2 Forward-Looking Statements If we refer to “we,” “us,” “our,” or “the Company,” we mean Consolidated-Tomoka Land Co. and its consolidated subsidiaries. Certain statements contained in this presentation (other than statements of historical fact) are forward-looking statements. Words such as “believe,” “estimate,” “expect,” “intend,” “anticipate,” “will,” “could,” “should,” “plan,” “potential,” “predict,” “forecast,” “project,” and similar expressions and variations thereof identify certain of such forward-looking statements, which speak only as of the dates on which they were made. Although forward-looking statements are made based upon management’s expectations and beliefs concerning future Company actions and developments and their potential effect upon the Company, a number of factors could cause the Company’s actual results to differ materially from those set forth in the forward-looking statements. Such factors may include uncertainties associated with the closing of pending land transactions or other dispositions of assets, including the likelihood, timing, and final transaction terms thereof, the estimate of the cost of completing improvements affiliated with certain investments, the impact of permitting or other transactional activities on the total estimated gain for land sales, as well as the timing of the recognition of such gains, our ability to obtain necessary governmental approvals for our land transactions or to satisfy other closing conditions, the ability to execute share repurchase transactions, the completion of 1031 transactions, the ability for the Company to convert to a real estate investment trust, the costs of improvements for the Golf Operations assets, the ability to achieve certain leasing activity including the timing and terms thereof, as well as the uncertainties and risk factors discussed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2017, filed with the Securities and Exchange Commission. There can be no assurance that future developments will be in accordance with management’s expectations or that the effect of future developments on the Company will be those anticipated by management. Endnote references (A) through (H) provided in this presentation are defined on Slide 46 Forward Looking Statements

32 Wintergreen Does NOT Represent ALL Shareholders Wintergreen's Claims The Facts Wintergreen's nominees will be focused on ensuring shareholders have "true" representation on the CTO Board 2 of CTO's nominees, Thomas P. Warlow, III and Howard C. Serkin, were originally recommended by Wintergreen in 2010 and 2011, respectively, and are currently on the Board Chris W. Haga, current director and CTO nominee, is a partner with Carlson Capital – a long-time shareholder of CTO and one of CTO's ten largest shareholders John P. Albright, our President and Chief Executive Officer, current director and CTO nominee, is another one of CTO's ten largest shareholders Wintergreen's nominees are "committed to acting in the best interest of all shareholders" Wintergreen's interests are influenced heavily by the challenges at the Wintergreen Fund relating to investment concentration and the illiquidity of its position in CTO Wintergreen's Nominees have no experience governing or running a public company or real estate company, or managing real estate assets 2 of Wintergreen's Nominees are the primary executives for Wintergreen; the third, Evan Ho, worked at Wintergreen and is now one of its paid consultants Wintergreen has acknowledged it may have conflicts and expects shareholders to trust that Wintergreen will "manage" those conflicts "fairly" Can Ms. Coheurnour act independently of David Winters and in the best interest of all shareholders when David Winters is her boss and controls her employment and compensation at Wintergreen? Wintergreen's Claims Wintergreen False Claims Versus the Facts

33 Wintergreen's Nominees Board Nominee Yrs. of Experience Public Co. Leadership Public Co. Board Real Estate Operations Real Estate Finance Finance & Capital Management Accounting & Tax Elizabeth N. Cohernour 30+ Evan H. Ho 29 David J. Winters 30+ Wintergreen's Director Nominees No Real Estate Experience and No Other Relevant Experience Experience According to Glass-Lewis in 2017: "we find the majority of the Dissident's [Wintergreen's] allegations to be baseless, and we consider it unlikely that the replacement of any of the current directors with the Dissident's nominees would lead to an improved outcome, from either a valuation or governance perspective, for CTO shareholders other than Wintergreen" Emphasis added.

