflected decreased demand for c-Si solar products and LCD TV equipment, partially offset by the addition of Varian. Net sales for the second quarter and first half of fiscal 2012 included sales of Varian products of approximately \$333 million and \$535 million, respectively.

For the second quarter of fiscal 2012, net sales to customers in Taiwan, the majority of which were for semiconductor equipment, had the largest increase compared to the first quarter of fiscal 2012, while Korea had the largest increase compared to the second quarter of fiscal 2011. In the second quarter of fiscal 2012, the majority of net sales in Korea, Taiwan and North America reflected purchases of semiconductor products.

Table of Contents

Net sales by reportable segment for the periods indicated were as follows:

	Three Months Ended						Change	Change
	April 29, 2012		January 29, 2012		May 1, 2011		Q2 2012	Q2 2012
	(\$)	(%)	(\$)	(%)	(\$)	(%)	over	over
							Q1 2012	Q2 2011
	(In millions, except percentages)							
Silicon Systems Group	1,777	70	1,344	61	1,453	51	32%	22%
Applied Global Services	551	22	534	24	614	21	3%	(10)%
Display	134	5	104	5	158	6	29%	(15)%
Energy and Environmental Solutions	79	3	207	10	637	22	(62)%	(88)%
Total	2,541	100	2,189	100	2,862	100	16%	(11)%

	Six Months Ended				Change
	April 29, 2012		May 1, 2011		First Half 2012
	\$	%	\$	%	over
	(In millions, except percentages)				First Half 2011
Silicon Systems Group	3,121	66	2,950	53	6%
Applied Global Services	1,085	23	1,181	21	(8)%
Display	238	5	305	6	(22)%
Energy and Environmental Solutions	286	6	1,113	20	(74)%
Total	4,730	100	5,549	100	(15)%

Net sales for the second quarter of fiscal 2012 compared to the first quarter of fiscal 2012 increased for all segments except Energy and Environmental Solutions, which continued to be impacted by excess manufacturing capacity in the solar industry. Net sales for the second quarter and first half of fiscal 2012 decreased from comparable periods in the prior year across all segments except the Silicon Systems Group. The decrease reflected lower demand for c-Si solar and LCD TV equipment, partially offset by orders for Varian products. The Silicon Systems Group's relative share of total net sales increased for both the three and six month periods ended April 29, 2012 compared to the prior quarter and the comparable periods in the prior year.

Gross Margin

Gross margins for the periods indicated were as follows:

	Three Months Ended					Six Months Ended			Change

Non-GAAP Results									
Gross margin	\$1,070	\$890	\$1,198	\$180	\$(128)	\$1,960	\$2,343		\$(383)
Gross margin (% of net sales)	42	% 41	% 42	% 1 point	—	41	% 42	%	(1) point

Table of Contents

The increase in the gross margin for the second quarter of fiscal 2012 compared to the first quarter of fiscal 2012 was principally attributable to higher net sales, changes in segment mix and a decrease in Varian acquisition-related costs. Gross margin for the three and six months ended April 29, 2012 decreased from the comparable periods in the prior year primarily due to changes in segment mix, inventory fair value adjustments and intangible asset amortization associated with purchase accounting and additional inventory charges. Inventory fair value adjustments and intangible asset amortization associated with purchase accounting were \$50 million and \$128 million for the three and six months ended April 29, 2012, respectively. Gross margin during the three month periods ended April 29, 2012, January 29, 2012 and May 1, 2011 included \$14 million, \$13 million and \$13 million of share-based compensation expense, respectively. Gross margin during the first six months of fiscal 2012 and 2011 included \$27 million and \$24 million of share-based compensation expense, respectively. Reconciliations of non-GAAP measures are presented under “Non-GAAP Results.”

Research, Development and Engineering

Research, development and engineering (RD&E) expenses for the periods indicated were as follows:

Three Months Ended					Six Months Ended			Change
Research, development and engineering	April 29, 2012	January 29, 2012	May 1, 2011	Change Q2 2012 over Q1 2012	Change Q2 2012 over Q2 2011	April 29, 2012	May 1, 2011	First Half 2012 over First Half 2011
	(In millions)							
	\$321	\$304	\$297	\$17	\$24	\$625	\$567	\$58

Applied’s future operating results depend to a considerable extent on its ability to maintain a competitive advantage in the equipment and service products it provides. Applied believes that it is critical to continue to make substantial investments in RD&E to assure the availability of innovative technology that meets the current and projected requirements of its customers’ most advanced designs. Applied historically has maintained its commitment to investing in RD&E in order to continue to offer new products and technologies. The increase in RD&E expense for the second quarter of fiscal 2012 compared to the first quarter of fiscal 2012 was in line with accelerated technology adoption and continued investments in new product development areas such as 450mm wafer systems. RD&E expense for the second quarter and first six months of fiscal 2012 increased from the comparable periods in the prior year due to RD&E expenses related to Varian of approximately \$48 million and \$86 million for the three and six months ended April 29, 2012, respectively. RD&E expense during each of the three month periods ended April 29, 2012, January 29, 2012 and May 1, 2011 included \$13 million, \$13 million and \$12 million of share-based compensation expense, respectively. RD&E expense during the first six months of fiscal 2012 and 2011 included \$26 million and \$22 million of share-based compensation expense, respectively. Development cycles range from 12 to 36 months depending on whether the product is an enhancement of an existing product, which typically has a shorter development cycle, or a new product, which typically has a longer development cycle. Most of Applied’s existing products resulted from internal development activities and innovations involving new technologies, materials and processes. In certain instances, Applied acquires technologies, either in existing or new product areas, to complement its existing technology capabilities and to reduce time to market.

Table of Contents

Marketing, Selling, General and Administrative

Marketing, selling, general and administrative expenses for the periods indicated were as follows:

	Three Months Ended			Change Q2 2012 over Q1 2012	Change Q2 2012 over Q2 2011	Six Months Ended		Change First Half 2012 over First Half 2011
	April 29, 2012	January 29, 2012	May 1, 2011			April 29, 2012	May 1, 2011	
(In millions)								
Marketing, selling, general and administrative	\$281	\$303	\$219	\$(22) \$62	\$584	\$440	\$144

The decrease in marketing, selling, general and administrative expenses for the second quarter of fiscal 2012 compared to the first quarter of fiscal 2012 was primarily attributable to decreases in deal costs and share-based compensation expense, partially offset by lower savings associated with temporary shutdowns. Marketing, selling, general and administrative expenses increased during the three and six months ended April 29, 2012 from the comparable periods in the prior year primarily due to acquisition-related costs and other expenses incurred in connection with Varian aggregating \$44 million and \$129 million, respectively. Marketing, selling, general and administrative expenses during each of the three month periods ended April 29, 2012, January 29, 2012 and May 1, 2011 included \$16 million, \$27 million and \$13 million of share-based compensation expense, respectively. Marketing, selling, general and administrative expenses during the first six months of fiscal 2012 and 2011 included \$43 million and \$26 million of share-based compensation expense, respectively.

Restructuring Charges and Asset Impairments

Restructuring charges and asset impairment expenses for the periods indicated were as follows:

	Three Months Ended			Change Q2 2012 over Q1 2012	Change Q2 2012 over Q2 2011	Six Months Ended		Change First Half 2012 over First Half 2011
	April 29, 2012	January 29, 2012	May 1, 2011			April 29, 2012	May 1, 2011	
(In millions)								
Restructuring charges and asset impairments	\$—	\$—	\$(4) \$—	\$4	\$—	\$(33) \$33

During the second quarter of fiscal 2011, as a result of changes in Applied's operating environment and business requirements, total favorable adjustments of \$28 million related to various restructuring programs announced in prior years were recorded, partially offset by intangible asset impairment charges of \$24 million. During the first half of fiscal 2011, total favorable adjustments of \$60 million related to various restructuring programs announced in prior years were recorded, partially offset by asset impairment charges of \$27 million related to certain intangible assets, as a result of changes in Applied's operating environment and business requirements.

As discussed in the Overview section, on May 10, 2012, Applied announced that a committee of the Board of Directors approved a plan to restructure the Energy and Environmental Solutions segment.

Table of Contents

Interest and Other Expenses

Interest and other expenses for the periods indicated were as follows:

	Three Months Ended			Change	Change	Six Months Ended		Change
	April 29, 2012	January 29, 2012	May 1, 2011	Q2 2012 over Q1 2012	Q2 2012 over Q2 2011	April 29, 2012	May 1, 2011	First Half 2012 over First Half 2011
	(In millions)							
Interest and other expenses	\$23	\$24	\$5	\$(1) \$18	\$47	\$10	\$37

Interest and other expenses for the second quarter of fiscal 2012 remained essentially flat compared to the first quarter of fiscal 2012. Interest and other expenses in the second quarter and first of half of fiscal 2012 increased from the comparable periods in the prior year, primarily due to interest on the senior unsecured notes issued in the third fiscal quarter of 2011.

Interest and Other Income, Net

Interest and other income, net, for the periods indicated were as follows:

	Three Months Ended			Change	Change	Six Months Ended		Change
	April 29, 2012	January 29, 2012	May 1, 2011	Q2 2012 over Q1 2012	Q2 2012 over Q2 2011	April 29, 2012	May 1, 2011	First Half 2012 over First Half 2011
	(In millions)							
Interest and other income, net	\$4	\$4	\$14	\$—	\$(10) \$8	\$25	\$(17

Interest and other income, net remained flat in the second quarter of fiscal 2012 from the first quarter of fiscal 2012. The decrease in interest and other income, net in the second quarter and first half of fiscal 2012 from the comparable periods in the prior year was primarily due to a decrease in gains realized on sale of investment securities and lower interest rates.

Income Taxes

Income tax expenses (benefit) for the periods indicated were as follows:

	Three Months Ended			Change	Change	Six Months Ended		Change
	April 29, 2012	January 29, 2012	May 1, 2011	Q2 2012 over Q1 2012	Q2 2012 over Q2 2011	April 29, 2012	May 1, 2011	First Half 2012 over First Half 2011
	(In millions, except percentages)							
Provision for income taxes	\$98	\$42	\$197	\$56	\$(99) \$140	\$371	\$(231)
Effective income tax rate	25.3	% 26.4	% 28.7	% (1.1) points	(3.4) points	25.6	% 27.2	% (1.6) points

Applied's effective tax rate for the second quarter of fiscal 2012 slightly decreased compared to the prior quarter. Applied's effective tax rates for the three and six months ended April 29, 2012 were both lower than the rates for the

comparable periods in the prior year primarily due to a net favorable U.S. Internal Revenue Service audit settlement and changes in the composition of income in jurisdictions outside the U.S. with tax incentives. Applied's future effective income tax rate depends on various factors, such as tax legislation and the geographic composition of Applied's pre-tax income. Management carefully monitors these factors and timely adjusts the interim income tax rate accordingly.

