KOPIN CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION

The accompanying condensed consolidated financial statements as of September 26, 2015 include the accounts of Kopin Corporation, its wholly-owned subsidiaries, Kowon Technology Co., Ltd. (Kowon), a majority owned (93%) subsidiary located in Korea, Intoware Ltd. (Intoware), a majority owned (58%) subsidiary located in the United Kingdom, and eMDT America Inc. (eMDT), a majority owned (80%) subsidiary located in California (collectively, the Company). Ownership interests of Kowon, Intoware and eMDT not attributable to the Company are referred to as noncontrolling interests. All intercompany transactions and balances have been eliminated. The condensed consolidated financial statements for the three and nine months ended September 26, 2015 and September 27, 2014 are unaudited and include all adjustments which, in the opinion of management, are necessary to present fairly the results of operations for the periods then ended. These condensed consolidated financial statements should be read in conjunction with the Company's financial statements and notes thereto, included in the Company's Annual Report on Form 10-K for the year ended December 27, 2014.

The Company ceased its production activities at its Kowon facility in 2013, but as of September 26, 2015 the closure of this facility did not meet the criteria for assets held for sale.

During the second quarter of 2014, the Company paid approximately \$0.3 million to acquire an additional 29% ownership in its eMDT subsidiary.

In October 2015, the Company acquired the remaining equity of Intoware for £1, as part of a transaction in which the Company contributed two software products for 17.5% equity ownership in a new company formed to commercialize the software products.

The results of the Company's operations for any interim period are not necessarily indicative of the results of the Company's operations for any other interim period or for a full fiscal year.

During the nine months ended September 26, 2015, the change in the Company's accumulated other comprehensive income was the net of \$(1.4) million foreign currency translation adjustment, \$0.9 million unrealized holding gains on marketable securities and \$(0.8) million of reclassified holding gains.

Table of Contents**2. CASH AND EQUIVALENTS AND MARKETABLE SECURITIES**

The Company considers all highly liquid, short-term debt instruments with original maturities of three months or less to be cash equivalents.

Marketable debt securities consist primarily of certificates of deposit, medium-term corporate debt, and United States government and agency backed securities. The Company classifies these marketable debt securities as available-for-sale in "Marketable Debt Securities". The Company records the amortization of premium and accretion of discount on marketable debt securities in the results of operations.

The Company uses the specific identification method as a basis for determining cost and calculating realized gains and losses with respect to marketable debt securities. The gross gains and losses realized related to sales and maturities of marketable debt securities were not material during the nine months ended September 26, 2015 and the year ended December 27, 2014.

Investments in available-for-sale marketable debt securities are as follows at September 26, 2015 and December 27, 2014:

	Amortized Cost		Unrealized Gains		Unrealized Losses		Fair Value	
	2015	2014	2015	2014	2015	2014	2015	2014
U.S. government and agency backed securities	\$53,416,049	\$57,897,914	\$90,991	\$—	\$—	\$(200,772)	\$53,507,040	\$57,697,142
Corporate debt and certificates of deposit	18,902,440	18,564,823	—	—	(47,506)	(38,830)	18,854,934	18,525,993
Total	\$72,318,489	\$76,462,737	\$90,991	\$—	\$(47,506)	\$(239,602)	\$72,361,974	\$76,223,135

The contractual maturity of the Company's marketable debt securities is as follows at September 26, 2015:

	Less than One year	One to Five years	Greater than Five years	Total
U.S. government and agency backed securities	\$25,108,141	\$20,717,860	\$7,681,038	\$53,507,039
Corporate debt and certificates of deposit	16,451,556	2,403,379	—	18,854,935
Total	\$41,559,697	\$23,121,239	\$7,681,038	\$72,361,974

The Company conducts a review of its marketable debt securities on a quarterly basis for the presence of other-than-temporary impairment (OTTI). The Company assesses whether OTTI is present when the fair value of a debt security is less than its amortized cost basis at the balance sheet date. Under these circumstances OTTI is considered to have occurred (1) if the Company intends to sell the security before recovery of its amortized cost basis; (2) if it is "more likely than not" the Company will be required to sell the security before recovery of its amortized cost basis; or (3) the present value of expected cash flows is not sufficient to recover the entire amortized cost basis.

The Company further estimates the amount of OTTI resulting from a decline in the credit worthiness of the issuer (credit-related OTTI) and the amount of non credit-related OTTI. Noncredit-related OTTI can be caused by such factors as market illiquidity. Credit-related OTTI is recognized in earnings while noncredit-related OTTI on securities not expected to be sold is recognized in other comprehensive income (loss). The Company did not record an OTTI for the three and nine months ended September 26, 2015 and September 27, 2014.

Table of Contents**3. FAIR VALUE MEASUREMENTS**

Financial instruments are categorized as Level 1, Level 2 or Level 3 based upon the method by which their fair value is computed. An investment is categorized as Level 1 when its fair value is based on unadjusted quoted prices in active markets for identical assets that the Company has the ability to access at the measurement date. An investment is categorized as Level 2 if its fair market value is based on quoted market prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, based on observable inputs such as interest rates, yield curves, or derived from or corroborated by observable market data by correlation or other means. An investment is categorized as Level 3 if its fair value is based on assumptions developed by the Company about what a market participant would use in pricing the assets.

