APPLIED MATERIALS, INC.

**NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS
(Unaudited)**

Note 1 Basis of Presentation and Equity-Based Compensation

Basis of Presentation

In the opinion of management, the unaudited interim consolidated condensed financial statements of Applied Materials, Inc. and its subsidiaries (Applied or the Company) included herein have been prepared on a basis consistent with the October 29, 2006 audited consolidated financial statements and include all material adjustments, consisting of normal recurring adjustments, necessary to fairly present the information set forth therein. These unaudited interim consolidated condensed financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in Applied's Annual Report on Form 10-K for the fiscal year ended October 29, 2006 (2006 Form 10-K). Applied's results of operations for the three and nine months ended July 29, 2007 are not necessarily indicative of future operating results.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (United States) requires management to make judgments, estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ materially from those estimates.

In fiscal 2007, Applied changed its presentation of accretion of discounts and amortization of premiums on its investment portfolio and gains and losses on sales of investments in the Consolidated Condensed Statements of Cash Flows. This revision did not result in material changes to operating cash flows in the accompanying Consolidated Condensed Statements of Cash Flows. The accompanying consolidated condensed financial statements for fiscal 2006 have been conformed to the fiscal 2007 presentation.

Sales and Value Added Taxes

Taxes collected from customers and remitted to governmental authorities are presented on a net basis in the accompanying Consolidated Condensed Statements of Operations.

Interest Income

Interest income consists of interest earnings, gains and losses on investment securities, and certain portfolio management costs.

Equity-Based Compensation

Applied has adopted stock plans that provide for grants to employees of equity-based awards, including stock options, restricted stock and restricted stock units (also referred to as performance shares under the Applied Materials, Inc. Employee Stock Incentive Plan). In addition, the Employee Stock Incentive Plan provides for the automatic grant of restricted stock units to non-employee directors and permits the grant of equity-based awards to consultants. Applied also has two Employee Stock Purchase Plans (ESPP) for United States and international employees, respectively, which enable employees to purchase Applied common stock.

During the three months ended July 30, 2006 and July 29, 2007, Applied recognized equity-based compensation expense related to stock options, ESPP shares, restricted stock units and restricted stock of \$54 million and \$47 million, respectively. During the three months ended July 30, 2006 and July 29, 2007, Applied recognized income tax benefits related to equity-based compensation of \$5 million and \$13 million, respectively. During the first nine months of fiscal 2006, Applied recognized total equity-based compensation expense of \$161 million and a related tax benefit of \$31 million. During the first nine months of fiscal 2007, Applied recognized total equity-based compensation expense of \$130 million and a related tax benefit of \$37 million. The equity-based compensation expense related to restricted stock units and restricted stock for the three months ended July 30, 2006 and July 29, 2007 was \$9 million and \$29 million, respectively, and for the nine months ended July 30, 2006 and July 29, 2007

Table of Contents**APPLIED MATERIALS, INC.****NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS (Continued)**

was \$20 million and \$75 million, respectively. The estimated fair value of Applied's equity-based awards, less expected forfeitures, is amortized over the awards' service periods on a straight-line basis.

Stock Options

The exercise price of each stock option equals the market price of Applied common stock on the date of grant. Most options are scheduled to vest over four years and expire no later than seven years from the grant date. The fair value of each option grant is estimated on the date of grant using the Black-Scholes option pricing model. This model was developed for use in estimating the value of publicly traded options that have no vesting restrictions and are fully transferable. Applied's employee stock options have characteristics significantly different from those of publicly traded options. The weighted average assumptions used in the model are outlined in the following table:

	Three Months		Nine Months Ended	
	July 30, 2006	July 29, 2007	July 30, 2006	July 29, 2007
<i>Stock Options:</i>				
Dividend yield	1.23%		0.70%	1.12%
Expected volatility	36%		37%	31%
Risk-free interest rate	5.0%		4.5%	4.7%
Expected life (in years)	3.8		3.8	3.9

The computation of the expected volatility assumption used in the Black-Scholes calculations for new grants is based on a combination of historical and implied volatilities. When establishing the expected life assumption, Applied annually reviews historical employee exercise behavior with respect to option grants with similar vesting periods. There were no stock options granted in the three months ended July 29, 2007. The weighted average grant date fair value of options granted during the three months ended July 30, 2006 was \$5.07, and during the nine months ended July 30, 2006 and July 29, 2007 was \$5.94 and \$5.11, respectively.

Employee Stock Purchase Plans

Under the ESPP, substantially all employees may purchase Applied common stock through payroll deductions at a price equal to 85 percent of the lower of the fair market value of Applied stock at the beginning of the applicable offering period or at the end of each applicable purchase period. There were no ESPP shares issued during the third quarter of fiscal 2007. Based on the Black-Scholes option pricing model, the weighted average estimated fair value of purchase rights under the ESPP was \$5.34 and \$4.80 for the nine months ended July 30, 2006 and July 29, 2007, respectively. Compensation expense is calculated using the fair value of the employees' purchase rights under the Black-Scholes model. Underlying assumptions used in the model are outlined in the following table:

Nine Months Ended	
July 30,	July 29,

	2006	2007
<i>ESPP:</i>		
Dividend yield	0.04%	1.19%
Expected volatility	31.9%	28.5%
Risk-free interest rate	3.19%	4.94%
Expected life (in years)	1.25	1.25

Restricted Stock Units and Restricted Stock

Restricted stock units are converted into shares of Applied common stock upon vesting on a one-for-one basis. Restricted stock units vest over a minimum of three years and typically vest over three to four years. Vesting of

Table of Contents

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS (Continued)

restricted stock units usually is subject to the employee's continued service with Applied. The compensation expense related to these awards is determined using the fair value of Applied common stock on the date of the grant.

On January 25, 2007, the Human Resources and Compensation Committee (the Committee) of the Board of Directors approved new awards of 1,950,000 performance-based restricted stock units for Applied's named executive officers and other key employees. The Committee also approved the issuance of 150,000 shares of restricted stock to Applied's President and Chief Executive Officer at \$0.01 per share. These awards will vest only if specific performance goals set by the Committee are achieved. The goals require the achievement of specified levels of Applied's annual operating profit and also that the officer remain an employee of Applied through the vesting date. The fair value of the performance-based restricted stock awards and restricted stock was estimated using the fair value of Applied common stock on the date of the grant and assumes that performance goals will be achieved. If such goals are not met, no compensation cost will be recognized and any recognized compensation cost will be reversed. The expected cost of the grant is being reflected over the service period, and is reduced for estimated forfeitures.

Note 2 Earnings Per Share

Basic earnings per share is determined using the weighted average number of common shares outstanding during the period. Diluted earnings per share is determined using the weighted average number of common shares and potential common shares (representing the dilutive effect of stock options, restricted stock units, ESPP shares and amounts due under the agreements associated with the accelerated stock buyback program) outstanding during the period. Applied's net income has not been adjusted for any period presented for purposes of computing basic or diluted earnings per share.

For purposes of computing diluted earnings per share, weighted average potential common shares do not include stock options with an exercise price greater than the average fair market value of Applied common stock for the period, as the effect would be anti-dilutive. Accordingly, options to purchase 133,936,000 and 57,049,000 shares of common stock for the three months ended July 30, 2006 and July 29, 2007, respectively, and options to purchase 132,287,000 and 74,196,000 shares of common stock for the nine months ended July 30, 2006 and July 29, 2007, respectively, were excluded from the computation.

Note 3 Accounts Receivable, Net

Applied has agreements with various financial institutions to sell accounts receivable from selected customers. Applied also discounts letters of credit through various financial institutions. Under these agreements, Applied sold accounts receivable and discounted letters of credit in the amounts of \$49 million and \$116 million for the three months ended July 30, 2006 and July 29, 2007, respectively, and \$140 million and \$392 million for the nine months ended July 30, 2006 and July 29, 2007, respectively. Financing charges on the sale of receivables and discounting of letters of credit are included in interest expense in the accompanying Consolidated Condensed Statements of Operations and were not material for all periods presented. As of July 29, 2007, \$4 million of sold accounts receivable remained outstanding under these agreements. A portion of these sold accounts receivable is subject to certain recourse provisions. As of July 29, 2007, Applied has not experienced any losses under these recourse provisions.

Table of Contents**APPLIED MATERIALS, INC.****NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS (Continued)****Note 4 Inventories**

Inventories are stated at the lower of cost or market, with cost determined on a first-in, first-out (FIFO) basis. Components of inventories were as follows:

	October 29, 2006	July 29, 2007
	(In thousands)	
Customer service spares	\$ 466,414	\$ 518,063
Raw materials	236,913	205,966
Work-in-process	272,654	226,505
Finished goods	430,796	411,341
	\$ 1,406,777	\$ 1,361,875

Included in finished goods inventory is \$174 million at both October 29, 2006 and July 29, 2007 of newly-introduced systems at customer locations where the sales transaction did not meet Applied's revenue recognition criteria, as set forth in Note 1 of Notes to the Consolidated Financial Statements in the 2006 Form 10-K.

Note 5 Goodwill, Purchased Technology and Other Intangible Assets

Details of unamortized intangible assets were as follows:

	October 29, 2006			July 29, 2007		
	Goodwill	Other Intangible Assets	Total	Goodwill	Other Intangible Assets	Total
	(In thousands)					
Gross carrying amount	\$ 618,428	\$ 17,860	\$ 636,288	\$ 698,770	\$ 17,860	\$ 716,630
Accumulated amortization	(45,870)		(45,870)	(45,870)		(45,870)
	\$ 572,558	\$ 17,860	\$ 590,418	\$ 652,900	\$ 17,860	\$ 670,760

Goodwill and unamortized intangible assets are not amortized but are subject to annual reviews for impairment, which Applied performs during the fourth quarter of each fiscal year. Applied conducted these impairment tests in the fourth quarter of fiscal 2006, and the results of these tests indicated that Applied's goodwill and unamortized intangible assets were not impaired. Goodwill and unamortized intangible assets are also subject to review for impairment when circumstances or events occur during the year that indicate that the assets may be impaired. From October 29, 2006 to

July 29, 2007, the change in goodwill was \$80 million, primarily due to the acquisition of certain net assets of Brooks Automation, Inc. consisting of its software division (Brooks Software), which was completed in the second quarter of fiscal 2007. Other intangible assets that are not subject to amortization consist primarily of a trade name. As of July 29, 2007, goodwill and unamortized intangible assets by reportable segment was: Silicon, \$224 million; Fab Solutions, \$193 million; Display, \$116 million; and Adjacent Technologies, \$138 million. For additional details, see Note 12.

Details of amortized intangible assets were as follows:

	October 29, 2006			July 29, 2007		
	Purchased	Other		Purchased	Other	
	Technology	Intangible	Total	Technology	Intangible	Total
		Assets			Assets	
	(In thousands)					
Gross carrying amount	\$ 469,226	\$ 75,617	\$ 544,843	\$ 489,847	\$ 102,517	\$ 592,364
Accumulated amortization	(327,335)	(34,302)	(361,637)	(349,664)	(38,583)	(388,247)
	\$ 141,891	\$ 41,315	\$ 183,206	\$ 140,183	\$ 63,934	\$ 204,117

Table of Contents**APPLIED MATERIALS, INC.****NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS (Continued)**

Purchased technology and other intangible assets are amortized over their estimated useful lives of 1 to 15 years using the straight-line method. From October 29, 2006 to July 29, 2007, the change in gross carrying amount of the amortized intangible assets was \$48 million, primarily due to the acquisition of Brooks Software (see Note 12).

Aggregate amortization expense was \$6 million and \$10 million for the three months ended July 30, 2006 and July 29, 2007, and \$20 million and \$28 million for the nine months ended July 30, 2006, and July 29, 2007, respectively. As of July 29, 2007, future estimated amortization expense is expected to be \$9 million for the remainder of fiscal 2007, \$37 million for fiscal 2008, \$34 million for fiscal 2009, \$30 million for fiscal 2010, \$27 million for fiscal 2011, and \$67 million thereafter. As of July 29, 2007, amortized intangible assets by reportable segment were: Silicon, \$18 million; Fab Solutions, \$61 million; Display, \$52 million; and Adjacent Technologies, \$73 million.

