Registrant's telephone number, including area code: (630) 505-3700

Date of fiscal year end: December 31

Date of reporting period: December 31, 2007

Form N-CSR is to be used by management investment companies to file reports with the Commission not later than 10 days after the transmission to stockholders of any report that is required to be transmitted to stockholders under Rule 30e-1 under the Investment Company Act of 1940 (17 CFR 270.30e-1). The Commission may use the information provided on Form N-CSR in its regulatory, disclosure review, inspection, and policymaking roles.

A registrant is required to disclose the information specified by Form N-CSR, and the Commission will make this information public. A registrant is not required to respond to the collection of information contained in Form N-CSR unless the Form displays a currently valid Office of Management and Budget ("OMB") control number. Please direct comments concerning the accuracy of the information collection burden estimate and any suggestions for reducing the burden to Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549-0609. The OMB has reviewed this collection of information under the clearance requirements of 44 U.S.C. Section 3507.

ITEM 1. REPORTS TO STOCKHOLDERS.

The registrant's annual report transmitted to shareholders pursuant to Rule 30e-1 under the Investment Company Act of 1940, as amended (the "Investment Company Act") is as follows:

The shareholder report you are reading right now is just the beginning of the story. Online at [WWW.OLDMUTUALCLAYMORE.COM](http://WWW.OLDMUTUALCLAYMORE.COM), you will find:

- Daily, weekly and monthly data on share prices, distributions and more
- Portfolio overviews and performance analyses
- Announcements, press releases and special notices
- Fund and adviser contact information

Analytic Investors, LLC and Claymore are continually updating and expanding shareholder information services on the Fund's website, in an ongoing effort to provide you with the most current information about how your Fund's assets are managed, and the results of our efforts. It is just one more way we are working to keep you better informed about your investment in the Fund.

OLA | Old Mutual/Claymore Long-Short Fund

Dear SHAREHOLDER

We are pleased to submit the annual shareholder report for the Old Mutual/Claymore Long-Short Fund (the "Fund") for the 12 months ended December 31, 2007. As you may know, the Fund's investment objective is to provide a high level of current income and gains with a secondary objective of long-term capital appreciation. The Fund seeks to achieve these objectives by investing in a diversified portfolio of common stocks and other equity securities utilizing a long/short strategy and opportunistically employing a strategy of writing (selling) calls on equity indices and, to a lesser extent, on individual securities. The Fund also seeks to enhance returns through an asset allocation strategy that involves purchasing or selling futures contracts on U.S. or foreign securities indices, foreign currencies and other assets.

Analytic Investors, LLC ("Analytic") is the Fund's Sub-Adviser. The firm, established in 1970, is an affiliate of Old Mutual (US) Holdings Inc., more commonly known as Old Mutual Asset Management. Analytic specializes in the creation and continuous management of optioned-equity and optioned-debt portfolios for mutual funds, foundations, insurance companies, endowments, profit-sharing plans, funds of hedge funds, and individual investors. As of December 31, 2007, Analytic managed or supervised approximately \$12.5 billion in assets.

We believe that the Fund provides shareholders with the potential to outperform the S&P 500 Index over full market cycles through its unique multi-strategy approach to investing. Analytic has employed the Fund's strategy for nearly three decades in other investment products for institutional and retail investors. While the Fund's options overlay has similarities to a covered call fund, the Fund's long/short equity security selection and its asset allocation makes it different. We believe that this multi-strategy approach provides opportunities unavailable in a traditional covered call fund and provides the potential for high returns over time.

All Fund returns cited - whether based on net asset value ("NAV") or market price - assume the reinvestment of all distributions. For the 12 months ended December 31, 2007, the Fund provided a total return based on market price of -8.45%. This represents a closing market price of \$15.33 on December 31, 2007, versus \$18.33 on December 31, 2006. On an NAV basis, the Fund generated a total return of 2.54%. This represents a NAV of \$17.79 on December 31, 2007, versus \$18.89 on December 31, 2006. The Fund's market price at December 31, 2007, represented a discount to NAV of 13.83%; as of December 31, 2006, the share price was at a 2.96% discount to NAV. We believe that the Fund's market price discount to NAV represents an opportunity, as common shares of the Fund are now available in the market at prices below the value of the securities in the underlying portfolio.

We encourage shareholders to consider the opportunity to reinvest their distributions from the Fund through the Dividend Reinvestment Plan ("DRIP"), which is described in detail on page 26 of the Fund's annual report. When shares trade at a discount to NAV, the DRIP takes advantage of the discount by reinvesting the quarterly dividend distribution in common shares of the

Annual Report | December 31, 2007 | 3

OLA | Old Mutual/Claymore Long-Short Fund | DEAR SHAREHOLDER continued

Fund purchased in the market at a price less than NAV. Conversely, when the market price of the Fund's common shares is at a premium above NAV, the DRIP reinvests participants' dividends in newly-issued common shares at NAV, subject to an IRS limitation that the purchase price cannot be more than 5% below the market price per share. The DRIP provides a cost-effective means to accumulate additional shares and enjoy the benefits of compounding returns over time. Since the Fund endeavors to maintain a steady quarterly distribution rate, the DRIP plan effectively provides an income averaging technique, which causes shareholders to accumulate a larger number of Fund shares when the market price is depressed than when the price is higher.

The Fund's most recent quarterly dividend of \$0.40, declared on December 3, 2007, represents an annualized distribution rate of 10.44%, based on the Fund's closing market price of \$15.33 on December 31, 2007.

To learn more about the Fund's performance and investment strategy, we encourage you to read the Questions & Answers section of the report, which begins on page 5. You will find information about Analytic's investment philosophy and discipline, its views on the market environment and how it structured the Fund's portfolio based on its views.

We appreciate your investment and look forward to serving your investment needs in the future. For the most up-to-date information on your investment, please visit the Fund's website at [www.oldmutualclaymore.com](http://www.oldmutualclaymore.com).

Sincerely,

/s/ Nicholas Dalmaso

#### QUESTIONS & ANSWERS

DENNIS M. BEIN, CFA  
CHIEF INVESTMENT OFFICER, PORTFOLIO MANAGER  
ANALYTIC INVESTORS, LLC

As Chief Investment Officer, Dennis Bein oversees the implementation of Analytic's investment strategies. He is a major contributor to the firm's ongoing research efforts as well as to the new product development efforts and strategy applications. As Portfolio Manager, Bein directs the Fund's management team on day-to-day portfolio management and research related to the Fund's equity-based investment strategies. Bein joined Analytic in 1995, and has worked as investment professional since 1990. He is a CFA charterholder and earned an M.B.A. from the Anderson Graduate School of Management at the University of California, Riverside.

The Old Mutual/Claymore Long-Short Fund (the "Fund") is managed by Analytic Investors, LLC. In the following interview, Chief Investment Officer and Portfolio Manager Dennis Bein, CFA, explains the factors that impacted the Fund's performance for the annual period ended December 31, 2007.

-----  
BEFORE WE DISCUSS PERFORMANCE, WILL YOU REMIND US OF THE FUND'S INVESTMENT OBJECTIVES AND EXPLAIN HOW YOUR INVESTMENT STRATEGY SEEKS TO ACHIEVE THOSE OBJECTIVES?

The Fund's primary investment objective is to provide a high level of current income and gains, with a secondary objective of long-term capital appreciation. The Fund seeks to achieve these objectives by investing in a diversified portfolio of common stocks and other equity securities, utilizing a long and short strategy and opportunistically employing a strategy of writing (selling) calls on equity indices, sectors and, to a lesser extent, on individual securities.

We utilize quantitative models to develop an equity portfolio that offers the potential for capital appreciation over time. The portfolio is constructed with a level of diversification and risk similar to that of the S&P 500, but is designed with the objective of outperforming the index over a full market cycle by having its long positions invested in the stocks that we believe will outperform, while selling short the stocks that we believe will underperform. To generate income and help reduce volatility, we then apply a call options overlay. Finally, to potentially enhance returns, we also engage in asset allocation strategies by purchasing or selling futures contracts on U.S. or foreign securities indices as well as foreign currency forward contracts and other assets.

-----  
WILL YOU TELL US MORE ABOUT THE SPECIFICS OF YOUR PROCESS?

There are three components of the strategy that we believe make the Fund unique among covered call funds.

**STOCK SELECTION.** We begin by analyzing stock characteristics rather than focusing on individual stocks as many investment managers do. Our quantitative review is based on sophisticated mathematical models focused on variables that cover multiple dimensions of a stock's value, such as its valuation, growth potential, historical return patterns, liquidity and risk. The models identify characteristics that investors are currently rewarding or punishing by examining a universe of approximately 3,000 stocks to determine which financial characteristics are shared by the market's largest gaining or losing stocks. Stocks possessing favorable characteristics are ranked and become candidates for the long portfolio. Stocks that possess unfavorable characteristics are candidates for the short portfolio. Ultimately a portfolio of at least 75 highly-ranked stocks is combined with short positions of at least 20 low-ranked stocks. We monitor the portfolio on a real-time basis using our proprietary management system, which identifies media events or changes in fundamental factors that are potentially significant for the portfolio holdings. However, we trade securities only when we believe the incremental return potential will exceed the associated transaction costs.

