**Siemens to generate revenue of over 40 billion with green technologies in 2014**

Revenue from Environmental Portfolio rose to about 28 billion in fiscal 2010

**In fiscal 2014, Siemens wants to exceed the 40 billion revenue mark with green technologies. In fiscal 2010, Siemens generated revenue of around 28 billion with products and solutions from its Environmental Portfolio, compared to slightly less than 27 billion in fiscal 2009. The original target of generating revenue of at least 25 billion in 2011 was thus reached significantly earlier than planned. In 2010, the latest generation of high-efficiency transformers was also included in the technology company's green portfolio for the first time.**

**Green innovations are our lifeblood. We're the largest supplier of environmental technologies in the world. We want to and we will increase our advantage over our most important competitors,** said Barbara Kux, the member of Siemens' Managing Board responsible for sustainability and the further development of the **Environmental Portfolio.**

In fiscal 2010, products and solutions from the Environmental Portfolio enabled Siemens customers worldwide to reduce their carbon dioxide (CO<sub>2</sub>) emissions by a total of around 270 million tons, an amount equal to the total annual CO<sub>2</sub> emissions of the megacities Hong Kong, London, New York, Tokyo, Delhi and Singapore.

Virtually every Division in the three Sectors Industry, Energy and Healthcare is contributing to the company's green portfolio. In 2010, the largest individual reductions in CO<sub>2</sub> emissions were achieved by highly efficient combined-cycle power plants, wind farms, the retrofitting of existing power plants, energy-efficient lighting systems and ecofriendly trains. Other future growth drivers include, for example, smart grids and their key components, an area in which Siemens anticipates total orders of around 6 billion by the end of 2014.

**Siemens Environmental Portfolio**

The Siemens Environmental Portfolio comprises products and solutions that help cut greenhouse gas emissions or combat air and water pollution. All products in the area of renewable energy fulfill these criteria. Product CO<sub>2</sub> abatement potential is calculated on the basis of specific reference values. For example, the potential savings generated by today's most advanced and efficient gas turbine power plants are calculated by comparing emission volumes per generated kilowatt hour with the worldwide average of all power plants. The contribution of light diodes and energy-saving lamps, for instance, is estimated by comparison with a reference solution. The energy savings achieved by optimizing electricity consumption in buildings are calculated on the basis of a before-and-after comparison.

Siemens' Environmental Portfolio is being continually developed and refined. The Portfolio's revenue and CO<sub>2</sub> savings for fiscal 2010 will be reviewed by the auditing company Ernst & Young. This review is based on the criteria defined in the greenhouse gas initiative of the World Business Council for Sustainable Development and the World Resources Institute.

Further information and images about the Environmental Portfolio are available at

**Siemens AG** (Berlin and Munich) is a global powerhouse in electronics and electrical engineering, operating in the industry, energy and healthcare sectors. For over 160 years, Siemens has stood for technological excellence, innovation, quality, reliability and internationality. In fiscal 2009, which ended on September 30, 2009, revenue totaled 76.7 billion and net income 2.5 billion. At the end of September 2009, Siemens had around 405,000 employees worldwide. Further information is available on the Internet at: [www.siemens.com](http://www.siemens.com).

This document contains forward-looking statements and information that is, statements related to future, not past, events. These statements may be identified by words such as expects, looks forward to, anticipates, intends, plans, believes, seeks, estimates, will, project or words of similar meaning. Such statements are based on the current expectations and certain assumptions of Siemens management, and are, therefore, subject to certain risks and uncertainties. A variety of factors, many of which are beyond Siemens control, affect Siemens operations, performance, business strategy and results and could cause the actual results, performance or achievements of Siemens to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements. For Siemens, particular uncertainties arise, among others, from changes in general economic and business conditions (including margin developments in major business areas and recessionary trends); the possibility that customers may delay the conversion of booked orders into revenue or that prices will decline as a result of continued adverse market conditions to a greater extent than currently anticipated by Siemens management; developments in the financial markets, including fluctuations in interest and exchange rates, commodity and equity prices, debt prices (credit spreads) and financial assets generally; continued volatility and a further deterioration of the capital markets; a worsening in the conditions of the credit business and, in particular, additional uncertainties arising out of the subprime, financial market and liquidity crises; future financial performance of major industries that Siemens serves, including, without limitation, the Sectors Industry, Energy and Healthcare; the challenges of integrating major acquisitions and implementing joint ventures and other significant portfolio measures; the introduction of competing products or technologies by other companies; a lack of acceptance of new products or services by customers targeted by Siemens; changes in business strategy; the outcome of pending investigations and legal proceedings and actions resulting from the findings of these investigations; the potential impact of such investigations and proceedings on Siemens ongoing business including its relationships with governments and other customers; the potential impact of such matters on Siemens financial statements; as well as various other factors. More detailed information about certain of the risk factors affecting Siemens is contained throughout this report and in Siemens other filings with the SEC, which are available on the Siemens website, [www.siemens.com](http://www.siemens.com), and on the SEC's website, [www.sec.gov](http://www.sec.gov). Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in the relevant forward-looking statement as expected, anticipated, intended, planned, believed, sought, estimated or projected. Siemens does not intend or assume any obligation to update or revise these forward-looking statements in light of developments which differ from those anticipated.
