Cautionary Statement Pursuant to Safe Harbor Provisions of the Private Securities Litigation Reform Act of 1995

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 (the "Exchange Act"). From time to time, we may also provide oral or written forward-looking statements in other materials we release to the public. Such forward-looking statements are subject to the safe harbor created by the Private Securities Litigation Reform Act of 1995.

Statements that refer to projections of our future financial performance, our anticipated growth and trends in our businesses, and other characterizations of future events or circumstances are forward-looking statements, and include, but are not limited to, statements under the headings "Management's Discussion and Analysis of Financial Condition and Results of Operations" and "Outlook for 2012" relating to overall volume trends, consumer preferences, pricing trends, industry forces, cost reduction strategies, anticipated results, anticipated synergies, expectations for funding future capital expenditures and operations, debt service capabilities, shipment levels and profitability, market share and the sufficiency of capital resources. In addition, statements that we make in this report that are not statements of historical fact may also be forward-looking statements. Words such as "expects," "goals," "plans," "believes," "continues," "may," "anticipate," "seek," "estimate," "outlook," "trends," "future benefits," "strategies," and variations of such words and similar expressions are intended to identify forward-looking statements.

Forward-looking statements are subject to risks and uncertainties that could cause actual results to be materially different from those indicated (both favorably and unfavorably). These risks and uncertainties include, but are not limited to those described under the heading "Risk Factors," elsewhere throughout this report, and those described from time to time in our past and future reports filed with the Securities and Exchange Commission, including in our Annual Report on Form 10-K for the year ended December 31, 2011. Caution should be taken not to place undue reliance on any such forward-looking statements. Forward-looking statements speak only as of the date when made and we undertake no obligation to update any forward-looking statement, whether as a result of new information, future events or otherwise.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation and Summary of Significant Accounting Policies

Unless otherwise noted in this report, any description of "we", "us" or "our" includes Molson Coors Brewing Company ("MCBC" or the "Company"), principally a holding company, and its subsidiaries. On June 15, 2012, we completed our acquisition (the "Acquisition") of StarBev Holdings S.à r.l. ("StarBev"), which we subsequently renamed Molson Coors Central Europe ("MCCE"), operating in Central Europe (which includes Czech Republic, Serbia, Croatia, Romania, Bulgaria, Hungary, Montenegro, Bosnia-Herzegovina and Slovakia). Our other subsidiaries include: Molson Coors Canada ("MCC"), operating in Canada; MillerCoors LLC ("MillerCoors"), which is accounted for by us under the equity method of accounting, operating in the United States ("U.S."); Molson Coors Brewing Company (UK) Limited ("MCBC-UK"), operating in the United Kingdom ("U.K.") and the Republic of Ireland; Molson Coors International ("MCI"), operating in various other countries; and our other non-operating subsidiaries as further described in Note 1 of the Notes to the Audited Consolidated Financial Statements ("Notes") included in our Annual Report on Form 10-K for the year ended December 31, 2011 ("Annual Report") and as amended and filed with the Securities and Exchange Commission ("SEC") on Form 8-K on April 26, 2012.

Unless otherwise indicated, information in this report is presented in U.S. dollars ("USD" or "\$").

The accompanying unaudited condensed consolidated interim financial statements reflect all adjustments which are necessary for a fair statement of the financial position, results of operations and cash flows for the periods presented in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). Such unaudited interim financial statements have been prepared in accordance with the instructions to Form 10-Q pursuant to the rules and regulations of the SEC. Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. GAAP have been condensed or omitted pursuant to such rules and regulations.

These unaudited condensed consolidated interim financial statements should be read in conjunction with our Annual Report and have been prepared on a consistent basis with the accounting policies described in Note 1 of the Notes included in our Annual Report. Our accounting policies did not change in the second quarter or first half of 2012. The results of operations for the 13 and 26 weeks ended June 30, 2012, are not necessarily indicative of the results that may be achieved for the full fiscal year.

We follow a 52/53 week fiscal reporting calendar. Unless otherwise indicated, the second quarter of 2012 and 2011 refers to the 13 weeks ended June 30, 2012, and June 25, 2011, respectively. The first half of 2012 and 2011 refers to the 26 weeks ended June 30, 2012, and June 25, 2011, respectively. Fiscal year 2012 refers to the 52 weeks ending December 29, 2012, and fiscal year 2011 refers to the 53 weeks ended December 31, 2011.

MillerCoors and MCCE follow a monthly reporting calendar. The second quarter and first half of 2012 and 2011 refer to the three and six months ended June 30, 2012, and June 30, 2011, respectively, except for MCCE where the second quarter and first half of 2012 refer to the two week period from the Acquisition date of June 15, 2012 through June 30, 2012.

Consistent with the disclosure in the Annual Report, these significant accounting policies include our treatment of the allowance for credit losses on our MCBC-UK trade loan portfolio. This allowance is maintained to provide for loan losses deemed to be probable related to specifically identified loans and for losses in the loan portfolio that have been incurred at the balance sheet date. We establish our allowance through a provision for loan losses charged against earnings and recorded in Marketing, general and administrative expenses. Loan balances that are written off are recorded against the allowance as a write-off. A rollforward of the allowance for the first half ended June 30, 2012, and June 25, 2011, is as follows (in millions):

	As of June 30, 2012	June 25, 2011	
Balance at beginning of the year	\$6.2	\$9.1	
Addition charged to expense, net of recoveries	2.4	(0.6)

2. New Accounting Pronouncements

Adoption of New Accounting Pronouncements

Fair Value Measurement

In May 2011, the Financial Accounting Standards Board ("FASB") issued authoritative guidance related to fair value measurement and disclosure requirements. The new guidance results in a consistent definition of fair value and convergence between U.S. GAAP and International Financial Reporting Standards ("IFRS") on both how to measure fair value and on what disclosures to provide about fair value measurements. The guidance was effective for our quarter ended March 31, 2012. The adoption of this guidance did not impact our financial position or results from operations.

Presentation of Other Comprehensive Income

In June 2011, the FASB issued authoritative guidance related to the presentation of other comprehensive income, which was later amended in December 2011. Upon adoption of the guidance, as amended, an entity has the option to present the total of comprehensive income, the components of net income and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The guidance was effective for our quarter ended March 31, 2012. The adoption of this guidance was limited to a change in the presentation of our results, which we have elected to include as a separate Condensed Consolidated Statement of Comprehensive Income.

Testing Goodwill for Impairment

In September 2011, the FASB issued authoritative guidance related to goodwill impairment testing. The new guidance permits an entity to first assess qualitative factors to whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If it is concluded that this is the case, it is necessary to perform the two-step goodwill impairment test. Otherwise, the two-step goodwill impairment test is not required. This guidance is effective for annual and interim goodwill impairment tests performed for our fiscal years beginning January 1, 2012. This guidance does not have an impact on our financial position or results from operations.

New Accounting Pronouncements Not Yet Adopted

Disclosure about Offsetting Assets and Liabilities

In December 2011, the FASB issued authoritative guidance enhancing the disclosure requirements related to offsetting asset and liability positions. The update creates new disclosure requirements about the nature of an entity's rights of offset and related arrangements associated with its financial instruments and derivative instruments. The new disclosures are designed to better facilitate comparison between financial statements prepared under U.S. GAAP and IFRS by requiring entities to provide financial statement users information about both gross and net exposures. The guidance is effective for annual reporting periods beginning on or after January 1, 2013, and interim periods thereafter. We do not anticipate that this guidance will have an impact on our financial position or results from operations. However, we are currently evaluating the impact of this guidance on our existing disclosures.

Testing Indefinite-lived Intangibles for Impairment

In July 2012, the FASB issued authoritative guidance related to the impairment testing of indefinite-lived intangibles. The new guidance permits an entity to first assess qualitative factors to whether it is more likely than not that the fair value of an indefinite-lived intangible is less than its carrying amount. If it is concluded that this is the case, the annual impairment test is necessary. Otherwise, the annual impairment test is not required. This guidance is effective for annual and interim goodwill impairment tests performed for our fiscal years beginning January 1, 2013, however, we have decided to early adopt and make it effective for our 2012 impairment review, which will take place in the third quarter. This guidance does not have an impact on our financial position or results from operations.

3. Acquisition of StarBev

General

In accordance with our strategy to increase our portfolio of premium brands and deepen our reach into growth markets around the world, we completed the Acquisition of StarBev from StarBev L.P. (the "Seller") on June 15, 2012 for €2.7 billion (or \$3.4 billion), including the assumption and payoff of pre-existing StarBev indebtedness. Headquartered in Amsterdam and Prague, StarBev is one of the largest brewers in Central Europe. StarBev, which we renamed Molson

Coors Central Europe ("MCCE"), operates nine breweries in Czech Republic, Serbia, Croatia, Romania, Bulgaria, Hungary and Montenegro and sold approximately 13.3 million hectoliters of beer in 2011. It also sells its brands in Bosnia-Herzegovina and Slovakia. In 2011,

Table of Contents

StarBev held a top-three market share position in each of its markets, and its brand portfolio includes local champions such as Staropramen, Borsodi, Kamenitza, Bergenbier, Ozujsko, Jelen, and Niksicko, and it also brews and distributes other brands under license. Staropramen is distributed and sold in over 30 countries. The operating results of MCCE are reported in our new Central Europe operating segment. We incurred acquisition-related costs of \$25.3 million and \$31.4 million, included in Marketing general and administrative expenses in the second quarter and first half of 2012, respectively. We also incurred financing-related expenses as further described in Note 8, "Other Income and Expense" and Note 13, "Debt."

Unaudited Pro Forma Financial Information

MCCE contributed Net sales of \$57.3 million and Income from continuing operations before income taxes of \$12.4 million from the Acquisition date of June 15, 2012 through June 30, 2012. The following unaudited pro forma summary presents our Condensed Consolidated Statements of Operations as if MCCE had been acquired on December 26, 2010, the first day of our 2011 fiscal year. These amounts were calculated after conversion to U.S. GAAP, conforming to our accounting policies, and adjusting MCCE's results to reflect the depreciation and amortization that would have been charged assuming the preliminary fair value adjustments to Properties, net and Other intangibles, net resulting from the purchase had been applied from December 26, 2010, together with the consequential tax effects. These adjustments also reflect the removal of StarBev historical interest expense, the addition of interest expense to be prospectively incurred on the debt issued to finance the purchase and the removal of the previously mentioned acquisition-related costs. Additional significant adjustments include the removal of the following non-recurring, transaction-related costs: a \$57.9 million Euro currency loss, a \$39.2 million Treasury Lock loss, and bridge facility costs of \$13.0 million, as further described in Note 8, "Other Income and Expense" and Note 13, "Debt", as well as expense of \$8.6 million related to the fair value adjustment to acquisition date inventory. This unaudited pro forma financial information is not intended to reflect the performance which would have actually resulted had the Acquisition been effected on the dates indicated. Further, the unaudited pro forma results of operations are not necessarily indicative of the results of operations that may be obtained in the future.

We issued a €500 million Zero Coupon Senior Unsecured Convertible Note due 2013 to the Seller upon close of the Acquisition. See Note 13, "Debt" for further discussion.

According to our agreement with the Seller and in accordance with the terms of the senior debt facility agreement, (2) upon close of the Acquisition, we immediately repaid pre-existing StarBev third-party debt including accrued interest.

Table of Contents

- (3) Consists of \$143.6 million of cash acquired and \$101.3 million of bank overdrafts assumed as part of MCCE's cash pool arrangement. See Note 13, "Debt" for further discussion.

- We assumed the pre-existing StarBev \$423.4 million SDPO payable to third-party creditors, which we subsequently repaid on June 29, 2012, in accordance with the terms of the SDPO agreement. The SDPO was held by private investors and accrued interest at 11%. The settlement of the SDPO was not required by our agreement with the Seller.

The following table represents the classifications of the cash flows used, which are included within our Condensed Consolidated Statements of Cash Flows:

- Includes the SDPO discussed above, which was subsequently repaid on June 29, 2012 for \$425.7 million including the \$1.4 million of interest incurred subsequent to the close of the Acquisition noted as "Operating activities" in the table above.

- Includes \$1,816.0 million of cash consideration to the Seller for shares acquired and release of StarBev's pre-existing obligations to the Seller. Also, included is \$585.0 million of pre-existing third-party debt immediately repaid in accordance with our agreement with the Seller and the terms of the senior debt facility agreement. This amount is presented net of cash acquired of \$143.6 million.

- (3) Reflects the \$645.9 million fair value of the convertible note issued to the Seller upon close of the Acquisition. See Note 13, "Debt" for further discussion.

Preliminary Allocation of Consideration Transferred

The following table represents the preliminary allocation of the total consideration to MCCE's identifiable net assets, fair value of the noncontrolling interest in MCCE, and resulting residual goodwill as of June 15, 2012. These allocated amounts are subject to revision when our valuation and tax-related adjustments are finalized, which we expect to occur during 2012.

- (1) Includes trade receivables of \$152.2 million and inventory of \$57.3 million.

- (2) See Note 12, "Goodwill and Intangible Assets" for further discussion.

- (3) Includes the \$423.4 million SDPO assumed, which was subsequently repaid for \$425.7 million on June 29, 2012.

- (4) Includes \$409.9 million of deferred tax liabilities.

Table of Contents

The goodwill resulting from the Acquisition is primarily attributable to MCCE's licensed brand brewing, distribution and import business, anticipated synergies and the assembled workforce. All of the goodwill was (5) preliminarily assigned to the new Central Europe segment and is not expected to be deductible for tax purposes. See Note 12, "Goodwill and Intangible Assets" for further discussion.

4. Segment Reporting

Our reporting segments are based on the key geographic regions in which we operate and consist of Canada, the United States ("U.S."), Central Europe, the United Kingdom ("U.K.") and Molson Coors International ("MCI"). Corporate is not a segment and includes interest and certain other general and administrative costs that are not allocated to any of the operating segments.

The following table sets forth net sales by segment:

5. Investments

Our investments include both equity method and consolidated investments. Those entities identified as variable interest entities ("VIEs") have been evaluated to determine whether we are the primary beneficiary. The VIEs included under "Consolidated Investments" below are those for which we have concluded that we are the primary beneficiary and accordingly, we consolidate these entities. We have not provided any financial support to any of our VIEs during the quarter that we were not previously contractually obligated to provide. Authoritative guidance related to the consolidation of VIEs requires that we continually reassess whether we are the primary beneficiary of VIEs in which we have an interest. As such, the conclusion regarding the primary beneficiary status is subject to change and we continually evaluate circumstances that could require consolidation or deconsolidation.

Equity income in MillerCoors	\$185.6	\$171.8	\$304.5	\$273.0

Our net investment in MillerCoors is based on the carrying values of the net assets contributed to the joint venture which is less than our proportional share of underlying equity (42%) of MillerCoors (contributed by both Coors Brewing Company ("CBC") and Miller Brewing Company ("Miller")) by approximately \$587 million as of (1) June 30, 2012. This difference, with the exception of goodwill and land, is being amortized as additional equity income over the remaining useful lives of the contributed long-lived amortizing assets. The current basis difference combined with the \$35.0 million recorded in 2008 and 2009 related to differences resulting from accounting policy elections must be considered to reconcile MillerCoors equity to our investment in MillerCoors.

The net adjustment is to record all share-based compensation associated with pre-existing equity awards to be settled in Class B common stock held by former employees now employed by MillerCoors and to eliminate all share-based compensation impacts related to pre-existing SABMiller plc equity awards held by former Miller (2) employees now employed by MillerCoors. As of the end of the second quarter of 2011, the share-based awards granted to former CBC employees now employed by MillerCoors became fully vested. As such, no further adjustments will be recorded related to these awards. We are still recording adjustments to eliminate the impacts related to the pre-existing SABMiller plc equity awards, which represent the amounts recorded in 2012.

During the second quarter of 2012, we had \$5.3 million of beer sales to MillerCoors and \$3.1 million of beer purchases from MillerCoors. During the second quarter of 2011, we had \$9.5 million of beer sales to MillerCoors and \$2.2 million of beer purchases from MillerCoors. During the first half of 2012, we had \$10.2 million of beer sales to MillerCoors and \$5.4 million of beer purchases from MillerCoors. During the first half of 2011, we had \$17.5 million of beer sales to MillerCoors and \$4.7 million of beer purchases from MillerCoors.

For the second quarter of 2012, we recorded \$0.9 million of service agreement costs and other charges to MillerCoors and \$0.4 million of service agreement costs from MillerCoors. For the second quarter of 2011, we recorded \$2.0 million of service agreement costs and other charges to MillerCoors and \$1.9 million of service agreement costs from MillerCoors. For the first half of 2012, we recorded \$2.0 million of service agreement costs and other charges to MillerCoors and \$0.6 million of service agreement costs from MillerCoors. For the first half of 2011, we recorded \$3.4 million of service agreement costs and other charges to MillerCoors and \$2.1 million of service agreement costs from MillerCoors.

As of June 30, 2012, and December 31, 2011, we had \$1.4 million of net payables due to MillerCoors and \$2.0 million of net receivables due from MillerCoors, respectively.