Table of Contents

Segment Information

Applied reports financial results in four segments: Silicon Systems Group, Applied Global Services, Display, and Energy and Environmental Solutions. A description of the products and services, as well as financial data, for each reportable segment can be found in Note 15 of Notes to Consolidated Condensed Financial Statements. Applied does not allocate to its reportable segments certain operating expenses that it manages separately at the corporate level. These unallocated costs include costs for share-based compensation; certain management, finance, legal, human resources, and RD&E functions provided at the corporate level; and unabsorbed information technology and occupancy. In addition, Applied does not allocate to its reportable segments restructuring and asset impairment charges and any associated adjustments related to restructuring actions, unless these charges or adjustments pertain to a specific reportable segment.

The results for each reportable segment are discussed below.

Silicon Systems Group Segment

The Silicon Systems Group segment includes semiconductor capital equipment for deposition, etch, rapid thermal processing, chemical mechanical planarization, metrology and inspection, wafer-level packaging and, with the addition of Varian, ion implantation. Development efforts are focused on solving customers' key technical challenges in transistor, patterning, interconnect and packaging performance as devices scale to advanced technology nodes. The competitive environment for the Silicon Systems Group in the first half of fiscal 2012 reflected continued investment in the semiconductor industry driven by capacity demand for mobile computing. Foundry customers led capacity additions for advanced technology nodes and were the primary drivers for net sales of the Silicon Systems Group. Investment by DRAM customers remained low in the period due to lack of profitability and oversupply in the DRAM memory market.

Certain significant measures for the periods indicated were as follows:

	Three Months Ended			Change		Change	
	April 29, 2012	January 29, 2012	May 1, 2011	Q2 2012 over Q1 2012		Q2 2012 over Q2 2011	
	(In millions, except percentages)						
New orders	\$1,969	\$1,418	\$1,715	\$551	39%	\$254	15%
Net sales	1,777	1,344	1,453	433	32%	324	22%
Operating income	504	271	491	233	86%	13	3%
Operating margin	28	% 20	% 34	%	8 points		(6) points
Non-GAAP Results							
Operating income	574	386	493	188	49%	81	16%
Operating margin	32	% 29	% 34	%	3 points		(2) points
	Six Months Ended			Change			
	April 29, 2012		May 1, 2011	First Half 2012 over First Half 2011			
	(In millions, except percentages)						
New orders	\$3,387		\$3,325	\$62		2%	
Net sales	3,121		2,950	171		6%	
Operating income	775		1,034	(259)) (25)%	
Operating margin	25		% 35	%		(10) points	
Non-GAAP Results							
Operating income	960		1,039	(79)) (8)%	
Operating margin	31		% 35	%		(4) points	

Reconciliations of non-GAAP measures are presented under "Non-GAAP Results."

Table of Contents

The increases in new orders and net sales for the second quarter of fiscal 2012 compared to the first quarter of fiscal 2012 were primarily attributable to increased demand from foundry customers. Approximately 71 percent of net sales in the second quarter of fiscal 2012 were for orders received and shipped within the quarter. The segment's book to bill ratio (new orders divided by net sales) for the second quarter of fiscal 2012 remained flat at 1.1 compared to the first quarter of fiscal 2012. Operating income and non-GAAP operating income for the second quarter of fiscal 2012 increased compared to the prior quarter, reflecting an increase in net sales and lower acquisition-related costs associated with Varian, partially offset by additional inventory charges of \$20 million.

The increases in new orders and net sales for the second quarter of fiscal 2012 compared to the second quarter of fiscal 2011 were primarily due to increased demand from foundry customers, which was partially driven by demand for Varian products. Varian products contributed approximately \$315 million and \$277 million in new orders and net sales, respectively, in the second quarter of fiscal 2012. The segment's book to bill ratio of 1.1 for the second quarter of fiscal 2012 decreased compared to 1.2 for the second quarter of fiscal 2011, reflecting lower increases in new orders relative to net sales. Operating income for the second quarter of fiscal 2012 increased compared to the second quarter of fiscal 2011, reflecting higher net sales, partially offset by costs associated with Varian operations, Varian acquisition-related costs, and additional inventory charges of \$20 million. However, operating margin, as a percentage of net sales, decreased for the second quarter of fiscal 2012 compared to the same period in the prior year due to increased costs associated with Varian operations and acquisition relative to the increase in net sales.

New orders and net sales for the first half of fiscal 2012 increased compared to the first half of fiscal 2011, primarily due to the addition of Varian, partially offset by decreased demand from logic customers. New orders and net sales of Varian products for the first half of fiscal 2012 were \$523 million and \$430 million, respectively. The segment's book to bill ratio for the first half of fiscal 2012 remained flat at 1.1 compared to the first half of fiscal 2011. Operating income decreased for the first half of fiscal 2012 compared to the same period in the prior year due to changes in customer and product mix with the inclusion of Varian, costs associated with Varian operations, Varian acquisition-related costs, and additional inventory charges.

New orders for the Silicon Systems Group by end use application for the periods indicated were as follows:

	Three Months Ended			Six Months Ended		
	April 29, 2012	January 29, 2012	May 1, 2011	April 29, 2012	May 1, 2011	
Foundry	72	% 57	% 47	% 66	% 51	%
Memory	16	% 29	% 28	% 22	% 25	%
Logic and other	12	% 14	% 25	% 12	% 24	%
	100	% 100	% 100	% 100	% 100	%

The following regions accounted for at least 30 percent of total net sales for the Silicon Systems Group segment for one or more of the periods indicated:

	Three Months Ended				Change		Change	
	April 29, 2012		January 29, 2012		May 1, 2011		Q2 2012 over Q1 2012	Q2 2012 over Q2 2011
	(\$)	(%)	(\$)	(%)	(\$)	(%)		
(In millions, except percentages)								
Korea	650	37	552	41	210	14	18%	210%
Taiwan	473	27	275	20	453	31	72%	4%
	Six Months Ended				Change			
	April 29, 2012		May 1, 2011		First Half 2012 over First Half 2011			
	(\$)	(%)	(\$)	(%)				
(In millions, except percentages)								
Korea	1,203	39	328	11	267%			
Taiwan	748	24	866	29	(14)%			

Table of Contents

Two customers accounted for 60 percent of net sales in this segment for the second quarter of fiscal 2012. Customers in Korea, Taiwan and North America accounted for 84 percent and 82 percent of total net sales for this segment in the second and first quarters of fiscal 2012, respectively. In the second quarter of fiscal 2011, customers in North America and Taiwan accounted for 54 percent of total net sales for the Silicon Systems Group segment. In the first half of fiscal 2012, customers in Korea, Taiwan and North America accounted for 83 percent of total net sales for this segment, while Taiwan and North America accounted for 57 percent of net sales for this segment during the first half of fiscal 2011.

Applied Global Services Segment

The Applied Global Services segment encompasses technically differentiated products, including spares, services, certain earlier generation equipment products, remanufactured equipment, and products that have reached a particular stage in the product lifecycle, to improve operating efficiency, reduce operating costs, and lessen the environmental impact of semiconductor, display and solar customers' factories. Customer demand for products and services is fulfilled through a global distribution system with trained service engineers located in close proximity to customer sites.

Industry conditions that affected Applied Global Services' sales of spares and services in the first half of fiscal 2012 were principally semiconductor manufacturers' wafer starts as well as foundry utilization rates.

Certain significant measures for the periods indicated were as follows:

	Three Months Ended			Change		Change	
	April 29, 2012	January 29, 2012	May 1, 2011	Q2 2012 over Q1 2012		Q2 2012 over Q2 2011	
	(In millions, except percentages)						
New orders	\$650	\$517	\$603	\$133	26%	\$47	8%
Net sales	551	534	614	17	3%	(63)) (10)%
Operating income	109	107	91	2	2%	18	20%
Operating margin	20	% 20	% 15	%	—		5 points
Non-GAAP Results							
Operating income	111	113	117	(2)) (2)%	(6)) (5)%
Operating margin	20	% 21	% 19	%	(1) point		1 point
	Six Months Ended			Change		Change	
	April 29, 2012		May 1, 2011	First Half 2012 over First Half 2011			
	(In millions, except percentages)						
New orders	\$1,167		\$1,155	\$12		1%	
Net sales	1,085		1,181	(96))	(8)%	
Operating income	216		176	40		23%	
Operating margin	20		% 15	%		5 points	
Non-GAAP Results							
Operating income	224		204	20		10%	
Operating margin	21		% 17	%		4 points	

Reconciliations of non-GAAP measures are presented under "Non-GAAP Results."

New orders and net sales increased for the second quarter of fiscal 2012 compared to the prior quarter primarily due to higher demand for semiconductor spares and services. New orders for the second quarter of fiscal 2012 also included a \$95 million single order of thin film solar equipment. The book to bill ratio for the second quarter of fiscal 2012 increased to 1.2 compared to 1.0 for the first quarter of fiscal 2012, reflecting increased new orders and net sales.

Operating income remained relatively flat, despite the increase in net sales, due to additional inventory reserve charges

for evaluation units.

50

Table of Contents

New orders for the second quarter and first half of fiscal 2012 increased over the comparable periods in the prior year, due to a thin film solar equipment order. Net sales decreased in the second quarter and first half of fiscal 2012 over the comparable periods in the prior year as a result of a reduction in the installed based of 200mm systems, partially offset by sales of Varian products. New orders and net sales for the second quarter of fiscal 2012 included approximately \$51 million and \$56 million, respectively, of Varian products and services. The book to bill ratio of 1.2 for the second quarter of fiscal 2012 increased compared to 1.0 for the second quarter of fiscal 2011. The book to bill ratio for the first six months of fiscal 2012 increased to 1.1 compared to 1.0 for the first six months of fiscal 2011, as a result of higher new orders. Operating income year-over-year increased primarily due to impairment charges recorded in the second quarter of fiscal 2011.