34 Wintergreen's Strategic Alternatives = Sell or Liquidate Wintergreen's Claims The Facts Wintergreen believes the proper focus is maximizing shareholder value by either a sale or liquidation of CTO Wintergreen is singularly focused on an expedited sale or liquidation of CTO seemingly to address issues at Wintergreen Fund CTO ran a full strategic alternatives review process in 2016 and received two all-stock offers reflecting a less than 5% premium to the trading price – which represents a discount of approximately 26% to CTO's trading price on 3/29/18 The potential universe of buyers for CTO are well aware that the Board would consider any reasonable offer CTO's disclosures provide extensive information regarding valuation of the Company's assets, including a NAV worksheet Liquidating CTO is not a viable strategic alternative given the significantly adverse tax consequences; that Wintergreen continues to assert this alternative as a good idea says much about Wintergreen and their lack of understanding of CTO. Wintergreen believes that having approximately 74% of CTO's land under contract is effectively the same thing as having sold the land Wintergreen ignores that CTO's land pipeline is subject to execution risk Wintergreen fails to understand that a buyer of CTO would likely not give full credit for the transactions in the land pipeline because of the inherent uncertainty to close the transactions – and further that Wintergreen's disruptive activities only exacerbate that uncertainty. Wintergreen's Claims Wintergreen False Claims Versus the Facts

35 Wintergreen's Proposal to Narrow Discount to NAV Wintergreen's Misguided Focus is on Sale or Liquidation Closing Land Transactions is the Best Way to Narrow the Discount CTO's Board ran Strategic Alternatives Review process in 2016 8 Month Review: commenced November 2015 and concluded June 2016 Led by Special Committee Deutsche Bank served as financial advisor (no retainer, success fee only) Considered wide range of potential alternatives Management placed no restrictions on form of any proposed transaction There were no requirements for retention or compensation for any member of current CTO management team There were no minimum or maximum price requirements Received 2 all-stock offers – pricing was at or near then-current market price of approximately \$50/share, and included significant leverage risk Market has substantial information about CTO, our portfolio and assets, and knows we are open to proposals Narrowing Discount of CTO Stock Price to Estimated NAV Execution of Company's strategy HAS narrowed that gap significantly On August 1, 2011, the first day of John P. Albright's tenure as CEO, CTO's stock closed at \$28.90 Since August 2011, CTO has sold nearly 2,700 acres (1) of land for total proceeds of \$109.7 million (1) and invested nearly \$387 million (1) into income-producing properties On March 29, 2018 CTO's stock price closed at \$62.85 per share (an increase of 118% from August 1, 2011) Since 2011, the gap between NAV and share price has narrowed by \$33.95 per share CTO's Board and management team are executing its strategy, and the discount has narrowed dramatically As of March 29, 2018

36 Responsive to CTO's Shareholders & Enhancing Alignment Wintergreen's Claims The Facts Wintergreen Implies that CTO's executive compensation is not properly aligned with the appreciation of CTO's share price Members of CTO's Compensation Committee spoke with shareholders (representing approximately 84% of the total shares outstanding – including Wintergreen) to get direct feedback on executive compensation. Based on the shareholder feedback received, CTO introduced significant modifications to executive compensation practices and structure – utilizing expert guidance from two nationally recognized compensation consultants The majority of equity incentive compensation granted to CTO executives is performance-based and is subject to 3-year cliff vesting; vesting only occurs if total shareholder return meets the established criteria relative to CTO's established Peer Group as measured for the full 3-years. Performance metrics for annual incentive programs are based on the execution of CTO's strategic plan including specific objective criteria including dollar levels for land sales, land under contract and income property investments, and cash flow. There is no double counting. CTO's Board implemented claw back policy – for equity incentive compensation AND for cash incentive compensation. Implementing performance metrics that differentiate between threshold, target and outperform provides clear disclosure of goals and expectations, thus providing greater transparency to shareholders: Threshold: a minimum that must be met to get any bonus Target: a clear measurement indicating that expectations have been met, and Outperform: providing significant motivation to beat expectations/goals Wintergreen's Claims Wintergreen False Claims Versus the Facts

37 Don't Take Our Word For It – Consider the View of the Oracle of Omaha Third Party Perspectives “When David Winters, who runs a fund that has underperformed by every measure from inception, five years, one year, and who draws a 150 basis point fee, when you can go to Vanguard and do it for 17 basis points and he complains about compensation not being commensurate with performance at Coke. And then he has that kind of record himself, I think he's a fellow living in an all glass house.” Warren Buffett Chairman and Chief Executive Officer, Berkshire Hathaway Inc. Interview on CNBC March 2015 Warren Buffett on David Winters Emphasis added.