6. Share-Based Payments

During the first half of 2012 and 2011, we recognized share-based compensation expense related to the following Class B common stock awards to certain directors, officers and other eligible employees, pursuant to the Molson Coors Brewing Company Incentive Compensation Plan ("Incentive Compensation Plan"): restricted stock units ("RSU"), deferred stock units ("DSU"), performance units ("PU"), stock options and stock-only stock appreciation rights ("SOSAR").

The following table summarizes components of the share-based compensation expense:

Total after-tax compensation expense	\$3.7		\$4.5		\$7.1		\$10.4	

During the first half of 2012, we granted 0.2 million stock options, 0.3 million RSUs and 0.7 million PUs, all of which were outstanding, other than an insignificant amount of cancellations, as of June 30, 2012.

Table of Contents

The mark-to-market share-based compensation expense before tax, related to our share-based awards granted to former CBC employees now employed by MillerCoors, was an expense of \$0.1 million and a benefit of \$0.1 million during the second quarter of 2011 and first half of 2011, respectively. We did not record an adjustment in the second quarter of 2012 or first half of 2012 as these awards were fully vested as of the end of the second quarter of 2011. No further adjustments will be recorded related to these awards. These amounts are included in the table above. As of June 30, 2012, there was \$32.5 million of total unrecognized pre-tax compensation expense related to non-vested shares from share-based compensation arrangements granted under the Incentive Compensation Plan. This compensation expense is expected to be recognized over a weighted-average period of approximately 1.6 years. The following table represents the summary of stock options and SOSARs outstanding as of June 30, 2012, and the activity during the first half of 2012:

	Outstanding options	Weighted-average exercise price per share	Weighted-average remaining contractual life (years)	Aggregate intrinsic value

Exercisable at June 30, 2012	5.6	\$39.09	3.63	\$26.0

The total intrinsic value of options exercised during the first half of 2012 and 2011 was \$9.6 million and \$2.1 million, respectively. During the first half of 2012, cash received from stock option exercises was \$20.8 million and the total net tax benefit to be realized for the tax deductions from these option exercises was \$3.2 million.

The following table represents non-vested RSUs, DSUs and PUs as of June 30, 2012, and the activity during the first half of 2012:

	RSUs and DSUs		PUs

The fair value of each option granted in the first half of 2012 and 2011, respectively, was determined on the date of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions:

	Twenty-Six Weeks Ended	
	June 30, 2012	June 25, 2011
Risk-free interest rate	1.56%	2.55%
Dividend yield	2.98%	2.52%

Weighted-average volatility	25.84%	26.37%
Expected term (years)	4.0-7.7	4.0-7.7
Weighted-average fair market value	\$8.18	\$9.66

Table of Contents

The risk-free interest rates utilized for periods throughout the contractual life of the options are based on a zero-coupon U.S. Treasury security yield at the time of grant. Expected volatility is based on historical volatility of our stock. The expected term of options is estimated based upon observations of historical employee option exercise patterns and trends. The range on the expected term results from separate groups of employees who exhibit different historical exercise behavior.

As of June 30, 2012, there were 8.0 million shares of our Class B common stock available for the issuance of stock options, SOSARs, RSUs, DSUs, PUs and performance share units under the Incentive Compensation Plan. This reflects the 5.0 million additional shares approved by our shareholders during the second quarter of 2012.

7. Special Items

We have incurred charges or recognized gains that we believe are not indicative of our normal, core operations. As such, we have separately classified these amounts as special operating items.

During the second quarters and first halves of 2012 and 2011, we recognized charges related to special termination (1) benefits as eligible employees elected early retirement offered as a result of the ratification of Collective Bargaining Agreements with MCC's brewery groups in 2011 and 2012.

During the second quarter of 2012, we recognized an asset abandonment charge related to the discontinuation of (2) primary packaging in the U.K. We determined that our Home Draft package was not meeting expectations driven by a lack of demand in the U.K. market and as a result, we recognized a loss related to the write-off of the Home Draft packaging line, tooling equipment and packaging materials inventory.

(3) See related detail in Note 12 "Goodwill and Intangible Assets."

In the second quarter and first half of 2012, we received insurance proceeds in excess of expenses incurred related (4) to the flood damages at our Toronto offices. During the second quarter and first half of 2011, we incurred expenses related to these damages, which were partially offset by insurance proceeds.

(5) During the second quarter of 2011, we recognized a gain resulting from a reduction of our guarantee of BRI debt obligations, which is discussed further in Note 16 "Commitments and Contingencies."

Table of Contents

- During the second quarter of 2011, we recognized a loss related to the correction of an immaterial error in prior periods to reduce Properties in the Canada segment, resulting from the performance of a fixed asset count. The impact of the error and the related correction in 2011 is not material to any prior annual or interim financial statements and is not material to the fiscal year results for 2011.
- During 2009, we established a non-income-related tax reserve of \$10.4 million that was recorded as a Special item. Our estimates indicated a range of possible loss relative to this reserve of zero to \$22.3 million, inclusive of potential penalties and interest. The amounts recorded in 2012 and 2011 represent a release of a portion of this reserve as a result of a change in estimate.

In connection with the Acquisition, we used the proceeds from our issuance of the \$1.9 billion senior notes to purchase Euros. As a result of a negative foreign exchange movement between the Euro and USD prior to using these proceeds to fund the Acquisition, we realized a foreign exchange loss on our Euro cash holdings.

During January 2011, we settled our remaining Foster's Group Limited's ("Fosters") total return swap and related financial instruments.

9. Discontinued Operations

In 2006, we sold our entire equity interest in our Brazilian unit, Cervejarias Kaiser Brasil S.A. ("Kaiser") to FEMSA Cerveza S.A. de C.V. ("FEMSA"). The terms of the sale agreement require us to indemnify FEMSA for exposures related to certain tax, civil and labor contingencies arising prior to FEMSA's purchase of Kaiser. In the second quarters of 2012 and 2011, we recognized a gain of \$2.3 million and a loss of \$1.5 million, respectively, from discontinued operations associated with a change in legal reserve, foreign exchange gains and losses related to indemnities we provided to FEMSA with regard to contingent tax and other liabilities. During the first half of 2012 and 2011, we recognized a gain of \$2.4 million and a loss of \$1.2 million, respectively. See further discussion in Note 16, "Commitments and Contingencies."

Table of Contents

As of June 30, 2012, and December 31, 2011, current liabilities of discontinued operations include current legal reserves of \$6.3 million and \$4.8 million, respectively. During the second quarter of 2012, we recognized a loss of \$1.5 million related to an increase in the legal reserve to the agreed upon settlement amount in the distributorship litigation. Subsequent to the end of the second quarter 2012, we finalized the settlement for the \$6.3 million accrued at June 30, 2012. See further discussion in Note 16, "Commitments and Contingencies."

10. Income Tax

Our effective tax rates for the second quarters of 2012 and 2011 were approximately 21% and 16%, respectively. For the first half of 2012 and 2011, our effective tax rates were approximately 20% and 16%, respectively. Our effective tax rate estimate for the full year is based on the preliminary purchase accounting for the Acquisition and may be adjusted as purchase accounting is finalized.

Our tax rate is volatile and may move up or down with changes in, among other things, the amount and source of income or loss, our ability to utilize foreign tax credits, changes in tax laws, and the movement of liabilities established for uncertain tax positions as statutes of limitations expire or positions are otherwise effectively settled. There are proposed or pending tax law changes in various jurisdictions that, if enacted, may have an impact on our effective tax rate.

As of December 31, 2011, we had Unrecognized tax benefits including interest, penalties and offsetting positions of \$77.4 million of which \$1.0 million was current and included in Accrued expenses and other liabilities and \$76.4 million is non-current. As of June 30, 2012, Unrecognized tax benefits increased by \$14.7 million from December 31, 2011. This addition is net of varying items including increases and decreases due to fluctuations in foreign exchange rates, additional uncertain tax benefits, including those from the Acquisition, interest accrued for the current year, certain tax positions closing or being effectively settled, and payments made to tax authorities with regard to uncertain tax benefits during the first half of 2012. This results in Unrecognized tax benefits including interest, penalties and offsetting positions of \$92.1 million as of June 30, 2012, of which \$3.0 million is current and included in Accrued expenses and other liabilities and \$89.1 million is non-current.

We file income tax returns in most of the federal, state, and provincial jurisdictions in the U.S., Canada, the U.K., and various countries in Central Europe. Tax years through 2006 are closed in the U.S., while exam years 2007 and 2008 have been effectively settled and only remain open pending finalization of an advanced pricing agreement. Tax years through fiscal year ended 2006 are closed or have been effectively settled through examination in Canada. Tax years through 2008 are closed or have been effectively settled through examination in the U.K. Tax years through fiscal year 2004 are closed for most countries in Central Europe jurisdictions with statutes of limitations varying from 3-7 years.

11. Earnings Per Share

Basic net income per share was computed using the weighted average number of shares of common stock outstanding during the period. Diluted net income per share includes the additional dilutive effect of our potentially dilutive securities, which include stock options, SOSARs, RSUs, PUs, and DSUs. The dilutive effects of our potentially dilutive securities are calculated using the treasury stock method. Diluted income per share could also be impacted by our convertible debt and related warrants outstanding if they were in the money. The following summarizes the effect of dilutive securities on diluted EPS:

Exercise prices exceed the average market price of the common shares or are anti-dilutive due to the impact of the (1) unrecognized compensation cost on the calculation of assumed proceeds in the application of the treasury stock method.

We issued \$575 million of senior convertible notes in June 2007. The impact of a net share settlement of the conversion amount at maturity will begin to dilute earnings per share if and when our stock price reaches \$52.57.

The impact of stock that could be issued to settle share obligations we could have under the warrants we issued (2) simultaneously with the senior convertible notes issuance will begin to dilute earnings per share when our stock price reaches \$67.30. The potential receipt of MCBC stock from counterparties under our purchased call options when and if our stock price is between \$52.57 and \$67.30 would be anti-dilutive and excluded from any calculations of earnings per share.

(3) Upon closing of the Acquisition in June 2012, we issued a €500 million Zero Coupon Senior Unsecured Convertible Note due 2013 to the Seller. The impact of a net share settlement of the conversion amount at maturity will begin to dilute earnings per share if and when our stock price reaches \$49.12 based on foreign exchange rates at June 30,

2012. See further discussion in Note 13, "Debt."

We have no outstanding equity share awards that contain non-forfeitable rights to dividends on unvested shares.

12. Goodwill and Intangible Assets

The following summarizes the change in goodwill for the second quarter of 2012 (in millions):

Balance at December 31, 2011	\$1,453.3
Business acquisition(1)	831.5
Impairment related to China reporting unit(2)	(9.5)
Foreign currency translation	12.3
Purchase price adjustment	0.4
Balance at June 30, 2012	\$2,288.0

(1) On June 15, 2012, we completed the Acquisition. See Note 3, "Acquisition of StarBev" for further discussion.

(2) See further discussion below.

Goodwill was attributed to our segments as follows:

	As of June 30, 2012 (In millions)	December 31, 2011
Canada	\$692.7	\$689.5
Central Europe(1)	833.4	—
United Kingdom	753.9	746.1
MCI	8.0	17.7
Consolidated	\$2,288.0	\$1,453.3

(1) We have initially attributed the preliminary goodwill arising from the Acquisition to our Central Europe segment.

This allocation is subject to change as we finalize purchase accounting, which we expect to occur during 2012.

The following table presents details of our intangible assets, other than goodwill, as of June 30, 2012:

Includes the preliminary fair values of \$135.6 million for brand intangibles with a 30 year useful life, \$2,377.5 million for brand intangibles with an indefinite-life and a preliminary fair value of a favorable supply contract and (1) other intangibles of \$12.0 million with a 2 year useful life as a result of the Acquisition. See Note 3, "Acquisition of StarBev" for total allocation of consideration. The following table presents details of our intangible assets, other than goodwill, as of December 31, 2011:

Total		\$5,028.7	\$(442.7)) \$4,586.0

The changes in the gross carrying amounts of intangibles from December 31, 2011, to June 30, 2012, are primarily due to the Acquisition. See Note 3, "Acquisition of StarBev" for further discussion. Changes are also driven by the impact of foreign exchange rates, as a significant amount of intangibles are denominated in foreign currencies.

Based on foreign exchange rates as of June 30, 2012, the following is our estimated amortization expense related to intangible assets for the next five years:

	Amount (In millions)
2012 - remaining	\$23.2
2013	\$46.4
2014	\$38.5
2015	\$36.0
2016	\$36.0

Amortization expense of intangible assets was \$9.3 million and \$10.5 million for the second quarter of 2012 and 2011, respectively, and \$18.6 million and \$20.3 million for the first half of 2012 and 2011, respectively.

We are required to perform goodwill and indefinite-lived intangible asset impairment tests on at least an annual basis and more frequently in certain circumstances. We performed the required annual impairment testing as of June 26, 2011, and determined that there were no impairments of goodwill or other indefinite-lived intangible assets. We are in process of performing our annual impairment testing as of July 1, 2012.

As of June 30, 2012, we had \$753.9 million of goodwill and \$315.9 million of indefinite-lived intangibles associated with our U.K. reporting unit and Carling brand, respectively, which originated from our acquisition of Coors Brewers Limited in 2002. Our annual impairment testing in 2011 revealed that the fair value of the U.K. reporting unit and the Carling brand was more than 25% and 175%, respectively, in excess of their carrying values. In recent quarters our U.K. business, along with other U.K. corporations across all industries, has been adversely impacted by the soft economy both in the U.K. and Europe. If this continues, a future impairment charge may be required.

Through our annual impairment testing in 2011, we determined that the fair value of our China reporting unit, included in MCI, was not significantly in excess of its carrying value. Since its inception, the performance of the Molson Coors Si'hai joint venture (which is included in our China reporting unit with our other operations in China) has not met our expectations due to delays in executing its business plans. As a result, the fair value of our China reporting unit only exceeded its carrying value by 4%. We have held ongoing negotiations with our joint venture partner intended to overcome these business difficulties and other issues affecting the joint venture. As part of the negotiations to resolve these issues with our partner, during the second quarter of 2012, we signed an agreement to acquire our partner's 49% noncontrolling interest in the joint venture. Since the execution of the agreement, there has been a lack of progress by our partner in timely satisfying the closing conditions, as well as delays and new obstacles in gaining government approval for the acquisition of the noncontrolling interest, including a court order in China which prevents our joint venture partner from transferring its equity interest to us. These developments, coupled with the impact of increased competitive pressures in China were the combined trigger to review the future cash flows for

the reporting unit. The subsequent testing identified that the full amount of the goodwill was impaired resulting in a charge of \$9.5 million in the second quarter of 2012. Additionally, in the second quarter of 2012, we recognized an impairment charge on the

Table of Contents

definite-lived brand and distribution rights intangible assets of \$0.9 million. Both of these charges are classified as Special items in our Condensed Consolidated Statements of Operations. In addition, as a result of the recent developments, we believe there is a substantial likelihood the closing conditions in the agreement with our joint venture partner will not be satisfied, which will result in the closing of the purchase of our joint venture partner's equity interest not occurring on the terms contemplated by the agreement previously signed, or at all. In that scenario, we will consider other alternatives, which may require us to record further costs and potential incremental asset impairment charges in the future related to our China reporting unit.

Regarding definite-lived intangibles, we continuously monitor the performance of the underlying asset for potential triggering events suggesting an impairment review should be performed. No such triggering events were identified in the second quarter of 2012, except as noted above related to our China reporting unit.

13. Debt

Long-term borrowings

Our total long-term borrowings as of June 30, 2012, and December 31, 2011, were composed of the following:

	As of June 30, 2012	December 31, 2011
	(In millions)	
Senior notes:

- (1) During the second quarter of 2012, we repaid the remaining outstanding portion of our \$850 million 6.375% 10-year notes that were due in May 2012.

- The original conversion price for each \$1,000 aggregate principal amount of notes was \$54.76 per share of our Class B common stock, which represented a 25% premium above the stock price on the day of issuance of the notes and corresponded to the initial conversion ratio of 18.263 shares per each \$1,000 aggregate principal amount of notes. The conversion ratio and conversion price are subject to adjustments for certain events and provisions, as defined in the indenture. As of March 2012, our conversion price and ratio are \$52.79 and 18.9441 shares, respectively. Currently, the convertible debt's if-converted value does not exceed the principal.

During the second quarters of 2012 and 2011, we incurred additional non-cash interest expense of \$4.5 million and \$4.4 million, respectively. For the first half of 2012 and 2011, the amounts were \$9.0 million and \$8.7 million, respectively. We also incurred interest expense related to the 2.5% convertible coupon rate of \$3.6 million during both the second quarters of 2012 and 2011. For the first half of 2012 and 2011, the interest expenses incurred were \$7.3 million and \$7.2 million, respectively. The combination of non-cash and cash interest resulted in an effective interest rate of 5.83% and 5.91% for the second quarters of 2012 and 2011, respectively. The effective interest rates for the

first half of 2012 and 2011 were 5.84% and 5.92%, respectively. In relation to this issuance, paid in capital in the equity section of our balance sheet includes \$103.9 million, (\$64.2 million net of tax), representing the equity component of the convertible debt. Further, as of June 30, 2012, and December 31, 2011, \$19.9 million and \$28.9 million, respectively, of the unamortized debt discount and other balance relates to our \$575 million convertible debt.