Note 6 Accounts Payable, Accrued Expenses, Guarantees and Contingencies***Accounts Payable and Accrued Expenses***

Components of accounts payable and accrued expenses were as follows:

	October 29, 2006	July 29, 2007
	(In thousands)	
Accounts payable	\$ 475,479	\$ 479,467
Deferred revenue	369,875	468,634
Compensation and employee benefits	439,333	444,790

Edgar Filing: APPLIED MATERIALS INC /DE - Form 10-Q

Provisions for warranty	54,831	48,502	162,548	141,619
Consumption of reserves	(40,041)	(41,754)	(133,910)	(128,303)
Ending balance	\$ 165,251	\$ 187,921	\$ 165,251	\$ 187,921

Applied products are generally sold with a 12-month warranty period following installation. The provision for the estimated cost of warranty is recorded when revenue is recognized. Parts and labor are covered under the terms of the warranty agreement. The warranty provision is based on historical experience by product, configuration and geographic region. Quarterly warranty consumption is generally associated with sales that occurred during the preceding four quarters, and quarterly warranty provisions are generally related to the current quarter's sales.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS (Continued)

Guarantees

During the ordinary course of business, Applied provides standby letters of credit or other guarantee instruments to certain parties as required for certain transactions initiated by either Applied or its subsidiaries. As of July 29, 2007, the maximum potential amount of future payments that Applied could be required to make under these guarantee arrangements was \$136 million. Applied has not recorded any liability in connection with these guarantee arrangements beyond that required to appropriately account for the underlying transaction being guaranteed. Applied does not believe, based on historical experience and information currently available, that it is probable that any amounts will be required to be paid under these guarantee arrangements.

Applied also has agreements with various global banks to facilitate subsidiary banking operations world-wide, including overdraft arrangements, bank guarantees and letters of credit. As of July 29, 2007, Applied Materials, Inc. has provided parent guarantees to banks for approximately \$85 million to cover these arrangements.

Legal matters

David Scharf

On July 31, 2001, David Scharf, an individual, filed a lawsuit against Applied in the United States District Court for the Central District of California, captioned David Scharf v. Applied Materials, Inc. The lawsuit alleges that Applied has infringed, has induced others to infringe, and has contributed to others' infringement of, a patent concerning color synthesizing scanning electron microscope technology. Mr. Scharf seeks preliminary and permanent injunctions, a finding of willful infringement, damages (including treble damages), and costs. Applied has answered the complaint and counterclaimed for declaratory judgment of non-infringement and invalidity. On May 10, 2002, Mr. Scharf filed a request for re-examination of his patent with the Patent and Trademark Office (PTO). On June 26, 2002, the case was removed from the Court's active docket after the parties stipulated to stay the case pending the results of that re-examination. On July 11, 2002, Applied filed its own request for re-examination of Mr. Scharf's patent with the PTO. Applied's request for re-examination was granted on September 19, 2002. On April 23, 2004, the PTO notified Applied that it intended to issue a re-examination certificate. On June 14, 2004, Applied filed a second request for re-examination of Mr. Scharf's patent with the PTO. The second request was denied on September 1, 2004. On October 1, 2004, Applied filed a petition for reconsideration of that denial, which subsequently was denied. The lawsuit was returned to the active docket of the District Court for the Central District of California in January 2006. The parties have completed fact discovery, and on February 22, 2007, the Court held a claim construction hearing. The Court heard oral arguments regarding the parties' motions for summary judgment on August 13, 2007, and denied both parties' motions for summary judgment on August 20, 2007. The Court has not scheduled a trial date. Applied believes it has meritorious defenses and counterclaims and intends to pursue them vigorously.

Linear Technology

On March 12, 2002, Linear Technology Corp. (LTC) filed a complaint against Applied in the Superior Court for the County of Santa Clara, captioned Linear Technology Corp. v. Applied Materials, Inc., Novellus Systems, Inc. and Tokyo Electron Ltd., alleging claims for breach of contract, fraud and deceit, negligent misrepresentation, suppression of fact, unfair competition, breach of warranty, express contractual indemnity, implied equitable indemnity and declaratory relief. The complaint alleged, among other things, that Applied is obligated to indemnify and defend LTC

for certain claims in an underlying patent infringement lawsuit brought by Texas Instruments, Inc. (TI) against LTC. On November 12, 2002, LTC filed an amended complaint asserting essentially the same claims as in the original complaint, but adding an additional assertion that LTC and TI have settled their litigation. Applied's motion to dismiss the amended complaint was granted in part. LTC filed Second and Third Amended Complaints, each of which was dismissed upon Applied's motion. On February 13, 2004, LTC filed a Fourth Amended Complaint, which Applied moved to dismiss. LTC then filed a motion to amend its Fourth Amended Complaint, which the Court granted. On July 7, 2004, LTC filed a Fifth Amended Complaint. On October 5, 2004, Applied's

Table of Contents**APPLIED MATERIALS, INC.****NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS (Continued)**

motion to dismiss LTC's Fifth Amended Complaint was granted with prejudice. On January 11, 2005, LTC filed a notice of appeal of the dismissal of its complaint, and oral argument of the LTC appeal was heard by the California Sixth District Court of Appeal on April 19, 2007. On June 19, 2007, the Sixth District Court of Appeals entered an order that upheld the trial court's dismissal of LTC's claims for fraud and deceit, but reversed the trial court's dismissal of LTC's remaining claims and remanded the case to the trial court for further proceedings. On July 30, 2007, Applied filed notice that it will seek review by the California Supreme Court of the reversal and remand order of the Sixth District Court of Appeal. Applied believes it has meritorious defenses and intends to pursue them vigorously.

Jusung

On December 24, 2003, Applied filed a lawsuit against Jusung Engineering Co., Ltd. (Jusung Engineering) and Jusung Pacific Co., Ltd. (Jusung Pacific, referred to together with Jusung Engineering as Jusung) in Tao-Yuan District Court in Taiwan, captioned Applied Materials, Inc. v. Jusung Engineering Co., Ltd. The lawsuit alleges that Jusung is infringing a patent related to chemical vapor deposition owned by Applied (the CVD patent). In the lawsuit, Applied seeks a provisional injunction prohibiting Jusung from importing, using, manufacturing, servicing or selling in Taiwan certain liquid crystal display (LCD) manufacturing equipment. On December 25, 2003, the Tao-Yuan District Court ruled in favor of Applied's request for a provisional injunction, and on January 14, 2004, the Court issued a provisional injunction order against Jusung Pacific. Jusung Pacific appealed those decisions, and the decisions were affirmed on appeal. On January 30, 2004, Jusung Pacific requested permission to post a counterbond to have the Jusung Pacific injunction lifted. Jusung Pacific's counterbond request was granted, and on March 30, 2004, the provisional injunction order was lifted. At Applied's request, on December 11, 2004, the District Court issued a provisional injunction order against Jusung Engineering. Jusung Engineering appealed that order, and the order was affirmed on appeal. Jusung Engineering also requested permission to post a counterbond to have the Jusung Engineering injunction lifted. Jusung Engineering's counterbond request was granted, and on April 25, 2005, the provisional injunction order against Jusung Engineering was lifted. Applied has appealed both counterbond decisions. On June 30, 2004, Applied filed a main action patent infringement complaint against Jusung in the Hsinchu District Court in Taiwan, captioned Applied Materials, Inc. v. Jusung Engineering Co., Ltd. In the lawsuit, Applied seeks damages and a permanent injunction for infringement of the CVD patent. The decisions regarding the provisional injunction and counterbond have no effect on the separate patent infringement lawsuit filed by Applied against Jusung in the Hsinchu Court. In August 2006, the Court set the litigation fee and the litigation security payment, and the main action is now proceeding on its merits. Applied's CVD patent also is the subject of an invalidity proceeding filed in the Taiwanese Intellectual Property Office (TIPO) by Jusung Pacific in June 2004. On July 12, 2007, Applied received a decision from the TIPO allowing Applied's recent amendments and dismissing Jusung's invalidation action. Jusung has filed an appeal of the TIPO's decision.

On June 13, 2006, Applied filed an action in the Taiwanese Patent and Trademark Office challenging the validity of a patent owned by Jusung Engineering related to severability of the transfer chamber for a cluster system. On June 20, 2006, Jusung Engineering filed a lawsuit in Hsinchu District Court in Taiwan, captioned Jusung Engineering, Co. Ltd. v. AKT America, Inc. and Applied Materials, Inc., alleging infringement of this patent. Jusung Engineering's lawsuit seeks damages, costs and attorneys' fees, but does not seek injunctive relief. Applied believes that it has meritorious defenses that it intends to pursue vigorously.

On January 31, 2007, Applied received notice that Jusung filed a complaint of private prosecution in the Taipei District Court of Taiwan dated November 10, 2006, entitled Jusung Engineering Co., Ltd. v. M. Splinter, Y. Lin, C.

Lai and J. Lin. The complaint alleges that Applied's outside counsel received from the Court and used a copy of an expert report that Jusung had filed in the ongoing patent infringement lawsuits and that Jusung had intended to remain confidential. Jusung named as defendants Applied's Taiwan attorneys, as well as Michael R. Splinter, Applied's President and Chief Executive Officer, as the statutory representative of Applied. On April 27, 2007 the Taipei District Court dismissed Jusung's private prosecution complaint. Jusung filed an appeal of the dismissal to

Table of Contents

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS (Continued)

the High Court. The High Court affirmed the District Court's rejection of the private prosecution complaint on June 25, 2007.

On April 3, 2007, Jusung filed a complaint against Applied's subsidiary, AKT America, Inc. (AKT America), and one of its suppliers, in Seoul Central District Court in Seoul, Korea, captioned Jusung Engineering, Co. Ltd. v. AKT America, Inc. The complaint alleges infringement of a Jusung patent involving the showerhead assembly of PECVD equipment for LCDs and seeks injunctive relief. On June 9, 2007, AKT America and its supplier filed an invalidation action with the Korean Intellectual Property Office (KIPO) against the patent asserted by Jusung. Applied believes that it has meritorious defenses that it intends to pursue vigorously.

On August 13, 2007, Applied filed a complaint against Jusung in the Seoul Central District Court in Seoul, Korea, captioned Applied Materials, Inc. v. Jusung Engineering Ltd. The complaint alleges infringement of an Applied patent involving a substrate support or housing for a substrate supporting pin used in PECVD equipment for LCDs and seeks both monetary damages and injunctive relief. Applied also initiated a confirmation of scope action with the Intellectual Property Tribunal of the KIPO based on the same patent.

Taiwan Fair Trade Commission

On April 10, 2004, the Taiwan Fair Trade Commission (TFTC) notified AKT America that, following a complaint filed by Jusung, the TFTC had begun an investigation into whether AKT America had violated the Taiwan Fair Trade Act. The investigation focused on whether AKT America violated the Taiwan Guidelines for the Review of Cases Involving Enterprises Issuing Warning Letters for Infringement on Copyright, Trademark and Patent Rights by allegedly notifying customers about its patent rights and the infringement of those rights by Jusung. On June 15, 2004, the TFTC notified Applied that Applied also was a subject of the investigation. The TFTC subsequently notified Applied and AKT America that there was insufficient evidence to support a claim against either company. Jusung appealed the TFTC's decision, and the appeals court affirmed the decision of the TFTC. Jusung appealed the appeals court's affirmation of the decision of the TFTC, and in January 2007, the Taipei High Administrative Court dismissed Jusung's appeal. In February 2007, Jusung appealed the dismissal to the Supreme Administrative Court of Taiwan. Applied believes that Jusung's complaint is without merit.

Silicon Services Consortium

On January 19, 2006, five companies that sell refurbished Applied tools (Silicon Services Consortium Inc., Semiconductor Support Services Co., OEM Surplus, Inc., Precision Technician Inc., and Semiconductor Equipment Specialist, Inc.) filed a lawsuit against Applied in the United States District Court for the Western District of Texas, captioned Silicon Services Consortium, Inc., et al. v. Applied Materials, Inc. The plaintiffs claim that a policy that Applied announced in January 2005 limiting the sale of certain parts to them constituted an unlawful attempt to monopolize the refurbishment business, an interference with existing contracts, and an interference with prospective business relationships. The suit seeks injunctive relief, damages, costs and attorneys' fees. After Applied filed a motion to dismiss the original complaint, the plaintiffs filed an amended complaint alleging similar conduct. Applied filed a motion to dismiss the amended complaint on April 7, 2006, which the Court denied on February 16, 2007. Applied believes it has meritorious defenses and intends to pursue them vigorously. On January 17, 2007, Applied filed a counterclaim in this matter, asserting claims for patent infringement, trademark infringement, trademark dilution, unfair competition, and misuse and misappropriation of trade secrets against each of the five

plaintiffs/counterdefendants. Applied seeks damages for the harm it has suffered, as well as an injunction prohibiting any further violation of Applied's intellectual property rights. Applied believes that it has meritorious claims and intends to pursue them vigorously. The Court has set a date for a Markman hearing in October 2007 and has scheduled trial to commence on November 3, 2008.