**OPTIONS OVERLAY.** Our process is unique because we typically do not write (sell) call options on individual securities as a traditional covered call fund might. We prefer to sell options on indices because we have strong convictions about the stocks held in the Fund's portfolio. This strategy helps preserve the upside potential of the Fund's individual equity holdings, which is more important to us than giving away the upside potential of the market sectors on which we have written the calls. We believe giving away market or sector upside potential in exchange for lower overall volatility and a higher yield provided by the call options premiums benefits the Fund.

**ASSET ALLOCATION.** We also engage in asset allocation strategies for the Fund by purchasing or selling futures contracts on U.S. or foreign securities indices,

foreign currencies and other assets. This enables us to attempt to enhance Fund returns, to hedge against market and other risks in the portfolio and to obtain market exposure with reduced transaction costs. Essentially we take long and short equity, fixed-income and currency futures positions based on our global research models.

---

WHAT IS A SHORT SALE?

A short sale is three-step trading strategy that seeks to capitalize on an anticipated decline in the price of a security. First, arrangements are made to borrow shares of the security, typically from a broker. Next, the investor will sell the borrowed shares immediately in the open market with the intention of buying them back at some point in the future. Finally, to complete the cycle, at a later date the investor will repurchase the shares (hopefully at a lower price) and will return them to the lender. In the end, the investor will receive the difference if the share price falls, but will of course incur a loss if it rises.

---

Annual Report | December 31, 2007 | 5

OLA | Old Mutual/Claymore Long-Short Fund | QUESTIONS & ANSWERS continued

WHAT IS AN INDEX OPTION?

An index option is a contract which gives the buyer the right to participate in market gains over and above (in the case of a call) or below (in the case of a put) a specified price (the strike price) on or before a pre-determined date (the expiration date). After this pre-determined date, the option and its corresponding rights expire. For example, the seller of an index call option is obligated, until the expiration date, to pay the holder of the option the difference between the index price and the option's strike price, upon the holder's request. The price of the option is determined from trading activity in the options market and generally reflects the relationship between the current price for the index and the strike price, as well as the time remaining until the expiration date.

---

WILL YOU PROVIDE AN OVERVIEW OF EQUITY MARKETS DURING 2007?

It was a generally positive period for the U.S. equity market, although with considerable volatility, especially in the last few months of the year. Except for a period of weakness in late February and early March, equity markets were quite strong during the first half of 2007. By the end of May, most indices were at or near their all-time highs, and positive trends continued through mid-July.

As the third quarter developed, there was a sharp reversal, as liquidity concerns and problems in the sub-prime mortgage market created severe market turbulence. A rally in September was sparked in part by the first of the Federal Reserve Board's three interest rate reductions. Volatility increased and most indices were down in the fourth quarter, as markets responded to further bad news about the potential impact of the sub-prime mortgage crisis.

There was a major change in market leadership in 2007: after a long period during which small-cap stocks generally outperformed large-cap stocks, large-cap stocks regained market leadership, as investors became less comfortable with risk. Growth stocks performed much better than value stocks during 2007, especially in the last half of the year.

---

HOW DID THE FUND PERFORM IN THIS ENVIRONMENT?

The Fund successfully met its primary investment objective of generating a high level of current income through a combination of net investment income and net realized gains. The Fund provided investors with consistent quarterly distributions of \$0.40 per share during 2007. This represents an annualized distribution rate of 10.44% based upon the closing market price of \$15.33 on December 31, 2007. Each of the distributions was accompanied by a letter detailing the source of the distribution. (These letters are also posted on the Fund's web site.) However, a final determination of the components of the Fund's distributions for tax purposes will be made in January 2008 after the end of the Fund's fiscal year.

All Fund returns cited - whether based on net asset value ("NAV") or market price - assume the reinvestment of all distributions. For the 12 months ended December 31, 2007, the Fund provided a total return based on market price of -8.45% and 2.54% on an NAV basis. On December 31, 2007, the Fund's closing market price was \$15.33, which represented a discount of 13.83% to NAV of \$17.79. On December 31, 2006, the Fund's market price closed at \$18.33 and its NAV was \$18.89, reflecting a discount of 2.96%.

As most investors may know, the market value of the Fund's shares fluctuates from time to time, and it may be higher or lower than the Fund's NAV. The current discount to NAV may provide an opportunity for suitable investors to purchase shares of the Fund below the market value of the securities in the underlying portfolio. We believe that, over the long term, the progress of the NAV will be reflected in the market price return to shareholders.

The Fund's return was below returns of the S&P 500 Index, which returned 5.49%, and the CBOE S&P 500 BuyWrite Index ("BXM"), which returned 6.55%. The BXM is an index that simulates an ongoing covered call strategy on the S&P 500 Index (the "S&P 500") and consists of an unmanaged portfolio of stocks upon which a one-month at-the-money call option on the S&P 500 is continuously written. When comparing the Fund's performance to the S&P 500 and BXM, it is important to remember that while the Fund invests primarily in domestic equities, it also employs an options overlay and asset allocation strategies. The Fund's options program and its asset allocation strategies detracted from performance during 2007.

---

WILL YOU TELL US ABOUT THE CHARACTERISTICS FAVORED BY YOUR QUANTITATIVE MODEL DURING THE FIRST HALF OF 2007?

Analytic Investors' process is based on the fundamental belief that there is persistency in the types of stock characteristics investors prefer, and we believe that portfolios that reflect these biases will add value in the long run.

During the first half of 2007, investors favored certain valuation characteristics, such as sales-to-price, cash-flow-to-price and earnings-to-price ratios, while avoiding companies with above-average dividend yields. Lower quality companies outperformed higher quality companies during the

period, and companies with above average price momentum underperformed. (Our definition of quality is based on a number of factors such as financial strength and profitability; it is intended to reflect the market's overall view of quality.)

In the last half of the year, the more growth-oriented factors in our model became more important, as investors began paying more attention to historical and recent earnings per share growth, and price momentum returned to favor. Stocks with above-

6 | Annual Report | December 31, 2007

OLA | Old Mutual/Claymore Long-Short Fund | QUESTIONS & ANSWERS continued

average dividend yields underperformed, as did stocks with above-average trading volume. Our process was able to adapt to these changes in the equity market, and the equity portion of the Fund outperformed the S&P 500 Index during 2007.

-----  
WHICH DECISIONS REGARDING THE COMMON EQUITY PORTFOLIO HAD THE GREATEST POSITIVE IMPACT ON PERFORMANCE?

Stock selection was positive within the majority of economic sectors, with the strongest contributions in the health care, financials, and telecommunication services sectors. A long position in Medco Health Solutions Inc. (0.9% of total common stocks and securities sold short), contributed to performance, as the pharmacy benefits manager continued to report strong earnings and reiterated its positive expectations for 2008.

A short position in Boston Scientific Corporation (0.4% of total common stocks and securities sold short) also helped performance, as shares of the medical device manufacturer fell during the latter half of the year as the company aggressively cut jobs and reported a significant third-quarter loss. Short positions in the financials sector added to performance, as this sector weakened. A short position in Citigroup Inc. (not held in the portfolio at period end) contributed, as the financial services firm suffered a downgrade by analysts who estimated the company would likely have to take as much as \$15 billion in write-downs over the next two quarters due to bets on risky debt. Also positive was a short position in bond insurer MBIA Inc. (0.2% of total common stocks and securities sold short); this stock dropped amid concerns that bond insurers may have to raise new capital or take other steps to maintain credit ratings. MBIA also disclosed it had insured \$8.1 billion in CDOs-squared, which are collateralized debt obligations backed by a combination of other CDOs and mortgages, with \$5.1 billion of that insurance written in 2006 and 2007, a time when the problems with sub-prime borrowers were emerging.

-----  
WHICH AREAS OF THE EQUITY PORTFOLIO HURT PERFORMANCE?

Detracting from performance was a long position in Electronic Data Systems Corp. (0.6% of total common stocks and securities sold short), an information technology services company, which moved lower over analyst concerns regarding lower bookings and free cash flow.

A long position is Office Depot, Inc. (less than 0.1% of total common stocks and

securities sold short) hurt performance as the stock moved lower on disappointing earnings and concerns about possible accounting irregularities.

A long position in Tyson Foods, Inc. (0.5% of total common stocks and securities sold short) detracted from performance as the world's largest meat processor lowered its 2007 earnings guidance after it was hit hard by higher beef and pork prices.

A short position in First Data Corporation (not held in the portfolio at period end) also negatively impacted performance as the financial services company soared on news of a \$26 billion takeover bid from private equity firm Kohlberg Kravis Roberts & Co.; this transaction was completed in September 2007.

