## Item 2.05 Costs Associated with Exit or Disposal Activities

On Friday January 9, 2009, Novavax Inc., (the Company) committed to, and executed, a plan of termination that resulted in a reduction of its workforce by 18 employees or approximately 20% of its workforce in order to reduce operating expenses and focus on its key programs. The Company is expected to record a charge of approximately \$190,000 in the first quarter of 2009 for related severance costs. These actions will allow the Company to reduce cash spending on an operating basis by approximately 20% compared to the cash spending in 2008. The reduction in force also coincides with a reduced work scope for 2009. The projected lower spending in 2009 is aligned with a continued investment in the key strategic value drivers of the Company. After this restructuring, Company will continue development of its seasonal influenza vaccine and further advance its RSV and VZV pre-clinical programs. Commercialization efforts for its pandemic and seasonal influenza vaccine will also continue as planned.