Table of Contents

We expect to record additional non-cash interest expense of approximately \$9 million in 2012 and \$11 million in 2013, thereby increasing the carrying value of the convertible debt to its \$575 million face value at maturity in July 2013.

(3) On June 15, 2012, we issued a €500 million Zero Coupon Senior Unsecured Convertible Note due 2013 (the "Convertible Note") to the Seller in conjunction with the closing of the Acquisition. The Convertible Note matures on December 31, 2013, and is a senior unsecured obligation guaranteed by MCBC. The Seller may exercise a put right with respect to the Convertible Note beginning on March 14, 2013, (the "First Redemption Date") and ending on December 19, 2013, for the greater of the principal amount of the Convertible Note or the aggregate cash value of 12,894,044 shares of our Class B Common Stock, as adjusted for certain corporate events. The Convertible Note's embedded conversion feature was determined to meet the definition of a derivative required to be bifurcated and separately accounted for at fair value with changes in fair value recorded in earnings. At issuance, we recorded a liability of €12.1 million (or \$15.2 million) related to the conversion feature. See Note 14, "Derivative Instruments and Hedging Activities" for further discussion of the derivative. The Convertible Note was issued at a discount of €1.0 million (or \$1.3 million) which will be recognized as interest expense over the period from issuance to the First Redemption Date.

The carrying value of the Convertible Note and fair value of the conversion feature at June 30, 2012, was \$632.2 million and \$20.8 million, respectively. As of June 30, 2012, we recognized an unrealized loss of \$5.6 million recorded in Interest expense related to changes in the fair value of the conversion feature, and \$0.1 million in non-cash interest expense related to amortization of the debt discount. The non-cash interest, excluding the change in fair value of the convertible feature, resulted in an effective interest rate of 0.25% for the second quarter and first half of 2012.

(4) On May 3, 2012, we issued \$1.9 billion of senior notes with portions maturing in 2017, 2022 and 2042. The 2017 senior notes were issued in an initial aggregate principal amount of \$300 million at 2.0% interest and will mature on May 1, 2017. The 2022 senior notes were issued in an initial aggregate principal amount of \$500 million at 3.5% interest and will mature on May 1, 2022. The 2042 senior notes were issued in an initial aggregate principal amount of \$1.1 billion at 5.0% interest and will mature on May 1, 2042. The issuance resulted in total proceeds to us, before expenses, of \$1,880.7 million, net of underwriting fees and discounts of \$14.7 million and \$4.6 million, respectively. Total debt issuance costs capitalized in connection with these senior notes, including the \$14.7 million of underwriting fees, are approximately \$18 million and will be amortized over the life of the notes. The issuance adds a number of guarantors to these debt securities as well as to our existing senior obligations, pursuant to requirements of our existing senior debt obligation agreements. These new guarantors consist principally of the U.K. operating entity. See Note 17, "Supplemental Guarantor Information" for further discussion and guarantor financial information reflective of this change.

Concurrent with the announcement of the Acquisition, we entered into a bridge loan agreement, which we terminated upon the issuance of the \$1.9 billion senior notes. In connection with the issuance and subsequent termination of the bridge loan, we incurred costs of \$13.0 million recorded in Other expense. See Note 8, "Other Income and Expense." Our risk management policy prohibits speculating on specific events, including the direction of interest rates. In advance of our issuance of the \$1.9 billion senior notes, we systematically removed a portion of our interest rate market risk by entering into standard pre-issuance U.S. Treasury interest rate hedges ("Treasury Locks"). This resulted in an increase in the certainty of our yield to maturity when issuing the notes. In the second quarter of 2012, we recognized a cash loss of \$39.2 million on settlement of the Treasury Locks recorded in Interest expense. See Note 14, "Derivative Instruments and Hedging Activities" for further discussion.

(5) On April 3, 2012, we entered into a term loan agreement (the "Term Loan Agreement") that provides for a 4-year term loan facility of \$300 million, composed of one \$150 million borrowing and one Euro-denominated borrowing equal to \$150 million at issuance (or €120 million borrowing) both of which were funded upon close of the Acquisition on June 15, 2012. The Term Loan Agreement requires quarterly principal repayments on each borrowing equal to 2.5% of the initial principal obligation, commencing on September 30, 2012, with the remaining 62.5% principal balance due at the June 15, 2016 maturity date. The obligations under the Term Loan Agreement are our general unsecured obligations. The Term Loan Agreement contains customary events of default, specified representations and warranties and covenants, including, among other things, covenants that limit

our and our subsidiaries' ability to incur certain additional priority indebtedness, create or permit liens on assets or engage in mergers or consolidations. Debt issuance costs capitalized in connection with the Term Loan Agreement will be amortized over the life of the debt and total approximately \$3 million.

Table of Contents

- (6) Other long-term debt includes secured bank loans assumed upon the Acquisition and included in the opening balance sheet. See Note 3, "Acquisition of StarBev" for further discussion.

On April 3, 2012, we also entered into a revolving credit agreement (the "Credit Agreement"). The Credit Agreement provides for a 4-year revolving credit facility of \$300 million that was subsequently amended to increase the borrowing limit to \$550 million. The Credit Agreement contains customary events of default and specified representations and warranties and covenants, including, among other things, covenants that limit our and our subsidiaries' ability to incur certain additional priority indebtedness, create or permit liens on assets, or engage in mergers or consolidations. Debt issuance costs capitalized in connection with the Credit Agreement will be amortized over the life of the facility and total approximately \$5 million. There were no outstanding borrowings on our \$550 million credit facility as of June 30, 2012. During the second quarter of 2011, we terminated our \$750 million revolving multicurrency bank credit facility, which was scheduled to expire in August 2011. Additionally, in connection with this termination, we entered into an agreement for a 4-year revolving multicurrency credit facility of \$400 million in the second quarter of 2011, which provides a \$100 million sub-facility available for the issuance of letters of credit. We incurred \$2.2 million of issuance costs and up-front fees related to this agreement, which are being amortized over the term of the facility. There were no outstanding borrowings on the \$400 million credit facility as of June 30, 2012.

- (8) In addition to the unamortized debt discount on the \$575 million convertible notes, we have unamortized debt discounts on the additional debt balances of \$7.6 million and \$1.9 million as of June 30, 2012, and December 31, 2011, respectively.

Short-term borrowings

Our short-term borrowings at June 30, 2012, and December 31, 2011, were \$119.4 million and \$2.2 million, respectively. MCCE has a notional cross-border, cross-currency cash pool for the majority of its subsidiaries. As of June 30, 2012, we had \$103.8 million in bank overdrafts and \$116.2 million in bank cash related to the pool for a net positive position of \$12.4 million.

We have short-term borrowings of \$9.3 million related to factoring arrangements at MCCE as of June 30, 2012. Our remaining short-term borrowings of \$6.3 million and \$2.2 million as of June 30, 2012, and December 31, 2011, respectively, relate to outstanding borrowings under the Japanese Yen line of credit.

Debt Fair Value Measurements

We utilize market approaches to estimate the fair value of certain outstanding borrowings by discounting anticipated future cash flows derived from the contractual terms of the obligations and observable market interest and foreign exchange rates. As of June 30, 2012, and December 31, 2011, the fair value of our outstanding long-term debt was \$5,052.6 million and \$2,133.6 million, respectively. Our \$575 million convertible notes and \$1.9 billion senior notes are valued based on quoted prices in active markets and would be classified as Level 1 in the fair value hierarchy. These notes had a combined fair value of \$2,602.1 million and \$608.5 million, as of June 30, 2012, and December 31, 2011, respectively. All other senior notes and the Convertible Note are valued based on significant observable inputs and would be classified as Level 2 in the fair value hierarchy. These instruments had a fair value of \$2,148.3 million and \$1,525.1 million, as of June 30, 2012, and December 31, 2011, respectively. See Note 14, "Derivative Instruments and Hedging Activities" for discussion regarding the fair value of the conversion feature related to the Convertible Note. The carrying values of all other outstanding long-term and borrowings approximate their fair values. The carrying values of all our outstanding short-term borrowings approximate their fair values.

Other

Under the terms of some of our debt facilities, we must comply with certain restrictions. These include restrictions on priority indebtedness (certain threshold percentages of secured consolidated net tangible assets), leverage thresholds, liens, and restrictions on certain types of sale lease-back transactions. As of June 30, 2012, we were in compliance with all of these restrictions.

Table of Contents

14. Derivative Instruments and Hedging Activities

Our risk management and derivative accounting policies are presented in Notes 1 and 18 of the Notes included in our Annual Report and did not significantly change during the first half of 2012.

Significant Derivative/Hedge Positions

Derivative Activity Related to the Acquisition

In May 2012, in connection with the Acquisition, we issued \$1.9 billion of senior notes with portions maturing in 2017, 2022 and 2042. Prior to the issuance of the notes, we systematically removed a portion of our interest rate market risk by entering into standard pre-issuance U.S. Treasury interest rate hedges ("Treasury Locks"). This resulted in an increase in the certainty of our yield to maturity when issuing the notes. Subsequent to entering into the hedges, market interest rates decreased, resulting in more favorable interest rates for the issued notes. Consequently, we recognized a cash loss of \$39.2 million on settlement of the Treasury Locks recorded in Interest expense. See Note 13, "Debt" for further discussion.

Additionally, in June 2012, we issued a Convertible Note to the Seller simultaneous with the closing of the Acquisition. The Seller may exercise a put right with respect to put the Convertible Note to us during the conversion period for the greater of the principal amount of the Convertible Note or the aggregate cash value of 12,894,044 shares of our Class B Common Stock, as adjusted for certain corporate events. The Convertible Note's embedded conversion feature was determined to meet the definition of a derivative required to be bifurcated and separately accounted for at fair value with changes in fair value recorded in earnings. At issuance, we recorded a liability of €12.1 million (or \$15.2 million) related to the conversion feature. See Note 13, "Debt" for further discussion.

Cross Currency Swaps

We historically designated the cross currency swap contracts as cash flow hedges of the variability of cash flows related to British Pound ("GBP") denominated principal and interest payments on intercompany notes of GBP 530 million. In September 2011, we cash settled approximately 25% of our GBP 530 million/\$774 million and CAD 1.2 billion/GBP 530 million cross currency swaps. As a result of the settlement, we extinguished \$98.7 million of the outstanding liability. Simultaneously with the settlement of the swaps, we paid down an equal portion of the outstanding principal of the intercompany notes in the amount of GBP 132 million.

In October 2011, we simultaneously extended both the terms of approximately half of the original intercompany notes and cross currency swaps, such that the new maturities are March 2014. The remaining approximate 25% was left unadjusted and continued to be due in May 2012. Following this extension, in November 2011, we dedesignated all of the remaining swaps as cash flow hedges and designated the aggregate swaps as a net investment hedge of our Canadian business.

In March 2012, we cash settled the remaining approximate 25% of our original cross currency swaps that was not refinanced in October 2011 as discussed above. As a result of the settlement, we extinguished \$110.6 million of the outstanding liability. Our outstanding cross currency swaps were in a net liability position of \$208.6 million classified as non-current at June 30, 2012.

Derivative Fair Value Measurements

We utilize market approaches to estimate the fair value of our derivative instruments by discounting anticipated future cash flows derived from the derivative's contractual terms and observable market interest, foreign exchange and commodity rates. The fair values of our derivatives also include credit risk adjustments to account for our counterparties' credit risk, as well as our own non-performance risk. As of June 30, 2012, and December 31, 2011, these adjustments resulted in deferred net gains in AOCI of \$1.3 million and \$1.1 million, respectively, as the fair value of our derivatives were in net liability positions at both period ends. The table below summarizes our derivative assets and liabilities that were measured at fair value as of June 30, 2012, and December 31, 2011.

The following tables present additional information about Level 3 assets and liabilities measured at fair value on a recurring basis for the quarter ended June 30, 2012. Both observable and unobservable inputs may be used to determine the fair value of positions that we have classified within the Level 3 category. As a result, the unrealized gains (losses) during the period for assets and liabilities within the Level 3 category presented in the tables below may include changes in fair value during the period that were attributable to both observable (e.g., changes in market interest rates) and unobservable (e.g., changes in unobservable long-dated volatilities) inputs.

The table below summarizes derivative valuation activity using significant unobservable inputs (Level 3) (in millions):

Unrealized gains or losses for Level 3 assets/liabilities outstanding at June 30, 2012(1)	\$(5.6)

At issuance, we recorded a liability of €12.1 million or (\$15.2 million) related to the Convertible Note's embedded (1)conversion feature. We recognized a \$5.6 million unrealized loss, recorded in Interest expense, related to changes in fair value of this conversion feature for the quarter ended June 30, 2012.

As of June 30, 2012, we had no significant transfers between Level 1 and 2. As of December 31, 2011, we did not hold derivatives classified as Level 3 due to valuations based upon significant unobservable inputs. We did not have

any significant transfers between Level 1 and Level 2 during fiscal year 2011. New derivative contracts transacted during fiscal year 2011 were

all included in Level 2.

Quantitative information regarding significant unobservable inputs used for recurring Level 3 fair value measurements of financial instruments carried at fair value, were as follows (in millions):

	Balance at June 30, 2012	Valuation Technique	Significant Unobservable Input(s)/Sensitivity of the Fair Value to Changes in the Unobservable Inputs	Range
Equity conversion feature of debt	\$(20.8)	Option model	Implied volatility(1)	24-25%
Sensitivity of the fair value to changes in the unobservable inputs				

(1) Significant increase (decrease) in the unobservable input in isolation would result in a significantly higher (lower) fair value measurement.

15. Pension and Other Postretirement Benefits

We sponsor defined benefit retirement plans in Canada, the U.K. and MCI. Additionally, we offer other postretirement benefits to the majority of our Canadian, U.S. and Central European employees. We recorded liabilities of \$2.7 million related to other postretirement benefits in connection with the Acquisition. We have not incurred material costs associated with these plans as of the end of the second quarter 2012, however, we expect to incur \$0.2 million during the remainder of 2012.

The net periodic pension costs under retirement plans and other postretirement benefits were as follows:

During the first half of 2012, employer contributions to the defined benefit plans for Canada and MCI were \$21.4 million and \$0.4 million, respectively. There were no contributions to the U.K. plan during the first half of 2012.

Expected total fiscal year 2012 employer contributions to the Canada, U.K. and MCI defined benefit plans are approximately \$60 million. MillerCoors, Brewers' Retail, Inc. ("BRI") and Brewers' Distributor Limited ("BDL") contributions to their defined benefit pension and other postretirement benefit plans are not included here, as they are not consolidated in our financial statements.

16. Commitments and Contingencies

Kaiser

As discussed in Note 9, "Discontinued Operations," we sold our entire equity interest in Kaiser during 2006 to FEMSA. The terms of the sale agreement require us to indemnify FEMSA for certain exposures related to tax, civil and labor contingencies arising prior to FEMSA's purchase of Kaiser. We provided an indemnity to FEMSA for losses Kaiser may incur with respect to tax claims associated with certain previously utilized purchased tax credits. The maximum potential claims amount remaining for the purchased tax credits was \$220.1 million as of June 30, 2012. As of June 30, 2012, our total estimate of the indemnity liability was \$20.0 million, \$8.0 million of which was classified as a current liability and \$12.0 million of which was classified as non-current.

Additionally, we provided FEMSA with indemnity related to all other tax, civil, and labor contingencies existing as of the date of sale. Our exposure related to these indemnity claims is capped at the amount of the sales price of the 68% equity interest of Kaiser, which was \$68.0 million. The recorded value of the tax, civil, and labor indemnity liability was \$8.4 million as of June 30, 2012, which is classified as non-current.

Future settlement procedures and related negotiation activities associated with these contingencies are largely outside of our control. The sale agreement requires annual cash settlements relating to the tax, civil, and labor indemnities. Indemnity obligations related to purchased tax credits must be settled upon notification of FEMSA's settlement. Due to the uncertainty involved with the ultimate outcome and timing of these contingencies, significant adjustments to the carrying values of the indemnity obligations have been recorded to date, and additional future adjustments may be required. These liabilities are denominated in Brazilian Reais and are therefore subject to foreign exchange gains or losses, which are recognized in the discontinued operations section of the statement of operations.

Guarantees

We guarantee indebtedness and other obligations to banks and other third parties for some of our equity method investments and consolidated subsidiaries. We guaranteed our respective share of the indebtedness of BRI related to its CAD 200 million debt which was settled at maturity on June 15, 2011, at which time we were released from our guarantee. The funding from this settlement was from a new short-term loan maturing in June 2012 for which we became a guarantor and a separate guarantee liability was recorded. Due to the structure of the new BRI debt agreement and related guarantees, our liability was reduced which resulted in a corresponding gain in Special items, net of \$2.0 million in the second quarter of 2011. In September 2011, we made a \$93.6 million capital contribution to BRI. BRI used these funds, along with the capital contributions received from its other shareholders, to repay its CAD 200 million debt. Accordingly, we were released from our guarantee of this debt resulting in the complete elimination of our guarantee liability.

Rocky Mountain Metal Container ("RMMC"), a Colorado limited liability company, is a joint venture with Ball Corporation in which MillerCoors holds and consolidates a 50% interest. RMMC produces cans and ends for MillerCoors. Prior to the formation of MillerCoors on July 1, 2008, we held the 50% interest in RMMC and consolidated the results and financial position of RMMC. As of December 25, 2010, we guaranteed \$29.6 million of RMMC debt. As of December 31, 2011, MillerCoors had refinanced \$16.0 million of this debt and, as a result of this refinancing, we were released from our guarantee of this debt. We continue to guarantee \$9.1 million of RMMC debt as of June 30, 2012.