The following table details the fair value measurements of the Company's financial assets:

	Fair Value Measurement September 26, 2015			
	Total	Level 1	Level 2	Level 3
Cash and Equivalents	\$14,977,484	\$14,977,484	\$—	\$—
U.S. Government Securities	53,507,040	19,012,542	34,494,498	—
Corporate Debt	6,485,226	—	6,485,226	—
Certificates of Deposit	12,369,708	—	12,369,708	—
Vuzix Corporation	1,288,070	1,288,070	—	—
GCS Holdings	196,889	196,889	—	—
	\$88,824,417	\$35,474,985	\$53,349,432	\$—

	Fair Value Measurement December 27, 2014			
	Total	Level 1	Level 2	Level 3
Cash and Equivalents	\$14,635,802	\$14,635,802	\$—	\$—
U.S. Government Securities	57,697,142	21,218,340	36,478,802	—
Corporate Debt	5,970,983	—	5,970,983	—
Certificates of Deposit	12,555,010	—	12,555,010	—
Vuzix Corporation	1,500,777	1,500,777	—	—
GCS Holdings	180,347	180,347	—	—
	\$92,540,061	\$37,535,266	\$55,004,795	\$—

The corporate debt consists of floating rate notes with a maturity that is over multiple years but has interest rates which are reset every three months based on the then current three month London Interbank Offering Rate (three month Libor). The Company validates the fair market values of the financial instruments above by using discounted cash flow models, obtaining independent pricing of the securities or through the use of a model which incorporates the three month Libor, the credit default swap rate of the issuer and the bid and ask price spread of the same or similar investments which are traded on several markets.

The carrying amounts of cash equivalents, accounts receivable, accounts payable and accrued liabilities approximate fair value because of their short-term nature. If accrued liabilities were carried at fair value, these would be classified as Level 2 in the fair value hierarchy.

4. INVENTORY

Inventory is stated at the lower of cost (determined on the first-in, first-out) or market and consists of the following at September 26, 2015 and December 27, 2014:

	September 26, 2015	December 27, 2014
Raw materials	\$810,344	\$2,057,202
Work-in-process	1,429,702	1,551,799
Finished goods	337,704	472,885

\$2,577,750 \$4,081,886

Table of Contents**5. NET INCOME (LOSS) PER SHARE**

Basic net income (loss) per share is computed using the weighted average number of shares of common stock outstanding during the period less any non-vested restricted shares. Diluted earnings per common share, if applicable, is calculated using weighted average shares outstanding and contingently issuable shares, less weighted average shares reacquired during the period. The net outstanding shares are adjusted for the dilutive effect of shares issuable upon the assumed conversion of the Company's common stock equivalents, which consist of outstanding stock options and non-vested restricted stock units.

Weighted average common shares outstanding used to calculate earnings per share are as follows:

	Three Months Ended		Nine Months Ended	
	September 26, 2015	September 27, 2014	September 26, 2015	September 27, 2014
Weighted average common shares outstanding-basic	63,068,321	62,646,757	63,072,668	62,606,822
Stock options and non-vested restricted common stock	—	—	—	—
Weighted average common shares outstanding-diluted	63,068,321	62,646,757	63,072,668	62,606,822

The following were not included in weighted average common shares outstanding-diluted because they are anti-dilutive or performance or market conditions had not been met at the end of the period:

	Nine Months Ended	
	September 26, 2015	September 27, 2014
Non-vested restricted common stock	2,924,811	3,359,148
Stock options	—	391,100
Total	2,924,811	3,750,248

For the three and nine month periods ended September 27, 2014, the warrants to purchase 200,000 shares of the Company's common stock for \$3.49 per share were not included in weighted average common shares outstanding-diluted. These warrants were exercised during the nine month period ended September 26, 2015.

6. STOCK-BASED COMPENSATION

The fair value of non-vested restricted common stock awards is generally the market value of the Company's common stock on the date of grant. The non-vested restricted common stock awards require the employee to fulfill certain obligations, including remaining employed by the Company for one, two or four years (the vesting period) and in certain cases also require meeting either performance criteria or the Company's stock achieving a certain price. For non-vested restricted common stock awards which solely require the recipient to remain employed with the Company, the stock compensation expense is amortized over the anticipated service period. For non-vested restricted common stock awards which require the achievement of performance criteria, the Company reviews the probability of achieving the performance goals on a periodic basis. If the Company determines that it is probable that the performance criteria will be achieved, the amount of compensation cost derived for the performance goal is amortized over the anticipated service period. If the performance criteria are not met, no compensation cost is recognized and any previously recognized compensation cost is reversed. The Company recognizes compensation costs on a straight-line basis over the requisite service period for time-vested awards.

On February 13, 2015, the Company modified the termination date of certain restricted stock grants previously made to Dr. Fan, the Company's President and Chief Executive Officer. In 2011, the Company granted Dr. Fan 260,000 shares of restricted stock which will vest upon the first 10 consecutive trading day period following the grant date during which the Company's common stock trades at a price equal to or greater than \$5.25, subject to acceleration upon the occurrence of an acceleration event. This grant was originally set to terminate on September 12, 2016. In 2013, the Company granted compensation awards to Dr. Fan that consisted of two grants of 150,000 shares of restricted stock each. One of the grants will vest at the end of the first 10 consecutive trading day period following the grant date during which the Company's common stock trades at a price per share equal to or greater than \$6.00. The other award will vest at the end of the first 10 consecutive trading day period following the grant date during which the Company's common stock trades at a price per share equal to or greater than \$7.00. Both were originally due to

expire in 2023. On December 31, 2014, Dr. Fan entered into a 3-year employment agreement with the Company which expires on December 31, 2017. The Company has amended each of the foregoing grants to now terminate on December 31, 2017, to be consistent with Dr. Fan's employment agreement.