Display Segment

The Display segment encompasses products for manufacturing LCDs, OLEDs, and other display technologies for TVs, personal computers, tablets, smart phones, and other consumer-oriented devices. The segment is focused on expanding market share by differentiation with larger-scale manufacturing equipment for TVs, entry into new markets such as the LTPS, metal oxide, and touch panel sectors, and development of products that enable manufacturing cost reductions through productivity and uniformity.

The market environment for Applied's Display segment in the first half of fiscal 2012 was characterized by decreased capacity requirements for larger flat panel televisions and continued demand for touch screen and high-end mobile devices compared to the prior year. The display industry overall remains in a down cycle.

Certain significant measures for the periods indicated were as follows:

	Three Months Ended			Change		Change	
	April 29, 2012	January 29, 2012	May 1, 2011	Q2 2012 over Q1 2012		Q2 2012 over Q2 2011	
	(In millions, except percentages)						
New orders	\$84	\$40	\$255	\$44	110%	\$(171)) (67)%
Net sales	134	104	158	30	29%	(24)) (15)%
Operating income	7	5	31	2	40%	(24)) (77)%
Operating margin	5	% 5	% 20	%	—		(15) points

Operating income	16		62	(46)			
Operating margin	7		% 20	% (13) points			

Reconciliations of non-GAAP measures are presented under “Non-GAAP Results.”

Table of Contents

New orders and net sales increased for the second quarter of fiscal 2012 compared to a low level of orders in the first quarter of fiscal 2012, reflecting slightly higher demand for touch panel and LTPS systems to manufacture new mobile devices such as smart phones and tablets. The book to bill ratio slightly increased to 0.6 for the second quarter of fiscal 2012 compared to 0.4 for the first quarter of fiscal 2012. Operating income and non-GAAP operating income slightly increased reflecting higher net sales.

New orders and net sales were lower in the second quarter of fiscal 2012 compared to the second quarter of fiscal 2011, and also were lower for the first six months of fiscal 2012 compared to the first six months of fiscal 2011, resulting from weakness in demand for large substrate LCD TV equipment. The book to bill ratio of 0.6 for the second quarter of fiscal 2012 decreased compared to 1.6 for the second quarter of fiscal 2011 and also decreased to 0.5 for the first six months of fiscal 2012 compared to 1.3 for the first six months of fiscal 2011. The decrease for both the second quarter and first six months of fiscal 2012 reflected lower year-over-year increases in new orders relative to net sales. Operating income and non-GAAP operating income decreased in the second quarter of fiscal 2012 and in the first six months of fiscal 2012 from the comparable periods from the prior year resulting from the down cycle in the display industry.

The following regions accounted for at least 30 percent of total net sales for the Display segment for one or more of the periods indicated:

	Three Months Ended				Change	
	April 29, 2012		January 29, 2012		May 1, 2011	
	(\$)	(%)	(\$)	(%)	(\$)	(%)
	(In millions, except percentages)				Change Q2 2012 over Q1 2012	Change Q2 2012 over Q2 2011
Taiwan	92	69	45	43	18	11
China	1	1	18	17	82	52
					104%	411%
					(94)%	(99)%
	Six Months Ended				Change	
	April 29, 2012		May 1, 2011		First Half 2012	
	(\$)	(%)	(\$)	(%)	over First Half 2011	
	(In millions, except percentages)					
Taiwan	137	58	99	32	38%	
China	20	8	143	47	(86)%	

Four customers accounted for 87 percent of net sales in the Display segment for the second quarter of fiscal 2012. Customers in Taiwan accounted for the majority of net sales in this segment for each of the first and second quarters of fiscal 2012, as well as the first half of fiscal 2012, while customers in China and Taiwan accounted for the majority of net sales during the second quarter and first half of fiscal 2011.

Applied tested goodwill of the Display reporting unit for potential impairment during the second quarter of fiscal 2012 in light of second quarter developments that included current industry trends and financial performance and short-term outlook. The results of the first step of the impairment test indicated that goodwill of the Display reporting unit was not impaired and the estimated fair value of the reporting unit was more than 100 percent over the carrying value of the reporting unit. In the event of future changes in business conditions in the market in which the Display reporting unit operates, Applied will be required to reassess and update its forecasts and estimates used in future impairment analysis.

half of fiscal 2012 was 0.3, and the book to bill ratio for the second quarter of fiscal 2011 and first half of fiscal 2011 were 1.0 and 1.2, respectively.

Table of Contents

The following regions accounted for at least 30 percent of total net sales for the Energy and Environmental Solutions segment for one or more of the periods indicated:

	Three Months Ended						Change	Change
	April 29, 2012		January 29, 2012		May 1, 2011		Q2 2012	Q2 2012
	(\$)	(%)	(\$)	(%)	(\$)	(%)	over	over
							Q1 2012	Q2 2011
	(In millions, except percentages)							
Taiwan	7	9	92	44	86	14	(92)%	(92)%
China	42	53	85	41	487	76	(51)%	(91)%
	Six Months Ended						Change	
	April 29, 2012		May 1, 2011		First Half 2012			
	(\$)	(%)	(\$)	(%)	over			
							First Half 2011	
	(In millions, except percentages)							
Taiwan	98	34	130	12	(25)%			
China	127	44	876	79	(86)%			

For the second quarter and first half of fiscal 2012, customers in Taiwan and China continued to account for the majority of net sales in this segment, while a majority of sales were to customers in China for the second quarter and first half of fiscal 2011.

Applied tested goodwill of the Energy and Environmental Solutions reporting unit for potential impairment during the second quarter of fiscal 2012 in light of second quarter developments that included current industry trends, financial performance, weaker short-term outlooks, and other adverse operating conditions within the solar industry. The results of the first step of the impairment test indicated that goodwill of the Energy and Environmental Solutions reporting unit was not impaired, as the estimated fair value in excess of carrying value was approximately \$697 million (or 72 percent over the carrying value of the reporting unit) at April 1, 2012.

In the event of future changes in business conditions in the market in which the Energy and Environmental Solutions reporting unit operates, Applied will be required to reassess and update its forecasts and estimates used in future impairment analysis. If the results of this analysis are lower than current estimates, a material impairment charge may result at that time. Details on the impairment analysis performed for the Energy and Environmental Solutions reporting unit are included in Note 9 of the Notes to the Consolidated Condensed Financial Statements. As discussed in the Overview section, on May 10, 2012, Applied announced that a committee of the Board of Directors approved a plan to restructure the Energy and Environmental Solutions segment.

Table of Contents

Financial Condition, Liquidity and Capital Resources

Applied's cash, cash equivalents and investments decreased to \$3.2 billion at April 29, 2012 from \$7.2 billion at October 30, 2011.

Cash, cash equivalents and investments consist of the following:

	April 29, 2012 (In millions)	October 30, 2011
Cash and cash equivalents	\$1,761	\$5,960
Short-term investments	409	283
Long-term investments	1,071	931
Total cash, cash-equivalents and investments	\$3,241	\$7,174

The decrease in cash was the result of the completion of the acquisition of Varian during the first quarter of fiscal 2012, and cash paid for stock repurchases and dividends, which were offset in part by cash generated from operations. Cash, cash equivalents and investments at October 30, 2011 included net proceeds from the issuance of \$1.75 billion of senior unsecured notes that were issued to assist in funding the Varian acquisition.

A summary of cash provided by (used in) operating, investing, and financing activities for the six months ended April 29, 2012 and May 1, 2011 is as follows:

	April 29, 2012 (In millions)	May 1, 2011
Cash provided by operating activities	\$784	\$1,129
Cash used in investing activities	\$(4,416)) \$(34)
Cash used in financing activities	\$(563)) \$(396)

Applied generated \$784 million of cash from operating activities for the six months ended April 29, 2012. The primary sources of cash from operating activities for the six months ended April 29, 2012 were net income, as adjusted to exclude the effect of non-cash charges including depreciation, amortization, share-based compensation, deferred income taxes and changes in components of working capital. Applied did not utilize programs to discount letters of credit issued by customers for the six months ended April 29, 2012. Applied utilized programs to discount letters of credit issued by customers of \$173 million for the six months ended May 1, 2011. Discounting of letters of credit depends on many factors, including the willingness of financial institutions to discount the letters of credit and the cost of such arrangements. For the six months ended April 29, 2012 and May 1, 2011, Applied factored accounts receivable and discounted promissory notes totaling \$70 million and \$55 million, respectively. Days sales outstanding for the second quarter of fiscal 2012 of 64 days decreased compared to 66 days at the end of the first quarter of fiscal 2012 and increased compared to 61 days for the quarter ended May 1, 2011. Days sales outstanding varies due to the timing of shipments and the payment terms. Applied's working capital was \$3.7 billion at April 29, 2012 and \$7.6 billion at October 30, 2011.

Applied used \$4.4 billion of cash for investing activities during the six months ended April 29, 2012. In the first half of fiscal 2012, Applied acquired Varian for \$4.2 billion, net of cash acquired. Purchases of investments, net of proceeds from sales and maturities of investments, totaled \$154 million, and capital expenditures totaled \$76 million for the first half of fiscal 2012.

Applied used \$563 million of cash for financing activities during the six months ended April 29, 2012, consisting primarily of \$400 million in common stock repurchases and \$208 million in cash dividends paid to stockholders, offset by \$45 million in proceeds from common stock issuances related to equity compensation awards. In March 2010, Applied's Board of Directors approved a stock repurchase program authorizing up to \$2.0 billion in repurchases over the three year period ending in March 2013. On March 5, 2012, the Board of Directors approved a new stock repurchase program authorizing up to \$3.0 billion in repurchases over the next three years, ending March 2015. The stock repurchase program that began in 2010 terminated concurrent with the start of the new stock repurchase

program.

55

Table of Contents

The following table summarizes the dividends declared by Applied's Board of Directors during fiscal 2012:

Date Declared	Record Date	Payable Date	Amount per Share	Aggregate Amount (In millions)
December 6, 2011	February 23, 2012	March 15, 2012	\$0.08	\$103
March 5, 2012	May 24, 2012	June 14, 2012	\$0.09	\$115

Applied currently anticipates that cash dividends will continue to be paid on a quarterly basis, although the declaration of any future cash dividend is at the discretion of the Board of Directors and will depend on Applied's financial condition, results of operations, capital requirements, business conditions and other factors, as well as a determination by the Board of Directors that cash dividends are in the best interests of Applied's stockholders.