Related to our previous ownership in the Montréal Canadiens we guarantee its obligations under a ground lease for the Bell Centre Arena (the "Ground Lease Guarantee"). Upon sale of our interest, the new owners agreed to indemnify us in connection with the liabilities we may incur under the Ground Lease Guarantee and provided us with a CAD 10 million letter of credit to guarantee such indemnity. This transaction did not materially affect our risk exposure related to the Ground Lease Guarantee, which continues to be recognized as a liability on our balance sheet.

Related to guarantees, Other liabilities in the accompanying Condensed Consolidated Balance Sheets include \$6.1 million as of June 30, 2012, which is non-current; and \$6.1 million as of December 31, 2011, which is non-current.

Litigation and Other Disputes and Environmental

Related to litigation, other disputes and environmental issues, we have accrued \$22.2 million as of June 30, 2012, and \$15.3 million as of December 31, 2011. We believe that any possible losses in excess of the amounts accrued are immaterial to our consolidated financial statements. As discussed below, subsequent to the end of the second quarter we settled our litigation related to a dispute with a former distributor in Brazil for \$6.3 million, which will result in a corresponding reduction in this liability in the third quarter of 2012.

In addition to the specific cases discussed below, we are involved in other disputes and legal actions arising in the ordinary course of our business. While it is not feasible to predict or determine the outcome of these proceedings, in our opinion, based on a review with legal counsel, none of these disputes and legal actions is expected to have a material impact on our consolidated financial position, results of operations or cash flows. However, litigation is subject to inherent uncertainties and an adverse result in these or other matters may arise from time to time that may harm our business.

While we cannot predict the eventual aggregate cost for environmental and related matters in which we are currently involved, we believe that any payments, if required, for these matters would be made over a period of time in amounts that would not be material in any one year to our results from operations, cash flows or our financial or competitive position. We believe adequate reserves have been provided for losses that are probable and estimable.

Litigation and Other Disputes

In 1999, Molson entered into an agreement for the distribution of Molson products in Brazil. In 2000, before commencing that business, Molson terminated the distribution agreement and paid the distributor \$150,000 in settlement. The distributor then sued Molson to set aside the settlement and to seek additional compensation. The Appellate Court of the State of Rio de Janeiro ("Appellate Court") set aside the settlement agreement and determined that Molson was liable to the distributor, with the amount of damages to be determined through subsequent proceedings. An appeal of the liability decision is currently pending before the Brazilian Superior Court of Justice, which allowed Molson's appeal during the fourth quarter of fiscal year 2009 and agreed to hear the merits of Molson's appeal. With respect to damages, the case was remanded to a Rio de Janeiro trial court to determine the amount of damages. The trial court retained an expert who provided a report adopting the position of the distributor and recommended damages based on a business plan that was never implemented. Molson challenged the irregularity of the expert process, the impartiality of the expert, as well as the report's specific recommendation. The trial court denied Molson's challenges. Molson filed an appeal before the Appellate Court regarding these procedural irregularities, which was denied during the fourth quarter of fiscal year 2009. Following the trial court's procedural ruling during the third quarter of 2009, that court handed down a decision in the distributor's favor granting the full amount of the lost anticipated profits alleged by the distributor, approximately \$42 million, plus attorney's fees and interest to accrue from the termination of the distribution agreement. Molson appealed the judgment to the Appellate Court. During the fourth quarter of 2009, the Appellate Court directed the court-retained expert to explain the basis for his damages calculation. During the first quarter of 2010, the Appellate Court granted Molson's appeal and vacated the \$42 million judgment. The Appellate Court remanded the proceeding to the trial court and ordered that court to select a different expert. The Appellate Court furthermore directed the trial court to use specific criteria in setting damages, the effect of which should be to substantially reduce the award. Molson sought clarification as to the precise criteria to be used. In late April 2010, the Appellate Court denied Molson's motion for clarification, but limited the accrual of interest in this matter. In mid October 2010, the Appellate Court denied the distributor's motion to set aside the vacation of the \$42 million judgment. In July 2011, the trial court selected a new expert to formulate a new calculation of damages. During the second quarter of 2012, we entered into settlement negotiations with the distributor and agreed in principle to settle this litigation for approximately \$6.3 million, including legal fees. Subsequent to the end of the second quarter 2012, we finalized the settlement for the \$6.3 million accrued at June 30, 2012.

Environmental

When we determine it is probable that a liability for environmental matters or other legal actions exists and the amount of the loss is reasonably estimable, an estimate of the future costs is recorded as a liability in the financial statements. Costs that extend the life, increase the capacity or improve the safety or efficiency of Company-owned assets or are incurred to mitigate or prevent future environmental contamination may be capitalized. Other environmental costs are expensed when incurred.

We have been notified that we are or may be a potentially responsible party ("PRP") under the Comprehensive Environmental Response, Compensation and Liability Act or similar state laws for the cleanup of sites where hazardous substances have allegedly been released into the environment. We cannot predict with certainty the total costs of cleanup, our share of the total cost, the extent to which contributions will be available from other parties, the amount of time necessary to complete the cleanups or insurance coverage.

Canada

Our Canada brewing operations are subject to provincial environmental regulations and local permit requirements. Our Montréal and Toronto breweries have water treatment facilities to pre-treat waste water before it goes to the respective local governmental facility for final treatment. We have environmental programs in Canada including organization, monitoring and verification, regulatory compliance, reporting, education and training, and corrective action.

We sold a chemical specialties business in 1996. The Company is still responsible for certain aspects of environmental remediation, undertaken or planned, at those chemical specialties business locations. We have established provisions for the costs of these remediation programs.

United States

Lowry

We are one of a number of entities named by the Environmental Protection Agency ("EPA") as a PRP at the Lowry Superfund site. This landfill is owned by the City and County of Denver ("Denver") and is managed by Waste Management of Colorado, Inc. ("Waste Management"). In 1990, we recorded a pretax charge of \$30 million, a portion of which was put into a trust in 1993 as part of a settlement with Denver and Waste Management regarding the then-outstanding litigation. Our settlement was based on an assumed remediation cost of \$120 million (in 1992 adjusted dollars). We are obligated to pay a portion of future costs, if any, in excess of that amount.

Table of Contents

Waste Management provides us with updated annual cost estimates through 2032. We review these cost estimates in the assessment of our accrual related to this issue. We use certain assumptions that differ from Waste Management's estimates to assess our expected liability. Our expected liability (based on the \$120 million threshold being met) is based on our best estimates available.

The assumptions used are as follows:

- trust management costs are included in projections with regard to the \$120 million threshold, but are expensed only as incurred;

- income taxes, which we believe are not an included cost, are excluded from projections with regard to the \$120 million threshold;

- a 2.5% inflation rate for future costs; and

- certain operations and maintenance costs were discounted using a 1.69% risk-free rate of return.

Based on these assumptions, the present value and gross amount of the costs at June 30, 2012, are approximately \$4.3 million and \$7.8 million, respectively. We did not assume any future recoveries from insurance companies in the estimate of our liability, and none are expected.

Considering the estimates extend through the year 2032 and the related uncertainties at the site, including what additional remedial actions may be required by the EPA, new technologies and what costs are included in the determination of when the \$120 million is reached, the estimate of our liability may change as further facts develop. We cannot predict the amount of any such change, but additional accruals in the future are possible.

Other

In October 2006, we were notified by the EPA that we are a PRP, along with approximately 60 other parties, at the Cooper Drum site in southern California. Certain former non-beer business operations, which we discontinued and sold in the mid-1990s, were involved at this site. We responded to the EPA with information regarding our past involvement with the site. Potential losses associated with the Cooper Drum site could increase as remediation planning progresses.

During the third quarter of 2008, we were notified by the EPA that we are a PRP, along with others, at the East Rutherford and Berry's Creek sites in New Jersey. Certain former non-beer business operations, which we discontinued and sold in the mid-1990s, were involved at this site. Potential losses associated with the Berry's Creek site could increase as remediation planning progresses.

We are aware of groundwater contamination at some of our properties in Colorado resulting from historical, ongoing, or nearby activities. There may also be other contamination of which we are currently unaware.

Central Europe

We are subject to the requirements of governmental and local environmental and occupational health and safety laws and regulations within each of the countries in which we operate. Compliance with these laws and regulations did not materially affect our second quarter of 2012 capital expenditures, results of operations or our financial or competitive position, and we do not anticipate that they will do so during the remainder of the year.

United Kingdom

We are subject to the requirements of government and local environmental and occupational health and safety laws and regulations. Compliance with these laws and regulations did not materially affect our second quarter of 2012 capital expenditures, results from operations or our financial or competitive position, and we do not anticipate that they will do so during the remainder of the year.

17. Supplemental Guarantor Information

For purposes of this Note 17, including the tables, "Parent Guarantor, 2007 and 2012 Issuer" shall mean MCBC. SEC Registered Securities

On June 15, 2007, MCBC issued \$575 million of 2.5% convertible senior notes due July 30, 2013, in a registered public offering (see Note 13, "Debt"). The convertible notes are guaranteed on a senior unsecured basis by the Subsidiary Guarantors. The guarantees are full and unconditional and joint and several.

Table of Contents

On May 3, 2012, MCBC issued \$1.9 billion of senior notes, in a registered public offering, consisting of \$300 million 2.0% senior notes due 2017, \$500 million 3.5% senior notes due 2022, and \$1.1 billion 5.0% senior notes due 2042. These senior notes are guaranteed on a senior unsecured basis by the previously reported Subsidiary Guarantors, and the addition of four new guarantors, specifically, Molson Coors Brewing Company (UK) Limited (our primary U.K. operating entity), Golden Acquisition, Molson Coors Holdings Limited, and Molson Coors HoldCo, Inc. The guarantees are full and unconditional and joint and several. The addition of these entities as guarantors of this debt also required the simultaneous addition of these entities as guarantors to our existing senior unsecured notes, pursuant to requirements of the respective debt agreements. This resulted in a change to the presentation of our guarantor financial statements to include the new guarantor entities as guarantors on all current and future filings, as well as on the historical presentation. See Note 13, "Debt" for further discussion of the senior notes issuance.

Other Debt

On September 22, 2005, MC Capital Finance ULC ("MC Capital Finance") issued \$1.1 billion of senior notes consisting of \$300 million 4.85% U.S. publicly registered notes due 2010 and CAD 900 million 5.0% privately placed notes maturing on September 22, 2015. These CAD 900 million senior notes were subsequently exchanged for substantially identical CAD 900 million senior notes which were quantified by way of a prospectus in Canada. In connection with an internal corporate reorganization, Molson Coors International LP ("MCI LP") was subsequently added as a co-issuer of the CAD 900 million senior notes in 2007. During the third quarter of 2010, the \$300 million 4.85% notes were repaid in full. Following the repayment of our \$300 million senior notes in 2010 we were no longer required to present the "2005 and 2010 Issuer" column (historically consisting of MC Capital Finance and MCI LP) and as such have removed that column. Additionally, the continuous disclosure requirements applicable to MC Capital Finance in Canada are satisfied through the consolidating financial information in respect of MC Capital Finance, MCI LP and other subsidiary guarantors of the CAD 900 million senior notes as currently presented. Therefore, the results of MC Capital Finance and MCI LP are now included in the Subsidiary Guarantors column.

On October 6, 2010, MCI LP completed a private placement in Canada of CAD 500 million 3.95% fixed rate Series A Notes due 2017. These notes are not publicly registered in the U.S. nor in Canada.

Both the 2005 CAD 900 million senior notes and the 2010 CAD 500 million are guaranteed on a senior and unsecured basis by MCBC and the Subsidiary Guarantors. The guarantees are full and unconditional and joint and several. Funds necessary to meet the debt service obligations of MCI LP and MC Capital Finance are provided in large part by distributions or advances from MCBC's other subsidiaries. Under certain circumstances, contractual and legal restrictions, as well as our financial condition and operating requirements, could limit the ability of MCI LP and MC Capital Finance to obtain cash for the purpose of meeting its debt service obligation, including the payment of principal and interest on the notes.

There were no outstanding borrowings on our 4-year revolving \$400 million credit facility as of June 30, 2012, and December 31, 2011, which was issued in the second quarter of 2011.

On April 3, 2012, MCBC entered into a \$300 million term loan agreement, consisting of two tranches, of \$150 million and the Euro equivalent of \$150 million (or €120 million) both of which were funded upon close of the Acquisition on June 15, 2012. Additionally, we entered into a 4-year revolving \$300 million credit facility that was subsequently amended to increase the borrowing limit to \$550 million. There were no outstanding borrowings on our \$550 million credit facility as of June 30, 2012. These loan facilities are not publicly registered in the U.S. nor in Canada. See Note 13, "Debt" for further discussion related to these agreements.

On June 15, 2012, we issued a €500 million Zero Coupon Senior Unsecured Convertible Note due 2013 (the "Convertible Note") to the Seller in conjunction with the closing of the Acquisition. The Convertible Note matures on December 31, 2013 and is a senior unsecured obligation guaranteed by MCBC. See Note 13, "Debt" for further discussion related to the Convertible Note issuance.

Presentation

On May 7, 2002, CBC completed a public offering of \$850 million principal amount of 6.375% 10-year senior notes due 2012, which were repaid in full during the second quarter of 2012. Following the repayment, we are no longer required to present the "2002 Issuer" column (historically representing CBC) and as such have removed the column from the current and historical guarantor financial statements. CBC remains a guarantor of our existing senior

unsecured notes, as such, the results of CBC are now included in the Subsidiary Guarantors column.

In connection with our adoption in the first quarter of 2012 of new authoritative guidance related to the presentation of other comprehensive income as a component of the consolidating guarantor statement of operations, during the second quarter of 2012 we identified an adjustment to the calculation of Other comprehensive income, as a component of Comprehensive

income attributable to MCBC, as previously disclosed within the first quarter 2012 condensed consolidating guarantor statements of operations ("GSOs"). These corrections are reflected in the GSOs for the twenty-six weeks ended June 30, 2012 and June 25, 2011, respectively. The impact of these changes to the Comprehensive income attributable to MCBC as presented below is limited to the Other comprehensive income component of Comprehensive income. Additionally, the corrections did not have an impact on the historical condensed consolidating guarantor balance sheets or statements of cash flows.

Amounts as previously reported within the first quarter 2012 recast GSOs to include Molson Coors Brewing Company (UK) Limited (our primary U.K. operating entity), Golden Acquisition, and Molson Coors Holdings Limited as subsidiary guarantors. Additionally, the corrections to amounts previously reported for the 2002 Issuer are now reflected under the current structure within the subsidiary guarantor activity.

During the third quarter of 2011, we identified necessary changes to our historical treatment of intercompany distributions within the guarantor financial statements. These distributions represented a return of capital and therefore should not have been reflected in our consolidating statements of operations. While consolidated totals were not impacted, the amounts presented in our historical GSOs have been retrospectively adjusted to correct the presentation to allow for comparative information within the GSOs as indicated in the tables below. All adjustments to amounts previously reported for the 2002 Issuer or 2005 and 2010 Issuers are now reflected under the current structure within the subsidiary guarantor activity. Additionally, during the first quarter of 2012, we identified necessary changes to our historical guarantor financial statements related to intercompany transactions.

The following information sets forth the Condensed Consolidating Statements of Operations for the 13 and 26 weeks ended June 30, 2012, and June 25, 2011, Condensed Consolidating Balance Sheets as of June 30, 2012, and December 31, 2011, and Condensed Consolidating Statements of Cash Flows for the 26 weeks ended June 30, 2012, and June 25, 2011. Investments in subsidiaries are accounted for on the equity method; accordingly, entries necessary to consolidate the Parent Guarantor, each of the issuers and all of our guarantor and non-guarantor subsidiaries are reflected in the eliminations column. In the opinion of management, separate complete financial statements of MCBC and the Subsidiary Guarantors would not provide additional material information that would be useful in assessing their financial composition.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is provided as a supplement to, and should be read in conjunction with, our audited consolidated financial statements, the accompanying notes, and the MD&A included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2011 ("Annual Report"), as well as our unaudited condensed consolidated financial statements and the accompanying notes included in this Form 10-Q. Due to the seasonality of our operating results, quarterly financial results are not an appropriate basis from which to project annual results.

Unless otherwise noted in this report, any description of "we", "us" or "our" includes Molson Coors Brewing Company ("MCBC" or the "Company"), principally a holding company, and its subsidiaries. On June 15, 2012, we completed our acquisition (the "Acquisition") of StarBev Holdings S.à r.l. ("StarBev"), which we have renamed Molson Coors Central Europe ("MCCE"), operating in Central Europe (which includes Czech Republic, Serbia, Croatia, Romania, Bulgaria, Hungary, Montenegro, Bosnia-Herzegovina and Slovakia). Our other subsidiaries include: Molson Coors Canada ("MCC"), operating in Canada; MillerCoors LLC ("MillerCoors"), which is accounted for by us under the equity method of accounting, operating in the United States ("U.S."); Molson Coors Brewing Company (UK) Limited ("MCBC-UK"), operating in the United Kingdom ("U.K.") and the Republic of Ireland; Molson Coors International ("MCI"), operating in various other countries; and our other non-operating subsidiaries. Unless otherwise indicated, (a) all \$ amounts are in U.S. Dollars ("USD"), (b) comparisons are to comparable prior periods, and (c) the second quarter of 2012 refers to the 13 weeks ended June 30, 2012, the second quarter of 2011 refers to the 13 weeks ended June 25, 2011, and (d) first half of 2012 refers to the 26 weeks ended June 30, 2012, first half of 2011 refers to the 26 weeks ended June 25, 2011.