Table of Contents

A summary of stock option award activity under the equity plans as of September 26, 2015 and changes during the nine month period then ended is as follows:

	Nine Months Ended September 26, 2015	
	Shares	Weighted Average Exercise Price
Balance, December 27, 2014	130,500	\$3.49
Options forfeited/canceled	(125,358)	3.50
Options exercised	(5,142)	3.16
Balance, all exercisable, September 26, 2015	—	\$—
Non-Vested Restricted Common Stock		

A summary of the activity for non-vested restricted common stock awards as of September 26, 2015 and changes during the nine month period then ended is presented below:

	Shares	Weighted Average Grant Fair Value
Balance, December 27, 2014	2,551,631	\$3.75
Granted	1,192,400	3.80
Forfeited	(291,720)	3.65
Vested	(527,500)	3.54
Balance, September 26, 2015	2,924,811	\$3.82

Subsequent to the year ended December 27, 2014, the Company identified an error in its calculation of the weighted average grant fair value of issued restricted stock outstanding as of December 27, 2014. The Company had disclosed a weighted average grant fair value of \$4.41 in its Form 10-K for the year ended December 27, 2014, however the correct weighted average grant fair value was \$3.75. The Company has revised the amount within the period ended September 26, 2015.

Stock-Based Compensation

The following table summarizes stock-based compensation expense within each of the categories below as it relates to non-vested restricted common stock awards for the nine months ended September 26, 2015 and September 27, 2014 (no tax benefits were recognized):

	Nine Months Ended	
	September 26, 2015	September 27, 2014
Cost of component revenues	\$620,494	\$590,467
Research and development	669,605	773,106
Selling, general and administrative	1,496,395	2,191,881
Total	\$2,786,494	\$3,555,454

Unrecognized compensation expense for non-vested restricted common stock as of September 26, 2015 totaled \$5.0 million and is expected to be recognized over a weighted average period of three years.

Table of Contents**7. OTHER ASSETS AND NOTE RECEIVABLE**

During the second quarter of 2014, the Company wrote-off its \$1.3 million investment in Kobrite. Prior to the write-off, the Company accounted for its 12% ownership interest using the equity method. One of the Company's directors is a member of the Board of Directors of Bright LED, principal investor of KoBrite.

The Company has recorded a \$14.9 million note receivable resulting from the sale of its III-V product line and its investment in KTC, which is due January 16, 2016. The receivable is collateralized by certain assets of the buyer of the III-V product line. The buyer has outstanding debt and the repayment of the receivable is subject to the buyer remaining within its debt compliance obligations at the time of repayment.

As of September 26, 2015, the Company had an investment in GCS Holdings with a fair market value of \$0.2 million and an adjusted cost basis of \$0.0 million. As of December 27, 2014, GCS Holdings had a fair market value of \$0.2 million, with an adjusted cost basis of \$0.0 million.

As of December 27, 2014, the Company had an investment in Vuzix Corporation ("Vuzix") with a fair market value of \$1.5 million and adjusted cost basis of \$0.0 million. On February 25, 2015, the Company acquired approximately 251,000 shares of Vuzix common stock through a cashless exercise of warrants. The Company received the warrants in August 2013 as part of a restructuring of debt owed by Vuzix to the Company. Upon receipt of the warrants, the Company should have recorded the value of the warrant of approximately \$352,000 in its consolidated financial statements. Subsequently, the Company should have marked to market the warrants at the end of each reporting period. Had the Company recorded the warrants in its consolidated financial statements and marked to market the warrants as of December 28, 2013 and December 27, 2014, the Company would have recorded gains in its statement of operations of approximately \$646,000 and \$171,000, respectively. In the first quarter of 2015, the Company recorded the warrants in its consolidated financial statements and as a result recorded a gain of approximately \$1.3 million with \$817,000 attributed to prior periods. The value of the warrants as of August 2013, December 28, 2013 and December 27, 2014 was determined using the Black-Scholes pricing model. The Company does not believe the unrecorded gains were material to the consolidated financial statements as the loss from operations for the fiscal years ended December 28, 2013 and December 27, 2014 were \$35.9 million and \$28.5 million, respectively. As of September 26, 2015, the Company's investment in Vuzix had a fair market value of \$1.3 million with adjusted cost basis of \$0.0 million.

8. ACCRUED WARRANTY

The Company typically warrants its products against defect for 12 months. A provision for estimated future costs and estimated returns for credit relating to warranty is recorded in the period when product is shipped and revenue recognized, and is updated as additional information becomes available. The Company's estimate of future costs to satisfy warranty obligations is based primarily on historical warranty expense experienced and a provision for potential future product failures. Changes in the accrued warranty for the nine months ended September 26, 2015 are as follows:

Balance, December 27, 2014	\$716,000
Additions	481,000
Claim and reversals	(481,000)
Balance, September 26, 2015	\$716,000

9. INCOME TAXES

The Company's tax benefit of approximately \$62,500 and \$37,500 for the three and nine month period ended September 26, 2015 represents the net movement in estimated foreign withholding on anticipated future remitted earnings of an international subsidiary and state taxes. The Company's tax provision of \$44,000 and tax benefit of approximately \$62,000 for the three and nine month period ended September 27, 2014 represents the net movement in estimated foreign withholding on anticipated future remitted earnings of an international subsidiary.

As of September 26, 2015, the Company has available for tax purposes U.S. federal NOLs of approximately \$74 million expiring through 2034. The Company has recognized a full valuation allowance on its domestic and certain foreign net deferred tax assets due to the uncertainty of realization of such assets. The Company has not historically

recorded, nor does it intend to record the tax benefits from stock awards until realized. Unrecorded benefits from stock awards approximate \$10 million.

The Company's income tax returns have not been examined by the Internal Revenue Service and are subject to examination for all years since 2001. State income tax returns are generally subject to examination for a period of 3 to 5 years after filing of the respective return. The state impact of any federal changes remains subject to examination by various states for a period of up to one year after formal notification to the states.