In addition, a short position in Juniper Networks (not held in the portfolio at period end) hurt as the networking equipment company stock rallied on the news of a second-quarter profit, prompting analysts to release positive comments and upgrade the stock.

-----  
WHAT WAS THE IMPACT ON PERFORMANCE OF THE OPTIONS AND ASSET ALLOCATION PROGRAMS?

The net effect of the options program was negative during the period, as would be anticipated when equity markets are up. The global asset allocation strategy also detracted from returns during the year. The third quarter proved particularly difficult, as the market turbulence experienced in the U.S. was felt worldwide in equity markets and currency markets. The equity component posted negative results during the third quarter, as the Fund had short positions in most Asia-Pacific markets, which were up, and long positions in most European markets, which were down. The Fund's positioning was based on our desire to gain exposure to two of our strongest-performing equity factors: earnings yield and earnings yield minus bond yield. Losses resulted primarily from negative returns on those two factors.

The currency portfolio also experienced losses mainly because of our interest differential factor, as we had positive exposure to currencies such as the Australian dollar which had high interest rates and short positions in lower interest rate currencies such as the Swiss franc and Japanese yen. The interest differential factor is an element of our model that involves taking long or short positions in various currencies depending on their relative short-term interest rates with the expectation that currencies with higher interest rates will hold their value or appreciate relative to those with lower rates. During the period covered by this report, the interest differential factor led to losses because of appreciation of currencies with lower interest rates in which the Fund held short positions relative to currencies with higher interest rates in which the fund held long positions.

While historically this has been our best performing factor in the global asset allocation strategy, in an environment of increasing volatility such as that experienced in the last few months of 2007, this factor generally produces negative returns. The volatility of the G7 currencies was near historical highs during the period. (The G7 currencies are currencies of seven industrialized nations that meet periodically to achieve a cooperative effort on international economic and monetary issues. The countries are France, Germany, Italy, Japan, the U.K., Canada and the U.S., and the currencies are the euro, the British pound, the Japanese yen, and the U.S. and Canadian dollars.)

-----  
WHAT IS YOUR OUTLOOK FOR THE MARKET AND THE FUND IN THE MONTHS AHEAD?

With the U.S. economy apparently teetering on the brink of recession, and the ultimate impact of credit problems still unclear, it is a time to approach investment decisions with caution. We believe that the Fund's structure, with a long and short equity portfolio, an index options program to preserve upside potential of individual securities, and an asset allocation strategy for exposure to world markets has the potential to provide attractive returns in a wide variety of market conditions.

Analytic intends to continue to emphasize stocks with above-average sales-per-share ratios. We intend also to focus on select companies with strong recent and projected earnings growth, while de-emphasizing companies with higher-than-average dividend yields. We anticipate continuing to seek to emphasize companies with above-average price momentum, while de-emphasizing companies with high financial leverage and above average trading volume.

-----  
OLA RISKS AND OTHER CONSIDERATIONS

As with any stock, the price of the Fund's Common Shares will fluctuate with market conditions and other factors. Shares of closed-end management investment companies frequently trade at a discount from their net asset value. If you sell your common shares, you may receive more or less than your original investment. The common shares are designed for long-term investors and should not be treated as a vehicle for trading.

The Fund will ordinarily have substantial exposure (both long and short) to common stocks and other equity securities in pursuing its investment objectives and policies. The market price of common stocks and other equity securities in which the Fund invests may go up or down, sometimes rapidly or unpredictably. Equity securities may decline in value due to factors affecting equity securities markets generally, particular industries represented in those markets or the issuer itself.

The Fund makes substantial use of short sales for investment and risk management purposes, including when Analytic anticipates that the market price of securities will decline or will underperform relative to other securities held in the Fund's portfolio. The Fund intends to take short equity positions in an amount equal to approximately 30% of the Fund's net assets at the time of sale, but reserves the flexibility to hold short positions of up to 70% of net assets. Short sales are transactions in which the Fund sells a security or other instrument (such as an option, forward, futures or other derivative contract) that it does not own. When the Fund engages in a short sale on a security, it must borrow the security sold short and deliver it to the counterparty. The Fund will ordinarily have to pay a fee or premium to borrow particular securities and be obligated to repay the lender of the security any dividends or interest that accrue on the security during the period of the loan. The amount of any gain from a short sale will be decreased, and the amount of any loss increased, by the amount of the premium, dividends, interest or expenses the Fund pays in connection with the short sale. Short sales expose the Fund to the risk that it will be required to cover its short position at a time when the securities have appreciated in value, thus resulting in a potentially unlimited loss to the Fund.

The distributions shareholders receive from the Fund are based primarily on the dividends it earns from its equity investments as well as the gains the Fund

receives from writing options and using other derivative instruments, closing out short sales and selling portfolio securities, each of which can vary widely over the short and long term. The dividend income from the Fund's investments in equity securities will be influenced by both general economic activity and issuer-specific factors. In the event of a recession or adverse events affecting a specific industry or issuer, an issuer of equity securities held by the Fund may reduce the dividends paid on such securities. If prevailing market interest rates decline, interest rates on any debt instruments held by the Fund, and shareholders' income from the Fund, would likely decline as well. Please see the "Distributions" section of the Prospectus for a description of other risks associated with the level, timing and character of the Fund's distributions.

There are various risks associated with the Option Strategy. The purchaser of an index option written by the Fund has the right to any appreciation in the cash value of the index over the strike price on the expiration date. Therefore, as the writer of an index call option; the Fund forgoes the opportunity to profit from increases in the index over the strike price of the option. However, the Fund has retained the risk of loss (net of premiums received) should the price of the Fund's portfolio securities decline. Similarly, as the writer of a call option on an individual security held in the Fund's portfolio, the Fund forgoes, during the option's life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the strike price of the call but has retained the risk of loss (net of premiums received) should the price of the underlying security decline. The value of options written by the Fund, which will be priced daily, will be affected by, among other factors, changes in the value of underlying securities (including those comprising an index), changes in the dividend rates of underlying securities, changes in interest rates, changes in the actual or perceived volatility of the stock market and underlying securities and the remaining time to an option's expiration. The value of an option also may be adversely affected if the market for the option is reduced or becomes less liquid.

An investment in the Fund is subject to certain risks and other considerations, including, but not limited to: Equity Risk; Short Sale Risk; Options Risk, Management Risk; Tax Treatment of Distributions; Derivatives Risk; Counterparty Risk; Credit Risk; Income Risk; Medium- and Smaller-Company Risk; Focused Investment Risk; Interest Rate Risk; Liquidity Risk; Market Disruption and Geopolitical Risk; Leverage Risk; Foreign Investment Risk; Other Investment Companies Risk; and Inflation/Deflation Risk.

\* Commencement of investment operations.

- (a) Before deduction of offering expenses charged to capital.
- (b) Based on average shares outstanding during the period.
- (c) Total investment return is calculated assuming a purchase of a common share at the beginning of the period and a sale on the last day of the period reported either at net asset value ("NAV") or market price per share. Dividends and distributions are assumed to be reinvested at NAV for NAV returns or the prices obtained under the Fund's Dividend Reinvestment Plan for market value returns. Total investment return does not reflect brokerage commissions. A return calculated for a period of less than one year is not annualized.
- (d) Annualized.
- (e) The expense ratio includes dividend payments made on securities sold short. During the approximate four month period from August 25, 2005 through December 31, 2005, nine securities sold short made two quarterly payments. The annualized ratios noted above have been adjusted such that these securities would only reflect the equivalent of four quarterly dividends per security. Had this adjustment not been made, the expense ratio would have been 1.65% and the net investment ratio would have been 0.68%.

See notes to financial statements.

18 | Annual Report | December 31, 2007

OLA | Old Mutual/Claymore Long-Short Fund

Notes to FINANCIAL STATEMENTS | DECEMBER 31, 2007

Note 1 - ORGANIZATION

Old Mutual/Claymore Long-Short Fund (the "Fund") was organized as a Massachusetts business trust on December 3, 2004. The Fund is registered as a diversified, closed-end management investment company under the Investment Company Act of 1940, as amended.

The Fund's primary investment objective is to provide a high level of current income and current gains. The Fund's secondary investment objective is to provide long-term capital appreciation. The Fund seeks to achieve its investment objective by investing in a diversified portfolio of equity securities and by selling securities short in the S&P 500 Index that it believes will underperform relative to the average stock in the S&P 500. The Fund will also write (sell) call options on equity indices and, to a lesser extent, on individual securities held in the Fund's portfolio. The Fund may also employ a variety of other strategies involving futures and forward contracts and other derivative instruments in an attempt to enhance the Fund's investment returns. There can be no assurance that the Fund's investment objective will be achieved.

Note 2 - ACCOUNTING POLICIES

The preparation of the financial statements in accordance with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from these estimates.

The following is a summary of significant accounting policies followed by the Fund.