Applied has credit facilities for unsecured borrowings in various currencies of up to \$1.6 billion, of which \$1.5 billion is comprised of a committed four-year revolving credit agreement with a group of banks that is scheduled to expire in May 2015. This agreement provides for borrowings in United States dollars at interest rates keyed to one of the two rates selected by Applied for each advance and includes financial and other covenants with which Applied was in compliance at April 29, 2012. Remaining credit facilities in the amount of approximately \$99 million are with Japanese banks. Applied's ability to borrow under these facilities is subject to bank approval at the time of the borrowing request, and any advances will be at rates indexed to the banks' prime reference rate denominated in Japanese yen. No amounts were outstanding under any of these facilities at both April 29, 2012 and October 30, 2011.

Applied has debt agreements that contain financial and other covenants. These covenants require Applied to maintain certain minimum financial ratios. At April 29, 2012, Applied was in compliance with all such covenants. See Note 10 of Notes to Consolidated Condensed Financial Statements for additional discussion of borrowings and long-term debt. In the ordinary course of business, Applied provides standby letters of credit or other guarantee instruments to third parties as required for certain transactions initiated by either Applied or its subsidiaries. As of April 29, 2012, the maximum potential amount of future payments that Applied could be required to make under these guarantee agreements was approximately \$49 million. Applied has not recorded any liability in connection with these guarantee agreements beyond that required to appropriately account for the underlying transaction being guaranteed. Applied does not believe, based on historical experience and information currently available, that it is probable that any amounts will be required to be paid under these guarantee agreements.

Applied also has agreements with various banks to facilitate subsidiary banking operations worldwide, including overdraft arrangements, issuance of bank guarantees, and letters of credit. As of April 29, 2012, Applied Materials, Inc. has provided parent guarantees to banks for approximately \$188 million to cover these services.

Applied's investment portfolio consists principally of investment grade money market mutual funds, U.S. Treasury and agency securities, municipal bonds, corporate bonds and mortgage-backed and asset-backed securities, as well as equity securities. Applied regularly monitors the credit risk in its investment portfolio and takes appropriate measures, which may include the sale of certain securities, to manage such risks prudently in accordance with its investment policies.

For the six months ended April 29, 2012, Applied did not recognize any impairment on its marketable securities. At April 29, 2012, Applied had a gross unrealized loss in its investment portfolio of \$1 million due to a decrease in the fair value of certain fixed income securities.

During the six months ended April 29, 2012, Applied recorded a bad debt provision of \$9 million as a result of certain customers' financial condition. Applied did not record a bad debt provision during the six months ended May 1, 2011. While Applied believes that its allowance for doubtful accounts at April 29, 2012 is adequate, it will continue to closely monitor customer liquidity and economic conditions.

At April 29, 2012, approximately \$550 million of cash, cash equivalents and marketable securities held by foreign subsidiaries of Applied may be subject to U.S. taxes if repatriated for U.S. operations. Of this amount, Applied intends to permanently reinvest approximately \$180 million outside of the U.S. and does not plan to repatriate these funds. For the remaining cash, cash equivalents and marketable securities held by foreign subsidiaries, U.S. taxes have been provided in the financial statements.

Although cash requirements will fluctuate based on the timing and extent of factors such as those discussed above, Applied's management believes that cash generated from operations, together with the liquidity provided by existing cash balances and borrowing capability, will be sufficient to satisfy Applied's liquidity requirements for the next 12 months. For further details regarding Applied's operating, investing and financing activities, see the Consolidated Condensed Statements of Cash Flows in this report.

Table of Contents

Critical Accounting Policies and Estimates

The preparation of consolidated financial statements and related disclosures in conformity with accounting principles generally accepted in the United States of America requires management to make judgments, assumptions and estimates that affect the amounts reported. Note 1 of Notes to Consolidated Financial Statements in our Annual Report on Form 10-K and Note 1 to Notes to Consolidated Condensed Financial Statements in this report describe the significant accounting policies used in the preparation of the consolidated financial statements. Certain of these significant accounting policies are considered to be critical accounting policies.

A critical accounting policy is defined as one that is both material to the presentation of Applied's consolidated financial statements and that requires management to make difficult, subjective or complex judgments that could have a material effect on Applied's financial condition or results of operations. Specifically, these policies have the following attributes: (1) Applied is required to make assumptions about matters that are highly uncertain at the time of the estimate; and (2) different estimates Applied could reasonably have used, or changes in the estimate that are reasonably likely to occur, would have a material effect on Applied's financial condition or results of operations. Estimates and assumptions about future events and their effects cannot be determined with certainty. Applied bases its estimates on historical experience and on various other assumptions believed to be applicable and reasonable under the circumstances. These estimates may change as new events occur, as additional information is obtained and as Applied's operating environment changes. These changes have historically been minor and have been included in the consolidated financial statements as soon as they became known. In addition, management is periodically faced with uncertainties, the outcomes of which are not within its control and will not be known for prolonged periods of time. These uncertainties include those discussed in Part II, Item 1A, "Risk Factors." Based on a critical assessment of its accounting policies and the underlying judgments and uncertainties affecting the application of those policies, management believes that Applied's consolidated financial statements are fairly stated in accordance with accounting principles generally accepted in the United States of America, and provide a meaningful presentation of Applied's financial condition and results of operations.

Management believes that the following are critical accounting policies:

Revenue Recognition

Applied recognizes revenue when all four revenue recognition criteria have been met: persuasive evidence of an arrangement exists; delivery has occurred or services have been rendered; seller's price to buyer is fixed or determinable; and collectability is probable. Each sale arrangement may contain commercial terms that differ from other arrangements. In addition, Applied frequently enters into contracts that contain multiple deliverables. Judgment is required to properly identify the accounting units of the multiple deliverable transactions and to determine the manner in which revenue should be allocated among the accounting units. Moreover, judgment is used in interpreting the commercial terms and determining when all criteria of revenue recognition have been met in order for revenue recognition to occur in the appropriate accounting period. While changes in the allocation of the estimated sales price between the units of accounting will not affect the amount of total revenue recognized for a particular sales arrangement, any material changes in these allocations could impact the timing of revenue recognition, which could have a material effect on Applied's financial condition and results of operations.

Warranty Costs

Applied provides for the estimated cost of warranty when revenue is recognized. Estimated warranty costs are determined by analyzing specific product data, current and historical configuration statistics and regional warranty support costs. Applied's warranty obligation is affected by product and component failure rates, material usage and labor costs incurred in correcting product failures during the warranty period. As Applied's customer engineers and process support engineers are highly trained and deployed globally, labor availability is a significant factor in determining labor costs. The quantity and availability of critical replacement parts is another significant factor in estimating warranty costs. Unforeseen component failures or exceptional component performance can also result in changes to warranty costs. If actual warranty costs differ substantially from Applied's estimates, revisions to the estimated warranty liability would be required, which could have a material adverse effect on Applied's business, financial condition and results of operations.

Allowance for Doubtful Accounts

Applied maintains an allowance for doubtful accounts for estimated losses resulting from the inability of its customers to make required payments. This allowance is based on historical experience, credit evaluations, specific customer collection history and any customer-specific issues Applied has identified. Changes in circumstances, such as an unexpected material adverse change in a major customer's ability to meet its financial obligation to Applied or its payment trends, may require Applied to further adjust its estimates of the recoverability of amounts due to Applied, which could have a material adverse effect on Applied's business, financial condition and results of operations.

Table of Contents

Inventory Valuation

Inventories are generally stated at the lower of cost or market, with cost determined on a first-in, first-out basis. The carrying value of inventory is reduced for estimated obsolescence by the difference between its cost and the estimated market value based upon assumptions about future demand. Applied evaluates the inventory carrying value for potential excess and obsolete inventory exposures by analyzing historical and anticipated demand. In addition, inventories are evaluated for potential obsolescence due to the effect of known and anticipated engineering change orders and new products. If actual demand were to be substantially lower than estimated, additional adjustments for excess or obsolete inventory may be required, which could have a material adverse effect on Applied's business, financial condition and results of operations.

Goodwill and Intangible Assets

Applied reviews goodwill and intangible assets for impairment whenever events or changes in circumstances indicate that the carrying amount of these assets may not be recoverable, and also annually reviews goodwill and intangibles with indefinite lives for impairment. Intangible assets, such as purchased technology, are generally recorded in connection with a business acquisition. The value assigned to intangible assets is usually based on estimates and judgments regarding expectations for the success and life cycle of products and technology acquired. If actual product acceptance differs significantly from the estimates, Applied may be required to record an impairment charge to reduce the carrying value of the reporting unit to its realizable value. The fair value of a reporting unit is estimated using both the income approach and the market approach taking into account such factors as future anticipated operating results and estimated cost of capital. Management uses significant judgment when assessing goodwill for potential impairment, especially in emerging markets. If Applied were to encounter challenging economic conditions, such as a decline in operating results, an unfavorable industry or macroeconomic environment, or any other adverse change in market conditions, Applied may be required to perform the two-step quantitative goodwill impairment analysis. If such conditions have the effect of changing one of the critical assumptions or estimates used in the quantitative goodwill impairment analysis, it could result in an unexpected impairment charge for impaired goodwill, which could have a material adverse effect on Applied's business, financial condition and results of operations.

Income Taxes

The effective tax rate is highly dependent upon the geographic composition of worldwide earnings, tax regulations governing each region, non-tax deductible expenses incurred in connection with acquisitions and availability of tax credits. Management carefully monitors the changes in many factors and adjusts the effective income tax rate as required. If actual results differ from these estimates, Applied could be required to record a valuation allowance on deferred tax assets or adjust its effective income tax rate, which could have a material adverse effect on Applied's business, financial condition and results of operations.

Applied accounts for income taxes by recognizing deferred tax assets and liabilities using statutory tax rates for the effect of temporary differences between the book and tax bases of recorded assets and liabilities, net operating losses and tax credit carryforwards. Deferred tax assets are also reduced by a valuation allowance if it is more likely than not that a portion of the deferred tax asset will not be realized. Management has determined that it is more likely than not that Applied's future taxable income will be sufficient to realize its deferred tax assets.

The calculation of tax liabilities involves significant judgment in estimating the impact of uncertainties in the application of complex tax laws. Resolution of these uncertainties in a manner inconsistent with Applied's expectations could have a material impact on Applied's results of operations and financial condition.