10. SEGMENTS AND GEOGRAPHICAL INFORMATION

The Company's chief operating decision maker is its Chief Executive Officer. The Company has determined it has two reportable segments, FDD, the manufacturer of its reflective display products for test and simulation products, and Kopin, which is comprised of Kopin Corporation, Kowon, Intoware and eMDT. The following table presents the Company's reportable segment results (in thousands):

14

Table of Contents

	Three Months Ended September 26, 2015			September 27, 2014		
	Kopin	FDD	Total	Kopin	FDD	Total
Revenues	\$7,036	\$965	\$8,001	\$8,541	\$991	\$9,532
Net loss attributable to the controlling interest	(4,029)	(646)	(4,675)	(4,500)	(469)	(4,969)
	Nine Months Ended September 26, 2015			September 27, 2014		
	Kopin	FDD	Total	Kopin	FDD	Total
Revenues	\$24,800	\$2,643	\$27,443	\$18,451	\$2,720	\$21,170
Net loss attributable to the controlling interest	(6,548)	(1,184)	(7,732)	(21,603)	(1,307)	(22,910)
Total assets	113,510	1,367	114,877	125,172	1,552	126,724
Long-lived assets	3,550	92	3,642	4,856	302	5,158

The total assets of Kopin is net of \$5.8 million and \$5.0 million in intercompany loans to FDD as of September 26, 2015 and December 27, 2014, respectively.

During the three and nine month periods ended September 26, 2015 and September 27, 2014, the Company derived its sales from the following geographies (as a percentage of net revenues):

	Three Months Ended		Nine Months Ended		
	September 26, 2015	September 27, 2014	September 26, 2015	September 27, 2014	
United States	68	% 68	% 73	% 56	%
Others	—	% 3	% 1	% 1	%
Americas	68	% 71	% 74	% 57	%
Asia-Pacific	22	% 21	% 19	% 31	%
Europe	10	% 8	% 7	% 12	%
Total Revenues	100	% 100	% 100	% 100	%

11. LITIGATION

The Company may engage in legal proceedings arising in the ordinary course of business. Claims, suits, investigations and proceedings are inherently uncertain and it is not possible to predict the ultimate outcome of such matters and our business, financial condition, results of operations or cash flows could be affected in any particular period.

Table of Contents

Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995, including, without limitation, statements made relating to our expectation that we will continue to pursue other U.S. government development contracts for applications that relate to our commercial product applications; our expectation that we will prosecute and defend our proprietary technology aggressively; our belief that it is important to retain personnel with experience and expertise relevant to our business; our belief that our products are targeted towards markets that are still developing and our competitive strength is creating new technologies; our belief that it is important to invest in research and development to achieve profitability even during periods when we are not profitable; our belief that we are a leading developer and manufacturer of advanced miniature displays; our belief that our products enable our customers to develop and market an improved generation of products; our belief that the technical nature of our products and markets demands a commitment to close relationships with our customers; our belief that our wearable industrial reference design will provide for increased worker productivity, safety and improved manufacturing quality; our belief that our wearable technology will be embraced by consumers and commercial users and our ability to develop and expand our wearable technologies and to market and license our wearable technologies will be important for our revenue growth and ability to achieve profitability and positive cash flow; the impact of the timing of development of the market segment for our wearable computing products on our ability to grow revenues; our expectation that we will incur significant development and marketing costs in 2015 to commercialize our wearable technologies; our statement that we may make equity investments in companies; our expectation that the cash and marketable debt securities held by Kowon will eventually be remitted back to the U.S.; our expectation that we will purchase the shares of Kowon not currently owned by us; our expectation that the U.S. government will significantly reduce funding for programs through which we sell high margin military products; our expectation that orders for our products for use in thermal weapon sights will decline for the remainder of 2015; our expectation that customers that purchase our products for Wearable applications will launch products in 2015; our expectation that orders for our products for use in DSC applications will decline for the remainder of 2015; our expectation that sales of our products for use in 3D metrology applications will increase in 2015 as compared to 2014; our belief that a strengthening of the U.S. dollar could increase the price of our products in foreign markets; the impact of new regulations relating to conflict minerals on customer demands and increased costs related to compliance with such regulations; our belief that our future success will depend primarily upon the technical expertise, creative skills and management abilities of our officers and key employees rather than on patent ownership; our belief that our extensive portfolio of patents, trade secrets and non-patented know-how provides us with a competitive advantage in the wearable technologies market; our belief that our ability to develop innovative products enhances our opportunity to grow within our targeted markets; our belief that continued introduction of new products in our target markets is essential to our growth; our expectation that our display products will benefit from further general technological advances in the design and production of integrated circuits and active matrix LCDs, resulting in further improvements in resolution and miniaturization; our belief that our manufacturing process offers greater miniaturization, reduced cost, higher pixel density, full color capability and lower power consumption compared to conventional active matrix LCD manufacturing approaches; our expectation not to pay cash dividends for the foreseeable future and to retain earnings for the development of our businesses; our expectation that we will expend between \$2.0 million and \$3.0 million on capital expenditures over the next twelve months; our expectation that competition will increase; our belief that small form factor displays will be a critical component in the development of advanced wireless communications systems; our belief that wireless handset makers are looking to create products that complement or eventually replace wireless handsets; our belief that general technological advances in the design and fabrication of integrated circuits, LCD technology and LCD manufacturing processes will allow us to continue to enhance our display product manufacturing process; our belief that continued introduction of new products in our target markets is essential to our growth; our belief that our available cash resources will support our operations and capital needs for at least the next twelve months; our expectation that we will have taxes based on federal alternative minimum tax rules and on our foreign operations in 2015; our expectation that we will have a state

tax provision in 2015; our expectation that the adoption of certain accounting standards will not have a material impact on our financial position or results of operations; our belief that our business is not disproportionately affected by climate change regulations; our belief that our operations have not been materially affected by inflation; and our belief that the effect, if any, of reasonably possible near-term changes in interest rates on our financial position, results of operations, and cash flows should not be material. These forward-looking statements are based on current expectations, estimates, forecasts and projections about the industries in which we operate, management's beliefs, and assumptions made by management. In addition, other written or oral statements, which constitute forward-looking statements, may be made by or on behalf of us. Words such as “expects”, “anticipates”, “intends”, “plans”, “believes”, “could”, “seeks”, “estimates”, and variations of such words and similar expressions are intended to identify such forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions, which are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements, whether as a result of new information, future events or otherwise. Factors that could cause or contribute to such differences in outcomes and