Applied does not believe that the outcome of any of the above matters will have a material adverse effect on its financial position or results of operations.

Table of Contents**APPLIED MATERIALS, INC.****NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS (Continued)**

Applied is subject to various legal proceedings and claims, either asserted or unasserted, that arise in the ordinary course of business. Applied from time to time is, and in the future may be, involved in legal proceedings or claims regarding patent infringement, intellectual property rights, antitrust, environmental regulations, securities, contracts, product performance, product liability, unfair competition, employment and other matters. In addition, Applied on occasion receives notification from customers who believe that Applied owes them indemnification or other obligations related to infringement claims made against the customers by third parties. Applied evaluates, among other factors, the degree of probability of an unfavorable outcome and reasonably estimates the amount of the loss. Significant judgment is required both in the determination of probability and as to whether an exposure can be reasonably estimated. When Applied determines that a loss is probable and the amount of the loss is reasonably estimable, the effect is recorded in the consolidated financial statements. Significant changes in legal proceedings and claims, or the factors considered in the evaluation of those matters, could have a material adverse effect on Applied's business, financial condition and results of operations.

Note 7 Restructuring and Asset Impairments

On February 9, 2007, the Board of Directors of Applied approved a plan (the Plan) to cease future development of beamline implant products for semiconductor manufacturing and close the operations of the Applied Implant Technologies (Implant) group based in Horsham, England. Under the Plan, Applied expects its research and development and manufacturing operations in Horsham to close by the end of December 2007. The total cost of implementing the Plan is expected to be in the range of \$95 million to \$110 million, and is reported in the Consolidated Condensed Statements of Operations under cost of products sold and operating expenses (including restructuring and asset impairment charges). The majority of the cash outlays in connection with the Plan are anticipated to occur in fiscal 2007. The Implant group operates in the Silicon segment and the results of its operations are not material to the segment's financial position or results of operations.

Costs under the Plan during the first nine months of fiscal 2007 consisted primarily of inventory-related charges reported as cost of products sold of \$53 million, other operating expenses of \$3 million, and restructuring and asset impairment charges of \$27 million. During the first nine months of fiscal 2007, Applied recorded restructuring charges of \$19 million, consisting primarily of employee termination costs to reduce its workforce by approximately 200 positions. The majority of the affected employees are based in Horsham, England, and represent multiple functions. Asset impairment charges included \$8 million of fixed asset write-offs.

Changes in restructuring reserves related the Plan for the nine months ended July 29, 2007 were as follows:

	Severance	Facilities	Total
	(In thousands)		
Provision for restructuring reserves	\$ 16,685	\$ 74	\$ 16,759
Consumption of reserves		(47)	(47)
Foreign currency changes	340	2	342
Balance, April 29, 2007	17,025	29	17,054

Edgar Filing: APPLIED MATERIALS INC /DE - Form 10-Q

Provision for restructuring reserves	1,565	139	1,704
Consumption of reserves	(5,764)	(112)	(5,876)
Foreign currency changes	300		300
Balance, July 29, 2007	\$ 13,126	\$ 56	\$ 13,182

During the first quarter of fiscal 2006, Applied's Board of Directors approved a plan to disinvest a portion of Applied's real estate and facilities portfolio (the Disinvestment Plan). Properties with an estimated fair value of \$56 million were reported as assets held-for-sale and reclassified from property, plant and equipment on the Consolidated Condensed Balance Sheet. Applied recorded an asset impairment charge of \$124 million during the first quarter of fiscal 2006 to write-down the following properties to estimated fair value: facilities in Narita, Japan;

Table of Contents**APPLIED MATERIALS, INC.****NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS (Continued)**

Chunan, Korea; Hillsboro, Oregon; and Danvers, Massachusetts; and 26 acres of unimproved land in Hillsboro, Oregon. During fiscal 2006, Applied sold the Danvers, Massachusetts facility for net proceeds of \$16 million and recognized a gain of \$4 million; recorded additional impairment charges on the Narita and Chunan facilities of \$6 million; and recorded a restructuring charge of \$4 million related to environmental contamination of the Narita site. During the first quarter of fiscal 2007, Applied sold the Hillsboro, Oregon facility for net proceeds of \$9 million and recognized a gain of \$3 million. During the second quarter of fiscal 2007, Applied sold the Chunan facility for net proceeds of \$8 million and recognized a slight gain. During the third quarter of fiscal 2007, Applied sold the 26 acres of unimproved land in Hillsboro for net proceeds of \$6 million and recognized an insignificant gain. Subsequent to the third quarter of fiscal 2007, Applied entered into an agreement to sell the Narita facility for net proceeds of \$14 million. The sale is expected to close in the fourth quarter of fiscal 2007.

As part of the Disinvestment Plan, Applied also recorded a charge in the amount of \$91 million for future lease obligations that were scheduled to continue through fiscal 2014 related to the closure of its leased Hayward, California facility. During fiscal 2006, Applied consumed \$9 million in restructuring reserves for rental and operating costs associated with this facility. In the fourth quarter of fiscal 2006, Applied paid \$81 million to terminate the Hayward lease.

For the nine months ended July 29, 2007, changes in restructuring reserves for facilities realignment programs initiated in 2003 and 2004 were as follows:

	(In thousands)
Balance, October 29, 2006	\$ 24,731
Consumption of reserves	(3,032)
Balance, January 28, 2007	21,699

Adjustments to reserves	(227)
Foreign currency changes	(59)
Balance, April 29, 2007	19,564
Consumption of reserves	(1,916)
Foreign currency changes	(28)
Balance, July 29, 2007	\$ 17,620

Note 8 Derivative Financial Instruments

Applied's derivative financial instruments, consisting of currency forward exchange and option contracts, are recorded at fair value on the Consolidated Condensed Balance Sheet, either in other current assets or accounts payable and

accrued expenses. Changes in the fair value of derivatives that do not qualify for hedge accounting treatment, as well as the ineffective portion of any hedges, are recognized in the consolidated results of operations. The effective portion of the gain/(loss) is reported as a component of accumulated other comprehensive income in stockholders' equity, and is reclassified into results of operations when the hedged transaction affects income/(loss). All amounts included in accumulated other comprehensive income as of July 29, 2007 will generally be reclassified into earnings within 12 months. Changes in the fair value of currency forward exchange and option contracts due to changes in time value are excluded from the assessment of effectiveness, and are recognized in cost of products sold or expensed. The change in option and forward time value was not material for all periods presented. If the transaction being hedged fails to occur, or if a portion of any derivative is deemed to be ineffective, Applied promptly recognizes the gain/(loss) on the associated financial instrument in general and administrative expenses. The amounts recognized due to the anticipated transactions failing to occur or ineffective hedges were not material for all periods presented.

Table of Contents**APPLIED MATERIALS, INC.****NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS (Continued)**

Accumulated other comprehensive income related to derivative activities remained unchanged for the three months ended July 29, 2007, and decreased by \$3 million for the nine months ended July 29, 2007 due to a net decrease in the intrinsic value of derivatives.

Note 9 Stockholders Equity**Comprehensive Income**

Components of comprehensive income, on an after-tax basis where applicable, were as follows:

Stock Repurchase Program

Since March 1996, Applied has systematically repurchased shares of its common stock in the open market. In March 2006, the Board of Directors approved a stock repurchase program for up to \$5.0 billion in repurchases over the next three years ending in March 2009. Pursuant to this authorization, on September 18, 2006, Applied entered into accelerated stock buyback agreements with Goldman, Sachs & Co. (Goldman Sachs), under which Applied agreed to purchase from Goldman Sachs outstanding shares of Applied common stock for an initial purchase price of \$2.5 billion. Under the agreements, Applied purchased 145 million shares of Applied common stock on September 18, 2006 at a price per share of \$17.20, and Goldman Sachs agreed to purchase an equivalent number of shares in the open market over the following four months. At the end of the four month period, Applied was entitled to or subject to a price adjustment based upon the volume weighted average price of Applied common stock during the purchase period that could be settled, at Applied's option, in cash or shares of its common stock. On January 24, 2007, Applied settled the price adjustment of \$132 million by payment in cash to Goldman Sachs, resulting in an adjusted price per share of \$18.08. The repurchase was funded with Applied's existing cash and investments and reported as treasury stock.

Table of Contents**APPLIED MATERIALS, INC.****NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS (Continued)**

On September 15, 2006, the Board of Directors approved a new stock repurchase program for up to \$5.0 billion in repurchases over the next three years ending in September 2009, of which authorization for \$4.2 billion of repurchases remained as of July 29, 2007. Under this authorization, Applied is continuing a systematic stock repurchase program and also may make supplemental stock repurchases from time to time, depending on market conditions, stock price and other factors.

During the three months ended July 30, 2006 and July 29, 2007, respectively, Applied repurchased 30,658,000 shares of its common stock at an average price of \$16.30 for a total cash outlay of \$500 million, and 20,085,000 shares of its common stock at an average price of \$19.91 for a total cash outlay of \$400 million. During the nine months ended July 30, 2006 and July 29, 2007, respectively, Applied repurchased 84,722,000 shares of its common stock at an average price of \$17.70 for a total cash outlay of \$1.5 billion, and 41,464,000 shares of its common stock at an average price of \$19.29 for a total cash outlay of \$800 million. There were no common stock repurchases made during the first quarter of fiscal 2007.

Dividends

On June 19, 2007, Applied's Board of Directors declared a quarterly cash dividend in the amount of \$0.06 per share, payable on September 6, 2007 to stockholders of record as of August 16, 2007, for a total of \$83 million. On March 14, 2007, Applied's Board of Directors declared a quarterly cash dividend in the amount of \$0.06 per share, which was paid on June 7, 2007 to stockholders of record as of May 17, 2007, for a total of \$83 million. The declaration of any future cash dividend is at the discretion of the Board of Directors and will depend on Applied's financial condition, results of operations, capital requirements, business conditions and other factors.

Note 10 Employee Benefit Plans

Applied sponsors a number of employee benefit plans, including defined benefit plans of certain foreign subsidiaries. The components of the net periodic pension costs of these defined benefit plans for the three and nine months ended July 30, 2006 and July 29, 2007 were as follows:

	Three Months Ended		Nine Months Ended	
	July 30,	July 29,	July 30,	July 29,
	2006	2007	2006	2007
	(In thousands)		(In thousands)	
Service cost	\$ 3,599	\$ 3,947	\$ 10,797	\$ 11,649
Interest cost	2,045	2,627	6,135	7,831
Expected return on plan assets	(1,058)	(1,425)	(3,174)	(4,275)
Amortization of transition obligation	16	16	48	48
Amortization of prior service costs	34	(30)	102	(90)
Amortization of net loss	620	503	1,860	1,509
Net periodic pension cost	\$ 5,256	\$ 5,638	\$ 15,768	\$ 16,672

On February 9, 2007, the Board of Directors of Applied approved a plan to cease development of beamline implant products for semiconductor manufacturing and close the operations of its Implant group based in Horsham, England (see Note 7). A reduction in force led to a curtailment of Applied Materials U.K. Ltd.'s defined benefit pension plan and resulted in a curtailment loss of \$627,000, which is included in restructuring and asset impairment expenses on the Consolidated Condensed Statement of Operations.

Note 11 Borrowing Facilities

Applied has credit facilities for unsecured borrowings in various currencies of up to approximately \$1.2 billion, of which \$1 billion is comprised of a 5-year revolving credit agreement with a group of banks that is scheduled to

Table of Contents**APPLIED MATERIALS, INC.****NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS (Continued)**

expire in January 2012. This agreement provides for borrowings at interest rates keyed to one of the two rates selected by Applied for each advance, and includes financial and other covenants with which Applied was in compliance at July 29, 2007. No amounts were outstanding under this agreement at July 29, 2007. The remaining credit facilities of approximately \$158 million are with Japanese banks at rates indexed to their prime reference rate and are denominated in Japanese yen. No amounts were outstanding under these Japanese credit facilities at July 29, 2007.