Table of Contents

Non-GAAP Results

Management uses non-GAAP results to evaluate the Company's operating and financial performance in light of business objectives and for planning purposes. Applied believes these measures enhance investors' ability to review the Company's business from the same perspective as the Company's management and facilitate comparisons of this period's results with prior periods. The non-GAAP results presented below and elsewhere in this report exclude the impact of the following, where applicable: restructuring and asset impairment charges and any associated adjustment related to restructuring actions, certain discrete tax items, certain acquisition-related costs, investment impairments, and gain or loss on sale of facilities. These non-GAAP measures are not in accordance with GAAP and may differ from non-GAAP methods of accounting and reporting used by other companies. The presentation of this additional information should not be considered a substitute for results prepared in accordance with GAAP.

Non-GAAP operating income for the three months ended April 29, 2012, January 29, 2012, and May 1, 2011 was \$490 million, \$344 million, and \$685 million, respectively. Non-GAAP operating income for the six months ended April 29, 2012 and May 1, 2011 was \$834 million and \$1.3 billion, respectively.

Non-GAAP net income for the three months ended April 29, 2012, January 29, 2012, and May 1, 2011 was \$349 million or \$0.27 per share, \$240 million or \$0.18 per share, and \$501 million or \$0.38 per share, respectively.

Non-GAAP net income for the six months ended April 29, 2012 and May 1, 2011 was \$589 million or \$0.45 per share and \$985 million or \$0.74 per share, respectively.

² Results for the three months ended May 1, 2011 included favorable adjustments of \$8 million related to a restructuring program announced on July 21, 2010 and asset impairment charges of \$24 million related certain intangible assets.

³ Results for the six months ended May 1, 2011 included favorable adjustments of \$36 million related to a restructuring program announced on July 21, 2010 and asset impairment charges of \$24 million primarily related to certain intangible assets.

Note: Segment non-GAAP operating income does not include deal costs and other acquisition-related costs, which are reported within corporate and unallocated costs.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Applied is exposed to interest rate risk related to its investment portfolio and debt issuances. Applied's investment portfolio includes fixed-income securities with a fair value of approximately \$1.3 billion at April 29, 2012. These securities are subject to interest rate risk and will decline in value if interest rates increase. Based on Applied's investment portfolio at April 29, 2012, an immediate 100 basis point increase in interest rates would result in a decrease in the fair value of the portfolio of approximately \$23 million. While an increase in interest rates reduces the fair value of the investment portfolio, Applied will not realize the losses in the consolidated condensed statement of operations unless the individual fixed-income securities are sold prior to recovery or the loss is determined to be other-than-temporary. At April 29, 2012, the carrying amount of long-term debt was \$1.9 billion with an estimated fair value of \$2.2 billion. A hypothetical decrease in interest rates of 100 basis points would result in an increase in the fair value of Applied's debt issuances of approximately \$215 million at April 29, 2012.

Certain operations of Applied are conducted in foreign currencies, such as Japanese yen, euro, Israeli shekel, Taiwanese dollar and Swiss franc. Applied enters into currency forward exchange and option contracts to hedge a portion of, but not all, existing and anticipated foreign currency denominated transactions expected to occur within 24 months. Gains and losses on these contracts are generally recognized in income at the time that the related transactions being hedged are recognized. Because the effect of movements in currency exchange rates on currency forward exchange and option contracts generally offsets the related effect on the underlying items being hedged, these financial instruments are not expected to subject Applied to risks that would otherwise result from changes in currency exchange rates. Applied does not use derivative financial instruments for trading or speculative purposes. Net foreign currency gains and losses were not material for the three and six months ended April 29, 2012 and May 1, 2011.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

As required by Rule 13a-15(b) under the Securities Exchange Act of 1934, as amended (Exchange Act), Applied's management, including the Chief Executive Officer and Chief Financial Officer, conducted an evaluation as of the end of the period covered by this report, of the effectiveness of Applied's disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that Applied's disclosure controls and procedures were effective as of the end of the period covered by this report in ensuring that information required to be disclosed in Applied's SEC reports is (i) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (ii) accumulated and communicated to Applied's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

As required by Rule 13a-15(d), Applied's management, including the Chief Executive Officer and Chief Financial Officer, also conducted an evaluation of Applied's internal control over financial reporting to determine whether any changes occurred during the fiscal quarter that have materially affected, or are reasonably likely to materially affect, Applied's internal control over financial reporting. Based on that evaluation, there has been no such change during the fiscal quarter.

It should be noted that any system of controls, however well designed and operated, can provide only reasonable, and not absolute, assurance that the objectives of the system will be met. In addition, the design of any control system is based in part upon certain assumptions about the likelihood of future events.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The information set forth above under the caption “Legal Matters” in Note 14 contained in Notes to Consolidated Condensed Financial Statements is incorporated herein by reference.

Item 1A. Risk Factors

The risk factors set forth below include any material changes to, and supersede the description of, the risk factors disclosed in Item 1A of Applied’s 2011 Form 10-K. These factors could materially affect Applied’s business, financial condition or results of operations and should be carefully considered in evaluating the Company and its business, in addition to other information presented elsewhere in this report.

The industries that Applied serves are volatile and difficult to predict.

As a supplier to the global semiconductor, flat panel display, solar and related industries, Applied is subject to business cycles, the timing, length and volatility of which can be difficult to predict and which vary by reportable segment. These industries historically have been cyclical due to sudden changes in customers’ requirements for new manufacturing capacity and advanced technology, which depend in part on customers’ capacity utilization, production volumes, access to affordable capital, end-use demand, and inventory levels relative to demand, as well as the rate of technology transitions and general economic conditions. These changes have affected the timing and amounts of customers’ purchases and investments in technology, and continue to affect Applied’s orders, net sales, operating expenses and net income.

To meet rapidly changing demand in the industries it serves, Applied must accurately forecast demand and effectively manage its resources and production capacity for each of its segments as well as across multiple segments, and may incur unexpected or additional costs to align its business operations. During periods of increasing demand for its products, Applied must have sufficient manufacturing capacity and inventory to meet customer demand; effectively manage its supply chain; attract, retain and motivate a sufficient number of qualified employees; and continue to control costs. During periods of decreasing demand, Applied must reduce costs and align its cost structure with prevailing market conditions; effectively manage its supply chain; and motivate and retain key employees. If Applied does not accurately forecast and timely and appropriately adapt to changes in its business environment, Applied’s business, financial condition and results of operations may be materially and adversely affected.

Applied is exposed to risks as a result of ongoing changes in the various industries in which it operates.

The global semiconductor, flat panel display, solar and related industries in which Applied operates are characterized by ongoing changes affecting some or all of these industries, including:

- increasing capital requirements for building and operating new fabrication plants and customers’ ability to raise the necessary capital, particularly when financial market conditions are difficult;
- differences in growth rates among the semiconductor, display and solar industries;
- the increasing importance of establishing, improving and maintaining strong relationships with customers;
- changes in end demand for electronic products over time and the effect of these changes on customers’ businesses and, in turn, on demand for Applied’s products;
- the increasing cost and complexity for customers to move from product design to volume manufacturing, which may slow the adoption rate of new manufacturing technology;
- the need to continually reduce the total cost of manufacturing system ownership, due in part to greater demand for lower-cost consumer electronics compared to business information technology spending;
 - the heightened importance to customers of system reliability and productivity and the effect on demand for fabrication systems as a result of their increasing productivity, device yield and reliability;
- the increasing importance of, and difficulties in, developing products with sufficient differentiation to influence customers’ purchasing decisions;
- requirements for shorter cycle times for the development, manufacture and installation of manufacturing equipment;
- price and performance trends for semiconductor devices, LCDs and solar PVs, and the corresponding effect on demand for such products;

Table of Contents

the increasing importance of the availability of spare parts to maximize the time that customers' systems are available for production;

the increasing role for and complexity of software in Applied products; and

the increasing focus on reducing energy usage and improving the environmental impact and sustainability associated with manufacturing operations.

If Applied does not successfully manage the risks resulting from the ongoing changes in the semiconductor, flat panel display, solar and related industries, its business, financial condition and results of operations could be materially and adversely affected.

Applied is exposed to risks as a result of ongoing changes specific to the semiconductor industry.

The largest proportion of Applied's consolidated net sales and profitability has been and continues to be derived from sales of manufacturing equipment by the Silicon Systems Group to the global semiconductor industry. In addition, a majority of the revenues of Applied Global Services is from sales of service products to semiconductor manufacturers. The semiconductor industry is characterized by ongoing changes particular to that industry in addition to the general industry changes described in the preceding risk factor, including:

the increasing cost of research and development due to many factors, including: decreasing linewidths on a chip; the use of new materials such as cobalt and yttrium; new and more complex device structures; more applications and process steps; increasing chip design costs; and the increasing cost and complexity of integrated manufacturing processes;

the cost, technical complexity and timing of a proposed industry transition from 300mm to 450mm wafers, and the resulting effect on demand for manufacturing equipment and services;

the need to reduce product development time, despite the increasing difficulty of technical challenges;

the growing number of types and varieties of semiconductors and number of applications across multiple substrate sizes;

the increasing cost and complexity for semiconductor manufacturers to move more technically advanced capability and smaller linewidths to volume manufacturing, and the resulting impact on the rates of technology transition and investment in capital equipment;

challenges in generating organic growth given semiconductor manufacturers' decreasing capital expenditures as a percentage of revenue, and their increasing capital investment in market segments that Applied does not serve, such as lithography, or segments where Applied's products have lower relative market share;

the importance of increasing market positions in under-penetrated segments, such as etch and inspection;

the growing demand for mobility products, such as tablets and smartphones, and corresponding industry investment in devices that require fewer Applied products to manufacture, such as NAND flash memory, than are needed to make devices used in other applications, such as DRAM for personal computers;

the increasing frequency and complexity of technology transitions and inflections, such as ALD, 3-D transistors, advanced interconnect, wafer-level packaging, and extreme ultraviolet lithography (EUV);

shorter cycle times between customers' order placement and product shipment, which may lead to inventory write-offs and manufacturing inefficiencies that decrease gross margin;

competitive factors that make it difficult to enhance market position;

the concentration of new wafer starts in Korea, where Applied's service penetration and service-revenue-per-wafer-start have been lower than in other regions; and

the increasing fragmentation of semiconductor markets, leading certain markets to become too small to support the cost of a new fabrication plant, while others require less technologically advanced products.

If Applied does not successfully manage the risks resulting from the ongoing changes occurring in the semiconductor industry, its business, financial condition and results of operations could be materially and adversely affected.

Table of Contents

Applied is exposed to risks as a result of ongoing changes specific to the solar industry.