MillerCoors and MCCE follow a monthly reporting calendar. The second quarter and first half of 2012 and 2011 refer to the three and six months ended June 30, 2012 and June 30, 2011, respectively, except for MCCE where the second quarter and first half of 2012 refer to the two week period from the Acquisition date of June 15, 2012 through June 30, 2012.

In addition to financial measures presented on the basis of accounting principles generally accepted in the United States of America ("U.S. GAAP"), we also present pretax and after-tax "underlying income", "underlying income per diluted share", "underlying effective tax rate", "underlying free cash flow" and "proportionate consolidation of 42% of MillerCoors results", which are non-GAAP measures and should be viewed as supplements to—not substitutes for—our results of operations presented under U.S. GAAP. Our management uses underlying income, underlying income per diluted share, underlying effective tax rate, underlying free cash flow and proportionate consolidation of 42% of MillerCoors results as measures of operating performance to assist in comparing performance from period to period on a consistent basis; as a measure for planning and forecasting overall expectations and for evaluating actual results against such expectations; and in communications with the board of directors, stockholders, analysts and investors concerning our financial performance. We believe that underlying income, underlying income per diluted share, underlying tax rate and underlying free cash flow performance are used by and are useful to investors and other users of our financial statements in evaluating our operating performance because they provide an additional tool to evaluate our performance without regard to special and non-core items, which can vary substantially from company to company depending upon accounting methods and book value of assets and capital structure. Additionally, the proportionate consolidation of 42% of MillerCoors results is used by management and we believe it is useful to investors as it provides a view of key metrics such as net sales, gross profit margin and operating margin as if our U.S. results were consolidated, rather than reported as equity income. We have provided reconciliations of all non-GAAP measures to their nearest U.S. GAAP measure.

Business Overview

Acquisition of StarBev

On June 15, 2012, we completed the Acquisition of StarBev from StarBev L.P. (the "Seller") for €2.7 billion (or \$3.4 billion), including the assumption and payoff of existing StarBev indebtedness. Headquartered in Amsterdam and Prague, StarBev is one of the largest brewers in Central Europe. StarBev, which we renamed Molson Coors Central

Europe ("MCCE"), operates nine breweries in Czech Republic, Serbia, Croatia, Romania, Bulgaria, Hungary and Montenegro and sold approximately 13.3 million hectoliters of beer in 2011. It also sells its brands in Bosnia-Herzegovina and Slovakia. In 2011, StarBev held a top-three market share position in each of its markets, and its brand portfolio includes local champions such as Staropramen, Borsodi, Kamenitza, Bergenbier, Ozujsko, Jelen, and Niksicko, and also brews and distributes other brands under license. Staropramen is distributed and sold in over 30 countries. The operating results of MCCE are reported in our new Central Europe operating segment.

Table of Contents

The Acquisition fits squarely into our strategy to increase our portfolio of premium brands and deepen our reach into growth markets around the world. We believe the Central European beer market is attractive, with strong historical trends and upside potential as the region returns to its pre-economic-crisis growth rates. We believe MCCE, as a market leader in the Central European region, will provide us with a platform for growth and an excellent foundation from which to extend our key brands, such as Carling, into Central Europe. We believe that Staropramen, MCCE's international flagship brand, will also enhance our portfolio in some of our current and planned markets.

Second Quarter 2012 Financial Highlights:

Net income from continuing operations attributable to MCBC of \$104.3 million, or \$0.57 per diluted share, decreased 53.5% from a year ago primarily due to financing and acquisition-related costs, unfavorable foreign exchange, input inflation, higher special charges and higher pension costs in Canada and the U.K., partially offset by including the results of our new Central Europe segment and higher equity income in the U.S. Underlying after-tax income of \$250.1 million, or \$1.38 per diluted share, increased 8.0%, driven by including the results of our new Central Europe segment, positive beer pricing and sales mix in the U.S. and Canada, partially offset by lower underlying earnings in the U.K. and MCI and unfavorable foreign exchange. Our second quarter underlying income excludes some special and other non-core gains, losses and expenses that net to a \$178.9 million pretax charge.

Regional highlights include:

In our Canada segment, income from continuing operations before income taxes and underlying pretax income increased 6.1% to \$139.9 million while underlying pretax income decreased 0.6% to \$139.0 million, driven by unfavorable foreign currency movements, increased marketing and sales investments and cycling lower employee incentive costs in 2011, largely offset by higher volume, positive net pricing, cost reductions, and income from the addition of the contract brewing sales to North American Breweries ("NAB").

In our U.S. segment, equity income in MillerCoors and underlying equity income in MillerCoors increased 8.0% to \$185.6 million and 7.2% to \$184.6 million, respectively, driven by positive pricing, favorable brand mix and cost management.

Our newly formed Central Europe segment reported income from continuing operations before income taxes of \$12.4 million, and underlying pretax income of \$19.7 million from the Acquisition date of June 15, 2012 through June 30, 2012.

In our U.K. segment, income from continuing operations before income taxes decreased \$16.0 million to \$16.3 million. Underlying pretax income of \$28.0 million represents a decrease of \$6.7 million, primarily due to lower volume, higher pension expense and higher marketing investment, partially offset by lower overhead costs.

In our MCI segment, loss from continuing operations before income taxes increased \$13.7 million to \$24.3 million while underlying pretax loss increased by \$3.3 million to \$13.4 million, due to the addition of costs related to the Molson Coors Cobra India joint venture and infrastructure investments and the effect of asset-value and cost adjustments in our Molson Coors Si'hai joint venture, partially offset by higher volumes.

See "Results of Operations" below for further analysis of our reportable segment results.

Table of Contents

- See "Results of Operations", "United States Segment" under the sub-heading "Special Items" for additional information. The tax effect related to our share of MillerCoors special items was zero for the 13 and 26 weeks ended June 30, 2012, and zero for the 13 and 26 weeks ended June 25, 2011. The effect of taxes on the adjustments used to arrive at underlying income, a non-GAAP measure, is calculated based on the statutory tax rate applicable to the item being adjusted for the jurisdiction from which each adjustment arises.
- (2) On June 15, 2012, we completed the Acquisition. Related to this transaction, we recognized acquisition-related charges, primarily consulting and legal fees.
- Concurrent with the announcement of the Acquisition, we entered into a bridge loan agreement, which we terminated upon the closing of our issuance of the \$1.9 billion senior notes. In connection with the issuance and subsequent termination of the bridge loan, we incurred debt fees of \$13.0 million recorded as Other expense. Additionally, in advance of our issuance of the \$1.9 billion senior notes, we systematically removed a portion of our interest rate market risk by entering into standard pre-issuance U.S. Treasury interest rate hedges ("Treasury Locks"). This resulted in an increase in the certainty of our yield to maturity when issuing the notes. In the second quarter of 2012, we recognized a cash loss of \$39.2 million on settlement of the Treasury Locks recorded as interest expense. Finally, we recognized \$10.7 million of interest expense on our \$1.9 billion senior notes prior to the closing of the Acquisition. See Part I—Item 1. Financial Statements, Note 8 "Other Income and Expense" and Note 13 "Debt" of the unaudited condensed consolidated financial statements for additional information.
- (4) As part of the allocation of the consideration transferred for the Acquisition, MCCE's inventory value was increased to fair value in accordance with U.S. GAAP. This resulted in a significant decline in MCCE's gross profit after the Acquisition date of June 15, 2012. All of this inventory was subsequently sold by MCCE in the second quarter of 2012.
- In connection with the Acquisition, we used the proceeds from our issuance of the \$1.9 billion senior notes to purchase Euros. As a result of a negative foreign exchange movement between the Euro and USD prior to using these proceeds to fund the Acquisition, we realized a foreign exchange loss on our Euro cash holdings. See Part I—Item 1. Financial Statements, Note 8 "Other Income and Expense" of the unaudited condensed consolidated financial statements for additional information.
- (6) We issued a €500 million Zero Coupon Senior Unsecured Convertible Note ("Convertible Note") to the Seller in conjunction with the closing of the Acquisition. The Convertible Note's embedded conversion feature was determined to meet the definition of a derivative required to be bifurcated and separately accounted for at fair value with changes in fair value recorded in earnings. In the second quarter, we recognized an unrealized loss of \$5.6 million recorded in interest expense related to changes in the fair value of the conversion feature. See Part I—Item 1. Financial Statements, Note 13 "Debt" and Note 14 "Derivative Instruments and Hedging Activities" of the unaudited condensed consolidated financial statements for additional information.
- (7) We recognized a foreign exchange gain related to financing instruments entered into in conjunction with the closing of the Acquisition. This gain consists of a \$3.8 million gain in Central Europe related to unrealized foreign currency movements and a \$3.2 million loss in Corporate related to foreign exchange movements on our newly issued Euro-denominated Convertible Note and €120 million Term Loan. See Part I—Item 1. Financial Statements, Note 13 "Debt" of the unaudited condensed consolidated financial statements for additional information.
- (8) The unrealized gain related to changes in fair value on aluminum and diesel swaps are recorded in cost of goods sold within our Corporate business activities. As the exposure we are managing is realized, we reclassify the gain or loss to the operating segment, allowing our operating segments to realize the economic effects of the derivative without the resulting unrealized mark-to-market volatility. Unlike the majority of our derivative contracts, these swaps are not designated in a hedge accounting relationship.
- (9) We recognized costs in connection with us entering into an agreement to acquire the Molson Coors Si'hai joint venture's 49% noncontrolling interest.
- (10) Under governmental pension arrangements in the U.K., we received tax rebates from 2003 to 2009. Following the identification that some of these rebates for which we previously recognized expense were not related to former employees, we recognized an adjustment. This has resulted in a benefit to employee related expenses of \$0.3 million in cost of goods sold and \$0.4 million in marketing, general and administrative expenses.
- (11)

- (13) See Part I—Item 1. Financial Statements, Note 16 "Commitments and Contingencies" of the unaudited condensed consolidated financial statements under the sub-heading "Environmental" for additional information.

The effect of noncontrolling interest on the adjustments used to arrive at underlying income, a non-GAAP measure, is calculated based on our ownership percentage of our subsidiaries from which each adjustment arises.

- (14) This adjustment relates primarily to the goodwill impairment charge in our Molson Coors Si'hai joint venture. See Part I—Item 1. Financial Statements, Note 12 "Goodwill and Intangible Assets" of the unaudited condensed consolidated financial statements for additional information.

The effect of taxes on the adjustments used to arrive at underlying income, a non-GAAP measure, is calculated

- (15) based on the statutory tax rate applicable to the item being adjusted for the jurisdiction from which each adjustment arises.

The following tables summarize a non-GAAP view of summarized components of our condensed consolidated summary of operations for the 13 weeks ended June 30, 2012, and June 25, 2011, as if 42% of MillerCoors results were proportionately consolidated. This table does not eliminate the sales between MCBC and MillerCoors, which are discussed in Part I—Item 1. Financial Statements, Note 5 "Investments" of the unaudited condensed consolidated financial statements.

Second Quarter 2012 U.S. GAAP Financial Summary

Total company net sales increased 7.0% in the second quarter of 2012, driven by including the results of our new Central Europe segment. Net sales per hectoliter decreased 8.4% in the second quarter of 2012, driven by foreign currency movements partially offset by positive pricing in Canada, the addition of contract brewing sales to NAB in Canada, and the positive impact of increased sales of factored brands in the U.K. Cost of goods sold per hectoliter decreased 5.2% in the second quarter of 2012, due to foreign currency movements, partially offset by input cost inflation, higher pension expense, the addition of contract brewing sales to NAB in Canada and the impact of increased sales of factored brands in the U.K. Total company gross profit margin was 42.0%, 1.9 percentage points lower than a year ago, primarily due to increased pension expense and input inflation in the U.K. and Canada. Consolidated operating margin decreased 4.0 percentage points to 27.9%, driven by the same gross profit margin factors, as well as higher special charges and increased marketing investments in Canada, U.K. and MCI. Marketing, general and administrative expense increased 11.9% due to acquisition-related costs, including the results of our new Central Europe segment, and increased marketing investments in Canada, U.K. and MCI.

Second Quarter 2012 Non-GAAP Financial Summary

Including 42% of MillerCoors with our consolidated results, total company net sales increased 5.7% in the second quarter of 2012, driven by including the results of our new Central Europe segment, the U.S., Canada and MCI. Net sales per hectoliter decreased 0.8% in the second quarter of 2012, primarily due to the addition of including Central Europe net sales at a lower net sales per hectoliter and foreign currency movements partially offset by positive pricing in Canada and the U.S. and the addition of contract brewing sales in NAB. Cost of goods sold per hectoliter increased 0.4% due to input cost inflation, higher pension expense and the addition of contract brewing sales to NAB in Canada. Total company gross profit margin was 41.5%, 70 basis points lower than a year ago, primarily due to the U.K. and MCI performance. Marketing, general and administrative expense increased 8.2% due to including the results of our new Central Europe segment, higher pension costs, increased brand investments in Canada and MCI, and cycling one-time costs in Canada. Underlying operating margin was 17.2%, up from 16.9% a year ago due to margin growth in the U.S. and including the results of our new Central Europe segment.

Worldwide beer volume

Worldwide beer volume is composed of our financial volume, royalty volume and proportionate share of equity investment sales-to-retail. Financial volume represents owned beer brands sold to unrelated external customers within our geographical markets net of returns and allowances. Royalty beer volume consists of product produced and sold

by third parties under various license and contract-brewing agreements. Equity investment sales-to-retail brand volume represents our ownership percentage share of volume in our subsidiaries accounted for under the equity method, including MillerCoors and Modelo Molson Imports, L.P. ("MMI"), our joint venture in Canada with Grupo Modelo S.A.B. de C.V. ("Modelo").

Table of Contents

The following table highlights summarized components of our sales volume for the 13 and 26 weeks ended June 30, 2012, and June 25, 2011.

(1) Includes our Central Europe segment volume in Russia and Ukraine, U.K. segment volume in Ireland and our MCI segment volume in Mexico, Ukraine, Spain, Russia, Vietnam and Philippines.

(2) Reflects the addition of our proportionate share of equity method investments sales-to-retail for the periods presented.

Worldwide beer volume for MCBC increased 6.4% and 3.5% in the second quarter and first half of 2012, respectively, primarily due to including the results of our new Central Europe segment and higher volumes in Canada and MCI. Excluding our Central Europe results, our worldwide beer volume for MCBC declined 1.0% and 0.7% in the second quarter and first half of 2012, respectively, driven by lower volumes in the U.K and U.S., partially offset by higher volumes in Canada and MCI.

Synergies and other cost savings initiatives

We achieved approximately \$14 million, \$24 million and \$150 million of cost savings in the second quarter of 2012, the first half of 2012 and program to date, respectively. As a result, we have met our second Resources for Growth, or RFG2, program's three-year goal of \$150 million of annualized cost reductions six months earlier than expected. We anticipate delivering additional cost savings in the balance of 2012, which will allow us to surpass our three-year goal at the end of the year.

In addition to our RFG2 savings, MillerCoors delivered incremental cost savings of \$32 million and \$57 million in the second quarter of 2012 and first half of 2012, respectively. We benefit from 42% of the MillerCoors cost savings.

Income taxes

Our effective tax rate and underlying effective tax rate for the second quarter of 2012 were approximately 21% and 18%, respectively, compared to approximately 16% and 17%, respectively, for the second quarter of 2011. Our effective tax rate and underlying effective tax rate for the first half of 2012 were approximately 20% and 18%, respectively, compared to approximately 16% and 17%, respectively, for the first half of 2011.

Discontinued operations

Discontinued operations are primarily associated with the formerly-owned Cervejarias Kaiser Brasil S.A. ("Kaiser") business in Brazil. See Part I—Item 1. Financial Statements, Note 9 "Discontinued Operations" and Note 16 "Commitments and Contingencies" to the unaudited condensed consolidated financial statements for discussions of the nature of amounts recognized in the Discontinued Operations section of the condensed consolidated statements of operations, which consists primarily of amounts associated with indemnity obligations to FEMSA Cerveza S.A. de C.V. ("FEMSA") related to purchased tax credits and other tax, civil and labor issues.

We recognized a gain of \$2.3 million and a loss of \$1.5 million in the second quarters of 2012 and 2011, respectively, and a gain of \$2.4 million and a loss of \$1.2 million in the first halves of 2012 and 2011, respectively, associated with adjustments to the indemnity liabilities due to foreign exchange gains and losses.

Additionally, during the second quarter of 2012, we recognized a loss of \$1.5 million related to an increase in the legal reserve to the agreed upon settlement amount in the distributorship litigation, which we finalized subsequent to the second quarter of 2012. See Part I—Item 1. Financial Statements, Note 16 "Commitments and Contingencies" to the unaudited condensed consolidated financial statements for further discussion.