Note 12 Business Combinations and Equity-Method Investment

On March 30, 2007, Applied purchased Brooks Software for \$137 million in cash. The acquired business is a leading provider of factory management and control software to the semiconductor and LCD industries. Its products complement Applied's existing software applications and are expected to enable Applied to offer customers a comprehensive computer integrated manufacturing (CIM) solution for optimizing fab operations. The acquired business and its employees are being integrated within the Applied Global Services organization, which is reported under the Fab Solutions segment. Applied recorded an in-process research and development (IPR&D) expense of \$5 million, reported as research, development and engineering expense, goodwill of \$80 million, and other intangible assets of \$47 million. The acquired IPR&D expense was determined by identifying research projects for which technological feasibility had not been established and no alternative future use existed. The value of the projects identified as in-process was determined by estimating the future cash flows from the projects once commercially feasible, discounting the net cash flows back to their present value at a rate commensurate with the level of risk and maturity of the projects, and then applying a percentage of completion to the calculated value.

On August 14, 2006, Applied's wholly-owned subsidiary, Metron Technology, Inc. (Metron), purchased certain assets of UMS Solutions Pte. Ltd.'s parts cleaning and recycling business in Singapore for \$10 million. The acquisition enhanced Metron's capabilities in Southeast Asia with advanced, high-quality parts cleaning services to support its customers' semiconductor manufacturing requirements. In connection with this acquisition, Applied recorded goodwill of \$7 million and other intangible assets of \$1 million.

On July 20, 2006, Applied and Dainippon Screen Mfg. Co., Ltd. (Screen) completed the formation of Sokudo Co., Ltd., a Japanese joint venture company (Sokudo), to deliver advanced track solutions for customers' critical semiconductor manufacturing requirements. Screen owns 52 percent and holds the controlling interest in Sokudo, and Applied owns 48 percent. Screen transferred into Sokudo its existing track business and related intellectual property, including employees, products and its installed base of systems. Applied paid \$147 million for its investment in Sokudo. Additionally, Applied contributed to Sokudo certain technology and related intellectual property and provided key development employees. Screen performs manufacturing for Sokudo under an outsourcing agreement. Applied accounts for its interest in Sokudo under the equity method of accounting. Under this accounting method, Applied's exposure to loss from ongoing operations is limited to \$127 million as of July 29, 2007, which represents Applied's carrying value of its investment in Sokudo. Applied's investment in Sokudo is classified as an equity-method investment on the Consolidated Condensed Balance Sheet, and includes the unamortized excess of Applied's investment over its equity in the joint venture's net assets in the amount of \$41 million, which is being amortized on a straight-line basis over its estimated economic useful life of 7 years.

On July 7, 2006, Applied completed its acquisition of Applied Films Corporation, a Colorado corporation (Applied Films) and leading supplier of thin film deposition equipment used in manufacturing LCD, solar cells, flexible electronics and energy-efficient glass. Applied paid \$28.50 per share in cash for each outstanding share of Applied

Films. The total purchase price was approximately \$484 million, or \$328 million net of Applied Films existing cash and marketable securities. As part of the acquisition, Applied assumed Applied Films outstanding stock options and restricted stock awards that, at the acquisition date, had a total fair value of \$26 million, of which \$18 million was allocated to the purchase price and the remainder to unearned compensation. Upon the acquisition and subject to vesting, Applied Films stock options became exercisable for shares of Applied common stock and Applied Films restricted stock awards became payable in shares of Applied common stock totaling, in the

Table of Contents

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS (Continued)

aggregate, three million shares of Applied common stock. The fair value of the assumed Applied Films stock options was determined using a Black-Scholes model. The use of the Black-Scholes model and method of determining the variables is consistent with Applied's valuation of equity-based compensation. Applied recorded an IPR&D expense of \$14 million, reported as research, development and engineering expense; goodwill of \$226 million; and other intangible assets of \$140 million. The acquired IPR&D expense was determined by identifying research projects for which technological feasibility had not been established and no alternative future use existed. The value of the projects identified as in-process was determined by estimating the future cash flows from the projects once commercially feasible, discounting the net cash flows back to their present value at a rate commensurate with the level of risk and maturity of the projects, and then applying a percentage of completion to the calculated value.

On December 23, 2005, Applied acquired all of the outstanding shares of ChemTrace Corporation and ChemTrace Precision Cleaning, Inc. for approximately \$22 million in cash, net of cash acquired, of which \$18 million was paid upon closing. This business provides customers with precision parts cleaning and materials testing solutions. In connection with this acquisition, Applied recorded goodwill of \$12 million and other intangible assets of \$8 million.

For all of the purchase business combinations discussed above, the results of operations prior to the acquisition dates were not material in relation to those of Applied for any of the periods presented herein. Goodwill is not amortized but is reviewed periodically for impairment and purchased technology and other intangible assets are amortized over their useful life of 1 to 15 years.

Note 13 Income Taxes

Applied's effective income tax rate for the third quarter of fiscal 2007 was 31.1 percent. Applied's effective income tax rate was 29.1 percent for the comparable quarter of fiscal 2006 and included benefits of \$34 million due primarily to a favorable resolution of audits of prior years' income tax filings. Applied's future effective income tax rate depends on various factors, such as tax legislation, the geographic composition of Applied's pre-tax income, and the tax rate on equity compensation. Management carefully monitors these factors and timely adjusts the effective income tax rate accordingly.

Note 14 Industry Segment Operations

Applied's four reportable segments are: Silicon, Fab Solutions, Display, and Adjacent Technologies. Applied's chief operating decision-maker, the President and CEO, reviews operating results to make decisions about allocating resources and assessing performance for the entire Company. Segment information is presented based upon Applied's management organization structure as of July 29, 2007 and the distinctive nature of each segment. Prior periods have been reclassified to conform to the current presentation. Future changes to this internal financial structure may result in changes to the reportable segments disclosed. Prior to the fourth quarter of fiscal 2006, Applied operated in one reportable segment.

Each reportable segment is separately managed and has separate financial results that are reviewed by Applied's chief operating decision-maker. Each reportable segment contains closely related products that are unique to the particular segment. Segment operating income is determined based upon internal performance measures used by the President and CEO.

Applied derives the segment results from its internal management reporting system. The accounting policies Applied uses to derive reportable segment results are substantially the same as those used for external reporting purposes. Management measures the performance of each reportable segment based upon several metrics, including orders, net sales and operating income. Management uses these results to evaluate the performance of, and to assign resources to, each of the reportable segments. Applied does not allocate to its reportable segments certain operating expenses, which it manages separately at the corporate level. These unallocated costs include charges for equity-

Table of Contents**APPLIED MATERIALS, INC.****NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS (Continued)**

based compensation and certain components of variable compensation, corporate marketing and sales, corporate functions (certain management, finance, legal, human resources and RD&E), and unabsorbed information technology and occupancy. In addition, Applied does not allocate to its reportable segments restructuring and asset impairment charges and any associated adjustments related to restructuring actions. Segment operating income excludes interest income, interest expense and other financial charges and income taxes. Management does not consider the unallocated costs in measuring the performance of the reportable segments.

The Silicon segment is comprised of a wide range of semiconductor manufacturing equipment that customers use to perform most of the steps in the chip fabrication process, including atomic layer deposition, chemical vapor deposition, physical vapor deposition, electrochemical plating, etch, ion implantation, rapid thermal processing, chemical mechanical planarization, wafer wet cleaning, and wafer metrology and inspection.

The Fab Solutions segment is comprised of a broad range of products and services designed to improve the performance and productivity of semiconductor manufacturers' fab operations.

Applied reports under the Display segment the manufacture, sale and service of equipment used to fabricate and test LCDs for televisions, computer displays and other applications. With the acquisition of Applied Films, the Display segment was expanded to include equipment to manufacture color filters for LCDs.

Applied reports under the Adjacent Technologies segment the manufacture, sale and service of equipment used to fabricate solar photovoltaic cells, flexible electronics and energy-efficient glass.

Information for each reportable segment for the three months and nine months ended July 30, 2006 and July 29, 2007 is as follows:

	Three Months Ended		Nine Months Ended	
	Operating		Operating	
	Net Sales	Income	Net Sales	Income
	(Loss)		(Loss)	
	(In thousands)		(In thousands)	
2006:				
Silicon	\$ 1,642,682	\$ 586,300	\$ 4,358,889	\$ 1,429,271

Income from operations	\$ 680,781	\$ 671,862	\$ 1,385,791	\$ 1,810,412

Note 15 Recent Accounting Pronouncements

In February 2007, the Financial Accounting Standards Board (FASB) issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115 (SFAS No. 159), which permits entities to elect to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. This election is irrevocable. SFAS No. 159 will be effective for Applied in fiscal 2009. Applied is evaluating the potential impact of the implementation of SFAS No. 159 on its financial position and results of operations.

In September 2006, the FASB issued Statement No. 158, Employer's Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106, and 132R (SFAS 158). SFAS 158 requires an entity to recognize in its statement of financial condition the funded status of its defined benefit post-retirement plans, measured as the difference between the fair value of the plan assets and the benefit obligation. SFAS 158 also requires an entity to recognize changes in the funded status of a defined benefit post-retirement plan directly to accumulated other comprehensive income, net of tax, to the extent such changes are not recognized in earnings as components of periodic net benefit cost. SFAS 158 is effective for Applied in the fourth quarter of fiscal 2007. Applied does not expect the implementation of this standard to have a material effect on Applied's financial position or results of operations.

In September 2006, the FASB issued Statement No. 157, Fair Value (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in accordance with generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS 157 becomes effective for Applied in fiscal 2009. Applied is evaluating the potential impact of the implementation of SFAS 157 on its financial position and results of operations.

In September 2006, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 108, Considering the Effects of Prior Year Misstatements When Quantifying Misstatements in Current Year Financial Statements (SAB 108), which provides interpretive guidance on how the effects of the carryover or reversal of prior year

misstatements should be considered in quantifying a current misstatement. SAB 108 is effective for Applied in the fourth quarter of fiscal 2007. Applied does not expect the implementation of this staff accounting bulletin to have a material effect on Applied's financial position or results of operations.

In July 2006, the FASB issued FASB Interpretation 48, Accounting for Income Tax Uncertainties (FIN 48). FIN 48 defines the threshold for recognizing the benefits of tax return positions in the financial statements as more-likely-than-not to be sustained by the taxing authority. The recently-issued literature also provides guidance on the derecognition, measurement and classification of income tax uncertainties, along with any related interest and penalties. FIN 48 also includes guidance concerning accounting for income tax uncertainties in interim periods and increases the level of disclosures associated with any recorded income tax uncertainties. FIN 48 will become effective for Applied beginning in fiscal 2008. Any differences between the amounts recognized in the statements of financial position prior to the adoption of FIN 48 and the amounts reported after adoption will be accounted for as a

Table of Contents

APPLIED MATERIALS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS (Continued)

cumulative-effect adjustment recorded to the beginning balances of goodwill, additional paid in capital or retained earnings. Applied is evaluating the potential impact of the implementation of FIN 48 on its financial position and results of operations.

Note 16 Subsequent Events

On August 28, 2007, Applied announced that it has agreed to purchase certain assets from BOC Edwards, Inc. of its Kachina semiconductor equipment parts cleaning and refurbishment business for an undisclosed amount, subject to certain closing conditions and is expected to be completed in the fourth quarter of fiscal 2007. The results of operations of this acquisition are not expected to have a material effect on Applied's fiscal 2007 financial condition or results of operations.