Investment levels in capital equipment for the global solar industry have experienced considerable volatility. Current global solar PV production capacity exceeds anticipated near-term, end-use demand, causing customers to significantly reduce or delay investments in manufacturing capacity and new technology. In addition to the general industry changes described above in the second risk factor, the global solar market is characterized by ongoing changes specific to this industry that impact demand for and/or the profitability of Applied's solar products, including: the need to continually decrease the cost-per-watt of electricity produced by solar PV products to at or below grid parity by, among other things, reducing operating costs and increasing throughputs for solar PV manufacturing, and improving the conversion efficiency of solar PVs;

the variability and uncertainty of government energy policies and their effect in influencing the rate of growth of the solar PV market, including the availability and amount of incentives for solar power such as tax credits, feed-in tariffs, rebates, renewable portfolio standards that require electricity providers to sell a targeted amount of energy from renewable sources, and goals for solar installations on government facilities;

the number of solar PV manufacturers and increasing global production capacity for solar PVs, primarily in China;

the filing of regulatory unfair trade proceedings against solar PVs from China, where most of Applied's solar equipment sales are concentrated, which could result in the assessment of duties on solar cells and modules imported from China or other outcomes;

the varying levels of operating and industry experience among solar PV manufacturers and the resulting differences in the nature and extent of customer support services requested from Applied;

challenges associated with marketing and selling manufacturing equipment and services to a diverse and diffuse customer base;

the growth of market segments in which Applied does not participate, such as passivation and furnaces;

the increasing number of government-affiliated entities in China that are becoming customers;

the cost of polysilicon and other materials; and

the financial condition of solar PV customers and their access to affordable financing and capital.

If Applied does not successfully manage the risks resulting from the ongoing changes occurring in the solar industry, its business, financial condition and results of operations could be materially and adversely affected.

Applied is exposed to risks as a result of ongoing changes specific to the flat panel display industry.

The global flat panel display industry historically has experienced considerable volatility in capital equipment investment levels, due in part to the limited number of LCD manufacturers, the concentrated nature of LCD end-use applications, and excess production capacity relative to end-use demand. Industry growth has depended primarily on consumer demand for increasingly larger and more advanced LCD TVs, which demand is slowing, and more recently on demand for smartphones and other mobile devices, which demand is highly sensitive to cost and improvements in technologies and features. In addition to the general industry changes described above in the second risk factor, the display industry is characterized by ongoing changes particular to that industry, including:

the planned expansion of manufacturing facilities in China by Chinese display manufacturers and manufacturers from other countries, and the ability of non-Chinese manufacturers to obtain government approvals on a timely basis;

the slowing rate of transition to larger substrate sizes for LCD TVs and the resulting effect on capital intensity in the industry and on Applied's product differentiation, gross margin and return on investment;

the increasing importance of new types of display technologies, such as low temperature polysilicon (LTPS), organic light-emitting diode (OLED) and metal oxide, and new touch panel films, such as anti-reflective and anti-fingerprint; and

uncertainty with respect to future LCD technology end-use applications and growth drivers.

If Applied does not successfully manage the risks resulting from the ongoing changes occurring in the display industry, its business, financial condition and results of operations could be materially and adversely affected.

Table of Contents

Applied is exposed to risks associated with the difficult financial markets and uncertain global economy. Continuing difficulties in the financial markets, national debt concerns in various regions, and uncertainty regarding the global economy are posing challenges, and some governments may implement policies to control economic growth. The markets for semiconductors and flat panel displays in particular depend largely on consumer spending, while the solar market depends in part on government incentives and the availability of financing for PV installations. Economic uncertainty and related factors, including unemployment, inflation and fuel prices, exacerbate negative trends in business and consumer spending and may cause certain Applied customers to push out, cancel, or refrain from placing orders for equipment or services, which may reduce net sales, reduce backlog, and affect Applied's ability to convert backlog to sales. Difficulties in obtaining capital, uncertain market conditions, or reduced profitability may also cause some customers to scale back operations, exit businesses, merge with other manufacturers, or file for bankruptcy protection and potentially cease operations, leading to customers' reducing research and development funding and/or capital expenditures and, in turn, lower sales and/or additional inventory or bad debt expense for Applied. These conditions may also similarly affect key suppliers, which could impair their ability to deliver parts and result in delays for Applied's products or added costs. In addition, these conditions may lead to strategic alliances by, or consolidation of, other equipment manufacturers, which could adversely affect Applied's ability to compete effectively.

Uncertainty about future economic and industry conditions also makes it more challenging for Applied to forecast its operating results, make business decisions, and identify and prioritize the risks that may affect its business, sources and uses of cash, financial condition and results of operations. Applied may be required to implement additional cost reduction efforts, including restructuring activities, and/or modify its business model, which may adversely affect Applied's ability to capitalize on opportunities in a market recovery.

In addition, Applied maintains an investment portfolio that is subject to general credit, liquidity, foreign exchange, market and interest rate risks. The risks to Applied's investment portfolio may be exacerbated if financial market conditions deteriorate and, as a result, the value and liquidity of the investment portfolio, as well as returns on pension assets could be negatively impacted and lead to impairment charges. Applied also maintains cash balances in various bank accounts globally in order to fund normal operations. If one or more of these financial institutions become insolvent or are taken over by a government, it could limit Applied's ability to access cash in the affected accounts.

If Applied does not timely and appropriately adapt to changes resulting from the uncertain macroeconomic environment and industry conditions, or to difficulties in the financial markets, Applied's business, financial condition and results of operations may be materially and adversely affected.

Applied must continually innovate, commercialize its products, and adapt its business and product offerings to respond to competition and rapid technological changes.

As Applied operates in a highly competitive environment in which innovation is critical, its future success depends on many factors, including the effective commercialization and customer acceptance of its equipment, services and related products. In addition, Applied must successfully execute its growth strategy, including enhancing market share in existing markets, expanding into related markets, cultivating new markets and exceeding industry growth rates, while constantly improving its operational performance. The development, introduction and support of a broadening set of products in more collaborative, geographically diverse, open and varied competitive environments have grown increasingly complex and expensive over time. Furthermore, new or improved products may entail higher costs and reduced profits. Applied's performance may be adversely affected if it does not timely, cost-effectively and successfully:

- identify and address technology inflections, market changes, new applications, customer requirements and end-use demand;
- develop new products (including disruptive technologies), improve and/or develop new applications for existing products, and adapt similar products for use by customers in different applications and/or markets with varying technical requirements;
- appropriately price and achieve market acceptance of its products;
-

differentiate its products from those of competitors and any disruptive technologies, and meet customers' performance specifications;

• maintain operating flexibility to enable different responses to different markets, customers and applications;

Table of Contents

- enhance its worldwide operations across all business segments to reduce cycle time, enable continuous quality improvement, reduce costs, and enhance design for manufacturability and serviceability;
- focus on sales and marketing strategies that foster strong customer relationships;
- allocate resources, including people and R&D funding, among Applied's products and between the development of new products and the enhancement of existing products, as most appropriate and effective for future growth;
- reduce the cost and improve the productivity of capital invested in R&D activities;
- accurately forecast demand, work with suppliers and meet production schedules for its products;
- improve its manufacturing processes and achieve cost efficiencies across product offerings;
- adapt to changes in value offered by companies in different parts of the supply chain;
- qualify products for evaluation and, in turn, volume manufacturing with its customers; and
- implement changes in its design engineering methodology, including those that enable reduction of material costs and cycle time, greater commonality of platforms and types of parts used in different systems, greater effectiveness of product life cycle management, and reduced energy usage and environmental impact.

If Applied does not successfully manage these challenges, its business, financial condition and results of operations could be materially and adversely affected.

Applied is exposed to risks associated with a highly concentrated customer base.

Applied's semiconductor customer base historically has been, and is becoming even more, highly concentrated as a result of economic and industry conditions. For example, in the second quarter of fiscal 2012, two semiconductor manufacturers accounted for 60 percent of Silicon Systems Group net sales and 43 percent of Applied's consolidated net sales. Applied's flat panel display customer base is also highly concentrated, while concentration within Applied's solar customer base varies depending on the product line. Certain customers have experienced significant ownership or management changes, consolidated with other manufacturers, outsourced manufacturing activities, or engaged in collaboration or cooperation arrangements with other manufacturers. In addition, customers have entered into strategic alliances or industry consortia that have increased the influence of key industry participants in technology decisions made by their partners. Also, certain customers are making an increasingly greater percentage of their respective industry's capital equipment investments.

In addition, Applied's customer base in each of Display and Energy and Environmental Solutions segments is also geographically-concentrated. In the second quarter of fiscal 2012, customers in China and Taiwan accounted for a total of 70 percent of net sales for the Display segment, and 62 percent of net sales for the Energy and Environmental Solutions segment.

In this environment, contracts or orders from a relatively limited number of manufacturers have accounted for, and are expected to continue to account for, a substantial portion of Applied's business, which may result in added complexities in managing customer relationships and transactions and make it more challenging for Applied's business units to generate organic growth. In addition, the mix and type of customers, and sales to any single customer, may vary significantly from quarter to quarter and from year to year. If customers do not place orders, or they substantially reduce, delay or cancel orders, Applied may not be able to replace the business. As Applied's products are configured to customer specifications, changing, rescheduling or canceling orders may result in significant, non-recoverable costs. Major customers may also seek, and on occasion receive, pricing, payment, intellectual property-related, or other commercial terms that are less favorable to Applied. These factors could have a material adverse effect on Applied's business, financial condition and results of operations.

Table of Contents

Operating in multiple industries, and the entry into new markets and industries, entail additional challenges and obligations.

As part of its growth strategy, Applied must successfully expand into related or new markets and industries, either with its existing products or with new products developed internally or obtained through acquisitions. The entry into different markets involves additional challenges, including those arising from:

- the need to devote additional resources to develop new products for, and operate in, new markets;
- the need to develop new sales and marketing strategies and cultivate relationships with new customers;
- differing rates of profitability and growth among multiple businesses;
- Applied's ability to anticipate demand, capitalize on opportunities, and avoid or minimize risks;
- the complexity of managing multiple businesses with variations in production planning, execution, supply chain management and logistics;
- the adoption of new business models;
- the need to undertake activities to grow demand for end-products;
- the need to develop and successfully implement adequate new business processes and systems;
- Applied's ability to rapidly expand or reduce its operations to meet increased or decreased demand, respectively, and the associated effect on working capital;
- new materials, processes and technologies;
- the need to attract, motivate and retain employees with skills and expertise in these new areas;
- new and more diverse customers and suppliers, including some with limited operating histories, uncertain and/or limited funding, evolving business models and/or locations in regions where Applied does not have, or has limited, operations;
- different customer service requirements;
- new or different competitors with potentially more financial or other resources, industry experience and/or established customer relationships;
- entry into new industries and countries, with differing levels of government involvement, laws and regulations, and business, employment and safety practices;
- third parties' intellectual property rights; and
- the need to comply with, or work to establish, industry standards and practices.