Table of Contents

results include, but are not limited to, those discussed below in Item 1A and those set forth in our other periodic filings filed with the Securities and Exchange Commission. Except as required by law, we do not intend to update any forward-looking statements even if new information becomes available or other events occur in the future.

Critical Accounting Policies

Management's discussion and analysis of our financial condition and results of operations are based upon our unaudited condensed consolidated financial statements. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amount of assets, liabilities, revenues and expenses and related disclosures of contingent assets and liabilities. We continually evaluate our estimates used in the preparation of our financial statements, including those related to revenue recognition under the percentage of completion method, bad debts, inventories, warranty reserves, investment valuations, valuation of stock compensation awards and recoverability of deferred tax assets. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about carrying values of assets and liabilities that are not apparent from other sources. Actual results will most likely differ from these estimates. Further detail regarding our critical accounting policies can be found in "Item 7. Management Discussion and Analysis of Financial Condition and Results of Operations" included in our Annual Report on Form 10-K for the year ended December 27, 2014.

Business Matters

We were incorporated in Delaware in 1984 and offer Kopin Wearable technology, a collection of component technologies and software which can be integrated to create headset reference designs which use voice as the user interface and through the use of wireless technologies can contact other users or information from the cloud. Our customers can license the reference design or purchase our components individually.

Our Kowon facility is for sale and when it is sold we anticipate that a final determination of the value of the shares held by the minority shareholders will be made and we will purchase these shares. The sale of the facility does not meet the criteria for assets held for sale based on the anticipated time to sell the facility.

Kopin Wearable technology includes proprietary hardware technologies and software which can be integrated to create wearable products and reference designs which use voice as the primary user interface and through the use of wireless technologies can contact other users or information from the cloud. The headset reference designs range from a consumer-oriented headset which resembles typical eyeglasses but include voice and audio capabilities allowing the user to communicate with other users to our industrial headset reference design, called Golden-i, which is essentially a complete head-worn computer that includes an optical pod with one of our display products, a microprocessor, battery, camera, memory and various commercially available software packages that we license. Our headset reference designs utilize operating system software we developed and may include our proprietary noise cancellation technologies. The optical pod allows enterprise users to view information such as WEB data, technical diagrams, streaming video or face-to-face communication, and consumer users to view information such as emails, text messages, maps or biometric data at a comfortable "normal" size because of our specialized optics. When viewing certain information the user is capable of zooming in to see finer details or zooming out to see a larger perspective. Some headset reference designs have a camera feature which enables the consumer and enterprise users to take pictures or stream live video to a remote subject matter expert so that both the user and expert can analyze an issue at the same time and collaboratively identify and implement a solution.

We believe Kopin's Wearable technology will enable easier and more convenient access to the content individuals carry in their smartphones or "in the cloud" and will be embraced by both consumers and commercial users. For commercial users, we believe increased productivity, safety and improved manufacturing quality through more efficient issue resolution and improved communication will drive adoption. Kopin Wearable reference designs are targeted for markets where the user needs a much greater range of functionality than is typically provided by wireless devices such as handsets, smart phones, tablets or Bluetooth headsets and either due to the requirements of their usage patterns, occupation, or for improved productivity the user is better served with voice recognition as the primary interface as opposed to a touch screen or keyboard.

The components we offer include micro displays, backlights, optic, and noise cancellation technologies. Our principal display products are miniature high density color or monochrome active matrix LCDs with resolutions which range from approximately 320 x 240 resolution to 2048 x 2048 resolution sold in either a transmissive or reflective format. We sell our displays individually, in an Electronic Viewfinder (EVF) which includes a single display, backlight and optics in a plastic housing or in a Higher-Level Assembly (HLA) which contain a display, light emitting diode based illumination, optics, and electronics in a sealed housing. EVFs are sold to commercial and industrial customers and HLA's are specifically configured and sold to military customers.

Our transmissive display products, which we refer to as CyberDisplay™ products, utilize high quality, single crystal silicon-the same high quality silicon used in conventional integrated circuits. This single crystal silicon is not grown on glass; rather, it is first formed on a silicon wafer and patterned into an integrated circuit (including the active matrix, driver circuitry

Table of Contents

and other logic circuits) in an integrated circuit foundry. The silicon wafer is then sent to our Westborough, Massachusetts facility and the integrated circuit is lifted off as a thin film and transferred to glass using our proprietary Wafer™ Engineering technology, so that the transferred layer is a fully functional active matrix integrated circuit which now resides on a transparent substrate.

Our reflective LCOS displays products are miniature high density dual mode color sequential/monochrome reflective micro displays manufactured at our facility in Scotland, U.K. Our reflective displays are based on a proprietary, very high-speed, ferroelectric liquid crystal on silicon (FLCOS) platform. Our digital software and logic based drive electronics combined with the very fast switching binary liquid crystal enables our micro display to process images purely digitally and create red, green and blue gray scale in the time domain. This architecture has major advantages in visual performance over other liquid crystal, organic light-emitting diode and MEMS based technologies: precisely controlled full color or monochrome gray scale is achieved on a matrix of undivided high fill factor pixels, motion artifacts are reduced to an insignificant level and there are no sub-pixels, no moving mirrors and no analog conversions to detract from the quality of the image.