38 Fair Observation – Applicable to Consider Now Third Party Perspectives “We get into the pay for performance I looked at the performance for the Wintergreen Funds. If I look at your [Wintergreen Fund] performance – 7.1% annualized returns since the inception of the investor shares. If I just invest in the S&P over that period of time the return is a 7.8% annualized. You [Wintergreen] charge 185 basis points. I can get that for 20 basis points elsewhere by just investing in the S&P 500.” Becky Quick Co-Anchor of CNBC’s Squawk Box & On the Money Interview on CNBC November 2014 Becky Quick interview of David Winters Emphasis added.

39 2017 Endorsement from Chairman of Brown & Brown “ it is shocking to me that Consolidated-Tomoka’s management team and Board, both of which are experiencing significant success, continue to be harassed by Wintergreen...” “The Board and management...have been extremely successful in executing its business plan...” “CTO’s Board is very strong and has the right local, state and national real estate experience ” Hyatt Brown Chairman, Brown & Brown Insurance NYSE: BRO Emphasis added. 45 Makes Sense to Us EXCERPT: Wintergreen Letter to Wintergreen Fund Investors in March 2015 Emphasis added. An example of this is Consolidated Tomoka Land Company (“CTO”), of which the Fund owns approximately 21% of the company’s outstanding stock. When Wintergreen first invested in CTO in 2006, the company was comprised of a wonderful asset, 10,500 acres of undervalued land in Daytona Beach, Florida, as well as income producing properties which generated enough steady cash flow to sustain the company when land sales slowed. The company had benefitted from the long boom in Florida’s housing market, but as time went on, we felt that they were not doing enough to actively grow the value of the company. We engaged in many long conversations with management and encouraged them to become more proactive in unlocking the enormous value of the company. As we continued to press our concerns, management and the board of directors seemed to dig in their heels and insist on doing things as they had always done. It became clear to us that we would have to take a more active and public role in steering the company in the right direction. Owning valuable assets, such as CTO’s land, is a great advantage for a company, but without the right people running the company, there is little chance of that asset value ever accruing to shareholders. Over the course of three years, Wintergreen Advisers, LLC, the Fund’s Investment Manager, proposed several candidates for election to the board of directors, all of whom were independent from Wintergreen. Four of these candidates became directors, and several of the old guard directors were voted out or resigned. The reinvigorated board evaluated management and the company’s strategy with fresh eyes and came to the conclusion that change was needed. With the support of Wintergreen, the board appointed John Albright as CEO in 2011 and empowered him to bring in his own management team and develop plans to unlock the enormous value of the company’s assets. The board devised an executive compensation plan which closely aligns their pay with long term value creation for shareholders. With renewed confidence in the company’s leadership at all levels, Wintergreen gave CTO time and space to revitalize the company. Under guidance from the board, the new management team developed plans to attract new developers to Daytona Beach, from national homebuilders to Trader Joe’s and Tanger Factory Outlet Centers. They have grown and diversified their income property portfolio and increased outreach to potential investors. A deal announced in November 2014, for CTO to sell 1,600 acres of land to Minto Communities is expected to bring 3,000 new households to Daytona Beach, which should further drive demand for CTO’s land. The real estate market in Daytona Beach is bouncing back, and the actions taken by CTO’s management team and board over the past four years have put the company in position to benefit from this rebound. This progress at CTO has not gone unnoticed by investors. Since the board appointed John Albright as CEO in 2011, CTO shares have risen by 22% annually as of the date of this letter, far outpacing the 16% annual gain for the S&P 500. In 2014, the company sold less than 1% of its land but realized its highest per share earnings since 2007. That performance combined with the recent disclosure that the company is considering converting to a Real Estate Investment Trust (which has significant tax advantages for the company), has driven the shares up by more than 80% over the past twelve months. Wintergreen’s involvement with CTO has been a long and often trying experience, but it now stands as a great example of the value we can add by combining long term investing with our own brand of activism. Wintergreen’s actions at CTO separated the Chairman and CEO positions, gave investors an annual say on pay vote (before it became a requirement), and put a strong lineup of directors on CTO’s board. The board in turn hired a very capable management team, which has transformed the company into the profitable and growing enterprise it is today. We believe the best is yet to come for CTO. David Winter’s Own Words