(A) VALUATION OF INVESTMENTS AND DERIVATIVES

Equity securities listed on an exchange are valued at the last reported sale price on the primary exchange on which they are traded. Equity securities for which there are no transactions on a given day are valued at the mean of the closing bid and asked prices. Securities traded on NASDAQ are valued at the NASDAQ Official Closing Price. Readily marketable securities listed on an exchange are valued at the last reported sale price on the primary exchange or in the principal over the counter ("OTC") market on which they are traded. Debt securities are valued by independent pricing services or dealers using the mean of the closing bid and asked prices for such securities or, if such prices are not available, at prices for securities of comparable maturity, quality and type. Equity index options are valued at the closing price on the primary exchange on which they are traded. Futures and options on future contracts are valued at the settlement price determined by the exchange on which they are traded. Forward exchange currency contracts are valued daily at current exchange rates. All other types of securities, including restricted securities, and securities for which market quotations are not readily available, are valued as determined in accordance with procedures established in good faith by the Board of Trustees. Short-term securities having a remaining maturity of sixty days or less at the time of purchase are valued at amortized cost, which approximates market value.

(B) INVESTMENT TRANSACTIONS AND INVESTMENT INCOME

Investment transactions are accounted for on the trade date. Realized gains and losses on investments are determined on the identified cost basis. Dividend income is recorded net of applicable withholding taxes on the ex-dividend date and interest income is recorded on an accrual basis. Discounts or premiums on debt securities purchased are accreted or amortized to interest income over the lives of the respective securities using the effective interest method.

(C) FUTURES

The Fund may engage in asset allocation strategies by purchasing or selling futures contracts on U.S. and foreign securities indices and other assets. A futures contract provides for the future sale by one party and purchase by another party of a specified quantity of the security or other financial instrument at a specified price and time. A futures contract on an index is an agreement in which two parties agree to take or make delivery of an amount of cash equal to the difference between the value of the index at the close of the last trading day of the contract and the price at which the index contract was originally written. Upon entering into futures contracts, the Fund maintains an

amount of cash or liquid securities with a value equal to a percentage of the contract amount with either a futures commission merchant pursuant to rules and regulations promulgated under the 1940 Act, as amended, or with its custodian in an account in the broker's name. This amount is known as initial margin. During the period the futures contract is open, payments are received from or made to the broker based upon changes in the value of the contract (the variation margin). The risk of loss associated with a futures contract is in excess of the variation margin reflected on the Statement of Assets and Liabilities. The Fund may use futures contracts in an attempt to enhance the Fund's investment returns, as an efficient way to gain broad market exposure with reduced transaction costs and/or to hedge against market and other risks in the Fund's portfolio. There are a number of risks associated with the use of futures contracts. A purchase or sale of a futures contract may result in losses in excess of the amount invested in the futures contract. If futures are used for hedging, there can be no guarantee that there will be a correlation between price movements in the hedging vehicle and in the Fund's portfolio securities being hedged.

(D) OPTIONS

The Fund will opportunistically employ an option strategy in an attempt to generate gains from option premiums, enhance distributions payable to the Fund's shareholders and reduce overall portfolio risk. The Fund intends to pursue its options strategy primarily by writing call options on equity indices. As the writer (seller) of an equity index call option, the Fund would receive cash (the premium) from the purchaser of the option, and the purchaser would have the right to receive from the Fund any appreciation in the cash value of the index over the strike price upon exercise. If the purchaser exercises the index option sold by the Fund, the Fund would pay the purchaser the difference between the cash value of the index and the strike price. In effect, the Fund sells the potential appreciation in the value of the index above the strike price in exchange for the premium.

Annual Report | December 31, 2007 | 19

OLA | Old Mutual/Claymore Long-Short Fund | NOTES TO FINANCIAL STATEMENTS  
continued

(E) SECURITIES SOLD SHORT

The Fund may sell securities short. A short sale is a transaction in which the Fund sells securities it does not own, but rather has borrowed, in anticipation of a decline in the market price of the securities. The Fund is obligated to replace the borrowed securities at their market price at the time of replacement. The Fund's obligation to replace the securities borrowed in connection with a short sale will be fully secured by collateral held in a segregated account at the custodian. Short sales by the Fund involve certain risks and special considerations. Possible losses from short sales differ from losses that could be incurred from a purchase of a security because losses from a short sale may be unlimited, whereas losses from purchases cannot exceed the total amount invested.

(F) CURRENCY TRANSLATION

Assets and liabilities denominated in foreign currencies are translated into U.S. dollars at the mean of the bid and asked price of respective exchange rates on the last day of the period. Purchases and sales of investments denominated in foreign currencies are translated at the exchange rate on the date of the transaction.

Foreign exchange gain or loss resulting from holding of a foreign currency, expiration of a currency exchange contract, difference in exchange rates between the trade date and settlement date of an investment purchased or sold, and the difference between dividends actually received compared to the amount shown in a Fund's accounting records on the date of receipt are included as net realized gains or losses on foreign currency forwards and currency transactions in the Fund's Statement of Operations.

Foreign exchange gain or loss on assets and liabilities, other than investments, are included in unrealized appreciation (depreciation) on foreign currency translations.

(G) FORWARD EXCHANGE CURRENCY CONTRACTS

The Fund may enter into forward exchange currency contracts in order to hedge its exposure to changes in foreign currency exchange rates on its foreign portfolio holdings, to hedge certain firm purchases and sales commitments denominated in foreign currencies and for investment purposes. A forward exchange currency contract is a commitment to purchase or sell a foreign currency on a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contracts and the closing of such contracts are included in net realized gain or loss on foreign currency forwards and currency transactions on the Statement of Operations.

Fluctuations in the value of open forward exchange currency contracts are recorded for financial reporting purposes as unrealized appreciation and depreciation on foreign currency forwards and currency translation on the Statement of Operations.

The Fund's custodian will place and maintain cash not available for investment or other liquid assets in a separate account of the Fund having a value at least equal to the aggregate amount of the Fund's commitments under forward exchange currency contracts entered into with respect to position hedges.

Risks may arise from the potential inability of a counterparty to meet the terms of a contract and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar. The face or contract amount, in U.S. dollars, reflects the total exposure the Fund has in that particular currency contract.

(H) DISTRIBUTIONS TO SHAREHOLDERS

The Fund declares and pays quarterly dividends to common shareholders. Distributions to shareholders are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. generally accepted accounting principles. These dividends consist of investment company taxable income, which generally includes qualified dividend income, ordinary income, short-term capital gains and premiums received on certain written options. Realized short-term capital gains and premiums received on certain options are considered ordinary income for tax purposes and will be reclassified at the Fund's fiscal year end on the Fund's Statement of Assets and Liabilities from accumulated net realized gains to accumulated net investment loss. Any net realized long-term capital gains will be distributed annually to common shareholders.

Note 3 - INVESTMENT ADVISORY AGREEMENT, SUB-ADVISORY AGREEMENT AND OTHER AGREEMENTS

Pursuant to an Investment Advisory Agreement (the "Agreement") between the Fund and Claymore Advisors, LLC (the "Adviser"), the Adviser will furnish offices, necessary facilities and equipment, oversee the activities of Analytic Investors, LLC ("Analytic" or the "Sub-Adviser"), provide personnel including certain officers required for its administrative management and pay the

compensation of all officers and trustees of the Fund who are its affiliates. As compensation for these services, the Fund will pay the Adviser an annual fee, payable monthly, in an amount equal to 1.00% of the Fund's average daily total net assets.

Pursuant to a Sub-Advisory Agreement (the "Sub-Advisory Agreement") between the Fund, the Adviser and the Sub-Adviser, the Sub-Adviser under the supervision of the Fund's Board of Trustees and the Adviser, provides a continuous investment program for the Fund's portfolio; provides investment research, makes and executes recommendations for the purchase and sale of securities; and provides certain facilities and personnel, including certain officers required for its administrative management and pays the compensation of all officers and trustees of the Fund who are its affiliates. As compensation for its services, the Adviser pays the Sub-Adviser a fee, payable monthly, in an annual amount equal to 0.50% of the Fund's average daily total net assets. Analytic is an affiliate of Old Mutual (US) Holdings, Inc.

The Adviser provides Fund Administration services to the Fund. For its services, the Adviser receives a fund administration fee payable monthly at the annual rate set forth below as a percentage of the average daily total net assets of the Fund:

NET ASSETS	RATE
-----	-----
First \$200,000,000	0.0275%
Next \$300,000,000	0.0200%
Next \$500,000,000	0.0150%
Over \$1,000,000,000	0.0100%

The Bank of New York ("BNY") acts as the Fund's custodian, accounting agent, and transfer agent. As custodian, BNY is responsible for the custody of the Fund's assets. As accounting agent, BNY is responsible for maintaining the books and records of the Fund's securities and cash. As transfer agent, BNY is responsible for performing transfer agency services for the Fund.