In addition, Applied from time to time receives funding from United States and other government agencies for certain strategic development programs to increase its R&D resources and address new market opportunities. As a condition to this government funding, Applied may be subject to certain record-keeping, audit, intellectual property rights-sharing and/or other obligations.

If Applied does not successfully manage the risks resulting from its diversification and entry into new markets and industries, its business, financial condition and results of operations could be materially and adversely affected.

Applied is exposed to the risks of operating a global business.

In the second fiscal quarter of 2012, approximately 80 percent of Applied's net sales were to customers in regions outside the United States. Certain of Applied's R&D and manufacturing facilities, as well as suppliers to Applied, are also located outside the United States, including in Singapore, Taiwan, China, Korea, Israel, Germany, Italy and Switzerland. Applied is also expanding its business and operations in new countries. The global nature of Applied's business and operations presents challenges, including but not limited to those arising from:

- varying regional and geopolitical business conditions and demands;
- political and social attitudes, laws, rules, regulations and policies within countries that favor domestic companies over non-domestic companies, including customer- or government-supported efforts to promote the development and growth of local competitors;

Table of Contents

customer- or government-supported efforts to influence Applied to conduct more of its operations in a particular country, such as Korea and China;

variations among, and changes in, local, regional, national or international laws and regulations (including intellectual property, labor, tax, and import /export laws), as well as the interpretation and application of such laws and regulations;

global trade issues, including those related to the interpretation and application of import and export licenses, as well as international trade disputes;

positions taken by governmental agencies regarding possible national commercial and/or security issues posed by international business operations;

fluctuating raw material, commodity and energy costs;

challenges associated with managing more geographically diverse operations and projects, which requires an effective organizational structure and appropriate business processes, procedures and controls;

a more diverse workforce with different experience levels, cultures, customs, business practices and worker expectations;

variations in the ability to develop relationships with local customers, suppliers and governments;

fluctuations in interest rates and currency exchange rates, including the relative strength or weakness of the U.S. dollar against the Japanese yen, euro, Taiwanese dollar, Israeli shekel or Chinese yuan;

the need to provide sufficient levels of technical support in different locations around the world;

political instability, natural disasters (such as earthquakes, floods or storms), pandemics, social unrest, terrorism or acts of war in locations where Applied has operations, suppliers or sales, or that may influence the value chain of the industries that Applied serves;

reliance on various information systems, data centers and software applications to conduct many aspects of the Company's business, which may be vulnerable to cyberattacks by third parties or breached due to employee error, misuse or other causes that could result in business disruptions, loss of confidential information, or other adverse consequences in the event that Applied's firewalls and security processes and practices are ineffective;

the need for an effective business continuity plan if a disaster or other event occurs that could disrupt business operations;

the need to regularly reassess the size, capability and location of the Company's global infrastructure and make appropriate changes;

cultural and language differences;

shipping costs or delays;

the need to continually improve the Company's operating cost structure;

difficulties and uncertainties associated with the entry into new countries;

hiring and integration of an increasing number of new workers, including in countries such as India and China;

the increasing need for the workforce to be more mobile and work in or travel to different regions;

uncertainties with respect to economic growth rates in various countries; and

uncertainties with respect to growth rates for the manufacture and sales of semiconductors, LCDs and solar PVs in the developing economies of certain countries.

Many of these challenges are present in China and Korea, which are experiencing significant growth of customers, suppliers and competitors to Applied. Applied further believes that China and Korea present large potential markets for its products and opportunity for growth over the long term, although at lower projected levels of profitability and margins for certain products than historically have been achieved in other regions. These challenges may materially and adversely affect Applied's business, financial condition and results of operations.

Table of Contents

Manufacturing interruptions or delays could affect Applied's ability to meet customer demand and lead to higher costs, while the failure to estimate customer demand accurately could result in excess or obsolete inventory.

Applied's business depends on its timely supply of equipment, services and related products that meet the rapidly changing technical and volume requirements of its customers, which depends in part on the timely delivery of parts, components and subassemblies (collectively, parts) from suppliers, including contract manufacturers. Some key parts are subject to long lead-times and/or obtainable only from a single supplier or limited group of suppliers, and some sourcing or subassembly is provided by suppliers located in countries other than the countries where Applied conducts its manufacturing, including China and Korea. Cyclical industry conditions and the volatility of demand for manufacturing equipment increase capital, technical, operational and other risks for companies throughout Applied's supply chain. Further, the adverse conditions in the credit and financial markets and industry slowdowns have caused, and may continue to cause, some suppliers to scale back operations, exit businesses, merge with other companies, or file for bankruptcy protection and possibly cease operations. Applied may also experience significant interruptions of its manufacturing operations, delays in its ability to deliver products or services, increased costs or customer order cancellations as a result of:

- the failure or inability of suppliers to timely deliver sufficient quantities of quality parts on a cost-effective basis;
- volatility in the availability and cost of materials, including rare earth elements;
- difficulties or delays in obtaining required import or export approvals;
- information technology or infrastructure failures; and
- natural disasters or other events (such as earthquakes, floods or storms, regional economic downturns, pandemics, social unrest, political instability, terrorism, or acts of war).

If a supplier fails to meet Applied's requirements concerning quality, cost, socially-responsible business practices, or other performance factors, Applied may transfer its business to alternative sources, which could entail manufacturing delays, additional costs, or other difficulties. In addition, if Applied needs to rapidly increase its business and manufacturing capacity to meet increases in demand or expedited shipment schedules, this may exacerbate any interruptions in Applied's manufacturing operations and supply chain and the associated effect on Applied's working capital. Moreover, if actual demand for Applied's products is different than expected, Applied may purchase more/fewer parts than necessary or incur costs for canceling, postponing or expediting delivery of parts. If Applied purchases inventory in anticipation of customer demand that does not materialize, or if customers reduce or delay orders, Applied may incur excess inventory charges. Any or all of these factors could materially and adversely affect Applied's business, financial condition and results of operations.

Applied is exposed to risks associated with acquisitions and strategic investments.

Applied has made, and in the future intends to make, acquisitions of or investments in, companies, technologies or products in existing, related or new markets for Applied. In November 2011, Applied completed its acquisition of Varian Semiconductor Equipment Associates, Inc. (Varian), which was the Company's largest acquisition to date. Acquisitions involve numerous risks that vary depending on the scale and nature of the acquisition, including but not limited to:

- diversion of management's attention from other operational matters;
- inability to complete acquisitions as anticipated or at all;
- requirements imposed by government regulators in connection with their review of a transaction, which may include, among other things, divestitures and/or restrictions on the conduct of Applied's existing business or the acquired business;
- ineffective integration of operations, systems, technologies, products or employees of an acquired business;
- inability to realize anticipated synergies or other benefits;
- failure to commercialize purchased technologies;
- initial dependence on unfamiliar supply chains or relatively small supply partners;
- inability to capitalize on characteristics of new markets that may be significantly different from Applied's existing markets and where competitors may have stronger market positions and customer relationships;
- failure to attract, retain and motivate key employees from the acquired business;

Table of Contents

- reductions in cash balances and/or increases in debt obligations to finance the acquisition, which reduce the availability of cash flow for general corporate or other purposes;
- exposure to new operational risks, rules, regulations, worker expectations, customs and practices to the extent acquired businesses are located in regions where Applied has not historically conducted business;
- challenges associated with managing new, more diverse and more widespread operations, projects and people;
- inability to obtain and protect intellectual property rights in key technologies;
- inadequacy or ineffectiveness of an acquired company's internal financial controls, disclosure controls and procedures, and/or environmental, health and safety, anti-corruption, human resource, or other policies or practices;
- impairment of acquired intangible assets and goodwill as a result of changing business conditions, technological advancements or worse-than-expected performance of the segment;
- the risk of litigation or claims associated with a proposed or completed transaction;
- unknown, underestimated and/or undisclosed commitments or liabilities; and
- the inappropriate scale of acquired entities' critical resources or facilities for business needs.

Applied also makes strategic investments in other companies, including companies formed as joint ventures, which may decline in value and/or not meet desired objectives. The success of these investments depends on various factors over which Applied may have limited or no control and, particularly with respect to joint ventures, requires ongoing and effective cooperation with strategic partners. The risks to Applied's strategic investment portfolio may be exacerbated by unfavorable financial market and macroeconomic conditions and, as a result, the value of the investment portfolio could be negatively impacted and lead to impairment charges. Mergers and acquisitions and strategic investments are inherently subject to significant risks. If Applied does not successfully manage the risks associated with acquisitions and strategic investments, its business, financial condition and results of operations could be materially and adversely affected.

The ability to attract, retain and motivate key employees is vital to Applied's success.

Applied's success, competitiveness and ability to execute on its global strategies and maintain a culture of innovation depend in large part on its ability to attract, retain and motivate key employees, especially in critical positions.

Achieving this objective may be difficult due to many factors, including fluctuations in global economic and industry conditions, Applied's organizational structure, competitors' hiring practices, cost reduction activities (including workforce reductions and unpaid shutdowns), availability of career development opportunities, the ability to obtain necessary authorizations for workers to provide services in non-native countries, and the effectiveness of Applied's compensation and benefit programs, including its share-based programs. If Applied does not successfully attract, retain and motivate key employees, Applied may be unable to capitalize on its opportunities and its business, financial condition and operating results may be materially and adversely affected.

The failure to successfully implement and conduct outsourcing activities and other operational initiatives could adversely affect results of operations.