We have three sources of revenues: component revenues, which are our primary source of revenues, research and development (R&D) revenues primarily from development contracts with agencies or prime contractors of the U.S, government and commercial enterprises and license revenues from our reference designs. To date our license revenues have been de minimis. For the three and nine months ended September 26, 2015, R&D revenues were \$0.9 million and \$3.7 million, or 11.0% and 13.5% of total revenues, respectively. This contrasted with \$0.5 million and \$3.0 million, or 0.5% and 14% of total revenue for the corresponding periods in 2014.

Results of Operations

The three and nine month periods ended September 26, 2015 and September 27, 2014 are referred to as 2015 and 2014, respectively. The year ended period December 27, 2014 is referred to as fiscal year 2014.

Revenues. For the three and nine month periods ended September 26, 2015 and September 27, 2014, our revenues, which include component sales and amounts earned from research and development contracts, were as follows (in millions):

Display Revenues by Application	Three Months Ended		Nine Months Ended	
	September 26, 2015	September 27, 2014	September 26, 2015	September 27, 2014
Military	\$1.9	\$5.7	\$8.9	\$8.3
Wearable	3.5	1.7	10.6	4.8
Industrial	1.2	1.0	2.9	2.8
Consumer	0.5	0.6	1.3	2.3
Research & Development	0.9	0.5	3.7	3.0
Total	\$8.0	\$9.5	\$27.4	\$21.2

Sales of our products for Military Applications increased in 2015 as compared to 2014 because of an increase in demand from the U.S. government for our products used in thermal weapon sights. We expect orders for these products to decline for the remainder of 2015. Wearable Applications primarily represents sales of our components for products that are worn on the body for other than Military Applications. The increase in Wearable Applications revenues in 2015 as compared to 2014 is primarily the result of an increase in sales to new customers. The increase in revenues from sales of our products for Wearable Applications for the three and nine months ended September 26, 2015 was due to shipments to a customer expected to launch their product in 2015, however we do not have a definitive launch date. Sales of our products to customers that use our products for Wearable Applications is a critical part of our strategy to increase revenues and return to profitability and positive cash flow. Our success in selling our products for Wearable Applications will depend on the demand for our customers' new products, which we are unable to predict. Industrial Applications represents customers who purchase display products for use in equipment such as 3D metrology. We expect an increase in the sales of our products for use in 3D metrology applications in 2015 as compared to 2014. For the third quarter of 2015, a substantial portion of our Research & Development revenue was earned from customers funding development efforts associated with Military Applications. Consumer Applications primarily represents customers who purchase our products for digital still camera (DSC) applications. We expect

orders for our products for use in DSC applications to decline for the remainder of 2015.

We have developed headworn, voice and gesture controlled, hands-free cloud computing reference designs that have an optical pod which includes our microdisplay, a backlight and an optical lens. We refer to the headset reference designs and other technologies we have developed as Kopin Wearable technologies. We offer to license the headset reference designs and sell our components. To date licensing revenues have been de minimis and sales of our components are shown in the table above under Wearable Applications. We believe our ability to develop and expand the Kopin Wearable technologies and to

Table of Contents

market and license the Kopin Wearable technologies will be important for us to achieve revenue growth, positive cash flow and to achieve profitability. This is the first product we have developed that has a significant software component. We expect to incur significant development and marketing costs in fiscal year 2015 to commercialize the Kopin Wearable technologies.

International sales represented 27% and 43% of product revenues for the nine months ended September 26, 2015 and September 27, 2014, respectively. Our international sales are primarily denominated in U.S. currency. Consequently, a strengthening of the U.S. dollar could increase the price in local currencies of our products in foreign markets and make our products relatively more expensive than competitors' products that are denominated in local currencies, leading to a reduction in sales or profitability in those foreign markets. In addition, our Korean subsidiary, Kowon, holds U.S. dollars. As a result, our financial position and results of operations are subject to exchange rate fluctuation in transactional and functional currency. We have not taken any protective measures against exchange rate fluctuations, such as purchasing hedging instruments with respect to such fluctuations, because of the historically stable exchange rate between the Japanese yen, Korean won and the U.S. dollar.

Cost of Component Revenues.

	Three Months Ended		Nine Months Ended			
	September 26, 2015	September 27, 2014	September 26, 2015	September 27, 2014		
Cost of component revenues (in millions):	\$5.4	\$5.2	5.2	\$17.0	\$13.6	
Cost of component revenues as a % of net component revenues	75.3	% 57.4	%	71.6	% 74.6	%

For the three months ended September 26, 2015 cost of component revenues, which is comprised of materials, labor and manufacturing overhead related to the production of our products, increased as a percentage of revenues in 2015 as compared to 2014 due a decrease in sales of military products which have higher gross margins as compared to our other products and the under absorption of fixed costs. For the nine months ended September 26, 2015 cost of component revenues, which is comprised of materials, labor and manufacturing overhead related to the production of our products, decreased as a percentage of revenues in 2015 as compared to 2014 due an increase in sales of products for Wearable Application.