Certain officers and trustees of the Fund are also officers and directors of the Adviser or the Sub-Adviser. The Fund does not compensate its officers or trustees who are officers of the aforementioned firms.

20 | Annual Report | December 31, 2007

OLA | Old Mutual/Claymore Long-Short Fund | NOTES TO FINANCIAL STATEMENTS  
continued

Note 4 - FEDERAL INCOME TAXES

The Fund intends to comply with the requirements of Subchapter M of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies. Accordingly, no provision for U.S. federal income taxes is required. In addition, by distributing substantially all of its ordinary income and long-term capital gains, if any, during each calendar year, the Fund intends not to be subject to U.S. federal excise tax.

Due to inherent differences in the recognition of income, expenses, and realized gains/losses under U.S. generally accepted accounting principles and federal income tax purposes, permanent differences between book and tax basis reporting have been identified and appropriately reclassified on the Statement of Assets and Liabilities. A permanent book and tax difference relating to a distribution

Edgar Filing: Old Mutual/Claymore Long-Short Fund (f.k.a. Analytic Covered Call Plus Fund) - Form N-CSR

reclass in the amount of \$30,408,384 was reclassified from net investment loss to accumulated net realized gain. Also permanent book and tax differences relating to losses on foreign currency transactions in the amount of \$11,957,513 were reclassified from accumulated net realized gain to net investment loss. Additionally, a permanent book and tax difference relating to the Fund's investments in real estate investment trusts totaling \$123,370 was reclassified from net investment loss to accumulated net realized gain. Finally, a permanent book and tax difference relating to net operating losses in the amount of \$14,010,418 was reclassified from net investment loss to accumulated net realized gain.

Capital losses and foreign currency transactions incurred after October 31 ("post-October" losses) within the taxable year are deemed to arise on the first business day of the Fund's next taxable year. The Fund incurred and elected to defer foreign currency related losses from 2007 in the amount of \$7,274,206.

Information on the tax components of investments, excluding short sales transactions and excluding written options, and net assets as of December 31, 2007 is as follows:

COST OF INVESTMENTS FOR TAX PURPOSES	GROSS TAX UNREALIZED APPRECIATION	GROSS TAX UNREALIZED DEPRECIATION	NET TAX UNREALIZED DEPRECIATION ON INVESTMENTS	NET TAX UNREALIZED APPRECIATION ON DERIVATIVES AND FOREIGN CURRENCY
\$457,694,539	\$5,140,592	(\$31,425,222)	(\$26,284,630)	\$1,529,914

Information on the tax components of securities sold short as of December 31, 2007 is as follows:

PROCEEDS FROM SECURITIES SOLD SHORT FOR TAX PURPOSES	GROSS TAX UNREALIZED APPRECIATION	GROSS TAX UNREALIZED DEPRECIATION	NET TAX UNREALIZED APPRECIATION ON SECURITIES SOLD SHORT
\$98,300,124	\$8,037,388	(\$2,931,660)	\$5,105,728

Tax components of the following balances as of December 31, 2007 and 2006 are as follows:

	DECEMBER 31, 2007	DECEMBER 31, 2006
Undistributed ordinary income	(\$4,518,893)	(\$3,599,922)
Accumulated capital and other losses	-	(\$606,989)

For the years ended December 31, 2007 and December 31, 2006, the tax character of distributions paid to shareholders as reflected in the Statement of Changes in Net Assets, was as follows:

DISTRIBUTIONS PAID FROM:	2007	2006
Ordinary income	\$26,761,014	\$25,380,687
Capital Gain	3,647,370	5,027,697
	\$30,408,384	\$30,408,384

On July 13, 2006, the Financial Accounting Standards Board ("FASB") released FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" ("FIN

Edgar Filing: Old Mutual/Claymore Long-Short Fund (f.k.a. Analytic Covered Call Plus Fund) - Form N-CSR

48"). FIN 48 provides guidance for how uncertain tax positions should be recognized, measured, presented and disclosed in the financial statements. FIN 48 requires the evaluation of tax positions taken or expected to be taken in the course of preparing the Fund's tax returns to determine whether the tax positions are "more-likely-than-not" of being sustained by the applicable tax authority. Tax positions not deemed to meet the more-likely-than-not threshold would be recorded as a tax benefit or expense in the current year. Adoption of FIN 48 is required for fiscal years beginning after December 15, 2006, but not before its last NAV calculation in the first required financial statement reporting period for its fiscal year beginning after December 15, 2006, and is to be applied to all open tax years as of the effective date. Management has evaluated the implications of FIN 48 and has determined it does not have any impact on the financial statements as of December 31, 2007.

Tax years for 2005 and 2006 are still subject to examination by major jurisdictions.

Note 5 - INVESTMENT TRANSACTIONS AND OPTIONS WRITTEN

For the year ended December 31, 2007, purchases and sales of investments, excluding written options and short-term securities, were \$1,391,185,632 and \$1,435,622,329, respectively.

The Fund entered into written call option contracts during the year ended December 31, 2007. Details of the transactions were as follows:

	NUMBER OF CONTRACTS	PREMIUMS RECEIVED
Options outstanding, beginning of year	2,650	\$ 3,595,800
Options written, during the year	72,793	102,589,008
Options expired, during the year	(13,466)	(11,272,462)
Options closed, during the year	(55,427)	(86,539,858)
Options outstanding, end of year	6,550	\$ 8,372,488

Note 7 - CAPITAL

COMMON SHARES

The Fund has an unlimited amount of common shares, \$0.01 par value, authorized and 19,005,240 issued and outstanding.

There were no transactions in common shares during the years ended December 31, 2007 or 2006, respectively.

Note 8 - INDEMNIFICATIONS

In the normal course of business, the Fund enters into contracts that contain a variety of representations, which provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown, as this would require future claims that may be made against the Fund that have not yet occurred. However, the Fund expects the risk of loss to be remote.

Note 9 - ACCOUNTING PRONOUNCEMENT

In September, 2006, the FASB issued Statement of Financial Accounting Standards No. 157, "Fair Valuation Measurements" ("FAS 157"). This standard clarifies the definition of fair value for financial reporting, establishes a framework for measuring fair value and requires additional disclosures about the use of fair value measurements. FAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. As of December 31, 2007, the Fund does not believe the adoption of FAS 157 will impact the amounts reported in the financial statements, however, additional disclosure will be required about the inputs used to develop measurements of fair value and the effect of certain of the measurements reported in the statement of operations for a fiscal period.

OLA | Old Mutual/Claymore Long-Short Fund

Report of INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

TO THE SHAREHOLDERS AND BOARD OF TRUSTEES OF  
 OLD MUTUAL/CLAYMORE LONG-SHORT FUND

We have audited the accompanying statement of assets and liabilities of Old Mutual/Claymore Long-Short Fund (the "Fund"), including the portfolio of investments, as of December 31, 2007, and the related statement of operations

for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the two years in the period then ended and for the period from August 25, 2005 (commencement of investment operations) through December 31, 2005. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of December 31, 2007, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Old Mutual/Claymore Long-Short Fund at December 31, 2007, and the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the two years in the period then ended and for the period from August 25, 2005 (commencement of investment operations) through December 31, 2005, in conformity with U.S. generally accepted accounting principles.

Supplemental INFORMATION1 (unaudited)

#### FEDERAL INCOME TAX INFORMATION

Qualified dividend income of as much as \$5,890,887 was taxable to the Fund through December 31, 2007. The Fund intends to designate the maximum amount of dividends that qualify for the reduced tax rate pursuant to the Jobs and Growth Tax Relief Reconciliation Act of 2003.

For corporate shareholders, \$5,983,302 of investment income (dividend income plus short-term gains, if any) qualifies for the dividends-received deduction.

Subchapter M on the Internal Revenue Code of 1986, as amended, requires the Fund to advise shareholders within 60 days of the Fund's tax year end as to the federal tax status of dividends and distributions received by shareholders

Edgar Filing: Old Mutual/Claymore Long-Short Fund (f.k.a. Analytic Covered Call Plus Fund) - Form N-CSR

during such tax period. The Fund hereby designates \$3,647,370 as long-term capital gains according to IRC Section 852(b)(3)(C).

In January 2008, you will be advised on IRS Form 1099 DIV or substitute 1099 DIV as to the federal tax status of the distributions received by you in the calendar year 2007.

Dividend Reinvestment PLAN | (unaudited)

Unless the registered owner of common shares elects to receive cash by contacting the Bank of New York (the "Plan Administrator"), all dividends declared on common shares of the Fund will be automatically reinvested by the Plan Administrator for shareholders in the Fund's Dividend Reinvestment Plan (the "Plan"), in additional common shares of the Fund. Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by notice if received and processed by the Plan Administrator prior to the dividend record date; otherwise such termination or resumption will be effective with respect to any subsequently declared dividend or other distribution. Some brokers may automatically elect to receive cash on your behalf and may re-invest that cash in additional common shares of the Fund for you. If you wish for all dividends declared on your common shares of the Fund to be automatically reinvested pursuant to the Plan, please contact your broker.

