**THE GABELLI EQUITY TRUST INC.**  
**NOTES TO SCHEDULE OF INVESTMENTS (Unaudited)**

**1. Security Valuation.** Portfolio securities listed or traded on a nationally recognized securities exchange or traded in the U.S. over-the-counter market for which market quotations are readily available are valued at the last quoted sale price or a market's official closing price as of the close of business on the day the securities are being valued. If there were no sales that day, the security is valued at the average of the closing bid and asked prices or, if there were no asked prices quoted on that day, then the security is valued at the closing bid price on that day. If no bid or asked prices are quoted on such day, the security is valued at the most recently available price or, if the Board of Directors (the Board) so determines, by such other method as the Board shall determine in good faith to reflect its fair market value. Portfolio securities traded on more than one national securities exchange or market are valued according to the broadest and most representative market, as determined by Gabelli Funds, LLC, the Adviser.

Portfolio securities primarily traded on a foreign market are generally valued at the preceding closing values of such securities on the relevant market, but may be fair valued pursuant to procedures established by the Board if market conditions change significantly after the close of the foreign market but prior to the close of business on the day the securities are being valued. Debt instruments with remaining maturities of 60 days or less that are not credit impaired are valued at amortized cost, unless the Board determines such amount does not reflect the securities' fair value, in which case these securities will be fair valued as determined by the Board. Debt instruments having a maturity greater than 60 days for which market quotations are readily available are valued at the average of the latest bid and asked prices. If there were no asked prices quoted on such day, the security is valued using the closing bid price. Futures contracts are valued at the closing settlement price of the exchange or board of trade on which the applicable contract is traded.

Securities and assets for which market quotations are not readily available are fair valued as determined by the Board. Statement of Financial Accounting Standard No. 157, Fair Value Measurements (SFAS 157) clarifies the definition of fair value for financial reporting, establishes a framework for measuring fair value, and requires additional disclosures about the use of fair value measurements. The three levels of the fair value hierarchy under SFAS 157 are described below:

Level 1 quoted prices in active markets for identical securities;

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.); and

Level 3 significant unobservable inputs (including the Fund's determinations as to the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The summary of the Fund's investments and other financial instruments by inputs used to value the Fund's investments as of March 31, 2009 is as follows:

<b>Valuation Inputs</b>	<b>Investments in Securities (Market Value) Assets</b>	<b>Other Financial Instruments (Unrealized Appreciation)* Assets</b>
Level 1 Quoted Prices	\$ 830,347,752	
Level 2 Other Significant Observable Inputs	29,661,463	\$ 55,052
Level 3 Significant Unobservable Inputs	135,382	
<b>Total</b>	<b>\$ 860,144,597</b>	<b>\$ 55,052</b>

\* Other financial instruments are derivative instruments not reflected in the Schedule of Investments, such as futures, forwards, and swaps which are valued at the unrealized appreciation/depreciation on the investment.

**THE GABELLI EQUITY TRUST INC.****NOTES TO SCHEDULE OF INVESTMENTS (Continued) (Unaudited)**

The following is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

	<b>Investments in Securities (Market Value)</b>
<b>Balance as of 12/31/08</b>	\$ 100,427
Accrued discounts/(premiums)	
Realized gain/(loss)	
Change in unrealized appreciation/(depreciation)	0
Net purchase/(sales)	
Transfers in and/or out of Level 3	34,955
<b>Balance as of 03/31/09</b>	<b>\$ 135,382</b>
Net change in unrealized appreciation/(depreciation) during the period on Level 3 investments held at 03/31/09	\$ (15,653)

Statement of Financial Accounting Standard No. 161, "Disclosures about Derivative Instruments and Hedging Activities" clarifies the financial reporting for derivative instruments by requiring enhanced disclosure that enables investors to understand how and why an entity uses derivatives, how derivatives are accounted for, and how derivative instruments affect an entity's results of operations and financial position. As of March 31, 2009, the Fund did not hold any significant investments in derivatives.

**2. Swap Agreements.** The Fund may enter into equity, contract for difference, and interest rate swap or cap transactions. The use of swaps and caps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio security transactions. A swap agreement may involve, to varying degrees, elements of market and counterparty risk and exposure to loss in excess of the related amounts reflected in the Statement of Assets and Liabilities. In an interest rate swap, the Fund would agree to pay to the other party to the interest rate swap (which is known as the counterparty) periodically a fixed rate payment in exchange for the counterparty agreeing to pay to the Fund periodically a variable rate payment that is intended to approximate the Fund's variable rate payment obligation on Series C Preferred Stock and Series E Preferred Stock. In an interest rate cap, the Fund would pay a premium to the counterparty and, to the extent that a specified variable rate index exceeds a predetermined fixed rate, would receive from that counterparty payments of the difference based on the notional amount of such cap. In a swap, a set of future cash flows are exchanged between two counterparties. One of these cash flow streams will typically be based on a reference interest rate combined with the performance of a notional value of shares of a stock. The other will be based on the performance of the shares of a stock. Swap and cap transactions introduce additional risk because the Fund would remain obligated to pay preferred stock dividends when due in accordance with the Articles Supplementary even if the counterparty defaulted. If there is a default by the counterparty to a swap contract, the Fund will be limited to contractual remedies pursuant to the agreements related to the transaction. There is no assurance that the swap contract counterparties will be able to meet their obligations pursuant to a swap contract or that, in the event of default, the Fund will succeed in pursuing contractual remedies. The Fund thus assumes the risk that it may be delayed in or prevented from obtaining payments owed to it pursuant to a swap contract. The creditworthiness of the swap contract counterparties is closely monitored in order to minimize this risk. Depending on the general state of short-term interest rates and the returns on the Fund's portfolio securities at that

point in time, such a default could negatively affect the Fund's ability to make dividend payments. In addition, at the time a swap or cap transaction reaches its scheduled termination date, there is a risk that the

**THE GABELLI EQUITY TRUST INC.****NOTES TO SCHEDULE OF INVESTMENTS (Continued) (Unaudited)**

Fund will not be able to obtain a replacement transaction or that the terms of the replacement will not be as favorable as on the expiring transaction.

The use of derivative instruments involves, to varying degrees, elements of market and counterparty risk in excess of the amount recognized below.

At March 31, 2009, there were no open interest rate swap agreements.

Effective March 16, 2008, Bear, Stearns International Limited entered into a Guaranty Agreement with JPMorgan Chase & Co., whereby JPMorgan Chase & Co. unconditionally guaranteed the due and punctual payment of certain liabilities of Bear, Stearns International Limited, including the current liabilities of Bear, Stearns International Limited to the Fund. As of March 31, 2009, the Fund held a contract for difference swap with Bear, Stearns International Limited which is covered by the JPMorgan Chase & Co. Guaranty Agreement as of the date of the report. Details of the swap at March 31, 2009 are as follows:

<b>Notional Amount</b>	<b>Equity Security Received</b>	<b>Interest Rate/ Equity Security Paid</b>	<b>Termination Date</b>	<b>Net Unrealized Appreciation</b>
	Market Value	Overnight LIBOR plus 75 bps plus		
	Appreciation on:	Market Value Depreciation on:		
\$703,533 (180,000 Shares)	Rolls-Royce Group plc	Rolls-Royce Group plc	03/11/10	\$55,052

**3. Tax Information.** At December 31, 2008, the Fund had net capital loss carryforwards for federal income tax purposes of \$5,677,238 which are available to reduce future required distributions of net capital gains to shareholders through 2016.