On June 25, 2007, Applied entered into an agreement with the shareholders of HCT Shaping Systems SA (HCT), a privately-held company based in Switzerland, to purchase all of the outstanding shares of HCT. The closing of the share purchase occurred on August 23, 2007, at which time HCT became a wholly-owned subsidiary of Applied. HCT is the world's leading supplier of precision wafering systems used principally in manufacturing crystalline silicon (c-Si) substrates for the solar industry. Applied paid the aggregate sum of approximately CHF (Swiss Francs) 583 million (or approximately US \$483 million) in cash for the shares. The acquisition is part of Applied's strategy to accelerate customers' ability to reduce the costs of c-Si photovoltaic cell manufacturing in order to make solar energy more competitive with grid electricity. HCT's wafering systems exactly section silicon ingots into thin substrates for use in fabricating c-Si solar cells. The HCT business and employees will be integrated within Applied's New Business and New Products Group and reported under the Adjacent Technologies segment.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

Certain information contained in this Quarterly Report on Form 10-Q is forward-looking in nature. All statements in this Quarterly Report, including those made by the management of Applied, other than statements of historical fact, are forward-looking statements. Examples of forward-looking statements include statements regarding Applied's future financial results, operating results, cash flows and cash deployment strategies, business strategies, projected costs, products, competitive position, management's plans and objectives for future operations, acquisitions and joint ventures, growth opportunities, and legal proceedings; customers' fab utilization rates, demand and spending; and, semiconductor and semiconductor-related industry trends. These forward-looking statements are based on management's estimates, projections and assumptions as of the date hereof and include the assumptions that underlie such statements. Forward-looking statements may contain words such as may, will, should, could, would, expect, plan, anticipate, believe, estimate, predict, potential and continue, the negative of these terms, or other common terminology. Any expectations based on these forward-looking statements are subject to risks and uncertainties and other important factors, including those discussed below and in Part II, Item 1A, Risk Factors. Other risks and uncertainties may be disclosed from time to time in Applied's other Securities and Exchange Commission (SEC) filings. These and many other factors could affect Applied's future financial condition and operating results and could cause actual results to differ materially from expectations based on forward-looking statements made in this document or elsewhere by Applied or on its behalf. Applied undertakes no obligation to revise or update any forward-looking statements.

Overview

Applied provides nanomanufacturing technologytm solutions for the global semiconductor, liquid crystal display (LCD), solar and related industries, with a broad portfolio of innovative equipment, service and software products. Applied's customers include manufacturers of semiconductor chips and wafers, LCDs, solar photovoltaic (PV) cells, flexible electronics and energy-efficient glass. Applied operates in four reportable segments: Silicon, Fab Solutions, Display, and Adjacent Technologies. Product development and manufacturing activities occur in North America, Europe, Israel and Asia. Applied's broad range of equipment and service products are highly technical and are sold through a direct sales force.

As a supplier to the semiconductor and semiconductor-related industries, Applied's results are driven by worldwide demand for integrated circuits, which in turn depends on end-user demand for electronic products. Applied's business is subject to cyclical industry conditions as demand for manufacturing equipment and services can change depending on supply and demand for chips, LCDs and other electronic devices as well as other factors, such as technological advances in fabrication processes.

The following table presents certain significant measurements for the three and nine months ended July 30, 2006 and July 29, 2007:

Three Months Ended			Nine Months Ended		
July 30,	July 29,	% Change	July 30,	July 29,	% Change
2006	2007		2006	2007	
(In millions, except per share amounts and percentages)			(In millions, except per share amounts and percentages)		

Edgar Filing: APPLIED MATERIALS INC /DE - Form 10-Q

New orders	\$ 2,670	\$ 2,284	(14)%	\$ 7,199	\$ 7,471	4%
Net sales	\$ 2,543	\$ 2,561	1%	\$ 6,649	\$ 7,368	11%
Gross margin	\$ 1,223	\$ 1,216	(1)%	\$ 3,106	\$ 3,416	10%
Gross margin percent	48.1%	47.5%	(1)%	46.7%	46.4%	(1)%
Net income	\$ 512	\$ 474	(8)%	\$ 1,068	\$ 1,288	21%
Earnings per diluted share	\$ 0.33	\$ 0.34	3%	\$ 0.67	\$ 0.91	35%

Results for the first nine months of fiscal 2007 reflected improved conditions in the semiconductor industry that began with the industry's recovery in 2006. During this period conditions in the display industry were mixed as manufacturers postponed capacity additions despite strong consumer demand. Orders and net sales increased during the first nine months of fiscal 2007 over the corresponding period in fiscal 2006, primarily due to strong

Table of Contents

demand from DRAM and flash memory chip manufacturers, partially offset by a significant decline in the LCD equipment business as manufacturers absorbed capacity following substantial growth in 2006. Orders declined for the third quarter of fiscal 2007 compared to the prior year period reflecting the weakness in demand for LCD equipment, in addition to a drop in demand for equipment from foundries and logic customers and lower fab operations demand. Sales increased slightly for the third quarter of fiscal 2007, compared to the third quarter of fiscal 2006, as strength in memory was offset by lower fab operations spending.

Net income for the first nine months of fiscal 2007 improved compared to the same period in the prior year due to higher sales and lower restructuring and asset impairment charges and a continued focus on operating efficiency and cost controls, offset in part by lower interest income. Fiscal 2007 results included restructuring and asset impairment and other charges associated with ceasing development of beamline implant products, equity-based compensation expenses, and an in-process research and development (IPR&D) expense associated with the acquisition of certain net assets of Brooks Automation, Inc. (Brooks Software). Net income for the third quarter of fiscal 2007 declined compared to the same period in the prior year due to lower interest income and losses recognized on the equity method investment, partially offset by savings from a continued focus on operating efficiency and cost controls.

Results of Operations

Applied received new orders of \$2.3 billion for the third quarter of fiscal 2007, compared to \$2.6 billion for the second quarter of fiscal 2007 and \$2.7 billion for the third quarter of fiscal 2006. New orders for the third quarter of fiscal 2007 decreased by 14 percent from the preceding quarter and decreased by 14 percent from the third quarter of fiscal 2006. The decrease in new orders for the third quarter of fiscal 2007 from the previous quarter was primarily attributable to lower demand for semiconductor equipment for DRAM applications as customers absorbed recently-added capacity, compounded by lower demand for service products and continuing weakness in foundry and LCD equipment demand. New orders increased 4 percent to \$7.5 billion for the first nine months of fiscal 2007, compared to \$7.2 billion for the first nine months of fiscal 2006. Increased orders for the first nine months reflected increased demand for semiconductor manufacturing equipment and service products, partially offset by delays in investment by LCD customers.

New orders by geographic region (determined by the location of customers' facilities) for the past two consecutive quarters were as follows:

	Three Months Ended			
	April 29, 2007		July 29, 2007	
	(\$)	(%)	(\$)	(%)
	(Dollars in millions)			
Taiwan	781	30	715	31
Japan	378	14	454	20
Korea	410	15	430	19
North America*	403	15	271	12
Southeast Asia and China	389	15	216	9
Europe	287	11	198	9
Total	2,648	100	2,284	100

* Primarily the United States.

Applied's backlog for the most recent three fiscal quarters was as follows: \$3.4 billion at July 29, 2007, \$3.7 billion at April 29, 2007, and \$3.6 billion at January 28, 2007. Backlog consists only of orders for which written authorizations have been accepted, shipment dates within 12 months have been assigned and revenue has not been recognized. Due to the potential for customer changes in delivery schedules or cancellation of orders, Applied's backlog at any particular time is not necessarily indicative of actual sales for any future periods.

Net sales increased 1 percent to \$2.6 billion for the third quarter of fiscal 2007, compared to \$2.5 billion for the second quarter of fiscal 2007 and the third quarter of fiscal 2006, reflecting higher net sales of semiconductor

Table of Contents

equipment to memory application manufacturers, partially offset by continued delays in capital investment by LCD manufacturers and lower fab operations spending. Net sales increased 11 percent to \$7.4 billion for the first nine months of fiscal 2007, compared to \$6.6 billion for the first nine months of fiscal 2006, reflecting higher net sales of semiconductor equipment to memory application manufacturers, partially offset by continued delays in capital investment by LCD manufacturers.

Net sales by geographic region (determined by the location of customers' facilities) for the three and nine months ended July 30, 2006 and July 29, 2007 were as follows:

	Three Months Ended				Nine Months Ended			
	July 30, 2006		July 29, 2007		July 30, 2006		July 29, 2007	
	(\$)	(%)	(\$)	(%)	(\$)	(%)	(\$)	(%)
(In millions, except percentages)								
Taiwan	688	27	895	35	1,515	23	2,105	29
Korea	412	16	397	16	1,307	20	1,373	19
Southeast Asia and China	382	15	343	13	807	12	972	13
North America(*)	418	17	342	13	1,197	18	1,178	16
Japan	415	16	337	13	1,074	16	1,064	14
Europe	228	9	247	10	749	11	676	9
Total	2,543	100	2,561	100	6,649	100	7,368	100

* Primarily the United States.

Gross margin percentage was 47.5 percent for the third quarter of fiscal 2007, compared to 48.1 percent for the third quarter of fiscal 2006. The decrease in the gross margin percentage for the third quarter of fiscal 2007 from that of the prior year's period was principally attributable to product mix, incremental charges attributable to acquisitions consisting of inventory fair value adjustments on products sold and amortization of purchased intangible assets, partially offset by higher revenue levels and lower material costs. Gross margin during the third quarters of fiscal 2006 and 2007 included \$9 million and \$8 million, respectively, of equity-based compensation expense.

Gross margin percentage was 46.4 percent for the for the first nine months of fiscal 2007, compared to 46.7 percent for the first nine months of fiscal 2006. The decrease in the gross margin percentage for the first nine months of fiscal 2007 from that of the prior year's period was principally attributable to inventory-related charges of \$53 million associated with ceasing development of beamline implant products, incremental charges attributable to acquisitions consisting of inventory fair value adjustments on products sold and amortization of purchased intangible assets and product mix, partially offset by higher revenue levels and lower material costs. Gross margin during the first nine months of fiscal 2006 and 2007 included \$27 million and \$22 million, respectively, of equity-based compensation expense.

Operating expenses included expenses related to RD&E, marketing and selling (M&S), and general and administrative (G&A). Expenses related to RD&E, M&S and G&A were \$543 million for the third quarter of fiscal 2007 compared to \$545 million for the third quarter of fiscal 2006, and \$1.6 billion for the first nine months of fiscal 2007 compared to \$1.5 billion for the first nine months of fiscal 2006. Higher operating expenses in these categories

during the first nine months of fiscal 2007 compared to the same period in the prior year were principally attributable to increased operating costs from acquired businesses. These were partially offset by lower equity and variable compensation expenses and savings from cost control initiatives, including ceasing development of beamline implant products and transitioning to managed services providers to perform information technology and business infrastructure support. During the first nine months of fiscal 2007 and fiscal 2006, Applied recognized RD&E expenses for IPR&D charges related to acquisitions of \$5 million and \$14 million, respectively. (See Note 12 of the Notes to Consolidated Condensed Financial Statements.)

Operating expenses for the nine months ended July 29, 2007 include inventory-related charges reported as cost of products sold of \$53 million, other operating expenses of \$3 million and restructuring and asset impairment

Table of Contents

charges of \$27 million associated with ceasing development of beamline implant products. (See Note 7 of Notes to Consolidated Condensed Financial Statements.)

Operating expenses during the first nine months of fiscal 2006 and 2007 included asset impairment and restructuring charges of \$211 million, and a benefit of \$4 million, respectively, related to the disinvestment of certain real estate. (See Note 7 of Notes to Consolidated Condensed Financial Statements.)

Net interest income was \$22 million and \$42 million for the three months ended July 29, 2007 and July 30, 2006, respectively and \$67 million and \$121 million for the nine months ended July 29, 2007 and July 30, 2006, respectively. Lower net interest income during the third quarter and first nine months of fiscal 2007 was primarily due to the reduction in cash and investments during the fourth quarter of fiscal 2006, when Applied repurchased 145 million shares of its outstanding common stock for an aggregate purchase price of \$2.6 billion under an accelerated buyback program. The repurchase was funded with Applied's existing cash and investments, resulting in lower interest income.

Applied's effective income tax rate for the third quarter of fiscal 2007 was 31.1 percent. Applied's effective income tax rate was 29.1 percent for the comparable quarter of fiscal 2006 and included benefits of \$34 million due primarily to a favorable resolution of audits of prior years' income tax filings. Applied's future effective income tax rate depends on various factors, such as tax legislation, the geographic composition of Applied's pre-tax income, and the tax rate on equity compensation. Management carefully monitors these factors and timely adjusts the effective income tax rate accordingly.

Segment Information

A description of the products and services, as well as financial data, for Applied's Silicon, Fab Solutions, Display, and Adjacent Technologies reportable segments can be found in Note 14 of Notes to Consolidated Condensed Financial Statements. Future changes to Applied's internal financial reporting structure may result in changes to the reportable segments disclosed. Applied does not allocate to its reportable segments certain operating expenses which are reported separately at the corporate level. These unallocated costs include charges for equity-based and certain components of variable compensation, corporate marketing and sales, corporate functions (certain management, finance, legal, human resources and RD&E), unabsorbed information technology and occupancy. Prior to the fourth quarter of fiscal 2006, Applied operated in one reportable segment. Accordingly, prior period amounts have been reclassified to conform to the current presentation. Discussions below include the results of each reportable segment for the three and nine months ended July 30, 2006 and July 29, 2007.