The Plan Administrator will open an account for each common shareholder under the Plan in the same name in which such common shareholder's common shares are registered. Whenever the Fund declares a dividend or other distribution (together, a "Dividend") payable in cash, non-participants in the Plan will receive cash and participants in the Plan will receive the equivalent in common shares. The common shares will be acquired by the Plan Administrator for the participants' accounts, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized common shares from the Fund ("Newly Issued Common Shares") or (ii) by purchase of outstanding common shares on the open market ("Open-Market Purchases") on the New York Stock Exchange or elsewhere. If, on the payment date for any Dividend, the closing market price plus estimated brokerage commission per common share is equal to or greater than the net asset value per common share, the Plan Administrator will invest the Dividend amount in Newly Issued Common Shares on behalf of the participants. The number of Newly Issued Common Shares to be credited to each participant's account will be determined by dividing the dollar amount of the Dividend by the net asset value per common share on the payment date; provided that, if the net asset value is less than or equal to 95% of the closing market value on the payment date, the dollar amount of the Dividend will be divided by 95% of the closing market price per common share on the payment date. If, on the payment date for any Dividend, the net asset value per common share is greater than the closing market value plus estimated brokerage commission, the Plan Administrator will invest the Dividend amount in common shares acquired on behalf of the participants in Open-Market Purchases.

If, before the Plan Administrator has completed its Open-Market Purchases, the market price per common share exceeds the net asset value per common share, the average per common share purchase price paid by the Plan Administrator may exceed the net asset value of the common shares, resulting in the acquisition of fewer common shares than if the Dividend had been paid in Newly Issued Common Shares on the Dividend payment date. Because of the foregoing difficulty with respect to Open-Market Purchases, the Plan provides that if the Plan Administrator is unable to invest the full Dividend amount in Open-Market Purchases during the purchase period or if the market discount shifts to a market premium during the purchase period, the Plan Administrator may cease making Open-Market Purchases and may invest the uninvested portion of the Dividend amount in Newly Issued Common Shares at net asset value per common share at the close of business on the Last Purchase Date provided that, if the net asset value is less than or equal to 95% of the then current market price per common share; the dollar amount of the Dividend will be divided by 95% of the market price on the payment date.

The Plan Administrator maintains all shareholders' accounts in the Plan and furnishes written confirmation of all transactions in the accounts, including information needed by shareholders for tax records. Common shares in the account of each Plan participant will be held by the Plan Administrator on behalf of the Plan participant, and each shareholder proxy will include those shares purchased or received pursuant to the Plan. The Plan Administrator will forward all proxy solicitation materials to participants and vote proxies for shares held under the Plan in accordance with the instruction of the participants.

There will be no brokerage charges with respect to common shares issued directly by the Fund. However, each participant will pay a pro rata share of brokerage commission incurred in connection with Open-Market Purchases. The automatic reinvestment of Dividends will not relieve participants of any Federal, state or local income tax that may be payable (or required to be withheld) on such Dividends.

The Fund reserves the right to amend or terminate the Plan. There is no direct service charge to participants with regard to purchases in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants.

All correspondence or questions concerning the Plan should be directed to the Plan Administrator, The Bank of New York, Attention: Stock Transfer Department, 101 Barclay 11E, New York, New York 10286, Phone Number: (866) 488-3559.

PRIVACY PRINCIPLES OF OLD MUTUAL/CLAYMORE LONG-SHORT FUND FOR SHAREHOLDERS

The Fund is committed to maintaining the privacy of its shareholders and to safeguarding its non-public personal information. The following information is provided to help you understand what personal information the Fund collects, how we protect that information and why, in certain cases, we may share information with select other parties.

Generally, the Fund does not receive any non-public personal information relating to its shareholders, although certain non-public personal information of its shareholders may become available to the Fund. The Fund does not disclose any non-public personal information about its shareholders or former shareholders to anyone, except as permitted by law or as is necessary in order to service shareholder accounts (for example, to a transfer agent or third party administrator).

The Fund restricts access to non-public personal information about the shareholders to Claymore Advisors, LLC employees with a legitimate business need for the information. The Fund maintains physical, electronic and procedural safeguards designed to protect the non-public personal information of its shareholders.

QUESTIONS CONCERNING YOUR SHARES OF OLD MUTUAL/CLAYMORE LONG-SHORT FUND?

- o If your shares are held in a Brokerage Account, contact your Broker.
- o If you have physical possession of your shares in certificate form, contact the Fund's Custodian and Transfer Agent: The Bank of New York, 101 Barclay 11E, New York, New York 12086 (866) 488-3559

This report is sent to shareholders of Old Mutual/Claymore Long-Short Fund for their information. It is not a Prospectus, circular or representation intended for use in the purchase or sale of shares of the Fund or of any securities mentioned in this report.

A description of the Fund's proxy voting policies and procedures related to portfolio securities is available without charge, upon request, by calling the Fund at (800) 345-7999 or by accessing the Fund's Form N-PX on the U.S. Securities and Exchange Commission's ("SEC") website at <http://www.sec.gov>.

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Fund's Form N-Q is available on the SEC website at <http://www.sec.gov>. The Fund's Form N-Q may also be viewed and copied at the SEC's Public Reference Room in Washington, DC; information on the operation of the Public Reference Room may be obtained by calling (800) SEC-0330 or at [www.claymore.com](http://www.claymore.com).

In June 2007, the Fund submitted a CEO annual certification to the NYSE in which the Fund's principal executive officer certified that he was not aware, as of the date of the certification, of any violation by the Fund of the NYSE's Corporate Governance listing standards. In addition, as required by Section 302 of the Sarbanes-Oxley Act of 2002 and related SEC rules, the Fund's principal executive and principal financial officers have made quarterly certifications, included in filings with the SEC on Forms N-CSR and N-Q, relating to, among other things, the Fund's disclosure controls and procedures and internal control over financial reporting.

OLA | Old Mutual/Claymore Long-Short Fund

About the FUND MANAGER

ANALYTIC INVESTORS, LLC

Analytic Investors specializes in the application of systematic investment processes to evaluate and exploit opportunities in the global equity, fixed income and derivative securities markets. Based in Los Angeles and wholly owned by Old Mutual plc, Analytic employs 35 professionals and manages more than \$12 billion. The firm manages a range of traditional, long-only equity products as well as a number of absolute return strategies. The firm was founded in 1970 and, since that time, has focused on delivering valued-added, risk-controlled investment strategies to its range of institutional, fund-of-fund, and high net worth clients.

INVESTMENT PHILOSOPHY

Analytic's philosophy is anchored in the conviction that the systematic application of quantitative techniques to assess opportunity has the potential to deliver quality, risk-adjusted performance, regardless of market cycle. Analytic's quantitative methods bring together the best attributes of individual security selection and unbiased portfolio modeling, yielding a management style that is both disciplined and responsive.

INVESTMENT PROCESS

Analytic's innovative research seeks to uncover the factors that are driving performance and are likely to be important going forward. Two core beliefs underlie the firm's investment process:

- o The attractiveness of every security is determined by a multitude of factors that can be measured.
- o The desirability of a security's characteristics change with economic conditions.

Sophisticated quantitative techniques enable Analytic to simultaneously analyze a variety of unique characteristics - such as relative valuation, growth potential, historical returns, liquidity and risk - in an effort to identify and exploit opportunities. Analytic uses thorough statistical analysis in an attempt to identify the merits of each security as well as the relationships between each security's measurable characteristics that may be driving its performance.

Analytic's proprietary multi-factor return models are applied in a risk-controlled environment. The firm's highly evolved and successful approach, supported by the research efforts of its investment team, capitalizes on opportunity while neutralizing systematic market exposure and overall risk.

OLA-AR-1207

ITEM 2. CODE OF ETHICS.

(a) The registrant has adopted a code of ethics (the "Code of Ethics") that applies to its principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions.

(b) No information need be disclosed pursuant to this paragraph.

(c) During the registrant's fiscal year ended December 31, 2007, the Code of Ethics was not amended.

(d) The registrant has not granted a waiver or an implicit waiver to its principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions from a provision of its Code of Ethics during the period covered by this report.

(e) Not applicable.

(f) (1) The registrant's Code of Ethics is attached hereto as an exhibit.

(2) Not applicable.

(3) Not applicable.

ITEM 3. AUDIT COMMITTEE FINANCIAL EXPERT.

The registrant's Board of Trustees has determined that it has at least one audit committee financial expert serving on its audit committee (the "Audit Committee"), Ronald E. Toupin, Jr. Mr. Toupin is an "independent" Trustee for purposes of this Item 3 of Form N-CSR. Mr. Toupin qualifies as an audit committee financial expert by virtue of his experience obtained as a portfolio manager and research analyst, which included review and analysis of offering documents and audited and unaudited financial statements using GAAP to show accounting estimates, accruals and reserves.