Canada Segment

Our Canada segment consists primarily of our beer business in Canada, including the production and sale of the Molson brands, Coors Light, and other licensed brands in Canada. The Canada segment also includes MMI, established to import, distribute, and market the Modelo beer brand portfolio across all Canadian provinces and territories. MMI is accounted for under the equity method. In addition, the Canada segment includes our arrangements related to the distribution of beer in Ontario, Brewers' Retail, Inc. ("BRI") and, in Western Canada, Brewers' Distributor Ltd. ("BDL"). Both BRI and BDL are accounted for under the equity method.

Foreign currency impact on results

During the second quarter of 2012, the Canadian Dollar ("CAD") depreciated 4.4% versus the USD, resulting in an approximate \$7 million negative impact to USD income from continuing operations before income taxes and USD underlying pretax income. The CAD depreciated 3.7% versus the USD in the first half of 2012, resulting in an approximate \$9 million negative impact to USD income from continuing operations before income taxes and USD underlying pretax income.

Assets and liabilities recorded in foreign currencies that are the functional currencies for the respective operations are translated at the prevailing exchange rate at the balance sheet date. Revenue and expenses are translated at the average exchange rates during the period. Translation adjustments resulting from this process are reported as a separate component of other comprehensive income. Gains and losses from foreign currency transactions are included in earnings for the period.

Volume and net sales

Our second quarter and first half of 2012 Canada sales-to-retail ("STRs") increased 1.8% and 0.8%, respectively, due to the change in timing of the Canada Day holiday within our fiscal calendar. Our market share declined approximately a half-share point and a full share point in the second quarter and first half of 2012, respectively. The Canadian beer industry volume increased approximately 3% in the second quarter and first half of 2012.

Our Canada sales volume was 2.411 million hectoliters in the second quarter of 2012, up 1.8%, driven by the increase in STRs. During the first half of 2012, Canada sales volume was 4.097 million hectoliters, up 0.4%, due to a reduction in import brand inventories in the first quarter of 2012 compared to the first quarter of 2011.

Net sales per hectoliter increased 5.8% in local currency in the second quarter of 2012, driven by positive pricing and the addition of contract brewing sales to NAB. In the first half of 2012, net sales per hectoliter increased 5.6% in local currency, due to positive pricing and the addition of contract brewing sales to NAB, partially offset by negative sales mix.

Cost of goods sold

Cost of goods sold per hectoliter increased 6.2% and 8.1% in local currency in the second quarter and first half of 2012, respectively, due to the cost of brewing beer under our NAB contract, input inflation, higher pension costs and a mix shift toward higher-cost products, partially offset by cost reductions.

Marketing, general and administrative expenses

Marketing, general & administrative expense in the second quarter and first half of 2012 increased 12.9% and 7.7%, respectively, in local currency, driven by higher marketing and sales investments and cycling lower employee incentive costs in 2011.

Special items, net

During the first half of 2012, we recognized restructuring charges of \$1.6 million. Also, during the second quarter and first half of 2012, we recognized special termination charges of \$1.4 million and \$1.9 million, respectively.

Additionally, during the second quarter of 2012, we recognized a \$2.3 million benefit related to the receipt of insurance proceeds in excess of expenses incurred related to flood damages at our Toronto offices. During the second quarter of 2011, we recognized a \$7.6 million loss related to the correction of an immaterial error to adjust fixed assets resulting from the performance of a fixed asset count. Also, we recognized a \$2.0 million gain in the second quarter of 2011 resulting from a reduction of our guarantee of BRI's debt obligations. Additionally, we recognized special termination charges of \$1.2 million and \$4.0 million, respectively, during the second quarter and first half of 2011.

Finally, during the second quarter of 2011, we recognized restructuring charges of \$0.6 million and we recognized a \$0.7 million charge related to flood damages in our Toronto offices. See Part I—Item 1. Financial Statements, Note 7 "Special Items" to the unaudited condensed consolidated financial statements for further discussion.

Other income (expense), net

Other expense decreased \$2.3 million and \$3.2 million in the second quarter and first half of 2012, respectively, due to foreign currency movements.

Volume and net sales

Adjusted for trading days, MillerCoors domestic STRs for the second quarter and first half of 2012 declined 1.4% and 1.5%, respectively. Unadjusted STRs for the second quarter and first half of 2012 declined 1.4% and 0.8%, respectively. The premium segment declined slightly while the above premium segment continued its strong growth. Domestic sales-to-wholesalers for the second quarter of 2012 increased 0.3% and domestic sales-to-wholesalers in the first half of 2012 declined 0.3%. Total sales volume increased 0.9% in the second quarter of 2012, due to the domestic sales-to-wholesalers performance and increased contract brewing volume. Total sales volume increased 0.4% in the first half of 2012, due to increased contract brewing volume partially offset by the decline in domestic sales-to-wholesalers.

Domestic net sales per hectoliter increased 3.6% and 3.8% for the second quarter and first half of 2012, respectively, driven by positive pricing and sales mix. Total net sales per hectoliter, including contract brewing and company-owned distributor sales, increased 3.4% and 3.6% for the second quarter and first half of 2012, respectively.

Cost of goods sold

Cost of goods sold per hectoliter increased 2.5% and 1.8% in the second quarter and first half of 2012, driven by packaging innovation, brand premiumization and brewing material costs, partially offset by cost savings initiatives.

Marketing, general and administrative expenses

For the second quarter of 2012, marketing, general and administrative expenses increased 3.1% , due to slightly increased marketing spending related to the Miller64 brand re-launch and increased spending behind new products and packaging innovations, partially offset by lower information systems costs. Marketing, general and administrative expenses in the first half of 2012 increased 3.4%, driven by the one-time receipt of \$14 million from a third party in the first quarter of 2011 and an increase in short-term and long-term employee incentive expenses in the first quarter

of 2012.

Special items, net

During the second quarter of 2012, MillerCoors recognized a pension curtailment gain of \$2.3 million. During the second quarter and first half of 2011, MillerCoors recognized restructuring charges of \$1.1 million and \$2.5 million, respectively, due to relocation expense related to the integration of MillerCoors.

Foreign currency impact on results

Assets and liabilities recorded in foreign currencies that are the functional currencies for the respective operations are translated at the prevailing exchange rate at the balance sheet date. Revenue and expenses are translated at the average exchange rates during the period. Translation adjustments resulting from this process are reported as a separate component of other comprehensive income. Gains and losses from foreign currency transactions are included in earnings for the period.

United Kingdom Segment

Our U.K. segment produces and sells our owned brands principally in England and Wales. Results of the segment also include our licensing arrangements in the Republic of Ireland; our consolidated joint venture arrangement to produce, import and distribute the Grolsch brands in the U.K. and the Republic of Ireland; our consolidated joint venture agreement to produce and distribute the Cobra beer brands in the U.K. and the Republic of Ireland; factored brand sales (beverage brands owned by other companies, but sold and delivered to retail by us) in the U.K.; and our joint venture arrangement with DHL ("Tradeteam") for the distribution of products throughout the U.K. accounted for under the equity method. Additionally, we distribute the Modelo brands pursuant to a distribution agreement.

Reflects gross segment sales and for the second quarter of 2012 includes intercompany sales to MCI of 0.067 million hectoliters and \$4.5 million of net sales. The first half of 2012 includes intercompany sales to MCI of (1)0.111 million hectoliters and \$7.2 million of net sales. The first half of 2011 includes intercompany sales to MCI of 0.020 million hectoliters and \$1.3 million of net sales. The offset is included within MCI cost of goods sold. These amounts are eliminated in the consolidated totals.

(2) Interest income is earned on trade loans to U.K. on-premise customers and is typically driven by note receivable balances outstanding from period-to-period.

Foreign currency impact on results

During the second quarter of 2012, the British Pound ("GBP") depreciated 3.1% versus the USD, resulting in an approximate \$1 million negative impact to USD income from continuing operations before income taxes and USD underlying pretax income. The GBP depreciated 2.6% versus the USD in the first half of 2012, resulting in an approximate \$1 million and \$2 million negative impact to USD income from continuing operations before income taxes and USD underlying pretax income, respectively.

Assets and liabilities recorded in foreign currencies that are the functional currencies for the respective operations are translated at the prevailing exchange rate at the balance sheet date. Revenue and expenses are translated at the average exchange rates during the period. Translation adjustments resulting from this process are reported as a separate component of other comprehensive income. Gains and losses from foreign currency transactions are included in earnings for the period.

Volume and net sales

Our U.K. STRs decreased 7.9% in the second quarter of 2012, due to a weak U.K. off-premise channel impacted by poor weather and increased competitor promotional activity. Our U.K. STRs decreased 6.2% in the first half of 2012, which reflects the adverse impact of the timing of the 53rd week in 2011 and customer buy-in ahead of our January 2012 price increase in addition to the volume drivers in second quarter of 2012 discussed above. Our market share declined in the second quarter and first half of 2012. The total U.K. beer industry volume decreased approximately 5% in the second quarter and first half of 2012.

In the second quarter and first half of 2012, net sales per hectoliter increased 5.3% and 2.6%, respectively, in local currency, due to the positive impact of increased sales of factored brands. Pricing on owned brands was negative, driven by lower pricing in the off-premise channel as a result of continuing competitive market dynamics, partially offset by positive pricing in the on-premise channel.

Table of Contents

Cost of goods sold

Cost of goods sold per hectoliter increased 13.1% and 6.8% in local currency in the second quarter and first half of 2012, respectively, driven by higher sales of factored brands, input inflation, higher pension costs, and fixed cost de-leverage from lower volume.

Marketing, general and administrative expenses

Marketing, general and administrative expense decreased 13.6% and 5.5%, in local currency in the second quarter and first half of 2012, respectively, due to lower employee incentive costs and cost reduction initiatives, partially offset by higher marketing investments and pension expense.

Special items, net

During the first halves of 2012 and 2011, we recognized a gain of \$3.5 million and \$2.5 million, respectively, related to a release of a portion of a non-income-related tax reserve recorded as a special item in 2009. Additionally during the second quarter and first half of 2012, we recognized employee termination costs of \$4.5 million and \$6.3 million, respectively, relating to company-wide efforts to increase efficiency in operations. Also, during the second quarter of 2012, we recognized an asset abandonment charge of \$7.2 million related to the discontinuation of primary packaging. We determined that our Home Draft package was not meeting expectations driven by a lack of demand in the U.K. market and as a result, we recognized a loss related to the write-off of the Home Draft packaging line, tooling equipment and packaging materials inventory. During the second quarter and first half of 2011, we recognized employee termination costs related to supply chain restructuring activity and company-wide efforts to increase efficiency in certain operations, finance, information technology and human resource activities of \$2.4 million and \$2.7 million, respectively. See Part I—Item 1. Financial Statements, Note 7 "Special Items" to the unaudited condensed consolidated financial statements for further discussion.

Other income (expense), net

During the second quarter and first half of 2012, we recognized other expense of \$0.5 million and \$1.0 million, respectively, due primarily to foreign currency movements. During the second quarter and first half of 2011, we recognized other income of \$0.3 million and other expense of \$0.9 million, respectively, driven primarily by foreign currency movements.

Molson Coors International Segment

Our MCI segment is focused on growing our business and brand portfolios in our non-core and emerging markets, including Asia, Mexico, Latin America, the Caribbean (not including Puerto Rico, as this is a part of the U.S. segment) and continental Europe. This segment includes our Molson Coors Si'hai joint venture in China and our Molson Coors Cobra India joint venture in India.

Reflects gross segment amounts and for the second quarter of 2012 includes intercompany cost of goods sold from the U.K. of \$4.5 million. The first half of 2012 includes intercompany cost of goods sold from the U.K. of \$7.2 million. The first half of 2011 includes intercompany cost of goods sold from the U.K. of \$1.3 million. The offset (2) is included within U.K. net sales. These amounts are eliminated in the consolidated totals.

Includes loss attributable to noncontrolling interest of \$7.5 million and \$0.8 million in the second quarters 2012 (3)and 2011, respectively, and includes loss attributable to noncontrolling interest of \$8.0 million and \$1.7 million in the first halves 2012 and 2011, respectively.

Foreign currency impact on results

Our MCI segment operates in numerous countries around the world, and each country's operations utilize distinct currencies. MCI's second quarter and first half of 2012 results were insignificantly impacted by foreign currency movements. This includes an insignificant effect on both USD losses before income taxes and USD underlying pre-tax loss.

Assets and liabilities recorded in foreign currencies that are the functional currencies for the respective operations are translated at the prevailing exchange rate at the balance sheet date. Revenue and expenses are translated at the average exchange rates during the period. Translation adjustments resulting from this process are reported as a separate component of other comprehensive income. Gains and losses from foreign currency transactions are included in earnings for the period.

Volume and net sales

MCI STRs increased 36.2% and 30.3% in the second quarter and first half of 2012, respectively, due to the addition of India sales, along with Carling growth in the Ukraine and Coors Light growth in Latin America. Excluding royalty sales (primarily in Mexico and Europe), MCI reported sales volume grew 32.2% and 24.8% in the second quarter and first half of 2012, respectively.

Net sales increased 31.6% in the second quarter of 2012, driven primarily by higher sales volume. In the first half of 2012, net sales increased 30.9%, driven by higher sales volume and positive sales mix including higher sales of Zima

and Modelo brands in Japan.

Table of Contents

Cost of goods sold

Cost of goods sold increased 42.5% in the second quarter, driven primarily by higher sales volume, asset-value and cost adjustments in our Molson Coors Si'hai joint venture and input inflation. In the first half of 2012, cost of goods sold increased 38.4%, driven by higher sales volume and sales mix including higher sales of Zima and Modelo brands in Japan, and asset-value and cost adjustments in our Molson Coors Si'hai joint venture.

Marketing, general and administrative expenses

Marketing, general and administrative expense increased 25.7% to \$25.4 million and 23.4% to \$43.7 in the second quarter and first half of 2012, respectively, due to incremental brand investments in priority markets, infrastructure investments and asset-value and cost adjustments in our Molson Coors Si'hai joint venture.

Special items, net

During the second quarter of 2012, we recognized a \$10.4 million impairment charge to write-off the goodwill and definite-lived intangibles associated with Molson Coors Si'hai. See Part I—Item 1. Financial Statements, Note 12 "Goodwill and Intangible Assets" to the unaudited condensed consolidated financial statements for further discussion. During the second quarter and first half of 2011, we recognized \$0.5 million of costs associated with other strategic initiatives.

Corporate

Corporate includes corporate interest and certain other general and administrative costs that are not allocated to any of the operating segments. The majority of these corporate costs relate to worldwide administrative functions, such as corporate affairs, legal, human resources, finance and accounting, treasury, insurance and risk management.

Marketing, general and administrative expenses

Marketing, general and administrative expenses were \$47.5 million in the second quarter of 2012, an increase of \$19.2 million, or 67.8%, due to acquisition-related costs. Excluding acquisition-related costs, marketing, general and administrative expenses were \$24.7 million in the second quarter of 2012, a decrease of \$3.6 million, or 12.7%, driven by lower project expense.

Marketing, general and administrative expenses were \$80.6 million in the first half of 2012, an increase of \$24.0 million, or 42.4%, due to acquisition-related costs. Excluding acquisition-related costs, marketing, general and administrative expenses were \$51.7 million in the first half of 2012, a decrease of \$4.9 million, or 8.7%, driven by lower project and overhead costs.

Special items, net

During the first half of 2012, we recognized restructuring charges of \$1.1 million. There were no special items in the second quarter and first half of 2011. See Part I—Item 1. Financial Statements, Note 7 "Special Items" to the unaudited condensed consolidated financial statements for further discussion.

Interest expense, net

Net interest expense increased \$56.9 million to \$86.0 million in the second quarter of 2012, and increased \$53.9 million to \$111.3 million in the first half of 2012, due to acquisition-related financing costs and the new debt issued as part of the

Table of Contents

Acquisition. Specifically we recognized a cash loss of \$39.2 million on settlement of standard pre-issuance U.S. Treasury interest rate hedges ("Treasury Locks") we entered into in advance of our issuance of the \$1.9 billion senior notes, which we used to remove a portion of our interest rate market risk. Additionally, we recognized \$10.7 million of interest expense on our \$1.9 billion senior notes prior to the closing of the Acquisition, and we recognized an unrealized loss of \$5.6 million related to changes in the fair value of the conversion feature on the Convertible Note. Excluding these acquisition-related financing costs, net interest expense increased \$1.4 million to \$30.5 million in the second quarter of 2012, primarily driven by the new debt issued to fund the Acquisition. In the first half of 2012 and excluding these acquisition-related financing costs, net interest expense decreased \$1.6 million to \$55.8 million, driven by the net investment hedge designation of our cross currency swap contracts in the fourth quarter of 2011. As a result of this designation, all changes in fair value of the designated swaps, inclusive of the periodic interest incurred, are recorded in accumulated other comprehensive income, partially offsetting the movements resulting from the periodic translation adjustment of our Canadian business.