Research and Development. Research and development (R&D) expenses are incurred in support of internal development programs or programs funded by agencies or prime contractors of the U.S. government and commercial partners. In fiscal year 2015, our R&D expenditures will be related to our display products and wearable technologies. R&D revenues associated with funded programs are presented separately in revenue in the statement of operations. Research and development costs include staffing, purchases of materials and laboratory supplies, circuit design costs, fabrication and packaging of display products, and overhead. For the three and nine months ended September 26, 2015 and September 27, 2014, R&D expense was as follows (in millions):

	Three Months Ended		Nine Months Ended	
	September 26, 2015	September 27, 2014	September 26, 2015	September 27, 2014
Funded	\$0.7	\$1.0	\$2.8	\$3.3
Internal	3.3	3.8	11.0	11.8
Total research and development expense	\$4.0	\$4.8	\$13.8	\$15.1

Funded R&D expense for the three and nine months ended September 26, 2015 decreased as compared to the prior year due to a reduction in programs with customers developing products for Wearable Application. The decrease occurred because customer either discontinued the program or the products moved into the commercialization phase. For the three and nine months ended September 26, 2015, Internal R&D costs were essentially flat as compared to the same period in 2014.

Selling, General and Administrative. Selling, general and administrative (S,G&A) expenses consist of the expenses incurred by our sales and marketing personnel and related expenses, and administrative and general corporate expenses.

Edgar Filing: KOPIN CORP - Form 10-Q

	Three Months Ended		Nine Months Ended		
	September 26, 2015	September 27, 2014	September 26, 2015	September 27, 2014	
Selling, general and administration expense (in millions):	\$4.6	\$5.0	\$14.1	\$14.9	
Selling, general and administration expense as a % of revenues	57.0	% 52.6	% 51.2	% 70.5	%

19

Table of Contents

S,G&A decreased for the three months ended September 26, 2015 as compared to the same period in 2014 reflecting decrease in professional fees and stock-based compensation expenses which were partially offset by higher patent and insurance costs. S,G&A expenses decreased for the first nine months of 2015 as compared to the same period in 2014 primarily as a result of lower professional fees and stock-based compensation expenses which were partially offset by higher information technology expenses. Patent expenses for the three and nine months ended September 26, 2015 were \$0.6 million and \$1.5 million respectively as compared to \$0.3 million and \$1.2 million for the corresponding periods in 2014.

Other Income and Expense

	Three Months Ended		Nine Months Ended	
	September 26, 2015	September 27, 2014	September 26, 2015	September 27, 2014
Other income and expense (in millions):	\$1.2	\$0.5	\$9.6	\$(0.6)

Other income and expense, net, is primarily composed of interest income, foreign currency transaction and remeasurement gains and losses incurred by our Korean and UK-based subsidiaries and gains and losses resulting from the impairment or sale of investments. During the three and nine months ended September 26, 2015 we sold investments and recorded \$0.4 million and \$8.0 million of gains, respectively. The \$0.4 million gain on sale of investment for the three month period ended September 26, 2015 resulted from the sale of shares in an investment in a public company.

During the three months ended September 26, 2015 and September 27, 2014, we recorded \$0.6 million and \$0.2 million of foreign currency gains, respectively. During the nine months ended September 26, 2015, we recorded a non-cash gain of \$1.3 million as a result of recording warrants determined to be derivative assets. We received the warrants in August 2013 as part of a restructuring of debt owed by Vuzix Corporation to us. Upon receipt of the warrants, we should have recorded the value of the warrants of approximately \$352,000 in our consolidated financial statements. Subsequently, we should have marked to market the warrants at the end of each reporting period. Had we recorded the warrants in our consolidated financial statements and marked to market the warrants as of December 28, 2013 and December 27, 2014, we would have recorded gains in our statement of operations of approximately \$646,000 and \$171,000, respectively. In the first quarter of 2015, we recorded the warrants in our consolidated financial statements and as a result recorded a gain of approximately \$1.3 million with \$817,000 attributed to prior periods.

Equity Losses in Unconsolidated Affiliates. For the nine months ended September 27, 2014, the equity loss in unconsolidated affiliate consists of our approximate 12% share of the losses of KoBrite, incurred prior to our writing the investment off in the second quarter of 2014.

Tax Provision. For the three and nine months ended September 26, 2015, we recorded a tax benefit of \$62,500 and \$37,500, respectively, for estimated state taxes offset by movement in estimated foreign withholding on anticipated future remitted earnings of an international subsidiary, as compared to a tax provision of \$44,000 and a tax benefit of \$62,000 respectively, for the three and nine months ended September 27, 2014. The tax benefit recorded for the nine month period ended September 27, 2014 was a result of the net movement in estimated foreign withholding on anticipated future remitted earnings of an international subsidiary.

Net Income Attributable to Noncontrolling Interest. As of September 26, 2015, we owned approximately 93% of the equity of Kowon, approximately 58% of the equity of Intoware, and 80% of the equity of eMDT. Net loss attributable to noncontrolling interest on our consolidated statement of operations represents the portion of the results of operations of our majority owned subsidiaries which is allocated to the shareholders of the equity interests not owned by us. The change in net income attributable to noncontrolling interest is the result of the change in the results of operations of Kowon, Intoware and eMDT for the three and nine month period ended September 26, 2015. In October 2015, we acquired the remaining equity of Intoware for £1 as part of a transaction in which we contributed two software products for 17.5% equity ownership in a new company formed to commercialize the software products. On November 3, 2015 we issued a press release with preliminary results of operations for the three and nine months ended September 26, 2015. Subsequent to the release we finalized our results of operations for the three and nine months ended September 26, 2015. The final results differ from the preliminary amounts by a reduction in the amount

reported as a gain on sale of investments of approximately \$151,000 and an increase in the tax benefit of \$75,000.

Liquidity and Capital Resources

As of September 26, 2015, we had cash and equivalents and marketable securities of \$87.3 million and working capital of \$96.3 million compared to \$90.9 million and \$86.7 million, respectively, as of December 27, 2014. The change in cash and

20

Table of Contents

equivalents and marketable securities was primarily due to net outflow of cash used in operating activities of \$10.1 million, offset by cash provided by investing activities of \$11.0 million.