(Under applicable securities laws, a person who is determined to be an audit committee financial expert will not be deemed an "expert" for any purpose, including without limitation for the purposes of Section 11 of the Securities Act of 1933, as amended, as a result of being designated or identified as an audit committee financial expert. The designation or identification of a person as an audit committee financial expert does not impose on such person any duties, obligations, or liabilities that are greater than the duties, obligations, and liabilities imposed on such person as a member of the Audit Committee and Board of Trustees in the absence of such designation or identification. The designation or identification of a person as an audit committee financial expert does not affect the duties, obligations or liability of any other member of the Audit Committee or Board of Trustees.)

ITEM 4. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

(a) Audit Fees: the aggregate fees billed for professional services rendered by

the principal accountant for the audit of the registrant's annual financial statements or services that are normally provided by the accountant in connection with statutory and regulatory filings or engagements were \$40,000 and \$38,000 for the fiscal years ending December 31, 2007, and December 31, 2006, respectively.

(b) Audit-Related Fees: the aggregate fees billed for assurance and related services by the principal accountant that are reasonably related to the performance of the audit of the registrant's financial statements and are not reported under paragraph 4(a), were \$0 and \$0 for the fiscal years ending December 31, 2007, and December 31, 2006, respectively.

(c) Tax Fees: the aggregate fees billed for professional services rendered by the principal accountant for tax compliance, tax advice, and tax planning, including federal, state and local income tax return preparation and related advice and determination of taxable income and miscellaneous tax advice were \$6,000 and \$6,000 for the fiscal years ending December 31, 2007 and December 31, 2006, respectively.

(d) All Other Fees: the aggregate fees billed for products and services provided by the principal accountant, other than the services reported in paragraphs 4(a) through 4(c) were \$0 and \$0 for the fiscal years ending December 31, 2007, and December 31, 2006, respectively.

The registrant's principal accountant did not bill fees for non-audit services that required approval by the Audit Committee pursuant to paragraph (c)(7)(ii) of Rule 2-01 of Regulation S-X during the Registrant's last two fiscal years.

(e). Audit Committee Pre-Approval Policies and Procedures.

(i) The Audit Committee reviews, and in its sole discretion, pre-approves, pursuant to written pre-approval procedures (A) all engagements for audit and non-audit services to be provided by the principal accountant to the registrant and (B) all engagements for non-audit services to be provided by the principal accountant (1) to the registrant's investment adviser (not including a sub-adviser whose role is primarily portfolio management and is sub-contracted or overseen by another investment adviser) and (2) to any entity controlling, controlled by or under common control with the registrant's investment adviser that provides ongoing services to the registrant; but in the case of the services described in subsection (B)(1) or (2), only if the engagement relates directly to the operations and financial reporting of the registrant; provided that such pre-approval need not be obtained in circumstances in which the pre-approval requirement is waived under rules promulgated by the Securities and Exchange Commission or New York Stock Exchange listing standards. Sections IV.C.2 and IV.C.3 of the Audit Committee's revised Audit Committee Charter contain the Audit Committee's Pre-Approval Policies and Procedures and such sections are included below.

IV.C.2 Pre-approve any engagement of the independent auditors to provide any non-prohibited services to the Trust, including the fees and other compensation to be paid to the independent auditors (unless an exception is available under Rule 2-01 of Regulation S-X).

(a) The Chairman or any member of the Audit Committee may grant the pre-approval of services to the Fund for non-prohibited services up to \$10,000. All such delegated pre-approvals shall be presented to the Audit Committee no later than the next Audit Committee meeting.

IV.C.3 Pre-approve any engagement of the independent auditors, including the fees and other compensation to be paid to the independent

auditors, to provide any non-audit services to the Adviser (or any "control affiliate" of the Adviser providing ongoing services to the Trust), if the engagement relates directly to the operations and financial reporting of the Trust (unless an exception is available under Rule 2-01 of Regulation S-X).

(a) The Chairman or any member of the Audit Committee may grant the pre-approval for non-prohibited services to the Adviser up to \$10,000. All such delegated pre-approvals shall be presented to the Audit Committee no later than the next Audit Committee meeting.

(ii) None of the services described in each of Items 4(b) through (d) were approved by the Audit Committee pursuant to paragraph (c) (7) (i) (C) of Rule 2-01 of Regulation S-X.

(f) The percentage of hours expended on the principal accountant's engagement to audit the Fund's financial statements for the most recent fiscal year attributable to work performed by persons other than the principal accountant's full-time, permanent employees was 0%.

(g) The aggregate non-audit fees billed by the registrant's accountant for services rendered to the registrant, the registrant's investment adviser (not including a sub-adviser whose role is primarily portfolio management and is sub-contracted with or overseen by another investment adviser) and any entity controlling, controlled by, or under common control with the adviser that provides ongoing services to the registrant that directly related to the operations and financial reporting of the registrant was \$0 and \$0 for the fiscal years ending December 31, 2007, and December 31, 2006, respectively.

(h) Not applicable.

#### ITEM 5. AUDIT COMMITTEE OF LISTED REGISTRANTS.

(a) The Audit Committee was established in accordance with Section 3(a) (58) (A) of the Securities Exchange Act of 1934, as amended. The audit committee of the registrant is composed of: Randall C. Barnes, Steven D. Cosler, Robert M. Hamje, L. Kent Moore, Ronald A. Nyberg and Ronald E. Toupin, Jr.

(b) Not Applicable.

#### ITEM 6. SCHEDULE OF INVESTMENTS.

The Schedule of Investments is included as part of Item 1.

#### ITEM 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

The registrant has delegated the voting of proxies relating to its voting securities to its investment sub-adviser, Analytic Investors, LLC (the "Sub-Adviser" or "Analytic"). The Sub-Adviser's proxy voting policies and procedures are included as an exhibit hereto.

#### ITEM 8. PORTFOLIO MANAGERS OF CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

A team of investment professionals at Analytic shares primary responsibility for the day-to-day portfolio management of the Fund. Mr. McMurrin and Mr. Bein oversee the team regarding the management of the Fund. The following provides information regarding the members of the team.

Edgar Filing: Old Mutual/Claymore Long-Short Fund (f.k.a. Analytic Covered Call Plus Fund) - Form N-CSR

NAME	SINCE	PROFESSIONAL EXPERIENCE
Gregory M. McMurrán	2005 (Inception)	Mr. McMurrán (Chief Investment Officer and Portfolio Manager) is responsible for the management of implementation of Analytic's investment strategies including those used for the Fund. He joined Analytic in 1995 as a contributor to the firm's ongoing research efforts as well as the development and strategy applications. Mr. McMurrán has a background in the implementation of the firm's quantitative investment strategies. He received a B.S. in Economics from the University of California, Irvine. He also received an M.A. in Economics at California State University, Fullerton. He has 31 years of industry experience.
Harindra de Silva, Ph.D., CFA	2005 (Inception)	Dr. de Silva (President and Portfolio Manager) is responsible for providing strategic direction and the ongoing development of its investment strategies. He focuses on the ongoing research and portfolio management of the firm's U.S. equity strategies and Tactical Asset Allocation. Prior to joining Analytic in 1995, he was a principal at Analysis Group, where he was responsible for providing economic research services to institutional investors including investment managers, large pension funds, and insurance companies. He received a Ph.D. in Finance from the University of California, Irvine. He holds a B.S. in Mechanical Engineering from the University of California, Irvine, an M.B.A. in Finance from the Institute of Science and Technology and an M.B.A. in Finance from the University of Rochester. He is a member of the Association for Investment Management and Research, the Finance Association and the International Association of Financial Analysts. He has 23 years of industry experience.
Dennis Bein, CFA	2005 (Inception)	Mr. Bein (Chief Investment Officer and Portfolio Manager) is responsible for the ongoing research for Analytic's U.S. equity strategies and the day-to-day portfolio management and trading of those accounts. Prior to joining Analytic in 1995, Mr. Bein was a Senior Consultant for Analysis Group, Inc.'s investment consulting subsidiary. He received his M.B.A. from the Anderson Graduate School of Management at the University of California, Riverside. Mr. Bein completed his undergraduate degree in Business Administration at the University of California, Riverside. He is a Chartered Financial Analyst and a member of the Association for Investment Management and Research, the Institute of Chartered Financial Analysts, and the Los Angeles Society of Financial Analysts. He has 18 years of industry experience.
Scott Barker, CFA	2005 (Inception)	Mr. Barker (Portfolio Manager) is responsible for the management of Analytic's options and fixed income based strategies as well as the day-to-day portfolio management and trading of those accounts. Prior to joining Analytic in 1995, Mr. Barker was a Research Analyst for Analysis Group, Inc. He received a B.A. in Physics from Pomona College. He is a Chartered Financial Analyst and a member of the Association for Investment Management and Research and the Los Angeles Society of Financial Analysts. He has 14 years of industry experience.
Robert Murdock, Ph.D., CFA	2005 (Inception)	Dr. Murdock (Portfolio Manager) is responsible for research and the development of quantitative models specializing in global asset allocation and the day-to-day portfolio management and trading of those accounts. Prior to joining Analytic in 1997, he was employed by the Anderson Graduate School of Management, UCLA as a researcher specializing in international investment. Previously, he was a project manager at the Institute for Global Finance, Washington, DC. He also worked at State Street Bank & Trust as an investment analyst and a research economist for the Federal Reserve Administration. Dr. Murdock received a Ph.D. in International Economics from UCLA's Anderson Graduate School of Management.