Silicon Segment

The Silicon segment includes semiconductor capital equipment for etch, front end, thin film, chemical mechanical planarization (CMP), and inspection. Development efforts are focused on solving customers' key technical challenges, including transistor performance and nanoscale patterning, and on reducing chip manufacturing costs. A significant portion of fiscal 2007 demand was attributable to a growing market for consumer products with increased memory content.

Three Months Ended		Nine Months Ended	
July 30,	July 29,	July 30,	July 29,
2006	2007	2006	2007
(In millions)		(In millions)	

Edgar Filing: APPLIED MATERIALS INC /DE - Form 10-Q

New orders	\$ 1,850	\$ 1,614	\$ 4,881	\$ 5,308
Net sales	\$ 1,643	\$ 1,772	\$ 4,359	\$ 5,000
Operating income	\$ 586	\$ 702	\$ 1,429	\$ 1,829

Silicon new orders decreased 13 percent to \$1.6 billion for the third quarter of fiscal 2007, compared to \$1.9 billion for the third quarter of fiscal 2006, due to a drop in demand for equipment from foundries and logic customers. Decreased orders in thin films, inspection, etch, and beamline implant product were partially offset by increases in front end product orders. New orders increased 9 percent to \$5.3 billion for the first nine months of fiscal 2007, compared to \$4.9 billion for the first nine months of fiscal 2006, reflecting the semiconductor industry's growth during this period, driven by demand for cell phones, digital TVs, game consoles, MP3 players and other

Table of Contents

electronic products. The majority of new orders were for memory applications as customers invested in leading-edge Flash and DRAM memory devices, while orders from foundries remained at low levels due to low utilization rates.

Net sales increased 8 percent to \$1.8 billion for the third quarter of fiscal 2007 from \$1.6 billion for the third quarter of fiscal 2006. Net sales increased 15 percent to \$5.0 billion for the first nine months of fiscal 2007, compared to \$4.4 billion for the first nine months of fiscal 2006. Increases in net sales for both periods were due to increased investment by memory and logic semiconductor customers in multiple areas, including etch, inspection, and front end products.

Operating income increased 20 percent to \$702 million for the third quarter of fiscal 2007 from \$586 million for the third quarter of fiscal 2006. Operating income increased 28 percent to \$1.8 billion for the first nine months of fiscal 2007, compared to \$1.4 billion for the first nine months of fiscal 2006. Operating income increases in both periods were due to higher revenue levels and continued focus on cost controls. Operating income for the first nine months of fiscal 2007 included charges of \$57 million related to ceasing development of beamline implant products.

Fab Solutions Segment

The Fab Solutions segment consists of the services business that delivers products to improve the operating efficiency of customers' factories and includes spares and remanufactured equipment sales. Customer demand for spare parts and services is fulfilled through a global distribution system with trained service engineers located in close proximity to customer sites. This business is focused on expanding with technically-differentiated new products that reduce fab operation costs and enable customers to lessen the environmental impact of manufacturing.

	Three Months Ended		Nine Months Ended	
	July 30, 2006	July 29, 2007	July 30, 2006	July 29, 2007
	(In millions)		(In millions)	
New orders	\$ 587	\$ 527	\$ 1,635	\$ 1,772
Net sales	\$ 602	\$ 554	\$ 1,620	\$ 1,624
Operating income	\$ 184	\$ 137	\$ 454	\$ 424

New orders decreased 10 percent to \$527 million for the third quarter of fiscal 2007, compared to \$587 million for the third quarter of fiscal 2006, due to lower orders for remanufactured equipment, partially offset by increased orders for spares and factory software products that became available with Applied's acquisition of Brooks Software. New orders increased 8 percent to \$1.8 billion for the first nine months of fiscal 2007, compared to \$1.6 billion for the first nine months of fiscal 2006. Increased orders for the first nine months reflected increased demand for spares parts and factory automation products acquired from Brooks Software.

Net sales decreased 8 percent to \$554 million for the third quarter of fiscal 2007, compared to \$602 million for the third quarter of fiscal 2006, reflecting lower sales for remanufactured equipment and spares, partially offset by increased factory software sales. Net sales of \$1.6 billion for the first nine months of fiscal 2007 were flat compared to the first nine months of fiscal 2006 and reflected declines in spares and remanufactured equipment sales, offset by increased factory software sales.

Operating income decreased 26 percent to \$137 million for the third quarter of fiscal 2007 from \$184 million for the third quarter of fiscal 2006 as a result of lower net sales and product mix. Operating income decreased 7 percent to

\$424 million for the first nine months of fiscal 2007, compared to \$454 million for the first nine months of fiscal 2006, reflecting product mix and increased operating expenses and charges related to the recently acquired software division.

Display Segment

The Display segment encompasses products and services for manufacturing liquid crystal flat panel displays for personal computers and TVs, including high-definition TVs. The Display segment is focused on expanding market share by differentiation with larger-scale substrates, entry into new markets, and development of products to enable cost reductions through productivity and uniformity.

Table of Contents

	Three Months Ended		Nine Months Ended	
	July 30, 2006	July 29, 2007	July 30, 2006	July 29, 2007
	(In millions)		(In millions)	
New orders	\$ 233	\$ 90	\$ 683	\$ 244
Net sales	\$ 298	\$ 206	\$ 670	\$ 640
Operating income	\$ 111	\$ 52	\$ 224	\$ 159

After a record year in fiscal 2006, display orders declined dramatically as customers absorbed factory capacity. New orders decreased 61 percent to \$90 million for the third quarter of fiscal 2007, compared to \$233 million for the third quarter of fiscal 2006. New orders decreased 64 percent to \$244 million for the first nine months of fiscal 2007, compared to \$683 million for the first nine months of fiscal 2006. Order declines in both periods reflected continued delays in capacity expansion plans by LCD panel makers in light of excess inventories and price declines.

Net sales decreased 31 percent to \$206 million for the third quarter of fiscal 2007 from \$298 million for the third quarter of fiscal 2006, and decreased 4 percent to \$640 million for the first nine months of fiscal 2007 from \$670 million for the first nine months of fiscal 2006. Decreases in net sales for both periods were attributable to lower investment by LCD manufacturers as they absorbed capacity.

Operating income decreased 53 percent to \$52 million for the third quarter of fiscal 2007 from \$111 million for the third quarter of fiscal 2006 due to lower revenue levels, lower factory absorption and product mix, partially offset by lower costs. Operating income decreased 29 percent to \$159 million for the first nine months of fiscal 2007, compared to \$224 million for the first nine months of fiscal 2006, due to lower revenues and factory absorption, product mix and higher operating expenses in support of the expanded product portfolio resulting from the acquisition of Applied Films in July 2006. Results for the three and nine months ended July 30, 2006 included a \$5 million IPR&D expense related to the acquisition of Applied Films.

Adjacent Technologies Segment

The Adjacent Technologies segment includes products and services for manufacturing solar cells, high throughput roll-to-roll coating systems for flexible electronics and web products, and energy-efficient glass. Applied began offering these products after the acquisition of Applied Films in the third quarter of fiscal 2006. The Adjacent Technologies segment is focused on delivering solutions to generate and conserve energy, with a focus on lowering the cost to produce solar electricity by providing equipment and services to enhance manufacturing scale and efficiency.

	Three Months Ended		Nine Months Ended	
	July 30, 2006	July 29, 2007	July 30, 2006	July 29, 2007
	(In millions)		(In millions)	
New orders	\$	\$ 53	\$	\$ 147
Net sales		\$ 29		\$ 103
Operating income/(loss)	\$ (9)	\$ (29)	\$ (9)	\$ (59)

New orders of \$53 million for the third quarter of fiscal 2007 decreased by 16 percent from the preceding quarter, due primarily to decreased orders of crystalline silicon solar products. Net sales of \$29 million for the third quarter of fiscal 2007 decreased by 33 percent from the preceding quarter due primarily to lower flexible electronics and solar net sales. Operating loss of \$29 million for the third quarter of fiscal 2007 increased from the preceding quarter reflecting lower revenues and increased RD&E spending to develop products and services that enable lower cost production of solar energy. Results for the three and nine months ended July 30, 2006 consisted of a \$9 million IPR&D expense related to the acquisition of Applied Films.

Financial Condition, Liquidity and Capital Resources

During the nine months ended July 29, 2007, cash, cash equivalents and investments increased by \$545 million, from \$3.2 billion as of October 29, 2006 to \$3.8 billion as of July 29, 2007.

Table of Contents

Cash, cash equivalents and investments consist of the following:

	October 29, 2006	July 29, 2007
	(In millions)	
Cash and cash equivalents	\$ 861	\$ 1,113
Short-term investments	1,036	1,295
Long-term investments	1,315	1,349
Total cash, cash equivalents and investments	\$ 3,212	\$ 3,757

Applied generated \$1.5 billion of cash from operating activities for the nine months ended July 29, 2007. The primary source of operating cash flow for the nine months ended July 29, 2007 was net income, adjusted to exclude the effect of non-cash charges including depreciation, amortization, equity-based compensation, restructuring and asset impairments, and IPR&D expenses, which was partially offset by changes in operating assets and liabilities. Applied sold certain accounts receivable and discounted certain letters of credit totaling \$392 million for the nine months ended July 29, 2007. Days sales outstanding for the third quarter of fiscal 2007 increased to 80 days, compared to 76 days in the second quarter, primarily due to regional mix. Availability and usage of these accounts receivable sales programs depend on many factors, including the willingness of financial institutions to purchase accounts receivable and the cost of such arrangements. For further details regarding accounts receivable sales, see Note 3 of Notes to Consolidated Condensed Financial Statements.

Applied used \$580 million of cash for investing activities during the nine months ended July 29, 2007. Applied acquired certain net assets of Brooks Software for \$137 million in cash. Capital expenditures totaled \$204 million, including investment in Applied's new global development capability center in Xi'an, China, and in Applied's Business Transformation initiative to migrate to a single ERP software platform. Purchases of investments net of proceeds from sales and maturities of investments totaled \$262 million.

Applied used \$701 million of cash for financing activities during the nine months ended July 29, 2007, consisting primarily of \$932 million to repurchase common shares and payment of \$223 million in dividends to stockholders, partially offset by \$436 million received from the issuance of common stock under equity plans.

On June 19, 2007, Applied's Board of Directors declared a quarterly cash dividend in the amount of \$0.06 per share, payable on September 6, 2007 to stockholders of record as of August 16, 2007, for a total of \$83 million. On March 14, 2007, Applied's Board of Directors declared a quarterly cash dividend in the amount of \$0.06 per share, which was paid on June 7, 2007 to stockholders of record as of May 17, 2007, for a total of \$83 million. The declaration of any future cash dividends is at the discretion of the Board of Directors and will depend on Applied's financial condition, results of operations, capital requirements, business conditions and other factors.

Applied has credit facilities for unsecured borrowings in various currencies of up to approximately \$1.2 billion, of which \$1 billion is comprised of a 5-year revolving credit agreement with a group of banks that is scheduled to expire in January 2012. The agreement provides for borrowings at interest rates keyed to one of the two rates selected by Applied for each advance, and includes financial and other covenants with which Applied was in compliance at July 29, 2007. No amounts were outstanding under this agreement at July 29, 2007 (See Note 11 of Notes to Consolidated Condensed Financial Statements). A \$200 million principal payment is due and payable in October 2007 for current maturities of Applied's unsecured senior notes, which is expected to be paid from existing cash balances

and cash generated from operations.

During the third quarter of fiscal 2007, Applied announced the signing of an agreement to acquire all of the outstanding shares of HCT Shaping Systems SA (HCT), a privately held company based in Switzerland, for approximately CHF (Swiss Francs) 583 million (or approximately US \$483 million) in cash. This transaction closed during the fourth quarter of fiscal 2007. During the third quarter of fiscal 2007, Applied announced that it agreed to purchase certain assets from BOC Edwards, Inc. of its Kachina semiconductor equipment parts cleaning and refurbishment business for an undisclosed amount. This transaction is expected to close in the fourth quarter of fiscal 2007. For additional information regarding these business combinations, see Note 16 of Notes to Consolidated Condensed Financial Statements.