To better align its costs with market conditions, locate closer to customers, enhance productivity, and improve efficiencies, Applied conducts certain engineering, software development, manufacturing, sourcing and other operations in regions outside the United States, including India, Taiwan, China, and Korea. Applied has implemented a distributed manufacturing model, under which certain manufacturing and supply chain activities are conducted in various countries, including the United States, Europe, Israel, Singapore, Taiwan and other countries in Asia, and assembly of some systems is completed at customer sites. In addition, Applied outsources certain functions to third parties, including companies in the United States, India, China, Korea, Malaysia and other countries. Outsourced functions include contract manufacturing, engineering, customer support, software development, information technology support, finance and administrative activities. The expanding role of third party providers has required changes to Applied's existing operations and the adoption of new procedures and processes for retaining and managing these providers, as well as redistributing responsibilities as warranted, in order to realize the potential productivity and operational efficiencies, assure quality and continuity of supply, and protect the intellectual property of Applied and its customers, suppliers and other partners. If Applied does not accurately forecast the amount, timing and mix of demand for products, or if contract manufacturers or other outsource providers fail to perform in a timely manner or at

satisfactory quality levels, Applied's ability to meet customer requirements could suffer, particularly during a market upturn.

71

Table of Contents

In addition, Applied must regularly implement or update comprehensive programs and processes to better align its global organizations, including initiatives to enhance the Asia supply chain and improve back office and information technology infrastructure for more efficient transaction processing. Applied also is implementing a multi-year, company-wide program to transform certain business processes or extend established processes, including the transition to a single enterprise resource planning (ERP) software system to perform various functions. The implementation of additional functionality to the ERP system entails certain risks, including difficulties with changes in business processes that could disrupt Applied's operations, such as its ability to track orders and timely ship products, project inventory requirements, manage its supply chain and aggregate financial and operational data. During transitions Applied must continue to rely on legacy information systems, which may be costly or inefficient, while the implementation of new initiatives may not achieve the anticipated benefits and may divert management's attention from other operational activities, negatively affect employee morale, or have other unintended consequences. If Applied does not effectively develop and implement its outsourcing and relocation strategies, if required export and other governmental approvals are not timely obtained, if Applied's third party providers do not perform as anticipated, or if there are delays or difficulties in enhancing business processes, Applied may not realize anticipated productivity improvements or cost efficiencies, and may experience operational difficulties, increased costs (including energy and transportation), manufacturing interruptions or delays, inefficiencies in the structure and/or operation of its supply chain, loss of its intellectual property rights, quality issues, reputational harm, increased product time-to-market, and/or inefficient allocation of human resources, any or all of which could materially and adversely affect Applied's business, financial condition and results of operations.

Applied may incur impairment charges to goodwill or long-lived assets.

Applied has a significant amount of goodwill and other acquired intangible assets related to acquisitions. Goodwill and purchased intangible assets with indefinite useful lives are not amortized, but are reviewed for impairment annually during the fourth quarter of each fiscal year, and more frequently when events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. The review compares the fair value for each of Applied's reporting units to its associated carrying value, including goodwill. Factors that could lead to impairment of goodwill and intangible assets include adverse industry or economic trends, reduced estimates of future cash flows, declines in the market price of Applied common stock, changes in Applied's strategies or product portfolio, and restructuring activities. Applied's valuation methodology for assessing impairment requires management to make judgments and assumptions based on historical experience and projections of future operating performance. Applied may be required to record a charge to earnings during the period in which an impairment of goodwill or amortizable intangible assets is determined to exist, which could materially and adversely affect Applied's results of operations. Applied is exposed to various risks related to legal proceedings or claims and protection of intellectual property rights. Applied from time to time is, and in the future may be, involved in legal proceedings or claims regarding patent infringement, intellectual property rights, antitrust, environmental regulations, securities, contracts, product performance, product liability, unfair competition, misappropriation of trade secrets, employment, workplace safety, and other matters. Applied also on occasion receives notification from customers who believe that Applied owes them indemnification or other obligations related to claims made against such customers by third parties.

In February 2010, the Seoul Prosecutor's Office for the Eastern District in Korea indicted certain employees of Applied Materials Korea (AMK), including the former head of AMK who at the time of indictment was a vice president of Applied Materials, Inc., along with employees of several other companies, alleging the improper receipt and use of confidential information of Samsung Electronics Co., Ltd. (Samsung), a major customer. Hearings on these matters are ongoing in the Seoul Eastern District Court. Applied and Samsung entered into a settlement agreement effective as of November 1, 2010, which resolved potential civil claims related to this matter and which is separate from and does not affect the criminal proceedings.

Legal proceedings and claims, whether with or without merit, and associated internal investigations, may (1) be time-consuming and expensive to prosecute, defend or conduct; (2) divert management's attention and other Applied resources; (3) inhibit Applied's ability to sell its products; (4) result in adverse judgments for damages, injunctive relief, penalties and fines; and/or (5) negatively affect Applied's business. There can be no assurance regarding the

outcome of current or future legal proceedings, claims or investigations. If Applied is not able to favorably resolve or settle legal proceedings or claims, or in the event of any adverse findings against Applied or any of its employees, Applied's business, financial condition and results of operations could be materially and adversely affected and Applied may suffer harm to its reputation.

Table of Contents

Applied's success depends in significant part on the protection of its intellectual property and other rights. Infringement of Applied's rights by a third party, such as the unauthorized manufacture or sale of equipment or spare parts, could result in uncompensated lost market and revenue opportunities for Applied. Applied's intellectual property rights may not provide significant competitive advantages if they are circumvented, invalidated, rendered obsolete by the rapid pace of technological change, or if Applied does not adequately protect or assert these rights. Furthermore, the laws and practices of other countries, including China, India, Taiwan and Korea, permit the protection and enforcement of Applied's rights to varying extents, which may not be sufficient to adequately protect Applied's rights. Applied previously entered into an arrangement with one of its competitors to decrease the risk of patent infringement lawsuits in the future. There can be no assurance that the intended results of this arrangement will be achieved or that Applied will be able to adequately protect its intellectual property rights with the restrictions associated with the arrangement. If Applied is not able to favorably resolve or settle claims, obtain or enforce intellectual property rights, obtain necessary licenses on commercially reasonable terms, and/or successfully prosecute or defend its intellectual property position, Applied's business, financial condition and results of operations could be materially and adversely affected and Applied may suffer harm to its reputation.

Changes in tax rates or tax assets and liabilities could affect results of operations.

As a global company, Applied is subject to taxation in the United States and various other countries. Significant judgment is required to determine and estimate worldwide tax liabilities. Applied's future annual and quarterly tax rates could be affected by numerous factors, including changes in the: (1) applicable tax laws; (2) amount and composition of pre-tax income in countries with differing tax rates; (3) plans of the Company to permanently reinvest certain funds held outside of the U.S.; or (4) valuation of Applied's deferred tax assets and liabilities.

To better align with the increasingly international nature of its business, Applied is transitioning certain manufacturing, supply chain, and other operations into Asia, bringing these activities closer to customers. These changes are expected to result in a reduction of future operating costs. Applied has received authorization to use tax incentives that provide that income earned in certain countries outside the U.S. will be subject to tax holidays or reduced income tax rates. To obtain the benefit of these tax provisions, Applied must meet requirements relating to various activities. Applied's ability to realize benefits from these provisions could be materially affected if, among other things, applicable requirements are not met, or if Applied incurs net losses for which it cannot claim a deduction. In addition, Applied is subject to regular examination by the Internal Revenue Service and other tax authorities, and from time to time initiates amendments to previously filed tax returns. Applied regularly assesses the likelihood of favorable or unfavorable outcomes resulting from these examinations and amendments to determine the adequacy of its provision for income taxes, which requires estimates and judgments. Although Applied believes its tax estimates are reasonable, there can be no assurance that the tax authorities will agree with such estimates. Applied may have to engage in litigation to achieve the results reflected in the estimates, which may be time-consuming and expensive. There can be no assurance that Applied will be successful or that any final determination will not be materially different from the treatment reflected in Applied's historical income tax provisions and accruals, which could materially and adversely affect Applied's financial condition and results of operations.

Applied is subject to risks of non-compliance with environmental and safety regulations.

Applied is subject to environmental and safety regulations in connection with its global business operations, including but not limited to: regulations related to the development, manufacture and use of its products; recycling and disposal of materials used in its products or in producing its products; the operation of its facilities; and the use of its real property. The failure or inability to comply with existing or future environmental and safety regulations, such as those related to climate change, could result in: (1) significant remediation liabilities; (2) the imposition of fines; (3) the suspension or termination of the development, manufacture, sale or use of certain of its products; (4) limitations on the operation of its facilities or ability to use its real property; and/or (5) a decrease in the value of its real property, each of which could have a material adverse effect on Applied's business, financial condition and results of operations.

Table of Contents

Applied is exposed to various risks related to the regulatory environment.

Applied is subject to various risks related to: (1) new, different, inconsistent or even conflicting laws, rules and regulations that may be enacted by executive order, legislative bodies and/or regulatory agencies in the countries in which Applied operates; (2) disagreements or disputes between national or regional regulatory agencies related to international trade; and (3) the interpretation and application of laws, rules and regulations. For example, as a public company with global operations, Applied is subject to the laws of multiple jurisdictions and the rules and regulations of various governing bodies, including those related to financial and other disclosures, corporate governance, privacy, and anti-corruption. Changes in laws, regulations and standards may create uncertainty regarding compliance matters. Efforts to comply with new and changing regulations have resulted in, and are likely to continue to result in, increased general and administrative expenses and a diversion of management time and attention from revenue-generating activities to compliance activities. If Applied is found by a court or regulatory agency not to be in compliance with applicable laws, rules or regulations, Applied could be subject to legal or regulatory sanctions, the public's and customers' perception of Applied could decline, and Applied's business, financial condition and results of operations could be materially and adversely affected.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table provides information as of April 29, 2012 with respect to the shares of common stock repurchased by Applied during the second quarter of fiscal 2012.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program*	Maximum Dollar Value of Shares That May Yet be Purchased Under the Program*
(In millions, except per share amounts)				
Month #1 (January 30, 2012 to February 26, 2012)	1.7	\$ 12.79	1.7	\$960
Month #2 (February 27, 2012 to March 25, 2012)	6.3	\$ 12.48	6.3	\$2,946
Month #3 (March 26, 2012 to April 29, 2012)	8.2	\$ 12.12	8.2	\$2,846
Total	16.2	\$ 12.33	16.2	

On March 8, 2010, the Board of Directors approved a stock repurchase program for up to \$2.0 billion in repurchases over the three year period ending March 2013. On March 5, 2012, the Board of Directors approved a new stock repurchase program authorizing up to \$3.0 billion in repurchases over the next three years, ending March 2015. The stock repurchase program that began in 2010 terminated concurrent with the start of the new stock repurchase program.