Other income (expense), net

Other expense was \$74.0 million and \$74.1 million in the second quarter and first half of 2012, due to a \$57.9 million foreign exchange loss on our Euro cash holdings when we used the proceeds from our issuance of the \$1.9 billion senior notes to purchase Euros and experienced a negative foreign exchange movement between the Euro and USD prior to using these proceeds to fund the Acquisition. Additionally, concurrent with the announcement of the Acquisition, we entered into a bridge loan agreement, which we terminated upon the closing of our issuance of the \$1.9 billion senior notes. In connection with the issuance and subsequent termination of the bridge loan, we incurred debt fees of \$13.0 million. Excluding these financing and acquisition-related costs and \$3.2 million of unrealized foreign exchange loss on acquisition financing instruments, other income was \$0.1 million and zero, respectively, in the second quarter and first half of 2012. Other income was \$0.8 million in the second quarter of 2011. In first half of 2011, other income was \$3.0 million driven by a \$0.8 million mark-to-market gain related to final settlement of the remaining total return swaps and related financial instruments we arranged with respect to Foster's common stock, as well as \$1.1 million related to foreign currency movements.

Liquidity and Capital Resources

Our primary sources of liquidity include cash provided by operating activities, access to external borrowings and monetization of assets. We believe that cash flows from operations, including distributions from MillerCoors, and cash provided by short-term and long-term borrowings, when necessary, will be more than adequate to meet our ongoing operating requirements, scheduled principal and interest payments on debt, and anticipated dividend payments and capital expenditures for the next twelve months, and our long-term liquidity requirements.

A significant portion of our cash flows from operating activities are generated outside the U.S., in currencies other than USD. As of June 30, 2012, approximately 83% of our cash and cash equivalents were denominated in foreign currencies. This increase from the prior quarter is driven by using significant U.S. denominated cash to fund the Acquisition. Most of the amounts held outside of the U.S. could be repatriated to the U.S., but, under current law, would be subject to U.S. federal and state income taxes, less applicable foreign tax credits. We have accrued for U.S. federal and state tax liabilities on the earnings of our foreign subsidiaries, except when the earnings are considered indefinitely reinvested outside of the U.S. Repatriation could result in additional U.S. federal and state income tax payments in future years. We utilize a variety of financing strategies in an effort to ensure that our worldwide cash is available in the locations in which it is needed.

Net Working Capital

As of June 30, 2012, December 31, 2011, and June 25, 2011, we had net working capital of \$350.0 million, \$887.7 million and \$567.3 million, respectively, excluding short-term borrowings and current portion of long-term debt. We commonly operate at minimal positive working capital levels or working capital deficits given the relatively quick turnover of our receivables and inventory, the levels of which fluctuate with the seasonality in our business. However, our current working capital level is bolstered by a high level of cash generated from revenue growth, as well as various cost saving initiatives. Our working capital is also sensitive to foreign exchange rates, as a significant majority of our current assets and current liabilities are denominated in CAD, GBP, and our Central European operating currencies such as Euro, Czech Koruna, Croatian Kuna, Serbian Dinar, New Romanian Leu and Bulgarian Lev, while

financial results are reported in USD. Below is a table outlining our current and historical net working capital levels (in millions):

Add: Current portion of long-term debt and short-term borrowings	802.5	46.9	50.4
Net working capital	\$350.0	\$887.7	\$567.3

The decrease in net working capital from \$887.7 million at December 31, 2011, is primarily driven by the significant amount of cash used to fund the Acquisition.

Cash Flows

Our business usually generates positive operating cash flow each year, and our debt maturities are of a longer-term nature. However, our liquidity could be impacted significantly by the risk factors we described in Part I—Item 1A. Risk Factors in our Annual Report.

Cash Flows from Operating Activities

Net cash provided by operating activities of \$397.4 million for the first half of 2012, increased by \$125.6 million compared to the second quarter of 2011.

Net income for the first half of 2012 including noncontrolling interest was lower by \$128.4 million driven by financing and acquisition-related costs, input inflation and higher pension costs in Canada and the U.K., partially offset by higher equity income in the U.S., higher amortization of debt issuance costs and higher impairment charges. This decrease was offset by improved working capital of \$234.2 million, which includes the impact of 15 days of Central Europe working capital post-acquisition. This is primarily driven by lower accounts receivable balances in the U.K. and timing of accounts payable and accrued liability balances in the U.K., Central Europe, Canada and Corporate.

Cash Flows from Investing Activities

Net cash used in investing activities of \$2,552.7 million for the first half of 2012, increased by \$2,360.9 million compared to the first half of 2011.

Higher net cash used in investing activities was driven by the Acquisition of \$2,257.4 million, net of cash acquired compared to the \$29.4 million acquisition of Sharp's Brewery Ltd. and the \$10.3 million acquisition of a controlling stake of Molson Coors Cobra India in the first half of 2011.

Higher net cash used in investing activities further relates to the \$110.6 million settlement in the first quarter of 2012 of approximately 33% of our remaining cross currency swaps designated as a net investment hedge. See Part I—Item 1. Financial Statements, Note 14 "Derivative Instruments and Hedging Activities" to the unaudited condensed consolidated financial statements.

Cash Flows from Financing Activities

Net cash provided by financing activities of \$1,583.6 million for the first half of 2012, increased by \$1,708.9 million from \$125.3 million of net cash used in financing activities in the first half of 2011.

Higher net cash provided by financing activities was driven by proceeds from issuances of long-term debt of \$2,195.4 million related to the Acquisition, partially offset by \$37.0 million higher debt issuance costs in the first half of 2012. Higher net cash provided by financing activities also increased by \$14.5 million related to the exercise of stock options. The number of options exercised increased by 0.5 million shares and was driven by a significant number of awards nearing expiration.

This was partially offset by the \$424.3 million repayment of the Subordinated Deferred Payment Obligation in the first half of 2012, which we assumed as part of the Acquisition. Additionally, in the first half of 2012, we repaid the remaining \$44.8 million outstanding of our \$850 million 6.375% 10-year notes that were due in May 2012.

Underlying Free Cash Flow

For the first half of 2012, we generated \$335.2 million of underlying free cash flow. This represents an increase of \$213.3 million in cash provided from underlying free cash flow from \$121.9 million a year ago, driven by improved working capital and higher underlying net income, partially offset by higher capital expenditures.

The following table provides a reconciliation of Underlying Free Cash Flow to the nearest U.S. GAAP measure (Net Cash Provided by Operating Activities) (in millions):

Amounts represent our proportionate 42% share of the cash flow impacts, as determined by management. These (3) items adjust operating cash flow to arrive at our underlying free cash flow for the first two quarters of the year and the comparable prior-year period.

Capital Resources

Cash and Cash Equivalents

As of June 30, 2012, we had total cash and cash equivalents of \$516.0 million, compared to \$1,078.9 million at December 31, 2011, and \$1,184.2 million at June 25, 2011. The decrease versus previous quarters is driven by the use of a significant amount of cash to fund the Acquisition. Our cash and cash equivalents are invested in a variety of highly liquid investments with original maturities of 90 days or less. These investments are viewed by management as low-risk investments and on which there are little to no restrictions regarding our ability to access the underlying cash to fund our operations as necessary.

Borrowings

The majority of our outstanding borrowings as of June 30, 2012, consisted of publicly traded notes, with maturities ranging from 2013 to 2042. Long-term debt was \$4,097.9 million, \$1,914.9 million and \$1,951.1 million at June 30, 2012, December 31, 2011, and June 25, 2011, respectively. Not included in these amounts are current portions of long-term debt and short-term borrowings. Current portions of long-term debt were \$683.1 million, \$44.7 million, and \$44.9 million as of June 30, 2012, December 31, 2011, and June 25, 2011, respectively. Short-term borrowings were \$119.4 million, \$2.2 million, and \$5.5 million as of June 30, 2012, December 31, 2011, and June 25, 2011, respectively. Our total borrowings increased by \$2.9 billion from December 31, 2011 to June 30, 2012, primarily due to financing activities in connection with the Acquisition as discussed below.

On April 3, 2012, we entered into a term loan agreement (the "Term Loan Agreement") that provides for a 4-year term loan facility of \$300 million, composed of one \$150 million borrowing and one Euro-denominated borrowing equal to \$150 million at issuance (or €120 million borrowing) both of which were funded upon close of the Acquisition on June 15, 2012. The

Table of Contents

Term Loan Agreement requires quarterly principal repayments on each borrowing equal to 2.5% of the initial principal obligation, commencing on September 30, 2012, with the remaining 62.5% principal balance due at the June 15, 2016 maturity date. The obligations under the Term Loan Agreement are our general unsecured obligations. The Term Loan Agreement contains customary events of default, specified representations and warranties and covenants, including, among other things, covenants that limit our and our subsidiaries' ability to incur certain additional priority indebtedness, create or permit liens on assets or engage in mergers or consolidations.

On May 3, 2012, we issued \$1.9 billion of senior notes with portions maturing in 2017, 2022 and 2042. The 2017 senior notes were issued in an initial aggregate principal amount of \$300 million at 2.0% interest and will mature on May 1, 2017. The 2022 senior notes were issued in an initial aggregate principal amount of \$500 million at 3.5% interest and will mature on May 1, 2022. The 2042 senior notes were issued in an initial aggregate principal amount of \$1.1 billion at 5.0% interest and will mature on May 1, 2042.

On June 15, 2012, we issued a €500 million Zero Coupon Senior Unsecured Convertible Note due 2013 (the "Convertible Note") to the Seller in conjunction with the closing of the Acquisition. The Convertible Note matures on December 31, 2013 and is a senior unsecured obligation guaranteed by MCBC. The Seller may exercise a put right with respect to the Convertible Note beginning on March 14, 2013 (the "First Redemption Date") and ending on December 19, 2013, for the greater of the principal amount of the Convertible Note or the aggregate cash value of 12,894,044 shares of our Class B Common Stock, as adjusted for certain corporate events. See Part I—Item 1. Financial Statements, Note 13 "Debt" to the unaudited condensed consolidated financial statements for further discussion of 2012 financing activities, as well as pre-existing borrowings.

Credit markets in the United States and across the globe have improved significantly since the financial crisis of late 2008. Based on the credit profile of our lenders that are party to our credit facilities, we are confident in our ability to draw on such credit facilities if the need arose. There were no outstanding borrowings on our 4-year revolving \$400 million or 4-year revolving \$550 million credit facilities as of June 30, 2012, which were issued in the second quarter of 2011 and second quarter of 2012, respectively. We also have uncommitted lines of credit with several banks should certain business units need additional short-term liquidity. Under the terms of some of our debt facilities, we must comply with certain restrictions. These include restrictions on priority indebtedness (certain threshold percentages of secured consolidated net tangible assets), leverage thresholds, liens, and restrictions on certain types of sale lease-back transactions. As of June 30, 2012 and December 31, 2011, we were in compliance with all of these restrictions and have met all debt payment obligations.

Use of Cash

With the Acquisition, our cash use will focus primarily on debt repayment for the next few years, along with cash dividends, potential strategic investments and other general corporate uses.

On August 2, 2011, we announced that our Board of Directors approved a new program authorizing the repurchase, of up to \$1.2 billion of our Class B common stock, with an expected program term of three years. This program was later extended to Class A shares although the primary focus has been on Class B shares. There were no repurchases in the first half of 2012 and we do not expect further repurchases until our debt ratios return closer to levels maintained prior to the financing activities related to the Acquisition.

Credit Rating

Following our offering of \$1.9 billion of senior notes in the second quarter of 2012, DBRS and Moody's Investor Service each maintained our stable outlook while reducing our ratings from BBB High to BBB and from Baa1 to Baa2, respectively. Additionally, Fitch initiated their rating of BBB stable. Standard and Poor's maintained our BBB-rating while reducing its outlook from positive to negative. Our BBB- rating from Standard & Poor's is one notch above "below investment grade." A securities rating is not a recommendation to buy, sell or hold securities, and it may be revised or withdrawn at any time by the rating agency.

MillerCoors

MillerCoors distributes its excess cash to its owners, SABMiller and MCBC, on a 58%/42% basis, respectively. MillerCoors does not carry significant debt obligations, and there are no restrictions from external sources on its ability to make cash distributions to its owners.

MillerCoors recognized \$73.0 million and \$72.6 million of depreciation and amortization during the second quarters of 2012 and 2011, respectively, and \$144.1 million and \$144.1 million during the first halves of 2012 and 2011, respectively.

As of June 30, 2012, and December 31, 2011, MillerCoors had cash of \$61.1million and \$30.4 million, respectively. As of June 30, 2012, and December 31, 2011, total debt was \$28.3 million and \$28.2 million, respectively.

Table of Contents

MillerCoors contributed \$77.6 million to its defined benefit pension plans during the first half of 2012. For 2012, MillerCoors' contributions to its defined benefit pension plans are expected to be approximately \$110 million to \$130 million (our 42% share is \$46 million to \$55 million), and are not included in our contractual cash obligations discussion below.

Foreign Exchange

Foreign exchange risk is inherent in our operations primarily due to the significant operating results that are denominated in currencies other than USD, predominantly CAD, GBP, and our Central European operating currencies such as Euro, Czech Koruna, Croatian Kuna, Serbian Dinar, New Romanian Leu and Bulgarian Lev. Our approach is to reduce the volatility of cash flows and reported earnings which result from currency fluctuations rather than business related factors. Therefore, we closely monitor our operations in each country and seek to adopt appropriate strategies that are responsive to foreign currency fluctuations. Our financial risk management policy is intended to offset a portion of the potentially unfavorable impact of exchange rate changes on net income and earnings per share. See Part I—Item 1. Financial Statements, Note 14 "Derivative Instruments and Hedging Activities" to the unaudited condensed consolidated financial statements for further discussion on our financial risk management strategies.

Capital Expenditures

We spent \$81.4 million on capital improvement projects worldwide in the second quarter, excluding capital spending by MillerCoors and other equity method joint ventures, representing an increase from the \$72.5 million of capital expenditures in the second quarter 2011. We now expect to incur capital expenditures for 2012 of approximately \$240 million, including capital spending by Central Europe and excluding capital spending by MillerCoors and other equity method joint ventures.

Contractual Obligations and Commercial CommitmentsContractual Cash Obligations as of June 30, 2012

A summary of our consolidated contractual cash obligations as of June 30, 2012, and based on foreign exchange rates at June 30, 2012, is as follows:

Contingencies

We enter into contractual arrangements under which we may agree to indemnify third parties from any losses or guarantees incurred relating to pre-existing conditions arising from certain events as defined within the particular contract, which may include, for example, litigation or claims relating to past performance. See Part I—Item 1. Financial Statements, Note 16, "Commitments and Contingencies" to the unaudited condensed consolidated financial statements for a discussion of our indemnity and environmental obligations.

We provide indemnities to FEMSA regarding certain tax, civil and labor claims, including cases related to purchased tax credits. See Part I—Item 1. Financial Statements, Note 16, "Commitments and Contingencies—Kaiser and Other Indemnity Obligations," to the unaudited condensed consolidated financial statements, for a detailed discussion.

Off-Balance Sheet Arrangements

As of June 30, 2012, we did not have any material off-balance sheet arrangements (as defined in Item 303(a)(4)(ii) of Regulation S-K).

Outlook for 2012

We expect 2012 to be as challenging as 2011 in all our markets. Additionally in 2012, we anticipate adverse foreign exchange rates and increased pension expense. We expect additional pension expense this year of approximately \$15 million in Canada and \$10 million in the U.K.

For the balance of the year, in addition to focusing on the integration of MCCE, we are investing incrementally in our brands and innovation to drive financial performance. Marketing investments are planned to be higher in Canada, U.K. and MCI. MillerCoors also plans incremental investments in the U.S. for the balance of the year, primarily around innovative brands and packages and business transformation. In Central Europe, after a double-digit increase in marketing and sales spending behind our innovation agenda in the first half, we plan more-moderate local currency increases in the second half of this year.

We also expect higher input costs in all of our businesses, some of which we expect to offset with additional cost-reduction initiatives across our company. Later in 2012, we will be cycling the 53rd week in our fiscal year 2011, which provided approximately \$12 million of pretax income in Canada, partially offset by \$3 million of higher interest and overhead expenses in Corporate.

In Canada, we continue to roll out Coors Light Iced T and have launched aluminum pints for Coors Light and Molson Canadian. We also acquired the license for Newcastle Brown Ale and Strongbow Cider in Canada and managed the pricing and volume mix in the West to better balance our market share performance. Also, we expect the second quarter volume benefit from the timing of the Canada Day holiday to reverse in the third quarter.

We now expect our 2012 Canada cost of goods sold per hectoliter to increase at a high-single-digit rate in local currency, up from mid-single-digit rate in the previous quarter, due a mix shift toward higher-cost packages and products, including Strongbow and Newcastle, and to the cost of brewing NAB contract volume.

In the U.S., we have strong marketing and sales programming behind our key brands this year in peak season, especially for Miller Lite, Coors Light and Miller64. We are also introducing or testing a range of new brands, and we continue to leverage a full slate of innovative packaging, including the Miller Lite Punch Top Can, to help build our existing brands.

We continue to expect MillerCoors cost of goods sold per hectoliter to increase at a low-single-digit rate in 2012, largely due to increases in brewing materials and fuel costs.

In Central Europe, our results were impacted by negative foreign exchange and up-front investments behind innovations and marketing efforts ahead of peak season this year, from which we expect strong returns in the second half. These innovations include lemon and grapefruit extensions of some of our leading brands. These line extensions and new packages have been growing strongly this summer and are pulling volume from inside the beer category and from other types of beverages. Additionally, following expansion last year, Staropramen is growing strongly in Central Europe and in our export markets. As a result, we are optimistic that our Central Europe trends in local currency will improve in the second half.