Table of Contents

In the ordinary course of business, Applied provides standby letters of credit or other guarantee instruments to certain parties as required for certain transactions initiated by either Applied or its subsidiaries. As of July 29, 2007, the maximum potential amount of future payments that Applied could be required to make under these guarantee arrangements was approximately \$136 million. Applied has not recorded any liability in connection with these guarantee arrangements beyond that required to appropriately account for the underlying transaction being guaranteed. Applied does not believe, based on historical experience and information currently available, that it is probable that any amounts will be required to be paid under these guarantee arrangements.

Although cash requirements will fluctuate based on the timing and extent of many factors such as those discussed above and in Part II, Item IA, Risk Factors below, Applied's management believes that cash generated from operations, together with the liquidity provided by existing cash balances and borrowing capability, will be sufficient to satisfy Applied's liquidity requirements for the next 12 months. For further details regarding Applied's operating, investing and financing activities, see the Consolidated Condensed Statements of Cash Flows.

Critical Accounting Policies and Estimates

The preparation of consolidated financial statements and related disclosures in conformity with accounting principles generally accepted in the United States requires management to make judgments, assumptions and estimates that affect the amounts reported. Certain of these significant accounting policies are considered to be critical accounting policies, as defined below.

A critical accounting policy is defined as one that is both material to the presentation of Applied's consolidated financial statements and requires management to make difficult, subjective or complex judgments that could have a material effect on Applied's financial condition or results of operations. Specifically, these policies have the following attributes: (1) Applied is required to make assumptions about matters that are highly uncertain at the time of the estimate; and (2) different estimates Applied could reasonably have used, or changes in the estimate that are reasonably likely to occur, would have a material effect on Applied's financial condition or results of operations.

Estimates and assumptions about future events and their effects cannot be determined with certainty. Applied bases its estimates on historical experience and on various other assumptions believed to be applicable and reasonable under the circumstances. These estimates may change as new events occur, as additional information is obtained and as Applied's operating environment changes. These changes have historically been minor and have been included in the consolidated financial statements as soon as they became known. In addition, management is periodically faced with uncertainties, the outcomes of which are not within its control and will not be known for prolonged periods of time. These uncertainties include those discussed in Part II, Item 1A, Risk Factors. Based on a critical assessment of its accounting policies and the underlying judgments and uncertainties affecting the application of those policies, management believes that Applied's consolidated financial statements are fairly stated in accordance with accounting principles generally accepted in the United States of America, and provide a meaningful presentation of Applied's financial condition and results of operations. Management has discussed the development, selection and disclosure of significant estimates with the Audit Committee of our Board of Directors.

For further information about Applied's critical accounting policies, see the discussion of critical accounting policies in Applied's 2006 Form 10-K. Management believes that there has been no significant change during the nine months ended July 29, 2007 to the items disclosed as critical accounting policies in Applied's 2006 Form 10-K.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk*

Applied's investment portfolio includes fixed-income securities with a fair value of approximately \$2.7 billion at July 29, 2007. These securities are subject to interest rate risk and will decline in value if interest rates increase. Based

on Applied's investment portfolio at July 29, 2007, an immediate 100 basis point increase in interest rates would result in a decrease in the fair value of the portfolio of approximately \$30 million. While an increase in interest rates reduces the fair value of the investment portfolio, Applied will not realize the losses in the consolidated condensed statement of operations unless the individual fixed-income securities are sold prior to recovery or the loss is determined to be other-than-temporarily impaired.

Table of Contents

Certain operations of Applied are conducted in foreign currencies. Applied enters into currency forward exchange and option contracts to hedge a portion of, but not all, existing and anticipated foreign currency denominated transactions expected to occur within 12 months. Gains and losses on these contracts are generally recognized in income at the time that the related transactions being hedged are recognized. Because the effect of movements in currency exchange rates on currency forward exchange and option contracts generally offsets the related effect on the underlying items being hedged, these financial instruments are not expected to subject Applied to risks that would otherwise result from changes in currency exchange rates. Applied does not use derivative financial instruments for trading or speculative purposes. Net foreign currency gains and losses were not material for the nine months ended July 30, 2006 and July 29, 2007.

Item 4. *Controls and Procedures*

As required by Rule 13a-15(b) under the Securities Exchange Act of 1934, as amended (Exchange Act), Applied's management, including the Chief Executive Officer and Chief Financial Officer, conducted an evaluation as of the end of the period covered by this report, of the effectiveness of Applied's disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that Applied's disclosure controls and procedures were effective as of the end of the period covered by this report in ensuring that information required to be disclosed in our SEC reports is (i) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (ii) accumulated and communicated to Applied's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

As required by Rule 13a-15(d), Applied management, including the Chief Executive Officer and Chief Financial Officer, also conducted an evaluation of Applied's internal control over financial reporting to determine whether any changes occurred during the fiscal quarter that have materially affected, or are reasonably likely to materially affect, Applied's internal control over financial reporting. Based on that evaluation, there has been no such change during the fiscal quarter.

It should be noted that any system of controls, however well designed and operated, can provide only reasonable, and not absolute, assurance that the objectives of the system will be met. In addition, the design of any control system is based in part upon certain assumptions about the likelihood of future events.

PART II. OTHER INFORMATION

Item 1. *Legal Proceedings*

The information set forth above under Note 6 contained in the Notes to Consolidated Condensed Financial Statements is incorporated here by reference.

Item 1A. *Risk Factors*

The risk factors set forth below include any material changes to, and supersede the description of, the risk factors disclosed in Item 1A of the 2006 Form 10-K.

The industries that Applied serves are volatile and unpredictable.

As a supplier to the global semiconductor and semiconductor-related industries, Applied is subject to business cycles, the timing, length and volatility of which can be difficult to predict and which may vary by reportable segment. The industries have historically been cyclical due to sudden changes in customers' manufacturing capacity requirements

and spending, which depend in part on capacity utilization, demand for customers' products, and inventory levels relative to demand. The effects on Applied of these changes in demand, including end-customer demand, are occurring more rapidly. These changes have affected the timing and amounts of customers' purchases and investments in technology, and continue to affect Applied's orders, net sales, gross margin, contributed profit and results of operations.

Table of Contents

Applied must effectively manage its resources and production capacity to meet changing demand. During periods of increasing demand for semiconductor and semiconductor-related manufacturing equipment, Applied must have sufficient manufacturing capacity and inventory to meet customer demand; must be able to attract, retain and motivate a sufficient number of qualified individuals; and must effectively manage its supply chain. During periods of decreasing demand, Applied must be able to appropriately align its cost structure with prevailing market conditions, as well as motivate and retain key employees and effectively manage its supply chain. If Applied is not able to timely and appropriately adapt to changes in industry cycles, Applied's business, financial condition or results of operations may be materially and adversely affected.

Applied is exposed to risks as a result of ongoing changes in the semiconductor and semiconductor-related industries.

The global industries in which Applied operates are characterized by ongoing changes, including: (1) higher capital requirements for building and operating new semiconductor and LCD fabrication plants and the ability to raise the necessary capital; (2) the importance of reducing the cost of system ownership, due in part to the increasing significance of consumer electronics as a driver for semiconductor and display demand and the related focus on lower prices; (3) the heightened importance to customers of system reliability and productivity, and the effect on demand for systems as a result of their increasing productivity, device yield and reliability; (4) the increasing complexity and cost of process development; (5) a significant increase in the number and importance of new materials and the importance of expertise in chemical processes and device structure; (6) the growing types and varieties of semiconductors and expanding number of applications across multiple substrate sizes, resulting in customers' divergent technical demands and different rates of spending on capital equipment; (7) customers' varying adoption rates of new technology; (8) varying levels of business information technology spending; (9) demand for shorter cycle times for the development, manufacture and installation of manufacturing equipment; (10) differing rates of market growth for, and capital investments by, various semiconductor device makers, such as memory (including NAND flash and DRAM), logic and foundry, as well as display and solar manufacturers; (11) the increasing difficulty for customers to move from product design to volume manufacturing; (12) the challenge to semiconductor manufacturers of moving volume manufacturing from one technology node to the next smaller technology node and the resulting impact on the technology transition rate; (13) the increasing cost and reduced affordability of research and development due to many factors, including decreasing linewidths and the increasing number of materials, applications and process steps; (14) the increasing complexity and cost of semiconductor chip designs; (15) the industry growth rate; (16) price trends for certain semiconductor devices and LCDs; (17) the increasing importance of the availability of spare parts to assure maximum system uptime; (18) the reduced affordability of any transition to silicon substrates larger than 300 mm; and (19) the increasing importance of operating flexibility to enable different responses to different markets, customers and applications. If Applied does not successfully manage the risks resulting from the ongoing changes occurring in the semiconductor and semiconductor-related industries, its business, financial condition and results of operations could be materially and adversely affected.

Applied must adapt its business and product offerings to respond to competition and rapid technological changes.

As Applied operates in a highly competitive environment, its future success depends on many factors, including the effective development, commercialization and customer acceptance of its nanomanufacturing technology equipment, service and related products. In addition, Applied must successfully execute its growth strategy, including enhancing market share in existing markets, expanding into related markets, and cultivating new markets, while constantly improving its operational performance. The development, introduction and support of a broadening set of products in more varied competitive environments have grown increasingly complex and expensive over time. Applied's success is subject to many risks, including but not limited to its ability to timely, cost-effectively and successfully: (1) improve and develop new applications for products; (2) increase market share in its existing markets and expand its markets; (3) develop, appropriately price, and achieve market acceptance of new products; (4) appropriately allocate resources,

including RD&E funding, among Applied's products and between the development of new products and the improvement of existing products; (5) accurately forecast demand and meet production schedules for its products; (6) achieve cost efficiencies across product offerings;

Table of Contents

(7) adapt to technology changes in related markets, such as lithography; (8) develop, market and price similar products for use by customers in different applications and/or markets that may have varying technical requirements; (9) adapt to changes in value offered by companies in different parts of the supply chain; (10) qualify products for volume manufacturing with its customers; (11) implement changes in its design engineering methodology, including those that enable significant decreases in material costs and cycle time, greater commonality of platforms and types of parts used in different systems, and effective product life cycle management; and (12) improve its manufacturing processes. Furthermore, new or improved products may involve higher costs and reduced margins. If Applied does not successfully manage these challenges, its business, financial condition and results of operations could be materially and adversely affected.

The entry into related and new markets entails additional challenges.

As part of its growth strategy, Applied must successfully expand into or develop related and new markets, either with its existing nanomanufacturing technology products or with new products developed internally or obtained through acquisitions. The entry into different markets involves additional challenges, including those arising from:

(1) Applied's ability to anticipate demand and capitalize on opportunities, and avoid or minimize risks, in new markets; (2) new customers and suppliers, including some with limited operating histories, uncertain and/or limited funding, and/or locations in regions where Applied does not have existing operations; (3) the adoption of new business models, such as the supply of a suite of Applied and non-Applied equipment sufficient to manufacture solar panels; (4) difficulties in production planning and execution; (5) new materials, processes and technologies; (6) Applied's ability to drive efficiencies and cost reductions; (7) the need to attract, motivate and retain employees with skills and expertise in these new markets; (8) different service requirements; and (9) intellectual property rights of existing participants in the market. Applied has entered the emerging solar market, which is subject to ongoing changes in demand for photovoltaic (PV) products arising from, among other things, fluctuations in the cost of fossil fuels and electric power, availability of government incentives, the performance and reliability of PV technology, and the success of other renewable energy sources. If Applied does not successfully manage the risks resulting from entry into new markets and industries, its business, financial condition and results of operations could be materially and adversely affected.

Applied is exposed to the risks of operating a global business.

In the third quarter of fiscal 2007, approximately 87 percent of Applied's net sales were to customers in regions outside the United States. A rising percentage of Applied's business is from customers in Asia. Certain of Applied's RD&E and manufacturing facilities, as well as suppliers to Applied, are also located outside the United States. Managing Applied's global operations presents challenges, including but not limited to those arising from: (1) global uncertainties with respect to economic growth rates in various countries; (2) varying regional and geopolitical business conditions and demands; (3) global trade issues; (4) variations in protection of intellectual property and other legal rights in different countries; (5) concerns of U.S. governmental agencies regarding possible national commercial and/or security issues posed by the growing manufacturing business in Asia; (6) fluctuating raw material and energy costs; (7) variations in the ability to develop relationships with suppliers and other local businesses; (8) changes in laws and regulations of the United States (including export restrictions) and other countries, as well as their interpretation and application; (9) fluctuations in interest rates and currency exchange rates; (10) the need to provide sufficient levels of technical support in different locations; (11) political instability, natural disasters (such as earthquakes, floods or storms), pandemics, terrorism or acts of war where Applied has operations, suppliers or sales; (12) cultural differences; (13) special customer- or government-supported efforts to promote the development and growth of local competitors; and (14) shipping costs and/or delays. Many of these challenges are present in China, which is experiencing significant growth of both suppliers and prospective competitors to Applied, and which Applied believes presents a large potential market for its products and opportunity for growth over the long term. In addition, Applied must regularly reassess the size, capability and location of its global infrastructure and make appropriate

changes. These challenges may materially and adversely affect Applied's business, financial condition and results of operations.