Cash and marketable debt securities held in U.S. dollars:

Domestic	\$74,921,620
Foreign	10,763,928
Subtotal cash and marketable debt securities	85,685,548
Cash and marketable debt securities held in other currencies and converted to U.S. dollars	1,653,909
Total cash and marketable debt securities	\$87,339,457

We have no plans to repatriate the cash and marketable debt securities held in our foreign subsidiaries FDD and Intoware and, as such, we have not recorded any deferred tax liability with respect to such cash. The operations at our Korean facility, Kowon, have ceased. Kowon has approximately \$12.0 million of cash and marketable debt securities which we anticipate will eventually be remitted to the U.S. and, accordingly, we have recorded deferred tax liabilities associated with its unremitted earnings.

We lease facilities located in Westborough, Massachusetts, Santa Clara, California and Scotts Valley, California under non-cancelable operating leases. The Westborough, Santa Clara and the Scotts Valley leases expire in 2023, 2016 and 2015, respectively.

We lease a facility in Dalgety Bay, Scotland which expires in 2016, and also lease two facilities in Nottingham, United Kingdom, which expire in 2016 and 2017, respectively.

We expect to expend between \$2 million and \$3 million on capital expenditures over the next twelve months.

As of September 26, 2015, we had U.S. federal and state tax loss carry-forwards, which may be used to offset U.S. future federal and state taxable income. We also had tax loss carry-forwards generated in our foreign subsidiaries which may be used to offset future foreign taxable income. We may be subject to alternative minimum taxes, foreign taxes and state income taxes depending on our taxable income and sources of taxable income.

Historically, we have financed our operations primarily through public and private placements of our equity securities and cash generated from operations. We believe our available cash resources will support our operations and capital needs for at least the next twelve months.

Seasonality

There has been no seasonal pattern to our sales in fiscal years 2015 and 2014.

Contractual Obligations

The following is a summary of our contractual payment obligations for operating leases as of September 26, 2015:

Contractual Obligations	Total	Less than 1 year	1-3 Years	3-5 years	More than 5 years
Operating Lease Obligations	\$5,837,207	\$ 1,182,891	-\$2,205,816	\$1,915,167	693 \$ 533,333

Item 3. Quantitative and Qualitative Disclosures about Market Risk

We invest our excess cash in high-quality U.S. government, government-backed (Fannie Mae, FDIC guaranteed bonds and certificates of deposit) and corporate debt instruments, which bear lower levels of relative risk. We believe that the effect, if any, of reasonably possible near-term changes in interest rates on our financial position, results of operations, and cash flows should not be material to our cash flows or income. It is possible that interest rate movements would increase our unrealized gain or loss on interest rate securities. We are exposed to changes in foreign currency exchange rates primarily through our translation of our foreign subsidiaries' financial position, results of operations, and transaction gains and losses as a result of non U.S. dollar denominated cash flows related to business activities in Asia and Europe, and remeasurement of U.S. dollars to the functional currency of our U.K. and Kowon subsidiaries. We are also exposed to the effects of exchange rates in the purchase of certain raw materials which are in U.S. dollars but the price on future purchases is subject to change based on the relationship of the Japanese Yen to the U.S. dollar. We do not currently hedge our foreign currency exchange rate risk. We estimate that any market risk associated with our international operations is unlikely to have a material adverse effect on our business, financial condition or results of operation. Our portfolio of marketable debt securities is subject to interest rate risk although our intent is to hold securities until maturity. The credit rating of our investments may be affected by the underlying

financial health of the guarantors of our investments. We use silicon wafers but do not enter into forward or futures hedging contracts.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Based on an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, as of the end of the period covered by this Quarterly Report on Form 10-Q, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) were not effective. This conclusion was based on the existence of the material weakness in our internal control over financial reporting previously disclosed and discussed below and as more fully discussed in our Annual Report on Form 10-K for the year ended December 27, 2014.

As disclosed in our Annual Report on Form 10-K, Item 9A, for the year ended December 27, 2014, our management concluded that our internal control over financial reporting was not effective at December 27, 2014. We are actively engaged in the implementation of a remediation plan to ensure that controls contributing to this material weakness are designed appropriately and will operate effectively. We expect that our remediation efforts will continue, although the material weakness will not be considered remediated until our controls are operational for a period of time, tested and management concludes that these controls are operating effectively.

Notwithstanding the identified material weakness and management's assessment that internal control over financial reporting was ineffective as of September 26, 2015, management believes that the consolidated financial statements contained in this Quarterly Report on Form 10-Q fairly present, in all material respects, our financial condition, results of operations and cash flows for the periods presented in conformity with accounting principles generally accepted in the United States of America.

Changes in Internal Control over Financial Reporting

There were no changes in the Company's internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Exchange Act Rules 13a-15 or 15d-15 that was conducted during the quarter ended September 26, 2015 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting, except for our remediation efforts described above.

Part II. OTHER INFORMATION

Item 1. Legal Proceedings

We may engage in legal proceedings arising in the ordinary course of business. Claims, suits, investigations and proceedings are inherently uncertain and it is not possible to predict the ultimate outcome of such matters and our business, financial condition, results of operations or cash flows could be affected in any particular period.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A. "Risk Factors" in our Annual Report on Form 10-K for our fiscal year ended December 27, 2014. The risks discussed in our Annual Report on Form 10-K could materially affect our business, financial condition and future results. The risks described in our Annual Report on Form 10-K are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially and adversely affect our business, financial condition or operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Sale of Unregistered Securities

In the past three years we have not sold any securities which were not registered under the Securities Act.

Use of Proceeds

The information required by this item regarding use of proceeds by the Company is reported herein in Part 1, Item 2 under "Liquidity and Capital Resources".