We expect our 2012 Central Europe cost of goods sold per hectoliter to grow at a low-single-digit rate in local currency on a pro forma basis, driven by brewing materials, utilities and fuel inflation.

In the U.K., we plan to invest in marketing and in our Sharp's Brewery to increase capacity in order to support Doom Bar, which has been the fastest growing cask ale in the U.K. for the past three years. In the U.K. in the third quarter, we will be

Table of Contents

cycling a reduction in employee incentive compensation expense last year. This will have a negative impact on our results in the third quarter of approximately \$6 million.

We now expect our 2012 U.K. cost of goods sold per hectoliter to grow at a high-single-digit rate in local currency, up from mid-single-digit rate in the previous quarter, driven by input inflation, sales mix and one-time expenses related to the U.K. brewery improvements this year.

The 2012 investment in MCI will be moderately higher than last year.

We now expect 2012 marketing, general and administrative expense in Corporate to be approximately \$135 million, which includes approximately \$35 million of acquisition-related costs, which we estimate will be less than \$5 million in the second half of this year.

Interest

We now anticipate 2012 Corporate net interest expense of approximately \$150 million based on current foreign exchange rates and excluding underlying adjustments. The new debt used to fund the Acquisition carries a weighted average interest rate of approximately 3%.

Tax

Our tax rate is volatile and may move up or down with changes in, among other things, the amount and source of income or loss, our ability to utilize foreign tax credits, changes in tax laws, and the movement of liabilities established pursuant to accounting guidance for uncertain tax positions as statutes of limitations expire or positions are otherwise effectively settled. We continue to anticipate that our 2012 effective tax rate on income will be in the range of 17% to 21%. We do not expect the Acquisition to have a substantial impact on the company's 2012 effective tax rate, but we will have a clearer view of this by next quarter. As a result, we are not changing our 2012 tax rate guidance at this time. We continue to expect our normalized long-term tax rate to be in the range of 22% to 26%, but we anticipate that it will take a few years to move up to that range. In addition, there are other pending law changes in the U.S., U.K., Canada and Central Europe that if enacted, may have an impact on our effective tax rate.

Critical Accounting Estimates

Our accounting policies and accounting estimates critical to our financial condition and results of operations are set forth in our Annual Report and did not change during the first half of 2012.

As of June 30, 2012, we had \$753.9 million of goodwill and \$315.9 million of indefinite-lived intangibles associated with our U.K. reporting unit and Carling brand, respectively, which originated from our acquisition of Coors Brewers Limited in 2002. Our annual impairment testing in 2011 revealed that the fair value of the U.K. reporting unit and the Carling brand was more than 25% and 175%, respectively, in excess of their carrying values. In recent quarters our U.K. business, along with other U.K. corporations across all industries, has been adversely impacted by the soft economy both in the U.K. and Europe. If this continues, a future impairment charge may be required.

Through our annual impairment testing in 2011, we determined that the fair value of our China reporting unit, included in MCI, was not significantly in excess of its carrying value. Since its inception, the performance of the Molson Coors Si'hai joint venture (which is included in our China reporting unit with our other operations in China) has not met our expectations due to delays in executing its business plans. As a result, the fair value of our China reporting unit only exceeded its carrying value by 4%. We have held ongoing negotiations with our joint venture partner intended to overcome these business difficulties and other issues affecting the joint venture. As part of the negotiations to resolve these issues with our partner, during the second quarter of 2012, we signed an agreement to acquire our partner's 49% noncontrolling interest in the joint venture. Since the execution of the agreement, there has been a lack of progress by our partner in timely satisfying the closing conditions, as well as delays and new obstacles in gaining government approval for the acquisition of the noncontrolling interest, including a court order in China which prevents our joint venture partner from transferring its equity interest to us. These developments, coupled with the impact of increased competitive pressures in China were the combined trigger to review the future cash flows for the reporting unit. The subsequent testing identified that the full amount of the goodwill was impaired resulting in a charge of \$9.5 million in the second quarter of 2012. Additionally, in the second quarter of 2012, we recognized an impairment charge on the definite-lived brand and distribution rights intangible assets of \$0.9 million. Both of these

charges are classified as Special items in our Condensed Consolidated Statements of Operations. In addition, as a result of the recent developments, we believe there is a substantial likelihood the closing conditions in the agreement with our joint venture partner will not be satisfied, which will result in the closing of the purchase of our joint venture partner's equity interest not occurring on the terms contemplated by the agreement previously signed, or at all. In that scenario, we will consider other alternatives, which may

require us to record further costs and potential incremental asset impairment charges in the future related to our China reporting unit.

New Accounting Pronouncements Not Yet Adopted

Disclosure about Offsetting Assets and Liabilities

In December 2011, the Financial Accounting Standards Board issued authoritative guidance enhancing the disclosure requirements related to offsetting asset and liability positions. The update creates new disclosure requirements about the nature of an entity's rights of offset and related arrangements associated with its financial instruments and derivative instruments. The new disclosures are designed to better facilitate comparison between financial statements prepared under U.S. GAAP and International Financial Reporting Standards by requiring entities to provide financial statement users information about both gross and net exposures. The guidance is effective for annual reporting periods beginning on or after January 1, 2013, and interim periods thereafter. We do not anticipate that this guidance will have an impact on our financial position or results from operations. However, we are currently evaluating the impact of this guidance on our existing disclosures.

Testing Indefinite-lived Intangibles for Impairment

In July 2012, the FASB issued authoritative guidance related to the impairment testing of indefinite-lived intangibles. The new guidance permits an entity to first assess qualitative factors to whether it is more likely than not that the fair value of an indefinite-lived intangible is less than its carrying amount. If it is concluded that this is the case, the annual impairment test is necessary. Otherwise, the annual impairment test is not required. This guidance is effective for annual and interim goodwill impairment tests performed for our fiscal years beginning January 1, 2013, however, we have decided to early adopt and make it effective for our 2012 impairment review, which will take place in the third quarter. This guidance does not have an impact on our financial position or results from operations.

See Part I—Item 1. Financial Statements, Note 2 "New Accounting Pronouncements" to the unaudited condensed consolidated financial statements for a description of new accounting pronouncements that we have adopted.

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk

In the normal course of business, we actively manage our exposure to various market risks by entering into various supplier- and market-based hedging transactions, authorized under established risk management policies that place clear controls on these activities. Our objective in managing these exposures is to decrease the volatility of our earnings and cash flows due to changes in underlying rates and costs.

The counterparties to our market-based transactions are generally highly rated institutions. We perform assessments of their credit risk regularly. Our market-based transactions include a variety of derivative financial instruments, none of which are used for trading or speculative purposes.

For details of our derivative instruments that are presented on the balance sheet, including their fair values as of period end, see Part I—Item 1. Financial Statements, Note 14 "Derivative Instruments and Hedging Activities," to the unaudited condensed consolidated financial statements. On a rolling twelve-month basis, maturities of derivative financial instruments held on June 30, 2012, are as follows:

Total	Less than 1 year	1 - 3 years	3 - 5 years	More than 5 years
(In millions)				
\$(229.8)	\$(24.1) \$(205.7) \$—	\$—

Sensitivity Analysis

Our market sensitive derivative and other financial instruments, as defined by the Securities and Exchange Commission ("SEC"), are foreign currency forward contracts, commodity swaps, interest rate swaps and cross currency swaps. We monitor foreign exchange risk, interest rate risk, commodity risk, equity price risk and related derivatives using a sensitivity analysis.

The following table presents the results of the sensitivity analysis, which reflects the impact of a hypothetical 10% adverse change in the applicable market interest rates, foreign exchange rates, and commodity prices of our derivative and debt portfolio:

Table of Contents

	As of		December 31,
	June 30, 2012		2011
Estimated fair value volatility	(In millions)

The volatility of the applicable rates and prices are dependent on many factors that cannot be forecast with reliable accuracy. Therefore, actual changes in fair values could differ significantly from the results presented in the table above.

ITEM 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of our disclosure controls and procedures as such item is defined under Rule 13a-15(f) under the Securities Exchange Act of 1934, as amended ("Exchange Act"). We acquired StarBev in the second quarter of 2012. As such, the scope of our assessment of the effectiveness of internal control over financial reporting does not include StarBev. This exclusion is in accordance with the SEC's general guidance that an assessment of a recently acquired business may be omitted from our scope in the year of acquisition. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of June 30, 2012, to provide reasonable assurance that information required to be disclosed in our reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. Management necessarily applies its judgment in assessing the costs and benefits of such controls and procedures that, by their nature, can only provide reasonable assurance regarding management's control objectives. Also, we have investments in certain unconsolidated entities that we do not control or manage.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting (as defined in Exchange Act Rule 13a-15(f)) during the quarter ended June 30, 2012, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. Other Information

ITEM 1. Legal Proceedings

We are party to various legal proceedings arising in the ordinary course of business as described in Part I—Item 1. Financial Statements, Note 16, "Commitments and Contingencies—Litigation and Other Disputes" to the unaudited condensed consolidated financial statements, which if decided adversely to or settled by us, may, individually or in the aggregate, be material to our financial condition or results of operations. We may enter into discussions regarding

settlement of these and other lawsuits, and may enter into settlement agreements if we believe such settlement is in the best interests of our stockholders.

In 1999, Molson entered into an agreement for the distribution of Molson products in Brazil. In 2000, before commencing distribution in Brazil, Molson terminated the distribution agreement and paid the distributor \$150,000 in

Table of Contents

settlement. The distributor sued Molson to set aside the settlement and to seek additional compensation. The Appellate Court of the State of Rio de Janeiro ("Appellate Court") set aside the settlement agreement and determined that Molson was liable to the distributor, with the amount of damages to be determined through subsequent proceedings. An appeal of the liability decision is currently pending before the Brazilian Superior Court of Justice, which allowed Molson's appeal during the fourth quarter of fiscal year 2009 and agreed to hear the merits of Molson's appeal. With respect to damages, the case was remanded to a Rio de Janeiro trial court to determine the amount of damages. The trial court retained an expert who provided a report adopting the position of the distributor and recommended damages based on a business plan that was never implemented. Molson challenged the irregularity of the expert process, the impartiality of the expert, as well as the report's specific recommendation. The trial court denied Molson's challenges. Molson filed an appeal before the Appellate Court regarding these procedural irregularities, which was denied during the fourth quarter of fiscal year 2009. Following the trial court's procedural ruling during the third quarter of 2009, that court handed down a decision in the distributor's favor granting the full amount of the lost anticipated profits alleged by the distributor, approximately \$42 million, plus attorney's fees and accrued interest from the termination of the distribution agreement. Molson appealed the judgment to the Appellate Court. During the fourth quarter of 2009, the Appellate Court directed the court-retained expert to explain the basis for his damages calculation. During the first quarter of 2010, the Appellate Court granted Molson's appeal and vacated the \$42 million judgment. The Appellate Court remanded the proceeding to the trial court and ordered that court to select a different expert. The Appellate Court furthermore directed the trial court to use specific criteria in setting damages, the effect of which should be to substantially reduce the award. Molson sought clarification as to the precise criteria to be used. In April 2010, the Appellate Court denied Molson's motion for clarification, but limited the accrual of interest in this matter. In October 2010, the Appellate Court denied the distributor's motion to set aside the vacation of the \$42 million judgment. In July 2011, the trial court selected a new expert to formulate a new calculation of damages. During the second quarter of 2012, we entered into settlement negotiations with the distributor and agreed in principle to settle this litigation for approximately \$6.3 million, including legal fees. Subsequent to the end of the second quarter 2012, we finalized the settlement for the \$6.3 million accrued at June 30, 2012.

We are involved in other disputes and legal actions arising in the ordinary course of our business. While it is not feasible to predict or determine the outcome of these proceedings, in our opinion, based on a review with legal counsel, none of these disputes and legal actions is expected to have a material impact on our consolidated financial position, results of operations or cash flows. However, litigation is subject to inherent uncertainties and an adverse result in these or other matters may arise from time to time that may harm our business.

ITEM 1A. Risk Factors

In addition to the factors discussed in Part I—Item 1A. Risk Factors in our Annual Report for the year ended December 31, 2011, we have identified the following additional risk factors related to the completion of our acquisition (the "Acquisition") of StarBev Holdings S.à r.l. ("StarBev") from StarBev L.P. (the "Seller") on June 15, 2012, which we subsequently renamed Molson Coors Central Europe ("MCCE"). You should carefully consider the factors discussed below and in Part I—Item 1A. Risk Factors in our Annual Report, which could materially affect our business, financial condition and/or future results. The risks described herein and in our Annual Report are not the only risks facing us. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial may also have a material adverse effect on our business, financial condition and/or future results.

We may not recognize the benefits of the Acquisition.

We may not realize the expected benefits of the Acquisition because of integration difficulties and other challenges. The success of the Acquisition will depend, in part, on our ability to realize all or some of the anticipated synergies and other benefits from integrating MCCE's business with our existing businesses. The integration process may be complex, costly and time-consuming. The difficulties of integrating the operations of MCCE's business include, among others:

- failure to implement our business plan for the combined business;

- unanticipated issues in integrating manufacturing, logistics, information, communications and other systems;
- possible inconsistencies in standards, controls, procedures and policies, and compensation structures between MCCE's structure and our structure;
- failure to retain key customers and suppliers;
- unanticipated changes in applicable laws and regulations;
- failure to retain key employees;
- operating risks inherent in MCCEs business and our business;
- unanticipated issues, expenses and liabilities;
- unfamiliarity with operating in Central Europe; and
- disputes with minority shareholders of MCCE's subsidiary, Trebjesa AD, that may disrupt our integration efforts or cause us to need to buy out their interests.

Table of Contents

We may not be able to maintain the levels of revenue, earnings or operating efficiency that each of Molson Coors and MCCE had achieved or might achieve separately. In addition, we may not accomplish the integration of MCCE's business smoothly, successfully or within the anticipated costs or timeframe. Moreover, the markets in which MCCE operates may not experience the growth rates expected and any further economic downturn affecting Europe could negatively impact MCCE's business. These markets are in differing stages of development and may experience more volatility than expected or face more operating risks than in the more mature markets in which Molson Coors has historically operated. If we experience difficulties with the integration process or if the MCCE business or the markets in which it operates deteriorate, the anticipated cost savings, growth opportunities and other synergies of the Acquisition may not be realized fully, or at all, or may take longer to realize than expected. In such case, our business, financial condition and results of operations may be negatively impacted.

We face risks associated with the Sale and Purchase Agreement ("SPA") in connection with the Acquisition. In connection with the Acquisition, we assumed substantially all the liabilities of MCCE that were not satisfied on or prior to the closing date. There may be liabilities that we underestimated or did not discover in the course of performing our due diligence investigation of MCCE. Under the SPA and a management warranty deed (the "Management Warranty Deed"), the Seller has agreed to provide us with a limited set of representations and warranties. Our sole remedy from the Seller for any breach of those representations and warranties is an action for indemnification, not to exceed €100 million under the SPA and €50 million under the Management Warranty Deed. Damages resulting from a breach of a representation or warranty could have a material and adverse effect on our financial condition and results of operations.

Impacts of the Acquisition on our financial position.

As a result of the Acquisition, the already significant amount of goodwill and other intangible assets on our consolidated financial statements increased. Such amounts are subject to impairment based upon future adverse changes in our business or prospects. In addition, we incurred a significant amount of additional indebtedness in connection with the Acquisition. After giving effect to our \$1.9 billion senior notes offering, borrowings under the new credit and term loan agreements in connection with the Acquisition and the issuance of the Convertible Note to the Seller, we have outstanding \$4,781 million of indebtedness as of June 30, 2012, the ability to incur up to an additional \$550 million of indebtedness under our new revolving credit facility and the ability to incur up to an additional \$400 million of indebtedness under our existing revolving credit facility. We may incur significantly more indebtedness in the future. As a result of the debt that we incurred in connection with the Acquisition, we have suspended share repurchases until our credit metrics are closer to pre-MCCE acquisition levels, and there can be no assurance that our credit ratings will remain at an investment grade level or that they will improve. We also intend to use cash from operations to reduce our debt level, which will reduce funds available for other purposes and may increase our vulnerability to adverse economic or industry conditions. In addition, our indebtedness also subjects us to financial and operating covenants, which may limit our flexibility in responding to our business needs. If we are not able to maintain compliance with stated financial ratios or if we breach any of the other covenants in any debt agreement, we could be in default under such agreement. Such a default may allow the creditors to accelerate the related indebtedness and may result in the acceleration of any other indebtedness to which a cross-acceleration or cross-default provision applies.

(1) - On August 2, 2011, we announced that our Board of Directors approved and authorized a new program to repurchase up to \$1.2 billion of our Class B common stock. The program has an expected term of three years and we plan to repurchase our Class B common stock from time to time, principally in the open market or through private transactions. The number, price, and timing of the repurchases will be at our sole discretion and will be evaluated depending on market conditions, liquidity needs or other factors. Our Board of Directors may suspend, modify, or terminate the program at any time without prior notice. During the third quarter of 2011, our Board of Directors expanded this program to include the repurchase of our Class A common stock.