## Edgar Filing: Old Mutual/Claymore Long-Short Fund (f.k.a. Analytic Covered Call Plus Fund) - Form N-CSR

Finance from the Tuck School at Dartmouth College; an M. University of Pennsylvania; and a B.S. in Economics and University of Wyoming. He is a Chartered Financial Analyst with industry experience.

Steven Sapra, CFA

2005  
(Inception)

Mr. Sapra (Portfolio Manager) is responsible for the ongoing Analytic's U.S. equity strategies as well as day-to-day trading and trading. Before joining Analytic in 1999, Mr. Sapra was a Consultant for BARRA, Inc. He received an M.A. in Economics from the University of Southern California and a B.S. in Economics from State Polytechnic University, Pomona. He is a Chartered Financial Analyst, a member of the CFA Institute and the Los Angeles Society of Financial Analysts. He has 11 years of industry experience.

Gregory McMurran and Dennis Bein, as Analytic Chief Investment Officers, generally oversee all aspects of the day-to-day management of the Fund. Mr. McMurran has primary responsibility for the oversight of the firm's derivatives based investment strategies and Mr. Bein has primary responsibility for the oversight of the firm's equity based investment strategies. Under Mr. McMurran's direction, Robert Murdock serves as lead portfolio manager for futures based strategies and Scott Barker serves as lead portfolio manager for options based strategies. Under Mr. Bein's direction, Steven Sapra serves as lead portfolio manager for U.S. equity based strategies, and Harindra Silva heads the firm's research efforts on behalf of the Fund.

The following summarizes the structure of and methods used to determine the compensation of each individual, each of whom is employed by the Sub-Adviser, that shares primary responsibility for the day-to-day portfolio management of the Fund (the "Analytic Portfolio Managers"):

**Compensation.** Analytic's compensation structure for professional employees consists of an industry median base salary (based on independent industry information) and an annual discretionary bonus. Bonus amounts are determined using the following factors: the overall success of the firm in terms of profitability; the overall success of the department or team; and an individual's contribution to the team based on goals established during the performance period. In October 2007, the Analytic board adopted an equity plan that allows key employees of the firm to hold up to 24.9% direct or indirect nonvoting equity interests in the firm. Old Mutual will maintain its majority ownership in the firm. Participants in the Analytic Investors LLC Equity Plan include our executive management team and senior investment team members.

The base salaries of the Analytic Portfolio Managers are typically reviewed on an annual basis, determined by each portfolio manager's date of employment. Discretionary bonuses are determined annually, based upon an analysis of information from the prior calendar year.

**Conflicts of Interest.** Analytic and its officers, employees and beneficial owners shall be free from time to time to acquire, possess, manage, and dispose of securities or other investment assets for their own accounts, for the accounts of their families, for the account of any entity in which they have a beneficial interest or for the accounts of others for whom they may provide investment advisory, brokerage or other services (collectively, "Managed Accounts"), in transactions which may or may not correspond with transactions effected or positions held in the Fund. It is understood that when Analytic determines that it would be appropriate for the Fund and one or more Managed Accounts to participate in an investment opportunity, Analytic will seek to execute orders for the Fund and for such Managed Accounts on a basis which it considers equitable, but that equality of treatment of the Fund and other Managed Accounts is not assured. In such situations, Analytic may (but is not be

Edgar Filing: Old Mutual/Claymore Long-Short Fund (f.k.a. Analytic Covered Call Plus Fund) - Form N-CSR

required to) place orders for the Fund and each other Managed Account simultaneously and if all such orders are not filled at the same price, Analytic may cause the Fund and each Managed Account to pay or receive the average of the prices at which the orders were filled. If all such orders cannot be fully executed under prevailing market conditions, Analytic may allocate the securities traded among the Fund and other Managed Accounts in a manner which it considers equitable, taking into account the size of the order placed for the Fund and each other Managed Account as well as any other factors which it deems relevant.

Certain of the Managed Accounts Analytic advises may sell securities short, including securities with respect to which other Managed Accounts hold long positions. The portfolio managers and traders for these Managed Accounts are not separated from the rest of Analytic's investment

personnel and therefore have access to full information about Analytic's investment research and the investment decisions and strategies being employed for the Managed Accounts. These Managed Accounts pay Analytic management fees at rates comparable to and in some cases lower than those paid by the Fund and other Managed Accounts. Analytic also receives a significant share of any profits earned by certain of the Managed Accounts as incentive compensation. As a result, Analytic may have a conflict between its own interests and the interests of other Analytic investment advisory clients in managing the portfolios of certain of these Managed Accounts.

In order to minimize these potential conflicts of interest, Analytic has adopted various procedures and safeguards. For example, except for short sales done to take advantage of short-term volatility, Analytic will not sell a security short that another Managed Account owns until (1) it discloses to the relevant portfolio managers its intention to sell short and the reasons for selling short and (2) allows the portfolio managers a reasonable time to make an investment decision to hold or sell that security.

Other accounts managed. The following summarizes information regarding each of the other accounts managed by the Analytic Portfolio Managers as of December 31, 2007:

NAME	REGISTERED INVESTMENT COMPANIES		OTHER POOLED INVESTMENT VEHICLES		# OF ACCOUNTS
	# OF ACCOUNTS	TOTAL ASSETS (\$MILLION)	# OF ACCOUNTS	TOTAL ASSETS (\$MILLION)	
Scott Barker	6 (0)	\$1,335.0 (\$0)	0 (0)	\$0 (\$0)	1 (0)
Dennis Bein	15 (0)	\$4,220.4 (\$0)	24 (15)	\$2,429.3 (\$1,616.2)	34 (15)
Harindra de Silva	16 (0)	\$4,376.3 (\$0)	24 (16)	\$2,287.7 (\$1,469.4)	33 (16)
Greg McMurran	7 (0)	\$1,483.9 (\$0)	3 (2)	\$225.2 (\$125.7)	5 (2)
Robert Murdock	4 (0)	\$1,234.7 (\$0)	3 (2)	\$225.2 (\$125.7)	4 (2)
Steven Sapra	10 (0)	\$3,768.0 (\$0)	14 (8)	\$1,525.8 (\$850.5)	29 (8)

( ) represents the number and value of accounts within the total accounts that are subject to a performance based advisory fee.

Edgar Filing: Old Mutual/Claymore Long-Short Fund (f.k.a. Analytic Covered Call Plus Fund) - Form N-CSR

Securities ownership. The following table discloses the dollar range of equity securities of the Fund beneficially owned by the each of the Analytic Portfolio Managers as of December 31, 2007:

NAME OF PORTFOLIO MANAGER	DOLLAR RANGE OF EQUITY SECURITIES IN FUND
-----	-----
Scott Barker	None
Dennis Bein	None
Harindra de Silva	None
Greg McMurran	None
Robert Murdock	None
Steven Sapra	None

ITEM 9. PURCHASES OF EQUITY SECURITIES BY CLOSED-END MANAGEMENT INVESTMENT COMPANY AND AFFILIATED PURCHASERS.

None.

ITEM 10. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

The registrant has not made any material changes to the procedures by which shareholders may recommend nominees to the registrant's Board of Trustees.

ITEM 11. CONTROLS AND PROCEDURES.

(a) The registrant's principal executive officer and principal financial officer have evaluated the registrant's disclosure controls and procedures (as defined in Rule 30a3(c) under the Investment Company Act of 1940) as of a date within 90 days of this filing and have concluded based on such evaluation, that the registrant's disclosure controls and procedures were effective, as of that date, in ensuring that information required to be disclosed by the registrant in this Form N-CSR was recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

(b) There were no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act of 1940) that occurred during the registrant's fourth fiscal quarter of the period covered by this report that have materially affected, or are reasonably likely to materially affect, the registrant's internal control over financial reporting.

ITEM 12. EXHIBITS.

(a) (1) Code of Ethics for Chief Executive and Senior Financial Officer.

(a) (2) Certifications of principal executive officer and principal financial officer pursuant to Rule 30a-2(a) of the Investment Company Act of 1940.

(a) (3) Not Applicable.

(b) Certifications of principal executive officer and principal financial officer pursuant to Rule 30a-2(b) of the Investment Company Act of 1940.

(c) Proxy Voting Policies and Procedures.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