Table of Contents***Applied is exposed to risks associated with a highly concentrated semiconductor customer base.***

Applied's semiconductor customer base historically has been, and is becoming even more, highly concentrated. Orders from a relatively limited number of manufacturers have accounted for, and are expected to continue to account for, a substantial portion of Applied's net sales. In addition, the mix and type of customers, and sales to any single customer, may vary significantly from quarter to quarter and from year to year. If customers do not place orders, or they delay or cancel orders, Applied may not be able to replace the business. As Applied's products are configured to customer specifications, changing, rescheduling or canceling orders may result in significant non-recoverable costs. Major customers may also seek, and on occasion receive, pricing, payment, intellectual property-related or other commercial terms that are less favorable to Applied. In addition, certain customers have undergone significant ownership changes, have outsourced manufacturing activities, and/or have entered into strategic alliances or industry consortia that have increased the influence of key semiconductor manufacturers in technology decisions made by their partners, which may result in additional complexities in managing customer relationships and transactions. These factors could have a material adverse effect on Applied's business, financial condition and results of operations.

Applied is exposed to risks associated with acquisitions and strategic investments.

Applied has made, and in the future intends to make, acquisitions of, and investments in, companies, technologies or products in existing, related or new markets for Applied. Acquisitions involve numerous risks, including but not limited to: (1) diversion of management's attention from other operational matters; (2) inability to complete acquisitions as anticipated or at all; (3) inability to realize anticipated benefits; (4) failure to commercialize purchased technologies; (5) inability to capitalize on characteristics of new markets that may be significantly different from Applied's existing markets; (6) inability to obtain and protect intellectual property rights in key technologies; (7) ineffectiveness of an acquired company's internal controls; (8) impairment of acquired intangible assets as a result of technological advancements or worse-than-expected performance of the acquired company or its product offerings; (9) unknown, underestimated and/or undisclosed commitments or liabilities; (10) excess or underutilized facilities; and (11) ineffective integration of operations, technologies, products or employees of the acquired companies. Applied also makes strategic investments in other companies, including companies formed as joint ventures, which may decline in value and/or not meet desired objectives. The success of these investments depends on various factors over which Applied may have limited or no control and, particularly with respect to joint ventures, requires ongoing and effective cooperation with strategic partners. Mergers and acquisitions and strategic investments are inherently subject to significant risks, and the inability to effectively manage these risks could materially and adversely affect Applied's business, financial condition and results of operations.

Manufacturing interruptions or delays could affect Applied's ability to meet customer demand, while the failure to estimate customer demand accurately could result in excess or obsolete inventory.

Applied's business depends on its ability to supply equipment, services and related products that meet the rapidly changing requirements of its customers, which depends in part on the timely delivery of parts, components and subassemblies (collectively, parts) from suppliers. Some key parts may be subject to long lead-times and/or obtainable only from a single supplier or limited group of suppliers, and some sourcing or subassembly is provided by suppliers in developing regions, including China. Significant interruptions of manufacturing operations or the delivery of services as a result of: (1) the failure or inability of suppliers to timely deliver quality parts; (2) volatility in the availability and cost of materials; (3) difficulties or delays in obtaining required export approvals; (4) information technology or infrastructure failures; (5) natural disasters (such as earthquakes, floods or storms); or (6) other causes (such as regional economic downturns, pandemics, political instability, terrorism or acts of war), could result in delayed deliveries, manufacturing inefficiencies, increased costs or order cancellations. Moreover, if actual demand for Applied's products is different than expected, Applied may purchase more/fewer parts than necessary or incur costs for canceling, postponing or expediting delivery of parts. Any or all of these factors could materially and adversely

affect Applied's business, financial condition and results of operations.

Table of Contents

The failure to successfully implement and conduct offshoring and outsourcing activities and other operational initiatives could adversely affect results of operations.

To better align costs with market conditions, increase its presence in growing markets, improve its tax structure, and enhance productivity and operational efficiency, Applied conducts engineering, software development and other operations in regions outside the United States, particularly India and China, and outsources certain functions to third parties, including companies in the United States, India, China and other countries. Outsourced functions include certain engineering, manufacturing, customer support, software development, information technology support and administrative activities. The expanding role of third party providers has required changes to Applied's existing operations and the adoption of new procedures and processes for retaining and managing these providers in order to protect Applied's intellectual property. In addition, Applied has implemented several key operational initiatives intended to improve manufacturing efficiency, including integrate-to-order, module-final-test and merge-in-transit programs. Applied also is implementing a multi-year, company-wide program to transform certain business processes, which includes transitioning to a single-vendor enterprise resource planning (ERP) software system to perform various functions. If Applied does not effectively develop and implement its offshoring and outsourcing strategies, if required export and other governmental approvals are not timely obtained, if Applied's third party providers do not perform as anticipated, or if there are delays or difficulties in implementing a new ERP system or enhancing business processes, Applied may not realize productivity improvements or cost efficiencies, and may experience operational difficulties, increased costs, manufacturing interruptions or delays, loss of its intellectual property rights, quality issues, increased product time-to-market and/or inefficient allocation of human resources, any or all of which could materially and adversely affect Applied's business, financial condition and results of operations.

The ability to attract, retain and motivate key employees is vital to Applied's success.

Applied's success and competitiveness depend in large part on its ability to attract, retain and motivate key employees. Achieving this objective may be difficult due to many factors, including fluctuations in global economic and industry conditions, changes in Applied's management or leadership, competitors' hiring practices, and the effectiveness of Applied's compensation programs, including its equity-based programs. Applied regularly evaluates its overall compensation program and makes adjustments, as appropriate, to enhance its competitiveness. If Applied does not successfully attract, retain and motivate key employees, Applied's ability to capitalize on its opportunities and its operating results may be materially and adversely affected.

Changes in tax rates or tax liabilities could affect results of operations.

As a global company, Applied is subject to taxation in the United States and various other countries. Significant judgment is required to determine and estimate worldwide tax liabilities. Applied's future annual and quarterly tax rates could be affected by numerous factors, including changes in the (1) applicable tax laws; (2) composition of earnings in countries with differing tax rates; or (3) valuation of Applied's deferred tax assets and liabilities. In addition, Applied is subject to regular examination of its income tax returns by the Internal Revenue Service and other tax authorities. Applied regularly assesses the likelihood of favorable or unfavorable outcomes resulting from these examinations to determine the adequacy of its provision for income taxes. Although Applied believes its tax estimates are reasonable, there can be no assurance that any final determination will not be materially different from the treatment reflected in Applied's historical income tax provisions and accruals, which could materially and adversely affect Applied's results of operations.

Applied is exposed to various risks related to legal proceedings or claims and protection of intellectual property rights.

Applied from time to time is, and in the future may be, involved in legal proceedings or claims regarding patent infringement, intellectual property rights, antitrust, environmental regulations, securities, contracts, product performance, product liability, unfair competition, employment and other matters. In addition, Applied on occasion receives notification from customers who believe that Applied owes them indemnification or other obligations related to claims made against customers by third parties. These legal proceedings and claims, whether with or without merit, may be time-consuming and expensive to prosecute or defend and also divert management's

Table of Contents

attention and resources. There can be no assurance regarding the outcome of current or future legal proceedings or claims. Applied previously entered into a mutual covenant-not-to-sue arrangement with one of its competitors to decrease the risk of patent infringement lawsuits in the future. There can be no assurance that the intended results of this arrangement will be achieved or that Applied will be able to adequately protect its intellectual property rights with the restrictions associated with such a covenant. In addition, Applied's success depends in significant part on the protection of its intellectual property and other rights. Infringement of Applied's rights by a third party, such as the unauthorized manufacture or sale of equipment or spare parts, could result in uncompensated lost market and revenue opportunities for Applied. Applied's intellectual property rights may not provide significant competitive advantages if they are circumvented, invalidated, rendered obsolete by the rapid pace of technological change, or if Applied does not adequately assert these rights. Furthermore, the laws and practices of other countries, including China, Taiwan and Korea, permit the protection and enforcement of Applied's rights to varying extents, which may not be sufficient to protect Applied's rights. If Applied is not able to obtain or enforce intellectual property rights, resolve or settle claims, obtain necessary licenses on commercially reasonable terms, and/or successfully prosecute or defend its position, Applied's business, financial condition and results of operations could be materially and adversely affected.

Applied is subject to risks of non-compliance with environmental and safety regulations.

Applied is subject to environmental and safety regulations in connection with its global business operations, including but not limited to regulations related to the development, manufacture and use of its products; recycling and disposal of materials used in its products; the operation of its facilities; and the use of its real property. Failure or inability to comply with existing or future environmental and safety regulations could result in significant remediation liabilities, the imposition of fines and/or the suspension or termination of development, manufacture, sale or use of certain of its products, and/or may affect the operation of its facilities, use or value of its real property, each of which could have a material adverse effect on Applied's business, financial condition and results of operations.

Applied is exposed to various risks related to the regulatory environment.

Applied is subject to various risks related to: (1) new, different, inconsistent or even conflicting laws, rules and regulations that may be enacted by legislative bodies and/or regulatory agencies in the countries in which Applied operates; (2) disagreements or disputes between national or regional regulatory agencies related to international trade; and (3) the interpretation and application of laws, rules and regulations. If Applied is found by a court or regulatory agency not to be in compliance with applicable laws, rules or regulations, Applied's business, financial condition and results of operations could be materially and adversely affected.

Applied is subject to internal control evaluations and attestation requirements of Section 404 of the Sarbanes-Oxley Act.

Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002, Applied must include in its annual report on Form 10-K a report of management on the effectiveness of Applied's internal control over financial reporting and an attestation by Applied's independent registered public accounting firm to the adequacy of management's assessment of Applied's internal control. Ongoing compliance with these requirements is complex, costly and time-consuming. If (1) Applied fails to maintain effective internal control over financial reporting; (2) Applied's management does not timely assess the adequacy of such internal control; or (3) Applied's independent registered public accounting firm does not timely attest to the evaluation, Applied could be subject to regulatory sanctions and the public's perception of Applied may decline.

Table of Contents**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

The following table provides information as of July 29, 2007 with respect to the shares of common stock repurchased by Applied during the third quarter of fiscal 2007:

Period	Total Number of Shares Purchased (Shares in thousands)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program* (Shares in thousands)	Maximum Dollar Value of Shares That May Yet be Purchased Under the Program* (Dollars in millions).
Month #1 (April 30, 2007 to May 27, 2007)	1,163	\$ 19.12	1,163	\$ 4,578
Month #2 (May 28, 2007 to June 24, 2007)	8,536	\$ 19.33	8,536	\$ 4,413
Month #3 (June 25, 2007 to July 29, 2007)	10,386	\$ 20.48	10,386	\$ 4,200
Total	20,085	\$ 19.91	20,085	

* On September 15, 2006, the Board of Directors approved a new stock repurchase program for up to \$5.0 billion in repurchases over the next three years, ending September 2009.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Submission of Matters to a Vote of Security Holders

None.

Item 5. Other Information

None.

Item 6. Exhibits

Exhibits are numbered in accordance with the Exhibit Table of Item 601 of Regulation S-K:

Exhibit No	Description
10.49	Applied Materials, Inc. amended and restated 2005 Executive Deferred Compensation Plan, incorporated by reference to Applied's Form 8-K (file no. 000-06920) filed July 13, 2007
10.50	Applied Materials, Inc. amended and restated Global Executive Incentive Plan
10.51	Share Purchase Agreement among Applied Materials, Inc., the Shareholders of HCT Shaping Systems SA and Sellers' Representative dated June 25, 2007
10.52	Separation Agreement and Release between Applied Materials, Inc. and Farhad Moghadam dated July 19, 2007
31.1	Certification of the Chief Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
31.2	Certification of the Chief Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
32.1	Certification of the Chief Executive Officer pursuant to 18 U.S.C. Section 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
32.2	Certification of the Chief Financial Officer pursuant to 18 U.S.C. Section 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
